We may not know just how the spirit of God works upon the heart, but we do know from our own experience and from the experience of others that God can and God will save from sin. There are a great many things in this world that are mysterious to us. Can you explain electricity? Can you explain the dew drops? Tell me how God kisses the little bit of earth and gives it the power to send forth the blooming rose. You say, I cannot explain it. Then stop quibbling about the new birth. You cannot understand it, you never will understand it until you take Jesus as your Savior, and live the way God wants you to live. I can point out to you people in this audience people who have been born again. How God did it I don't know, but I know He did. And I know He can do the same thing for you. God can't save you if you will not accept His gift of salvation.

The son of a Presbyterian minister in the south was arrested because he belonged to the Ku-kluz clan. He was tried, convicted and sent to the penitentiary. His aged father circulated a petition and secured hundreds of signers urging President Grant to pardon the boy for the sake of his parents. The father took the petition to Washington, presented it to the president who granted the pardon. The old man received it, hurried to the penitentiary and was shown to the cell where his boy was imprisoned. Standing with his hand upon the grated door he said. John, I have good news. I have a pardon from President Grant and you can go home with me and see your moth-

SAVINGS FUNDS NEAR $2,000,000,000 MARK

New York—Savings bank deposits in New York State amounted to nearly two billion dollars at the close of 1915. The figures were presented at a meeting of bank officials at the Hotel Biltmore yesterday, to celebrate the one hundredth anniversary of the Savings Banks' Association.

At the beginning of the year there were 3,181,023 savings bank depositors in New York State, with deposits aggregating $1,771,560,808. This State has one-third of the country's savings in bank.

The Man Who Worried

And In One Case There Was Something to Worry About.

By JOHN T. LARNED

I began my business career at seventeen as office boy with an importing house. My father, who was a friend of the proprietor, Mr. John Edsall, secured me the position, and I was on social terms with the Edsall family. I was interested in my work, whatever it was, and that is an important element of success. I was connected with different departments at different times, and in this way I gained a general knowledge of the business.

Mr. Edsall's only child was a daughter, who when I came of age was fifteen years old. Some girls of fifteen are like a six-weeks-old colt, all limbs and very awkward. Lucia Edsall was the reverse of this. She was very pretty and graceful as a fawn. I fancied her from the first moment I saw her and had evidence that she fancied me. But a girl of that age will usually cling to any young fellow with whom she associates.

Nevertheless, after she had been at boarding school for a year, on her return, although she was more careful in showing her feelings for me, I had reason to believe that they had not changed. I was not in receipt of an income to marry my wealthy employer's daughter. Nevertheless there was sparring between Lucia and me that was dangerously near to love making.

Another year's separation occurred—a trip abroad Lucia made with her mother—and on her return, while I saw no change in my sweetheart, I had become impressed with the risk to me in appearing as a suitor for the hand of my employer's daughter. Should he have other plans for her he might assume that I had clandestinely won her and be proportionately indignant. I was in high favor with him in a business way, and my prospects were very bright. It would be a terrible misfortune to me if such an accusation were brought against me. I would lose not only the girl I loved, but my position, and would have to begin again at the foot of the ladder.

Being a year older on Lucia's return than I was when she went abroad, this view of the case seemed of greater importance to me. There is no one more prone to worry, to take a pessimistic view of his affairs than a lover. I dreaded to have Lucia show a partiality for me, and when she did I repressed its expression. This naturally caused her to treat me coolly, and I was more miserable than before.

I had been spending months in this condition of uncertainty, making myself and Lucia miserable, when Mr. Edsall was taken ill. He sent for me to come to his house and told me that he wished me to run the business, reporting to him every day until he had recovered. I was astonished at this, because there were men much older than I who had been in his employ for many years. Of course I was much flattered. I was also rejoiced because it indicated that some day I might be promoted to a position next to the proprietor of the business.

But the higher I was lifted in a business way the more anxious I became lest something should bring about a more open love affair between Lucia and me, and my prospects would be brought to a sudden collapse. I had not definitely made love to her. The matter was drifting. If I told her that I loved her I should be in a position to offer myself to her. That would necessitate my going to her father, and I had not the faintest knowledge what ground he would take. But I feared the worst.

When he recovered and resumed his place as manager of his business he made me his financial man, placing me in charge of not only the moneys he used in the business, but his securities. This showed great confidence in my integrity, but I was all the more panic stricken at the prospect of his coming to a knowledge of what was going on between me and his daughter.

I worried, too, about the affairs of my department. The cashier, Samuel Gregory, was under my orders, and the only person besides myself and Mr. Edsall who had the key of the safe. Gregory had been with the concern twice as long as I had, but I worried lest he would involve me in some misfortune. He was not as careful with his personal expenditures as I thought a man entrusted with funds should be, but that was not sufficient cause for my pessimism.

One afternoon after bank hours a customer from another city came into the office and insisted on paying his account, a very large amount, in bank bills. I was obliged to receive it, and it was placed in the safe. That night I lay awake, not only thinking of the equivocal position I occupied with respect to having a love affair with the daughter of a man who trusted me implicitly, but who could wreck my prospects if he considered that I had been treating him dishonorably. Worry is a habit, and if a man permits himself to worry about one thing he will worry about everything.

What made me worry about the money in the safe was that when I had reported the fact of the payment to Mr. Edsall he said that I should have declined to receive so large an amount in currency after banking hours.

Not being able to sleep in a comfortable bed away from the funds in question, I got up and dressed myself, intending to go to the office and sleep on a lounge there was in Mr. Edsall's private room, where I would be near the safe. On reaching my destination I unlocked the door to the main office and went in with no light except what came from the street. I feared that if I switched on the electrics some policeman would come to investigate what was going on. I did not care to make an explanation, and would not have it known by any one connected with the office that I had been there.

Feeling my way to the lounge, I lay down. I was some time getting to sleep, for I had a new source of worry in the fact that if I were found in the office my motive for being there might be misinterpreted. However, I finally dropped into a light and troubled slumber.

I was awakened by a sound in the next room. I did not stir, but listened. I faintly heard something drop in the safe lock. Had my hearing not been very acute I should not have detected it. After hearing several such drops, which I recognized from having opened the safe so many times, I heard the heavy door swing open. For a moment it seemed that I was still asleep and dreaming a dream that had been excited by my imagination. Then I sprang up and, without thinking that I was liable to be shot down, switched on an electric light.

There stood Gregory facing me, white as a sheet, in his hand a package of currency. We looked at each other for a moment, then Gregory, realising his position, broke down and began to beg piteously that I would not expose him.

I told him to replace the package of bills he had taken and close the safe. Then he confessed that he had been speculating and had got caught. He was intending to take a few thousand dollars to tide him over for a few days, trusting to the fact that he alone looked after the cash on hand to replace it before the deficiency should be discovered.

I asked him how much money would tide him over, and he told me that $2,500 would do it. I had saved several times that amount and told him that I would let him have the money in the morning, but he must leave it to me to act toward him in other respects as my conscience dictated. He declared that this was the first time in his life that he had appropriated money that did not belong to him and assured me that what I had offered to loan him would put him beyond further need. If it were not so he would not have acted as he had. This did not influence me. I told him that I would tell him what I would do as to making known my having surprised him, and, leaving the building, we parted on the sidewalk.

It was long past midnight when I got back into my own bed. I lay awake wondering if my having gone to the office at the same time Gregory had gone there to make a loan of the firm's funds was a coincidence or whether a subconsciousness that he was intending to do so had led me there. It is said that no one can think of two things at the same time, but these thoughts did not interfere with a dread that, no matter what course I should pursue with Gregory, it would result unfortunately for me.

The next morning he did not show up. I waited till noon, and since he did not appear I laid the matter before Mr. Edsall. An examination was made, but no deficiency was found. But it came out that Gregory was heavily in debt and he had decamped to parts unknown.

I did not tell Mr. Edsall that I had offered to help Gregory, but I told Lucia, and she told her father. The morning after she did so he announced that he had decided to incorporate his business and I would be vice president and general manager. What else Lucia said to him, whether she hinted at the conditions between her and me, I don't know, but from that time he treated me more like a son than an employee.

And from that time forward I could not possibly find anything to worry about, except that I realized "there is many a slip 'twixt the cup and the lip" and felt an uncertainty as to my possessing the girl I loved. However, she did what she could to assure me that all would be well and to relieve my misgivings. But she had a hard time convincing me that I would be acceptable to her father as a suitor for her.

One day I told him that I loved his daughter; that I had never spoken to her of my feelings for her and had endeavored to treat her as a friend. But a time had come when I considered it both unjust to her and to myself that the matter should remain as it was between us, and I asked him if he would consent to my proposing to her for her hand. When I had finished I waited with a throbbing pulse for his reply. It was not long delayed.

"Young man," he said, "you have acted honorably in everything ever since I have known you. If Lucia is willing I am."

That's the end of the story. My father-in-law now relies upon me as manager of his business. He says that the only thing against me as a good business man is that I take things too seriously. In other words, I am inclined to worry, and that wears on my physical capabilities. However, since I got out of the false position induced by my love affair I have done much better than formerly.

I had become president of the company when Gregory returned. He had managed to get a clearance from his debts and begged me to give him a chance to make a living. I gave him a position, and he has been a faithful servant ever since.

THE STORY OF A GLOBE TROTTER

A Maiden Strangely Met and Then Lost In Siberia.

I am a globe trotter.

One day when I was tramping in Switzerland I met a young fellow who asked if I could direct him to Interlaken. I replied that I was going there and if he would join me I would show him the way. He did so, and we walked on together. His features were so cameo-like that had they not expressed a good deal of character I should have considered him effeminate. He said he was a student, but when I asked him at what university he studied he evaded the question, pretending not to have heard it. The distance to Interlaken was five miles, and before we reached the place he had without any effort on his part gained a singular influence over me. I am a believer in transference of soul power, and I have since attributed the young man's effect upon me to deep emotions that were at the time absorbing his whole existence. On reaching Interlaken we went to different hotels. I did not see him again during my stay there.

When the czar visited Paris several years ago, on the day of his entry I strolled out to see the imperial cavalcade. Turning from Rue Rivoli into the Place de la Concorde a figure came hurrying toward me, and as it passed I recognized the young man I had met in Switzerland. I shall never forget the expression on his face. I could not read what that expression reflected from the soul within, but the meeting happened near the spot where the guillotine had been set up during the reign of terror.

Some months later I was attending an evening party at Geneva, where I was introduced to a young girl, Mlle. Zabriskie, whose face the moment I saw it made me start. It was the counterpart of that of the young man I had met near Interlaken and afterward in Paris.

"Monsieur, why do you look at me so?" she asked.

"Mademoiselle," I replied, "I have met a young man who is your very image."

"Oh, dear! When shall I cease having to explain this matter? I have a twin brother. Doubtless it is he you have met. People are always confusing us."

"Was he at Interlaken a year ago?"

"Let me see. Yes; I think he was. I am sure he was."

"And at Paris during the visit of the czar?"

Her expression changed. She seemed to be trying to master some emotion.

"Did you meet him there?" she asked in a whisper.

"I did."

She gave me a look as much as to say, "Let us change the subject."

I respected her wishes, but my curiosity struggled with my politeness, for I burned to ask more about this mysterious brother.

When I went home that night my brain was in a whirl. Few people have thus come under a sudden dominating influence as I did, and words are inadequate to express or explain it to those who have not. I only know that I was on the verge of being madly in love. I met Mlle. Zabriskie several times during my stay in Geneva, passing rapidly from one stage of enthrallment to another. One afternoon I went to her house—she was boarding, but I did not learn under whose chaperonage—to keep an appointment with her to saunter on the banks of the blue Rhone. To my astonishment, I was told that she had left Geneva. She had left no word where she was going or any message for me. I called at the house where I had first met her, and they told me that their acquaintance with her had been short, and they could not, or would not, tell me how they had made it. It seemed to me that I must find her or life would be unbearable; but, having secured no clew, I did not know where to look for her. I visited different cities, going often to theaters and gardens, but never in two years met either her or her brother.

During that memorable Sunday when the workmen marched to the Winter palace and to slaughter I was in St. Petersburg. For weeks after I saw persons almost daily marched to prison, and one morning while standing at my window a band of men and women passed that I was told was starting for Siberia. Among them I saw again the woman who had enthralled me. There was the same expression on the face I had so often seen there, and I now recognized it as voluntary martyrdom. What became of my faculties for the next few minutes I know not, but when I came to myself the throng of exiles had disappeared.

I learned from a revolutionist that Zabriskie was an assumed name under which the young devotee had gone to Paris to try to assassinate the czar. There was no twin brother. The offense for which she had been exiled was inciting the laborers to action—indeed, inspiring them behind their barricades.

And now, after drawing on my bankers in America for the half of my fortune, I have secured permission to go to Siberia to examine into the condition of the prisons there with the pretended view to counteract the effect in the western world of unfavorable statements of others. All I ask is that I shall find the officials as ready to accept bribes as they are reported to be. If so I shall bring back my love to life and liberty.

FLORAL ARISTOCRATS.

Orchids Are Not Parasites, and It Is Difficult to Raise Them.

Aristocrats of the flower kingdom—and probably the least understood. You hear them called parasites, which is only one of the common mistakes made about the orchid. You see a hundred different shapes and a dozen different colors grouped together, each shape perhaps a distinct family and each with a separate name.

In the first place, orchids are not parasites. A parasitical plant is one which gets nourishment from another plant. Certain orchids live on trees, but they get their food and drink from the air by means of aerial roots. We call them epiphytes. Other orchids get their nourishment directly from the ground. They're called terrestrial orchids.

People don't understand, either, why orchids cost so much. They fail to see why a tiny plant is sold for, say, $1,000. If they realized that rare orchids may have cost a long trip into a tropical jungle to obtain and that it takes from eight to ten years to raise a plant from the seed, with patient care and treatment, they could see why these flowers remain in the aristocratic class.

Only the orchid grower can understand all the details of his art, but the flower lover can easily learn to distinguish the various types.—Philadelphia North American.

THIS FISH IS A BUTCHER.

And He Carries His Saw In His Ugly Mouth at All Times.

Moral of this fish story is: The value of anything depends on how it is used. A safety match used to light a beacon lamp and another match used to set fire to a city have widely separated ranks in the realm of utility. On the same principle of values the sawfish belongs near the bottom rank in the ocean kingdom.

His saw, the presence of which you may have guessed already, consists of a long, beaklike mouth decorated with many sharp, firm spines. It varies in length with the size of the fish, some monsters twenty feet long carrying saws six feet long and a foot wide.

A saw, like a match, varies in value according to the way it is used. That's where the sawfish makes a fizzle of life. Think how much good he could accomplish by using his saw on harbors choked up with weeds, channels blocked with logs and lagoons crowded with trees and undergrowth.

Instead of a carpenter, a road builder, a farmer, the sawfish becomes a butcher. He swishes his saw this way and that quite recklessly and cuts up smaller fish into steaks and sausage; then he eats the pieces.—Philadelphia North American.

The Better Ways.

Let it be said once for all that it is better for both body and soul to be obliged to go hungry sometimes than to be full always; it is wholesomer to be weary frequently from hard work than to keep on a dead level of comfort or to know weariness only from the spinning dance and the daily pleasure; it is cleaner to be dusty and bathed in the blood and sweat of battle than to be so sheltered as not to know the meaning of a hand to hand conflict with a real problem or fierce temptation; it is grander to break the shackles of exclusiveness and walk free in the dingy city of social unpopularity than to be the idol of men and women who do not count for, but rather against, the progress of the race.—From "The Inspiration of Responsibility," by Bishop Charles H. Brent.

Meteors.

Meteors had an unusual influence on the Greeks and Romans, who in a way worshiped the falling bodies of luminosity. It is declared that the Palladium of Troy and the image of Diana at Ephesus were erected to meteors. At times the fall of these mysterious strangers has been accompanied by disastrous results, for it is on record in China that ten persons have been struck and killed by them. The Smithsonian institution has among its meteoric collections one which weighs in the neighborhood of 500 pounds, whose composition is nearly pure nickel. There have been discovered by chemical analysis twenty-nine elements in meteors, all of which are found on and in the earth.

Cats and Needles.

Cats seem to have a habit of swallowing needles. When a cat is brought to a veterinary hospital suffering with a cough the doctor always looks for a needle. In one instance Dr. Childs of New York operated on a cat to remove what he thought was an ordinary needle. He found a hatpin nine inches long. But the cat's life was saved.—Popular Science Monthly.

The Modern Moses.

"What's your idea of a party leader?"

"A party leader," replied Senator Sorghum, "is a man who finds out what the people want."

"And then gives it to them?"

"No; promises it."—Washington Star.

Pleasant Words.

Poet—I seek a phrase that shall express the joy of life in two words. Can you suggest anything? Unfeeling Friend—Received payment!—Judge.

Without an Effort.

Jack—Did your friend, Miss Howler, ever reach high C? Maud—Yes; one day at the dentist's I believe she did.—Boston Transcript.

Even the man who thinks he knows it all may change his mind after he gets married.—Philadelphia Record.

Awning Stripes For Outings

THE louder the plaid, stripe and check for all sport wear the more modish the garment. This skirt is king's blue and white, worn with a dashing white silk sweater with sash and patch pockets in novel ribbing. The straw hat has a band to match the stripe. Please notice how full the skirt is cut.

• • •

Many buttons covered with silk to match the frock are used for trimming.

Some of the sleeves, wide at the wrist, have buttonholes at each side of the cuff, and two buttons, held together with several strands of twisted silk, are used in these buttonholes like link cuff buttons.

• • •

High tan boots in a soft dark brown cut on a most attractive last, have high heels and are laced through blind eyelets with round laces.

ANNA MAY.

The KITCHEN CUPBOARD

EAT DANDELIONS AND IMPROVE YOUR LAWN.

EARLY spring is, of course, the time to eat dandelions, for once this lion toothed weed has lost its youth it is unfit for humans.

The usual way of serving the dandelion is as a green. The leaves must be very thoroughly washed in many waters, for dandelions are usually gathered from the wayside and are even dustier than, though perhaps not so gritty as, spinach leaves. After the leaves are washed put them in a bowl, cover with cold water and let stand for two hours. Drain, add boiling salted water and boil for twenty minutes. Drain thoroughly, chop fine, reheat with plenty of butter and season with salt and pepper. Place in a dish and garnish with rings of the white of hard boiled eggs and sprinkle with the grated or crumbled hard boiled yolk.

For salad dandelions are also useful. Only the youngest leaves can be used for salad, and they must be washed thoroughly and drained. Then they should be mixed with French dressing and sprinkled with diced hard boiled eggs, diced beets or diced radishes.

Bacon and dandelion salad is truly delicious. To make it, wash and drain a quart of the white, tender leaves of dandelions. Season with salt and pepper. Fry crisp brown six thin slices of bacon and chop them fine and sprinkle on the greens. Add a quarter of a cupful of vinegar to the grease in the pan in which the bacon was cooked. Heat thoroughly and pour over the dandelion leaves.

Dandelion Salad.—Arrange dandelion leaves in a circle on individual salad plates. In the center of each plate place half of the yolk of a hard boiled egg, picking the egg with a silver fork so that it will resemble a flower. Pour French dressing over all.

Dandelion Wine.—Materials: Four quarts dandelion blossoms (good measure), four quarts boiling water, three and one-half pounds granulated sugar, four lemons. Utensils: Large granite pan, jar, grater, bottles. Directions: Pour boiling water over blossoms and let stand twenty-four hours. Add the grated rind and juice of lemons to the sugar. Dissolve on stove, then add to water which has been poured off the blossoms. Let stand in jar two weeks. Bottle, leaving uncorked for a time.

Anna Thompson

HONORED THE PASS.

And, as One Good Turn Deserves Another, It Was Used Again.

I was practicing law in Nevada, writes Thomas Fitch, and had successfully defended some men who were accused of stage robbery. A week afterward, with some companions, I was "seeing off" a London mining expert who was about to depart on the stagecoach. After a round of drinks he said to me jocularly: "I may meet some of your clients on the road. I wish you would give me a pass." "Certainly," I replied. I stepped to the hotel desk and on a sheet of my office paper which I happened to have in my pocket wrote: "To All Road Agents—Please pass the bearer and oblige me." I signed my name thereto. With a laugh he pocketed the note, and we bade each other goodby.

That night, sure enough, the stage was stopped and the passengers lined up and relieved of their money and valuables by masked highwaymen. When my friend was reached he handed my note to the robber, exclaiming, "Here, my man, is a note for you." The robber carried it to the stagecoach lamp, read it and handed it to the captain of the gang, who read it and with a grin that could be seen below his mask, exclaimed, "That's good!" and passed the bearer of the note without robbing him.

Months afterward I received from the county jail a message from a man who was accused of being a participant in a shooting scrape that he desired to see me. I went there. He said that he desired to employ me to defend him. "I have no cash to pay a fee," said he, "but maybe this will serve for one." He handed me the pass I had issued. "It's good," said I. Could I have said less?—Case and Comment.

Hens Lay Two Eggs a Day.

Sandusky, O.—Henry McElfery, a farmer living near Milan, says he has built a henhouse so illuminated with acetylene gas that each day is divided into four periods, two of darkness and two of light so alternated that his hens have what they think is two days and two nights every twenty-four hours. "The result is an egg from each hen every time one of the artificial days dawns," said McElfery, who, fighting the high cost of living, refuses to project his scheme.

Gets Shortest Letter.

Elyria, O.—The shortest letter ever known in this section was received by James Pearod, constable in Sheffield township, from C. A. Johnson of Youngstown. It says, "As I have nothing to do I shall write, and as I have nothing to say I shall close."

FRAMING PICTURES.

The Art Reached Its Climax In Italy In the Sixteenth Century.

It is a significant sign of the unimportance accorded to picture frames that in attempting any research on the subject one can only discover an occasional notice of some individual frame among a mass of detail comprised under the generic title of "Frames," which ranges from chimney pieces, door furniture and girandoles down to the designs employed in book illustration, called by the French "cartouches."

Only in Italy was the art of picture framing a fine art, and the examples worth studying belong almost entirely to that country.

Picture frames are of comparatively modern origin, for during the long period of the middle ages such portable pictures as existed were inclosed in wooden cases with doors and had, consequently, no frames, while mirrors were not yet in existence. It was not till life became more settled and houses were considered in relation to peace as well as war that the custom began to prevail of placing pictures on walls. They start, therefore, in the fifteenth century and are at the height of their perfection in the sixteenth.

From the earliest times Italian artists knew that for a painting to be rightly appreciated it was necessary to inclose it in a kind of surrounding. They knew, too, that it could never be a matter of caprice what that particular surrounding should be, but that it must be chosen scientifically and with due regard to the effect of the painting on the spectator and of the whole as a work of art.

It is only necessary to study the fine examples that are still in existence from the best period of this art, which appears to have been exclusively Italian, to realize that neither chance nor fashion entered into it. On the contrary, it was the outcome of an instinctive aesthetic sentiment of feeling for the beautiful in conjunction with an almost scientific appreciation of what would enhance the intelligent understanding of the picture. Whether we look at them in their richness or their simplicity, we shall note that the structure of the frame was first carefully studied and adapted to its purpose of suitably inclosing the picture and that its subsequent enrichment, whether by modeling, gilding, painting or however, lost their native character, and coming under French influence became more and more debased until all sobriety of treatment disappeared.—Scribner's.

Measuring Your Pace.

How many steps do you take to the mile? Even if your considered reply be "Seventeen hundred and sixty," I shall take leave to doubt it. Should you be a British infantryman your pace will be the longest of any infantryman in the world. The Russians' pace is the shortest, being but twenty-seven and one-half inches; the French, Italian and Austrian pace is twenty-nine inches, the Germans do thirty-one inches, while British soldiers stride an extra half inch. But your own pace, what of it? It depends upon your height. Take your eyebrow height, halve it, and that represents your pace. You will find it to be somewhere between thirty inches and thirty-two inches, so that you will need between 2,000 and 2,100 paces to the mile.—London Chronicle.

Ancient Barber's Forfeits.

Customers of hair dressers at one time were in danger of having to pay a forfeit as well as their fee when entering the barber's shop. Until half a century ago some barbers still kept a list of rules hanging in their shops—chiefly concerning swearing, seeking to be served out of turn, etc.—the penalty for breaking which was the price of a pint of ale. The antiquity of the practice is evident by Shakespeare's allusion to it in "Measure For Measure:"

> The strong statutes
> Stand, like the forfeits in a barber's shop,
> As much in mock as mark.

—London Standard.

A Grievous Burden.

"Just think!" exclaimed the humanitarian, "when a man enters prison he loses his identity and becomes simply a number."

"Well," replied the man in motor togs, "except for the fact that he is confined and has to do hard labor, I don't see that he is much worse off than I am. I not only have a number, but I'm compelled to pay for it."—Birmingham Herald.

A Statesman's Queer Ambition.

The great Lord Grey had an ambition far above politics. He passed the reform bill, but that did not satisfy his soul. There was talk of Taglioni, and Grey said quite earnestly, "What would I give to dance as well as she!" The statesman who had been prime minister and had left an indelible mark on the history of his country was envious of an opera dancer!—London Saturday Review.

Father Time.

Time waits for no man—he's goin' jes' a-skimmin', an' he'd never make the journey if he waited for the women. Don't stop for sigh or song—he's stronger than the strong; to gloom time or glory he's a-goin' right along!—Atlanta Constitution.

The Attraction.

She—So you are engaged to Miss Baggs. I'm sure I can't see anything attractive about that woman. He—Neither can I see it, but it's in the bank, all right.—Boston Transcript.

He lives in fame who died in virtue's cause.—Shakespeare.

A simple morning frock of striped percale made attractive by an unusual line of adjustment. The collar and cuffs are of white lawn, daintily embroidered. A deep tuck divides honors with buttons in the skirt decoration. In medium size the dress requires 6 yards 36-inch material.

Pictorial Review Costume, No. 6592. Sizes, 34 to 48 inches bust. Price 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

Diplomacy.

"It takes diplomacy to get on with a husband," said the woman who speaks her mind freely.

"I believe it does," replied Miss Cayenne. "As I understand it, diplomacy consists largely in seeming to be deceived whether you are or not."—St. Louis Globe-Democrat.

Why She Took Him.

Parson—Do you, Liza, take Rastus for better or for worse? Bride—Well, if Ah got to tell the truth, pahson, Ah'm takin' him cause he's de fust man what eveh axed me.—Boston Transcript.

CRITICISING A CRITIC.

A Little Sermon on the Use of "Slow" as an Adverb.

A Brooklyn man writes to a Manhattan morning paper in great distress because signs by the roadside commonly say, "Automobiles Go Slow." The writer thinks the amount of paint and labor required "to change the adjective to an adverb would be very insignificant as compared with the purifying of a nation's speech."

But if purifying the speech means dropping the use of "slow" as an adverb let us be thankful the purifiers did not get busy before the great English authors began to write. The modern purifiers, or innovators, would deprive us of Milton "swinging slow with sullen roar" and compel Shakespeare to rewrite the first three lines of "Midsummer Night's Dream."

"Slow" as an adverb has been in literature since the year 1500. It is found in Byron, Thackeray and the Edinburgh Review. Johnson's Dictionary of 1773 quotes numerous examples of its use by Donne, Milton and Pope. It seems as if it ought to be especially suitable in an automobile warning sign. For cannot old fashioned people (not "purifiers") remember the couplet in Marmion?

> And come he slow or come he fast
> It is but death who comes at last.

The English language will continue to be a noble and forceful means of expressing thought if it remains proof against new and unheard of rules altering ancient usage. In other words, let us investigate and "go slow" before condemning a word just because it is encountered for the first time.—Brooklyn Standard Union.

Marat's Deadly Prescription.

Whether Marat of "the terror" was a veterinary surgeon or a fashionable physician is a point which historians have earnestly debated. Some light is thrown upon it by the memoirs of the papal envoy of the period, who was one of his patients, and reports as follows:

"He prescribed for me some medicine which would have killed me if the celebrated chemist of the Rue Jacob had been willing to give it to me. 'I see well enough,' he said, 'that this is no medicine for you; it is medicine for a horse. I recognize the doctor's signature; he is mad.' Apparently Marat had mistaken me for one of his patients at the stable at which he was a physician."

The Modest Model.

Julia Ward Howe, though a woman of very good appearance, was extremely modest.

"She once posed for me," said a Boston painter the other day. "But she hesitated a long time before consenting. To urge her on I said:

"'Don't be afraid; I'll do you justice, madam.'

"'Ah,' she answered, 'it isn't justice I ask for at your hands; it's mercy.'"

In and Out.

The old saying that a man cannot be in two places at the same time has at last been proved false.

It was discovered one day that a baseball player, much to the dislike of a number of loyal fans, can be out at home.—New York Post.

Getting What You Pay For.

Church—Seats in the theaters in New York come high, don't they? Gotham—Well, yes, higher than seats in the street cars. But there is the satisfaction when buying a seat in a theater you are pretty sure to get one.—Yonkers Statesman.

Scene from "Passers By" at the Quirk Today.

MILITARY DEFENSE HAS CLOSED OUR EYES, SAYS ASSOCIATION SPEAKER

New York—A plea for an American merchant marine and industrial preparedness was made last night by speakers at the twenty-first annual dinner of the National Association of Manufacturers of the U. S. A. held in the Waldorf-Astoria.

More than three hundred and fifty members representing most of the large industrial concerns of the country were present. The speakers were Charles Nagel, former Secretary of Commerce and Labor; John Hays Hammond and George Pope, president of the association.

In his speech Mr. Nagel said: 'We have let our minds stray away from our own country during the war. I believed in preparedness long ago, but military preparedness seems to have closed our eyes to industrial preparedness. We cannot discuss the former unless we consider the indutrial phase. The Government needs all manufacturing concerns more than they need the Government."

Urges Tariff Revision.

John Hays Hammond advocated tariff revision, schedule by schedule. "This will not only prevent shock to industry occasioned by sudden sweeping changes in the tariff," he said, "but will prevent log-rolling, which makes it possible for selfish interests to secure excessive protection. Our tariff policy should be a national, American policy, permanent in its character and subject only to occasional modification demanded by the exigencies of changing conditions.

"An American merchant marine would be most valuable to-day in the development of our foreign trade. The rehabilitation and expansion of our merchant marine can best be accomplished by private enterprise after the necessary amendment to our navigation laws. Another argument in favor of a merchant marine is that it is an indespensible auxiliary of an efficient navy.

"But, far more important that an American merchant marine is the extension of American banking facilities in foreign countries. This is now made possible by the Federal Reserve Law. The National City Bank of New York is to be commended for its enterprise in establishing branch banks in South America and elsewhere."

Preparedness Is Urgent.

The speaker referred to his being president of the World Court League. "Preparedness," he then declared, "against war is one of the greatest, if not, indeed, the most important of the problem of to-day demanding the immediate attention of our National Congress."

The suggestion of President George Pope, that a nation-wide federation of all employer's associations be formed, was approved at the final business session of the association at its meeting during the day. Resolutions recommending the merging of innumerable local, State and national organizations, representing all forms of American industry, were passed.

BOY SCOUT CHIEFS IN NATIONAL SESSION

New York—Representatives from all over the the country were present at the first national conference of executive officers of the Boy Scouts of America, at local headquarters, No. 200 Fifth avenue, yesterday. The conference is the first of its kind held during the six years the organization has been in existence.

The delegates were welcomed by Colin H. Livingston, president, while James E. West, Chief Scout Executive, presided. Charles L. Smith, formerly a Rocky Mountain guide, but now Chief officer of Pittsburgh, declared there should be more co-operation between the Boy Scouts and the police and fire departments in all cities.

PUBLIC AUCTION

Mr. E. F. Piper has arrived in Fulton with a carload of

HORSES

Ranging from yearling to eight years old, several fine work horses ranging from 1,100 to 1,400 lbs. Can be seen at the Fulton Livery Co.'s barn until

TUESDAY, MAY 23, 1916

when they will be sold at Public Auction, commencing at 1 p. m. *Terms*—9 months on endorsed, approved notes, payable at Citizens National Bank, Fulton, with interest. Dated May 17, 1916.

JOHN MELVIN, Auctioneer.

YE MUST BE BORN AGAIN

(Continued from Page Five)

er before she dies." But the son made no response. "Do you understand me John?" the father continued, "here's a pardon for you." "I am sorry father," said the ungrateful boy, "to give you pain; but I cannot accept it. I have decided not to be brought under obligation to this political administration, and I will serve out my time." The old man would have sunk onto the floor if he had not been caught by the friendly arm of the warden, who carried him to a sofa. When he came to himself he rose, and staggered again to the grated door with the pardon nervously clutched between his fingers, and with tears in his voice and eyes he continued to plead with his son to come home with him, but the son persisted in refusing, and the father had to return without his boy. Now, what did President Grant do? Did he order the officials to drive this man out of his cell, in spite of his refusal to accept the pardon? He acted more wisely. He simply let the sentence of the court abide; the man remained under condemnacion.

I come to you from the High Court of Heaven with the pardon written in the blood of Jesus Christ, and standing before the grated door of your sin I offer you pardon in the name of Jesus. Will you receive it or will you reject it? If you receive it, you are free; if you reject it, the wrath of God abides. God cannot do otherwise than let the sentence of justice remain.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

Never mind your mistakes. The people who make mistakes lead the world. The perfect people work for them, running errands and counting columns of figures.

Only trifles are always true. Every great and serious truth has an obverse side which is also true. Prof. William James was the greatest psychologist of our day, but the best he could do in defining truth was this: "The truth is simply what will work."

The genius is not the man who never made mistakes, who had a chance thrust on him, who was endowed and all that; he is the man who had no chance and was not gifted, but who took the raw material of life and fate as he found it and made something fine cut of it. The only perfect person you will ever meet is the perfect fool.

* * *

It is an old saying that opportunity knocks but once at any man's door, yet there are few men living that cannot testify in their own experience that such is not the case. Opportunity comes often and in various guises. He is not discouraged by our inhospitality or unpreparedness, but returns again and again. In the sense that great opportunities do not offer themselves frequently the old saying may be credited as true, but there are hundreds of smaller chances lying in wait for us at every rising of the morning's sun. We may look back and see the time when, had we been ready to answer the call of some unrecognized chance, our lives might have taken a turn for the better and given us a greater measure of prosperity and success. These are the rare opportunities, but because a man has missed one of them is no reason for him to give up in despair and be blind to the numerous smaller opportunities that present themselves, the seizing of which will make life better for us and others. Hope springs everlasting, and there is good reason why it should. Not until man has passed the age of possible activity and has seen his powers fade away can he truthfully say that opportunity is no longer his possible friend if he will but seize upon the chances that present themselves. It has been said that this is a younger man's age, and so it is in the sense that the vigor of youth is increasingly necessary to keep the pace at which we are living. But it is increasingly an old man's era and people no longer think it necessary to regard themselves as in the human discard because the years of their life have not multiplied. Many active, vigorous people are all the time in evidence, the stimulus of a youthful heart keeping at bay and defying the ravages of time. They have seen many opportunities slip by them, but they are ready and watching for others to come. It is never time to despair until death has laid his mortgage on our earthly frame, and even then many men have gone ahead and done great things for humanity while lingering in the shadow of the tomb. pportunity never quits coming until our eyelids close in their last sleep, and then, if we have lived a life of unselfishness, the influence of what we have done and tried to do will live on for a benediction in generations to come.

* * *

A grapefruit is just a plain yellow lemon that has a chance—and took it.

* * *

FULTON is full of opportunities; look around you and you will find them all over; it's up to you to seize them.

* * *

GOOD ROADS DAY was announced for May 26th, 1916. This day has been postponed until further notice.

* * *

You are part of this great world; do your share of the work that has to be done and when it is all over, you can say: "I have done my duty."

* * *

FULTON is now coming back to normal conditions and you should be wide awake to see it that way and don't yell your head off and say that the town is no good, because it may be that you are the fellow to blame.

OBREGON DIDN'T SAY WILSON WANTS PEACE

Mexico City—General Alvaro Obregon, Minister of War, to-day denied reports in corculation in the United States that he had expressed confidence that President Wilson did not contemplate war with Mexico. He said:

"Please deny the report that I have made a public declaration of confidence that President Wilson does not contemplate war with Mexico.

"I have made no declaration public or private, regarding international relations since leaving El Paso."

PEARL 5,000,000 YEARS OLD.

Found on the Seacoast and Sent to Stanford University.

Stanford University, California.—A pearl estimated to have been formed 5,000,000 years ago and to be the oldest specimen of its kind in the world was found by Stanley C. Herold, a Stanford student, six months ago. The pearl will be presented to the Stanford museum.

The pearl and the cockleshell in which it was imbedded came to Stanford in a consignment of geologic material from the coast of the state of Washington.

According to university authorities the pearl is of little value as a gem, but the oyster in which it was found originated, they said, probably in the paleozoic period.

"We have no record," said Herold, "of pearls having been formed before the time this one was created. It retains considerable luster and when thoroughly polished will regain more, but its 5,000,000 years of existence has taken out about 50 per cent of its luster.

"At the time this pearl was made the dinosaur, mastodon and sabre toothed tiger were in existence."

ROBINS ACCEPT HUMAN AID.

Man Replaces Fallen Nest and Birds Occupy It.

Seattle, Wash.—"I had always understood," said Crawford E. White, the attorney, who lives at 4203 Mead street, "that birds would invariably abandon a nest which had been disturbed by human hands.

"Something that happened in my yard the other day is a distinct exception to this rule. Two robins had a nest in the branches of a cedar tree. The cross limb which held up the nest fell away and let it down on the ground.

"I thought that would be the end of that nest. But the two birds stayed near it all the next day, and finally I got the idea of rebuilding it. I took a foot ladder and fastened the nest back securely in place with some ordinary hay baling wire.

"The robins apparently liked the rough job I made of it, for they came back and have been working together rebuilding the old nest."

GIRLS TOO BASHFUL.

Make Inquiries Over Phone Regarding Man Wishing to Wed.

St. Paul.—"Ambitious, but bashful," is the characterization Joseph Mounts, secretary to Chief of Police John J. O'Connor, made of a St. Paul young woman after a day of telephone calls regarding Elmer Johnson, rancher, of Sidney, Mon., who wrote to the chief making an offer of matrimony to a suitable St. Paul girl.

"Many girls," said Mr. Mounts, "called me asking about Johnson, but none would give me her name. I think the girls are passing up a good thing, because I think the man is on the level."

Johnson has 320 acres of fertile Montana land, two miles from a railroad, and says he is "well fixed."

"Some of the girls talked real fine, too," added Mr. Mounts, "and if Johnson had heard them maybe he would have liked to look them over. It's too bad they are so bashful."

A SWISS MYSTERY

It Looked For a Time as if It Were Beyond Penetration.

BUT IT WAS ALMOST SOLVED.

An American Visitor in the Republic, Who Wanted to Know About Its President, Finally Came Near Getting the Information He Craved.

Switzerland is a republic that runs with the exactness of a Swiss watch, its machinery as hermetically concealed. I had heard that the Swiss republic set the pattern of government for the world, and I was anxious to know something of its methods and personnel.

I was sorry that I was so ignorant. I didn't even know the name of the Swiss president and for a week was ashamed to confess it. I was hoping I might see it in one of the French papers I puzzled over every evening, but at the end of the week I timidly and apologetically inquired of our friendly landlord as to the name of the Swiss president.

But then came a shock. Our landlord grew confused, blushed and confessed that he didn't know it either. He had known it, he said, of course, but it had slipped his mind.

Slipped his mind! Think of the name of Roosevelt or Wilson or Taft slipping the mind of anybody in America—and a landlord!

I asked the man who sold me cigars. He had forgotten too. I asked the apothecary, but got no information.

I was not so timid after that. I asked a fellow passenger—guest, I mean—an American, but of long Swiss residence, and got this story. I believe most of it. He said:

"When I came to Switzerland and found out what a wonderful little country it was, its government so economical, so free from party corruption and spoils, from graft and politics, so different from the home life of our own dear Columbia, I thought, 'The man at the head of this thing must be a master hand; I'll find out his name.' So I picked out a bright looking subject and said, 'What is the name of the Swiss president?'

"He tried to pretend he didn't understand my French, but he did, for I can tear the language off all right—learned it studying art in Paris. When I pinned him down he said he knew the name well enough, parfaitement, but couldn't think of it at that moment.

"That was a surprise, but I asked the next man. He couldn't think of it either. Then I asked a police officer. Of course he knew it all right, 'Oh, oui, certainement, mais'—then he scratched his head and scowled, but he couldn't dig up that name. He was just a plain liar—tout simplement—like the others.

"I asked every man I met, and every one of them knew it, had it right on the end of his tongue, but somehow it seemed to stick there. Not a man in Vevey or Montreux could tell me the name of the Swiss president. It was the same in Fribourg, the same even in Berne, the capital.

"I had about given up when one evening in Berne I noticed a sturdy man with an honest face approaching. He looked intelligent, too, and as a last resort I said, 'Could you by any chance tell me the name of the Swiss president?'

"The effect was startling. He seized me by the arm and, after looking up and down the street, leaned forward and whispered in my ear:

"'Mon Dieu! C'est moi! I am the Swiss president; but—ah, non, don't tell any one. I am the only man in Switzerland who knows it.

"'You see,' my friend continued, 'he is elected privately; no torchlight campaigns, no scandal, and only for a year.'"

Intemperance: Its Curse, and Attitude of Priests Toward Prohibitory Laws Explained to Large Catholic Audience

Perhaps the most profoundly interesting sermon of the entire mission program was delivered to a record congregation of men at the Church of the Immaculate Conception last night by Father Austin, O. M. C. The discourse was a masterly arraignment of drunkenness and its attendant evils, and the priest handled his subject in a manner that called forth much comment not only from the Catholic men, but from the many present of other denominations.

Congregational singing was again a feature of the services, and the musical program, rendered by the men's choir and the men of the congregation included the hymns "Come, Holy Ghost," "Mother Dear, O Pray for Me," and the usual choral service during the Benediction.

The Church and Temperance

Father Stephen, O. M. C. delivered a short instruction on Catholic societies, before the sermon. He urged every man present to become a member of a church society, saying that the various societies did much by their activities to keep the life of the parish at a high standard of enthusiasm. He also pointed out the spiritual benefits that are to be derived from membership in a church society, because the members of the various societies went to the sacraments in a body at stated intervals. The merits of the Holy Name society were given special mention, and the priest urged the men to sign the small white cards of application to membership in this organization which were distributed last night.

The words of the Epistle of St. Paul to the Corinthians, "Neither fornicators, nor adulterers, nor drunkards shall possess the Kingdom of God" were selected as a text for the sermon by Father Austin.

The speaker said:

"We have preached to you thus far on some of the objects of this mission. We have called your attention to the fact that you have an immoral soul, and to the fact that you may lose it. We have called your attention o the sins you have committed, and to the danger that threatens you in death, which may come upon you at any moment. We have shown you that God is merciful, also, and that He will forgive you your past offences if you will but go to Him in contrition for your sins.

"Tonight I will speak on another subject, and that is drunkenness. Our many non-Catholic friends are oftentimes surprised and astonished that the Catholic church, as a church, and its priests have not joined in with the great wave of prohibition that is sweeping this country, the wave that started in the smallest towns and hamlets, then took in cities, counties, and now covers entire states of this Union. They are sometimes shocked at what they choose to term our ideas regarding the drink evil. But if you will but analyze the attitude of the priests of the church and the church itself on the subject you will find that they are as much opposed to the evils of drink as the most radical Prohibitionist. On Prohibition as affecting the standards of man's life, however, neither the Church nor the priests have any opinions.

Describes Extremes.

"I hold no brief for the breweries, the distilleries or any man or organization of men who make money from the sale of drink. The attitude of the Catholic priest is in harmony with the attitude of Christ as given us by he Scriptures.

"If you will recall, the first miracle that Christ wrought was at the request of His mother, when at the marriage feast in Cana, He changed water into wine in order to accommodate His host. The priests do not desire to be more Christ-like than Christ Himself. But the priest as well as the Church, must at all times preach against drunkenness and the evils of indulgence in drink. The Church can not tolerate the vice which the Apostle denounces in the words, "Drunkards shall not possess the Kingdom of God."

"Between the Prohibitionists on the one extreme and the drunkards on the other, however, there is a middle path, the temperate way. And that is the course advocated by the Church.

"No vice, in the opinion of the Church, so degrades a man as the vice of drunkenness. Analyze the condition of a man who has reason to guide him, and still goes down into the abyss of drunkenness. Compare him with the beasts of the field. He is lower than they are. Not an animal under creation will drink more than it needs, but man gives himself over to strong drink without restraint. Such a man lowers himself to such a degree that he often is forced to fall back on his animal instincts to guide him to his home after a debauch.

"No one can question the fact that the vice of drunkenness lowers man. Drunkenness is a mortal in, and you know the definition of a mortal sin. You also know its inevitable result. It destroys the life of the soul, it is committing spiritual suicide. That is the doctrine of the Church on the subject of drunkenness.

"What else does a drunkenness do? Look at a drunkard from a worldly standpoint. He can not be a successful business man. He can not hold a position as a skilled employe because business firms nowadays insist on sober men. The efficiency of a man is seriously depreciated by drink. To be industrious a man must be sober. He can not progress unless he is sober in any line of business or industry and no responsibility can be placed in the man who drinks. Even the occasional drunkard can not hold a responsible position, after his employers learn of his addiction to drink. He can not be depended upon, and he is unworthy to assume no responsible position.

The Benumbed Conscience.

"The same arguments hold good in religion. You can not be a good business man spiritually if you are a drunkard. A man who drinks to excess can not take care of himself spiritually, he can not be relied upon to look after the salvation of his soul. The drunkard is not a success from a spiritual standpoint. He is not one to be over-awed by the responsibilities which rest upon him. He can forget that he is a father, or a husband, and he can fling aside every moral law. He has not regard for the laws of God or man. He can stand by and see his children starve, and still that appetite for drink must be satisfied, even though it means hardship to his family, even though he forces his children into an institution by his neglect. His conscience slumbers, and he falls into a moral lethargy.

"What a pity it is that a man endowed with a free will, a soul, and reason, can lower himself to the point where he is forgetful of the responsibilities which rest upon him, and for-

STUDENTS AND NESTLE FOOD EMPLOYES OUT TO HEAR PEACOCK

Twenty-three hundred persons attended the revival services last night at the Fulton tabernacle and one hundred hit the trail for a better life. The audience included delegations representing the Peters' and Nestle plants in this city, and the Fulton High School,

The Peters' and Nestle Food Company employes carried a large banner, upon which was painted the two hemispheres of the globe, with the word "Peters'" written upon one and "Nestle" upon the other. Between the two hemispheres was inscribed, "The World For Christ." The delegation comprised 150 men and women, all employed at the Fulton plant of the company.

High school pupils numbering 350 including several members of the factulty, also occupied a reservation. Each class carried a banner designating the year of graduation of the class, and showing the class colors, as follows: 1916, Purple and White; 1917, Blue and White; 1918, Orange and Black; 1919, Orange and Black; 1919, Maroon and White. The pupils sang several songs and gave their class and school yells. The song, "Alma Mater" was concluded with a special chorus written for the occasion. The Nestle and Peters' employes also sang a special song to the tune of "Marching Through Georgia."

When Mr. Peacock called for trail-hitters, there was an immediate response from all quarters of the tabernacle. Great enthusiasm prevailed, and the congregation sang several inspiring hymns under the direction of Chorister Warth.

Tonight the O. U. A. M., Daughters of Liberty, Business Men and Boys will occupy special reservations. The business men will meet at the New York Central station. The boys will gather at the First Baptist church at 6 o'clock where they will be enterained at a luncheon, afterwards marching to the tabernacle.

Tonight the collection will be given to the Salvation army in order to reimburse that organization for the loss it has sustained through the discontinuance of its street meetings, the collections from which afford the Army most of the funds with which it carries on its work.

MAIL ARRIVES FROM THE STATES

Photo by American Press Association.

The United States soldiers in Mexico anxiously await the "next mail," which sometimes arrives by aeroplane. When it does come letters from home and newspapers with the "war news" receive undivided attention.

Last Minute News

(By United Press.)

Berlin—Austrian troops continue to drive Italian soldiers from their positions in the captured provinces of the Tyrol.

Alternating bombardments of the most violent characters and sharp infantry dashes have pushed the Italian invaders back to the border of Italy. Indeed, it is confidently predicted here today that fighting will soon be in progress upon Italian soil.

* * *

Paris—In an infantry attack led by two divisions, the Germans occupying territory south of Hill No. 287 have been driven out of the Avocourt woods.

* * *

Washington—President Wilson awaited anxiously today a reply to his cablegram sent to London last night in an effort to save the life of Jeremiah C. Lynch, the American citizen condemned to die by the King's Court. It is the President's belief that his efforts will be successful, but should they not succeed Lynch will be executed at 12 o'clock tonight, Washington time.

A message from London, however, in the case of Lynch casts doubt on the status of the case.

At the request of Senator O'Gorman, the President instructed Frank L. Polk, counselor of the State Department, to ask the British Government, through Ambassador Page, to suspend sentence until Lynch's case could be further investigated.

* * *

Berlin—That the Whit Star line steamer Cymric was sunk by an explosion of her boilers is the substance of a report made to the Admiralty today.

* * *

Washington—A report has reached here from General Pershing's field headquarters of a raid made by American cowboys upon a band of Villa bandits, south of Madero, Mexico, in which at least one of the outlaws were killed.

* * *

Paris—Emperor Francis Joseph is hurling his forces against the troops of Victor Emmanuel with continued success, say the official war bulletins issued by the war office today.

* * *

Washington—The three Americans, members of the crew of the British steamer Engeroster, sunk off the Isle DeYen, were saved, according to news reaching the State Department today.

* * *

Berlin—The attack made by the French upon Hill 304 has broken down, says the war office bulletin today, and heavy losses are admitted by General Joffre.

* * *

Washington—The Sundry Civil Bill, with total appropriations of $127,237,221 reported to the House today, provides for extensive fortifications in the Panama Canal zone, and arsenals, barracks, etc. on the Hawaiian Islands.

KNIGHTS OF COLUMBUS WILL RECEIVE HOLY COMMUNION

Holy Communion will be received by the membership of St. Joseph's Council, K. of C., Sunday morning at eight o'clock. This is an annual event with the Knights, who always lay aside every consideration for it. It is the desire of the Council's officers that every member shall be in line.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

PRIZE SPEAKING BY H. S. STUDENTS

The following is the program of the prize speaking contest to be held at The Quirk on the evening of May 31, at eight o'clock:

Nature's Teachings .... Hunter
Charlton Hunter
Against Capital Punishment ......
Robespierre
Wallace Russell
Selection .... F. H. S. Orchestra
The Bronze Button .... Thurston
Wendell Carrier
It Needed God .... Adapted
Joseph Mangeot
Selection .... F. H. S. Orchestra
The Mallet's Masterpiece .... Poole
Clara Sylvester
The Rivals .... Smith
Merle Bartlett
Selection .... F. H. S. Orchestra
The Fall of Rienzi ...... Rothwell
Mary Carroll
In the Shadow of the Guillotine...
Rothwell
Lena Kaplan
Selection .... F. H. S. Orchestra

While the judges are reaching a decision a high school quartet consisting of Medora Halstead, Lillias Waugh, Rose Malsh and Zetta Babcock, with Prof. E. F. King as pianist, will render a selection.

The advance sale of seats for the three commencement events will be held in the assembly room of the high school building Thursday, May 25, commencing at 3:45.

PHONE SERVICE BEING RESTORED

The trouble experienced by telephone subscribers in several sections of the city in obtaining connections during the past few days, was occasioned by the storm, and the company has had a force of wire experts working overtime in an effort to once more put the lines in good condition.

The fall of an electric light company cable on a telephone trunk line at the corner of 3rd and Oneida streets, put most of the party wires in that section out of commission, and about 100 subscribers along the Emery road line were also unable to get connections yesterday. Several telephones on the west side of the river were reported out of order, but most of the affected lines have now been repaired, and the wire chief hopes that normal conditions will prevail by this evening.

FLAG DAY WILL BE OBSERVED BY THE ELKS

The Elks of this city will celebrate Flag Day, June 14, with appropriate exercises. Plans for the event were talked over informally at the lodge rooms last night. Tentative arrangements call for a large parade, in which the school children of the city, numbering about 1,000 will take part. Each marcher will carry either a miniature American flag or a buttonhole bow of the national colors.

Speakers will address as befitting the occasion from the porch of the Elks' Home, and the Elks' band will play patriotic airs. It is planned to have the school children sing patriotic songs to the accompaniment of the band, and soloists will also be engaged for the occasion.

FRIDAY MAY 19, 1916.

OLD HOME WEEK

The Old Home Week celebration to be observed in this city the week of July 2 should be one of the jolliest events Fulton has ever known. A number of the "old timers" now residents of other sections will no doubt return and each one should find awaiting him the welcome accorded the prodigal.

To be sure, there must be a feast, perhaps in the nature of a municipal picnic; there'll be speech making and hand shaking, and everyone will wear his best clothes and a truly happy smile. At family gatherings, reunions, etc., the biggest part is the fun of getting ready and the smiling when it is all done. Of course, to be truly a success every one in the family must join in the preparations. No one must be lazy, no one too busy, nor anybody so selfish as to not care. The real success of anything lays in the true spirit exhibited by all concerned.

Secretary Hollenga, of the Chamber of Commerce, has appointed a committee of one hundred and seventy-five persons to aid in the Old Home Week preparations. Every person of this committee should do his part. Let every good citizen, whether a committee member or not, get into the spirit of the affair. If anyone should be so unseeing as to ask "what's the use," the reply should be prompt and pointed to the effect that family reunions are the things upon which our nation was founded. What's good for a nation as a whole is good for a community as an individual.

The success of Fulton's Old Home Week should be heralded throughout the country, and the success will be insured if each person performs with interest his allotted task.

A competitor heads an article, "Common Sense and Feminine Fashions." Some confounded careless compositor must have been responsible for thus bunching up two such different subjects.

"I want my English mutton chops to come with German fried potatoes," said the most neutral man in Fulton to the restaurant keeper yesterday.

If this kind of weather keeps up, the farmers, instead of making hay while the sun shines, will be looking around for an inside job.

BOYS AND GIRLS AT THE STATE FAIR

The State Department of Agriculture announces the part to be played by boys and girls at the State Fair as follows:

Department "L" at the New York State Fair, consisting of exhibits of the work of boys and girls in the schools and outside of them, is not only going to be an interesting one, but it will be one which will arouse the interest of the boys and girls in agriculture and agricultural problems. This Department was proposed by Commissioner of Agriculture Charles S. Wilson and he will be in charge of it at the Fair, to be held September 11th to 16th.

Products raised by the boys and girls, or useful articles made by them, will be exhibited by them in competition for prizes which the State Fair Commission will offer. Exhibits by children in the elementary schools will constitute one section, and exhibits by children in the high schools will make up another section.

The best ten ears of Dent corn exhibited by a boy or girl in an elementary school will bring an award of eight dollars. The second prize will be five dollars, and the third two dollars. There will be five additional prizes of one dollar each. All articles exhibited must be made or produced by the boy or girl exhibitor, and statements from the teacher or parent or guardian, so certifying, will be required.

Similar prizes will be given for potatoes raised by the children, and for apples, vegetables and fruits.

For the best piece of original work in wood, accompanied by working drawings, prizes of from eight dollars to one will be given. The same prizes will be awarded for the best piece of original construction outside of wood, accompanied by a descriptive booklet. The best bird-house, the best fly-trap, the best collection of five weeds mounted on separate sheets and with a description, mounted leaves, mounts showing injurious effects of insects, booklets on the horse, dairy cow, farm census, best exhibit of darning, mending, zest exhibit o ftwo aprons, best exhibit of wash dress, are among those which will be awarded prizes of eight dollars, with other prizes of five dollars, two dollars and one dollar.

The foregoing make up part of the elementary school classes. In the classes in which the pupils in the vocational departments of agriculture in the secondary schools of the State will compete, awards will be made for agronomy exhibits farm mechanics, farm management, and other farm exhibits. The awards will go to the schools making the best display and will total one hundred and fifty dollars.

Any boy or girl in the State who is under 18 years of age is eligible to exhibit in section three. In this competition the best peck of potatoes raised by any boy and exhibited by him will bring an award of five dollars. A second prize of three dollars and a third of two dollars are offered. The same prizes will be given for collections of vegetables, corn, fruit, eggs, best farm produce, maps of the State best designs for book covers, best original designs for cross-stitch embroidery, best pen and ink drawings, either copy or original, best mechanical drawings, and best kept fat, milk and feed records of two or more dairy cows.

Commissioner Wilson is of the opinion that this juvenile department can be so conducted as to arouse interest in agriculture among the children of the State, and he has stated that he will do all he is able to make it accomplish this.

Entry blanks and prize lists may be obtained at the offices of the State Fair Commission in Syracuse. No entry fees will be charged in the boys' and girls' department.

Beginning of the Germ Theory.

Agostino Bassi, a country doctor in the north of Italy, early in the last century was the starter of the germ theory of disease. At that time a peculiar disease was killing the silkworms, bringing ruin to the whole silk country of Italy. Bassi, by the microscope, discovered the germ which is the cause of the disease. The germ later was named Botritis bassiana. Bassi believed and stated that human diseases were also caused by germs. Bassi's work was sneered at and pooh-poohed by his fellow men and physicians, and he failed to make a lasting impression, thereby losing great glory for Italia.

Slavery In England.

Slavery existed in England without any mitigating features worth speaking of until the time of the wars of the roses. Bracton, the famous lawyer of the time of Henry VIII., informs us that the condition of slaves was fearful. It was indeed slavery, pure and simple. All the goods a slave acquired belonged to his master, who could take them from him whenever he pleased, the slave having no redress at law; hence the impossibility of a man's purchasing his own freedom. The only hope for the slave was to try to get into one of the walled towns, when he became free, the townsmen granting him liberty on the condition of his helping them fight the nobles.

HEN 29 YEARS OLD LAYS EGG.

Spanish Annie Breaks All Records, Delighting Her Owner.

Hartford.—Spanish Annie, the grand old hen of twenty-nine years (duly authenticated), owned by Colonel James Blanchard of Dayville is quite content to die because recently she performed what is probably her last labor in this world, something beyond "all the king's horses and all the king's men," for she laid a nice brown egg.

Spanish Annie, called because she is of the black Spanish variety, hasn't laid an egg in years. However, within a year she got her name in the newspapers and her picture in many of them when she hatched out a fine brood of chickens and was hailed as the world's champion Biddy.

Colonel Blanchard, who is proud of his famous hen, has discovered from his poultry records that Spanish Annie was hatched July 4, 1887, and for years contributed generously to the Blanchard daily egg supply. Some years ago her shiny jet black feathers began turning white and her eggs were fewer. Then she lost her quick, dashing gait, and at present her feathers are a mottled gray.

Spanish Annie made no particular commotion after laying her egg, but her happy owner arranged a special feed for her.

Died From Terror.

Perhaps the most remarkable death from fear was that of the Dutch painter Pentman, who lived in the seventeenth century. One day he went into a room full of anatomical subjects to sketch some death's heads and skeletons for a picture he intended to paint. The weather was very sultry, and while sketching he fell asleep. He was aroused by bones dancing around him and the skeletons suspended from the ceiling clashing together. In a fit of terror he threw himself from a window, and, though he sustained no serious injury and was informed that a slight earthquake had caused the commotion among his ghostly surroundings, he died in a few days in a nervous tremor.

When the Cat Was Sacred.

In the middle ages brute animals formed as prominent a part in the devotional ceremonies of the time as they had in the old religion of Egypt. The cat Aelurus was embalmed after death and buried in the city of Bubastis because, according to Herodotus, Diana Bubastis, the chief deity of the place, was said to have transformed herself into a cat when the gods fled into Egypt.

All things come to those who wait, but it takes a lifetime to prove the truth of this.—Philadelphia Record.

DO YOUR SHARE.

Do not be an idler nor a shirker. This world needs the efforts of every one. There is no reason why the burdens of life should be shouldered by a few. Unless you intend to do something that will make people think better of you there is no reason why you should inhabit this sphere.

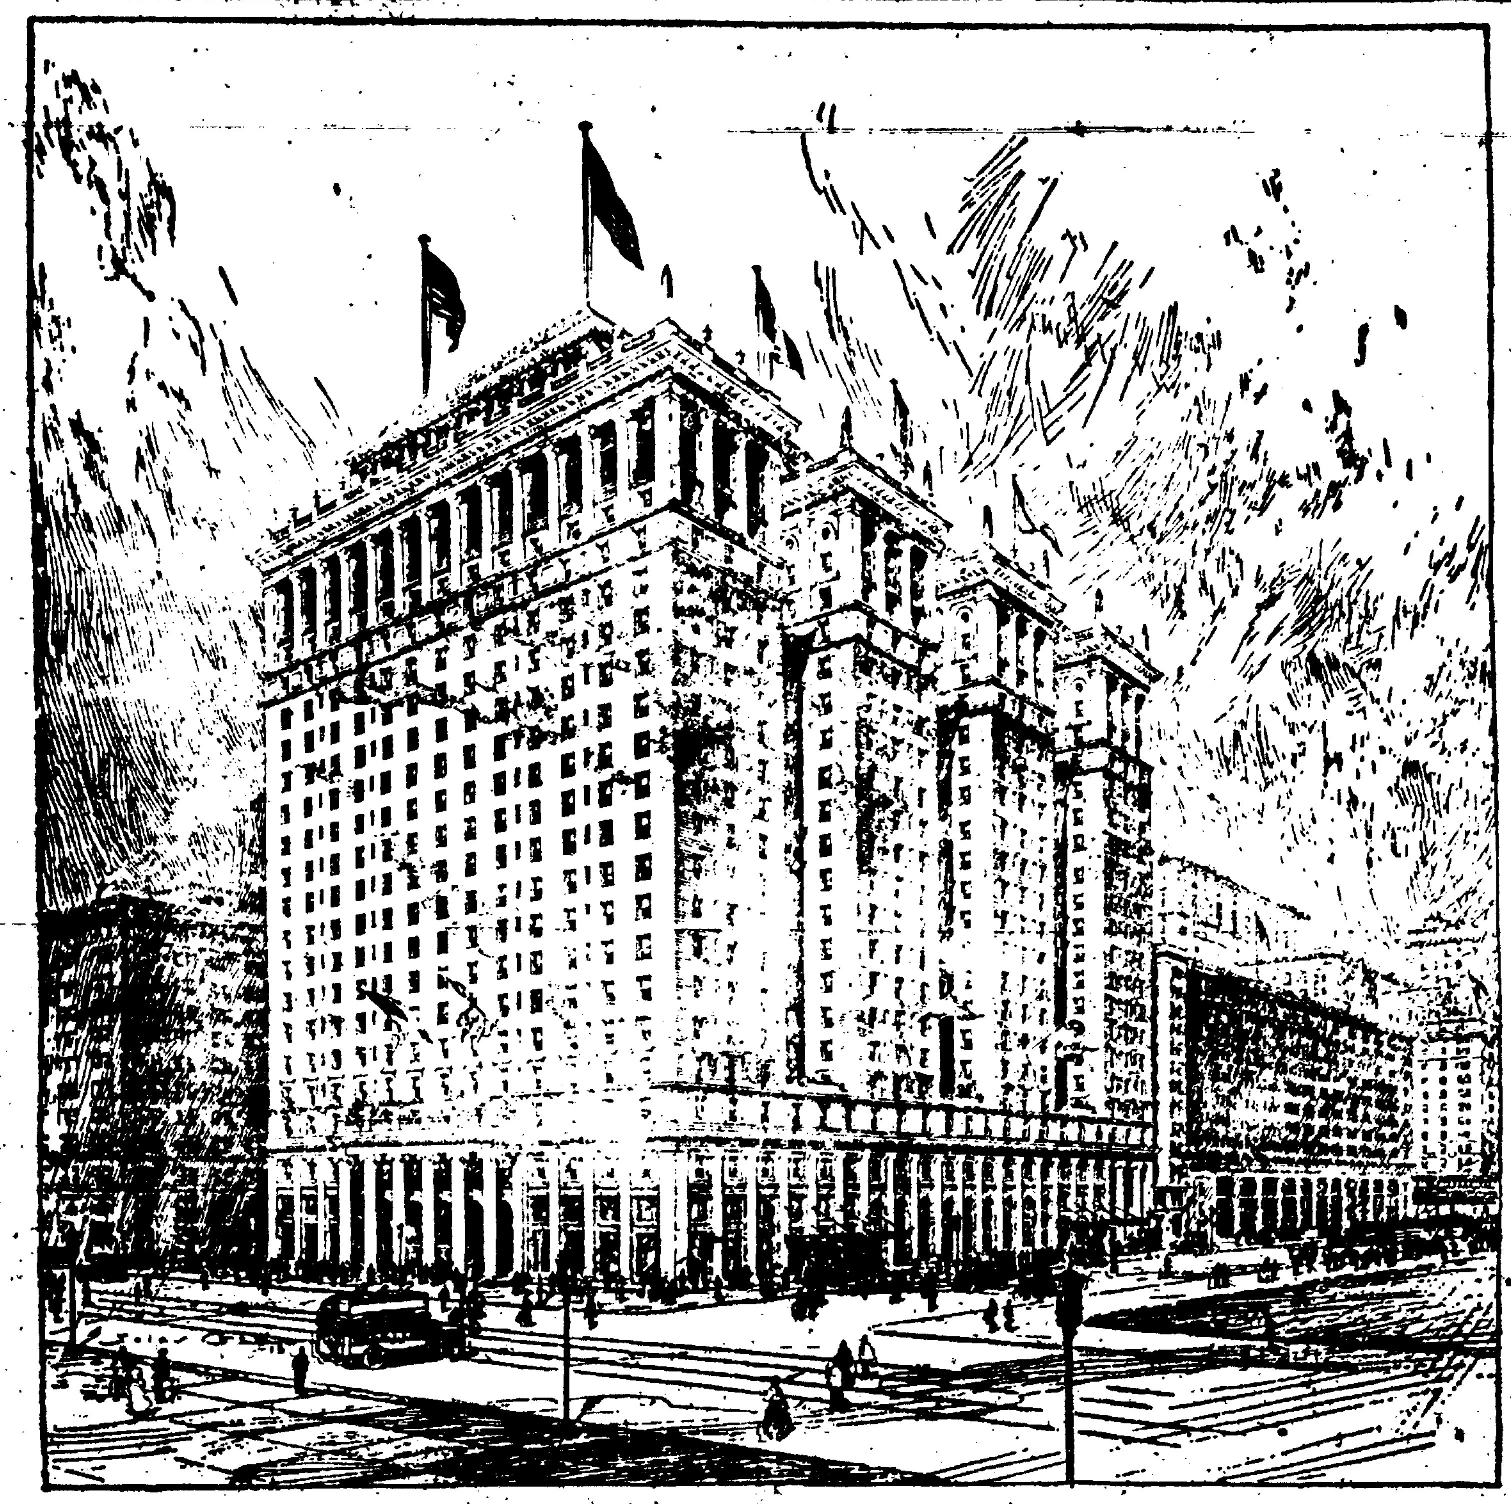
LEGAL NOTICES

BY VIRTUE OF AN EXECUTION AGAINST THE property of Eugene Kimball, issued out of the County Court of the County of Oswego, State of New York, in an action wherein Morris Kaplan was plaintiff, and Eugene Kimball was defendant, to me directed and delivered, I, William L. Buck, Sheriff of Oswego County, will sell at public auction on the 20th day of May, 1916, at 10 o'clock in the forenoon at the front door of the City Hall, in the City of Fulton, in said County of Oswego, and State of New York, all the right, title and interest which said Eugene Kimball had on the 29th day of March, 1916, or which he may subsequently have acquired in and to all that tract or parcel of land, situate in the City of Fulton, County of Oswego and State of New York, being a strip of land fifty (50) feet front on Seventh Street and sixteen (16) rods deep off from the Southwest corner of lands deeded to James Atwell by Annie M. Harvie by deed dated April 11, 1882, and recorded in Oswego County Clerk's Office in Liber 174 of Deeds, page 293. Said strip is described as follows:—Beginning in the Southwest corner of said land, running thence easterly along the southerly line of said premises sixteen (16) rods; thence northerly in a line parrallel with the easterly line of Seventh Street fifty (50) feet; thence westerly on a line parallel with the southerly line of said premises, sixteen (16) rods; thence southerly along the center line of Seventh Street fifty (50) feet to the place of beginning.

Dated April 5, 1916.

WILLIAM L. BUCK,
Sheriff of Oswego County,
By Fred J. Collins, His Deputy.

H. L. Gilman,
Attorney for Plaintiff.
Office and Post Office Address,
105 Oneida st.,
Fulton, N. Y.



HOTEL PENNSYLVANIA, NEW YORK CITY

THE Hotel Pennsylvania, which is to be opened in 1917, will be located directly opposite the Pennsylvania station in New York city. It will contain 1,000 bedrooms, each with bathroom or shower. The hotel will have a frontage of 200 feet on Seventh avenue, between Thirty-second and Thirty-third streets, and will have a depth of 400 feet. It will stand back fifteen feet from the Seventh avenue building line.

The section fronting Seventh avenue will be twenty stories in height. Adjoining this will be a section three stories high, but so constructed as to allow of the erection of twenty additional stories, bringing the total number of rooms up to 2,200.

The hotel will be connected directly by underground passages with the Pennsylvania station and an express station on the Seventh avenue subway. It will be within a half block of the Sixth avenue elevated, the Hudson and Manhattan railway and the new Broadway subway.

By the time the hotel is opened direct passenger service will have been established from the Pennsylvania station with New England via the New York Connecting Railroad company's new East river bridge. Patrons of the hotel will then be able to travel in all directions in or out of the city without going from under shelter.

Open air dining rooms on the twentieth floor, for use in summer, will face Seventh avenue and the Hudson river. Large rooms will be provided for meetings, conventions, etc. Eight large elevators in two banks will be for the use of patrons, and provision will be made for room service by a separate bank of four elevators.

The plans have been prepared by Messrs. McKim, Meade & White, who were the architects for the Pennsylvania station. The building will be erected by the George A. Fuller company, which constructed the station.

The hotel will be built by the Pennsylvania Terminal Real Estate company, a subsidiary of the Pennsylvania railroad, and will be leased to Franklin J. Matchette of Milwaukee, Wis., for twenty-one years with option of renewal. Mr. Matchette will incorporate a company to furnish and operate the hotel.

GOODRICH CO. WINS ITS LEGAL FIGHT

"It is because we believe in an absolutely square deal for the automobile supply houses," says an official of The B. F. Goodrich Company in explanation of the victory recently won in the United States District Court in Cleveland over the Automobile Co-operative Association of America.

"There are 75,000 of these supply houses throughout the country. If we sold the various consumers' leagues at our jobbing price, and if other tire companies did the same, it would result in putting out of business a tremendous number of our prosperous merchants who have invested heavily in the automobile supply business. This would, in the end, be a misfortune, not only to the individual dealer, but would hurt every man who owns and operates a car.

"If you own a car yourself or if any of your friends own a car and you take your wives and children out for an all-day outing, one of the contributing factors of your pleasure is the knowledge that almost anywhere along the road, if you ran out of gas, or if you have a blowout, or if you need various little supplies or assistance of any kind, you can drop into a country garage or a little supply house and get fixed up so that you will be able to continue on your way rejoicing.

"These dealers throughout the country, who make auto touring a pleasure are not making enough profit out of the sale of any one article to make a living. They must make their profits in selling a little of this and a little of that. If you take away from this dealer his earnings on tires and accessories the chances are that 95 per cent. of them would be forced out of business, and yet the man who joins a consumers' league doesn't stop to consider that in so doing he i really knocking the man who makes a long automobile trip a pleasure and a possibility for him.

"The significance of our victory is the fact that we are saving the dealers for the ultimate benefit of the consumer even des pite th desire of a very large body of these same consumers.

"In connection with this victory, the following letter sent out by The B. F. Goodrich Company to their dealers is interesting.

Suit of Importance to Dealers

On March 31, 1916, there ended in the United States District Court, in Cleveland, Ohio, a trial which has lasted for three weeks, and is of vital interest to the dealers throughout the country.

The suit was one brought by a consumers' league known as the Automobile Co-operative Association of America, which was organized in New York in 1908 and went out of business in 1911. The suit was against The B. F. Goodrich Company, The Diamond Rubber Company, The Firestone Tire and Rubber Company, The Republic Rubber Company, and The U. S. Tire Company.

The consumers' league—the plaintiff—complained that these companies had refused to sell tires to it at dealers' prices; that such refusal was the result of a combined action or conspiracy on the part of these companies, and that the result of such conspiracy had been to cause this consumers' league to fail in business. The uit was brought for $450,0000 damages under the Sherman Anti-Trust Law.

At the conclusion of the plaintiff's opening proofs, The Firestone Rubber Company and The U. S. Tire Company were, by the direction of the Court, dropped out of the case.

The fight was continued by the Goodrich, Diamond and Republic Companies.

It appeared from the evidence thereafter taken, consisting of testimony of a number of prominent dealers and of officers and branch managers of the tire companies that the Goodrich Company had always and consistently refused to sell to clubs; consumers' leagues and kindred organizations at dealers' prices, recognizing that to do so would be unfair to, and would undermine the business of the legitimate dealers.

Though the Court, at the conclusion of the evidence, decided—and subsequently so charged the jury—that no damages were proven or could be recovered even if the defendants were guilty under the Sherman Law, the defendants were unwilling to stop, but desired to have the propriety of their acts passed upon. The matter was one of principle to us.

So the case was argued before the jury which has now brought in a verdict completely in favor of the defendants.

The Court, in its charge to the jury, pointed out that the reason stated by the defendants for not selling to the plaintiff at dealers' price was that

"they were forced to decide between two alternatives—to deal with the co-operative leagues, such as the plaintiff was assumed to be, and lose the business of the regular dealers, or to say 'we will not deal with the co-operative leagues and we will keep the favor and the support of the regular dealers.'"

Further, the Court said:

"If the plaintiff was not entitled to the consideration accorded to, and received by, regular retail dealers in the ordinary course of trade, then to refuse to deal with them as regular retail dealers was no restraint of trade."

Again, the Court said that the jury would have to ask itself this question, namely:

"Was there any necessity for Mr. Raymond, representing the Goodrich Company, with its standing in the trade, to appeal to other tire makers to join with it in such an agreement against this corporation? Was there any benefit to accrue to the Goodrich Company to do this sort of thing?"

And the jury decided in favor of the defendants.

The Goodrich Company will continue with its uniform and long-established policy, which has been and is and will be to protect its dealers, and refuse to sell at dealers' prices to consumers under whatever form of association they may be banded together.

GRIFFITH'S HOLD ON OFFICIALS

When David W. Griffith started the outdoor staging of the Civil War and Reconstruction scenes in "The Birth of a Nation," which will be shown at the Quirk Theatre, May 19 and 20, he was confronted with seemingly insuperable difficulties. An area of private war was required about as large as the corner of Belgium occupied by the Anglo-French forces. Thousands of cavalrymen had to be shown, in an historic raid of the North Carolina clans. Their run was to be over many, many miles of typical Southern sandy roads. Though an acknowledged wizard of the films, Mr. Griffith is not a "war lord", with power to commandeer.

In this emergency, the county authorities of "The Birth of a Nation" producing locale were applied to. They finally consented to mark off an area of ten square miles for the use of the horsemen. Along all the roads within this area, the county commissioners posted notices forbidding all traffic on "the day of days." Pedestrians were also warned off. But the roads themselves did not look Southern. David Griffith handled this difficulty—with the authorities' permission—by remaking such of the highways as would come within the camera's eye. Many tons of sand and gravel were spread by gangs of his workmen. Landscape engineering changed the look of the landscape to the rounded hills, piney woods and deep gullies of old North State. The race of the Northern clansmen to rescue their South Carolina brethren took place on the appointed day, without an accident or a flaw. After it was over, Mr. Griffith's men scraped the sand off the macadam roads, took down the signs, and life in the sleepy countryside resumed its normal course. It cost about $25,000 to do the trick—the producer thinks it was worth all it cost, particularly after hearing the enthusiastic comments of "The Birth of a Nation" patrons on his work.

Opinions

THE TRIAL OF SIR ROGER.

The interest in this country in the trial of Sir Roger Casement is eloquently demonstrated by the liberal extent of the press accounts, for which large expenditures in cable tolls alone are being made by the press a ssociations. Press associations do not pay fancy prices for news matter about which nobody cares. Editors generally have felt the pulse of the American people and have judged that "all the service would stand" was warranted in the case of the Irish knight whose fortunes have been followed closely ever since his arrest on the charge of high treason. Whether he may share the tragic fate of his countrymen already executed in Ireland is a topic of wide interest.

In some degree the fate of Sir Roger will decide popular sentiment with regard to Great Britain's treatment of Ireland and the revolutionaries but in the main the die already has been cast. Protests have gone up from quarters whence protest was least expected. The New York Tribune, which has defined the admonition to be neutral by being pro-British from the start, has bitterly condemned the Irish executions and the treatment of the revolutionaries. The World has been hardly less severe, The Sun has been caustic, and other leading American newspapers have followed suit. Moreover, the fires of resentment appear to be spreading. Meetings are being arranged in the larger cities, and in some of the interior towns, to voice public protest. One is to be held in Syracuse, according to the papers of that city. On the whole, the storm of resentment aroused is formidable.

Whether Sir Roger Casement, as a subject of Great Britain, who has conspired against the safety of the realm, is entitled to leniency appears to receive less consideration than the fact that he occupies the most conspicuous position among revolutionaries who have invited widespread sympathy. If he is condemnerd, he will be a martyr to the populace; and whether he is he is condemned, he will be a martyr history as an Irishman who dared—Auburn Citizen.

Place No Faith in Mortal Guides, Mr. Peacock Tells Audience of Young Folks

Last night the Evangelist took his text from Psalm 119:9, "Wherewithal shall a young man cleanse his way? By taking heed thereto, according to thy word." The sermon in part follows:

Psalm 119:9

This is one of the most important questions that can come to a young man. A question that should be of interest to every young man wanting to do right. Some times we find young men who do not care to do right. Such individuals will not be interested in this text or what may be said upon it. But all those trying to do right and having a desire to live right will be interested in this subject. There can be no more important inquiry for one just entering on the journey of life; there can be found nowhere a more just and comprehensive answer than is contained is this single verse. Dr. Barnes says, All the precepts of ancient and modern wisdom, all the teachings of heathen morality and religion, and all the results of the experience of mankind, could furnish nothing in addition to what is here suggested. The world has no higher wisdom than this by which to guide a young man, so that he may lead a [illegible]

This text applies to young women as well as to young men. They need to keep constantly before them the blessedness of living pure [illegible] honest Christian lives in this world. It might also be applied to those who are in middle life, or to those who are in more advanced years. There are many people in the world tonight, who might be benefited by asking this question, although they have the period of young manhood or womanhood. But I believe that the text refers especially to the young, because to the young, the inquiry is so momentous; and because it is a question which it may be supposed will come up before the mind of every young man who has any right aspirations and any proper conception of the dangers which encompass his path.

God Gives Strength

No doubt the psalmist was looking back over his past when he composed this psalm. He saw the mistakes and failures he had made. He realized the dangers coming to young people starting out upon the journey of life. He knew what God's word had been to him amid the perils and temptations of his youthful years, and he had a longing desire for others to be guided and kept in the right path by the word of God. The author of this poem had some black spots on his character, because he had not permitted the word of God to guide and direct at all times. He was sorry for some of the sins he had committed. He would have been a much stronger man in every way if he had listened to the voice of God all the time. But so far as we know during his youthful years, he had ruled himself after God's word, and rejoiced in having come through his youth time clean-souled and unspotted from the world. Now it is the desire of every true young man to keep his record clean. He has a desire to make his course of life pure and upright. The language in this text does not indicate that there had been any previous inpurity or vice, for so far as I am able to understand it has a reference to the future. Not how he might cleanse himself from past offenses, but how he might keep himself clean and pure in the future. The inference is that there were many things surrounding the young man in that day and generation that might easily defile him.

Is it not true that there are many things surrounding young men and women in the world at the present time that may easily degle them. This is true of all classes and ages of people. The old are in danger as well as the young and God knows some of the men and women who have passed beyond young manhood and womanhood make fools of themselves by refusing to permit God's word to guide and direct them at all times. Many young men have been ruined by simply following the advice of some earthly friends.

Youths Great Task.

Our earthly friends and companions are not to be trusted, and for a young man to live a pure clean life in this day and generation is a task too great to undertake without the help of God. Every young person needs a guide. Some of the young people are not willing to acknowledge this. They think they know it all. You could not tell them any thing and the majority of such young people make a great out of it. But my friends I believe that every honest young man and every honest young woman will acknowledge that young men and women should be guided by some higher power than man. The ship of a young life has to sail over unknown seas, and there must be culture for managing the vessel, and a chart for directing its course. And if these things are wanting, the young life may easily be wrecked on the shores of time. Look back over the history of the human family tonight. What do you find? You find wrecked lives and ruined characters all along the shores of time. There are multitudes of people in the world if they were permitted to live their lives over again they would do differently. They have made fools out of themselves in every sense of the word. And tonight their characters black because they failed to permit God to guide and direct them. Not many years ago a vessel of the White Star Line went to pieces on a rock off the coast of Newfoundland and five hundred persons went down to a watery grave. There was a young man of great promise, having a large business in Detroit, who was on board that vessel. Soon after it went down there came a dispatch to Detroit to his wife and partner to say that he was lost. The business was suspended, and that young wife was thrown into deep mourning. Her heart was just broken and the mother heart was bleeding that her boy had gone down as they supposed. But in a few hours there came another dispatch over the wires. Saved, with his name signed to it. They felt so grateful, that they had the dispatch framed and put in his office, and there it is. If you go into that man's office now to do business with him you may see that dispatch, Saved.

Devils in Fulton.

My friends how many young men and women in this world tonight are going down to hell and eternal death. They are lost to God, to the home, to the church. They have gone down with the crowd into sin and hell. Their parents and friends are weeping and sad because of the life they have been living, because they have gone in the way of the wicked. Oh what a glorious thing it would be, if we would flash over the wires to heaven and to home the news that they have been saved. Would you parents consider that message the most precious thing in your home if such a message should come to you? My hearers there are many dangers and perils surrounding the young right in Fulton.

There are enough devils in this place to send every young man and woman in Fulton to hell. And God knows some of them are going with the consent of their parents. The young people are not to blame altogether. With the example that some young people have set before them by their parents the wonder is they are as good as they are. Young men and women oftentimes start out with bright future before them. They have every opportunity in the world to make life a success, but they drift with the crowd and it is only a short time until they have lost all respect for everything that is pure and clean and upright. My young friend keep your record clean. Keep yourselves pure in thought, word and deed.

Now there are several ways we can keep our record clean. The first is by observing the Sabbath in the way God has commanded. Sabbath desecration has started many young men on the road to hell. For every Sabbath desecrator is a law breaker and criminal in the sight of God. Then we can keep our record clean by the company we keep. A man is known in this world by the company he keeps. If he is with the profane and impure, he will become profane and impure. We should not permit ourselves to be surrounded by evil influences. Because the majority of people are what they are by the influences surrounding them. They are what they are by the associates and companions they have in this world. All the permanent influences of life come from persons. Home is not the walls where furniture is stored, but the place where others exercise their weird influence over us. Bcause of this we have the power to surround ourselves most of the time by good influences. But if we willfully decide to associate with the impure and ungodly then our lives will be polluted. We generally choose our companions in a haphazard way. Oftentimes we do not choose them at all, we just drift into them. Their opinion and standards of thinking and practice become ours.

Signs of Weakness.

It is no sign of purity to hear young men telling filthy stories. This will not keep our record clean. It is no sign of manhood to use profanity. It is a sign of weakness. Because the worst fool this world has ever known can swear. To my mind profanity is the biggest piece of foolishness in the world and the most disgusting thing in this world is to hear men and women swear. Then young people if you want to keep your record clean you must be temperate. This applies to the old as well as theyoung. I never could understand how anyone could keep the temple of God clean and fill it with whiskey. Tobacco is bad enough. God knows some men are about as filthy with tobacco as others are with whiskey. Men and women can get along without these things better than they can get along with them. And I know we would be cleaner and purer if we did not touch any of these things. If you are going to be what God intended you to be you must live according to the teaching of God's word. Now go through the Bible and see if the word of God tells you to do any of these things which I have told you not to do. If so then go and do them, if not live according to the teachings of the Bible.

In the beginning of this psalm the psalmist says, How blest are they whose lives are pure and upright in the way, Who in the Lord's most holy law do walk and do not stray. O blest are they who to observe His statutes are inclinder, and who do seek the living God with their whole heart and mind. Does he say, Do as you please and God will bless you, Does he say a man can be impure and dishonest and defile the temple of God? No. We must keep our record clean. Clean in every respect.

ARROWHEAD, INC. HAS B. I. PLANT

With the filing yesterday of the deed conveying to the Arrowhead Mills, Inc., the plant formerly owned and operated by the Battle Island Pulp and Paper Company, it should not be long until the big plant resumes operation under the direction of the new incorporators.

About two years have elapsed since the mill was closed through the failure of the Hunter brothers. Oswego and Fulton capital is in control of the new company, whose main stockholder is Frederick A. Emerick.

The plant was purchased by M. L. Whitaker of this city, from the bondholders of the Battle Island Company and he in turn gave the deed to the County Clerk.

S. Gay Daley and A. N. Ellis, of Syracuse, acting for the bondholders, bid in the property at the bankruptcy sale on November 4, last. The outstanding bonds are said to have been valued at $400,000. At the time of the bankruptcy sale it was claimed that the plant could not be replaced for $360,000.

The Battle Island Company, which went into bankruptcy more than two years ago, was largely controlled by the Hunter brothers of Fulton.

HIS FALSE TEETH MAY HAVE SAVED HIM FROM SERIOUS INJURIES

B. L. Cole, who conducts a vulcanizing shop at the corner of First and Oneida streets, probably owes his life today to the fact that he has false teeth. When the blade of a screw-driver was wrenched from his hand yesterday afternoon just as a tire he was repairing flew off the rim, it struck him in the face and jaw with sufficient force to penetrate his brain, but the plate which holds the false teeth offered the necessary resistance to the steel blade, and it rebounded through a pane of glass in the door of the shop, and was found thirty feet away in the road.

Mr. Cole was using the screw-driver to pry the tire from the rim, when suddenly the tire flew off, breaking the blade of the screw-driver off short, and leaving the handle in the man's hand. The blade shattered several of his front teeth, and opened a large gash in his face, nearly severing his upper lip. Mr. Cole was knocked down by the blow and when he recovered consciousness he called Dr. Keller by telephone. When the doctor arrived, Mr. Cole was weak from loss of blood and was suffering great pain. Several stitches were taken in the wound on his face and he was removed to his home.

While Mr. Cole is recovering sufficiently to resume work his shop will remain open for business as usual. The screwdriver will be preserved as a souvenir in the Cole family.

MISCELLANEOUS WANTS

Rate—1c. a word each time.
Minimum Charge 10c.

Women wanted—Full time salary $15 selling guaranteed hosiery to wearer; 25c. an hour spare time. Permanent, experience unnecessary. International Mills, Ann street, Norristown, Pa. 438c

W. C. T. U. WILL MEET MONDAY AFTERNOON

Important business will be transacted by the Women's Christian Temperance Union at the next meeting which will be held at the Congregational church Monday at 3 p. m. A large attendance is anticipated and desired.

INTEMPERANCE AND ITS EVILS

(Continued from Page One)

get what he owes to his God, and to those who should be near and dear to him? Yet such is the condition of a man who is addicted to excessive drink.

"Allow me to tell you one experience that I had about ten years ago. We were taking the census of a certain parish, and at one of the houses a girl of 15 years came to the door. I inquired into the spiritual condition of the family, and she told me that she and her father were the only ones living there. Her father was a drunkard. She had not yet received her first Holy Communion, and I offered to give her the necessary instructions. She said she couldn't come to the rectory, as she had no clothes fit to wear upon the street. She said the clothes she was wearing were all that she had, and they were not fit for outdoor wear. I asked her when her father would come in, and she said she didn't know, that he had gone out saying he was going to look for work.

A Father's Inhumanity.

"I went back to the house two or three times, but never happened to get the father at home. Finally I instructed the girl in her catechism and asked her to come to Mass the next Sunday. I secured some clothes for her from a woman who was in a better position, and she promised to come to church. She did not appear and when I saw her the next day, she hesitated about giving a reason for not coming. I concluded that she was ashamed because she had not been to church in some time, and asked her to come the next Sunday. She did not come, and then I found out the reason. Her father had stolen the clothes I had secured for her, and had sold them for a few cents in order that he might indulge himself in a debauch.

"This is only one story, but you have doubtless heard others. They all end in the same lesson. The drunkard is a man who lowers himself beneath the brute beast, and his only aim and ambition is to sacrifice everything that his craving for drink may be satiated.

"Priests are held up as men not in harmony with the plan to do away with drink altogether. During our missions we are often confronted with the statement that many Catholics are saloon keepers, and the priests and religion must bear the opprobrium that is heaped upon these individuals. But, remember, the priests do not approve of all saloon-keepers, no more than they approve of drunkards. Any saloon-keeper who gives a man an excessive drink is held responsible for the sin of that man, and commits a mortal sin in giving him the drink. But let a saloon keeper do that which is right, and there can be no objection. He must not tolerate conditions in his saloon which will warrant the conclusion that mortal sin has its occasion there.

"The priest must not go to one extreme or the other. The absolute prohibition of drinking is an invasion of a man's natural rights. If you are temperate, no one or earth or in Heaven can disapprove. I consider it no more a wrong to drink liquor in temperate way than to drink water.

"However, if it is the occasion of sin, it puts a different construction on the matter. In various parts of the country you will see Catholic total abstinence societies. They have the approval of the church. If strong drink is the occasion of sin, your course is to give it up. Your purpose on earth is to save your soul. Your moral code is the Ten Commandments, and if your conduct measures up to the rules of the Decalogue, God will approve of it.

Sin and Drink Synonymous.

"The fact remains, that sin and strong drink are connected. The periodical drinker, for instance. The craving for drink begins to assert itself within him, and he knows full well that if he takes one drink he will take another and another. This constitutes the occasion of mortal sin, for that man will drink until he is drunk. "He that loveth the danger shall perish therein,' we are told.

"That is the attitude of the Church on the drink evil. Cardinal Gibbons himself can be cited as one of the foremost men of the Church who is opposed to prohibition. It takes the rights of man to develop character. The Total Abstinence Society meets with the approval of the Church, and is encouraged as a great aid to those for whom it is necessary.

"Your resolutions must be made accordingly then. If the past has shown you that you cannot drink without committing a mortal sin, I beg of you to take the total abstinence pledge, and to sign one of the small cards you will find in the rear of the church tonight. If you cannot be temperate, your obligation is to abstain altogether.

"All who do not find it necessary to abstain from drink, and still lead Christian lives in the fullest sense, can remain temperate. Temperance in all things is something that becomes a Christian. And rest assured that a temperate life, free from sin, will bring you the blessings of both time and eternity.

THE AMERICAN CLOSET COMBINATION

Flushes under pressure. With less water you get better sanitary results, cleans the walls of the bowls and flushes the sewer better than any other closet.

A cast iron tank finished with our "Chino" enamel on the outside. Nothing on the inside but air and water. Easily kept clean. No delicate parts to become clogged up or wear out. Fitted with the American Valve, operating entirely outside and away from the water. Eliminates all expensive repairs damage from freezing and overflowing when fire pressure is turned on.

Ideal combination for residence, office building, factory and school house. *Will outlast the life of your building. Guaranteed for five years.*

Insist on the American Line. It's better. Ask us to demonstrate. Make us prove our statement.

HE TEMPTS DEATH

Deadly Dangers a Nitroglycerin Maker Must Face.

NEVER IS SURE OF HIS LIFE.

Any Moment the Worker In a Nitrator May Be Blown to Atoms—A Calling That Demands Coolness, Prudence and Daring—One Man's Experience.

Nitroglycerin is made by ordinary sweet glycerin acting with a mixture of strong sulphuric and nitric acid. The glycerin is dropped by a very thin stream slowly into a mixture of three parts nitric and five parts sulphuric acid. During the process the containing vessel is kept cool by a water jacket, and the acid mixture is agitated by a stream of cool air. The temperature is maintained at about 80 degrees. After the operation the whole mixture is drawn off into a tank and is allowed to stand in this vessel, cooled by a water jacket. The glycerin, which is now nitroglycerin, immediately begins to come to the top like cream on milk. This is at once taken care of and is put through various processes to cleanse it of all remaining traces of acid.

In no department of our plant must greater care be exercised than in the nitrator, which is the name given to the building where nitroglycerin is manufactured.

Explosions are frequent, and it takes a man of iron nerve to conduct this department. It is like going into battle every day. Yet in the face of this we have one man who has successfully made nitroglycerin for twenty years, and he lives to tell you about it, only he won't. He is as reticent as the sphinx.

Like any other man of great courage, he does not boast, and John Viewberger will talk about anything except the miracle of his continued existence. I can only say that Divine Providence, a cool head and hands and a stout heart have kept him at his work.

The acid fumes that fill the building at all times when nitration is taking place have long since eaten away the very teeth in his head, but not his pluck. It is a fact that he is provided with a new set of false teeth on an average twice a year. The hair on his head has long ago disappeared, and the fumes have tanned his skin to the color of bronze until he resembles a cave man of old. And yet he has never had a day of sickness in these twenty years. He thinks, as I do, that no disease, no matter how virulent, could successfully combat the nitric fumes that he inhales. So his work has its compensations, if you are pleased to look at it that way.

While nitration of glycerin is going on Viewberger sits on a high stool, his arms stretched over the nitrating machine, one hand on a faucet that controls the flow of glycerin into the acid, the other hand on a valve regulating the cooled compressed air that is forced into the mixture and his eye glued to the thermometer that extends well down into the mixture. I have said that the glycerin undergoes nitration at a temperature of 80 degrees. The temperature is regulated by the quantity of glycerin that flows into the acid. If the temperature begins to rise above 80 degrees he closes his valve slightly, reducing the flow of glycerin, and increases the flow of cool air.

Any little foreign substance that might get into the mixture, even through the acid of glycerin or otherwise, would cause immediate trouble. The slightest leak in the water cooling coils, permitting a little water to get into the mixture, would be the signal for the thermometer to do a marathon, and in a few minutes the whole mixture would reach the degree of heat that would result in an explosion. Viewberger cannot desert his post when the temperature begins to rise rapidly. This condition frequently takes place, and most of the time it can be reduced by cutting off the flow of glycerin entirely and by turning on the air to the full pressure of fifty pounds. Sometimes, however, in spite of all, it will continue to rise, and Viewberger knows or feels that he has lost control. He must leave his mixture to its fate and "dig out."

His building, the nitrator, is located on a hill higher than its surroundings. The hill is a high sand dune. Immediately back of the stool on which he sits is a big door that is always left open when he is manufacturing. Viewberger's method of exit or getaway is to jump out of this door and roll down the hill. While he is on his way the explosion takes place. He has done this some twenty times and yet has never received an injury. He has never been struck with flying debris, although the air is filled with flying pieces of lead and iron. Does history record a greater miracle? Dug out of the sand semiconscious from the impact of an explosion, in the course of half an hour he has been quite himself again, ready to go to work if need be, his only regret being the loss of property sustained by the company.—Willard Fay in Collier's Weekly.

Reason For Joy.

"What a beautiful girl that is standing over there!"

"I'm glad to hear you say so. She is my daughter."

"Hallelujah!" he said to his wife when the mother had departed. "For once in my life I struck it right!"—Detroit Free Press.

There is always the sun, only we must do our part, we must move into it.—Clara Louise Burnham.

SUBMARINE OIL LINES.

How the Wells of Vera Cruz Are Tapped For Tank Steamers.

Many of the most productive oil wells in the state of Vera Cruz, Mexico, are situated near the port of Tuxpam. For some distance from the shore there the water is so shallow that few of the large oil steamers can get into port. The oil companies hit upon the idea of laying submarine pipe lines to points where the largest oil tankers can be conveniently moored for loading in any state of the tide and weather.

There are now five of these great iron pipes in duplicate. They are from six to eight inches in diameter, and four of them are nearly a mile long. They terminate in forty-three feet of water, where it is so deep that the waves have no effect on them. When they were laid divers fastened to the end of each 120 feet of flexible hose. When not in use the free end of the hose is closed and allowed to lie on the bottom of the sea, where its position is marked by a small buoy attached to the hose by a stout chain.

When the tank steamers arrive they moor themselves to the permanent buoys near by, lift the marked buoy with a derrick, raise the flexible hose to the deck of the ship and attach it to the tank openings. By means of a signal code the captains of the ships notify the pumping station on shore, in which are the valves that control the flow of oil through the pipe line. Generally speaking, it takes about twenty-four hours to load one of the large 15,000 ton tankers, which means that the pipes deliver 4,375 barrels of oil an hour.—Youth's Companion.

WHERE MEN WEAR COMBS.

In Ceylon They Mark the Native Male's Social Standing.

Ceylon is perhaps the only country in the world where men wear combs. It is the delight of the native males of the low country to wear their hair twisted into a roll at the back of the head, with a horseshoe shaped tortoise shell comb at the top. The women, curiously enough, do not affect this ornament.

It appears that one of the great ambitions of the Cingalese man of humble position is to possess and wear a huge comb of the finest luster and most perfect manufacture, and many indicate their higher social status by means of an additional comb rising to a considerable height above their glossy coil.

The artist in tortoise shell who makes these combs obtains his raw materials from the hawk bill turtle. The turtle is killed and its carcass immediately immersed in boiling water. The plates when separated from the bony part of the animal are very irregular in form. Being brittle, they require careful manipulation, especially as a high temperature, which would soften them, tends to darken and cloud the shell. They are therefore treated at as low a heat as is possible for the work.

Thickness is obtained by softening several plates and then applying pressure, when a union of the surfaces takes place. Under heat the shell also is molded into various artificial forms.—Exchange.

Waterspouts.

A waterspout is a miniature tornado originating in a strong upward draft of air which occurs above the surface of a body of comparatively warm water. Its effect first becomes visible in a circular motion at the point of the cloud to which it ascends. This becomes a whirl, which condenses the vapor at its center, causing the portion of the cloud there to drop downward in the shape of a gigantic jelly bag. At the same time the continuing upward draft increases the rapidity of its original swirl and the condensed vapor caught within it until the ascending and descending masses join to form the waterspout. Necessarily by this process the air beneath the spout is rarefied, and thus where the phenomenon occurs at sea the water always seems to be sucked up into it, although this is not really the case to any considerable extent.

Secret of Harmony.

Pull together. This is the real secret of harmony. There is a story told of a man who had committed the care of one of his teams to a faithful servant for years. At last one of the horses sickened and died. While the servant was burying the faithful animal the other horse came across the field and stood by, watching the work as a silent mourner.

The master said, "I believe Dick loved Billy."

Instantly the servant replied: "In cose he did, massa. Why, they pulled together nigh twenty years."—Christian Herald.

An Old Massachusetts Law.

The general court of Massachusetts Bay Colony, following the example of the English parliament, in 1659 enacted a law that "anybody who is found observing by abstinence from labor, feasting or any other way any such day as Christmas day shall pay for every such offense 5 shillings." This law was repealed in 1681.

Getting Into Society.

"Guess I'll have to rig up a middle name," declared Flubdub. "I never really had one, but I gotta have one now."

"Why so?"

"My wife insists upon one to print on her visiting cards."—Louisville Courier-Journal.

Nature.

"I just adore nature. Don't you?"

"Yes; in moderation, but one can't help feeling that nature was intended for the lower classes."—Browning's Magazine.

SNAPSHOTS AT NOTABLE PERSONS

Sir John G. Maxwell, British Commander In Ireland.

Photo by American Press Association.

Lieutenant General Sir John G. Maxwell, who was sent to Ireland to quell the revolt in that country, was until recently commander of the British forces in Egypt. Most of General Maxwell's military experience was gained in the land of the khedive, where he was one of the principal lieutenants in the operations connected with the reconquest of the Sudan.

Although General Maxwell has done his fair share of fighting in the Sudan and South Africa, it is said of him that he excels as a shrewd and strong administrator rather than as a military strategist. Probably it was because of his ability as a manager that he was chosen to manage the affairs in Ireland. He is described as a man of firm will and indomitable enterprise, one who is not to be trifled with and who endeavors to perform whatever task is assigned to him.

General Maxwell's wife is an American, Miss Louise Selina Bonynge, daughter of Charles W. Bonynge, one of the California forty-niners. She is a half sister of Lady Deerhurst. Since her marriage Lady Maxwell has been with her husband in all his campaigns, not only in Egypt and South Africa, but throughout his two years' campaign in the Sudan during the outbreak about nine years ago.

To Command Plattsburg Camp.

Major Harry H. Bandholtz, U. S. A., who is to command the business men's military camp at Plattsburg, N. Y., has had a long and active career as a soldier. During the Spanish war he served as acting regimental adjutant, Seventh infantry, at El Caney and the subsequent fighting around San Juan hill. Later he commanded the district of Sagua La Grande, Cuba, and super-

MAJOR HARRY H. BANDHOLTZ.

intended the first elections in that district. In 1900 he was sent to the Philippines, where he served until relieved in September, 1913.

In 1901 Major Bandholtz was sent to Tabayas province, which he pacified, and the next year was elected by the people governor of the province. He is the only regular army officer ever thus elected. Tabayas is the largest Christian province in the islands. In 1903 he was appointed colonel and assistant chief of the Philippine constabulary by the then Governor Taft and was placed in command of the southern district of Luzon. In three months he ended the insurrection under General Simeon Ola that had been in progress over a year and finished the campaign by going with a single native guide into the camp of Colonel Loamo and bringing in the latter and his men.

In 1907 Major Bandholtz was appointed brigadier general and chief of the Philippine constabulary, which position he held until ordered to the United States. The Philippine commission in 1910 by unanimous resolution requested his promotion to the rank of brigadier general in the regular army. Three years later he recaptured the stolen plans of all the defenses of Manila bay, and the governor general again recommended the same promotion. Major Bandholtz is a native of Michigan and was graduated from West Point in [illegible].

Going to the Garden Party

Design by Best & Co. New York.

GRAY pussy willow ruffles and georgette crape of the same tone give this dressy result. Tiers of distended ruffles alternating with plain panels and bustle puffs achieve the skirt, while the basque takes a V front and sleeves of the crape. This is a fetching frock for youth to don.

• • •

A very pretty neckpiece that can be made at home is fashioned of a wide, soft faille ribbon, edged with a fringe of ostrich fronds curled a little. This is worn rather tightly about the neck and fastened with a large flat folded shaped pump bow, outlined by the same feather fringe. This bow is worn at the back, the side or wherever it may be most becoming.

• • •

Flowers, artificial ones, are almost as much in fashion as they were a couple of seasons ago. They are, as everybody knows, much used on hats. They are used, too, on evening frocks, singly and in strands, and they are used on collars and capes and ruches.

ANNA MAY.

CARIBOU OF THE YUKON.

Caution of an Old Bull in Guiding and Guarding His Herd.

In his book, "Campfires In the Yukon," Harry A. Auer tells how his party watched through powerful glasses an old bull manage a herd of caribou:

"Five miles into the sea of peaks above our camp we saw a herd of thirty-four caribou that had been summering in the high altitudes, but were now driven out by the winter and were on the march to lower levels. There were cows, calves and small bulls in charge and under the strict domination of a fine old bull with a big head, which we decided not to shoot for fear of alarming the sheep that might be within hearing distance.

"We were quite content to watch the old patriarch manage his large family. We saw him lead the way to a small willow patch, and after his flock had browsed a few minutes he deliberately drove them away and headed them down the valley toward us, rushing first on one side and then on the other and finally at the rear of the column, trying to keep his charges from straggling or wandering off the course.

"When the caribou saw us at about 200 yards they started to stampede in different courses, but the old bull ran to the head of the column and changed the leader's course and, utterly regardless of his own danger from us, he rushed about, herding the animals in the way he had selected and was himself the last to follow, and as the flying band vanished around a low ridge the old fellow was charging a few smaller bulls from behind, driving them forward to make a compact formation."

ORIGIN OF WORDS.

Expressions Sometimes Stray From Their Original Meanings.

The word "sweetheart" seems everything it ought to be for expressiveness. One would naturally think that it had been coined for the occasion, like such a word as "honeysuckle."

But that is a delusion and a snare. It has no more to do with "heart" than it has with "lungs." It is a word that belongs to the class which includes "sluggard" and "coward" and "dullard" and "niggard." Pretty company for a poet's word! But it is true, though sad, that "sweetheart" ought to be spelled "sweetard."

Who has not joined in a country dance? Of course the country dance reminds one of maypoles and merrymakings and harvest homes. Sir Roger de Coverley and his quaint rural manners and ways seem inseparably connected with the dance. But it has no more connection with fields and haystacks and cornricks than the turkey trot. The partners in the dance face each other, and the French therefore called it a "contre danse." There you are! The secret's out.

What are "kickshaws?" Just the French "quelques choses," which means "anything."

What is the origin of tramway? It is short for Outram way, because a man named Outram invented them, just as a man named Macadam invented macadamized roads.—London Answers.

Traditions of Mother Shipton.

Of all British prophets Mother Shipton is beyond doubt the most celebrated. She was, in fact, all that a prophet and witch should be, in strange contrast to the serious and scientific Nostradamus. The day she was born the sky became dark and gloomy and, according to her biographer, "belcht out nothing for an hour but flames, thundering after a most hideous manner." Her personal appearance, described by her admiring biographer in 1662, is scarcely flattering: "Her physiognomy was so misshapen that it is altogether impossible to express fully in words or for the most ingenious to line her in colors, though many persons of eminent qualifications in that line have often attempted it, but without success."

His Favorite Phrase.

Once when they were talking literature Mrs. Isobel Strong said to Robert Louis Stevenson, "At least you have no mannerisms," whereupon Stevenson took a copy of his own "Merry Men," which she was reading, out of her hands and read, "It was a wonderful clear night of stars." "Oh," he said, "how many, many times I have written 'a wonderful clear night of stars.'"

A Test Case.

"Father," inquired the small boy, "what's a test case?"

"A test case, my son," replied his parent, "is a case brought into court to decide whether there's enough in it to justify lawyers in working up more cases of the same kind."—Exchange.

At the Singing Contest.

She—What's the difference between first bass and second? He—About ninety feet.—Columbia Jester.

SHE WAITED IN VAIN.

Pathetic End of a Romance Lasting Over Thirty Years.

Many years ago while studying in Boston I lived for a time in a private boarding house of the Back Bay. As most of the guests were wealthy widows, I named it the House of Veils. Among those coming in from the outside to take their meals was Miss Adams, a descendant of the historical Adams family and a woman of about sixty years.

She was engaged to be married and had been engaged for more than thirty years. Her lover called, took her to dinners and the theater, sent her flowers and sweets as in the days of their youth. Those who knew her told me this story:

While still young she had been left an income sufficiently large to maintain herself in comfort, but not enough for the upkeep of a home such as she thought befitted her station in life. So she lived in lodgings, while her fiance cared for his widowed mother, who lived to be very old.

At the time to which I refer her lover held a responsible position, and the only obstacle in the way of their marriage was the aged mother.

They were devoted lovers at sixty and had been devoted lovers for thirty years. Being the longest engagement of which I had ever heard or read, I was interested to know the ending of a story so unusual in life.

Some years after, meeting a former guest of the House of Veils, I asked about Miss Abigail Adams. The mother had outlived the son!

A sad and lonely old woman was still living in lodgings, looking back to the pride and selfishness of her youth, which had cost her a home and all that home might mean.—Chicago Tribune.

FATHER'S PERIL.

What Would You Have Done Had You Been in His Place?

Just three or four time yellowed pages in an old colonial diary. How the manuscript came into my possession is immaterial. But here are two paragraphs:

"February ye tenth, 1628. This day a most terrible thing happened to Father. It hath been a long, cold winter, and ye members of our little colony have suffered grievously, supplies being scant. Our larder being well nigh bare, my goodly father started forth in search of game. Of late it hath grown exceeding difficult to obtain powder and lead. Father had but one charge left for his trusty blunderbuss; but, being a famous shot, he had no doubt that this would prove sufficient to bring down some wild creature that the household might be supplied with meat.

"He had wandered some way from ye settlement when he sighted a wild turkey perched on a limb. Drawing near, he took aim. At this moment a skulking savage leaped from behind a tree near by. An arrow hurtled past dear father's head, barely missing him. Quickly he turned his blunderbuss upon ye savage and prepared to fire.

"But ye thought came to him that his wife and children were in dire straits for food. Having but the one shot, what should he do? To slay ye savage would mean that ye turkey would escape. To shoot ye turkey would place father at ye mercy of ye cruel redskin. Momentarily he hesitated; but, suddenly determining upon a bold course, he took steady aim, fired and slew ye"—

Here the manuscript breaks off. I'm sorry that I ever ran across the confounded thing.—Walter G. Doty in Cincinnati Enquirer.

Oddities of Taxation.

In England there have been many amusing taxes and more amusing evasions. At one time the horse was singled out as a peculiar victim, and the farmer evaded the obligation by riding his cow to market or by harnessing his wife to the cart alongside of a big dog to drag the produce to town. The tax on chimneys resulted in the destruction of many fine old fireplaces, and the tax on windows had the effect of making the houses look as if they had been boarded up and deserted. It also impaired the eyesight of hundreds of Englishmen.

A Cobbler's Dozen.

In most countries thirteen is always spoken of as "the baker's dozen," but in Italy it is called "a cobbler's dozen."

There is a tradition in that land that formerly there was a law compelling cobblers to put twelve nails around the edge of a boot heel and that when nails were cheap a thirteenth nail was driven in the center for luck.—London Mail.

Something Wrong.

"Is this a studied insult, or what is it?"

"How now, girlie?"

"This fellow writes on his card, 'Sweets to the sweet,' and sends me a package of lemon drops."—Louisville Courier-Journal.

The Back Yonder Club.

What has become of the family that used to eat Sunday dinner that was cooked on Saturday?

When did you ever see a sawbuck? Not to go back too far, do you know what a sawbuck is?—Richmond Times-Dispatch.

His Vile Disposition.

"Fine day, Mr. Gloom, and"—

"Well, you didn't make it, did you?" snapped J. Fuller Gloom. "Then what are you bragging about it for?"—Judge.

Quite Friendly.

Hennypeck—Scoots eloped with my wife last night. Gabbleton—Why, I thought he was your best friend. Hennypeck—He is.—London Telegraph.

HER SPORT SUIT.

Modish, Noisy Plaids Are the Vogue For Outings.

Pale mustard colored and navy blue plaids give this ultra effect. The skirt is plaited to fullness, and the bias fronts of the coat end in satchel pockets, convenient for golf balls. The jaunty patent leather belt is navy blue, to match the two novelty buttons.

OFF FOR THE LINKS.

A CARRIAGE ROBE.

Baby Will Need This Lightweight Blanket Before You Know It.

Use crochet twist. Comes in 1⅛ ounce balls, 10 cents a ball.

This has two narrow panels of linen or whatever material desired at either end and a wider panel in the center, with two rows of insertion and an edging of lace to match.

First Row—Ch 71, 4 d c, 1 sp, 4 d c, 3 sp, 28 d c, 3 sp, 4 d c, 1 sp, 4 d c.

Second Row—13 d c, 1 sp, 10 d c, 5 sp, 10 d c, 1 sp, 13 d c.

Third Row—16 d c, 9 sp, 16 d c.

Fourth Row—7 d c, 1 sp, 10 d c, 2 sp, 7 d c, 1 sp, 7 d c, 2 sp, 10 d c, 1 sp, 7 d c.

Fifth Row—4 d c, 3 sp, 4 d c, 2 sp, 10 d c, 1 sp, 10 d c, 2 sp, 4 d c, 3 sp, 4 d c.

Sixth Row—7 d c, 1 sp, 7 d c, 2 sp, 7 d c, 3 sp, 7 d c, 2 sp, 7 d c, 1 sp, 7 d c.

Seventh Row—16 d c, 5 sp, 4 d c, 5 sp, 16 d c.

Eighth Row—16 d c, 2 sp, 7 d c, 3 sp, 7 d c, 2 sp, 16 d c.

Ninth Row—7 d c, 5 sp, 10 d c, 1 sp, 10 d c, 5 sp, 7 d c.

Tenth Row—4 d c, 7 sp, 7 d c, 1 sp, 7 d c, 7 sp, 4 d c.

Eleventh Row—4 d c, 2 sp, 7 d c, 1 sp, 7 d c, 5 sp, 7 d c, 1 sp, 7 d c, 2 sp, 4 d c.

Twelfth Row—4 d c, 1 sp, 10 d c, 1 sp, 10 d c, 3 sp, 10 d c, 1 sp, 10 d c, 1 sp, 4 d c.

Thirteenth Row—4 d c, 1 sp, 7 d c, 3 sp, 7 d c, 3 sp, 7 d c, 3 sp, 7 d c, 1 sp, 4 d c.

Fourteenth Row—4 d c, 4 sp, 4 d c, 2 sp, 4 d c, 4 sp, 4 d c.

This completes one-half of design. Work back from thirteenth to first row to complete. Four of the designs are enough for the length.

Dainty Boudoir Cap.

A dainty boudoir cap can be fashioned out of a bit of shadow lace and a scrap of crepe de chine. Make a crown of the lace, and attach to it the silk, which is gathered a trifle. The joining place is concealed with twisted ribbon, which is studded here and there with a tiny rosebud. Gather the silk about an inch or so from the bottom, and see that it slips over the head easily. Finish with a ruffle of lace sewed inside the edge. Long loops of ribbon placed on the side will still further improve the appearance of this dainty bit of feminine wear.

Rush Cake.

Into a sieve put one cupful of sugar, one and one-half cupfuls of flour, pinch of salt, one teaspoonful of baking powder or one teaspoonful of cream of tartar and one-half teaspoonful of soda. Sift twice. Add one-quarter cupful of melted lard. In the cup you have melted the lard in put one-quarter cupful of sweet milk, break in two eggs and fill the cup up with sweet milk. Pour into flour and sugar and beat five minutes. Flavor. Bake in moderate oven about one-half hour.

Potted Plants.

When potting plants put a piece of coarse muslin over the hole in the pot before putting in the bits of stone and sod, which keeps the drainage good. The muslin prevents the earth from washing away.

The KITCHEN CUPBOARD

IRONING DAY MENU.

TUESDAY—BREAKFAST.

Baked Potatoes.
Sliced Beets.
Boiled Custard. Tea.

The Cool Cucumber.

BAKED CUCUMBERS.—Cut the cucumbers in half lengthwise and remove all the pulp possible, leaving a firm case inside the skin. Chop the pulp fine, mix with an equal amount of fine breadcrumbs, butter, pepper and salt. Pack the filling back into the shells, dot with butter and bake until well done and brown.

Another way to bake cucumbers is to cut them in two crosswise. Cut off each end enough to make the halves stand firm. Make a forcemeat of fine breadcrumbs, chopped meat and the inside of the cucumber, which should be scooped out with a spoon. Drop the shells into boiling water and boil for four minutes. Drain, fill with the forcemeat and put a little melted butter on top of each. Stand in a pan and bake until tender and brown on top.

Fritters.—Cucumbers are delicious in the form of fritters. Peel them, cut them in half lengthwise, scoop out seeds and soft part, mix with buttered and seasoned crumbs, refill and dip each half in fritter batter. Fry brown in deep fat.

Cucumbers on Toast.—The taste for cooked cucumbers may be cultivated. If it is, cucumbers on toast is a dish which goes a long way in cultivating it. To prepare this dish peel the cucumbers and let them stand in salt water (a teaspoonful of salt to a quart of water) for two hours. Then drain and slice in lengthwise strips and wipe each slice dry on a fresh piece of cheesecloth. Have ready some flour mixed with salt and pepper and dredge each slice in this. Fry the slices until brown. Have ready long, narrow pieces of hot, well buttered toast and slip a slice of cucumber on each.

Cucumber Sauce For Fish.—Grate two large cucumbers and boil until tender. Add one teaspoonfull tarragon vinegar and one cupful stock. Thicken with one tablespoonful flour and one of butter rubbed together.

Anna Thompson

TODAY'S FASHION NOTE

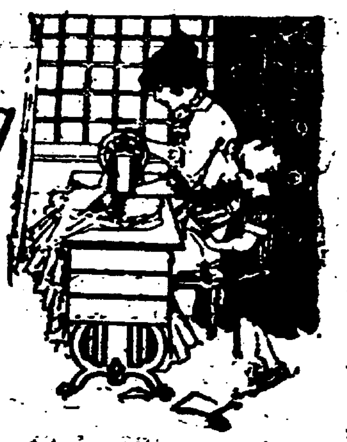
Since everyone seems destined to wear stripes for some cause or other, it may as well be in the cause of fashion. To be ultra-smart the stripes should be placed quite far apart. White in a changeable gray background is a refined combination. This costume consists of a blouse that fastens at the side and a full skirt, gathered high at the waistline. Bishop sleeves are gathered into selfcuffs, but the collar should be of organdy. Six yards of taffeta make the suit.

Pictorial Review Blouse No. 6621. Sizes, 34 to 44 inches bust. Price, 15 cents. Skirt No. 6622, Sizes, 22 to 32 inches waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review



White Linen Is Effective Made This Way.

An ideal design for a linen frock in white or cream, with an underblouse of colored organdie.

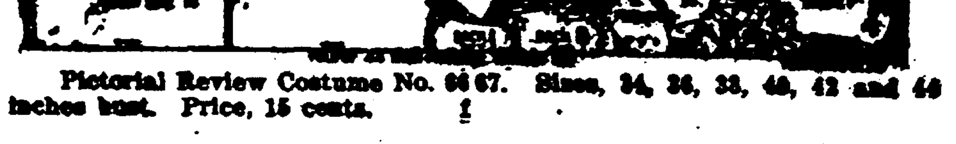
The many demands for semi-dressy models for white linen brings out this frock, which may have an underblouse of contrasting material, say, delicate blue or pink organdie. The neck of the blouse may be finished in high or V effect. There is a removable jumper, made with or without a large collar and circular peplum. The attached two-piece skirt closes at the left side of the front and is shirred.

In medium size the dress requires 5¼ yards 44-inch linen. Much work is saved in seam-sewing by placing the sections marked by triple "TTT" perforations on the lengthwise fold of material as shown in the cutting guide. There are five of these sections, namely, the front and back gores of the skirt, back of the underblouse and jumper and collar section. Both the flat and standing collar are laid on the lengthwise fold. The piecing for the front and back gores of the skirt are laid along the selvage edge of the linen, then along the upper row are arranged the jumper front, underblouse front and sleeve. The peplum is laid into position between the back of the underblouse and collar sections.

Narrow linen braid with a fancy edge makes an effective trimming for the front of the waist, while buttons finish the ends of the belt.

Without the peplum, the dress is quite effective, if the front is extended below the waistline.

Linetta is a sort of batiste glace; one of the threads of the woof is white and the next of some color. The material is exceedingly dainty and is to take the place of linen, which was made in the north where the great flax fields are now held by the invaders.



Pictorial Review Costume No. 6667. Sizes, 34, 36, 38, 40, 42 and 44 inches bust. Price, 15 cents.

EAST FIRST STREET.

CHARGE OF ASSAULT DENIED BY GRAHAM

Louis Graham, a young man employed by the telephone company, was arrested last night on a warrant sworn out by a young woman. The complainant alleges that as she walked in East First street with a young man Tuesday evening, Graham accosted them and attempted to take her arm.

Graham has always maintained a good reputation and he denies that he ever knew the complainant. He will be given a hearing in City Court Monday, and was released on his own recognizance until that time.

PAGEANTS ON LAKE AND RIVER ARE FEATURES OF CITY'S OLD HOME WEEK

The first meeting of the Old Home Week Committee was held at the library last night. A tentative outline of the week's festivities was submitted by Secretary Hollenga and discussions followed.

The committee of one hundred and seventy-five will be sub-divided. Each group will be in charge of a specific department of the week's entertainment,—as, music, parades, historical water pageant illuminations, dinners, etc.

The finance committee will meet this evening, and on Monday evening at the library another meeting of the general committee will be held. At this time a detailed outline for the entire week will be submitted and the work of the various departments given over to the committee divisions.

In the plans discussed last night, Lake Neahtawanta was suggested as the setting for the historical water pageant and the river in the vicinity of Pathfinder Island for the water carnival. In this way honors would be equally divided between the East and West side of the city.

Each member of the committee is requested to make an effort to be present at the next general meting that there may be no delay in beginning the work at once.

ABOUT THE TOWN

A bartender of one of the local merry mucilage dispensaries threw up his job the other night, it is said, and "hit the sawdust trail" with Peacock. You've gotta admit, the evangelist gets 'em, sooner or later.

* * *

Several sections of the state have suffered serious financial losses because of the heavy rains of the past few days through floods, the collapse of dams, and high winds. Thus far the damage sustained in this vicinity has been borne for the most part by farmers, whose crops have been destroyed and retarded by the unseasonable weather. The life on the good old farm isn't all that it's cracked up to be, and there must be many times when the agriculturist wishes for the comparatively care-free mind of his city brethren. But the life of the farmer has its compensations, like every other profession or vocation on the face of the earth. It is to be hoped that the latest change in the weather spells for the early approach of the good old summer time, however.

* * *

"How many children have you in your family?"
"Well, counting the latest arrival, I have ten."
"You don't call that a family, do you?"
"Why, what do you call it?"
"I call that 'The Birth of a Nation.'"

(This is not an adv.)

* * *

It is understood that plans are under consideration for some sort of a municipal celebration of Memorial Day in this city this year. Of course, the usual parade of G. A. R. veterans, whose ranks are thinning fast, as the years go by, and other fraternal organizations will take place, but it is suggested that something extraordinary be added.

The suggestion has been made that a great Preparedness parade, modelled after the giant project which was so successfully staged in New York last Saturday, be organized in this city on the occasion when we decorate the graves and honor the memories of those who fought and died that this nation might remain one and undivided. No time, it seems, could be more fitting for such a demonstration than Memorial day, and in these days when the people of the entire United States are expressing their devotion to the principles of this nation, such a parade would be particularly appropriate.

* * *

The rainy weather of the past week has emphasized the terrible condition of South First street, between Broadway and Rochester street. Although plans for paving the street have been completed, there is no indication that the work will commence for some time, and inasmuch as all the wrangling and dissension which grew out of attempts of certain individuals to dominate the planning of the improvements has been finally settled, and in the proper manner, could not a little executive energy be expended in an effort to give the people of this street decent thoroughfare as soon as it is practically possible?

Is it true that influence is still being brought to bear against the plans already passed by certain parties who are not in accord with the final decision of the city administration?

* * *

Whether or not the objections to the installation of a gas tank in front of the store of Edward Van Amburg on West First street have their foundation in personal or public motives, it is only justice to all concerned that these objections be publicly stated at the next meeting of the Board of Public Works, and the complete reasons therefore given. If the contention that the tank would result in increased fire risks in that neighborhood can be proven, the welfare of the many should have place, but if, on the other hand, it develops that other motives are at the root of the objections thus far manifested, no action other than the immediate grant of a permit to Mr. Van Amburg will satisfy the thinking public. In any event, this newspaper has no ulterior motives in bringing the matter to the attention of its readers and its efforts to secure fair play for those concerned has met with the approval of several influential local business men.

* * *

Several warpers have been re-employed at the American Woolen Company plant and as the warpers prepare the work of the weavers, this action forecasts the probable resumption of operations in the near future. The shut-down of the mill hit many local business men in a vital spot, and there is much speculation regarding the real reasons for action. It is said that the Fulton mill is the only one of the chain which remains non-unionized, and the report that union cutters among the garment workers refuse to handle the local production seems to find ready credence.

* * *

The raise in rates, made necessary after figures showed that the line was operating at a loss, and because of the prevailing high price of gasoline, has resulted in a serious loss of patronage on the Fulton-Hannibal bus line, and the owners plan radical changes in the operations of the line unless business in the future justifies the continuance of present conditions. The first rates, founded on statistics, proved impractical after the line had proved its cost of operation, and although the present rates are cheaper than those under similar conditions in other cities, many former patrons of the line have withdrawn their support.

* * *

(Advance news by Aero-graph from Punxsutawney)

Irving Galusha will deny a rumor to the effect that he is soon to leave his position as correspondent for a Syracuse daily to accept a more lucrative post with another organization, which will necessitate his spending the greater portion of his time in travels.

Catholic Mission Ends; Special Services and Music Tonight at 7:30

Two sermons were delivered to the men of the Church of the Immaculate Conception by the Franciscan missionaries last night. Father Austin spoke to the married men in the main church and the single men listened to a sermon by Father Stephen in the lower church. Both discourses dealt mainly with the obligations of the men, and the priests outlined the duties of their stations in life, not only from a spiritual, but also from a temporal standpoint.

After the sermons the men gathered in the main church for congregational singing and Benediction of the Blessed Sacrament.

The services tonight will conclude the mission and the program will begin at 7:30 o'clock instead of at 7:45 as heretofore. Tonight is "Presentation Night," and the service will be in the nature of a dedication to the Blessed Virgin Mary. A special musical program will be rendered, and the church will be decorated for the occasion with flowers which have been presented by the men. Both priests will deliver short instructions, and the exercises will conclude with Benediction.

Although a large number of men have gone to the sacraments during the week, it is expected that the largest number in the history of the church will go to confession tonight, and to communion tomorrow morning. The report of the last services and statistics of the mission will be published Monday.

Two New Yorkers May Be Saved From Death, Says the Ambassador

Washington—Ambassador Page today cabled the State Department that John Killegan, a New York boy, held in Dublin in connection with his participation in the recent revolution, is assured of regaining his freedom.

Jeremiah C. Lynch, American citizen under sentence of death in Great Britain for complicity in the Irish revolution, is still alive.

Senator O'Gorman received assurances from the White House last night that Lynch has not been executed, and will not be executed before Ambassador Page has had an opportunity to go over all the facts in the case.

Further instructions to Ambassador Page to guide him in his efforts in behalf of Lynch probably will be sent by the State Department tomorrow.

A message from Ambassador Page at London, received last night by Secretary of State Lansing, said Mr. Page had been unable to learn the nature of the sentence passed upon Jeremiah C. Lynch, and that it would not be made public until it had been "confirmed."

Ambassador Page added that he had made representations to the British Foreign Office in Lynch's behalf, as instructed in a cablegram sent to him by the State Department last night at President Wilson's direction.

The State Department received a cablegram from Ambassador Page, sent yesterday afternoon. In it Mr. Page said that the United States Consul at Dublin had reported that Lynch was tried Wednesday by field court-martial for participation in the Irish revolution.

The message was obscure; it was not plain whether Lynch was scheduled to be sentenced or to be executed this morning. Mr. Page added that when the sentence is known he will advise the Department.

Senator O'Gorman to-day received a number of telegrams from citizens of New York urging him to press upon the State Department the need of active intervention in behalf of Lynch. The New York Senator was gratified to learn of the suspension of the sentence, and hopes that the investigation already begun will result in the reversal of the military court's verdict and the release of Lynch.

Last Minute News

(By United Press.)

Paris—German aerial activity on both sides is reported today, especially is this true on the part of the Germans on the Belgian front. No unusual infantry activity marks the Verdun situation.

* * *

Cincinnati—George P. Cox, ex-political ruler and Republican leader, died at Clifton, Ohio, this morning. He was stricken with paralysis February 26th and never recovered, pneumonia developing a few days ago.

* * *

London—The Germans are preparing for a big offensive on the Belgian front, according to advices coming from Holland today.

* * *

Washington—Official reports of Colonel Sibley's intention to retire from Mexico to the border reached the War Department this morning.

* * *

London—Russian troops are pressing westward to cut the main Turkish lines of communication to Bagdad, and have advanced twelve miles and are now within seventy miles of Mossul on the Tigris river.

* * *

Chicago—Two great volcanos in the Hawaiian Islands are in eruption, according to a cablegram received this morning at the U. S. Weather Bureau from the weather bureau at Honolulu. It said: "Mauna Lowa in eruption and Killanea in unusual activity."

* * *

Washington—The House began voting at 11:15 to-day on the Administration's Shipping Bill and the result is expected at the noon hour.

* * *

London—German seaplanes raided the coast of Kent county at 2 a. m. to-day. One person was killed an two seriously injured by falling bombs.

Second Expedition to Obey Carranza's Demands; More Raids

San Antonio—Withdrawal of the second U. S. expedition into Mexican territory to Bonquillas, Texas, will occur in a few days, is the report today.

A strong force of Mexicans under the command of Atexautro Dominguez and Pedro Costillo, was practically annihilated by twenty-five native employes of the Hearst Ranch at Babicora, according to dispatches which came to General Pershing here. The vaqueros were led by Guadelupa Quesodo.

The bandits had been raiding the Hearst Ranch and carrying off property. The vaqueros took their trail and after following them several days, finally overtook the band at a small place called Ranche Vieje, forty mies southwest of Mdera.

The bandits were completely surprised. Sixteen of their number were killed in the battle that followed and a number of prisoners, including Pedro Costillo, were taken.

The prisoners were taken to Madera an turned over to the Carranza garrison there.

The bandits claimed to have no connection with Pancho Villa, but admitted they were banded together to fight Americans and Carranzistas.

IRISH WOMEN PROTEST AGAINST EXECUTIONS

New York—The Irish Women's Council last night held a mass meeting of protest against execution of Irish revolutionists by the English, at Tuxedo Hall, Fifty-ninth street and Madison avenue. Among those who spoke were Mrs. Sarah McKelzie, president of the organization; Mrs. M. J. O'Donovan Rossa and Dr. John Devoy.

Condemnation of British methods in putting down the Irish rebellion was general, and patriots voted censure upon all connected with the so-called "murders."

Mrs. McKelzie stated that the shooting of Irish leaders would not stop Ireland's fight for freedom. She charged that behind the wholesale executions was a British plan to force Irishmen to enlist in the British army.

WEATHER FORECAST.

Fair tonight with frost. Slightly increased cloudiness and becoming warmer. Moderate winds, east becoming south east.

Peacock Boosted by Two Hundred Fifty Boys and Young Men

The attendance at the Fulton tabernacle last night again reached the 2,300 mark, and 115 persons hit the trail with Luther Knox Peacock, the evangelist. Delegations of business men, boys, O. U. A. M. and Daughters of Liberty occupied reservations in the building, and the audience was one of the most enthusiastic of the entire revival.

Two hundred fifty boys and young men were entertained at a luncheon at the First Baptist Church at six o'clock, and afterward they marched to the tabernacle, preceded by a volunteer fife and drum corps. The business men's delegation met at the New York Central station at 7:20 o'clock, and marched to the tabernacle in a body. There were 300 men in line. The O. U. A. M. and Daughters of Liberty totaled 150.

As the young men and boys entered the tabernacle, carrying a large banner on which was written "We're Fulton Boys and True," they sang a song written for the occasion, and gave several yells for the evangelist with great spirit. The business men sang "The Church in the Wildwood," while the O. U. A. M. and Daughters of Liberty sang "America."

Brigadier White, of the division of Western New York Salvation Army, offered the prayer, and the collection, which was donated to the Salvation Army of this city to reimburse them for the losses sustained because of the absence of street meetings during the revival, amounted to $167.23.

The chairmen of the various committees in charge of the demonstration of boys and young men were F. E. Goodjon, Glenn Streeter, Fred Vogelsang, Charles Seeley, Fred Chubb, Grove Gilbert, Ensign Fitzgerald and Amos Druse.

SIN RUINED BABYLON; IT DESTROYS MAN; "BE SURE IT WILL FIND YOU OUT"

Last night Evangelist Peacock took his text from Numbers 32:23-11, "Be Sure Your Sin Will Find You Out." He said in part as follows:

No man can escape from sin. It will hunt you down, it will find you out, it will make you pay. Every time we sin, we must suffer. We may escape human law, but we cannot escape divine law. Sin is the one thing in the universe which can permanently damage a man and eternally damn him. Trouble may worry us, bereavements may sadden us, our friends may disappoint us, but the one thing that can eternally damn your soul in hell is sin. Sin is responsible for all the trouble we have in this world. It breaks up homes, it separates husbands and wives, it drives children into the streets, and makes this world a regular hell for every person concerned. Sin, is responsible for all the trouble and sorrw that comes to us in this world. What brought ruin to Babylon? Her kings and her Princes defied God, and lived in sin, and when her cup of iniquity was full, God dashed her to the ground. What brought ruin to Greece? Sin was the cause of her downfall. What has become of Rome and all her greatness? She at one time ruled the world. Sin brought ruination to Rome. Look at our own country. We sowed the seeds of slavery, and we were compelled to dye the soil of our country with our own blood. Sin doesn't pay. No man ever committed a sin that payed. No matter how much he may have gained in a financial way, it cost too much. No living soul has ever been benefitted in any shape or form by committing sin. Our jails and penitentiaries and almshouses and insane asylums are voices crying down through the ages, "The wages of sin is death." People may deceive each other, husbands may deceive wives, wives may deceive husbands, children may deceive their parents, parents may deceive their childrn, brothers and sisters may deceive each other, friends and neighbors may for a time deceive one another, pastors may deceive their people, and people may deceive their pastors, but remember this, NO ONE CAN DECEIVE GOD. In the end you will be found out and called upon to pay.

Sin Kills Reputation.

On the authority of Holy Writ clergymen declare from their pulpits. "Be sure your sins will find you out." Lawmakers write upon our statute-

AN OLD-TIME VOCATIONAL SCHOOL

A good many people have the notion that vocational training—the teaching of trades and industries to pupils in schools along with their book education—is a very modern plan. They know it is a system that to some extent is in successful practice in Germany and that experiments in the same line are being made in many special schools in this country, but on the whole they regard this form of education as comparatively untried.

Yet there is at least one school in the United States, the Thompson Island Farm and Trades School near Boston, which has been in existence for a hundred years. It was the first school in the country based on instructions in agriculture. Later it developed other activities and now a large number of trades are taught and in addition are such elective courses as music, meterology—the school has its own weather bureau—forestry, public hygiene and banking. At least half of each day is given to some form of manual labor.

The story of the school, as related in the Outlook, is very interesting. It is in no sense a reform school but was founded by philanthropic citizens of Boston for "worthy boys of limited means," and that purpose it maintains. It has been fortunate in having had superintendents well fitted for their tasks, but one who established a system of self-government among the boys many years before the George Junior Republic was thought of is considered to have done the most to make the boys contented with their life.

The main proof of the advantages of the Massachusetts school is that the boys who go out from there after four years of training know pretty well what they intend to make of themselves and how to go about it. More than that, they have a good training for citizenship. In order to bear out the latter claim, the school authorities announce that only three out of the 2,000 and more who have been graduated from the institution have, to use a familiar expression, "gone wrong"—certainly a small proportion.

With such a school in existence and others of more recent origin that have had experience with the vocational plan the people of this city who are thinking of such an acquisition to the school system should be able to gain information and ideas that would make their work far from an experiment.

How He Avoided It.

"Have you ever been hissed off the stage?" asked the girl who was thrilled at having met a real actor.

"Oh, no," he replied. "When I'm off the stage I always try to be among friends as much as possible."

Not at All Necessary.

"What was the cause of the quarrel with your husband?"

"I want you to understand, judge, that when we want to fight we don't have to have a cause."—New York Press.

"Fulton First, Last and All the Time"

Thomas H. Huxley says:

I know no study which is so unutterably saddening as that of the evolution of humanity, as it is set forth in the annals of history. Out of the darkness of prehistoric ages man emerges with the marks of his lowly origin strong upon him. He is a brute, only more intelligent than the other brutes; a blind prey to impulses, which as often as not lead him to destruction; a victim to endless illusions, which make his mental existence a terror and a burden, and fill his physical life with barren toil and battle. He attains a certain degree of physical comfort, and develops a more or less workable theory of life, in such favorable situations as the plains of Mesopotamia or of Egypt and then, for thousands and thousands of years struggles with varying fortunes, attended by infinite wickedness, bloodshed, and misery, to maintain himself at this point against the greed and the ambition of his fellow men. He makes a point of killing and otherwise prosecuting all those who first try to get him to move on; and when he has moved on a step, foolishly confers post mortem deification on his victims. He exactly repeats the process with all who want to hove a step yet farther. And the best man of the best epochs are simply those who make the fewest blunders and commit the fewest sins.

* * *

How nice to grow old gracefully. It reads well; but too many people grow old fretfully, even some of those who write the other way. One of the most delightful articles we have read on the subject was written by a woman nearly sixty who would be dignified if she did not attempt to appear twenty-two and whose hair would be a wealth of grandmotherly white if she did not deluge it with dye. With the pen she says, "Next to youth the most beautiful thing in life is serene old age unadulterated." With the face and hair dope and inharmonious attire she says, "Don't you believe it."

Hypocrisy!

How the world teems with it. A roue preaching virtue; and adventuress prating purity; a shylock talking generosity; a coward urging war; a rogue advocating reform.

Sooner or later, however, the more pretentious dissembler falls, the biggest cheat is exposed—and, after all, uplifting words perform some service even when uttered or written by those who do not live up to their own teachings, for happily we all do not have personal knowledge of their habits.

A Bohemian Italian, a devoteee of paganism, painted an imaginary figure of Christ that the world has ever since copied with reverence and held as sacred. Some of the most beautiful and inspiring contributions of English literature were written by Oscar Wilde.

A chicken-hearted loafer encouraged a regiment to a glorious achievement. Providentially, therefore, some public deceptions are not without value, some hypocrisy not wholly bad in its efforts. The practice of commonplace deceits is condemned, but would it be possible for everyone to be absolutely truthful and candid? Try it. Begin the day with a resolve to tell to all you meet the exact truth and carry out your resolution literaly. Not only will you be the most miserable person at the end of the day, but you will have made more people miserable than you might have done through distribution of cunningly devised fabrications.

Hypocrisy and deceit cannot seriously be defended. It were as fatal to do so as to damn virtue because it is more honored in the breach than in the observance and the fact that we urge impossible standards itself constitutes prime evidence of inbred dishonesty under a strict construction of the term.

But there is a measure of blessing in adversity and as even the lofty teachings of sybarites and frauds may hear elements of public benefits, so the advocacy of high standards by those who cannot attain them, and their adoption insofar as possible by auditors and readers constitute upward steps along the highway of moral improvement.

If we aim low we may miss the target.

If we aim high we may miss it; but there is no chance of hitting the mark if we aim below it.

The great barrier to perfection is human nature. It has been so from the beginning and will probably be so to the end, and the end, we are led to believe, will come with perfection and not after it.

As human beings we can only proceed a step at a time, and if we stumble occasionally or if we indulge in cant, let it be hoped it will at least serve as a warning to us and to others that will be heeded.—(Boise Statesman)

100 STATE STREET, ALBANY, N. Y.

WITH THE SUFFRAGISTS.

In Iowa the state fire marshal, who is a Norwegian has issued an appeal to the Norwegian voters of the state to vote for the woman suffrage amendment at the coming June election. Norway was the first wholly free and independent nation to give full suffrage to any woman, and Fire Marshall Roe asks Iowa voters to be as fair to women as Norway has been.

* * *

Twelve of the thirteen members of Congress from the state of Iowa have come out for woman suffrage. The lone Democratic member is the latest convert having recently written the Men's League for Woman Suffrage that he will vote for the woman suffrage amendment next month.

* * *

In consideration of the fact that agriculture is the leading industry of Iowa and that the farm papers wield a big influence, the splendid support being given the suffrage campaign by the farmers' press is counted on to roll up the vote for the suffrage amendment like a snow ball.

* * *

In Montana the first fruit of woman suffrage is reported as increased protection of the food supply. In Butte the papers print the weekly reports of the health inspectors, and the markets, restaurants, and bakeries can't escape criticism by cleaning up once in a while. They have to keep clean.

* * *

The Methodist will not longer stultify himself by promising to endow his bride with all his worldly goods, according to the press report of the Methodist General Conference at Saratoga. If the bride is to be equally candid on the question of "obeying" the report did not specify.

* * *

In connection with the celebration of baby week in New York City the Tribune commented with pride on the decrease in the death rate of babies since 1898. In 1898 every fifth baby died before it reached its first birthday. The present rate is but nine per cent. The Tribune added that New York City could still learn something from New Zealand where the infant death rate is but five per cent. The editorial concluded with this statement: What can be done in New Zealand can be done in New York.

The thing that has been done in New Zealand has been to give to the mothers of babies a voice in the government. This is the lesson, according to suffragists, that is to be learn from New Zealand.

* * *

The United States statistics on longevity recently issued show that women live longer than men; that a baby girl may expect to live 53.2 years while a baby boy can expect but 49.9 years of life.

The Boston Transcript gallantly ascribes to her life of personal service the fact that the days of a woman are longer in the land than those of her more commercialized brother.

A Child's Prayers.

If the mother would teach her child to pray she must first know how to pray herself. Then if she kneels by her child's bed and in simple words commits her household to the keeping of him who slumbers not nor sleeps her child will catch something of his mother's spirit and trustfulness and in time, learning to join with the mother in the words as he has already joined with her in the spirit of reverence and repose, will learn to pray. The mother who has no such experience cannot inspire it in her child, but must leave it to be given by some one better equipped than herself.—Lyman Abbott in Outlook.

Cutting.

Sappleigh—Robson is the biggest ass in town, but his wife is the cleverest woman I know—aw—present company excepted, of course.

Miss Keen—Yes, in both cases.—Boston Transcript.

THE BIG CIRCUS DAY DRAWS NEARER

Unusual Amount of Local Interest Centered On Coming of Barnum and Bailey.

The day of all days in the calendar of the small boy has almost arrived and the youngsters of this vicinity are anxiously counting the hours until circus day. It looks now as though a large percentage of the local population, both young and old, will be present at one of the performances when the Barnum and Bailey Greatest Show on Earth exhibits in Syracuse on May 24th.

Not in several years has so much local interest been evinced in a circus event as has been displayed this season in the coming exhibition of the Barnum and Bailey Circus. It is promised that the show will display more new and novel features than ever ever before, including 100 new acts from Europe.

The principal feature is the new Oriental, spectacular pageant, "Persia, or the Pageants of The Thousand and One Nights." This great display, which is portrayed by 1,350 persons, and hundreds of horses, elephants and camels, depicts in pageantry the famous tales of the Arabian Nights. In New York City, where this pageant was produced for the first time this Spring, it was announced the most gorgeous and stupendous Oriental display ever presented in America.

Among the foreign circus novelties to be seen for the first time this season are four troupes of wonderful Chinese performers direct from Pekin, the Great Hanneford family of riders; Signor Bagonghi, famous dwarf equestrian from Italy; James Teddy, champion jumper of the world; Pallenberg's two troupes of trained bears, and a host of other novel acts too numerous to mention individually.

The Barnum and Bailey circus is traveling this season on five trains, made up of 89 cars. More than 1,400 persons are carried in the various departments of this great show, which also included an enlarged menagerie of 108 cages and 41 elephants.

A brilliant, new, three mile street parade will be given on the streets during the morning hours preceding the first performance.—Adv.

Hand Painted Designs in Vogue for May

New York—The "Merry Month" does not belie its reputation, and while every square blossoms out with daffodils, pansies, and jonquils, and florists' windows overflow to the walk, the world of womankind dons its freshest and prettiest and goes gaily on pleasure bent.

Hand Painting.

Everyone who can is having something hand painted, for the vogue of this form of decoration runs rampant and since colors are fast; it is quite as often applied to cotton frocks as to silk or crepes. Hand painted sport hats have ceased to be novel but they

7123
7162

McCall Designs

are still very pretty, and even more effective where the design is repeated on the garden smock that bobs up again this year with painted or patched flowers or fruit to add additional charm.

A Clever Woman

A clever woman with just a little knack with her brush and dye paints can turn a commonplace frock into a thing of individual charm and beauty, and if she so desires secure plenty of commissions from friends less skilled. An artist here has made such a success at this sort of work that she has had orders from foreign royalties, and has done an evening coat of cloth of silver for the Queen of Italy, painting blue hydrangea blossoms at just the right points. The wrap was lined with ermine and was a thing to dream of if one has a love of beautiful clothes. Everyone is familiar with painted designs on household belongings and quite the prettiest doilies that the writer ever saw were simply squares of organdie fringed a little at the edges and beautifully painted with wreaths of spring flowers—one sort on each piece—that looked as if they were done on the damask cloth. The organdie was quite invisible when placed over the linen cover.

Vogue of Spots.

Spots are back in fashionable favor, not only big polka dots but all sorts of odd oblong and diamond shapes, and since these are very characteristic foulard patterns, this old time silk is getting its innings once more. On the platform the other afternoon, a well known singer of the Metropolitan Opera Company wore a foulard dress of bright, dark blue—darker than Kings blue—with an odd oriental spot of green having a white design in it. This formed only the skirt and high-shaped girdle. The waist was of cream lace with an over blouse of matching blue Georgette crepe delicately embroidered in green chrystal beads. A black tricone hat completed a simple but most effective costume.

Leghorns and Watteau Plaque

Leghorn hats in natural tint have been worn by bridesmaids at most of the Spring weddings, though at one very smart function the hats were of white horsehair and the bride's veil topped with a crown of white wheat ears in place of the usual orange blossoms, while in place of a bouquet she carried an armful of white lilacs and pink moss roses.

Watteau plaques that perch becomingly on the present shapely coiffure are increasingly favored for function wear, and according to their coloring and materials can be quite suitably worn by the girl or her grandmother. The streamer at the back, usually part of the trimming of these little shapes, can be fetchingly adjusted to set off a prety neck or conceal lines on one that needs first aid, without too apparent intention.

The tulle scarfs so generally worn have the same possibilities, especially when adjusted "Harem" fashion—twice round with the end at either side.

LUCY CARTER

RADIANT HEAT.

It Is Not Real Heat, but Only a Form of Wave Motion.

When a fire is lighted it throws off what we call heat rays or waves. These waves are very much like the waves of light which come from a light or fire or the air waves which produce sounds. The rays of light and heat which come from the sun are like the rays of light and heat from a fire.

Heat is of two kinds—heat proper, which is resident in the body, and radiant heat, which is the kind which comes to us from the sun or from a fire. This radiant heat is not heat at all, but a form of wave motion thrown out by the vibrations in the ether. The heat we feel is the sensation produced upon our skins when it comes in contact with the waves created by the fire.

Heat was formerly thought to be an actual substance, but we know now that radiant heat is known to be the energy of heat transferred to the ether which fills all of space and is in all bodies also. The hot body sets the particles of ether in vibration, and this vibrating motion in the form of waves travels in all directions.

When these vibrations strike against our skin they produce a heat sensation. Striking other objects these vibrations may produce instead of a heat sensation either chemical action or luminosity. This is determined by the length of the vibratory rays in each case.—Philadelphia Press.

WHEN A SHIP TURNS TURTLE.

Often the Bottom of the Vessel Is Blown Out as She Goes Down.

To "turn turtle" means in nautical language that a ship rolls too heavily, fails to recover herself and after a brief period on her beam ends turns topsy turvy, so that her keel points skyward. Then, of course, she goes down.

Frequently the compressed air imprisoned in her hull blows her bottom out as she goes down, or if she is a steamer her boilers burst, with similar results.

As a rule, ships turn turtle because they are burdened with too much "top hamper" or from lack of sufficient ballast or both causes combined.

Rarely does it happen that there are any survivors, but there is one notable exception in the case of the battleship Captain, which was lost after this fashion in the bay of Biscay. In her case exactly three minutes elapsed from the time she first turned turtle until she finally sank, and forty of her crew of 500 men clambered up her side as she rolled over and on to her keel. Of these eighteen men were eventually rescued and were able to describe later on precisely what occurred.—Pearson's Weekly.

His Limit.

"What's Thingembob good for?"

"If it's checkers, he's good for all day."—Richmond Times-Dispatch.

Floors that will stand hard usage

For floors that are subjected to the constant tread of many feet—in halls, in offices, in school houses and in churches—we recommend the perfect floor varnish—

DEVOE
THE GUARANTEED
MARBLE FLOOR FINISH

It is the floor varnish without a fault. Put it on wood floors and we'll guarantee that it will give them a marble-like surface that resists wear and tear as no other varnish will.

It preserves indefinitely the natural beauty of the wood. In clear, dry weather it will dry in 24 hours. To clean floors varnished with Marble Floor Finish merely apply a little DEVOE Polishing Oil according to simple directions. That's all the "scrubbing" they need. No more soap and water and elbow grease! We *know* Devoe Marble Floor Finish will give you satisfaction. And the guarantee of purity is on every can.

FULTON, N. Y.

WOMEN CAN'T WORK 12 HOURS

Governor Whitman has put the kibosh on the desires of cannery men who want to employ women twelve hours during the rush season. He yesterday vetoed the Argetsinger Committee amendments to the labor law, one of which would have made it legal for women employed in canning factories to work twelve hours at any time of the year.

In his veto memorandum the Governor expressed the opinion that the proposed cannery amendment "might be continually abused and would make more difficult the enforcement of the labor law."

The Governor also called attention to certain provisions to which he objected. These were intended to exempt creameries and diaries and plants where their products are prepared for market from the one-day-of-rest-in-seven law, to place the labor department counsel and his assistants in the exempt civil serviee class, to reduce the number of exits required in certain factory buildings and to make less stringent the present law requiring doors opening on a stairway or other means of exit to be placed so as not to obstruct the passageway.

Swans For the Table.

The swan as a dinner dish has been seen on English tables within comparatively recent times. "Up till a century or so ago," according to F. W. Hackwood, "swans were prepared for the table in and around Norwich. The young birds were put up to fatten in August, given as much barley as they would eat, and by November they were in prime condition. If kept longer they began to fall off, losing flesh and fat and the meat becoming darker in color. The corporation of Norwich still maintains its ancient swannery at St. Helen's swan pit and sells off a few of the fatted birds every Christmas at 2 guineas each."—London Chronicle.

BARNES' DOUBLE WON THE GAME

Locals Found Ex-Rowan Pitcher, but Not Until He Had Them Cooling Off the Air a Bit.

"Honey" Barnes an eight other members of the Fulton High school baseball team won a second straight victory over the Oswego High school squad at Fort Ontario yesterday in one of the best played games ever staged between amateur teams in that city. To Barnes belongs ninety-per cent. of the credit for winning the game, for not only did he hold the heavy hitting Oswego lads to three scattered hits, but it was his timely double in the first inning that sent O'Brien across the rubber with the winning run.

Schafer, former Rowan Star twirler, was in the box for Oswego, and the Fulton lads solved him for eight hits. He fanned twelve men, however, and after the first inning held the locals safe at all times. Only twenty-eight men faced Barnes, and in every inning but two, the Oswego team went out in one, two, three order. The Fulton youngster showed clever headwork in the eighth inning when he pulled himself out of a bad hole, after Fitzgibbons had led off with a double, by causing Smeglegosky to fly out to O'Brien, and fanning Rebeor and Shannon. Some base running of the solid ivory variety on the part of Fitzgibbons in the eighth cost the Oswego lads a run. Fitzgibbons started for home when Smeglegosky knocked a long fly into center field, under the impression that O'Brien would not get the ball. When the local centerfielder pulled it down after a hard run, Fitzgibbons barely got back to third base in time to prevent a double play, whereas if he had waited on the bag he could have easily beaten the throw in.

Fulton's lone tally, which won the contest, came in the first inning. Dingle popped up to Schafer, but Bray waited for a pass and got it. He stole second, but was out at third in attempting to steal. O'Brien also worked Schafer for a pass, and stole second. Barnes picked out a good one and hit for two bases, O'Brien scoring. Green fanned.

Rebeor reached third base for Oswego in the thrid, but Barnes tightened up, and fanned Galloway, after Kinney had flied out.

The score:

Oswego	AB.	R.	H.	PO.	A.	E.
Kinney, 3b.	4	0	0	1	0	1

Score by innings:

Fulton	1	0	0	0	0	0	0	0	0	— 1
Oswego	0	0	0	0	0	0	0	0	0	— 0

Two base hits, Barnes, Fitzgibbons; stolen bases, Bray 2, O'Brien, Reynolds; sacrifice hit, Shannon; struck out, by Barnes 7, by Schafer 12; bases on balls, off Barnes 1, off Schafer 2; wild pitch, Barnes.

Umpire, Dalton. Scorer, Sanford.

FALLING TREE KILLS WOMAN

Mrs. Elizabeth Reynolds while Trying to Save Child Fatally Injured.

Mrs. Elizabeth Reynolds, wife of Frank Reynolds, of this city was hit by a falling tree in Harrisville, Lewis county, yesterday afternoon, and received injuries which resulted in her death about an hour later. Mrs. Reynolds practically sacrificed her life that her eight-year old daughter, Mary, might live.

Two of Mrs. Reynolds' sons were felling a tree near their home, and the tree was just beginning to fall when they saw their mother, unaware of the danger, come walking along, leading the child by the hand. The men saw that the tree would crush their mother and little sister, and shouted a warning. Mrs. Reynolds looked up and with total disregard for her own safety, threw the child aside before she attempted to get out of the way herself. The little girl was unhurt but the tree caught Mrs. Reynolds and pinned her to the ground. Her sons worked frantically to release her and a doctor was called, but Mrs. Reynolds died before an hour had passed.

The body will be brought to this city today by Young and Hill, and the funeral will be held from the home of her brother, Frank Petrie, at 1:30 tomorrow, and from the Case chapel at 2 o'clock. Rev. Dr. Barrett will officiate, and some of Mrs. Reynolds' favorite songs will be rendered at the chapel. Burial will be made in Mt. Adnah.

The deceased is survived by her husband and five sons, Ernest, Amos, Frank Petrie of this city; and two daughters, Mrs. Maud House, of Lysander, and Mary, the little girl who was saved from injury; one brother, Frank Petrie of this city; and two sisters, Mrs. Thomas Echard, of Hannibal, and Mrs. Will Turner, of Phoenix. Mrs. Reynolds was the daughter of Henry Petrie, a former resident of Minetto, and was in her 49th year.

Mr. L. B. Babcock returned today from Florida, where he spent the last three months. During his trip home he visited his sons who are lumber dealers in Dixie land. His summer will be spent on the Babcock farm, Babcock road.

CHRISTIAN SCIENCE.

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday, in the Van Wagenen Block. Miss Ada Thayer, first reader; Mrs. Frank Wooley, second reader. You will be welcome and interested to attend one or both services.

The subject for next Sunday is: "Soul and Body." Golden Text: Matthew 6:22. Responsive Reading: Galatians 4:19-31.

FREE METHODIST CHURCH.

State and South 3rd Streets.
(Rev. C. A. Balch, Pastor.)

Sunday morning, 10:15, preaching by the pastor.

Sunday school at 12:00.

Prayer service at 6:00.

Meeting for Free Methodist trail hitters in the church at the close of each evening service in the tabernacle through the week.

ALL SAINTS' CHURCH.

(Rev. Minor I. Peters, Rector.)

May 21st—Fourth Sunday after Easter.

Services as follows:
Holy Communion, 8:00 a. m.
Matins and Sermon, 10:30 a. m.
Sunday School and Bible Class, 12 m.
Evensong and Sermon, 5:00 p. m.

All the seatings are free and visitors are cordially welcomed at all the services.

Close to Us.

"What are the things that touch us most as we look back through the years?" asked a lecturer impressively. There was a moment's pause, and then a small boy in the audience answered, "Our clothes."

FRANK ZAIA GIVEN A REAL GOOD SCARE

An Overland automobile, the property of Frank Zaia, was stolen from in front of the Church of the Immaculate Conception last night as Mr. Zaia was attending the mission services. He left the car at the church at 7:45, and when the services were over, the car was missing. Mr. Zaia immediately notified the police and an alarm was sent out to neighboring cities and towns.

This morning at 5 o'clock as Chief of Police Edward Dyer was on his way down town he saw an Overland car standing on 7th street and identified it as Mr. Zaia's. The car was in good condition, and had been driven about 19 miles. No one saw the car abandoned and there are no clues for the police to work on. Chief Dyer is of the opinion that some young men took the car for a joy-ride.

MILK CONTAINERS MAY NOW BE REGISTERED

With the signing of the new law by Governor Whitman providing for registering milk cans, bottles or jars, the local vendors of milk are protected against loss to a great extent of those articles.

Under the provisions of the law, which will be carried out by Commissioner of Agriculture Charles S. Wilson, it will remain optional with milk dealers to register their containers.

The new bill is aimed to prevent one dealer from taking containers belonging to another and using them in distributing milk.

HORSE BOLTED; WOMAN THROWN AND INJURED

Mrs. Cyrus Nettleton, of West First street, sustained severe bruises and a bad shaking up shortly before noon today when a horse she was driving took fright on the lower bridge and bolted. Mrs. Nettleton could not regain control of the animal and when the wagon struck one of the curbs, she was thrown out. The horse was caught after a run of a few block and brought to a local livery stable. Mrs. Nettleton received first aid and was taken to her home.

BIRRELL WANTED TROOPS SENT TO IRELAND

London—Both Lord Kitchener, the War Secretary and Viscount John French, Commander-in-chief of the Home Defences, were asked to send more troops into Ireland before the Sinn Fein uprising, but refused.

This was the testimony given today by Augustus Birrell, former Secretary for Ireland, before the Royal Commission investigating the Irish revolt. The request for troops was made by Mr. Birrell himself, who vainly tried to persuade the War Office that a display of military force in the streets of Dublin might stave off the threatened rising.

700 MORE MARINES ORDERED TO DOMINGO

Washington—Three hundred marines at Norfolk and between 400 and 500 in Haiti were ordered last night to Santo Domingo to reinforce the American force policing the littl Republic.

Those at Norfolk will go on the cruiser Tennessee, now at New York. The cruiser Salem, at Boston, also was ordered to Santo Domingo and will take twenty-five marines from Boston.

ALL-AMERICAN MUSIC SCHOOL PROVIDED FOR

Chicago—A trust fund of $700.000 to provide for a great school of music, not only for Chicago, but for all America, was provided for in the will of Bryan Lathrop, wealthy real estate broker.

The Chicago Orchestral Association is the beneficiary.

BAT-TENDERS SOMETIMES PUSH UP SCORES

The Freshman team of Fulton High school defeated the Erie street school team yesterday afternoon, 29—4. Braun's work as bat-tender for the losers was a feature.

CONSUMERS' LEAGUE TO AID THE STRIKERS

New York—The Women's Consumers' League, of which Mrs. Frederick Nathan is president, yesterday signified its intention of supporting the strikers in the garment and allied trades. Benjamin Schlesinger, president of the strikers' union, and Robert W. Breers addressed a meeting of the league at No. 105 East Twenty-second street.

PROGRESSIVES ORDER ROOSEVELT BUTTONS

Chicago—An order for 100,000 campaign buttons, bearing on them an American flag an the inscription "Rmericanism" and "Roosevelt," was given to-day for use during the Progressive National Convention in Chicago. The order was given by the representative of the Progressive National Committee.

A tentative draft of the Republican national platform has been prepared jointly by Republican and Progressive leaders. It embodies principles held both by former President Roosevelt and Supreme Court Justice Charles E. Hughes.

It was said to-day by a Republican Senator who will be one of the biggest figures in the Chicago Convention, that the platform meets the views of both Colonel Roosevelt and Justice Hughes.

So far as the Senate Republicans are concerned, the opinion seems to prevail the ticket to be nominated at Chicago will be:

For President—Charles E. Hughes of New York.

For Vice-President—Charles W. Fairbanks, of Indiana.

Republican leaders claim to have assurances that if the convention names Justice Hughes, he will have the support of Colonel Roosevelt. It is even predicted by them a nomination will be made on the third ballot.

PUBLIC UTILITY POLICY.

Conclusions Adopted by the National Municipal League.

At a recent meeting of the committee on municipal program of the National Municipal league the following conclusions were adopted and ordered to be included in appropriate sections for insertion in the league's model city charter:

The public utility and franchise policy embodied in a model city charter should be so formulated as to conserve and further the following purposes:

First.—To secure to the people of the city the best public utility service that is practicable.

Second.—To secure and preserve to the city as a municipal corporation the fullest possible control of the streets and of their special uses.

Third.—To remove as far as practicable the obstacles in the way of the extension of the practice of municipal ownership and operation of public utilities and to render practicable the success of such ownership and operation when undertaken.

Fourth.—To secure for the people of the city public utility rates as low as practicable consistent with the realization of the three purposes above set forth.

It should be no part of such policy to secure compensation for franchises or special revenues for general city purposes by an indirect tax upon the consumers of public utility services.

In formulating a policy to carry out the four purposes above stated as desirable the following principles should be recognized:

First.—Each utility serving an urban community should be treated as far as practicable as a monopoly with the obligations of a monopoly, and its operation within the city should be based as far as practicable upon a single comprehensive ordinance or franchise grant uniform in its application to all parts of the city and to all extensions of plant and service as well as to the existing plant and service.

Second.—Every franchise should be revocable by the city upon just compensation being paid to its owners when the city is prepared to undertake public ownership.

Third.—The control of the location and character of public utility fixtures, the character and amount of service rendered and the rates charged therefor should be reserved to the city, subject to reasonable review by the courts or a state utilities commission where one exists.

Fourth.—The granting and enforcement of franchises and the regulation of utilities operating thereunder should be subject to adequate public scrutiny and discussion and should receive full consideration by an expert bureau of the city government established and maintained for that purpose or, in case the maintenance of such a bureau is impracticable, by an officer or committee designated for the purpose.

Fifth.—Private investments in public utilities should be treated as investments in aid of public credit and subject to public control and should be safeguarded in every possible way, and the rate of return allowed thereon should be reduced to the minimum return necessary in the case of safe investments with a fixed and substantially assured fair earning power.

Where to Begin.

"Look here," said the reforming husband. "We must have things arranged in this house so that we shall know just where everything is kept."

"With all my heart," sweetly answered his wife, "and let us begin with your late hours, my love. I should very much like to know where they are kept."—Stray Stories.

WHEN HER BACK ACHES

A Woman Finds All Her Energy and Ambition Slipping Away.

Fulton women know how the aches and pains that often come when the kidneys fail make life a burden. Backache, hip pains, headaches, dizzy spells, distressing urinary troubles, are frequent indications of weak kidneys and should be checked in time. Doan's Kidney Pills are for the kidneys only. They attack kidney diseases by striking at the cause. Here's proof of their merit in a Fulton woman's words:

Mrs. Leland Sherman, 267 S. 7th st., Fulton, says: "I feel justified in recommending Doan's Kidney Pills, for I know from personal experience that they are an excellent kidney and backache medicine. I used them for pains in my back and loins and other kidney annoyances, and they gave me relief."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Sherman had. Foster-Milburn Co., Props., Buffalo. N.Y.

AUSTRIANS MAY SEND BIG ARMY TO ALBANIA

London—The Austrians have made further progress against the Italians in their great and sudden offensive attacking with 400,000 men.

The Austrian front south and southeast of Rovereto has been advanced uniformly a distance of five miles in three days, and now in places is on Italian soil.

The Italian War Office officially admits a general withdrawal on the Trent front. The retreat was made, it is stated, to avoid useless loss.

The positions captured, according to a semi-official statement issued in Vienna, include points to which the Italians attached the utmost strategic value.

FEARED BLINDNESS AT 77; A SUICIDE

New York—Failing eyesight and poor health yesterday drove Mrs. Andrew Williams, seventy-seven, to suicide. She was found dead in the attic of her home, at No. 60 Lewis avenue, Elmhurst, with a gas tube in her mouth.

Sometime ago the aged widow told her neighbors she feared blindness, and dreaded the thought of spending the remainder of her life in eternal darkness.

In Jungleland.

SIN DESTROYS MEN—PEACOCK

(Continued from Page One)

"The wages of sin is death." The books over against heinous crimes, wages of sin is death in more than a spiritual sense. It is death to a man's reputation. When people realize that a man is a sinner and is dishonest and is untrue and is impure and a traitor, his reputation is gone. Sin is death to self-respect and the regard of friends. When we live sinful lives we lose all respect for ourselves, and we lose respect for our friends. And when people once lose their self-respect, they are on dangerous ground. Sin is also death to the intellect. When we sin we weaken ourselves intellectually. There are people in insane asylums who have been sent there because of their impure living or because of sin of their parents. God says, "The iniquities of the fathers shall be visited upon the children unto the third and fourth generation." This is a law of nature. This would be true if we did not have a God. It would be true if we did not have a Bible. We see the truthfulness of this statement almost every day we live.

I visited a children's hospital in Colorado Springs, Col., I saw little children unable to walk. I saw little children physically deformed. All of them were doomed. I asked the reason, and the answer was, "sin." I said these children are too small to sin. Too young to know right from wrong, and the superintendent answered: "These children are suffering because of the sins of their parents." Probably these parents had concealed their sins from one another, but they were found out in their children.

Sin is often death to the body, their bodies are diseased and it is sins they sap away their vitality. Sometimes when men commit certain only a short time until they are laid in their graves.

Every sin we commit hurts our self-respect, our intellect, our bodies, and our souls, and if we continue to sin we will lose out in every way in this world and the world to come. When we sin we harm ourselves. Yes, and we harm other people. When parents sin they harm their children. When children sin they wrong their parents. When church members sin, they hurt the cause of Jesus Christ, and they wound God, for all sin is primarily an offense against God. You remember when Joseph was tempted by Potiphar's wife to commit a certain sin. His reply was: "How can I do this great wickedness, and sin against God?" He didn't say: "How can I commit this sin against Potiphar or against his wife," but "how can I sin against God." He realized that he would not only harm himself and Potiphar's wife and Potiphar, but that he would wrong God by committing this sin. Parents, when you sin you wrong your children, and you wrong God, and you harm every decent person in the community. For, every sin we commit is an offense against God.

A Living Instance.

Several years ago, when they were building the Wabash Railroad from Pittsburgh to Mingo Jct., a man by the name of Ferguson had a contract to build a section of the road near Middletown, Pa. He went to Washington, Pa., drew out of the bank $10,000 and started back to Middletown to pay his men. When driving through a dense piece of woodland, there was an explosion. The horses were killed, Contractor Ferguson was killed and the money in the satchel disappeared. No one knew anything about the crime. No one witnessed the killing. The man made his escape. He had every chance in the world to get away, but he was found out. He was a Croatian, and had purchased a ticket for his native land. He was arrested, was given a trial, and was sentenced to pay the penalty. He had every chance in the world to make his escape, but he was found out.

Our first parents sinned against God in the garden of Eden. They thought they could hide from the presence of God, but they were found out; and the human race has been paying the penalty for their sins ever since.

David sinned against the Lord. He thought no one would ever find out that he had committed murder in order that he might have the opportunity to commit adultery. But when God sent Nathan the Prophet to reveal to David what a terrible sinner he was in the sight of God, he discovered his sin had found him out and he said: "I have sinned against the Lord." His sin had hunted him down, found him out, and he had been called upon to pay.

Dr. Crippen murdered his wife in Italy; buried her body in quicklime in the cellar, sailed for this country in company with the girl with whom he was living in sin, thinking no one would ever know anything about the crime. But, before he had gone very far, he and his companion were found out, and he was called upon to face the charge of murder.

A man may sin for a time, and no one know anything about it. He may cover up his evil deeds for years, but in the end he will be found out. Mr. Sunday tells this story in one of his sermons.

God's Presence Felt.

Out in Illinois several years ago a rich farmer went to town, drew several hundred dollars from the bank, drank freely of liquor, and along about dark he was seen to enter his carriage and start for home, seven miles in the country, but he never reached there. His family awaited for him until midnight and after, but he did not come. In the morning they found his team tired and jaded, standing at the gate waiting for kind hands to open it. They saw no evidence of a struggle in the carriage. The whip was in the socket, and the lines wrapped around the whip, and everything seemed to be in order. Not a drop of blood could be found. They knew not what to do. They hired the best detectives that Pinkerton had. Finally a neighbor man was arrested on suspicion, but easily proved an alibi. Shortly after his release he sold his farm and went away. Years passed by. On the farm of the man who had been arrested, charged with the crime was a pond, fed by springs, which had never been known to go dry, but a long drought through July and August caused the pond to go dry, and out in the middle of the pond they found a human skeleton with a log chair fastened around its neck. They also found the initials of the man who had been arrested charged with the killing of the farmer carved on the chain, and the human skeleton was easily identified as that of the farmer who was missing because of a defect on his left hand, the absence of two fingers. They searched all over and out on the Pacific coast they found the man who owned the farm. On his death bed he confessed that he had murdered the man for his money, and had carried his body out to the pond, fastened the chain around it, and dropped it into the middle of the pond. But God permitted the sun to dry up that old pond so that the murder might know that he had been found out before he died.

The Bible says the wicked shall not live out half their days. Sin ruins everything it touches. Wrong a man in his home, and you will suffer for it. Wrong a man in his wages and you will suffer for it. Wrong a man in business and you suffer for it. Our sins are sure to find us out. We may conceal them from the world, but our own conscience will condemn us. We cannot hide our sins from ourselves. Man knows when he does wrong. Woman knows when she does wrong. When we do wrong we can conceal our sins from our friends, but not from ourselves.

Must Answer to God.

When I was preaching in a certain town, a young man came forward one evening. He asked if he might be permitted to speak with me privately. He went with me to my room in the hotel and told me this story: "I have been taking money from my employer. I stole a revolver from a hardware man. I want to be a Christian, but I know I can't follow Jesus Christ without making these things right." I told him to go back to his employer, tell him what he had done, offer to pay back the money, ask the man to have mercy upon him. I told him also to take the gun back to the hardware man or pay him for it. He said he would do it. These men received him kindly, gave him a chance to make good, three months after he made his confession he wrote me a letter, telling me that they had been the happiest three months he had ever lived. He was rejoicing because he had gotten out of his life everything that was contrary to the will of God, and that God had given him the power to lead his father and mother, his brothers and sisters to a saving knowledge of Jesus Christ. This young man had gotten away from his sin through the atoning blood of Jesus, and had found out from his own experience that it paid to live a good, pure life.

This is true not only of this man, but it is true of all who have been saved through the atoning blood of Jesus Christ.

Then our sins will find us out in eternity. God knows everything. God sees everything, and to God we must answer. "Be not deceived God is not mocked; for whatsoever a man soweth, that shall he also reap For he that soweth to his flesh shall of the flesh reap corruption: but he that soweth to the spirit shall of the spirit reap life everlasting." We cannot get away from God. We may despise God, laugh at His word, trample under foot His laws, sneer at Jesus Christ, but it will not always be so. Sometimes we will have to answer toG od. When that time comes, will you be prepared to face God? "The wages of sin is death, but the gift of God is eternal life through Jesus Christ?"

Fly to Jesus. Through Christ there is forgiveness for sin. Without Christ we will be lost.

More and better crackers for your money.

FOUR CITIES LINKED BY WIRE

Telephone Men Listened to National Hymn by Wireless at Big New York Banquet.

New York—New York, Philadelphia, Baltimore and San Francisco were linked last night at a unique banquet held under the auspices of the telephone societies of those cities. It was probably the largest feast of modern times, 6,200 telephone men participating, and the telephone was the medium that brought them together.

For three hours they listened to the same speaker as if under the same roof, sank together, exchanged postprandial amnities, and njoeyed wizard-like telephone performances.

The New York society dined in the Seventy-first Regiment Armory. 3,000 covers were laid. In Philadelphia, 1,000 employes of the Bell Telephone Company, of Pennsylvtnia, gathered in the Bellevue-Stratford. Twelve hundred men of the Chesapeake and Potomac Telephone Company were in Lehmann's Hall in Baltimore, and the San Francisco contingent assembled in Native Sons' Hall in that city.

The Blue Bell Band, of this city, rendered selections that were heard in other cities, and their respective orchestras reciprocated. The Blue Bell Glee Club led the gathering in the Seventy-first Regiment Armory, singing "Maryland," while the band in Baltimore played their State song, and Philadelphia joined in the chorus.

It remained for San Francisco, later, to eclipse this performance with the co-operation of New York, a pianist on the Pacific Coast accompanying a singer in this city.

Another thriller provided by the committees in charge was the transmission by wireless telephone from Arlington Tower, near Washington, D. C., of the strains of the Star Spangled Banner from a phonograph record.

T. R. WINS CHEERS IN FORD'S CITY

Detroit—Into the home of Henry Ford came Colonel Theodore Roosevelt to-day. The former President rode rough-shod over the "peace-at-any-price" doctrine and took Detroit literally by storm.

In a speech at the Opera House, he ridiculed with delicate irony the pacifist theories of Mr. Ford. He threw hot shafts into the Administration for its inactivity in the matter of preparedness and bitterly denounced the hyphenated-American.

Five hundred of his hearers were women, some with babies in their arms. When, in the course of his speech, he declared himself in favor of universal service, pandemonium broke loose.

With a wave of his hand Colonel Roosevelt silenced the audience. As he was about to proceed a woman in the balcony arose, and waving an American flag cried:

"I've got two sons to serve."

Then another remarkable demonstration followed. Every woman in the house was on her feet and the men soon followed.

Darting to the edge of the stage, his eyes snapping, Colonel Roosevelt pointed his finger at the woman in the balcony and shouted:

"My dear madam, if all the women in the country take your view, your sons will never have to go."

When the cheers that greeted this reply had subsided Colonel Roosevelt added:

"We would always be ready to resent an injury and consequently would never have to make war."

The day was one continuous triumph for the former President. Three thousand persons welcomed him upon his arrival at 7:15 o'clock. It was "American Day" in Detroit, and the city was bedecked with flags. Hundreds of steam whistles screached a welcome to Roosevelt, and thousands of persons lined the streets.

Colonel Roosevelt was taken to the Detroit Athletic Club for a short rest. His first engagement was his speech at the Opera House at 11 o'clock to a crowd that filled the big building to suffocation. Then he returned to the Athletic sClub, where 600 busines men stood and cheered his appeal for universal service and preparedness.

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds; East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds; West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds; West 43.88 feet to a point; thence North 77 degrees, 48 minutes; West 53.45 feet to a point; thence South 16 degrees, 25 minutes; West 175.48 feet to a point; thence North 58 degrees, 2 minutes; West 20.76 feet to a point; thence North 16 degrees, 25 minutes; East 275.34 feet to a point; thence North 79 degrees, 2 minutes, 30 seconds; West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds; East 25.70 feet North 2 degrees, 51 minutes, 10 seconds; East 82.40 feet to a point; thence South 69 degrees, 6 minutes, 30 seconds; East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

HUGGINS LUMBER CO. DENIED A NEW TRIAL

Oswego—An appeal to the Court of Appeals has been taken by the plaintiff in the action of Huggins Lumber Company vs. H. J. Phelps and Earl L. Miller, from the order of the Appellate Division, vacating the order of Justice Crouch and denying a new trial to the plaintiff. The case was tried more than a year ago to recover on a contract, the jury bringing in a verdict for the defendant, Miller. Justice Vrouch set this verdict asid and ordered a new trial. The amount of the judgment is $292.62.

The Hole in the Pocket.

The most dangerous hole in any man's pocket is always the one at the top.—London Mail.

ADDS TO HOME PRIDE.

Aside from the benefits to health to be derived from a cleanup campaign, the increased pride taken in the home and the added self respect that come from the living in a clean, neat, attractive place are worth all the trouble of such a campaign. Nobody takes any pride in living in a house with dirty, unattractive yard or grounds. Dirt, deterioration and disease go hand in hand, and all are enemies of public spirit and proper pride.

The neat, clean home is the attractive home. It is a better place in which to live because it is clean. It is a healthier place because of the freedom from rubbish and trash. Such a home shows that its owner takes a pride in keeping it up, and if it is placed on the market it will bring a higher price just because it is clean and neat than the place down the street, the yard of which is full of old boxes, heaps of ashes, empty cans and waste paper and in general disorderliness.

Dorothy's Guardian

She Wanted Him All to Herself.

By CLARISSA MACKIE

When Dick Merwin graduated from college his classmates predicted that he would take high rank among men in the world's battles. While he was delivering his commencement oration there was one person in the audience who listened to his youthful effort without thinking or caring for its merit. She was wrapped in the speaker himself.

From the moment he made his appearance on the platform this young woman appeared as though she were under a spell, fascinated by the very presence of the man, from whom her eyes never wandered.

Linda Barton, an undergraduate of the woman's college of the same university, had met him, and there was something in that pair of gray eyes through which he looked at her that seemed to penetrate her very soul. From the moment of her meeting him she worshiped him.

On the evening of commencement day the president held his usual reception for the graduating class. Linda, whose tastes ran to music, was invited to add to the eclat of the occasion by the performance of a selection on the piano. She chose her piece from Beethoven's sonatas and while playing received rapt attention. On rising from her instrument she looked into the face of Merwin.

The campus was illuminated, and a throng passed from the president's residence out among the elms, some of which had been planted a century before. There on a bench in a secluded spot Merwin told his companion his story, a story which she listened to with delight.

But the course of true love did not run smooth. Merwin went from the university to the law school, and it was a year before Linda was graduated. A misdirected letter is quite enough between youthful lovers to change the current of two lives. Whatever was the cause, Linda never told, but there came a break. Neither married. Merwin became a prominent lawyer, and in time Linda, finding it necessary to earn her own living, availed herself of her taste for music to do so. A retiring disposition unfitted her for a public life, and she became a teacher in a young ladies' seminary.

But the betrothal that occurred on that commencement night, when they were in the first freshness of youth, lived in the hearts of both. Merwin became one of the legislators of the nation; Linda subsided into a quiet maiden lady teaching the next generation to play the piano.

* * * * * * * *

Five eager, glowing faces were bent over the large photograph in Dorothy Blake's hands.

"Isn't he a perfect dear?" cooed Dorothy ecstatically.

"So distinguished with that touch of gray at the temples!" sighed Maud Benning.

"Such fine eyes! Are they gray, Dolly?" asked Eva Temple.

"M-m-m-m-m!" murmured Dorothy reminiscently. "But you must remember, girls, that I haven't seen my guardian since I was twelve, that is six years ago, and at that time I wasn't the least bit interested in the color of any one's eyes."

"Sweet child!" teased Susan Marr. "So you are interested now in this guardian who looks like an actor?"

"Dear, I'm in love with him!" gushed Dorothy.

"So are we all of us," lamented Amy Smith, with a rueful smile. "How old is he, Dolly?"

"Old as the hills. He must be nearly fifty; forty anyway."

"Methinks I've seen that face before," murmured Maud.

"Perhaps! Richard Merwin is a very prominent man, a United States senator."

"No, no," insisted Maud seriously. "Listen, girls; I believe I have it. Do you remember once when Miss Barton was ill she sent me to her trunk to get a box of papers? Well, the box was old, and as I carried it to her bedside the pasteboard cover slipped off and some letters and papers fell on the floor.

"I gathered them up, and among them was a man's picture. I scarcely glanced at it, yet it remained vividly in my memory. Girls, it was Senator Merwin's picture."

"Dolly's guardian?" they questioned incredulously.

Maud nodded. "I am positive. She acted quite embarrassed and slipped it under the pillow. Isn't it odd?"

"Perhaps they were sweethearts once upon a time," suggested Amy.

"Pooh!" said Dorothy coolly. "I'm going to marry him myself, so there!"

"Small chance for poor Miss Barton!"

"When is he coming, Dolly?"

"I don't know. I'm expecting a letter every day. I asked him to come to our dance."

"Oh, Dolly! Fancy a grave senator dancing the onestep!"

"Oh, he may dance the old fashioned waltzes with Miss Barton," laughed Dorothy over her shoulder as she placed the picture on her dressing table and blew a kiss toward the grave, handsome face.

There came a tap at the door, and Maud opened it.

"Come in, Miss Barton," she cried affectionately, as the slim, auburn haired music teacher smiled at her.

"I can't just now, dear; I've brought Dorothy the new music she asked for. Did I tell you that madame has engaged the Romany orchestra for the next dance?"

She laughed musically as the girls broke into noisy expressions of joy. Heretofore the school and its invited guests had danced to the tame music of piano and one violin.

"She is a dear," murmured Amy when they were alone once more.

"She would be beautiful if she wore something besides that tiresome black."

"I wonder why she never married. I wonder if it did have anything to do with my handsome guardian," said Dorothy.

"They will meet again here. If she married Senator Merwin, what relation would she be to you, Dorothy?" asked Maud mischievously.

Dorothy threw a sentimental glance at the picture.

"She would be my deadliest enemy!" she declared, and in a burst of laughter the conference broke up.

* * * * * * * *

Mme. Hermaine's boarding school wore a festive appearance that April night.

Youthful beauty filled the staid reception rooms and overflowed upon halls and verandas.

There was a glimpse of the broad bosomed Pacific ocean, where the moon made a silver track that might lead to enchanted islands. Eastward the foothills loomed black against the evening sky. From the gardens below came scented reminders of rose geranium, carnations, heliotrope and mignonette; in the verandas were great tubs of pink oleanders.

To Mme. Hermaine's pupils enchantment lay here instead of unknown islands of the far east.

Friends and relatives of pupils thronged the rooms, and the young people danced to the entrancing strains of the gypsy orchestra.

Mme. Hermaine moved majestically through the rooms, pausing now and then to bestow a smile and a word on some favorite pupil or to linger in conversation with guardians and parents.

Fraulein Goebel, the German teacher, and Mlle. Specht, who taught a large French class, were dancing sedately together. Linda Barton sat in a corner and chatted with an unknown old lady, who afterward turned out to be Anne Ashbel's grandmother.

"And who is this tall man coming?" asked Mrs. Ashbel curiously. "The broad shouldered man surrounded by girls?"

Linda, looking rose flushed and lovely in a much darned black net evening frock, glanced carelessly at the group.

Suddenly all the roses vanished from her cheeks, leaving them white and wan.

"Who is he?" persisted the old lady curiously.

"I think, I believe his name must be Merwin," said Linda in a labored voice.

"I wonder if it can be Senator Merwin?" murmured Mrs. Ashbel.

"I don't know," said Linda, drooping her head to hide her emotion from half a dozen pairs of curious eyes.

"Did you see her?" whispered Maud Benning to Dorothy Blake as they accompanied Richard Merwin to the conservatory to show him Mme. Hermaine's collection of orchids.

"You mean Miss Barton?"

Maud nodded. "She must have recognized your guardian, Dolly. I thought she was going to faint, she grew so white."

"I wonder!" murmured Dorothy. "Maud, I'm going to bring her here to meet guardy."

"It would be cruel perhaps," protested Maud.

"It will be quite romantic," insisted Dorothy, moving away.

"I thought you—you admired him yourself," objected Maud.

"I do, and he admires me, too," said Dorothy egotistically. "He could not help drawing a contrast between us, and I am not a bit jealous of poor Miss Barton." She smiled with the cruel candor of youth and flitted away in the shimmering crowd.

Richard Merwin and the four chattering girls had seen the orchids and had paused by the fountain, watching the antics of the goldfish in the basin.

Suddenly Dorothy was in their midst, holding tightly to the hand of a slim, black garbed woman whose crown of auburn hair was powdered with the snow of late youth. White as death, she met the surprised gray eyes of the senator.

The gray of his eyes turned to black, the fine wrinkles and lines vanished from around his eyes and mouth, his face was afire with youth, and there was a look which caused the five girls to fall back in an abashed group near the door.

"Linda! Linda Barton, is it you?" he asked in a thrilling voice, and his eyes and hers seemed to bridge long years of pain and misunderstanding.

At last their hands came together, and he held her ringless fingers close to his heart while he talked in low tones. Her answers were breathless whispers.

"Come!" whispered Dorothy. And the five vanished silently, and knew they were not missed.

"I—I didn't know love was like that!" gasped Susan Marr.

The others sighed, for they, too, had had a glimpse into the paradise of perfect love.

"Dolly, they will marry. And what shall you call her," asked Maud, with a droll look at her friend—"the wife of your guardian?"

And Dorothy, who had seen Linda Barton's transfigured face, softly replied, "My guardian angel—and his."

PUFFING UP THE OYSTER.

Showing How Easily Four Quarts May Be Swelled Into Five.

Adulteration of oysters on the half shell, freshly opened, might be thought as difficult as adulteration of unpeeled fruit. But the purists to whom all things are impure have discovered that oysters are "adulterated" by soaking them in fresh water. It is not suggested that the water is unwholesome, either for the oysters or those who eat them. But that is not to the point. These things are all arranged for us at Washington, and the department of agriculture, which is particularly devoted to oyster culture, has issued a formal statement to all and sundry regarding the heinous practice of making oysters look plump and white by soaking them in water. It is official information that if four quarts of oysters and a quart of fresh water are placed in a five quart container and the mixture allowed to stand for several hours there will be a marked change in the appearance of the contents of the container. To the naked eye there will appear to be five quarts of dry oysters, for the container will be full and there will be little or no water in sight, it being on the inside of the plump, succulent looking oysters. The average purchaser has no means of detecting the addition of water.

That relates only to "shucked" oysters. Half shell oysters "drink" water, and thus undersized oysters may be converted into "select," beyond the detection of any but a chemist. The purpose of publishing these facts is to make it known to all lawbreakers and oyster caterers that all such oysters are "adulterated under section 7 of the food and drugs act," which provides that food is adulterated "if a substance has been substituted in whole or in part for the article."

LAW OF MOTION.

Why a Ball Follows You if Thrown in the Air While You Walk.

When you throw a ball into the air while moving your body forward or backward, either slowly or fast, the ball partakes of two motions—the upward and the forward or backward motion of your body. The ball possessed the motion of your body before it left your hand to go up into the air because your body was moving before you threw it up, and the ball was a part of you at the time.

If you are moving forward up to the time you throw the ball into the air and stop as soon as you let go of the ball, it will fall at some distance from you. Also if you throw the ball up from a standing position and move forward as soon as the ball leaves your hand the ball will fall behind you, provided you actually threw it straight up.

Of course you know that the earth is moving many miles per hour on its axis and that when you throw a ball straight into the air from a standing position, the earth and yourself, as well as the ball, move with the earth a long distance before the ball comes down again. The relative position is, however, the same. We get our sense of motion by a comparison with other objects. If you are in a train that is moving swiftly and another train goes by in the opposite direction, moving just as fast, you seem to be going twice as fast as you really are. If the train on the other track, however, is going at the same rate of speed and in the same direction as you are you will appear to be standing still.

Going back to the ball again, you will find that it always partakes of the motion of the body holding it in addition to the motion given when it is thrown up.—Philadelphia Press.

Old Time Crinoline.

The crinoline—under another name—was known and denounced in the eighteenth century, as witness the pamphlet published in England in 1745 under title of "The Enormous Abomination of the Hoop Petticoat, as the Fashion Now Is."

At that time the hoop, usually of whalebone, was often "so large as to fill the space of six men," and in 1754 a writer in the Connoisseur speaks of "hoops" capable of contracting or expanding "from the size of a butter churn to the circumference of three hogsheads."

Opened the King's Eyes.

When Fenelon was almoner to Louis XIV. his majesty was astonished to find one Sunday, instead of the usual crowded congregation, only himself and the priest. "What is the meaning of this?" said the king. "I caused it to be given out," replied the prelate, "that your majesty did not attend chapel today, that you might see who it was that came here to worship God and who to flatter the king."

Memory Training.

"I have decided," remarked Senator Sorghum, "to train my memory."

"What system will you use?"

"I don't know. I'm looking for one that will enable me, when I am interviewed, to remember what to forget."—Washington Star.

Death on the Cross.

Crucifixion was a common mode of execution among most of the old nations. It was in constant practice, especially in Assyria, Carthaginia and the Roman empire.

His Treat.

Bacon—Been to see the doctor?

Egbert—Sure thing.

"Did he treat you?"

"Oh, no; it was my treat. It cost me $2."—Buffalo News.

Back We Go to a Check Suit

Design by Franklin Simon & Co., New York.

A TAILORED suit in light weight worated, velours checks in brown, green or black and white, is quite the thing for travel, street and mountain wear. The flare skirt takes a coat of many bone buttons and deep revers, the pockets having a novel turn. The coat is silk lined.

Organdie is made into some of the most charming of spring and summer frocks. ANNA MAY.

LEGEND OF WILLIAM TELL.

The Story Was Old In Denmark Before the Swiss Borrowed It.

Do you know who shot the apple on the head of the little boy? Why, William Tell, of course! Everybody knows how Tell delivered Switzerland from the tyranny of Austria. At least everybody used to know. Unfortunately for pure romance, the historian and the investigator have been unduly active in the past quarter of a century, and the result has left us few heroes with enough clothing of romance to cover their skeletons.

We have read Schiller's beautiful and inspiring play, either in our college German course or in translation, and we cling to William Tell with all the ardor of youthful enthusiasm. And along comes the historian and tells us that it is all a myth, that the dates fixed by the Swiss chronicles on the subject do not coincide with the dates of the historic events that were supposed to be taking place in Austria at the same time and that earlier records of Switzerland make no mention of the archer's master shot.

The selfsame story is told in the Danish legends, two centuries before it crops out in the Swiss narrative, and further investigation shows that it was borrowed by the Danes, the original apple having been shot from the original child's head by a German bowman named Eigil, when King Nidung sought to test the man's skill and nerve. In that remote story it is related that Eigil concealed another arrow in his bosom with which to kill the king if he injured his child. John Fiske, the American historian, was largely responsible for robbing us of William Tell.—St. Louis Globe-Democrat.

JAPANESE STAGE CUSTOMS.

Actors and the Flower Path From the Green Room Entrance.

The profession of an actor in Japan is not considered a high one, says Mr. M. C. Marcus, the author of a work on the Japanese stage, and on the average they are not well paid. Still, there are exceptions. "When a play is staged it runs at least for twenty-three consecutive days. For such a term a first class man would earn about $1,200. and his annual income may be estimated at $7,500. But it must not be forgotten that out of this sum he must provide his own costumes, which are very expensive.

"The curtain does not rise, but is pulled sideways, and one can easily see the attendants who are intrusted with this work. The orchestra is hidden behind the scenery, while in a sort of proscenium box the reciter sits concealed behind a curtain of thin bamboo. There is no applause by clapping hands, as in our theaters, but the public stimulates the actors by exclamations in a way that may be compared to the encouraging and cheering of the dancers in Spain.

"From the greenroom a bridge leads to the platform. This bridge is called Flowerpath. The greenroom is closed by a drapery. which the actors of small parts must lift for themselves. When the performers have some importance and reputation they have an attendant for the purpose of lifting this drapery. But the first actors, as well of nogu (drama) as of kyogen (comedy), have the title taiya, which confers the right to two assistants to hold up the curtain of the greenroom for their entries and exits."

Sing a Song of Sixpence.

The London Globe's explanation of the rime "Sing a Song of Sixpence" is: "The four and twenty blackbirds represent the four and twenty hours. The bottom of the pie is the world. The top crust represents the sky. The opening of the pie is the dawn of the day, when the birds begin to sing, and surely such a sight is fit for a king. The king in his counting house counting out his money is the sun. The money the king is counting represents the golden sunshine. The queen, who sits in the parlor, is the moon. The honey she is eating is the moonlight. The industrious maid who is working in the garden before the sun has risen is the day dawn, and the clothes she hangs out are clouds. The bird that so tragically ends the song by nipping off her nose is the hour of sunset."

England's Coldest Days.

In his diary for March, 1658, John Evelyn records that the weather had been "the severest that any man alive had known in England. The crows' feet were frozen to their prey. Islands of ice inclosed both fish and fowl frozen, and some persons in their boats." For March 1667, he chronicles, "Great frosts, prodigious at the vernal equinox."—London Chronicle.

His Lucky Catch.

"H'lo, Jones! Hear you been fishing."
"Yep."
"When'd you go?"
"Four-thirty a. m. train out."
"Any luck?"
"Yep; great."
"What'd you catch?"
"Six-thirty p. m. train in."—Exchange.

No Change of Plan.

"And after they had married in haste I suppose they repented at leisure."

"No; they were perfectly consistent. They repented in haste also."—Richmond Times-Dispatch.

A Mistake.

"That baby takes after its father."

"Oh, you don't know anything about its father. He never would leave anything behind for even a baby to take."—Baltimore American.

Provision for others is a fundamental responsibility of human life.—Woodrow Wilson.

TODAY'S FASHION NOTE

If it is an afternoon frock, it is almost certain to be of taffeta combined with chiffon or crepe Georgette. This model is trimmed with deep bands of satin, though the smart shops are also showing bands of velvet run around the newest skirts to share favor with satin. Above the short peplum of the waist appears a belt of satin, while the waist is cut out deeply to show an underblouse of crepe Georgette. In medium size the dress requires 5 yards taffeta, 2 yards satin and 2 yards of crepe Georgette.

Pictorial Review Costume No. 6580. Sizes, 34 to 44 inches bust. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

CONVICTS FED TOO WELL.

Chemists Say Inmates of State Institution Get Too Much Food.

Topeka, Kan.—The men confined in the Kansas penitentiary are fed better than is necessary for the work that is required of them, according to a report on the food served the prisoners by Professor E. H. S. Bailey of the chemical laboratories of the University of Kansas. The report has been filed with the civil service commission. The test was made of the foods served to the prisoners in December and January.

The chemists collected samples of the twenty-four different articles of food furnished the prisoners, and only three were found to be below standard, and the quantity furnished each prisoner was more than sufficient for his needs. The cheese was of poor quality, and the pepper contained too many pepper shells. The bread, while nutritious, was not first class, due to a poor bakery at the prison.

"Some of the inmates of the penitentiary are performing hard, muscular work," said the report, "but a large number are doing only moderate work, so that the average would not be much above moderate muscular work, which chemists have found can be done efficiently on food containing 3,400 calories or heat units daily. In no case was the food served at the prison below 4,000 calories a day, and in many instances the food was above 5,000 calories a day."

Odd Superstitions.

In England there is a superstition that if a bride and groom eat periwinkle leaves together they will love one another. Should he after marriage prove recalcitrant here is a way to win him back: Take a piece of the root of a wallflower and a partridge's heart, roll them into a ball and make the man eat it. If you want to know whether your lover loves you crush some bleeding heart. If the juice is red he does, but if it is white he does not.—London Globe.

DO YOUR SHARE.

Do not be an idler nor a shirker. This world needs the efforts of every one. There is no reason why the burdens of life should be shouldered by a few. Unless you intend to do something that will make people think better of you there is no reason why you should inhabit this sphere.

LET THE CHILDREN DIG.

Nothing Pleases Small Ones Better Than a Garden Patch.

If you live out of town or spend your summers there, let your children study nature first hand in their own gardens. Nothing will teach them more quickly of trees, flowers, birds and vegetables than the planning and developing of a small garden.

Of course each child can personally manage only a very small garden. This can be in the form of a bed or in the form of certain possessions at various places in the big family garden. For instance, you might give into one child's keeping a climbing rose over a summer house, a dwarf evergreen in the far corner of the shrubbery border, a row of beans (a short one) in the vegetable garden and a little patch of flowers in the flower border. In this way the child has a chance unconsciously to study trees, flowers and vegetables.

If possible, make the child interested in all the details of garden growth. If the child can sketch let him sketch leaves and flowers and roots, seeds and seed pods and all the other parts of the plants he works with. Let him keep a little notebook for his sketches. Without doubt they will prove so interesting as he collects them that they will form the nucleus of an interesting lot of sketches, which he will refer to even when winter has made gardening impossible.

Buy a bird house or two for the child's garden. By watching the chance inhabitants who occupy it from year to year he will become familiar with birds, for his interest in one pair will lead to an interest in all birds.

Perhaps an interesting book or two will stimulate the child's desire to garden. There are children's bird books and gardening books and simple guides of all sorts. Then there are botany books, fascinating when mastered in the open, but rather dry work to most children indoors.

Let the child have possession of the fruits of his garden—vegetables, flowers or fruits, whatever they are. It is a mistake to give a child anything, even a raspberry bush, unless the gift is free and complete.

SNOOZE JAILS JERSEY RIP.

He Couldn't Support Wife While He Slept and Beat Her When He Woke.

New Brunswick, N. J.—Sleeping may not be a crime, but a little ten day nap netted John Pelfey of this city ten days in the county jail. He was charged by his wife with nonsupport, and she testified that for ten days he had remained constantly in bed. She said he was in the habit of staying in bed for a week at a time and that he always celebrated the end of the nap by beating her.

When court opened a constable was sent for Pelfey and turned him out of bed. It took three officers to dress him.

Slavery In England.

Slavery existed in England without any mitigating features worth speaking of until the time of the wars of the roses. Bracton, the famous lawyer of the time of Henry VIII., informs us that the condition of slaves was fearful. It was indeed slavery, pure and simple. All the goods a slave acquired belonged to his master, who could take them from him whenever he pleased, the slave having no redress at law; hence the impossibility of a man's purchasing his own freedom. The only hope for the slave was to try to get into one of the walled towns, when he became free, the townsmen granting him liberty on the condition of his helping them fight the nobles.

Walnut Tree Borders.

Walnut trees in the Netherlands usually line dikes or border lines instead of being in orchard form.

The KITCHEN CUPBOARD

FISH DAY MENU.

FRIDAY—BREAKFAST.
Stewed Dried Figs. Cream of Barley.
Creamed Finnan Haddie. Rolls.
Fruit Butter or Jelly. Coffee.

LUNCHEON.
Baked Beans. Stewed Tomatoes.
Bran Bread.
Sliced Oranges. Tea.

DINNER.
Tomato Soup.
Deviled Fillets of Fish With Tartare Sauce.
Baked Potatoes. Spinach.
Pickled Beets.
Apple Pie and Cheese. Coffee.

The Cake Box.

PRUNE CAKE.—Rub one and one-half cupfuls of white sugar into one and one-half tablespoonfuls of butter, all the yolks of five eggs beaten light, two-thirds of a cupful of prune juice taken from stewed prunes, a cupful of chopped prunes, a teaspoonful of powdered cinnamon, one-half teaspoonful each of grated nutmeg and ground cloves, two and one-half cupfuls of flour sifted well with one-half teaspoonful of baking powder, and last of all stir in one-half teaspoonful of soda dissolved in a gill of hot water. Bake in layers or in a loaf. Use cooled stewed prunes.

One Egg Chocolate Cake.—Cream one-half cupful butter with one and one-half cupfuls granulated sugar, add one-half cupful sour milk and one-half teaspoonful soda dissolved in one-half cupful warm water. Add two squares grated chocolate or scant half cupful of cocoa, an egg, a teaspoonful vanilla, two cupfuls flour. Frost with white icing. Bake either in layers or dripping pan.

Caramel Cake.—One-half cupful butter, a cupful sugar, two eggs, one-half cupful milk, two scant cupfuls flour with which has been sifted a teaspoonful cream tartar and one-half teaspoonful soda. Bake in two layers. Frosting for caramel cake—Butter size of an egg, two cupfuls confectioner's sugar, two-thirds cupful milk. Boil six minutes. Beat until cool, then add vanilla to flavor. Make chocolate frosting in the same way, only add the grated chocolate or cocoa.

Delicious Cake.—One-half cupful butter (melted, but not heated), one and one-half cupfuls sugar, two eggs, one-half cupful milk, one-half teaspoonful cream tartar, one-quarter teaspoonful soda mixed with two heaping cupfuls flour, measured after sifting. Add the butter the very last thing. Frost with chocolate icing.

Eggless Spice Cake.—One-half cupful shortening, a cupful sugar, one-half teaspoonful cinnamon, one-third teaspoonful cloves, one-half teaspoonful nutmeg, a teaspoonful soda dissolved in a cupful sour milk, two cupfuls flour, a cupful chopped raisins, one-half cupful chopped nut meats. Sprinkle sugar on top before baking.

Coffee Cake.—One-half cupful shortening, one-half cupful sugar, one-half cupful coffee, a cupful raisins, one-half cupful currants, one-fourth cupful shaved citron, a teaspoonfl soda dissolved in one-half cupful molasses, two and one-half cupfuls sifted flour (measured after sifting), one-half teaspoonful each cinnamon, nutmeg, cloves and allspice. Bake slowly.

Anna Thompson

PULP FOR PAPER.

It Is Now Mainly Obtained From Wood and Vegetable Fibers.

Paper derives its name from the fact that it was originally made by the Egyptians from papyrus, a rushlike plant formerly common in Egypt along the Nile. Today paper is largely made from vegetable fibers and cellulose.

When it was found that the fibers of the cotton and flax plants were best adapted for making paper and the uses of paper were few the ragman did a flourishing business in buying old rags to keep the paper manufacturers supplied with raw material. The rags were first allowed to rot to remove the substances incrusting the cellulose and were then beaten into a pulp to which water was added. The pulp was then placed in a sieve and drained and subjected to heavy pressure which united the fibers and produced paper. By the modern method the rags are boiled with caustic soda, which separates the cellulose fibers, and placed in a machine in which rollers set with knives tear the rags to pieces and mix them with water to make a pulp. This pulp is bleached with chloride of lime and mixed with alum and a kind of soap to give a smooth surface.

The way man's discoveries operate to supply his needs in the progress of civilization is notably illustrated in the production of paper. Under the old method the big supply required today for newspapers and other uses could not have been produced.

The discovery that pulp could be made from the trunks and limbs of trees came to the rescue. It was found that by boiling wood shavings in strong solutions of caustic soda in receptacles that would withstand very high pressure the wood fibers were separated and a very good quality of cellulose for paper manufacture produced. As a result of this discovery paper today is mostly made of wood.—Boston Herald.

At the Singing Contest.

She—What's the difference between first bass and second? He—About ninety feet.—Columbia Jester.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

The Tailored Suit in Faille.

The feature of this tailored costume in faille is the jacket, laid in plaits at the raised waistline and trimmed with a fancy collar of white silk.

The subject of today's lesson is the silk tailored costume. It truthfully can be styled the all-around model, for it is used for morning wear, and if a dressy blouse is added in the afternoon, it takes on semi-formal importance. This design, in medium size requires 6⅝ yards 40 inch material. The circular collar is of white faille, with plaited section standing high at the back.

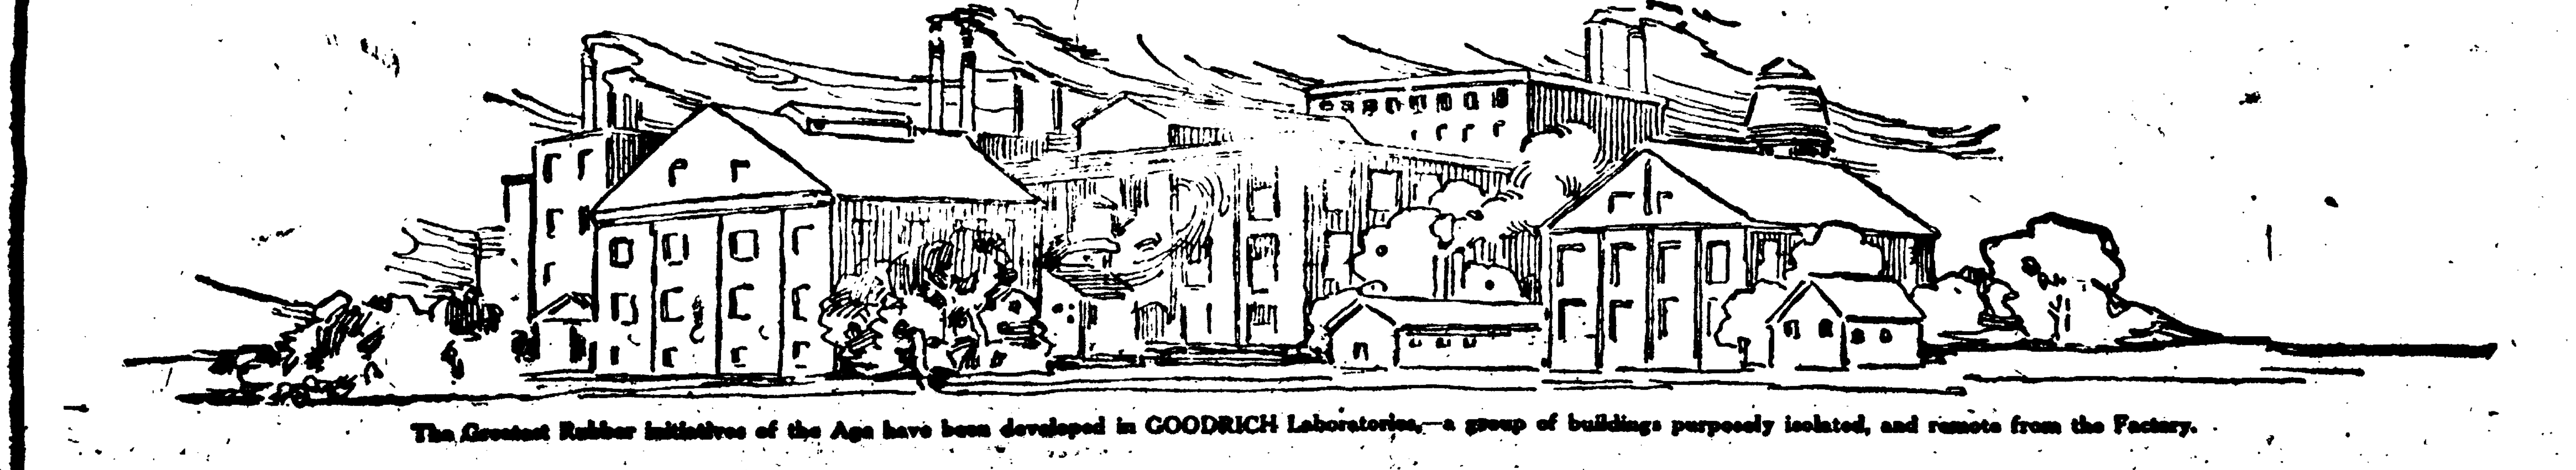
The jacket is laid in plaits at the raised waistline, but the front and back hang in flat effect. To cut the jacket, place the back and the cape on the fold of material first. Then opposite these, on the upper row, place the sleeve, the front, the underfacing and rever. Now, going back to the bottom row, place the cuff, collar and second cape into the position, the first on a lengthwise thread and the last two of the lengthwise fold of the faille. Opposite the second cape lays the back skirt section, on a lengthwise thread.

If the jacket be desired with deep open front, cut off the front edge of the front, ⅝ inch forward of line of small "o" perforations and omit underfacing. If desired pointed at the sides, cut off the lower parts of the front, back, skirt section and underfacing along indicating small "o" perforations.

The front of the jacket may be finished simple with revers and a flat collar, if this be preferred to the more elaborate effect.

CUTTING GUIDE 6739

Pictorial Review Jacket No. 6739. Sizes, 34, 36, 38, 40, 42 and 44 inches bust. Price, 15 cents. Skirt No. 6787. Sizes, 22 tto 32 inches waist. Price, 15 cents.



The Greatest Rubber Initiatives of the Age have been developed in GOODRICH Laboratories,—a group of buildings purposely isolated, and remote from the Factory.

INTEGRITY—and the House —behind the Tire

THE greatest Word in the whole Lexicon of Commerce is NOT "Service!"

It is "INTEGRITY!"

Because, that term embodies Good-faith,—Dependability,—the *Intention* to play fair, at any cost, *as well* as good Service.

Its essence, so far as business is concerned, consists in living-up to the last letter of that Americanism,—"The Square Deal."

It demands from its practitioners not only a due respect for the Rights of Others (whether they be strong enough to enforce these Rights, or weak enough to be at the mercy of the strong) but goes *further*.

It implies a charitable attitude toward those well-meaning persons who see "Rainbows," and who *cannot* live up to promises they really *intended* to keep.

An old-fashioned Virtue is this "Business Integrity,"—sometimes crowded close to the Wall by that modern idolatry called "Business-Expediency."

But,—there being something MORE than Money, worth striving for, in Business-Expansion, (as *well as* Money) this old-fashioned Virtue lives on, thrives and flourishes, in many quarters, like the Folk-Songs of a Nation that never die.

May we here pay *tribute* to "BUSINESS-INTEGRITY," wherever it abides, and,—with all due modesty,—CLAIM it as the Watch-word which has ruled *Goodrich* Activities over 47 years of Rubber Manufacturing, Selling, and DELIVERING?

◆ ◆ ◆

"BUT,—does this Policy of Business-Integrity pay, *in Dollars and Cents?*" the Cynic may inquire.

From even *that* cold-blooded standpoint we may answer (to the growing youth of this country) YES!—it HAS paid even in *material* Success.

—Witness the Goodrich growth from a very small "Acorn" indeed, to the 90 Square ACRES *of Floor Space in the largest Rubber Factory of the World*,—at Akron,—requiring 15 Square ACRES of Window-Glass alone to light these Goodrich Factory buildings.

—Witness the *Tire Output* of 1915 which, if the Tires were placed flat on the ground in a row, would *reach more than 1,400 Miles*,—from New York City to Omaha,—although Tires are only *one* of the 267 lines of Rubber Goods made by Goodrich.

—Witness the present Staff of 18,147 People, who produce the 120,000,000 pounds of Rubber Goods, manufactured, marketed, and shipped, during the year, by *Freight*, from this Goodrich Factory, in addition to the 10,000,000 pounds manufactured and shipped by *Express*, from same Factory during same period.

Contrast this Goodrich Rubber Goods Output, with the *total Imports* of Crude Rubber into the entire United States, during 1915,—viz:—172,068,428 pounds,—and the total WORLD *Consumption* of Crude-Rubber for same year,—viz:—142,000 Tons, or 284,000,000 pounds!

Then, *who* shall question that the Goodrich Watch-word and Policy, of "INTEGRITY FIRST" pays, even in *material* Results.

—This, exclusive of the Good-will, Prestige, and Public Confidence that flows from 47 years *consistent practice* of such a Policy, which may well be worth as much more, in *personal satisfaction*, to each Goodrich Stockholder, each enthusiastic Officer, and each loyal Employee of the B. F. Goodrich Co.

But, "How does this Concern YOU, the Consumer?"—you now ask.

It concerns you, first of all, as a *proof* that Square-dealing, Straight-thinking,—and Business-Integrity PAYS,—even in Coin of the Realm.

It concerns each Parent,—and the Son and Daughter of each Parent,—as a vivid *demonstration* of the fact that the modern god of "Expediency," is a *false* god,—and that all the brilliant feats, and dexterous manipulation of facts, which pass current as "Expediency" are *needless*, for permanent Success.

It concerns the Consumer of, or the Dealer in, Rubber Goods because he *knows* that, in dealing with a House of Integrity he can TRUST the Statements, the Products and Trade-Marks, of *such* a House, *implicitly*,—can save Time and Trouble and can abandon that costly and unpleasant *Watchfulness* which is necessarily involved in buying anything under the old Law of Caveat Emptor, (let the Buyer beware).

◆ ◆ ◆

WHEN, therefore, the largest Rubber Factory in the World (with a 47 year Experience in Rubber-Working) and 47 years of *Business-Integrity*, Good-faith demonstration, and Square-dealing, TELLS you that *Money can't buy* BETTER *Fabric Tires*, at *any* price than *Goodrich* Fabric Tires at their very *moderate "Fair List"* price,—you can well AFFORD to believe it.

When they tell you that nothing *but* Business Integrity *prevents* their charging you prices *as high* as those charged for other Makes of Tires, of no better quality, you can *rely* upon this:—

The difference in price is then a REAL Saving.

It is the *Cash Value*, to you, of dealing with a House which has made "*Integrity*" its *Watch-word* through 47 years of Rubber Manufacturing and Selling, and which has *never yet* sacrificed Principle to Profit, nor Good-faith to Expediency.

Then accept this SAVING which Goodrich Integrity brings to you every time you buy the *best* Fabric Tires in America, at the following "Fair List" prices:

Goodrich "Fair-List" Prices

BLACK "BAREFOOT" SAFETY-TREADS

30 x 3	Ford Sizes	$10.40
30 x 3½	Ford Sizes	$13.40
32 x 3½		$15.45
33 x 4		$22.00
34 x 4		$22.40
36 x 4½		$31.60
37 x 5		$37.35
38 x 5½		$50.60

Goodrich "Barefoot" Tires

LIGHT in weight, and close grained,—because relatively free from inert substances or "fillers" that give excess Weight to Rubber, at the expense of Liveliness, Springiness and Endurance.

Goodrich Safety-tread Tires, of black "Barefoot" Rubber, are therefore Lively, Springy, Clingy, and Long-lived.

Through their high *Pneumatic* quality, they give "Pep" to Car-Action, while stretching out Mileage, per Dollar invested, in a way that sets Users thinking.

More than 200 different Makes and Brands of Auto Tires were made and sold in U. S. A. last year, 1915, to the total extent of about 12,000,000 Automobile Tires.

Of that 12,000,000 *total* Tires, the B. F. Goodrich Co. made and sold *one-fourth*.

Yet—Tires are only *one* of the 267 different lines made by the Goodrich Rubber Factory.

This indicates *why* Goodrich Best-in-the-Market Fabric Tires *can* be, and *are*, sold to Consumers (via Dealers) at the lowest price in America per delivered Mile of Performance.

Compare price-list on left column and see!

Goodrich Truck Tires

REPLACEMENTS of *other* Makes of Truck Tires with *Goodrich* Truck Tires during last four years were as follows:—

1912	Change-overs to Goodrich	3,590
1913	" " " "	6,357
1914	" " " "	10,725
1915	" " " "	14,000

These Change-overs to *Goodrich* tell their own story to the *thinking* Truck Owner.

Goodrich Bicycle Tires

HERE, in America, the B. F. Goodrich Co. was the *first* and *largest* Maker of Pneumatic Bicycle Tires, developing, among other types, the famous "Thread-Fabric" Tire called the Palmer Bicycle Tire.

"*Integrity*" of Construction, and Square-Deal in Treatment of Consumers and Dealers, results in our *holding* the largest business in America on *Bicycle* Tires, as well as on Truck Tires,—and Automobile Tires.

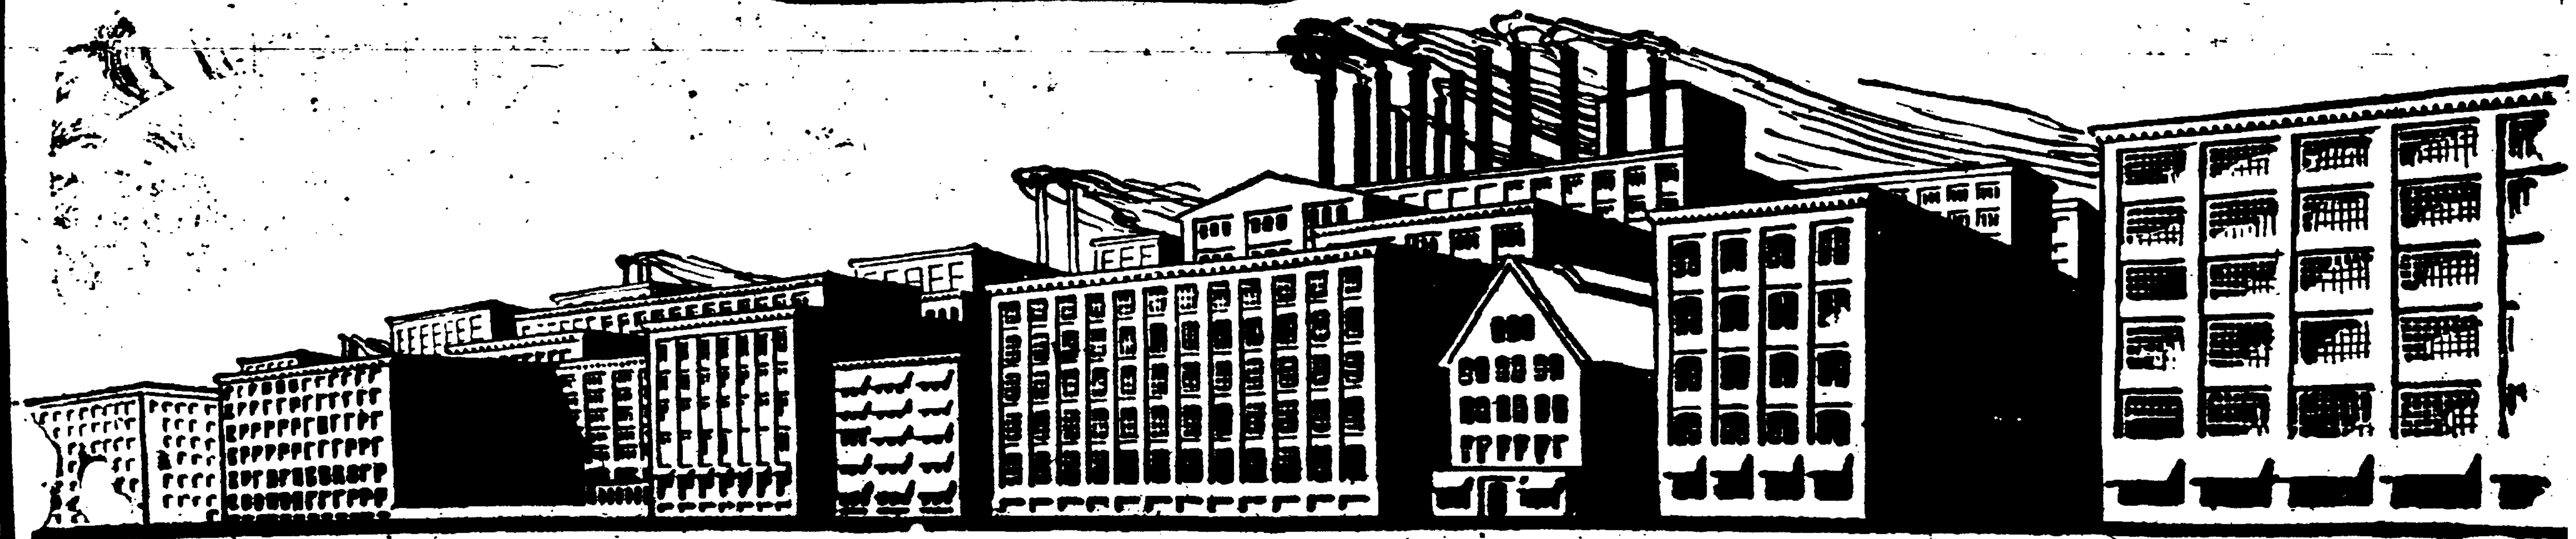
GET a sample of black "Barefoot" Rubber today,—from your nearest Goodrich Dealer or Branch!

Stretch it a thousand Times, to its extreme limit, but BREAK it you CAN'T!

That is the sort of "SERVICE" which Goodrich Integrity of Purpose and Policy, translates into.

THE B. F. GOODRICH CO., Akron, O.

GOODRICH SAFETY-TREAD TIRES



A Quarter Section, only, of the Goodrich Rubber Factory,—at Akron, O.,—the LARGEST in the World,—with more than 90 Square Acres of Floor-Space

ECONOMIC WASTE IN LONG DISTANCE BUYING

The only road to REAL ECONOMY is the road that leads to the HOME TOWN. This is the FIRST COMMANDMENT IN COMMUNITY DEVELOPMENT. Whenever we pass up our own community and send an order away from home we break this commandment by one stroke of the pen.

Give your home dealer the CHANCE to fill that order. Given the same conditions HE can beat any out-of-town house in the country. The Long-Distance route is the road to waste, over-buying and felse economy.

This cartoon shows vividly the ECONOMIC WASTE in long-distance buying.

THE CITY THAT SHOULD BE ALWAYS BUILDING

In Australia, according to a magazine article, the people are going ahead with the plans for a new capital—a city to rise almost from the waste—a city to be created according to a plan adopted in advance instead of just happening, as most cities have, and growing into a state which makes change according to modern conceptions of what a city should be both difficult and expensive.

The Australians present a plan hopeful of wonderful possibilities. It is that of starting a city which shall contain all modern knowledge of municipal sanitation, comfort, beauty and convenience; but after all, there is something the masterly architects cannot do—they cannot finish the city in accordance with any preconceived plan, by which we mean the human part. Some cities are trying hard to build that part of the community. And no wonder, for after all, it is the most important part. It must supercede all side shows and gim-cracks, which are well enough in their way, but they will not stand the test of time. Something more substantial must be found than the blare of trumpets and the light of ascending rockets, and the only element so far discovered that will stand the test is the human element.

We can make the city streets, yards and houses as clean as clean can be—accomplished by all the rules of civic progress and teaching, but it will remain for the human part of the town to decide from time to time whether the pace at the start of the campaign can be and shall be maintained.

It is better a thousand times that a city shall be cleaned in every sense of the word, even if force must be used, than to neglect it, but unless there is a corresponding growth of civic righteousness and fine co-operation, the design of the architect cannot amount to much. But this ideal and spirit are a growth and not a sudden creation. They must be made the part of Fulton that is always building—or should be building.

Opinions

CAN NEVER BECOME A DEAD ISSUE

The Tariff never can become a dead issue. It is a fundamental in any scheme of government. Whether high or low it will affect the big interests and just as it affects them it will affect the workingman. Labor is prosperous on war munitions business today only because capital is enjoying rewards from such work. This prosperity is in spite of the revenue Tariff scheme of the Wilson administration, part of which the Democrats have admitted to be a failure by repealing the free sugar provision.—Pittsburg Gazette-Times.

NOT ALARMING.

The predicition that Martin H. Glynn, former Governor, will be the Democratic candidate for United States Senator is not at all an alarming one. Mr. Glynn made an excellent Governor of the State. Before that, he made a most excellent controller, and he started into activity a law that had long been dormant but which has saved the counties and towns of the State hundreds of thousands of dollars through the prevention of graft. Had Mr. Glynn been re-elected, he would have given the State a much better administration than it has had from Whitman, for he is a bigger and broader man than Whitman in every way. If they could speak frankly, hundreds of Republicans would now admit this. Mr. Glynn would serve his State and country in the Senate with distinction.—Utica Observer.

A Wet Spot.

With an annual rainfall exceeding 600 inches, southern Assam is the world's wettest region.

WORK WHILE YOU MAY.

Be no longer a Chaos, but a World, or even a Worldkin. Produce, produce! Were it but the pitifulest infinitesimal fraction of a Product, produce it in God's name. 'Tis the utmost thou hast in thee. Out with it then! Up, up! Whatsoever thy hand findeth to do, do it with thy whole might. Work while it is called today, for the night cometh wherein no man can work.—Carlyle.

A Seat In Parliament.

Lord Chesterfield in 1767 lamented the increased price of seats in the British parliament. There was a boom in trade, and prices went up. Chesterfield was ambitious for his son, and when Chatham's promise of a seat came to nothing he went marketing. And he failed to find a single bargain. "I spoke to a borough jobber," be wrote to his son, "and offered five and twenty hundred pounds for a secure seat in parliament, but he laughed at my offer and said there was no such thing as a borough to be had now, for the rich East and West Indians had secured them all at the rate of £3,000 at least, but many at £4,000 and two or three that he knew at £5,000. This, I confess, has vexed me a good deal."

Three Men.

When H. H. Rogers was in the prime of his power, says a New York writer, he formed a "friendship partnership" with Mark Twain and Thomas Brackett Reed and took personal charge of their affairs, looking after them as he would a couple of children. It was great fun for all three, and especially Rogers. Neither Clemens nor Reed had any sense for business. The big ex-speaker came to New York a poor man. Five years later he died suddenly, and his estate assayed over $600,000. He probably had no idea what he was worth at any stage. Rogers made as much or more money for Clemens.

Days You'll Never Forget

BIT OF GALLANTRY WINS HIM $200,000

Frank H. Canning, Who Protected a Woman In Fight, Remembered In Her Will.

Philadelphia.—As a result of a bit of gallantry to a woman more than three years ago Frank H. Canning, formerly of this city and later of Clarksboro, N. J., is to receive $200,000.

Mrs. J. T. Elkins of Detroit, widow of a wealthy ranch owner, died several weeks ago, leaving an estate of $400,000. Half of the money goes to Mr. Canning, the remainder to a charitable institution in Detroit. Mrs. Elkins was formerly Miss Irene Chadley of this city.

Miss Chadley was returning to her home on a trolley car late one night. She was the only woman on the car, the other passengers being half a dozen intoxicated men and Mr. Canning. Suddenly a fight started, and one of the men brushed against Miss Chadley and threatened her. Mr. Canning placed himself in front of the woman and, with the aid of the conductor, managed to overcome the rowdies.

Miss Chadley was so upset that Mr. Canning called a cab and rode with her to her home in West Philadelphia.

LIGHTNING STRUCK HOUSE.

Russell, His Wife and Baby Have a Narrow Escape.

Brady, Tex.—Bob Russell, his wife and baby, who live six miles west of Brady, had a narrow escape recently when lightning struck their home, giving them a severe shock and setting the wall paper and bedclothing afire.

The electric bolt passed across the roof and came down the wall inside the room where the family were asleep and passed to the ground by way of a telephone wire and two shotguns standing near a bed.

Russell was rendered unconscious, and when he recovered he found the bed clothing and wall paper afire. He was able to extinguish the blaze with but little difficulty. The barrels of both guns were melted, as was also the telephone ground wire.

What Massenet Dreaded.

Massenet dreaded the first performance of his operas so much that he usually left the city and hid until they were over. In his book "Souvenirs de la Vie de Theatre" Pierre Berton tells of meeting him the night before the production of his "Roi de Lahore" and congratulating him on the success that was sure. He was astonished at the weary, melancholy attitude of the composer. "Massenet silently took off his hat and pointed with his finger at his hair. It was freshly silvered, to my surprise, for we were then both young men. And he said to me, 'See what it costs to bring out an opera!'"

LAW SURELY GIVES A PUZZLE TO SOLVE

Owner of Bees Must Know Name of Every One Before He Can Swear Out a Warrant.

Birmingham, Ala.—Becoming involved in a dispute over a trivial matter, two citizens of Montgomery county struck a snag in the law when a swarm of bees owned by one migrated to the home of the other. This renewed the trouble, and W. C. Frizzle, bailiff of the city court, was appealed to.

"I want my bees," said the original owner. "They have gone to that fellow's home."

Frizzle began an investigation to ascertain whether he had authority to return the bees to the rightful owner. After consulting many lawbooks this was his conclusion, as expressed in his own words:

"I find that before you can obtain your bees you must have them arrested in the regular way. And before they can be arrested you must swear out an individual warrant against every bee in the swarm. I also find that before you can swear out an individual warrant against every bee you must know the name of each one."

The rightful owner said he was willing to give his neighbor a warrant deed to one swarm of bees, but he did not know the name of each one in the swarm. So the bees are still in their new home.

GIRLS WITH FLOWER NAMES.

Arrange a Club For the Study of Wild Plants.

Mill Valley, Cal.—Out of the deep tangled wildwood of this hamlet, nestling at the base of Mount Tamalpais, has come a school children's club, unique at least in the nomenclature of its governing officers.

The club has been organized for the study of wild flowers, which are now a gay pattern of many colors over the sloping hills of the countryside. The children, mostly girls, met and elected officers, as follows: President, Charlotte Rose; vice president, Margaret Leaf; secretary, Doris Plant; treasurer, Mary Moss; Directors, Violet White and Fern Murphy.

They will begin at once their studies, which are to be prosecuted vigorously in all of their out of school hours.

No blooms of rarest ray serene will be permitted to bud and blush unseen in the shady dells of Tamalpais.

Putting It Gently.

Mr. Henpeck — I hear that young Jones and his wife are not getting along very well. Mrs. Henpeck (authoritatively)—Jones should never have married when he did. He was too young to realize the step he was taking. Mr. Henpeck—Yes, I know. But I like the boy. We have many things in common.

LITTLE TALKS ON THRIFT

By S. W. STRAUS

President American Society for Thrift

"There are two ways of being happy; we may either diminish our wants or augment our means—either will do—the result is the same; and it is for each man to decide for himself, and do that which happens to be the easiest," says Benjamin Franklin. "If you are idle, or sick, or poor, however hard it may be to diminish your wants, it will be harder to augment your means. If you are active and prosperous or young, or in good health, it will be easier for you to augment your means than to diminish your wants. But, if you are wise, you will do both at the same time, young or old rich or poor, sick or well; and, if you are very wise, you will do both in such a way as to augment the general happiness of society."

The hardest thing about saving money is making a beginning. We are always "going to," like the small boy. But every cent of this week's salary has been spent before it was earned and every cent of next week's likewise. The following week, however, if we should have any of our salary left, we will save it. It is more than likely, however, that it will never be saved.

The only way to save is to decide upon the very highest amount that can be spared from your salary and on each pay day before you have a chance to do anything else with your money, take out this certain sum and put it away. Then make yourself live within the remainder. People are paid for their labor or for what they produce by their labor. But a time will come when they can no longer work. This period should be prepared for when a person is young and well and has employment. Then in old age there will be something to show for the previous years of hard work and the rest and happiness and freedom from care which should be the accompaniments of old age will have been secured and honestly earned.

There is another reason why people should save money; and that is that its possession will enable them to do good to others. The satisfaction gained from being able to give substantial aid to others when we are called upon to do so is immeasurable; or to lend money to some one who needs a little capital to become successful himself. The rich and generous men of this country, who made their own money and spent less than they made, probably have got more satisfaction out of being able to endow universities, build libraries give large amounts to art galleries and charitable institutions and improve the condition of workers than in making any other use of their money. To be able to help others is worth all the effort required of us to raise ourselves from small beginnings and insignificant situations.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds; East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds; West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds; West 43.88 feet to a point; thence North 77 degrees, 48 minutes; West 53.45 feet to a point; thence South 16 degrees, 25 minutes; West 175.48 feet to a point; thence North 58 degrees, 2 minutes; West 20.76 feet to a point; thence North 16 degrees, 25 minutes; East 275.34 feet to a point; thence North 79 degrees, 2 minutes, 30 seconds; West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds; East 25.70 feet North 2 degrees, 51 minutes, 10 seconds; East 82.40 feet to a point; thence South 69 degrees, 6 minutes, 30 seconds; East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

New York Ontario and Western Railway Co.

By Costello, Burden, Cooney and Walters, Attorneys for Petitioner, Office and P. O. Address, 935-955 University Block, Syracuse, New York.

Spoiled the Solemnity.

Joseph H. Choate when ambassador to the court of St. James and Mark Twain were together in St. George's chapel, London, one hot day, both seemingly sobered by the solemnity of the place.

"What an awful thing it is"—Twain began in a whisper.

Mr. Choate leaned closer to catch some ponderously sad expression from the humorist.

"What an awful thing it is," Twain repeated, "to be shut up in a place where one cannot smoke!"

BRITISH FAILURE AT KUT COMPLETE

Surrender of Townshend Caused Little Surprise, However.

LOST OVER 10,000 MEN.

Relief Expedition Only Twenty Miles Away, Unable to Break Through Turkish Positions and Supply Besieged Army With Food or Ammunition—Climate Against Invaders.

Another phase of the ill fated British campaign in Mesopotamia closed with the surrender of General Townshend and the garrison at Kut-el-Amara, about 130 miles below Bagdad. Some 10,000 men in all laid down their arms to the Turks.

The surrender of General Townshend is one of the few instances of the war in which an entire fighting unit of important numbers has laid down its arms. It is one of the largest bodies of troops of the entente allies which have surrendered and larger than any other captured French or British force.

The eventual surrender of General Townshend had been expected since the failure of the forces under Lieutenant General Gorringe and General Keary to break through the Turkish position at Sannayyat, just below Kut-el-Amara, on the Tigris river, and the unsuccessful attempt to send the blockaded army provisions by steamers. It had been touch and go with the small British force for many days.

Up to the last General Townshend kept alive the hope that he would be relieved. King George sent a message of encouragement to him a month ago, and in a later message the general said he expected to be relieved shortly. He declared he would hold out to the limit of endurance, but the recent reverses suffered by the army which was attempting to rescue him apparently made the situation a hopeless one. One of General Townshend's messages a few weeks ago said all was well and that most wanted were needles for phonographs.

Difficult Undertaking.

The Mesopotamian campaign has been one of the most difficult the British army has undertaken during the war. The torrid climate and lack of fresh water, together with the difficulties of transport, made great calls on the endurance of the troops. Moreover, the positions held by the Turks below Kut-el-Amara, intrenched and strongly fortified, were very formidable. The original expedition was composed in part of Indian troops, but the relief force for the most part was made up of men from England and the colonies. The forces which attempted to relieve General Townshend met with almost continual misfortunes. On several occasions just when it was believed they were on the point of success rising waters made further progress impossible. After penetrating Turkish positions they were compelled to retire or remain stationary owing to the impossibility of attacking the position at Sannayyat, which was surrounded by water. The British troops did actually attack the prepared position there after wading through mud and water waist deep, but only to find when they did meet with some success that a failure at some other point made their sacrifice futile.

The British public never lost faith in General Townshend, and even now that he has been forced to capitulate after destroying everything at Kut-el-Amara that might be valuable to the Turks, they look back upon his campaign as a brilliant one.

The British Mesopotamian campaign, waged along the Tigris from the Persian gulf northward almost to the gates of Bagdad, had as its chief aim the capture of that ancient city. To divert Turkish forces from Gallipoli was another object. When almost at the point of achieving its main object late last year the effort broke down at Ctesiphon, eighteen miles from Bagdad, when the Turks, alarmed for the safety of the town of fabled memory, rushed up re-enforcements, inflicted a defeat upon the British and compelled their retreat 110 miles down the Tigris to Kut-el-Amara, where the Turks soon had them securely bottled up.

General Townshend held out for 143 days, his supplies steadily growing lower as he waited the relief army.

BUY MOTOR SUPPLY TRAIN.

Fifty-four Trucks to Be Part of Army Invading Mexico.

The expeditionary force into Mexico is to be equipped with a complete motor supply train, an innovation in the United States army. Motor transportation of supplies was deemed necessary by General Funston, for after the expedition gets well on its way it probably will get far from any railroad. The war department at Washington authorized the purchase of fifty-four trucks to be organized into a supply train.

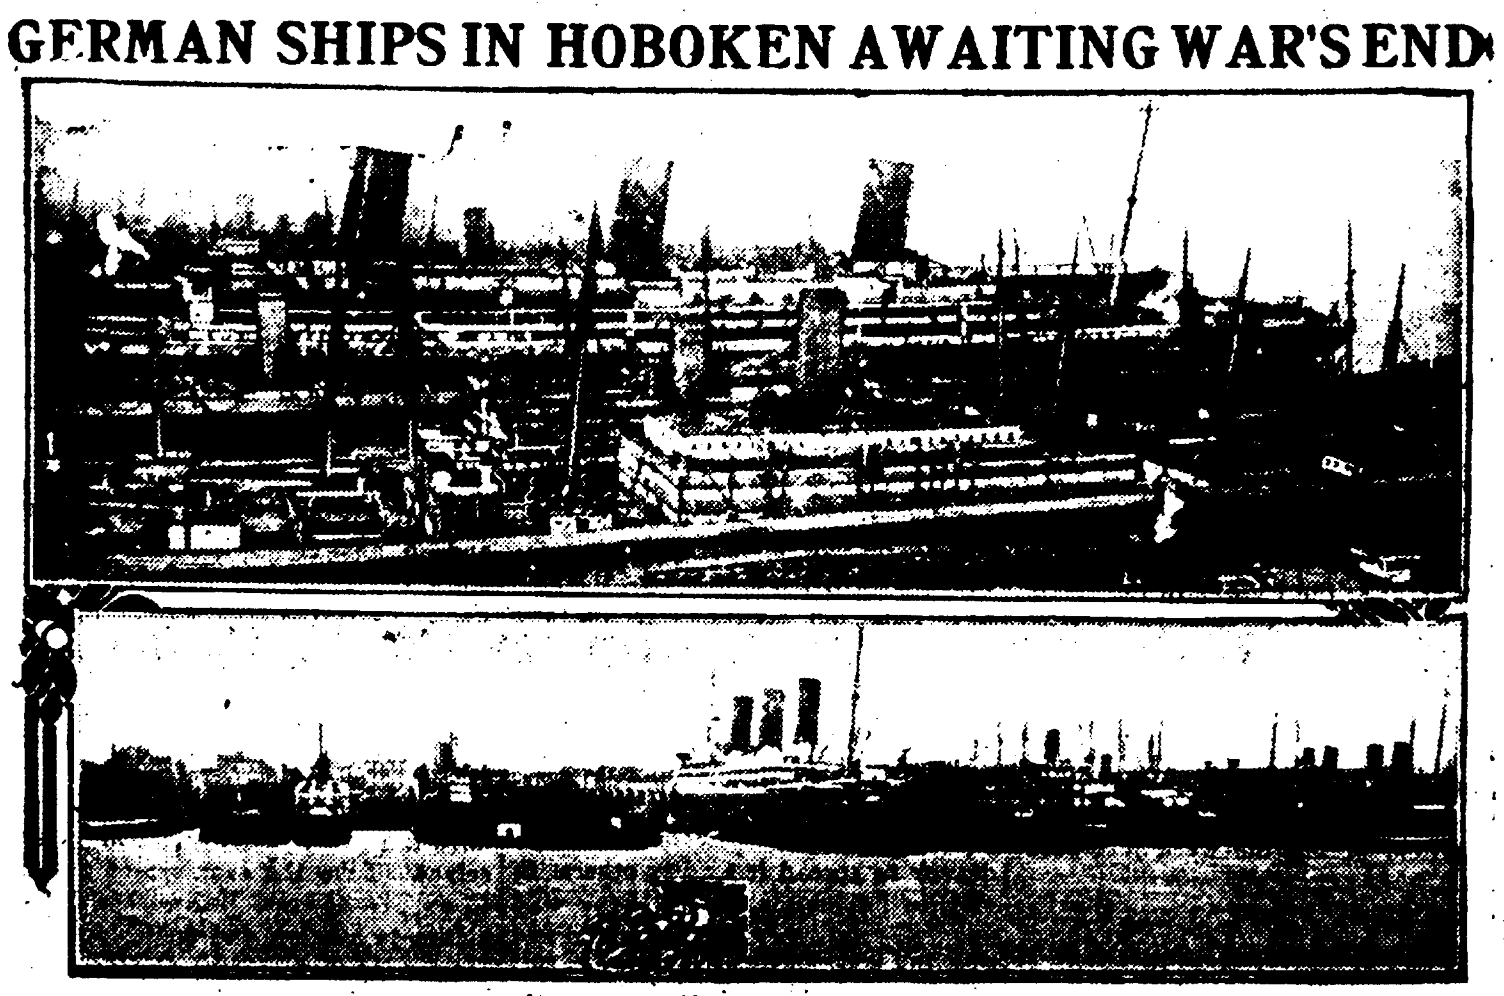
The train will be divided into two companies, each with twenty-seven trucks. One company will be equipped with four wheel drive cars, and the other with faster and lighter machines. For the present the train will be manned with civilians.

The motor train carrying supplies will have an important bearing on the expedition's success, General Funston says.

Two Sentiments.

A young lady one day requested Moltke and Bismarck to write a few lines in her album. The marshal took up the pen first and wrote: "Falsehood passes away; truth remains.—Von Moltke, Field Marshal." After reading what Moltke had to say Bismarck took the pen and added the following: "I know very well that truth will prevail in the next world, but in the meantime a field marshal himself would be powerless against falsehood in this world.—Von Bismarck, Chancellor of the Empire."

GERMAN SHIPS IN HOBOKEN AWAITING WAR'S END



Held up by the war, these ships, the pride of the German merchant marine, could leave their port at Hoboken, N. J., at any time, but almost certain capture by English warships faces them, so they stay. The German merchant ships now lying in New York harbor are as follows: Steam vessels—Adamsturn, Allemania, Armenia, Barbarossa, Bohemia, Clara Menig, Friedrich der Grosse, George Washington, Grosser Kurfurst, Harburg, Hamburg, Kaiser Wilhelm II., Koenig Wilhelm II., Magdeburg, Maia, Nassovia, Pennsylvania, Pisa, Portonia, President Grant, President Lincoln, Prinzess Irene, Prinz Eitel Friedrich, Prinz Joachim and Vaterland; sail—Indra and Matador.

SEEKS REMEDY FROM SEA.

Physician Dips Thirty Fathoms For Pure Salt Water.

San Francisco.—To save the life of a patient in St. Winifred's hospital Dr. Winslow Anderson, accompanied by fourteen doctors and nurses, went out to sea in a Crowley launch for thirty-six gallons of the purest of pure sea water.

The ailment from which the patient is suffering will give way only to a treatment in which pure salt water from the sea forms the chief element.

The party carried twelve three-gallon jugs with heavy lead sinkers, by means of which the water was lifted from a depth of thirty fathoms. The launch went nearly to the Farallone islands, and the party did not return until late at night.

Brazil Produces Piassava.

Among the forest resources of Brazil one of considerable value and importance is the fiber piassava, a product of certain palm trees, which is used in the manufacture of brooms, brushes, ropes, baskets and hats. The trees also produce a very hard nut, called in Portuguese coquilho (oquilla), from which excellent buttons are manufactured. The leaves are employed for making fans and in the country districts for roofing adobe houses. For making brooms and brushes especially no other material is more extensively employed in Brazil, and large quantities are required annually for domestic consumption as well as for exportation.

Some Queer Ones

Dog paid own license in Connecticut by bringing home two pigs worth $5 each.

To keep the Sabbath holy Dakota farmer used shotgun on farm hands who insisted on working.

Pet mouse ran across baby's face, child cried and woke family, and nine were saved in Minneapolis fire.

Man of seventy-five had to promise never to wed again before Missouri judge would give him divorce from third wife.

Spooning in parks is approved by mayor of Harrisburg, Pa., who dismissed protests by saying this is the time of the year and parks are good places for it.

Although woman failed to learn how to run auto after fifty-one hours' instruction, Elizabeth (N. J.) court decides she must pay man $168 for trying to teach her.

So many glass eyes and bald heads among brides sent from Japan to poor Jap bachelors in the United States, the Tokyo authorities have taken steps against the "picture bride" marriage.

A man without sense can scarcely be expected to make dollars.

CHILD SAVES HOME.

Little Boy Fights Fire and Climbs on Chair to Telephone For Help.

Lead, S. D.—Nerve and pluck exhibited by the five-year-old son of Mr. and Mrs. Sidney Mitchell saved both himself and the family home from destruction by fire, although the child was nearly overcome when the firemen rescued him.

The little fellow had been left alone with a playmate while his parents were out, and they commenced to play with matches. Soon the bed was afire, and the flames spread.

The other boy ran out, but the Mitchell child fought the flames with small pails of water, in the meantime climbing on a chair to reach the telephone, by which he notified the fire department. Chemicals quickly extinguished the blaze.

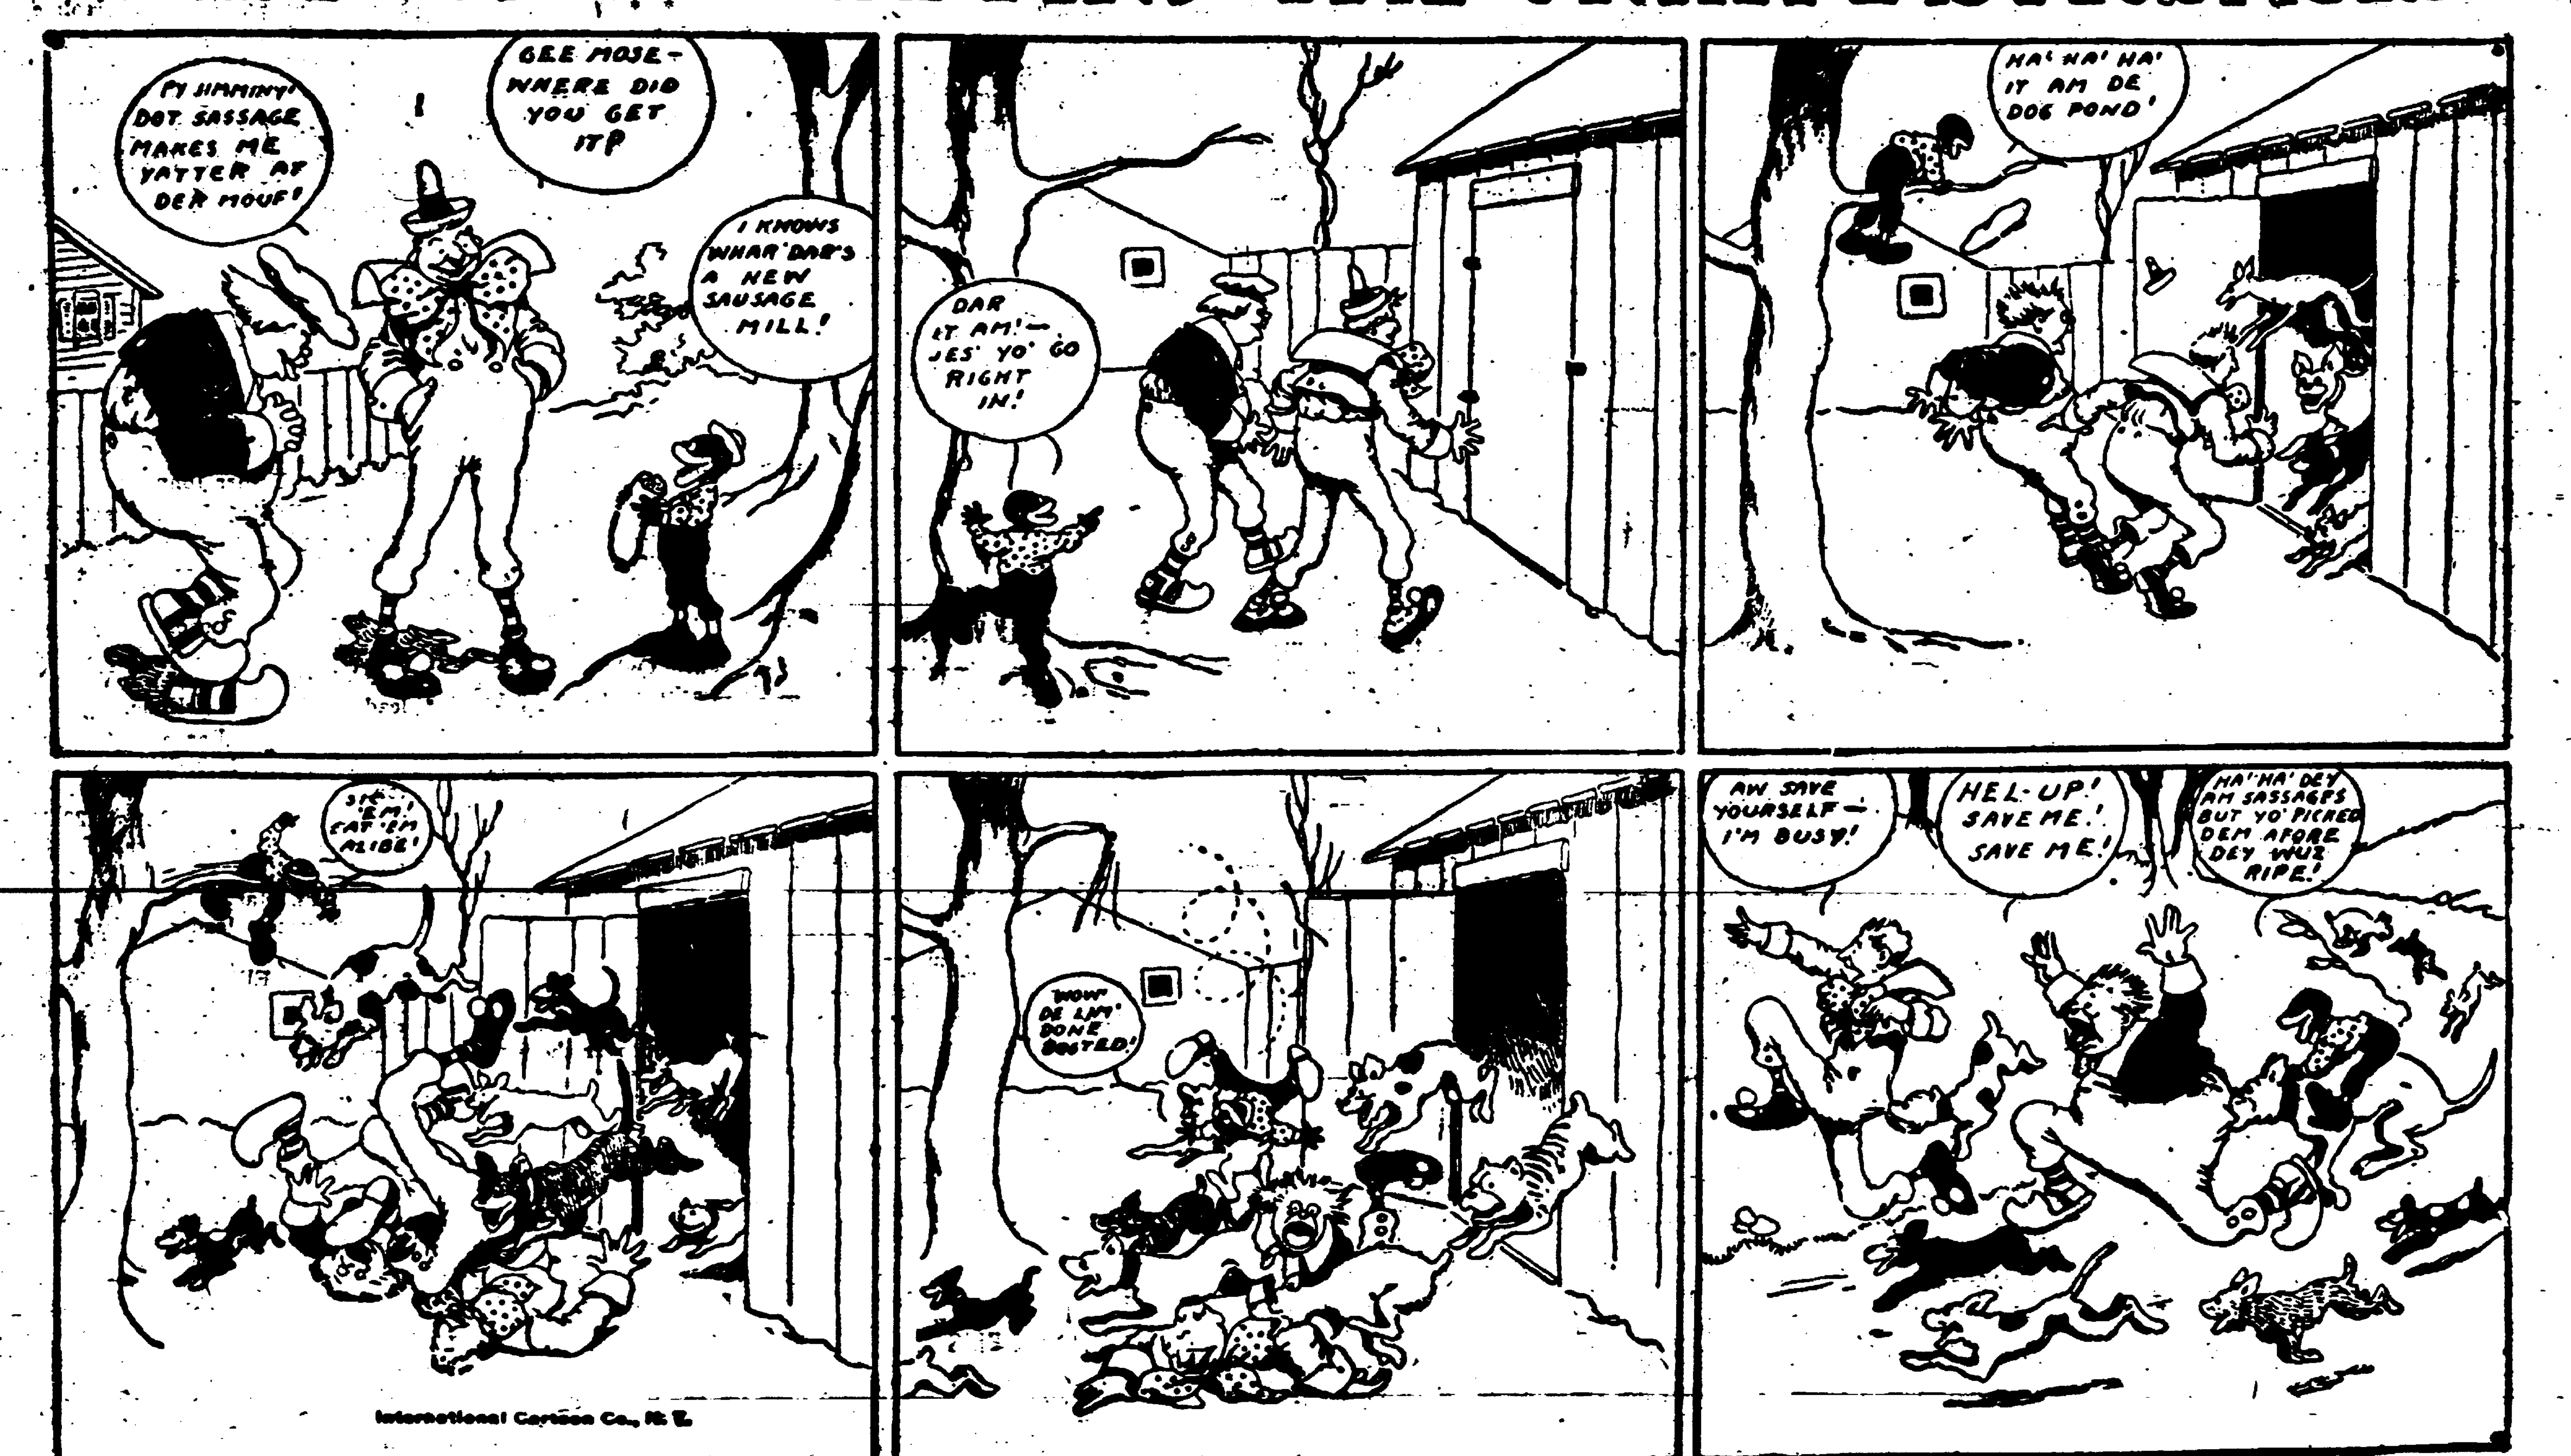
Asia.

Asia has many high mountains, but has fewer large waterfalls than any other continent.

CAUTION.

If a man whose integrity you do not very well know makes you great and extraordinary professions, do not give much credit to him. Probably you will find that he aims at something besides kindness to you and that when he has served his turn or been disappointed his regard for you will cool.

13 SIMON SIMPLE AND THE UNRIPE SAUSAGES



Catholics Must Fight Sin Every Step of the Way, Says Priest at Mission's Close

The most successful mission that has ever been held in this city closed last night at the Church of the Immaculate Conception. The mission has been in progress two weeks, under the direction of Fathers Stephen and Austin, two priests of the Franciscan Order, and the first week was reserved for the attendance of the women of the parish, while the men's mission was held during the week just passed.

Led by St. Joseph's Council, K. of C., who attended the services in a body, a throng of Catholic men received Holy Communion at the 8 o'clock mass yesterday morning. During the week, masses were said each morning at 5 and 8 o'clock, and the attendance of the men was consistently large.

Saturday night a dedication service was held at the church, in which fifty little girls of the parish, dressed in white and wearing veils, participated. The children occupied seats at the altar rail, and after an opening prayer and instruction by Father Stephen, they recited in unison a prayer of reparation for the sins of the men present. A procession of the girls followed, in which the acolytes and three priests, one bearing the Host, joined. The girls sang, "When the Saviour Wished to Prove" as they marched around the church. The altar was beautifully decorated for the occasion with flowers donated by members of the parish.

The congregation sang "Come, Holy Ghost," "To Jesus' Heart All Burning," and "O Salutaris Hosia" and "Tantum Ergo" during the Benediction. The service closed with the recessional, "Holy God, we Praise Thy Name."

Constancy Urged.

In his instruction prior to the service, Father Stephen urged the men to go to Holy Communion before the close of the mission, and pointed out the benefits to be derived from frequent attendance at the sacraments.

Father Austin was the preacher at the High Mass Sunday morning, and his sermon was based on the words of the Gospel of St. Matthew, "All power is given to Me in Heaven and on Earth. Go, therefore, and teach all nations, baptizing them in the name of the Father, Son and Holy Ghost. Teach them to observe all things, whatsoever I have commanded you, and behold I will be with you all day, even unto the consummation of the world."

Father Austin said in part:

"With these words Christ established His Church, which all may recognize. The only disagreement which comes between us and our non-Catholic friends to-day is the question of teaching authority. The Church founded by Christ is unquestionably the corner-stone of the Christian religion, and His Church is given authority by His words to teach it. The main point of difference between the Catholic and other religions to-day rests in the fact that others maintain the private interpretation of the Holy Scriptures. The Catholic Church will not tolerate this taking of her authority, which is divine."

Father Austin's sermon was a plea for lay missionary work on the part of his hearers, and he said there were many souls in the world to-day who were groping for the truth, to whom a Catholic might extend a helping hand. He told the men that their lives and the example they gave was one of the best means of converting others to their belief, and he denounced scandal among Catholics.

The distribution of books concerning the Catholic religion among non-Catholic friends was recommended and the priest told two stories which illustrated that frequently conversions are frequently brought about through the reading of books explaining the Catholic belief. He exhorted the men to inform themselves concerning their religion, and emphatically denied the frequent assertion that t he priest strove to keep the people in ignorance. He said nothing on God's earth should cause a Catholic to feel ashamed of his religion, and that all should appreciate their faith and endeavor to spread it among others. In closing he expressed the hope that soon all religions might be united and that the words of Christ "There shall be but one fold, and one Shepherd" might soon be realized.

With the services at 7:30 o'clock last night, the mission formally closed. The church was once more filled with men, and Father Stephen preached, following which the Papal Benediction was given. The services concluded with a renewal of the baptismal vows, and Benediction of the Blessed Sacrament. Four small boys acted as sponsors for the congregation during the renewal of the baptismal vows, and the font, which was placed in the sanctuary, was entirely covered with flowers and foliage. Father Stephen pronounced the Papal Benediction.

Effect of the Mission.

His sermon, which was one of the most eloquent of the mission, was an exhortation for continued practice of faith on the part of the men who have made the mission.

His text was, "Be thou faithful unto death, and I will give thee the crown of eternal life," taken from the Apocalypse. The priest said in part:

The missionaries' work is finished, and we are soon to leave you. If I were to judge by the earnestness with which you have followed the instructions of this mission, and by the zeal with which you have attended the services, both night and morning, and during the bad weather of the past week, I should say that God's work has not been in vain. It can be said that this mission has been a success. You have all gone to the sacraments, and tonight you should feel happy and once more at peace with your God. Who among you would exchange his present condition for his condition of a week ago? Your sins have been forgiven you, you have done penance, and now to doubt that you are once more among the children of God would be to doubt God's mercy.

"But what you have done during the past week is only the beginning. You have just started to look after the salvation of your soul, many of you, and from now on your task will be hard. During this week, you have been in a sort of solitude. You have gone to church often and you have had the mission more or less on your mind at all times. You have given more time to God, and to ascertaining how your account with Him stands.

"But what is the future going to be? Are you going back again to your sins, to your evil companions, to the bondage of Satan? Are you going to once more desert your Redeemer? Will you again allow Satan to bind you with chains of sin, from which you are now free?

"'Be thou faithful unto death' says the Lord. He promises a crown of eternal life for fidelity, but this crown is given only to those who persevere. Let me, sound a warning. Be not too confident of yourself, for you may fall once more. You have not changed during the past week, this mission has not made you over. You are still human, you still have the same passions, and evil inclinations, and even now your arch-enemy may be planning to ensnare you once more.

"Don't be too confident that this mission has saved your soul. There are Catholics whom we call "missionary Catholics." They attend every mission that comes along, and then after the first good effects of the mission wear off, they forget their promises and resolutions, they forget Mass on Sunday and Holy-Days, they forget the sacraments, they forget prayer—in fact everything connected with the Church, and give way to their evil passions as before.

"Are you fortifying yourself against the future? Are you making strong resolutions? You have acknowledged your sins, and you have promised to never more offend God, no matter what the cost. But, mistrust, yourselves, rather than be too confident.

"The greatest men of all time have fallen. Take the example of Solomon. He was pleasing in the sight of God, and in answer to his request, God conferred upon him the gift of wisdom. He built a great temple to God, but still he fell, and in the end adored pagan idols. Are you as wise as Solomon, who had more wisdom than any other man since the beginning of time? Are you as holy as he was in the beginning? Take care, do not have too great confidence in yourselves. Take the example of one of Christ's followers, Judas. He fell, a victim to avarice, and sold his divine Master for thirty pieces of silver. One of God's chosen, he was, sent out to save others. And in the end he gave way to despair, and hanged himself with a halter.

God Always Rewards.

"I am not speaking to discourage you, I am simply warning you that the way will be hard. God created you without one word from you, but He will not save you without your co-operation.

"And what encourages you through the fight? It is the reward that God offers you. The crown that will never fade. The Israelites wandered through the desert for forty years until they came to the Promised land which God had promised them. They suffered and endured many hardships, and often had to fight for their existence as they went along. Heaven is the Promised land for you, and it may be twenty or fifty years before you reach it. You will have to undergo trials and hardships along the way, and you will have to battle with the world. But what is twenty years compared to eternity?

"Put your hands to the plow, and do not turn back or you will be unworthy of God's reward. What will this penance and the reception of the sacraments profit you if you return again to sin? You will then be more guilty in the sight of God than ever before, for in the past you were as one blinded, your will was weak. Now you realize your sins and are sorry for them, and if you leave God now and go back to your former life, you will not be worthy of the Kingdom of Heaven.

"I ask you to resolve at all costs to remain faithful. And God does not leave you alone. You received a card at mass to-day called "Remembrances of the Mission." This card describes the many resolutions you should make in order to continue a good Christian. The first of these is prayer. Christ says, "Whatsoever you shall ask in My name, it shall be given unto you." We must pray and pray fervently, recite your prayers every morning and every night, and also at mealtimes.

Value of An Institution.

"Another aid is the Sacraments. They are the channels of God's grace and they should not be neglected. Man seldom sees himself as he stands with God unless he make an examination of concience, as he is going to confession. Frequent confession is necessary, and thereby you will keep the friendship of God. And the sacrament of Holy Eucharist which was established as a divine gift for you, is another great aid to a holy life.

"The Blessed Mother of God will help you, she will intercede for you at the throne of her divine Son, and whenever you are in trouble you should pray to her. She obtains grace for us, and she will prove a great aid to you in maintaining a course of life which is pleasing to God.

"Finally, to those who have often fallen in the past,—you know what has caused your fall. It was the evil associations, the evil companions and places. If you know that this or that place or this or that person is going to lead you into sin avoid them. It is tempting God to court the danger.

"Read over your little cards often and thereby you will see whether or not you are remaining faithful.

At this point the Papal Benediction was given and in conclusion, Father Stephen said:

"I wish to extend to you our sincere thanks for your co-operation during this mission. We are going to leave, but your pastor will remain with you and carry on the work of God. Listen to his voice at all times, when he rebukes you or when he entreats you.

"The burden of a priest is not an easy one, and the help of the congregation, particularly the men, goes far to make it lighter. The finances of a parish are its greatest burden, and we hope that you will be generous to your pastor in the future, as you have been to us.

"I also wish to thank all those who assisted in any way that this mission might be a success. The men of the choir, those in charge of the mission store, and the congregation for its regular attendance and co-operation.

"And though we leave you, we ask you not to forget us in your prayers. Recite just one "Our Father" occasionally that God may bless us in our work."

PUBLIC AUCTION

Mr. E. F. Piper has arrived in Fulton with a carload of

HORSES

Ranging from yearling to eight years old, several fine work horses ranging from 1,100 to 1,400 lbs. Can be seen at the Fulton Livery Co.'s barn until

TUESDAY, MAY 23, 1916

when they will be sold at Public Auction, commencing at 1 p. m. *Terms*—9 months on endorsed, approved notes, payable at Citizens National Bank, Fulton, with interest. Dated May 17, 1916.

JOHN MELVIN, Auctioneer.

McKINSTRY EMPLOYES TO ENJOY OUTING

Francis Baker, Harold Andrews and Frank Eliot, of the McKinstry store, and Harold Reed, who will shortly return from Herkimer, N. Y., to accept a position in this city, have rented a cottage at Stop 26 on the Oswego River, and will occupy it after July 1, commuting to business each day. All the store employes will spend the vacation of one month, allowed them by the company, at the camp, which will be fitted up with every luxury of home, including a well stocked larder. Friends of the prospective campers are already planning excursions to the cottage.

VICTIM OF ACCIDENT WAS BURIED YESTERDAY

The funeral of Mrs. Frederick C. Reynold occurred yesterday from the home of her brother, Mr. Frank Petrie, Utica street, and at the Case Memorial Chapel in Mt. Alnah Cemetery. Mrs. Reynolds is survived by her husband and five sons, Ray, Floyd and Carl of this city; two daughters, Mrs. Maud House, of Lysander, and Mary, the little girl who was saved from injury; one brother, Frank Petrie, of this city; and two sisters, Mrs. Thomas Echard, of Hannibal, and Mrs. Will Turner, of Phoenix. Mrs. Reynolds was the daughter of Henry Petrie, a former resident of Minetto, and was in her 49th year.

MRS. HENRY KANE.

Mrs. Henry Kane, died last night at the home of her daughter, Mrs. Bert Randall, in South Fourth street. She is survived by two sons, Charles Kane, of this city, and Frank Kane, of West Point; also the daughter, Mrs Bert Randall, of this city.

The funeral will be held at 2:30 o'clock tomorrow afternoon from the home. Miss Ada Thayer, first reader of the local Christian Science Society will be in charge.

MISSION PRIESTS LEAVE CITY

Rev. Father Stephen, O. M. C. one of the priests who has conducted a mission during the past two weeks at the Church of the Immaculate Conception, left this morning for Syracuse, where he will go into a retreat for some time, before resuming his mission work.

His associate, Rev. Father Austin, O. M. C., left yesterday for Hoboken, N. J., where he will conduct a mission at St. Joseph's church, afterward taking charge of a mission in Trenton, N. J. The missionaries are subject at all times to the instructions of the head of the Franciscan Order, and it is very unlikely that the two priests who were associated here will jointly conduct a mission again in years, as they remain on call to any part of the country.

ARE YOU DOWN TO THE MINUTE?

If so, have your carpets and rugs cleaned and made sanitary. We guarantee to do this if you send them to us.

Do you need linoleum for any room? A large variety of patterns to choose from.

Window shades of best quality, with the best rollers and any color you wish, made to your order.

Rugs from worn carpets.

Fulton Keynotes

Mrs. O. A. Casler, of Charlotte, N. C., arrived in this city to-day for a visit with Mr. and Mrs. James Keeler, of Oneida street. Mrs. Casler was accompanied by her daughter, Miss Maud A. Casler.

* * *

Miss Lillian Waldhorn returned today from a visit with Miss Anna Bragman, of Syracuse.

* * *

Julius Kamp, of the Rosenbloom store, spent the week-end with his sister, Mrs. Jacob Levine, of Poughkeepsie.

* * *

Miss Julia Lockwood, a teacher in the Baldwinsville schools and Miss Pearl Smith, of the Oswego Normal were the over-Sunday guests of Mr. and Mrs. Lay A. Palmer.

* * *

The Sons of Veterans will hold an open meeting at their headquarters this evening. The Ladies' of the G. A. R. and the Grand Army Veterans are invited to attend.

* * *

Miss Anna Brennan, of the Fulton Post Office has been elected a delegate to the State Convention of Post Office Clerks which will be held in Elmira Decoration Day.

* * *

Raymond Rich, a letter carrier in the Fulton Post Office, fell from his wheel while riding to his home on Hannibal street, Saturday, and is detained at home with a badly bruised knee.

* * *

The Order of Eastern Star will march to the tabernacle in a body Wednesday evening, meeting at the N. Y. C. station at 7:15 p. m.

* * *

Mr. and Mrs. Leroy Nelson and daughter, of Syracuse, were over-Sunday guests of Mr. and Mrs. Charles Sage.

* * *

Mr. Clarence Quick, of Marcellus, spent the week-end with his parents in West Broadway.

* * *

Mr. and Mrs. Clarence Olmstead were the Sunday guests of the former's parents, the Rev. and Mrs. Charles Olmstead. The young man is a member of the staff of the Oswego Times.

* * *

Miss Ida Kaplan, of Rochester, spent Sunday with Mr. and Mrs. I. Alderman, of Scuyler street. She will return and remain over the week-end.

* * *

Mr. and Mrs. N. A. Locke, of 112 North Seventh street, returned this morning from a motor trip to Chittenango, where they spent Sunday with relatives.

* * *

Mrs. James Hunter, Jr., will entertain the Cooking Club at her home in Oneida street, this evening. This will be the last meeting of the club until the fall months.

* * *

Mr. and Mrs. Paul Greenwood, of Bowen's Corners, were over Sunday guests of Mr. and Mrs. G. H. Maud, 260 South Fifth street.

31 MEETINGS FOR PRAYER

1—Mrs. Dunning, North Sixth street, leader, Ensign Fitzgerald.

2—Mrs. Tallman, Seneca street; leader, Mrs. Palmer.

3—J. B. Rector, 620 Ontario street; leader, Mrs. W. Sylvester.

4—Mrs. Merrifield, corner Seneca and Seventh; leader, Mrs. Cusack.

5—E. A. Putnam, 310 Cayuga street; leader, Mrs. M. Skeel.

6—Mrs. McIntyre, 521 Cayuga street; leader, Charlotte Morin.

7—Mrs. Larabee, Wells street; leader, Mrs. Hawks.

8—Mrs. Goodjon, 309 Buffalo street; leader, Rev. F. Darling.

9—Mrs. Denemore, 609 Rochester street; leader, Mrs. Parkhurst.

10—Dr. Joy, South First street; leader, Mrs. L. F. Joy.

11—Theodore Van Delinder, South Second; leader, Mrs H. D. Holmes.

12—W. J. Lovejoy, Academy street; leader, Mr. Warth.

13—Meets with District 2.

14—Mrs. Jacob Mahlerwein, 609 Broadway; leader, Mrs. Mahlerwein.

15—Mrs. J. Hubbard, 303 South Second street; leader, Mr. C. A. Balch.

16—Mr. Beebee, 359 South Third street.

17—Louis Johnson, Broadway; leader, Miss Smith.

18—Mr. Haas, South Sixth street; leader, Mrs. Parker.

19—Mrs. Johnson, Seventh, near Fay; Miss Esther Johnson.

20—Mrs. Eddley, Lyon street; leader, Mrs. Frank Allen.

21—Mrs. Devilliers, West River road; leader, unannounced.

22—Mrs. Thompson, Sr., Hannibal street; leader, Mrs. Frank Halleck.

23—Mrs. John Storm, 6 West Fifth; leader, Mrs. Daniel Kane.

24—Mrs. Jessie Beebe, 25 Schuyler street; leader, Mrs. Wendell Knowlton.

25—Mrs. Wallace Butts, 120 West First street; leader, Mrs. Benjamin Franklin.

26—Mrs. Mary Dennison, 111 West Fourth street; leader, Mrs. M. S. Warner.

27—Mrs. Ellen Milnes, 259 West Second street; leader, Mrs. F. J. Switzer.

28—Mrs. John Finley, 258 West Third street; leader, Mrs. Martha Stewart.

29—Mrs. Alvena Greenwood, 308 Second street; leader, Mrs. Mabel Moody.

30—Dr. H. J. Terpening, 309 West Broadway; leader, Dr. Terpening.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

"And it Came to pass as they went in the way a certain man said unto Him, 'Lord, I will follow Thee whithersoever Thou Goest.'" Luke 9:57.

Evangelist Peacock's text yesterday afternoon was, "And it came to pass that as they went in the way, a certain man said unto Him, "Lord, I will follow Thee whithersoever Thou goest." Luke 9:57.

I like the ring of this text. The words have a determination about them. They sound like consecration self sacrifice and true courage. It took courage to make this statement. It required courage to make the statement good. Sometimes men and women are very willing to make promises but they are not willing to make these promises good. It is not a difficult task to do what we have promised. So many people are ready to make promises before they really know what the promises mean and I think this is one reason why so many people fail to do what they have promised to do. Sometimes we are impressed by the services in God's house and have a desire to do better. We feel and know that we should make a change, that we should follow Jesus, and so we decide to do so without taking into consideration what it means and what it costs to follow Christ.

You remember the young man who came running and kneeled down before Christ and asked Him, Good teacher, what shall I do to inherit eternal life? And Jesus said unto him, Thou knowest the commandments and the young man said Teacher, all these have I observed from my youth up, and Jesus looking upon him loved him and said unto him, One thing thou lackest, go sell whatsoever thou hast and give to the poor, and thou shalt have treasures in heaven; and come take up the cross and follow me.

The Hardest Test.

The young man's countenance fell at the words and he went away, sorrowful, for he was one that had great wealth. He seemed to be very anxious at the beginning and no doubt was ready to make the fairest promises, but Jesus put him to the test the very first thing, and when the young man was weighed in the balance he was found wanting.

Now this is the case with multitudes of people, they are ready to make all sorts of promises, but when the time comes to fulfill the promises they are weighed in the balance and found wanting. They are not as anxious to follow Jesus as they thought they were. It is the easiest thing in the world to be deceived about the longing desires of our spiritual natures. So many people want to be good and have a desire to be known as the disciples of Christ but they are not willing to pay the price.

These words were spoken at a time when it required courage to speak them. Jesus was going toward Jerusalem. He had sent messengers ahead to make ready for his coming. But when the people learned that Jesus was coming, they refused to receive Him. And when James and John saw the way the people were treating Jesus, they wanted to call down fire from heaven to consume the people. But Jesus rebuked them and they went to another village. And as they went on the way, a certain man said unto Him, Lord I will follow Thee whithersoever Thou goest. Let us for a little time look at this man, study his character, analyze his life and see what was in the man that brought about this glorious declaration. Of course the spirit of God had been working upon him and drawing him to Jesus Christ. This man no doubt, had heard of Jesus Christ before this time.

The Man of Courage.

Mattherw tells us that he was a scribe. He knew the Bible. He was a man professing to have a religion. But what led him to make this statement? It is not improbable that this man had seen the works of Jesus and realized that Christ was that he pretended to be, and that the proper thing for him to do was to follow Christ and become a disciple of His. It was not an easy thing for this man to take the stand that he did, it was not an easy thing for him to make this statement. It required courage. He was a man of courage. He had to face public opinion. He was the only one in that village willing to follow Jesus. Now this was a hard thing to do, to walk out from among the scoffers and sinners and tell Jesus that he would follow Him whithersoever He would go. It is an easy thing for men and women to be Christians in this day and generation, when so many other people are Christians. But when a man is compelled to brave the opposition of the whole community it is pretty hard. It takes courage to live the Christ life anywhere but more under circumstances like these than any other place.

During the war a soldier went to his chaplain and said to him, "Chaplain, I am the only man in our tent who is a Christian, and every night when I kneel down to pray, the boys make fun of me and throw their shoes at me, so I do not know what to do. What must I do about it?" The chaplain told him to wait until he got under his blankets at night and say his prayers to himself. A few days afterward he met the soldier and asked him how he made out. "Well," said the soldier, "your plan didn't work at all. I waited until the lights went out and tried to say my prayers under my blanket. The boys were all laughing because they thought they had whipped me out. I laid there and thought to myself, you coward, you are willing to stand up on the battlefield and let them shoot at you because you love your country, but you are not willing to get down upon your knees and pray to the Lord because you are afraid somebody will disturb you. I just threw the blanket off got down upon my knees and prayed aloud for every soldier in the tent. They all listened and now when I kneel down to pray they kneel with me and we have regular family worship there together. My friends this is the kind of courage it requires to be a disciple of Jesus Christ. Men and women must have the courage to let the people of the world know that they are not ashamed of Christ and His gospel. There are multitudes of people who have the courage to face danger for other things but they can't face the taunts of the world for Christ. You coward, you want Christ to have you but you haven't the courage to show to the world that you are willing to follow Christ whithersoever He goeth.

Many people are willing to follow Christ so long as things are moving along smoothly and they can enjoy the blessings of Jesus Christ without doing anything or facing any danger, they are very enthuiastic, but the very moment trials and tribulations come, they turn traitor to Jesus and His cause. Too many people are looking for the easiest way into the kingdom of God. They try to avoid all danger and persecution and want just as few people as possible to know that they have anything to do with Christ. This man was a manly man. He had the courage of his convictions. He didn't care what the people had to say and think. If we had more man and women of this stamp and type it would be much better for our world.

This man had not only courage. He had a will. It takes will power to decide for Christ. He came to Jesus and said Lord I will. He might have said Lord I would like to be a disciple of yours. I know I ought to follow you, but I am afraid the people here will laugh and make life miserable for me. I know I should be a Christian but by business will not permit. I know you are what you claim to be but I can't make up my mind to do what I ought to do. He might have found excuses by the scare, as many people are doing today, but he didn't. He made up his mind that he would follow Christ and he did.

Not an Easy Path.

Now my friends it takes will power to be a disciple of Jesus Christ for the devil always has an excuse ready to keep us from doing what we ought to do. But when a man gets to the point where he can say, Lord, I will and really means what he says, he is a saved man. When we surrender ourselves completely to Jesus Christ, that is salvation, and not until we have made this wholehearted surrender can we expect to enjoy the blessings of Christ. Jesus didn't ask this man to follow Him. He came of his own accord and he received the blessing. Christ rather discouraged him. He said unto him: The foxes have holes. The birds of the heavens have nests, but the son of man hath no where to lay his head. He wanted the man to understand what it meant to follow Christ. It meant that he must give up everything to follow Jesus wherever He might go. Jesus invited others to follow Him, but they had an excuse. They said after a while, not just now. How many people are doing the same thing. They intend to follow Jesus but now now. They will do it when they get ready. But the trouble is just here. Such persons are never ready. They want to wait a little longer.

Influence of Age.

John Wanamaker once said: "I was a country boy who had come into the city. A salesman asked me if I would go with him to his church. It was a quiet old fashioned meeting. There was a handsome old man of about 75 years of age and in the gravest way said that he was just waiting for God to take him; he had lived his life. That God had been good to him that religion was a good thing to die by. I sat back and thought to myself, Old boy, you can't touch me, you have lived your life. You haven't any sympathy with a big boy, it has passed over my head. Soon after the younger man got up. He was perhaps 35 and he said, I have just begun the Christian life. Two years ago I was converted, I had just begun business and had a prejudice against religion. I am a great deal happier. I am a better business man. I listened to him continued Mr. Wanamaker and said to myself, you want to be a business man and he tells you how you can be a better business man. He tells you religion is good to live by. Another man tells you it is good to die by. Now do you ever intend to be a Christian? Yes. Well if it is a good thing why don't you begin right away? I said, yes I will. I waited until everybody had gone out except the janitor and the old minister, and as the latter came down the aisle, he met me, coming up. I simply said to him, I have settled tonight to give my heart to God. And he reached out his hand and said to me, God bless you, you will never regret it. My friends, John Wanamaker had reached the place where he was ready to say I will and when he reached that point he was saved. Now if we intend to follow Christ why not begin tonight? What are we waiting for? There is nothing to be gained by delay. Now is the acceptable time. Now is the day of salvation. Now is the time to follow Jesus Christ. This man believed in Jesus. He called Him Lord. No one will follow Christ who does not believe in Him and no one will fail to follow Christ who does believe in Him. A man can't believe in Jesus Christ and not follow Him. He may think he is but he is sadly mistaken. The very first step this man took was a public confession. He came to the Lord and told him that he really believed in Him and intended to follow Him. My friends do we really believe in Jesus Christ as the savior of the world? Are we willing to follow Him? Is Christ more precious to us than anything else in this world? I once read of a woman who said if she were on one bank of a river and Jesus was on the other and that river was filled with boiling fire, she would plunge into it and attempt to reach Him, she loved Him so much. My friends, if we really love Jesus we will follow Him and be anxious to have others follow Him. And the time to begin is right onw.

One beautiful moonlight night on the Hudson river, the engineer heard the quick, sharp ring of the pilot's bell. He stopped his engine and looked out wondering why he had been stopped in the middle of the stream. The night was lovely. The river was calm, and the moon shown brightly. He gave his engine in charge of his assistant and went up to the polit's house to see what was the matter. There stood the pilot holding to the wheel as if he were looking out. Why did you stop me, said the engineer in a low husky voice, the pilot replied. There is a mist upon the river and I cannot see to steer the boat. We had better anchor until the morning. See the captain and tell him so. The engineer looked into the face of the pilot and saw that death was there. He caught the pilot in his arms and laid him down only to see him breath his last. Soon, my friends the mist will gather around you and me, soon the dark shadows will fall across our pathway, but if we have Jesus with us we need have no fear. For He has to be our pilot. He has promised to be our shepherd. He has promised to be our Savior. Yea though, I walk through the valley of the shadow of death, Jesus will be with me to pilot me safely across the ocean of eternity into the mansion of eternal bliss, which he has gone to prepare for those who follow Him as their Lord, Master and Savior.

MISCELLANEOUS WANTS

Rate—1c. a word each time.
Minimum Charge 10c.

Lost—On State road, two miles north of Phoenix, a lady's handbag containing lady's watch and small sum of money. Please return to Mrs. F. W. Butts, Phoenix, N. Y. 441

Kaplan's Transfer Service—Moving, baggage and trucking. Call Mike Kaplan, Phone 4246. Second hand furniture bought and sold. 4-20-1mc

Cows for Sale—Two; fresh. M. T. Colwell, Emery Road. Phone 5101. tf

For Rent—Five room apartment, all conveniences. 520 Buffalo st. tf

ABOUT THE TOWN

Some real weather, just for a change. A few optimistic young men wore their advance-style straws, and were properly self-conscious. Many young ladies wore—but this is no fashion column.

* * *

East First street came in for its usual Sunday condemnation, as of yore, by the many automobilists who were compelled to traverse it. Still, they can be thankful they don't have to use it every day.

* * *

The Oswego Times, in alibying for the defeat of its High school baseball team by the Fulton lads Friday says:

"The only run of the game was scored before Schafer's curves began breaking right. He was supported in fine style. But the O. H. S. warriors were unable to break into the scoring column owing to the brilliant pitching of Shea."

We'll bite. Who is Shea? Has Barnes become so famous that he must pitch under an alias?

* * *

Take advantage of your constitutional rights, Fultonians and serve on the Grand Jury. The following men have just had their names drawn for service, and the majority will immediately begin to think up excuses which will prevent them from serving:

Frank A. Allen, Frank Miller, Frank W. Lasher, Jacob Mahlerwein, Edward Quirk, F. L. Parks B. Boigeol, Alphonse M. Roy, John Fink, Francis W. George.

* * *

With a mark of 94.9 Fulton High School stands fourth in the list for efficiency in Regent's examinations by the statistics recently given out by the State Board. Oswego High school is rated at 88.8.

* * *

Someone has found oil near Poughkeepsie, in a town called Shekomego. Wonder if they'll call it Omego Oil?

* * *

The Pathfinder Construction Co. of this city has started work on a state road contract at Antwerp, and reports from that place state that the first week's pay-roll totaled $1,600. Not Mexican money, either.

WEATHER FORECAST.

Cloudy to-night and Tuesday, probably showers. Fresh south to south west winds.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

LAWS OF MOSES IN FORCE TODAY

J. S. Shields, C. S., So Declares to Audience Which Nearly Filled the Wieting in Syracuse.

To-day's Post-Standard contains the following report of a lecture on Christian-Science delivered in Syracuse yesterday:

There is in all men, individually and collectively, an inherent, instinctive respect for the law, even human law, which at best is faulty, declared Jacob S. Shield of Chicago, who addressed one of the largest audiences that ever listened to a Christian Science lecture in this city.

For an hour Mr. Shield held closely the attention of his audience, which nearly filled the Wieting Opera House, while he expounded Christian Science and declared it the religion of divine law.

The speaker, who was introduced by Prof. Frank Ormsby, head of the vocal department of the Fine Arts College, Syracuse University, said it was his purpose to present his subject to prove it is based upon divine law, through which God's infinite good is operative now in the universe and in men.

Based on Divine Law.

"Law," he stated, "is synonymous with truth, order, justice and equity and to prove that this religion is based upon divine law it is necessary to prove that it is exact and right; that it pertains to a system which is perfect in its operation; conforms to a standard and violates no right; gives to every man his due and is universal in its adaptability."

The Mosaic law, Mr. Shield added, was the first exposition of divine law and should govern every man in his relationship to God and to his fellow men. From it springs all human laws and codes, the speaker said, emphasizing that all Christian Scientists accept this law in all its completeness as expounded by both Moses and Jesus Christ.

That the same divine law that operated during the Old Testament miracles also was operative in Jesus' time was demonstrated in the healing of thousands and the power that Jesus exerted over all material conditions.

Still Operative.

This same law is, Christian Scientists believe, now operative, and the speaker said its peoples are daily demonstrating in some degree the wonders that this divine law makes practical in earthly life. This is possible only, Mr. Shield pointed out, by strictly adhering to the original divine law, and turning away from all false gods in matter and by following as closely as they can the commandments of the master metaphysician, Jesus.

The speaker stated that thoughtful men and women are to-day realizing that religion must be more than a belief or superstition, and that it cannot be inherited, adopted or secured by fasting or feasting.

"The people of this age are demanding a more practical religion, one that has less dogma and more love, less ritualism and more spirituality, less creed and more works, less scholasticism and more truths," he said.

Must Understand More.

That Christian Science has revolutionized religion as well as medicine was brought out in the address. Mr. Shield also said that when Christian Scientists understood more fully Christian Science they will not only heal all cases of disease, but will do so instantaneously. At present they are, he added, like children who demonstrate the simpler problems in mathematics. Through Christian Science, the speaker brought out in his talk, the Bible's promises are fulfilled in the healing of all diseases as well as sin.

GLYCERINE AND BARK PREVENT APPENDICITIS

The simple mixture of buckthorn bark, glycerine, etc., known as Adler-i-ka, astonishes Fulton people. Because Adler-i-ka acts on BOTH lower and upper bowel, ONE SPOONFUL relieves almost ANY CASE of constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. The INSTANT, easy action of Adler-i-ka is astonishing. W. H. Gayer & Son, druggists. adv.

A Singular Find

It Occurred on a Battlefield In France.

By F. A. MITCHEL

George Elliott lived south of the border line separating Canada from the state of Maine. George was desperate. He was very poor, he was in love, and the country about him was a dead and alive region wherein it was hard enough for a man to pick up a living for himself, to say nothing of a possible wife and a family of children.

It is this kind of man which, when a war breaks out, furnishes food for powder. When a man sees only misery before him in life he looks upon death as not altogether undesirable. Besides, till it comes he has no responsibility as to food and clothes. The government takes care of him till he is told to stand up before an enemy and be shot down. His idea of being shot is a bullet in a vital part that will end his misery at once. He doesn't consider being maimed and turned again on to the world in a far worse fix than before.

One day George went to see his girl, Ellen Barry, and told her that he was going up into Canada to enlist. He reminded her that it was madness for them to think of marrying and his going to the war would be as good a way as any to end what was becoming torture. The only response on Ellen's part was tears. This made it all the harder for George, and, taking her in his arms, he kissed her, then, releasing her, turned and walked away without looking back. Ellen gazed mournfully after him through her tears till he had passed out of sight, then, sobbing convulsively, went into the house.

A year later Private George Elliott, who had been enlisted in a Canadian regiment of sharpshooters, was concealed among the branches of a tree in northern France picking off the enemy with his rifle when a shell burst under his perch. When George came to himself he was lying in the crater or hole made by the explosion. He tried to draw up one leg and failed. Then he tried to move his left arm and failed at that. His cheek was resting on something hard and cold, and he managed to raise his head sufficiently to see what his rigid pillow was. It was iron, manufactured iron, and, judging from what was uncovered by the earth, it was sheet iron.

One who covets death from a distance is not so anxious for it as it approaches. George's desire had been for a sudden taking off without knowing what was to happen. Now, lying in a shell hole in the ground, neither friend nor enemy about, he was very much concerned lest he die from inattention. He knew that he had been wounded, but how seriously he was ignorant. He made another effort to draw up his leg, and this time succeeded. It had only been benumbed. As to his arm, that was in very bad shape. It had been mangled, and arterial blood was flowing from it. Unfortunately he had been unconscious only a few moments, and there was yet time to stop the bleeding. Making a tourniquet of his handkerchief, he succeeded in compressing the orifice through which he was bleeding.

Having lain quiet for some time and feeling desirous to do something for his safety, he sat up and looked about him. Being in a hole, he could not look far. Indeed, the only thing of any interest whatever was his metal pillow. Only one or two square feet were uncovered, and George, tapping on it with the knuckle of his right hand, made up his mind that it was thin and there was a hollow space beneath it.

Meanwhile shells were falling and bursting about him. He had been when dropped from the tree in advance of the British line, and it did not seem to be any nearer him now. Nor did it appear that the Germans were any nearer. He had some curiosity to know what was under the iron covering, but, wounded as he was, this was impracticable. Having nothing to do, he looked up at the tree above him. It was a peculiar shape, and he noticed this particularly.

Presently a shell burst so near him that it shook down some earth from the side of the hole he was in and covered the metal that had interested him. He was sorry for this, because he had been contemplating an effort to examine it more thoroughly. But he was very weak and would not likely have succeeded. Soon after this he heard men tramping, the word of command, and his comrades charged past him.

It was not long after this that the Red Cross people came and, putting George on a stretcher, took him to the rear, where he was examined. His arm had been so badly shattered by a fragment of the shell that the surgeon attending him decided to amputate it. George sighed. He had come to the war to find release from misery and misery had been added. He had lost an arm, which would necessitate his being discharged. Death was as far from him as it had been before he enlisted.

When George was discharged from the hospital and the army he was told that he would be sent back to Canada. He said nothing, but he thought a good deal. He would have liked to see his beloved Ellen again, but it would only be a renewal of a situation which would again have to be ended. He might be returned to Canada, but from there would go anywhere so long as it was not back to her. While he was waiting he thought of the hole he had fallen into when knocked out of the tree and was seized with a desire to know more of his iron pillow. There was not much change in the situation of the British and German lines, and he thought it likely that he might be able to visit the spot.

One day he went out in search of it and found that his comrades had dug a line of trenches about a quarter of a mile in advance of it. There was the bustle usual to the rear of an army. Men, nurses, horses, motorcars, everything, anything, going and coming. He found the tree and recognized it by its shape. Standing under it, he looked down into the hole where he had lain wounded. It was sufficiently deep to admit of his going down into it without much likelihood of being seen. This he did, and, sitting down near the spot where the iron had been bared, he began to shove the earth with his heels.

It was not long before he uncovered the top of an oblong sheet iron box or trunk about three feet long by two feet wide. Scooping the earth away from before the lock, he looked about for a stone with which to break it open; but, testing it, he found that it was not locked. Lifting the cover, he saw a sight that surprised him. Lowering the lid, he kicked the dirt over it again and, making his way out of the hole, went back to his place among those discharged men waiting for transportation.

What he had found in the box was the valuables usually contained in the home of a rich man. Such as were not too bulky to go into the limited space had eventually been hurriedly placed there.

Keeping his secret, George the next day borrowed a needle and thread and remnants of cloth and began to make pockets in his garments, though they were rather bags. When night came he returned to the hole and, uncovering the box, removed much of the contents, which he placed in his pockets. He did not need a light; the sense of touch was quite enough. He could only take the smaller articles, the others being too bulky. He had brought a shovel with him, and when he closed the box he put a couple of feet of earth on its top.

One day Ellen Barry was washing the breakfast dishes when, looking out through the window beside her, she saw a man coming in at the gate. He was well dressed, one sleeve being pinned to his coat front. When he came nearer she recognized her lover. Running to the door, she threw her arms about his neck, while he embraced her with his single arm.

"Oh, George!" she exclaimed ruefully, looking at the empty sleeve.

"I've got something for it," he said. "Come into the house and I'll tell you all about it."

When he had told her what has been thus far recounted he continued:

"When I opened the box I saw at once that some one, doubtless in view of an army coming, had put the family valuables in it and, taking it to the base of the tree from which I was picking off Germans, had buried it there, intending to recover it after the war. There was gold plate and loose jewels. On my second visit I took the jewels, leaving the gold plate. The owner had buried his treasure five feet under ground, not dreaming that it would be uncovered by a bursting shell.

"The jewels I have brought back with me, only having turned into cash those I needed for expenses. I doubt if they are more than a fraction in value of what remains in the box. When the war ends I shall return to France and see if I can find the owner, though I doubt it, and make a return of his property. I shall expect a reward large enough to enable you and me to be married and set up housekeeping without risk. I have had the jewels valued, and they have been pronounced a fortune in themselves. Whatever we need while the war lasts will come from the sale of such articles as will produce the required amount."

Ellen approved of her lover's way of looking at it. They were married and set up a small store. Their little home and their business are all they require to make them content, for it is not great possessions that bring happiness—indeed, quite frequently such sudden visits of fortune destroy happiness. Besides, to the couple falls a measure of comfort that they are appropriating from the treasure accidentally found only what the owner should have given them for their stewardship. For George argues that had he not covered the box containing the treasure it would have likely been discovered and looted.

George is looking forward to the day when the war will be ended and he will go to France to make a settlement. He and Ellen often wonder whether the box will be there. Likely this depends upon whether another shell will expose it. When either side attempts to demolish its enemy's trenches it hurls so many explosives that should the location of the treasure be bombarded it is quite likely that its contents will be scattered to the winds.

Recently a correspondent sent to a London newspaper an account of the finding, after a battle which took place on the English-German lines, of scattered articles of great value. They were picked up by British soldiers and appropriated by them. Some of them were purchased from the men by officers. This looks as if another shell had burst near the treasure box and blown the contents over the battlefield. Despite George Elliott's honesty, it is doubtful if he will ever be able to make a return of his find.

ARMY PLANS TOLD BY WAR COLLEGE

How Troops Would Be Mobilized In Case of War.

NEED INTENSIVE TRAINING.

Division of Army General Staff Prepares Paper Approved by War Department—First Line Army Should Consist of 500,000 Trained Troops, Supported by Half Million Untrained.

The organization, training and mobilization of the militia and volunteer forces of the United States are the subject of a paper prepared by the war college division of the general staff of the army and approved by the war department. It shows that mobilization points and depots in all the states have been selected and says that "well digested systems of intensive training for new troops" have been prepared. The document tells exactly the procedure that will be followed in the raising of volunteer troops, the officering of them and numerous other details that at this time, owing to international affairs, are of interest to all men who might be called into service in the event of war.

"Under existing laws," says the paper, "and under conditions contemporaneous therewith it has heretofore been assumed that in the event of a war with a first class power the United States would require not less than half a million men for the first line, behind which could be prepared the greater army of citizen soldiers, upon whom our main reliance for national defense is traditionally placed.

500,000 For First Line Army.

"According to the recommendations of the war college division of the general staff, the first line should now consist of half a million fully trained troops, composed of the regular army and the reserve, which has been trained by service in the regular army, supported by an additional force of fully half a million citizen soldiers, prepared to take the field immediately on the outbreak of war, who should have had sufficient previous military training to enable them to meet a trained enemy within three months.

"At the present time the regular army at home could perhaps be expanded to about 100,000 men by the addition of a large proportion of recruits, and there would still be required for our first line about 400,000 citizen soldiers. This combined force would be insufficiently trained.

"The existing organized militia, if expanded to war strength, would furnish some 280,000 men, but these would not be available for all national purposes. To insure the entire control by the federal government over the required additional forces and the employment of such forces wherever the interests of the nation may require, they must be enrolled as federal troops, either as regulars or as volunteers."

The war college paper then discusses the relation of the organized militia to the volunteers and points out some of the difficulties that will have to be overcome. The remedying of these defects in the present militia law is one of the objects that the army bill, soon to pass congress, is expected to effect.

In discussing the raising of volunteer forces the war college states:

Raising of Volunteer Forces.

"Volunteer forces may be raised, organized and maintained only during the existence or imminence of war and only after congress shall have authorized the president to raise such forces. Congress could, however, by legislative enactment authorize the president to raise such forces in time of peace.

"The term of enlistment will be the same as that for the regular army exclusive of reserve periods.

"No person will be enlisted in the volunteer forces or mustered as an enlisted man into said forces who is not effective and ablebodied or who is under eighteen or over thirty-five years of age or who is unable to speak the English language, except that the superior age limit of thirty-five years is not applicable to those members of the enlisted personnel of a company, troop, battery, battalion or regiment of duly organized land militia who volunteer and are accepted as a part of the organization to which they belong if said organization be accepted as such for service in the volunteer forces, nor is it applicable to the re-enlistment in the volunteer forces or the muster into said forces of a man who has had prior enlisted service either in the regular or volunteer forces of the United States.

"The pay, allowances and pensions for all officers and enlisted men of the volunteers will in the event of war be the same as those provided for the corresponding grades of the regular army.

"Under our traditional policy of relying principally for national defense upon citizen soldiers the larger part of our land forces will not be fully trained at the outbreak of the war. It is more than probable that we shall have to employ some of them with little or no training as soon as they can be assembled in suitable units. * * * How much time will be available it is impossible to predict. It is reasonable to assume, however, that in the event of war with an oversea enemy it will be the time required for our enemy to establish at least a partial control of the sea sufficient to open the way for the landing of expeditionary forces."

The Three Piece In the Lead

Design by Franklin Simon & Co., New York.

FOR young ladies is this three piece suit of men's wear serge, which comes in navy, copenhagen, tan, white or black, and also of black and white checked worsted. A high belt, faille collar, finger pockets, horn buttons and adjustable bretelle are all interesting points. The hat is a quaint shape.

• • •

New silks are designed with even stripes four inches wide in white and red, in black and white and in blue and white. ANNA MAY.

THE WORD "LOVE."

In the Orient It Means to Like or Is Used to Express Good Will.

The word "love" has been more highly specialized in the west than in the east. In its proper English use it means only that ardent, amorous feeling which cannot be created by will and design. In the west the word "love" has been relieved of the function of expressing the less ardent desires, such as the terms "to like," "to have good will toward" and "to be well disposed toward" simply.

Not so in the east. The word "like," meaning "to be favorably inclined toward," is not found either in the Bible or in the Arabic tongue. In the English version of the Bible it is used in two places, but the translation is incorrect. In the twenty-fifth chapter of Deuteronomy and the seventh verse, "If the man like not to take his brother's wife," should be rendered "If the man 'consent' not," and in the fourth chapter of Amos, the fifth verse, "For this liketh you, O ye children of Israel," is in the original, "For this ye 'loved,' O ye children of Israel." In any standard concordance of the Bible the Hebrew verb aheb—to love—precedes these quotations.

So to us orientals the only word which can express any cordial inclination of approval is "love." One loves his wife and children and loves grapes and figs and meat, if he likes these things. An employer says to an employee, "If you 'love' to work for me according to this agreement you can."

It is nothing uncommon for one to say to a casual acquaintance whom he likes, "I must say, sahib (friend), that I love you!" I know of no equivalent in the Arabic for the phrase, "I am interested in you." "Love" and "hate" are the usual terms by which to express approval and disapproval, as well as real love and hatred.

From all this it may be seen that when the Great Oriental Teacher said to his countrymen, who considered all other clans than their own as their enemies, "Love your enemies," he did not mean that they should be enamored of them, but that they should have good will toward them. We cannot love by will and design, but we certainly can will to be well disposed even toward those who, we believe, have ill will toward us.—Abraham Mitrie Rihbony in Atlantic Monthly.

The Wherefore.

"Flubdub's home seems badly neglected."

"Well, his wife is interested in prison reform, better roads, pure politics and clean plays."—Louisville Courier-Journal.

How Gold Plate Is Made.

There is practically no solid gold plate. The so called gold plate services are silver gilt, and only a few pieces of pure gold are owned by the English crown or any other crown. It may interest our readers to learn how this fire, mercurial or water gilding—for it is known by all of these three names—is done. Pure gold and mercury are mixed into a paste. The silver article to be gilded has been chemically cleaned, is rubbed all over with this paste, which has been placed in a silk bag, just as the blue used in washing is put in a bag. When the piece of plate has been rubbed over it is perfectly white. It is then put into an oven, and gradually the mercury goes off in fumes, leaving on the article a deposit of pure gold, which has practically become one with the piece of silver and will last for centuries.—New York Post.

He Got Valuable Information.

The story is told of the times of Aretas Blood and the old Manchester locomotive works that a student came to Mr. Blood once and wanted to study the business of locomotive building in his vacation days. The student came well recommended, and Mr. Blood, who never had much use for these "tech" people, sent him down to the boiler shop and placed him in charge of the old foreman. The old man took the "tech" man around, and in the course of the inspection of the shop they came across one boiler on the inside of which was a man at work.

"How does that man get out?" inquired the "tech" man.

"Oh," said the venerable pilot, "he doesn't get out. We always count upon losing at least one man in building a boiler."—Manchester Guardian.

Surface Heat of the Sun.

We think the sun is pretty hot in summer when the thermometer goes up to 90 degrees in the shade or out. We begin to get sunburned a long time before it reaches that high. But right on the sun's surface it is between 10,000 and 15,000 degrees hot. That is, of course, a degree of heat which we cannot conceive. How much hotter still it is on the inside of the sun we do not as yet know.

Fashionable Calls.

"Who rang the doorbell just now, Katie?"

"A woman who found you out, ma'am."

"But I'm not out, Katie."

"I know, ma'am, but the woman looked as if that was what she wanted to know."

Pretty Careful.

"Bill is one of those careful, saving fellows, isn't he?"

"Yes; he puts the cork in the ink bottle between pen dips."—Yale Record.

Know the Outcome.

Sympathetic Father—Parted from Harry forever, have you? Well, perhaps it's just as well not to see each other for a day or two.—Life.

TODAY'S FASHION NOTE

Let one rest under the misapprehension that this is a dark and sombre frock, special attention is called to the fact that bright red braid outlines the dropped armholes, the pockets and front of the waist. No more contrast is needed on a background of soft blue satin. The full skirt has tucks for a trimming, the belt is of self-material, as are the cuffs and the collar is a three-ply affair, there being two sheer collars of white and blue linen and the foundation of blue satin. It takes a lot of words to describe, without competently expressing the beauty of the frock, yet its effect is charmingly simple. Six yard 36-inch material make the dress.

Pictorial Review Costume No. 6604. Sizes, 34 to 42 inches bust. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

GIRL GOES FIFTEEN MILES ON SKIS TO MARRY

Travels Over Deep Snowdrifts to Become Bride of a Young Los Angeles Business Man.

Los Angeles, Cal.—Skiing fifteen miles over deep snowdrifts to be a bride, Miss Helen Skinner, eighteen-year-old daughter of F. C. Skinner of Pine Knot Lodge, Big Bear valley, arrived recently in Los Angeles and was married to Wesley P. Turner, a young business man.

Miss Skinner, who passed last summer at Big Bear valley, had intended to leave there for Los Angeles earlier in the season, but was detained until all roads down the mountain had been washed out by the rains and lost under many feet of snow. When she learned that none of the roads would be opened until nearly summer she declared her intention of walking down to Los Angeles, no matter how far the snow extended.

It was then learned that a stage could make its way to Dobble, a dead mining camp on the crest of Big Bear, hanging 6,800 feet above the Mohave desert. So the dauntless little bride elect, accompanied by her mother and father, donned skis and walked from Pine Knot Lodge to Dobble, fifteen miles, over snow that lay an average depth of three feet. At Dobble the party was met by a stage from Victorville.

Fault of the Moon.

A partial eclipse of the sun was the subject of conversation in the little grocery store, where a number of villagers sat about awaiting bedtime.

A man happened to be present who was well versed in the subject under discussion, and he was asked to explain the curious phenomenon of an eclipse. He pointed out that the moon simply came between the earth and the sun and blotted out from view a part of the sun's surface.

"Waal," remarked an old veteran as he unburdened his mouth of a deluge of tobacco juice, "it sure is a pity the moon wasn't full, 'cause then we'd had a total eclipse."—Indianapolis News.

SEEK RICHES IN OCEAN.

Millionaires May Try to Raise Lusitania and Other Vessels.

Most plausible adventurers have gone within years even recent into the doubting atmosphere of Wall street to spin their tales of pirate gold waiting on the bottom of the sea in rotting hulks for the men of initiative and some cash. The tales and schemes of such have gone stale, but the young blood of Wall street has its longing for fair profit to be gained from honest risk and skillful planning.

That is why a new submarine engineering company is now a corporation fully capitalized to hunt the seas for abandoned treasure.

No mere adventurers won the ear of Percy Rockefeller, George F. Baker, Jr., Charles H. Sabin, Albert H. Wiggin and G. M. P. Murphy, who are among the investors in the treasure hunting concern.

Rear Admiral Colby Mitchell Chester, U. S. N., retired; W. D. Franklin, formerly a lieutenant in the United States navy, and George David Stillson, the engineer who raised the United States submarine F-4 off Honolulu, are the men who convinced Mr. Rockefeller, Mr. Baker, Mr. Sabin and the others of the excellent opportunities in attempting to salvage vessels that plunged to the bottom in stress of storm.

There is even talk that an effort will be made to salvage the Lusitania, or at least her cargo, including $2,000,000 in gold bullion and a vast fortune in jewels. She lies in 400 feet of water, and her position is well known.

Hard on Baby.

First we teach the baby to talk and then we teach him to hold his tongue.—Smart Set.

CARDS CHECK INTERVIEWS.

Soldiers on Leave Anticipate Queries With Printed Form.

German officers and soldiers home on leave or because of wounds are adopting the card system of heading off would be interviewers and inquisitive friends who want to know all about the war, according to a report from a small town in northern Germany printed in a recent issue of the Frankfurter Zeitung. The correspondent tells how he met a friend who was an army officer and how, after greetings had been exchanged, the officer remarked, "Read this before you ask any questions," and handed him a card reading as follows:

"I am wearing the uniform of the —th cavalry regiment.

"I have come unwounded from the front at N.

"I am on leave until ——.

"I do not believe there will be a further great advance in the east.

"I cannot tell, and even Hindenburg knows no more on this point than I do, when peace will be proclaimed."

Whiskers Coming In Again.

Whiskers are coming into style again. More important, the cost of losing 'em is going up. The reason? The war has raised the cost of soap, bay rum and the other articles used in barber shops about 20 per cent.

Clock 110 Years Old.

Helena, Mo.—Mrs. Clarissa Furgeson of this place has a clock which she says is 110 years old. The clock was first purchased by a Mrs. Tunnison of Greenville, Pa., and after it had been in the Tunnison family sixty-two years Mrs. Furgeson bought it in 1868. It has been in Mrs. Furgeson's possession forty-eight years. It is still running and keeps good time.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

For the Woman Who Wears Black.

One never questions the taste of the black frock, no matter what the occasion. This model in cashmere de soie, which is cashmere with a very high lustre, is particularly likeable. The gathered skirt is trimmed with two deep tucks, while the jacket is laid in plaits at the raised waistline. The front may be rolled back to form revers, or the front may be cut very deep, with attached revers, double capes and flare collar.

In medium size the suit requires 5 yards 54-inch material. The home dressmaker is provided today with the proper guide for cutting the jacket, which may be fashioned from any other material to be worn independently. The capes, the back and the collar are laid on a lengthwise fold of material. The sleeve and front sections are placed on a lengthwise thread above the cape section marked (H), and back. To the right of these come the underfacing, revers, cuff and back skirt section, all being laid on a lengthwise thread of the material.

If the deep front effect is to be used, the front edge of the front of the jacket will have to be cut off ⅝ inch forward of line of small "o" perforations and the underfacing omitted. Provision is made also, for shortening the length of the jacket to suit the individual taste.

Instead of the usual leather belt, the waist is finished with a band of silk material stitched with narrow soutache braid. The straight front and back panels give the flat line that women inclined to be stout particularly like.

Lustrous cachmere de soie in black makes the costume. The waist is belted in with a fold of self-material stitched with soutache braid.

CUTTING GUIDE 6739

RHUBARB PIE.—Line a deep plate with crust and put on a rim, then wash, but do not peel the rhubarb; cut in half inch pieces. If the stalks are very large cut them thinner. Fill loosely into the pie and heap the plate a little. Mix a heaping teaspoonful of flour with a generous cupful of sugar and a tiny pinch of salt; sprinkle over the pie and put on upper crust, which has several half inch gashes in it to let out steam. Wet the edge of under crust before putting on rim, then wet the rim before putting on top crust. Do not tuck crust in, but trim it off. Bake in a good oven until crust is brown.

Simple Charlotte Russe.—Take dry sponge cake or, better still, some lady fingers; place in dish, whip a half pint of cream until stiff, flavor with small teaspoonful vanilla and pile on the lady fingers or cake in a glass dish. If you have any currant or grape jelly drop a little on each one's portion when served.

Alaska Surprise.—Inside a mould of vanilla ice cream place some brandied peaches with whipped cream; perfume the whipped cream with a little chartreuse; freeze, unmold, place on a platter, decorate so as to cover all the ice cream with a fairly good layer of beaten whites of eggs, to which has been added a little chocolate powder; place in oven to color. Serve at once.

Orange Cake.—Yolks of five eggs, two cupfuls granulated sugar, two cupfuls bread flour, one-half cupful cold water, one-half teaspoonful soda, one teaspoonful cream tartar, whites of three eggs, grated peel and juice of one orange. Beat yolks until thick, sift sugar three times and add. Beat the whites of eggs stiff and add to first mixture, next the water and soda, then flour and cream of tartar sifted twice. Lastly add the orange juice and grated rind. Bake in a dripping pan, and when done cut in halves and frost with orange frosting. Frosting—Whites of three eggs, one orange juice and grated peel and powdered sugar to make stiff enough to spread. This cake is not good until the day after making. Be sure to use bread flour. Frosting may be made without whites of eggs.

Anna Thompson

LOOPED LOOP TO TOSS GERMAN TO HIS DEATH

Captured French Aviator Easily Got Rid of Foe In His Machine.

No stranger tale of escape from captivity has perhaps ever been told in the annals of any war than that narrated by Major de V., a French aviator, who was recently captured behind German lines when a dense fog caused him to lose his bearings. Captured by the enemy, this dispirited Frenchman was tied to his seat in his own aeroplane and ordered by a German aviator officer, who climbed in behind him, to fly low over the French lines and not to descend or to signal to his fellows under penalty of instant death from a bullet from the German's revolver.

By the simple process of looping the loop Major V. rid himself of his unwelcome passenger captive, who had not taken the precaution to secure himself to his seat. This maneuver, accomplished after a sudden swift flight to a higher altitude, was executed so unexpectedly that the German officer failed to guess his enemy's purpose and plunged from the machine to his death.

To Make Delicious Date Bread.

Mix one cupful of warm wheat mush, one-fourth cupful of brown sugar, one-half teaspoonful of salt and one tablespoonful of butter, then add one-fourth yeast cake, broken in pieces and dissolved in one-fourth cupful of lukewarm water, and two and one-fourth cupfuls of bread flour, once sifted. Toss on a slightly floured board and knead. Return to the mixing bowl, cover and let rise overnight. In the morning cut down and add two-thirds cupful of dates stoned and cut in pieces and two-thirds cupful of chopped English walnut meats. Shape into a loaf, put in buttered bread pan, cover and again let rise. Bake in a moderate oven fifty minutes.—Woman's Home Companion.

They Don't Like to.

"Why did she give up her lessons in painting on china?"

"Seems it was necessary to wash the dishes before you painted them. Now, you know, no girl is going to do that."—Louisville Courier-Journal.

Banner Day Yesterday Will be Followed by Big Tabernacle Week

With audiences over the week-end that totaled 8,900 people, the Peacock Evangelistic campaign gathered speed for its final week, by smashing all records for attendance and conversions since the institution of the Fulton revival. 1,600 people heard the evangelist Saturday night, while a throng of 2,300 crowded the Tabernacle yesterday morning. Yesterday afternoon 1,800 men listened to a sermon for men at the tabernacle, and 800 women attended a meeting at the First Methodist Church. Last night a record-breaking crowd of 2,400 gathered at the tabernacle, to hear the evangelist preach one of his most stirring sermons.

The count of trail-hitters swelled in proportion to the attendance, and the number of those who promised to lead a better life by accepting Christ as their personal Saviour totaled 250 for the five services, including 74 men who hit the trail at the afternoon meeting yesterday.

An extraordinary program will feature the last week of the evangelist's stay in Fulton, beginning with noon meetings for business girls tomorrow at the Presbyterian church. The girls will meet again Friday noon. A noon meeting for business men will be held at the Happy Hour theatre Wednesday noon at 12:20 o'clock. The ushers of the tabernacle will meet tonight at 8:15 at the Fulton Savings bank, when the plans for the final week will be thoroughly discussed and decided upon. At 2:30 Wednesday, Chorister Warth will meet his Bible class in the tabernacle, and at 9:30 Thursday morning a prayer meeting will be held at the State Street Methodist church.

The partial list of sermons for the week are as follows: Tuesday, "The Unpardonable Sin;" Wednesday, "Heaven," and on this evening the Order of the Eastern Star will attend in a body; Thursday, the sermon will be based on the 23rd Psalm.

Next Sunday, the closing day of the campaign, the morning sermon will be from the text, "Ye are my friends, if ye do whatsoever I command you." The afternoon sermon text will be the words of John third chapter, sixteenth verse. In the evening, Mr. Peacock will preach one of his greatest sermons, on the text, "Come for all things are now ready."

The list of the prayer meetings for the week is published in another column. The committee in charge of the revival will bend every effort during the last week to make the event an extraordinary success and it is expected that all attendance and conversion marks of the past will be shattered as a result.

COMMITTEE OF 175 WILL MEET AT LIBRARY TONIGHT

The committee of 175 citizens who will have charge of the arrangements for the celebration of Old Home Week in this city in July will hold a meeting tonight at the Library at 7:30 o'clock. Secretary D. S. Hollenga, of the Chamber of Commerce, requests the attendance of the entire committee, as those in charge wish to begin the work in earnest tonight. Tentative plans thus far call for a water carnival on the Oswego river and Lake Neahtawanta, a program of field sports, fire-works, band concerts, parades and a street carnival.

There is a great deal of work to be done in staging the affair and it is only by co-operation of those appointed to the various committees that it can be made a succeses. Several former Fultonians who now live in other parts of the state and country have already written to friends in this city, accepting the invitations given to attend the reunion, and a population mark of 30,000 people during the celebration is anticipated.

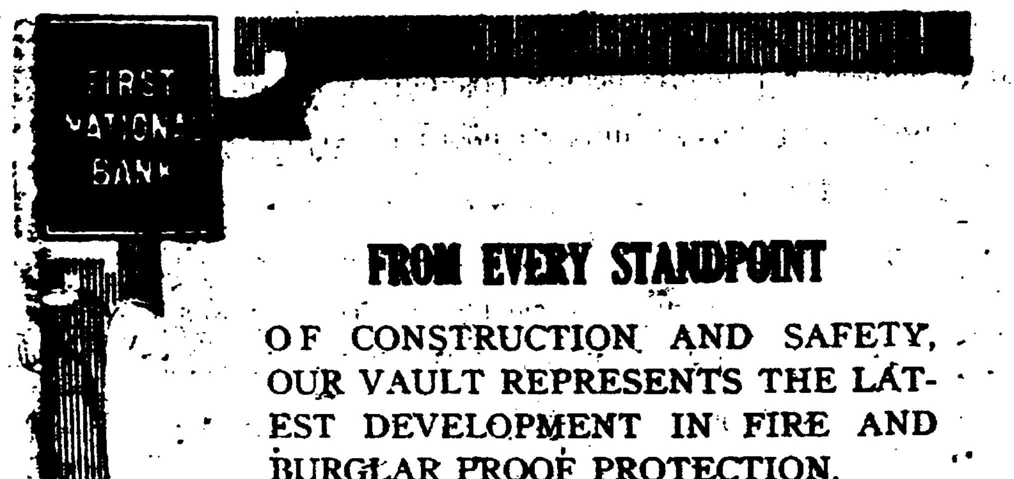
FIRST STREET TO BE PAVED IN JUNE

According to the latest advices from Albany received by Mayor Lewis, the State Department of Highways will let the contract for the paving of South First street on May 28, and the work will begin by the middle of June. The specifications call for a brick paving, 34 feet wide, with curbs. There will be only one trolley track upon the street, as at present.



Last Minute News

(By United Press.)

Columbus, N. M.—Four bands of Mexican bandits are moving north in the rear of the column of American troops, committing depredations and spreading terror in the villages as they go. The Mexicans always keep out of sight, but tell the natives that they are chasing the "Gringoes" from Mexican soil. They stop whenever the Americans halt, and hide or disarm if General Pershing's men approach them.

In a running fight this morning one trooper of the Seventh Cavalry was killed and two are reported wounded.

932 CONVICTIONS OF MOTORISTS

Metropolis Figured Heavies First Half of May—Fines Vary From $5 to $100

Albany—No less than 932 persons were convicted during the first eighteen days of this month for violations of the motor vehicle law of this State. Fines imposed aggregated $13,413, ranging all the way from $1 to $100. Of the total convictions 785, or 84 per cent. occurred in the courts of Greater New York. The activity of the metropolitan authorities in the enforcement of the motor vehicle law is strikingly shown from figures just compiled from the records of convictions now being kept under the direction of Secretary of State Hugo. The influence of the pleasant weather of the last three weeks is reveald in the fact that th convictions thus far in May nearly exceed the total during the monhs of March and April.

A desire to hit only the high spots brought 669 persons before the courts for conviction during the eighteen days. The records show that the New York courts do not mince matters in handing out fines, nine-tenths of the emulators of speed kings handing over $25 and upwards. In one instance a fine of $100 was imposed, the limit allowed by the Callan law. The greater part of the arrests and convictions for speeding occurred in New York City. The records show that smaller fines prevailed in the upstate cities, some being as low as $5.

During the first half of the month, 23 persons with cars minus rear lights were convicted. Thirty-one were arrested for reckless driving and as a rule the records show heavy fines imposed. Twenty-nine did not bother to secure a license and were nabbed. 17 became entangled in the meshes of the law for running without lights. Stiff fines appear to be the rule for violations of the local ordinances requiring the autoist to stop while a street car is at a standstill.

Technical violations of the law, running all the way from inadequate braks to a rear license plate swinging in the wind, resulted in 125 convictions during the last eighteen days. A few persons got into trouble on account of using a number plate belonging to another or in rounding a corner without sounding a warning. In one case the records show that 20 days was meted out to an operator who in an intoxicated condition was driving his car. Up to and including May 15th this year 226,000 motor vehicle, including those of dealers, have been registered with Secretary of State Hugo as compared with 160,000 a year ago this time.

GIANTS' RECORD IN DANGER

Fulton High School Team Makes It Six Straight By Defeating Baldwinsville H. S. 27 to 5.

Falling on Pratt's curves, if he had any, with a vengeance, the Fulton High school baseball team won its sixth straight victory of the season Saturday, by overwhelming Baldwinsville High school, 17—5. Barnes, pitching his second game in two days, was again pariemonious with the base hits, and for a time threatened to eclipse his record of the day before, when he allowed Oswego High school only three safe blows. The Beeville boys managed to garner four safeties off the delivery of the Fulton star hurler Saturday, but it was only because the local boy was not pitching for a record, and when his teammates had the game well in hand he eased up. The locals found Pratt with little but his glove, and made thirteen hits, four of which went for extra bases.

The second inning was a nightmare for the scorer, for in this frame the Fultonians batted through their entire order, and scored eight runs. The fusillade of base-hits had the Beeville infielders ducking in all directions, and Pratt asked for relief, but the substitute pitcher suddenly had pressing business down-town. In the third, not satisfied with a lead of nine runs, the Fulton lads hung up six more tallies, but after that they took things easy, and a number of the errors charged up to the locals were deliberately made, in order that the game might be a trifle more interesting to the spectators.

Lewis had a great day at the bat, getting four hits out of six times up. Dingle, Bray and Reynolds were the only locals who did not connect safely with Pratt's slants. Barnes fanned twelve and isaned no passes.

WOMEN ORGANIZE TO MAKE BANDAGES

Under the chairmanship of Mrs. W. C. Lane, the women of Fulton who are interested in rendering aid to the United States Army by the preparation and donation of surgical bandages will meet at the Library this afternoon. Officers of the local branch will be elected and regular meetings will be held in the future, at which the ladies of the organization will work in making the bandages. Ten million bandages have been requested by the War Department, and there is a pressing need for them at the present time.

Road Building Day and Frequent Club Runs Interest Club Men

The committees recently appointed to handle the membership campaign, good roads day, and club runs of the Fulton Automobile Club, will soon hold their first meetings and begin actual work on the various projects.

The membership committee is composed of Dr. E. J. Cusack, Frank LaPorte, G. C. Chauncey, Fred Blake and Almon Bristol. An active campaign for new members among the automobile owners of the city will be carried on, and the residential districts of the city will be marked off into blocks, one for each member of the committee.

The Good Roads Committee will work in conjunction with Secretary Hollenga and the Chamber of Commerce Committee on the plans for Good Roads day, which was scheduled for Friday, May 26, but has been postponed in deference to the tabernacle services. No new date has been decided upon yet, but the event will have place sometime in the early part of June. The arrangements made by the joint committees to date include the presentation of a request that Mayor Lewis declare a public holiday on Good Roads day, so that all the stores may close and the business men may join in the work. Sixth and Seventh streets will be improved by a volunteer force of road builders composed of the citizens of the city, and every able-bodied man will be urged to get out with a pick and shovel and get some good exercise in improving the city streets. The committee of the Automobile Club for the event comprises E. C. Stevens, Dr. F. E. Fox, Mayor Lewis, H. P. Allen, and D. S. Hollenga.

For the club runs, the first of which will be held early in June, the committee is composed of E J. Penfield, A. T. Jennings, H. L. Van Sandford, J. H. Howe and George Fuller. The destination of the first run has not been decided, but the committee has several points under consideration. The members of the club will enjoy a dinner at the end of the run, and invitations will be extended to non-members of the club to participate.

FOURTH WARD CITIZENS ENTER PROTEST; SEWER NEEDED IN WELLS STREET

Mayor Lewis has received complaints regarding the condition of Wells street in the Fourth ward, and the matter will be brought to the attention of the Board of Public Works at its meeting onight. Residents in the street are subjected to a deluge ever y time a heavy rain falls, and during the past week the street has been inundated most of the time, because of the surface water from Broadway and other higher streets flowing down to the lower ground, where there is no surface sewer to carry off the water. Practically the only solution of the difficulty, according to the Mayor's view, would be the installation of a surface sewer in Wells street.

Residents of Rochester street between 5th and 7th streets, have complained of the condition of the road in that vicinity, and the Board will be asked to remedy it. It is said that a resident of the street has been throwing sand in the road during the past week and in some parts it is almost impassable for motor vehicles.

The Board will take up the matter of a permit to Edward Van Amburg, of West First street, who wishes to instal a gasoline tank under the walk in front of his store. There has been much agitation over the question of a permit, and strenuous objections have been made, which the Board will discuss tonight.

THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 441. TUESDAY, MAY 23, 1916 *Price, One Cent*

THE CITY'S CLERK AS A PURCHASING AGENT

Board of Works O.K.'s Modern Way of Making Purchases

By a unanimous vote of the Commissioners at last night's meeting, the Board of Public Works took one of its longest strides toward greater efficiency by passing a resolution establishing a requisition system in the city departments which come under its control. Hereafter, all purchases, which have been made in the past by the Superintendent of the Board, and other department heads, will be made on requisition blanks which will be obtained from the City Clerk, and all accounts will be audited by the City Chamberlain.

The resolution adopting this system, which was introduced by Commissioner Allen, after a conference of the Commissioners was as follows:

Commissioner Allen introduced the following and moved its adoption:

Whereas, it is desirable that the affairs of the City of Fulton be kept upon an accrued basis so that the encumbrances and calls upon the various funds of the city may at all times be known, and the financial affairs of the city may appear accurately and fully at all times on the books of the City Chamberlain and information in relation thereto easily accessible to the people of the city, and

Whereas, for such purpose it is necessary that purchases for all of the city departments should be centralized and made through the medium of the City Clerk, and proper forms and blanks therefor having been printed.

Resolved, That hereafter all supplies for the departments in charge of the Board of Public Works shall be made by the City Clerk upon requisition and purchasing order to be in the substantial form and so far as possible upon the blanks furnished by the City Clerk, and that the City Clerk be and he hereby is authorized to procure and furnish to various departments under charge of this Board the necessary orders and requisition in the same form and substance as those now on hand.

Ayes: Wiltsie, Allen, O'Brien.

Nays: None.

The meeting last night was the longest in the history of the present Board, and nearly three hours elapsed before the adjournment. An unusual amount of complaints and requests were made, but lack of funds necessitated the tabling of a majority of the matters, until some means of obtaining the money for the work is devised.

Alonzo Clark presented a petition signed by some 25 residents of Wells street, between Broadway and Emery street, which requested that the Board construct a surface sewer on the street, to carry off the rain water which flows down from the higher streets in that vicinity. Water stands two feet deep on some parts of Wells streets and the heavy rains of the past two weeks have made the thoroughfare impassable. The Board last night instructed City Engineer Hill to make a survey of the situation, approximate the cost of the storm sewer, and report his findings at the next meeting of the Board.

Verner Calkins, a real-estate operator, who is developing the Prospect Park tract on the west side of the river, petitioned the Board for a water main in Lyman avenue, where Mr. Calkins has recently erected two houses. Mr. Calkins is going to install a sewer on the street at his own expense, and will dig a ditch with a shelf for the water pipe. The city's total outlay will be for the water pipe alone, and Mr. Calkins requested a 4-inch pipe. The cost of a 4-inch main would be $224 for the 250 feet of the street, and as this expenditure was deemed too large, a 1 1-2 inch main was decided upon, which will be constructed of a cheaper grade of pipe, and will cost a little more than $50. In view of the small expense, due to Mr. Calkin's excavating for the pipe, the members of the Board agreed that the work should be done now, rather than later, when the city would have to bear the total cost of the work.

City Engineer Hill made a strong argument for the larger pipe, on the ground that the improvement would then be permanent and that the water pressure in that section would then be sufficient to cope with any fire, but although most of the members agreed with his views, the question of funds at hand made the final adoption of the smaller pipe necessary.

In making application for the dirt and gravel which will be excavated in East First street, when the paving starts next month,

THE WEEK'S TABERNACLE PROGRAM STARTS WITH A HURRAH TO-NIGHT

The first gun of the final week's campaign at the Fulton tabernacle was fired at noon to-day, when a meeting of business girls was held at the Presbyterian Church. The girls were guests at a light luncheon and afterwards listened to a short address. Another meeting of the girls will be held Friday at the church.

To-night, Evangelist Peacock will speak on "The Unpardonable Sin." Several of the prayer-meeting groups will meet at the Plaza at 7 o'clock and march in a body to the tabernacle, where seats will be reserved for them. To-morrow night the sermon will present the evangelist's view of "Heaven."

To-morrow noon, at the Happy Hour theatre a monster mass meeting of business men and women will be held, commencing promptly at 12:20 o'clock. Mr. Peacock will address the meeting. At 2:30 to-morrow, Chorister Warth will meet his Bible class at the tabernacle.

The Order of the Eastern Star will attend the services to-morrow night in a body, meeting at their lodge room down town. Several prayer meetings have been scheduled for to-morrow, and the rush of the final week will keep every member of the committee and the evangelist's forces at top speed, until the closing day of the campaign, next Sunday.

New York—The Grand Jury in the wire tapping case found a true bill against John A. Kingsbury and William H. Hotchkiss, his counsel. Kingsbury is head of the Charities Department.

City Wants Protection Against Overhanging Electric Signs

Alderman E. O. Baker, of the Third Ward, described the deplorable condition of East 3rd street, south of Broadway, and East 5th and 6th streets south of Broadway, which are at present covered with sand, in some places several feet deep. The Alderman wishes to use the 1st street dirt to improve these streets. He said the sand and grit blew over the lawns and houses during every high wind, and was a source of great annoyance to the residents in the streets in question. The Board deferred acceptance of his petition until the 1st street paving contract is let by the State Highway Department.

Resident Manager Burkhardt, of the Fort Stanwix Canning Company appeared before the Board to request the aid of the city in improving Phillips street from West 2nd to West 4th. The street is almost impassable now, and if it is allowed to remain in its present condition farmers bringing produce into the city during the rush of the canning season are likely to mee twith serious difficulties. He said the company was willing to put one team of horses at work if the city would also put one team on, and announced himself ready at any time to co-operate with the Superintendent of Public Works in improving the street. Commissioner O'Brien expressed gratification at the spirit displayed by Mr. Burkhardt, who only recently came to this city, and remarked that the city should do everything in its power to enable the farmers to have easy access to the city, since the city merchants are all making an effort to solocit the business of farmers. He said gravel could be obtained only a short distance away, at the Case farm, and recommended tht the work be started as soon as possible. The Superintendent of Public Works will confer with Mr. Burkhardt as soon as the weather becomes favorable, with a view to improving the condition of the street.

Mayor Lewis read a complaint received that a Mr. Crandall had dumped dirt from a cellar excavation in Academy street. The

(Continued on Eighth Page)

EMPLOYMENT AGENCY'S JOB DIDN'T MEASURE UP TO EXPECTATIONS

William H. Minor, of this city, is of the opinion to-day that the employment agency game is "no business." Rather than again submit to the rough handling he received from 24 Poles yesterday, he says he will become an efficiency engineer. Mr. Minor's entrance and exit into the employment agency profession were almost simultaneous, and the exit, particularly, was not in the least comfortable.

The Inter-state state Employment Bureau, of Geneva, engaged Mr. Minor by letter yesterday to hire 150 men for work in an aluminum works at Geneva, where the rush of war orders has caught the manufacturers without adequate forces. The lowest rate of pay, according to the instructions given Mr. Minor, was to be $2.50 per day, for eight hours, and skilled men could earn $2.80. He had no difficulty in rounding up 25 men, principally from the West Side, to take the trip, and the squad left this city with light hearts for the job.

When the train reached Woodard another agent of the employment agency was there to meet them, and he said, "Get off, we change here." The men who could speak English asked the reason for the change, and demanded to know their destination. The new comer told them the plans had been changed and that they were to go to Messena Springs. It happened that one of the Poles had worked in Messena Springs, for low wages, and questioning developed that his old place of employment was the ultimate destination of the Fultonians.

The Poles rushed Minor and demanded their return to Fulton, threatening him with violence if he did not produce tickets. Minor finally complied, and when the men arrived at the city, they took Minor with them to Police Headquarters, where they asked Police Captain Norton who was going to pay them for their lost day. The fact that few of them were working when they were hired by Minor did not prevent them from demanding money for their trip. Minor had no money, and Captain Norton advised the men to get an attorney. Herbert Fanning was engaged, and he told the Poles that their chance of getting compensation was very slim.

Before departing for their homes, the Polish contingent unanimously voted to investigate all future offer of employment from employment bureaus.

THE "ROASTER" APPEARS

We have in mind the man who asks his newspaper publisher to "roast" some one, somebody or something. He lives in every community, so that never a day passes over the head of a newspaper man, somewhere, who is not approached by the "roaster" with the statement that he is a regular subscriber and a "constant reader" and is therefore entitled to the courtesies of the paper. He promises the weight of his moral support, but in ninety-nine out of one hundred instances prefers to allow the publisher to assume all responsibility in the process of "roasting" the something, somebody or some one not measuring up to his idea of a standard. He enjoys another distinction, this "constant reader," and that is that under no circumstances should his name be used in connection with the warming up which he desires to have fired at the undesirable object.

The "roaster" is a strong believer in maintaining a principle, but his idea of the meaning of the word is not entitled to follow a capital P. He wants a newspaper in his community to stand for Principle, which in his consciousness should be an institution that will not spare the use of the tar brush on anything not affecting himself or friends. Were he running a newspaper there would be something doing every minute. He would print hair-raising stories for the especial benefit of bald-headed men. As a jollier of the man who is at the helm and to encourage the poor devil he agrees to pay into the hands of the publisher, just for remembrance, and to buy paper, ink and other condiments entering into the manufacture of a sheet the price of as much as six months' subscription.

The "roaster" has another side to his nature, which is that he seldom bestirs himself to prevent the "pulling" of a raw deal upon the taxpayers. He too often knows all about the nature of the deal in advance, but it would never do for him to become identified with a protesting movement—no indeed, for that might injure his business or profession. And still the wonder grows that such a man is like the British army of 3,000,000 men who make so little noise.

REAL OPTIMISM

Why do newspapers and feature writers persist in representing the country as being universally prosperous, when facts do not bear out the assertion? The Editorial has repeatedly sought to point out the fallacies of the prosperity arguments, not because it is pessimistic, but because it deems it better for everyone to have conditions presented as they really are, rather than to inspire a false belief which will leave the nation unprepared for the conditions that are sure to follow with the withdrawal of the causes that now contribute to prosperity in certain lines.

We read that our foreign trade is unprecedented, the balances in our favor amazing, bank clearings of unheard-of proportions and that the railroads have more traffic than they can handle. And we might well think that the country is prosperous. Not so many years ago transactions were reckoned in thousands, then in millions, and now we speak of billions with all the nonchalance assumed by a youth buying his best girl a glass of soda water. These figures, however, represent totals, only. What would be thought of a bank, 90 per cent. of whose deposits were to the credit of a single individual, subject to his demands? Yet, a condition very similar to that exists in regard to our so-called prosperity. It is largely confined to certain branches of industry and is dependent upon conditions which may quickly change and which are entirely beyond the control of those who are profiting thereby.

Based on returns for the first quarter, it is estimated that our foreign trade this year will amount to $6,000,000,000, of which two-thirds are exports and the balance imports. Thus the trade balance in our favor at the end of the year will be $2,000,000,000. Figures like the foregoing are astounding and incomprehensible to the human mind. The trade balance would mean $30 for every inhabitant of continental United States. Confronted with such colossal figures as evidence, it might naturally be assumed that we are enjoying prosperity of equal magnitude. But, when analyzed, the fact is revealed that the exports are not fairly distributed among the diversified industries of the land, but consist in overwhelming proportion of certain products. While reports of great general prosperity are numerous, yet, when consulted, individuals are unable to locate it except in spots. In the Chicago Tribune, there recently appeared a McCutcheon cartoon which told the story at a glance; ammunition employment at abnormally high wages arousing discontent among normal wage-workers.

Someone will say, "Don't talk hard times. Preach prosperity and we will be prosperous." The remedy is an excellent one but, like other medicine, it should be taken with common sense. Great evil may result from repeatedly affirming that prosperity is ubiquitous. Thousands of individuals and firms are struggling against a depression in business which has been forced upon them because of the wonderful prosperity that is being enjoyed by others. Imagine the effect upon a man struggling to make both ends meet, when he reads that "Business is booming in every quarter of the union. Dividends were never so remunerative and wages never so high. Every line of legitimate business is doing remarkably well." Unless he realizes that he is the victim of widespread conditions he must inevitably conclude that he is unable to hold up his end in the fight for business existence or is affected by local conditions that he cannot analyze, and, consequently, he succumbs to discouragement and despair.

Optimism is a commendable and desirable virtue. It is not optimism, however, which deceives itself or seeks to mislead others. True optimism is not exaggeration, it does not distort or misrepresent facts. It looks squarely at conditions as they are and hopes for and believes in the ultimate triumph of the good. What we need, then, is real optimism for the present and future and preparedness, industrial as well as military, for conditions which are about to be thrust upon us.—The Editorial Magazine.

Days You'll Never Forget

THE NIGHT YOU TRIED TO HIDE YOUR SWIMMING TIGHTS IN THE MULE'S STALL

Tough Luck.

An old Cheshire woman called to her lord and master, "Jabez, will t' coom t' tha' baggin?" "Baggin" in Cheshire means dinner.

"What's use? Ah canna foind my old weskut."

"Well, it's warm enough. Tha can eyt wi'out thi old weskut."

"Nay, that Ah canna. Ah've left my false teeth i' t' peckets."

"Then tha'll ha' to starve. Ah gave that weskut to t' ragman this morning."

This Happened in Boston.

Teacher—Emerson, what is "spilling the beans?"

Emerson—Slang, ma'am, and vicious slang at that.

Teacher—I mean can you give me the definition of it?

Emerson—Yes, ma'am. "Spilling the beans" in its best colloquial sense is the unpremeditated extemporaneous promulgating of information concerning which one should have been much more reticently inclined. — St. Louis Post-Dispatch.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

If a man, professional or otherwise, fail in his work, the causes will probably be found among the following:

1. Lack of love for his task.
2. Lack of tact in his methods.
3. Lack of care for his appearance.
4. Lack of regard for the views of others.
5. Lack of thoroughness in doing things to a finish.
6. Lack of faculty in winning support.
7. Lack of organizing power to keep out of the ruts.
8. Lack of gumption in making knowledge practical.
9. Lack of patience in doing drudgery, and too great haste to cull the flowers.
10. Lack of moderation in things desired, and an over estimate of actual needs.

* * *

He has no enemy, you say;
My friend your boast is poor,
He who hath mingled in the fray
Of duty that the brave endure
Must have made foes. If he has none
Small is the work that he has done.
He has hit no traitor on the hip.
Has cast no cup from perjured lip,
Has never turned the wrong to right;
Has been a coward in the fight.

* * *

If a customer enters the store and asks for a brand which you don't handle, don't try to convey the idea that you haven't got it because you don't think it is good enough for you to have in your stock. By assuming such an attitude, you are insulting the customer by accusing him of wanting to buy something that isn't worth selling. By insulting his judgment, you send him away offended, when, if left to himself, he might have bought something.

* * *

If you think you are beaten, you are;
If you think you dare not, you don't.
If you'd like to win but think you can't,
It's almost a cinch you won't.
If you think you'll lose, you're lost,
For out of the world we find
Success begins with a fellow's will.
It's all in the state of mind
If you think you're outclassed, you are,
You've got to think high to rise.
You've got to be sure of yourself before.
You can ever win a prize.
Life's battles don't always go
To the stronger or faster man;
But soon or late, the man who wins.
Is the man WHO THINKS HE CAN.

* * *

If you will you can, but don't forget that the sooner you do it, the better for yourself. DO IT NOW.

* * *

Get that habit of doing it NOW. Quit knocking NOW; start boosting NOW!

* * *

FULTON is just what you think it is. If you are right, FULTON is right; if you are wrong FULTON is wrong.

* * *

Do you think that you can build a city with mere sayings? No, sir, you have to work also.

* * *

A motorist in a mudhole becomes a convert to good roads. Your town is the best town on earth because it is YOUR town.

* * *

Let us rejoice if God is trusting us with such a large share in the conduct of his universe that it takes all the will power we have to do what He asks.

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 deegrees, 02 minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

New York Ontario and Western Railway Co.

By Costello, Burden, Cooney and Walters, Attorneys for Petitioner, Office and P. O. Address, 935-955 University Block, Syracuse, New York.

"Do as Rome Does."

The saying "Do as Rome does" originated with St. Ambrose in the fourth century. It arose from a diversity of the observance of Saturday. The Milanese made it a feast, the Romans a fast. St. Ambrose, being asked what should be done in such a case, replied: "In matters of little consequence it is better to be guided by the general usage. When I am at Milan I do not fast on Saturday, but when I am at Rome I do as they do in Rome."

IN THE WORLD OF SPORT

Ed Pfeffer, Brooklyn's Great Pitcher.

Photo by American Press Association.

Ed Pfeffer, sometimes nicknamed "Jeff," is considered by many fans the best right hand pitcher of the Brooklyn baseball club, even better than Wheezer Dell. So far this year he has pitched only fair ball, but he is a hot weather hurler and has not reached his best form. Pfeffer joined the Brooklyns in 1914 and immediately attracted attention. At the beginning of the 1915 season he did not make much of a show, but toward the end of the season won many of the games that kept Brooklyn a pennant contender almost to the end of the race. He is a brother of Frank Pfeffer, who helped win several pennants and a couple of world's championships for the Chicago Cubs.

Harness Racing's Half Century.

Light harness racing, as now conducted, celebrates this season the close of its first half century. It was in 1866 in Buffalo that the first meeting was held. The originators and executors of the scheme included such well known men as E. T. Bedford, General B. L. Howard, C. J. Wells, W. G. Fargo, C. J. Hamlin, Jewett Richmond and M. P. Bush. They did things on a big scale, hanging up purses totaling $12,500—a tidy sum for the initial and experimental race meet—and thereby luring to Buffalo the cream of the diagonal and lateral gaited stars. In that meeting in Buffalo the free-for-all race resulted in a victory for Dexter, which defeated George N. Patchen, Jr., and Rolla Golddust in straight heats, timed in 2:27¼, 2:29 and 2:25. This was amazing, and the horsemen talked of the feat constantly until the last day of the racing, when Dexter, in a special event, under saddle, did the three heats in 2:21¾, 2:26 and 2:18. That final heat was the source of wonder throughout the land.

Jack Moakley a Great Trainer.

Despite efforts that have been made to belittle the ability of the "only" Jack Moakley, Cornell's track trainer, he stands out above any other college trainer in the country from the viewpoint of success with his men. Moakley has shown for more than a decade that he knows an athlete and, better still, knows how to bring out his highest ability. He has trained some of the world's greatest athletes and has developed more winning track teams in the intercollegiate championships than any other college trainer in the United States. Moakley taught John Paul Jones many of the finer points of cinder path competition, despite some opinions to the contrary. He did not make Jones, to be sure, because Jones was born a wonderful runner, but he certainly kept the former world's record holder for the mile in shape to retain his superiority while he was in competition.

Seek Gold Challenge Cup.

Albert L. Judson, president of the American Power Boat association, recently announced that instead of allowing the gold challenge cup of the association to remain in the custody of the Detroit Yacht club, an eastern yacht club will challenge for the trophy this summer with a new hydroplane. The new challenger is now in progress of construction and will be novel in design. Her builders believe she will be a genuine surprise to those interested in the construction and sailing of these high powered boats of extreme speed. Construction is to be along lines which have already been proved successful, and the men who are building her are confident that she will be able to defeat Miss Detroit or any of the craft which have as yet been shown on Lake Michigan.

Willard May Meet Fulton.

Fred Fulton, the Minnesota giant, may get a try at the heavyweight championship on next July 4. Tom Jones, manager of Jess Willard, has made an offer for Fulton to meet Willard. Willard is now with a circus touring the west, but it is believed he has a contract which will permit his withdrawal whenever he is called upon to defend his title.

As She Saw It.

A young girl who had been born and brought up in a boarding house atmosphere was suddenly transplanted into a wealthy home. After she had been there a month a friend of her patroness said:

"I expect you notice a great difference between your present and your former surroundings."

"Oh, yes," said the girl. "There when a man and a girl walk out together everybody always says, 'Will he marry her?' Here they say, 'Will she have him?'"—New York Times.

WEST POINT CADETS SEE BIG GUNS WORK

The West Point graduating class, 125 cadets, invaded the Sandy Hook proving grounds to be initiated into the mysteries of the government's artillery, from the sixteen inch rifle (the lower picture), the mightiest weapon in the world, throwing a 2,400 pound projectile twenty-two miles, to the tiny pompom rapid fire anti-air craft gun (seen here also), with its bark like that of an angry Skye terrier, shooting a vicious little one pound bursting shell some two miles into the air. The sixteen inch gun shoots a shell one and one-half times as large and more than twice as far as the German 42 centimeter howitzer.

Photos by American Press Association.

MUNICIPAL MOVIES MAY SOON COME INTO VOGUE

One Kansas Town Already Owns the Nickel Theater.

Having rounded up 192 municipal lighting plants, 17 gas plants and more than 200 water plants, Kansas is now after municipal ownership of its motion picture theaters. One Kansas town already owns its motion picture house and refuses to let any private competitor come in. Three other towns are arranging for municipally owned and conducted movie-houses.

Kansas believes in municipal ownership not because of any theoretical views, but because of actual experience, says the Kansas City Star. Community after community has entered the field of electric lighting, for example, and without exception they have lowered their rates and improved their service. All the publicity of utility monopolists avails nothing in the face of the concrete facts as Kansas has discovered them. You can't tell a Kansan that municipal ownership is a failure and get away with it when the city light plant which he patronizes has cut his bills in two and given him better service.

Kansas has a public utility commission, but there is no "certificate of convenience and necessity" provision, as in Wisconsin, which gives the private company in the field an everlasting monopoly and a perpetual franchise. Corporation "regulations" tried to tack such a provision on to the Kansas law at the last session of the Kansas legislature, but the municipal ownership people in Kansas proved too much for them.

If he doesn't like the way the public utility corporation does business the Kansan demands as an inalienable right that he be free to tackle the business himself. The welfare of a whole community is more to him than the fictitious "right" of any eastern capitalist to bleed a people indefinitely merely because he has an investment made originally for that purpose.

If the individual capitalist can do business on the same basis as the city—and he usually can if he is forced by competition to do so—he is welcome to continue in operation. If he can't he may seek other investments in other states, where there is greater reverence for "widowed and orphaned" stockholders and the divinity of 7 per cent.

STATE CAPITOLS TOO SMALL.

Many Not Large Enough to House the Offices.

One-third of the states of the Union find their capitols inadequate to accommodate the increased state activities that have grown up in recent years, according to data gathered by the Columbus (O.) chamber of commerce, and are wrestling with the problem of finding additional room. To aid the Ohio building commission the organization has secured information from many states on the manner in which the problems are being solved.

The majority seem to favor the plan of erecting a new office building as an annex to the present capitols. In some states the plan has been to build additions to present structures or to remodel the buildings to make more room.

Washington has gone in for a comprehensive group plan of state buildings to cost more than $6,000,000, while California is bringing to completion a new capitol costing a similar amount. Each is located in a large park. Compared to these the Ohio plan to spend little more than $1,000,000 is thought to be very modest.

At Madison, Wis., is being completed a new statehouse that has cost $7,000,000, while in Nashville, Tenn., the plan is to build a separate office structure. The same sort of plan is entertained in Nebraska. Michigan, like Ohio, is getting ready to provide additional room for state departments. In none of the states does it appear that the rent of outside quarters has been made a political issue, as it was in Ohio.

Choir of Policemen.

Charles L. Safford, choirmaster of St. George's church, New York, is proud of his chorus of 100 policemen. This organization came into existence a few months ago, when the singing of a policemen's quartet suggested to Commissioner Woods the possibility of a chorus. He enlisted the interest and help of Mr. Safford.

Even th' seasons have their little tiffs. There's always a coolness between autumn an' spring.

ABOUT THE TOWN

Several Fulton motorists were ordered to appear in City Court yesterday morning for failure to light the front and rear lamps of their cars after dark. Motor Policemen Brown and Smith served notice on most of the offenders, who were ordered to obey the city ordinances in the near future, and were warned that a repetition of the offense would be punished by a fine.

* * *

Mr. Harris Rosenbloom is responsible for this one:

Mr. R. "Did you hear about the trouble at the woolen mills?"
Fall Guy. "No. What trouble is that?"
Mr. R. "Yes four men met with an accident Saturday night."
F. G. "Yeah? Badly hurt?"
Mr. R. "Well, they're dying to-day!"
"The quality of mercy is not strained, etc."

* * *

Although the general public is not fully aware of the fact, the city came very near being Mayorless twice last week. His honor, Mayor Lewis narrowly escaped serious injury in two instances when his large, luxurious motor car skidded on the wet roads which obtained, as James R. Somers says, in this section during the past week's deluge. While returning from a tour early in the week, the Mayor attempted to negotiate a sharp turn south of the city, and his car whirled around, crossed a ditch and started to run down a bank into a corn field. Some of the sleeping passengers, (for the hour was late) woke up with the hazy impression that the Golden Gates were open to receive them, and commenced to feel in their pockets for their tickets of admission.

On the Pulaski turnpike, later in the week, the Mayor's car again skidded while nearing the top of a hill, and turning completely around, started to run back down the ineline. Luckily the Mayor's skill at the wheel prevented an accident.

* * *

Residents in the vicinity of a creek near the eastern limits of the city are thinking seriously of organizing a boat club, if the rainy season continues much longer. One adventurous citizen embarked on the swollen stream with a row-boat last week, took soundings of the water-way and reported it navigable as far as the Mead place.

* * *

Out of town employment bureaus who send agents into this city to employ men will do well to see that the agents have a definite idea of the nature of the work, and its location, in the future, if they wish to avoid the repetition of the incident of yesterday, when an employment agency man hired men here, telling them they were to work in Geneva, only to learn, when half way to the destination, that his manager had decided to send the men to Messena Springs. Some employment agents count too much upon the good nature and gullibility of foreigners, who occasionally demand a square deal, as they did yesterday.

* * *

If suggestions made at the meeting of the Board of Public Works last night evolve into an ordinance, every store owner in the city who has an electric or wooden sign suspended over the sidewalk in front of his store will be required to give a substantial bond, protecting the city from litigation, should the fall of a sign result in injury to a pedestrian. While some of the members of the Board contend that a sign on the building suffices for advertising purposes, there are many merchants who would not give much for a sign that is not legible at some distance, and it is likely that any attempts at stringent legislation concerning the signs will meet with determined opposition on the part of these same merchants, although there are a number of signs in the city now which do more harm than good to the establishment they advertise, because of their antique construction and battle-scarred appearance.

* * *

A song of Bert Williams' entitled, "Ah'm All In,—Out—an' Down!" might be termed a very appropriate melody for the use of some of the city departments, notably the Board of Public Works and the Department of Charities. For service as an opening ode, for instance. The first two lines of the song, which comprise the answer Bert received when he wanted to borrow ten cents from one of his friends, are as follows:

"Ah'm sorry Ah ain' got it,—if Ah had it, you could have it,
But Ah'm all in—Out!— an' DOWN!"

This applies, of course, only to the financial condition of the afore-mentioned Boards.

* * *

(It didn't take long to think of this one, so we didn't waste much time.) The initials of the Board of Public Works might, by transposition of the last initial, spell the following motto for the Board, on the question of improvements:

W-illing,
B-ut
O-rful
P-oor!

Fulton Keynotes

Mr. and Mrs. W. H. Hornibrook entertained recently, Mrs. W. H. Cushman, of Syracuse.

* * *

It is the purpose of the Grand Army veterans to invite every secret and fraternal organization in the city to join in the decoration of graves Memorial Day. Plans will be discussed at an early date.

* * *

Mr. Herbert Rogers, of Oneida street, has returned from a business trip to New York city.

* * *

A son has been born to Mr. and Mrs. Herman Newman, of Les Cheneaux Island, Michigan, at the home of Mrs. Frank Seymour, of Marcellus Falls. Mrs. Newman was formerly Miss Lily Hadden, of this city.

* * *

Mr. E. R. Redhead will address the summer session of the Ontario District Conference to be held at Richland, June 5 and 6, his subject being, "The Dempster Campmeeting—What of its Future."

* * *

The Ladies' Parish Aid of All Saints' Church will postpone the meeting planned for tonight until Thursday, June 1st, at the home of Mrs. Carr, Park and Pratt streets.

* * *

Mrs. Vina Hatch has removed from East First street to 401 Cayuga street, and will be glad to receive her friends at that address.

* * *

Miss Goldies Preston, of Utica, who was called to this city by the death of her aunt, Miss Alice Kinney, who was buried yesterday, has returned home.

* * *

Miss Ida Sandford, of Syracuse, was the guest of Miss Geraldine Boyd over the week-end.

* * *

The rummage sale under the direction of the ladies of All Saints' Church which has been in progress at 218 Oneida street, for the past week, will close this Saturday. There are several bargains in handy articles still available.

* * *

W. A. Boyd has purchased the barber shop formerly conducted by James Appleton, on West First street, near Hannibal street, and is making extensive improvements to the place.

* * *

Charles Rudd, of South Third street, who has been confined to his bed with blood poisoning for almost a month, is improving slowly.

* * *

Tom Singleton leaves this city today to take a position with a Syracuse business house.

* * *

Mr. and Mrs. B. L. Neubauer, and Mr. and Mrs. C. M. Rose have taken a house at 313 Buffalo street. Mr. Neubauer and Mr. Rose recently purchased the drug store formerly conducted by the Kline-Wood Co., on East 1st street.

NEW RURAL DIRECTORY WILL BE PUBLISHED

The Moorson Directory Company, with offices in the Church block, and these members, Messrs. George B. Moore, John E. Moore and J. F. Moore, will issue soon a new rural directory having the stamp of approval of the Chamber of Commerce.

The new work will present many features non-existent in its predecessors, in that the names will be arranged in alphabetical order, embracing many that were not mentioned formerly. This last feature is deemed necessary by the publishers, because two years have elapsed since a directory of the post office routes radiating from this city was published.

The new book will contain advertising pages, some of which are now contracted for. All in all, the new directory should find a ready demand with the merchants who desire to own an up-to-date mailing list.

Goodrich Announces $10,000 in Awards to 1916 Racing Champions

A. A. A. is Sole Arbitrator and First, Second and Third Speed Champions will be Chosen by its Rules—Good Silvertowns or Any Other Make of Tire May Be Used.

Akron, O., (Special)—Although Goodrich Silvertown Twin Cable Cord Tires are already the accepted tire of the racing driver, and are bought and paid for in every case, a generous recognition of the selection by outright purchase by drivers of racing cars of the Silvertown Twin Cable Cord Tires, for use in contests under no influence of money consideration for so ding, has just been announced by The B. F. Goodrich Company.

The American Automobile Association, the official association of car owners of this country, has prepared rules to govern the determination of the actual champion for the season of nineteen sixteen and will be the sole arbitrator regarding such award.

The Silvertown Cord Tire is universally recognized as the type of construction insuring best results in speed contests and is almost universally used by racing drivers. There is no reason why the Goodrich Company should extend any award for the purpose of inducing the use of the Silvertown Cable Cord Tire, and it does not, but gives outright without a string tied to it of any kind whatsoever, ten thousand dollars divided between the authoritatively determined champion, the second and third in order quite irrespective of the make or kind of tire that may be used by said winners.

LIBERAL PRIZES WILL RULE IN STATE SHOOT

Fulton marksmen are expected to be interested in the announcement coming from Syracuse of the program in connection with the State Fair shoot to be held under the auspices of the New York State Sportsmens Association on the Hunters Club range, June 12, 13, 14, 15, made yesterday, reveals several interesting facts. More than $1,500 will be divided among successful contestants in the form of merchandise prizes and the bulk of this vast amount has been donated by Syracuse patrons of the game.

In the contest for the state amateur championship three of the greatest marksmen in the country will compete. Henry J. Pendergast, of Phoenix, present state champion, Ralph L. Spotts, of New York, national amateur title holder, and Frank Wright of Buffalo, former state champion, will be among the competitors in this event which will be held on Wednesday, June 14. The contest will be included in the regular program of the day, the final 100 targets to constitute the event.

The state shoot is expected to attract at least 350 marksmen. While the greater number of these experts will be amateurs, indications point to the entry of several prominent professional shooters. There are five active gun clubs in Syracuse and three times as many within a radius of fifty miles. Each of these is expected to furnish its quota in the various events.

Arrangements have been made for the erection of six sets of traps. They will be placed along the shore of Onondaga lake, directly in front of the Hunters Club where the sky line is said to be the most perfect in the country for trap shooting.

The range will be carefully graded and every convenience possible given spectators and competitors. Special committees have been appointed to take complete charge of these plans.

SOUTH GRANBY.

We are having so much rain that farmers are getting discouraged.

* * *

Mr. Brice's goods have come and they have moved in to Avery Payne's house.

* * *

John and Millard Sperbeck have gone to Detroit.

* * *

Mr. and Mrs. Marvin Miller have a little daughter, Mabel Roxiniana, born the 13th, and Mr. and Mrs. Roy Austin have a little daughter, Florence May, born the 17th.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

Man come into this world without his consent, and leaves it against his will. During his stay on earth his time is spent in one continuous round of contraries and misunderstandings by the balance of the species. In his infancy he is an angel; in his boyhood he is a devil; in his manhood he is everything from a lizard up; in his duties he is a fool; if he raises a family he is a chump; if he raises a small check he is a thief, and then the law raises the devil with him; if he is a poor man, he is a poor manager and has no sense; if he is rich, he is dishonest, but considered smart; if he is in politics you can't place him, as he is an undesirable citizen; if he goes to church, he is a hypocrite, if he stays away from church he is a sinner and damned; if he donates to foreign missions, he does it for show; if he doesn't he is stingy and a tight wad. When he first comes into the world, everybody wants to kiss him; before he goes out, they all want to kick him. If he dies young there was a great future before him; if he lives to a ripe old age he is simply in the way and living to save funeral expenses. This life is a funny road, but we all like to travel it just the same.

* * *

TWELVE THINGS TO REMEMBER.

The value of time.
The Success of perseverance.
The pleasure of working.
The dignity of simplicity.
The worth of Character.
The power of kindness.
The influence of example.
The obligation of duty.
The wisdom of economy.
The virtue of patience.
The improvement of talent.
The joy of originating.

* * *

The Grocers and Butchers on the West side of the river will enjoy the half holidays beginning, to-morrow, Wednesday, June 7th and continuing through the months of June, July and August.

The Grocers and Butchers on the East Side of the river will undoubtedly keep open until July 5th as some of the merchants did not feel like closing their stores during June. This however is optional—A majority signing for June and only a very few desiring to keep open during June.

The other retail stores will not close until the first Wednesday during July and continue through July and August.

On June 8th a benefit performance at the Happy Hour and Quirk Theatres for the Charity Department of the City of Fulton.

* * *

The Finance Committee of "Old Home Week Celebration" have been busy and are now getting subscriptions to defray the expenses. They are meeting with excellent success.

* * *

The agents who come to the door
Each season there seems to be more;
With their helps for housekeepers,
Their vacuum sweepers,
Their book and soap offers galore.

How pat is the patter they sling,
How deft are the dodges they swing
Those bold house-to-housers,
Oft chewed by the towsers,
But cheerful as tulips in spring.

Twelve-cylinder talkers are they
And long do they linger and stay;
Their manners are breezy
Their payments are easy,
That is to accept—not to pay.

But though you may count them a bore
And swear that you'll listen no more,
Soon or late they will land you
Some lemon they'll hand you,
Those agents who come to the door!

DELEGATES ARRIVE

K. of C. Convention Opens With Prospects of Record Attendance.

Buffalo, June 6.—About 400 delegates to the convention of the state council, Knights of Columbus, were registered at Buffalo hotels last night and will take part in the procession from the Statler to old St. Joseph's cathedral, Swan and Franklin streets where mass will be celebrated at 1 o'clock by the Rev. J. J. Wynne of New York city.

Numerically the convention promises to be one of the largest in the history of the council. Accompanying the delegates are more than 300 women, for whom special entertainment features have been arrangd, including the reception and ball to be given tonight in the new club house of Buffalo council, and a trip to Niagara Falls Wednesday over the gorge route. route.

With the arrival of more than half the delegates, talk about convention headquarters at the Statler chiefly concerned candidates for the chief offices of the state council and last night it was said two men are seeking the state deputyship, to be vacated by the retirement of William P. Larkin of New York city.

M'ADOO MAY BE SELECTED CHAIRMAN

President Wilson Desires Him to Lead His Campaign.

St. Louis, Mo., June 6.—The proposed selection of Secretary William G. McAdoo as chairman of the new Democratic national committee, to succeed William McCombs may be met with slight opposition on the part of certain members of the committee, but it was stated authoritatively last night that if President Wilson desires that Mr. McAdoo direct his presidential campaign the national committee will name the secretary as chairman when the new committee meets immediately after the national convention.

The desire of President Wilson to have Mr. McAdoo lead his fight for re-election has been known to several committeemen for two months. but as some members were opposed to going outside the committee for a chairman it was thought advisable to wait until convention time before bringing Mr. McAdoo's name forward.

Several committeemen have made inquiry as to what part, if any, William J. Bryan will play in the coming convention. It was officially stated that inasmuch as Mr. Bryan was not elected as a delegate nor as an alternte he could only speak to the convention with the unanimous consent of the 1,094 delegates. Under convention rules Mr. Bryan can obtain a proxy only by the withdrawal of a delegate and his alternate.

GYPSIES KIDNAP BOY

They Seize Victims in Lighted Pittsburg Street and Escaped.

Pittsburg, June 6.—Kidnapped by gypsies in East Ohio street, on the North Side, in the glare of several arc lights last night, Joseph Sherwitz, eight years old, and John Shields, nine, were placed in an automobile and carried off before pedestrians, attracted by the boys' cries, could reach the abductors.

A few minutes later a girl of 15 ran into Central police station and breathlessly told how the boys, one of them her brother, had been kidnapped.

The abductors drove at high speed and crossed the Ohio river bridge to the west end. It is believed the automobile was headed for McKees Rocks. The police ascertained that a band of gypsies were camping near McKees Rocks, and an automobile load of police was detailed to the camp. A search was made of the camp and all wagons, but no trace of the two boys was found.

MICHIGAN STANDS ACID TEST

Employers Answer Wilson by Signing for Training Camps.

Detroit, June 6.—Employers of Detroit have determined to answer President Wilson's threat to apply the acid test to the business men of the country on the question of preparedness.

Already 81 local firms have asserted their willingness, in a signed agreement, to allow their employees to go to summer training camps without loss of pay or prejudice to their advancement. Many Grand Rapids firms also have signed the agreement.

Men Leave for Plattsburg.

Philadelphia, June 6.—One hundred and twenty-five business and professional men left here for Plattsburg, N. Y., to undergo four weeks' military training. At New York the Philadelphians will be joined by several companies from that city. A much larger contingent from this city is expected to take the four weeks course beginning July 2.

Colorado Governor Critically Ill.

Denver, June 6.—Governor George Carlson is critically ill and will be unable to act as a delegate-at-arge at the Republican national convention at Chicago, accordig to announcement made by his secretary last night. Governor Carlson recently suffered a severe attack of tonsilitis.

You are especially invited to the

UNIQUE STOVE DEMONSTRATION

SOUTH FIRST STREET, FULTON

Colgate Star Can't Pay for Hair Cut

(By United Press)

Syracuse—Monroe Goode, who was 180 pounds of Colgate's husky line last November when it crumpled in the stadium before the victorious Syracuse onslaught, can't leave Wampsville without having it cost him $800.

While the classmate of the sturdy left guard of the football team are attending classes in the pretty village of Hamilton and indulging in social and athletic activities of student life, Goode's boundaries consist of the jail limits of quiet Wampsville.

Goode was not good for a $250 judgment found against him for participating in a Moving-Up Day fracas at Colgate a year ago when some students decided that the locks of Walter Eddy, a young farmer boy, were badly in need of shearing.

A Supreme Court jury failing to see the joke, it cost the Colgate boys just $500. At a rough estimate, Goode, Ferris Edwards, Richard Devine and Lewis Gennesee were ordered to pay between them approximately a half dollar for each hair of Eddy's luxuriant crop.

The trial justice considered the verdict was too severe, and he decided that the evidence had not been sufficient to properly connect Edwards, Devine and Genessee with the tonsorial party, so they were freed from all liability. Also the $500 judgment was cut in half and Goode was ordered to pay $250.

Time passed and the Maroon football star did not pay the $250. Eddy and his attorneys began to think that the Plainfield, N. J., boy had no intention of settling the bill, so they had Goode arrested and taken to Wampsville.

Melbourne S. Reedy of Hamilton came to his rescue by furnishing an $800 bond, which let the football player out of jail, but it did not release him from the Wampsville jail limits.

Before Goode was taken to Wampsville he presented a petition asking to be released from his debts and showing that he has little which a creditor would desire and claiming that he owes his father, E. Goode, of Plainfield, N. J., nearly $1,000 for money advanced to pay for his college education.

What the football player schedules as his worldly goods follows: Three suits of clothes, two grey and one blue. One balmacan overcoat. One pair of black shoes. One half dozen shirts. Several neckties and collars. One cap. One dozen text books on ethics and psychology. Presumably the ethics and psychology books indicate the line of mental training the young New Jersey boy pursues in the college hidden away among the beautiful hills of Madison county.

Whether he will borrow the money to settle the hair cutting bill, for he says he is broke, or will let his enforced stay in Wampsville put him back a year in college is a question yet to be settled.

VICAR'S SON WEDS NEW ORLEANS GIRL TODAY

(By United Press)

New Orleans—The marriage of Miss Mary Savage Cleveland, daughter of Mr. and Mrs. Samuel Bennet Cleveland, of New Orleans, to Mr. Enos Throop Geer, the eldest son of the Rev. Dr. William Montague Geer, vicar of St. Paul's Chapel, Trinity parish, New York city, will be celebrated at Christ Church Cathedral, here to-day.

A LEAP YEAR PROPOSAL

By ELINOR MARSH

When I was a girl of twelve my mother made a will leaving me all her property and naming Nathan Griggs my guardian.

Mother died when I was sixteen years old, and by the terms of the will I was to have possession of my estate when I was eighteen. This left it in Nathan's hands two years after her death.

Now, the truth is, from the time I was fourteen I had a decided fancy for Nathan. I looked upon him as a big brother and in my day dreams of the future thought of him as something nearer. I early passed beyond boys of my own age, which I suppose came partly from the fact that, my father having died when I was a baby and my mother being early accustomed to rely upon me for many things that are not usually left to children, I became older in experience than I was in years.

Be this as it may, by the time I became of age and my property was to be turned over to me I had made up my mind that I wanted Nathan too. As to taking care of my estate myself, I had sense enough to know that I was entirely incompetent.

I also had sufficient feminine instinct to discern that Nathan had a decided fancy for me. But the main reason why mother had made him my guardian and one of the reasons why I wanted him—his integrity—stood in the way of my having him. It was evident to me that he considered me a fiduciary trust. He was so sensitive to his honor that I believed he would consider it a crime for him to become possessed of my fortune even by marrying me.

What was I to do? I couldn't very well offer myself to him. Possibly if I had been nearer his age I might have found a way to propose to him without sacrificing too much of my maidenly modesty, but when I was eighteen he was thirty-one. It might have been easier had I been sure that he wanted me. But how can a girl know that a man wants her till he asks her?

One day in looking over mother's papers I came upon a letter she had written to my aunt, her sister, that had been returned to me after mother's death. In it she said: "I have made a will in Luella's favor and have made Nathan Griggs executor and guardian. I have done this hoping that he will continue managing her estate as her husband. I have said nothing of this, however, to either of them, for in such cases the surest way to defeat a design is to try to bring it about. I rather rely on my observation that they fancy each other."

I spent a long while thinking out a plan by which to use this letter to overcome Nathan's scruples. Gathering some business letters that I found to and from mother and placing this letter I have mentioned among them, I sent them to Nathan with a note in which I suggested that they might be of importance to the estate and that it might be well for him to look them over carefully.

What did he do but return them to me, saying that he had read them all carefully and they were of no importance in a business way!

I was no nearer my object than before.

Well, the day arrived when I was eighteen, and Nathan came to turn over my property to me. It had become evident to me that if I wished to break down his scruples I must throw argument to the winds and use feminine methods. He spread a lot of papers on a table, and we sat down side by side that he might instruct me. I was not thinking of the papers or the instructions; I was thinking of something far nearer my heart.

The more he explained the less I understood. I kept hitching my chair nearer to his till we could be no nearer. Then, pretending that the figures were so minute I had difficulty in seeing them, I leaned sidewise till my shoulder touched Nathan's. In this way I crowded him to the outer edge of his chair, and he could not move farther. My hair was done in a tumultuous fashion, and a loose strand grazed his cheek.

He went on explaining, but it did not take me long to see that his mind was no more on the papers than was mine. At last I succeeded in grazing his cheek with mine.

He broke down at this and went all to pieces. Putting his arms around me, he kissed me and said:

"Luella, when you sent me those letters of your mother's you unintentionally included one that expressed a desire on her part that I should continue the care of your estate as your husband. I have loved you ever since you were a little girl and might have told you so before this had not your mother turned you and your fortune over to me in trust. It has not seemed honorable to me to"—

"Yes, I know all that," I interrupted, impatient at having to draw him out. "You have been very unjust and very stupid. You have wished to turn this estate over to me, knowing that I can't manage it. You should be ashamed of yourself."

"Well, sweetheart, I didn't intend that. But wasn't it fortunate that you happened to include that letter"—

"Yes. If I hadn't been careless I suppose I would have died an old maid for all you cared."

This proposal and acceptance are not in accord with the romance of such things, but it was leap year.

FOR YOUNG FOLKS

Sleepy Time Story That Will Interest Boys and Girls.

A TINY WOODS CREATURE.

Wise Ways of a Little Animal—How a Shrewd, Small Beast Maneuvers to Preserve Its Life—Walking In the Forest—Sport For Young Folks.

"Now, children," said Uncle Ben to Polly Ann and Little Ned, "I am going to tell you about

THE LITTLE "'FRAID ONE."

The Indians call the wood mouse Little Tookhees, and because of his timid, modest ways he is also called the 'Fraid One.

Tookhees builds the doorway of his home beneath a mossy stone in order to be well protected from his enemies, for bird and beast and fish are ever on the outlook for little 'Fraid One. To his timid glance every tree limb holds at least one Hookooskoos, or horned owl. Every bush or clump of trees could shelter Mooween, the bear, or Kagax, the bloodthirsty weasel, and below every friendly eddy Skooktum, the fat, fat trout, lies in wait should Tookhees swim too close to where he lives.

So in order to be very, very certain that the coast is clear the 'Fraid One makes a false start from his doorway, looks quickly around, gives a squeak that can be plainly heard most anywhere and scoots back into his house. So very sure are his enemies that the little mouse has seen them and will never dare to come out again that they go away to some other hunting ground. But if they had waited a moment they would have seen Tookhees poke his tiny nose out of his front door, look very carefully about and then go on his way to attend to whatever errands he may have to do.

By little jumps and leaps he dodges in and out among the leaves and grasses, never for any length of time showing himself in the open.

These little creatures travel mostly at dusk, when they are not easily seen, and in order to protect their nest they tunnel to it from quite some distance, so that one watching will not suspect where it is hidden. The wood mice are neighborly, sociable little folks, visiting the different colonies. The children of the wood are usually tame little creatures if one has patience to win their confidence, but it is not always a kindness to them, as in becoming tame they lose much of their protective instinct and soon become easy prey to their enemies.

"Basket Upset."

A very interesting game is called "basket upset." The game is played this way:

All the players sit around the room, with one player in the center. The one in the center gives every player the name of a fruit, and then the one in the center gives a sentence, using the names of some fruit. If the player calls the name of the fruit you have you must jump up, turn around and sit down before the player in the center can get your seat. If the one in the center says "Basket upset" every one must change seats.

Quiltmaking For Girls.

Little girls will be glad to know that patchwork quilts are again the fashion and that they can make them very easily. Just cut nine perfectly square patches and sew them together so that the colors in the center make a kind of cross. Then mother will put them all together when you have squares enough made. Any little girl ought to be able to make a patchwork quilt.

A Popular Spring Sport.

When the mud dries up under the warm rays of the May sun then the little folks are glad. After skating and coasting come the hoop rolling,

Photo by American Press Association.

READY TO START.

and lately the toy shown in the picture has become a favorite diversion of little folks. The smiling young lady was just snapped the other day. Her name is Elizabeth Goddard, and she lives in New York.

A Mad Woman

By ALAN HINSDALE

When I married Lucy she was the personification of modesty, timidity, shyness. She was equally mercurial. One moment the world to her was a garden of roses, the next a universal cemetery.

I was clerking on $70 a month when I married her, and we went to live in a cottage standing by itself on the outskirts of the city. The nearest house was half a mile away. Of course we couldn't afford to keep a servant, so Lucy was cook and housemaid. Fortunately her mother had taught her how to prepare viands for an ordinary meal, and I usually got home from business in time to help her with the dinner.

Our only trouble was Lucy's loneliness while I was away, as I was all day except Sunday. We had not thought of this when we engaged the cottage. Indeed, we were too young and inexperienced to think of most of our necessities. Every morning when I left my wife she would cling to me so that it was hard to get away from her. But in the evening when I returned the happy smile on her face and light in her eyes were delicious.

Our cottage was two stories and a half high. The half story was nothing more than an open space under the roof. It was approached by a rude staircase and entered by a trapdoor in its floor furnished with a bolt underneath. We would have used it for a storeroom, which means a place for family accumulations, but nothing had as yet accumulated. Indeed, we hadn't enough to furnish the house.

One day on returning from business I had reached a wood through which I usually made a short cut to the house and was passing through it when I heard a shot, which seemed to come from the direction of my home. I ran through the wood, but before emerging from it heard another shot, followed by the sound of the falling of shattered glass. Visions of my little wife being murdered lent me additional speed, and, clearing the wood at a bound, I had a view of my house.

Under a window in the garret stood my wife with my fowling piece in her hands, pointing it upward. Her back was toward me, so she did not see me.

"You miserable, contemptible thing!" she cried to some invisible object. "I just wish you'd give me half a chance; I'd teach you how to break up my china set that my mother gave me for a wedding present."

"For heaven's sake, Lucy," I cried, "whom are you talking to?"

She was so angry that either she didn't see me or wouldn't notice me. I saw the frightened face of a man for a fraction of a second at the window in the garret and heard a simultaneous report from my shotgun, followed by more falling glass. I sprang to Lucy and, seizing the gun, wrenched it out of her hands.

"What does this all mean?" I said sharply.

"That miserable thing up there has broken all our best furniture; the dinner set Aunt Harriet gave me and the tea set mother gave me."

"Who is he? What is he? Where does he come from?"

"He came into the house pretending he wanted something to eat, but, finding me alone, he demanded money. I told him I had none to give him, and he began to break things and threatened to kill me with a long knife if I didn't give him all the cash there was in the house. I told him he'd find it all hidden under a rafter in the storeroom. He went up there. I followed him and bolted the door after him. I ran downstairs, expecting to faint on the sofa, but, seeing the wreck of our things, I began to get mad. The more ruined pieces I found the madder I got. Seeing your gun standing in a corner, I took it and, going outside, saw the man at the window. He had made a rope of some stuff he'd found in the garret and was going to let himself down when I shot at him and drove him back. Just think of that beautiful tea set that my mother"—

I had heard enough. I told Lucy to go somewhere and telephone a police station, while I relieved her of her sentry duty. The man's face appeared at the window again, and she tried to snatch the gun from me to get another crack at him. I told her to go at once, and she went off, turning once or twice to fire an angry look at the window.

After she had gone I spoke to the man and told him he might as well make no effort to get away, and be quiet. This he knew without my telling him, and I had no trouble with him till a patrol wagon came with several policemen and Lucy. The rascal was let out of his trap and taken away.

The excitement being over, Lucy was quite ready for a "good cry" on my shoulder, but I think this was not so much due to being let down as at the loss of our belongings, which could not be restored by punishing the man who had broken them, for he had nothing to pay with.

However, when our relations and friends heard the story of Lucy's trapping the robber and her "madness" at his having broken up her property, they duplicated everything he had smashed, so that we were not only as well off as before, but I was relieved of anxiety at leaving my wife unprotected during the day. However, when our lease expired, fearing that some other burglar might frighten her without making her mad and thus get an advantage of her, I decided to move into the city.

COUNTRY WORK SHOWS DECLINE

Social Service Commission of Espiscopal Diocese to Report on Situation at Convention.

To-day's Post-Standard contains the following concerning the convention of the Episcopal Diocese held this week:

At the fortyeighth annual convention of the Episcopal Diocese of Central New York, which opens at St. Pauls Church this afternoon, the Social Service Commission will submit a report reviewing at length conditions in the rural districts, which shows a decline in all branches of church work and suggests a complete survey so that a more complete diagnosis of the trouble may be made.

The commission will submit the following suggestions at this time:

"The need of the country parishes should be brought to the attention of young men who by early training are fitted to appreciate the peculiar requirements of this work.

"The larger agricultural colleges have thousands of students looking for work to be done and the church should have energetic men presenting these needs to the seniors in all such colleges.

"The theological schools should also enlarge on the opportunity for service in this neglected field. In service in this neglected field. In these schools and seminaries there should be special courses on social work in rural communities, so that the young clergyman would have some idea of the proper direction for his efforts.

What Preacher Should Do.

"In the field the clergyman should identify himself with the vital needs of the people and have an intelligent appreciation of the real concerns of his people. To send to a rural church a layman or an assistant in some city church, when their only interest is to read the service and get back home as soon as possible, may be the simplest means for the church to quiet it sense of responsibility, but it wholly fails to meet the real issue.

"Resident clergy, willing to do missionary work over a large area of country, are needed; clergy who will find the lost sheep, who will learn to know every household within a radius of five miles of the village church, and who will at least urge church membership upon all dwellers round and carry on some program of religious education among the children.

"For effective work, it is probable that a group of six to ten of such clergymen and communities should be under the immediate charge of an older and more experienced clergyman, one who can supplement the work done, who can supply the younger men with inspiration, requiring reports of work done, and expecting results in baptisms and in Sunday school efficiency.

Many Phases of Work.

"Wherever possible, definite social service should be instituted, with athletic games, and interest for the boys, classes in domestic science for girls, agricultural competitions and organizations of Boy Scouts and of Camp Fire Girls. The clergymen should cooperate with all other agencies for community welfare, the library, the school, the grange, the board of health, the fraternal organizations, the farmers' institute, the village improvement society, and the village Y. M. C. A. where these already exist."

The commission gives attention to the questions of welfare of women and children by noting the lack of social welfare legislation at the last session of the state Legislature and by calling attention to the obligation of the church to the community. It says, in part:

"The church, through its ordinary activities reaches directly the social side of welfare work. It should also seek through the forum and in social service classes, to further the intelligent study of economics, labor conditions, etc. All such approaches towards a recognition of the church's obligation to the community will vitalize the church and increase public respect for its mission.

In one way, at least, individual church members can be of larger service than they now appreciate, viz., through the encouragement of manufacturers whose goods are made under proper conditions and at fair compensation, as for instance those approved by the Consumers' League. Church members may also mould public opinion in movements for extension of Saturday half holidays, clean-up weeks, Babysaving stations and other civic welfare co-operation."

Rev. Dr. Richmond H. Gesner of Oswego, is chairman of the commission. This is one of the important report of the convention.

Preceding the opening of the convention the alumni of the General Theological Seminary will meet at Lockwood Memorial Parish House for luncheon.

BUNDY'S CROSSING.

Mr. D. E. Wells spent the week-end in Amboy.

* * *

Mr. and Mrs. Alonzo Burchin entertained Mr. and Mrs. Floyd Burchin and two children, Mr. and Mrs. Bert Thomsbur and two children on Sunday.

* * *

Mrs. Roy Dodge was a caller on Mrs. Muriel Congdon on Sunday.

* * *

Mr. and Mrs. C. J. Echard entertained Mr. and Mrs. Look and family of Baldwinsville on Sunday.

* * *

Mrs. Byron Wells' and daughter, called on Mrs. Edward Echard one day last week.

* * *

Miss Goldia Graham spent Sunday with Mrs. Byron Wells.

* * *

The Misses Florence and Ethel Wells and Mr. Fred Wells, of Mt. Pleasant were callers on Mr. and Mrs. Byron Wells on Sunday.

* * *

Mr. Harold Waugh has bought a motorcycle.

ADVERTISED LETTERS.

The following letters remain uncalled for at the Post Office, May 24, 1916. Inquirers will please say advertised:

Men—Alamand, Geo.; Ausman, Hervey; Failey, Chas.; Gillen, John; Micks, Dr. W. W.; Mitchell, B., 2; Munger, Wm.; Nellis, A. F.; Salsbury, Charlie; Schnud, Grancis L.; Snyder, Mr. and Mrs. J.; Somers, Royal; Sullingham, L. N.; White, Chas.; S. Saczerba.

Women—Darling, Mrs. C. E.; Marshall, Mrs. Andrew; Pickard, Mrs. Mabel; Wells, Mrs. J. C.

Peter T Conley, Postmaster.

MISCELLANEOUS WANTS

Rate—1c. a word each time. Minimum Charge 10c.

Lost—On State road, two miles north of Phoenix, a lady's handbag containing lady's watch and small sum of money. Please return to Mrs. F. W. Butts, Phoenix, N. Y. 441

Wanted—American or Polish Chambermaid. Good wages. Apply to Housekeeper, Pontiac, Oswego. 445

Dining Room Girl Wanted—Foley's Restaurant. 443

Cows for Sale—Two; fresh. M. T. Colwell, Emery Road. Phone 5101. tf

For Rent—Five room apartment, all conveniences. 520 Buffalo st. tf

To Rent or For Sale—New 8-room house; all modern. Phone 2520. tf

QUIRK THEATRE — CONTINUOUS 2 to 10:30 — Matinee 5c. — Night: Main Floor 10; Balcony 5c

TODAY— Violet Horner in "THE MARBLE HEART" Fox 5 Part Feature. Hearst-Vitagraph News.

WEDNESDAY— Maude Gilbert and William Tooker in Fox Film "THE FOOL'S REVENGE" in 5 Parts. Hearst-Vitagraph News.

THURSDAY— Edna Wallace Hopper, Chas. Ross & Muriel Ostriche in Equitable Film "BY WHOSE HAND" in 5 Parts. Hearst-Vitagraph News.

FRIDAY— Frances Nelson, in World Film "LOVE'S CRUCIBLE" in 5-parts. Hearst-Vitagraph News. VAUDEVILLE.

F. H. S. CLASS NIGHT PROGRAM

Officers of the Class—Honor Students—Participants on Class Night—Cast in the Play.

Arrangements are now completed for the Class Night Exercises and Class Play to be given in The Quirk on the evening of June 27th.

Officers of the Class—President, Wendell Carrier; vice president, Florence Follan; secretary-treasurer, Wilber Parsons; cheer-master, Fred Johnston; grand marshal, Alfred Fivaz '17; colors, Purple and White.

Honor Students — Valedictorian, Frederic King; Salutatorian, Elizabeth Royce; honor in English, Elizabeth Royce; honor in mathematics, Frederic King; honor in modern languages—(German, Frederic King; honor in history, Elizabeth Royce; honor in science, Frederic King.

Class Night—March, F. H. S. Orchestra; Class Will, Florence Follan; Codicil on Will, Mary Weston; Class History, May O'Connor; History of the Historian, Frances Allen; Class Prophecy, Katherine Sullivan; Prophecy on Prophet, Maize Gorman; Class Poet, Mae Roach.

Class Play—

The play selected for this year is the well known farce in three acts by George H. Broadhurst "What Happened to Jones."

Mrs. Lora K. Kesler, teacher of elocution in the high school, has the following cast selected and the merits of the farce and excellent material to choose from among the seniors is sure to make Class Night a great success.

The Cast—

Jones, Who travels for a hymn-book house ...... Wendell Carrier
Ebeneezer Goodly, a professor of anatomy .... Joseph Mangeot
Anthony Goodly, D. D., Bishop of Ballarat .... Joseph Johnson
Richard Heatherly, engaged to Marjorie .... Wilber Parsons
Thomas Holder, a policeman ...... Herman Robillard
William Bigbee, an inmate of the sanatorium .... Fred Johnston
Henry Fuller, superintendent of the sanatorium .... Frederic King
Mrs. Goodly, Ebeneezer's wife .... Clara Sylvester
Cissy, Ebeneezer's ward .... Marian Lake
Marjorie and Minerva, Ebeneezer's daughters .... Lena Kaplan, Maize Gorman
Alvina Starlight, Mrs. Goodly's sister .... Merle Bartlett
Helma, a servant girl .... Mae Roach

The advance sale of seats for the three commencement events—Prize Speaking at The Quirk, May 31; Class Night at The Quirk, June 27; Commencement at the First M. E. Church, June 28, will be held in the High School Assembly Room on Thursday afternoon of this week commencing at 3:45.

It is urged that all wishing to secure desirable seats be present either personally or delegate some one to secure seats. The price for the three events will be 50 cents. Single admission to Class Night 35 cents; Prize Speaking 25 cent; Commencement 25 cents.

THE QUIRK TO-DAY.

The first motion picture ever made which shows an earthquake in action is "The Marble Heart," a William Fox production starring Violet Horner, which was staged in Jamaica, British West Indies. Earthquakes are not infrequent in the West Indies and one took place while exterior scenes of "The Marble Heart" were being photographed.

The players were going through their parts and the photographer was grinding away at his camera when the earth began to shake. The first tremor lasted for several seconds and the others were of less duration. Strange to say, the shaking of the camera did not blur the action. In fact it is necessary to watch the film very closely to observe in just what part the earthquake took place. A copy of the film will be presented to the governmental bureau which records and studies earthquakes.

Wisdom and Knowledge.

Wisdom does not necessarily include knowledge any more than knowledge includes wisdom. Wisdom primarily means good sense, sound judgment, intelligence, while knowledge fundamentally means acquired information. One may in one way or another acquire lots of information and still be anything but wise, just as the man of sound judgment and quick and sure intelligence may be "short" on knowledge—that is, on the information acquired from books, learned intercourse, etc.—New York American.

"A sensible cigarette— that's what I want"

There are a number of good, sensible cigarettes on the market—Fatimas are not the only ones.

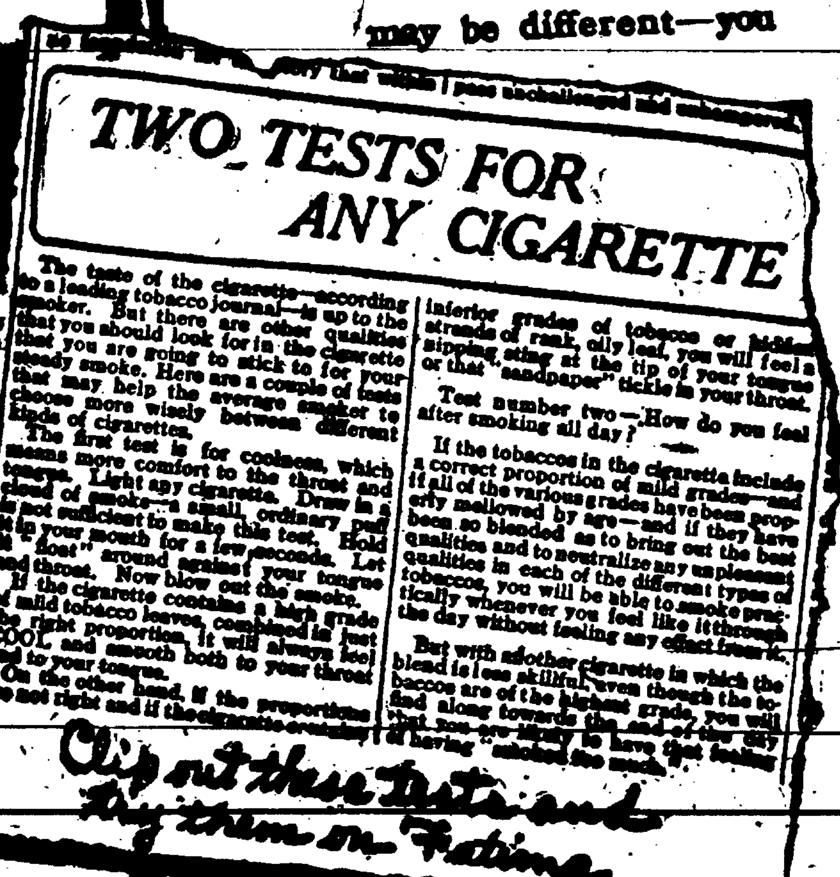
But Fatimas are the best-liked and best-selling of all the cigarettes costing over 5c.

Of course, your taste may be different—you may not like Fatimas as well as all these thousands of other men do.

But you can't deny that they are *worth trying*—not only for the delicious taste that has made them so famous, but also to see just how SENSIBLE they really are—how COOL and comfortable to the throat and tongue and how free they are from after-effects.

Clip out these tests and see if you can find any cigarette that meets them as well as good old Fatimas do.

Make this important test today.



FATIMA was the Only Cigarette Awarded the Grand Prize, the highest award given to any cigarette at the Panama-Pacific International Exposition.

"Distinctively Individual"

20 for 15¢

FATIMA THE TURKISH BLEND

A Sensible Cigarette

FULTON ESTATES BEFORE COURT

Yesterday's Palladium contains the following record of events in Surrogate's Court:

Attorney J. W. Shea, of Syracuse, appeared and filed objections to the probate of the will of the late Almer R. Fuller, who died in West Monroe on March 24th, leaving an estate of $5,000 real and $200 personal property. In his objections, he appearing for Mary E. Fuller, the widow of the decedent, Mr. Shea states upon information and belief that the will offered is not the last will of the decedent and that the alleged direction thereof was not the free unconstrained or voluntary act of the decedent. That the paper was not subscribed, published and attessted as and for his last will in conformity with the statutes. That the paper is invalid as a testamentary disposition of the decedent's property and that the contestant demands a trial by jury. Judge Miller received the papers and placed them on file, adjourning the matter to June 19th.

The judicial settlement of the estate of the late Albert D. Cook, of Fulton, took place. An inventory filed shows that the decedent who died in Fulton, left an estate valued at $5,845, and that the expenses of administraion amounted to about $1.475. The following share in the estate. Surrogate Miller authorizing the distribution of the money to-day: His widow and five children, Vernie, Abbott, May Dolber, Maure Vincent, Roy Cook and Irwin Cook, all of Fulton. Final settlement of the estate follows the judicial settlement.

A petition and order compromising and settling the cause of action in favor of Henry J. Matott against the New York Central railroad was entertained by Surrogate Miller to-day and as a result Mattott receives from the Central the sum of $1,000 in settlement of an action begun by him some time ago.

Letters of administration were issued to Wilbur Horning in the estate of Aseneath Horning. Mr. Horning filed a bond of $1,000 with the Surrogate.

Avery Wright was granted temporary letters of administration in the estate of Catherine Porter.

An order was filed admitting the will of the late Mary A. Cole to probate today and letters issued to Ira Hills.

Letters of administration were issued to Louisa A. Whitney in the estate of Dorothy L. Whitney who filed a bond of $2,300.

An order to show cause why Ella A. Nodda should not be substituted in place of Richard Nodda, her father, as executor of the estate of Mary Cavanaugh, of Fulton, was brought before the Surrogate today and the prayer of the petitioner was granted. This will be one of the final acts towards the settlement of that matter, which has been in the Surrogate's Court for some time.

Walter J. Abbey and Frank W. Parker were appointed appraisers in the estate of Catherine Fletcher.

The petition for the probate of the will of Louisa A. Ware was entered in Surrogate's Court this morning and a citation issued returnable June 5th. The petition for probate was made by a son of the deceased, Willis J. Ware, and Lawton D. Beardsley, of Granby, the executor named in the will. The deceased died in Granby.

The will of the late J. Wellington Chappel, of Fulton, was admitted to probate and letters testamentary with the will annexed were issued to Herman D. Merriam, the executor named in the will. The deceased died in Phoenix. Proof of the will was taken and Claude E. Guile appointed special guardian for one of the parties interested.

SPEAKER SWEET FISHING IN THE ADIRONDACKS

Saranac Lake—Several members of the legislature an state officials are having a genuine Adirondack outing at Ampersand pond, in the heart of the Santa Clara Lumber company's big preserve. In the party are Edward Schoeneck, lieutenant governor; Thaddeus C. Sweet, speaker for the assembly; William J. Marer, chairman of the ways and means committee of the assembly; Alexander Macdonald, deputy conservation commissioners; Fred Hammond, clerk of the assembly, and L. P. Demars, clerk of the ways and means committee.

"PLEASE DON'T ROB ME!" HIS PLEA TO BURGLARS

Jeweler Tries New Method to Keep Stock Intact—Has Appeal Published.

Paterson, N. J.—If there is any sporting blood in the veins of the industrious burglars who have made professional visits to Leon Friedmann's jewelry store here at regular intervals it is hardly possible that they can ignore their victim's final appeal.

Double locks, bars, burglar alarms and watchmen having proved equally futile, Friedmann decided to make a personal entreaty to the entire profession of burglars after a visit which cost him $2,000. He wrote this communication and caused it to appear in both the afternoon papers here, on the theory that an up to date burglar must read one of the two:

NOTICE TO BURGLARS.

Gentlemen—Members of your profession have called upon us with great profit to themselves of late. We feel that we have done our share toward your support; therefore we would deem it a great favor if you would take your trade elsewhere in future; at least until we can recover from the many losses we have suffered in the past, all of which, unfortunately, are our own. Respectfully yours,

LEON FRIEDMANN.

PHONOGRAPH IN BASEMENT.

Machine Sends Music by Cold Air Duct and Heat Registers.

Brazil, Ind.—H. E. Thompson when he wishes music at his home presses an electric button on the wall and from the cold air duct and the registers of the hot air furnace come in succession ten different selections, which are repeated until the electric switch is turned off.

The music is produced by a phonograph arrangement in the basement. A circular table is arranged with ten records around it, all moved by an electric motor beneath the table. In the center of the table, pointing upward into the air duct, is a large plaster of paris horn, which is connected with the reproducing mechanism. After a record is played a cork roller carries the needle to the next record.

Safety First.

Passenger (to colored porter)—Excuse me, but please tell me when the breakfast car opens.

Colored Porter—We's just had our coffee and rolls, so it's all ready for the guests now.—Judge.

BOMB DROPPING EXACT SCIENCE

American Inventions Do Much to Solve the Problems.

DISTINCT TYPE OF AIR CRAFT

Arm of Service Which Was More or Less Haphazard at the Outbreak of the War Is Now Highly Developed. Raids Timed So That Machines Will Reach Their Destination at Dawn.

Bomb dropping from aeroplane rapidly is becoming as exact a science among aviators on the European fronts as is the handling of artillery.

Early in the war the bomb droppers used the same sort of machines as in reconnoissance work, artillery spotting or anything else. There is a tendency now to make the bomb dropping aeroplane quite a distinct type of vehicle.

The French incline to favor the big twin engined Caudron, which has a lifting capacity of 500 to 700 pounds of bombs, with fuel for a five or six hours' flight.

The Germans appear to use the ordinary type of tractor biplane, with an engine of about 160 horsepower.

The English machines are understood to be rather ahead of the other allies' in weight lifting capacity.

Formerly bombs weighed about twenty pounds each, were carried inside the aeroplane and were dropped overboard more or less at haphazard.

In the up to date machines the load consists of five or six bombs of about sixty pounds each or two or three weighing a hundred pounds each.

The ones the French dispatches refer to as "of large caliber" weigh about 150 pounds.

Bombs Carried In Racks.

The smaller bombs, up to about sixty pounds, generally are carried in racks underneath the machine, each held by a separate clip, which is released by means of a wire carried into the body of the aeroplane.

The rack has to be so arranged as not to upset the machine's longitudinal balance, and to insure that the falling bombs will not foul the landing wheel axle or any of the landing gear's bracing wires.

The larger bombs are carried in a special fixture under the aeroplane's body, and in some cases two may be carried under the body, with one slung under each wing, outside the line of the wheels.

The aeroplanes are equipped with a bomb sighting apparatus to let the operator know the precise moment at which to release the bombs.

Aiming a bomb from an aeroplane is vastly more difficult than aiming a gun, because it is necessary to calculate not only the target's position, but also the aeroplane's height above the ground and the speed at which it is moving.

The gun, too, needs only to be pointed in the right direction, while the whole aeroplane has to be maneuvered into the correct position if the bomb is to hit its mark.

Nevertheless, bomb sights have been so ingeniously developed as to give excellent results.

Raids Occur About Dawn.

Air craft raids are generally timed to reach their objectives about dawn, partly to allow the heavily laden machines to pass the enemy's lines fairly low down in the dark, thus avoiding loss of time in climbing over their own territory, and partly to make it hard for the enemy to determine the raider's course.

Naturally, flying in the dark, the pilots can keep only a compass course. Furthermore, they cannot see the horizon, and as the human sense of balance is insufficient to enable them to maintain even keels, inclinometers have to be provided.

There are also petrol and oil gauges, clocks to show how long the machines have been in the air, speed indicators and small electric lights to let the aviators know if anything goes wrong in the darkness.

Some aeroplanes are built to be inherently stable, but this quality of uncapsizability has two disadvantages:

First.—The shape necessitated by such a design is such that the machine absorbs more power than the ordinary type.

Second.—The machine answers the pilot's control sluggishly, and if it takes a bad position near the ground it is difficult to get out, a fact which has been responsible for several serious mishaps.

There are indications that future night flying will be facilitated by use of the mechanically operated gyroscope control, an apparatus invented in America, which can be switched off just on leaving the ground or landing, enabling the pilot temporarily to take full personal charge of his machine.

Parrot a Witness.

In the suit of Mrs. Kittie Pope of Bloomington, Ill., against Mrs. Nellie Clark for assault the most important testimony was given by a parrot owned by Mrs. Clark, the only witness of the assault, which kept repeating some words of incriminating nature that his mistress had used.

Frozen Steam.

If hydrogen gas be burned in liquid air it will produce steam in the form of snow.

HIS FORMAL REPRIMAND.

It Was Not Exactly the Kind He Was Asked to Administer.

Dr. Simon Parvin, an English clergyman, was at times absurdly absentminded. Once while he was visiting in the home of a very great lady who employed a large staff of servants, whom she kept under extremely rigid control, it chanced that two young footmen fell out about a pretty housemaid who had coquetted with both and so far forgot themselves as to engage in fisticuffs. The old countess was indignant. Her first intention was to dismiss the culprits, but they were excellent servants, and, moreover, the repentant maid tearfully interceded for them. The countess relented so far as to reduce the sentence to a formal reprimand before the other servants—a reprimand in the nature of a moral lecture to be duly administered by her distinguished guest. At her earliest request—she was herself confined to her room by gout—Dr. Parvin, a man of imposing presence and resonant voice, permitted himself to be escorted to the servants' hall. On his return she sent for him to come to her chamber to relate the result of his mission.

"A fine couple," said Dr. Parvin. "I should say, an excellent match."

"Match?" inquired the countess. "What match? Has the silly girl made up her mind between them, then? I vow, I thought she meant to jilt them both, and serve the boobies right. Pray tell me, how did John and Thomas receive their reprimand?"

"John? Thomas? Reprimand?" echoed Dr. Parvin vaguely; then, with a sudden dismaying flash of memory: "Dear me, I fear I have made a singular mistake! When I entered the room the younger servants were at the far end in a group, and the butler and housekeeper were together, quite near, immediately in front of me, in fact, standing side by side, and—in short, madam, I married them!"

He had, indeed; but, although astonished, they were fortunately not unwilling. They had, it happened, long been contemplating matrimony and were deterred only by fear of the countess' disapproval. Believing that she would not disapprove the act of her eminent guest, they had readily abetted Dr. Parvin in his error. The countess was angry, but her anger fell chiefly upon the absentminded divine. She gave him a piece of her mind that—if he had been any one else—he would not easily have forgotten.—Youth's Companion.

Two Ways of Studying Music.

Picture to yourself a little girl of seven or eight seated before that ponderous and portentous mass of iron, steel, wood, wires and hammers which we call a "pianoforte" (sixty pounds of tender, delicate humanity trying to express itself through a solid ton), her legs dangling uncomfortably in space, her little fingers trying painfully to find the right key and at the same time to keep in a correct position, struggling hard the while to relate together two strange things, a curious black dot, on a page and an ivory key two feet below it, for neither of which she feels much affection. And then picture to yourself the same child at its mother's knee or with other children singing with joy and delight a beautiful song.—Thomas Whitney Surette in Atlantic.

A Matter of Money.

A wealthy stockbroker who gave an imposing dinner, says the London Telegraph, dilated with much pride, but with mangled English, on the delicacies that he had provided. Everything in season and out of season, he declared, was at the disposal of his guests.

"I notice you have no aspirates," observed one of them quietly.

"No more I 'ave," replied the stockbroker, with crestfallen visage, "but if money can get 'em," he added, "I'll 'ave some of the best in the market next time you're 'ere."

Not to Be Pitied.

Pat (to Mike)—I got a letter from a friend.

Mike—Yes?

Pat—He says: "Every rib's gone, I've only one shoulder, and I expect my legs will be gone by the time you get this letter."

Mike—Poor fellow! Is he in a hospital in France?

Pat—No; he's in a butcher's shop.—Exchange.

Mexican Beauties.

The most beautiful women in the world are said by experienced and observant travelers to be the Indian women of the isthmus of Tehuantepec, which lies just north of Yucatan, in Mexico. They add to their picturesque attractiveness by wearing whatever fortune they may possess in the form of gold coins strung about the arms and neck.

The Very Idea!

Mr. Woggs—I'm through with old man Bump. I told him we are going to name our baby after some great personage and asked him for a suggestion. Mrs. Woggs—What did he say? Mr. Woggs—He said, "Name it after ours."—Puck.

Settled.

"What profession do you think your boy Josh will choose?"

"Law," replied Farmer Corntossel. "Josh kin talk louder an' longer when he's got the wrong side of an argument than anybody I ever heard."—Washington Star.

A wise man should have money in his head, but not in his heart.—Dean [illegible]

A Theory Of Progress

By ETHEL HOLMES

Miss Mary Medford and Miss Gwendolen Tracy, chums, twenty-two and twenty-three years old respectively, both rich in their own right, thought much on the same lines.

"Gwen," said Miss Medford, "I have an idea that progress is the only means to happiness. We must be constantly going onward and upward. You and I are apparently at the end of our rope and still very young. We have independent fortunes. If we marry ordinary men we'll be bored through life. Let us go abroad and each marry a title."

"What kind of a title?"

"A knight, for instance."

"Then, I suppose, according to your theory, in time we'd have to divorce the knight and marry a baron. From the baron we'd have to rise to an earl, then a duke, and so on till we got a king. But I'm with you."

The two girls sailed for Germany, where every other respectable man is a noble—at least a Von—but that was not the kind of nobility they wanted.

So they went on into France. Here they found it difficult to understand what a title was worth. France being a republic, they couldn't see what advantage a count or a duke had over a commoner. Besides, the old nobility were all either legitimists or Orleanists and the most recent ones, Bonapartists. If the sovereign of either won the government the others would be down and out. Our heroines, being practical American girls, had no use for uncertainties.

So they went over into England. Britain has always been considered the best preserve in the world for noble game. The law of primogeniture provides for one branch of the family at the expense of the others. But the prizes were correspondingly few. The scions of some of the oldest blueblooded titles were or had been married to music hall girls, and this further reduced the American girls' chances. Though they had brought letters to families in England and were admitted socially, neither of them saw anything worth purchasing, for really that is what their intentions meant. After spending several months in England looking over the bargain counters they made up their minds to return to America and take up some fad. Gwen said she would prefer a dog.

But what they had been hunting for all over Europe came to them on the steamer coming home. They had met a young woman in England whom they had asked to help them in their quest. This lady informed them that two young noblemen, the Earl of Elmhurst and the Marquis of Bablington, were going to America incog. Whether the girls purposely bought tickets on the same steamer as the noblemen, or vice versa, does not appear. At any rate, the four crossed together, and before they had been out twenty-four hours they were as thick as peas in a pod.

The noblemen passed by ordinary names, Elmhurst as Mr. Calkins and Bablington being Mr. Strynger. They did not tell the girls that they were noblemen incog, and the girls did not tell them that they had been informed concerning them. Calkins froze to Mary; Strynger made up to Gwen. The men both declared that if they ever married they would wish to be married for love. Naturally, after such a statement, the girls would have been very foolish to tell them that they knew them to be British peers.

Of course it could not be expected that the two American girls would snare two such men within the few days of a voyage, but they came very near together. The night before they made the port of New York both couples were on deck sitting close in dark corners. Calkins told Mary that he wished to give her some memento of the voyage which she had made so happy for him, and she promised to accept a silk umbrella that he had intended for an American lady friend of his in Boston. Strynger prevailed upon Gwen to accept a box containing a dozen pairs of gloves.

In the morning while the vessel was steaming up New York bay the ladies gave the gentlemen their addresses and the gentlemen gave the ladies the mementoes of the trip. When the ship was docked the ladies went down the gangway together and were driven home. During the ride Mary, while comparing notes with her friend as to the probability of a conquest, was fingering the handle of the umbrella that had been given her.

"Why, it unscrews," she said.

She twisted it till it came off, and something dropped from it into her lap. Picking it up, she examined it.

"Why, it's a diamond!" she exclaimed. From the head of the umbrella that she had removed she poured out a couple of dozen more. "Good gracious, what a gift! It's worthy of an emperor."

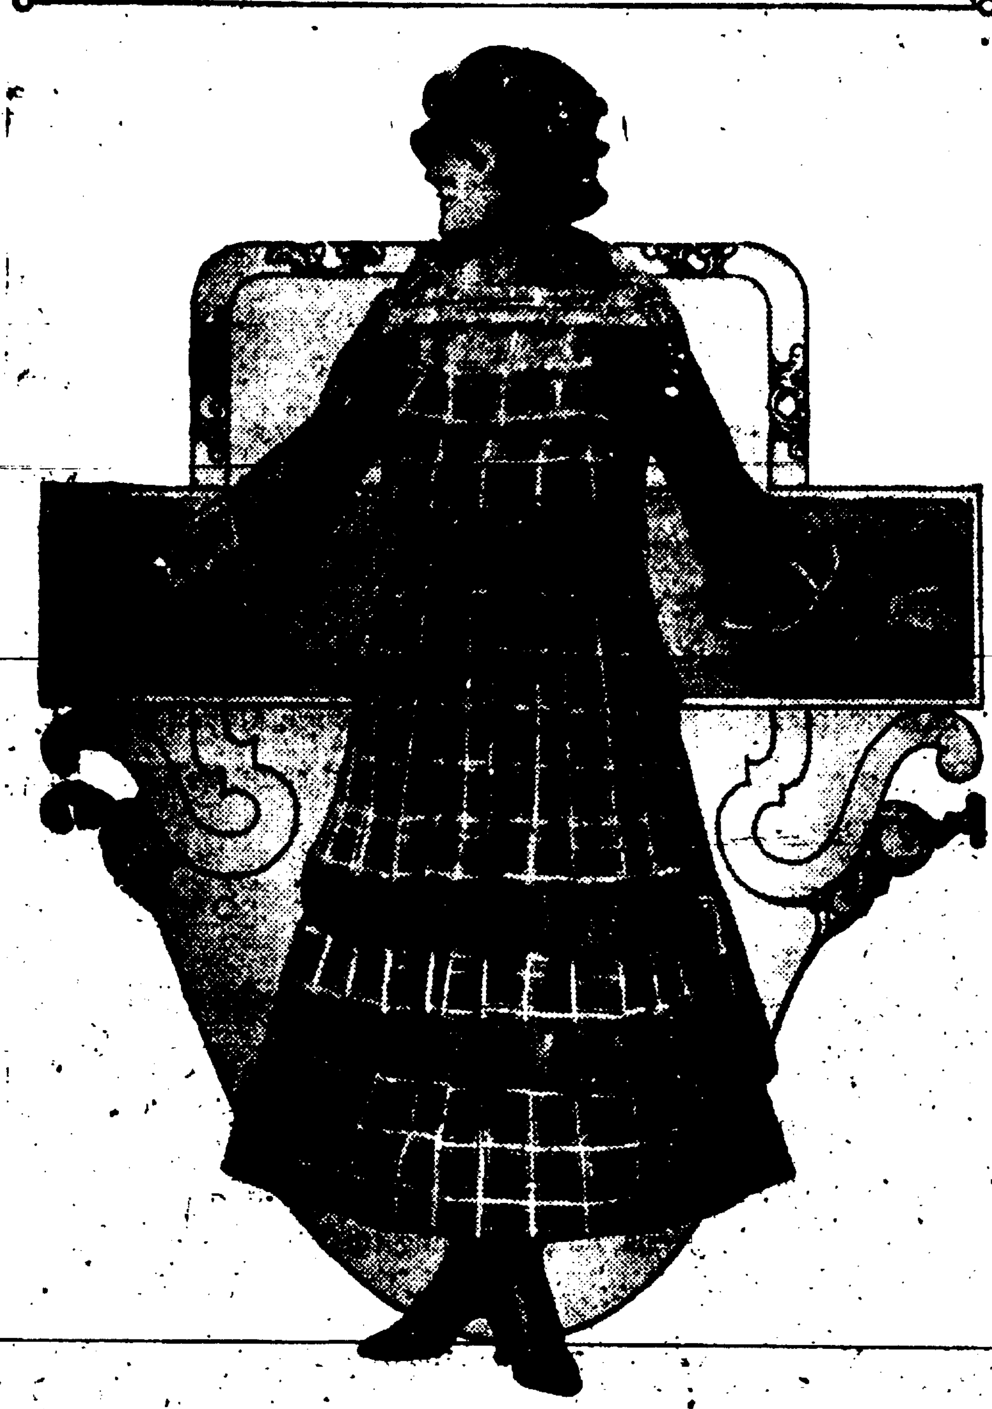
Gwen at once examined her glove box. She found nothing but the gloves at the time, but after she got home a further examination revealed a false bottom and more diamonds.

During the day a customs inspector called with an order for the contents of the gifts. Two smugglers had been announced from the other side of the water, had been arrested, and a compromise had been made by which they were to escape with their liberty.

"Well, I declare!" exclaimed Mary. "Strained at a gnat and swallowed a camel."

"In other words," added Gwen, "aimed at two noblemen and caught a pair of smugglers."

The Popular Premet Collar



THIS is the kind of frock so suitable for summer afternoons. The material is navy and white plaided voile set off with ruffling of navy taffeta ribbon. The sleeves are of blue georgette crape, and deep tucks are the motif of both bodice and skirt. A wide collar of embroidered organdie is appearing on many thin frocks.

• • •

Much metal is used on the new frocks. There are sometimes trimmings of little metal chains at belt and cuffs of coats. Then there are metallic fringes on evening frocks. There are metal spangles and sequins, too, on evening frocks. There are tassels of metallic thread, and there are gold and silver cloths and laces too.

• • •

Leather is one of the season's trimmings. It is used for belts and collars and cuffs on suits. Separate collar and cuff sets of it are sold. These are sometimes in shiny finish, but some of the prettiest are in dull suede in old blue, tan, gray and other soft shades.

Sounds Good For Luncheon.

FINNAN HADDIE WITH CREAM SAUCE.—Cut fish in small strips; place in stewpan with a quart of water. Let it simmer half an hour; then pour off water and add a pint of fresh milk. When this begins to boil thicken with a spoonful of flour. Let it boil five minutes. Add butter the size of a walnut and a little pepper and serve.

Fish Steaks.—Halibut, haddock, tilefish or almost any other kind of fish from which it is possible to cut a steak can be used. Rub the wires of a dripping pan with a slice of onion and some butter. Season the fish steak with salt, pepper and a little lemon juice. Put a small piece of butter on it and bake half an hour.

Jellied Vegetables.—A tablespoonful of granulated gelatin, a quarter cupful of cold water, a cupful of boiling water, a quarter cupful of vinegar, two tablespoonfuls lemon juice, a teaspoonful salt, a cupful shredded celery, a cupful shredded cabbage, a quarter cupful of green peas, a quarter cupful of cooked sliced beets, a quarter cupful of cucumber cubes, a quarter cupful of green pepper, a quarter cupful of pimento. Dissolve the gelatin in the cold water, then add the vinegar, lemon juice, sugar, salt and boiling water. Strain, and when it begins to set add as many of the remaining ingredients as desired. Turn into a mold, wet in cold water and serve as a salad or accompaniment of cold meat.

American Chop Suey.—A pig's heart, a cupful of boiled rice, a cupful of cooked macaroni, a cupful of stewed tomatoes, butter the size of a walnut, a medium sized onion, salt and pepper method. Cut the heart into small pieces, cover with cold water, a little salt and pepper and stir gently for two or three hours, break the macaroni into small pieces and cook till tender in boiling salted water. Mince the onion fine and fry in the butter. Cook the rice and tomatoes or use canned tomatoes. Mix all together with just water enough to cover. Cook a few minutes and serve very hot.

Anna Thompson

Brazil Produces Piassava.

Among the forest resources of Brazil one of considerable value and importance is the fiber piassava, a product of certain palm trees, which is used in the manufacture of brooms, brushes, ropes, baskets and hats. The trees also produce a very hard nut, called in Portuguese coquilho (coquilla), from which excellent buttons are manufactured. The leaves are employed for making fans and in the country districts for roofing adobe houses. For making brooms and brushes especially no other material is more extensively employed in Brazil, and large quantities are required annually for domestic consumption as well as for exportation.

Two Sentiments.

A young lady one day requested Moltke and Bismarck to write a few lines in her album. The marshal took up the pen first and wrote: "Falsehood passes away; truth remains.—Von Moltke, Field Marshal." After reading what Moltke had to say Bismarck took the pen and added the following: "I know very well that truth will prevail in the next world; but in the meantime a field marshal himself would be powerless against falsehood in this world.—Von Bismarck, Chancellor of the Empire."

A Mean Trick.

"I wasn't able to match that piece of goods for you," said hubby. "I tried six different stores, and they all told me they hadn't had anything like that in stock for five years."

"I knew that all the time," said wife. "I just wanted to prove to you that my best dress is hopelessly out of style. You wouldn't believe it when I told you."—St. Louis Post-Dispatch.

ADDS TO HOME PRIDE.

Aside from the benefits to health to be derived from a cleanup campaign, the increased pride taken in the home and the added self respect that come from the living in a clean, neat, attractive place are worth all the trouble of such a campaign. Nobody takes any pride in living in a house with dirty, unattractive yard or grounds. Dirt, deterioration and disease go hand in hand, and all are enemies of public spirit and proper pride.

The neat, clean home is the attractive home. It is a better place in which to live because it is clean. It is a healthier place because of the freedom from rubbish and trash. Such a home shows that its owner takes a pride in keeping it up, and if it is placed on the market it will bring a higher price just because it is clean and neat than the place down the street, the yard of which is full of old bones, heaps of ashes, empty cans and waste paper and in general disorderliness.

TRIBE NOW DEAD.

Ishi, Noted Aborigine, Succumbs to White Plague.

ORIGIN MADE HIM FAMOUS.

Shown as Survivor of Last Tribe of Deer Creek Indians of Yano Line. Lived on Victims of His Bow and Arrow.

San Francisco.—Ishi has been gathered to the land of his fathers.

Last of the Deer Creek Indians, tribe of Yano, Ishi has gone to the happy hunting grounds. He died at the University of California hospital, a victim of the "white plague," disease of the paleface.

For several months the aborigine, who was captured in the wilds of northern Butte county in the summer of 1911, had been in ill health. A year ago he developed acute lung trouble, and at times he suffered greatly, bearing his pain with the stoicism of his kind.

Just a few minutes before he passed away Ishi joked with Curator Gifford of the affiliated colleges. At that time he was in agony. Final relief came with a hemorrhage.

Ishi, who never had seen any money of the white man until he was brought into civilization, left what he considered a fortune in worldly goods—about $350 and personal effects. With the common desire of all California Indians, Ishi labored to accumulate wealth. Unlike the members of most tribes, whose standing is rated by what they give away, Ishi, with the characteristics of California and British Columbia Indians, hoarded his pennies, which he earned in various ways. His estate was taken in charge by the public administrator.

Ishi, living the life of a savage in Butte county, stole a calf in the summer of 1911, and officers of the law ran him down. They were amazed to discover the thief was a primitive creature, clad in animal skins and armed only with a bow and arrow. The prisoner was taken to the Butte county jail, and it was there that T. T. Waterman, assistant professor in anthropology, pronounced him to be the only surviving member of the lost tribe of Deer Creek Indians of the Yano line.

The scientific world was greatly interested in Professor Waterman's announcement, and Ishi became famous. He was brought to this city and lodged at the affiliated colleges on Sept. 4, 1911. After months of patient effort Professor Waterman was able to talk with Ishi. What he learned from the captive left no doubt in his mind that Ishi really was the last of the savage tribe of Deer Creek.

Ishi adapted himself to the ways of the white man. He built himself a home on the grounds of the affiliated colleges, where he was the object of much curiosity. He attended lectures by Professor Waterman and other savants of the State university.

In May, 1914, Ishi took Dr. A. L. Kroeber, head of the affiliated colleges museum, and Dr. Saxton T. Pope to Butte and showed them his former haunts, reverting to his skins and bows and arrows. The report of Dr. Koeber and Dr. Pope confirmed the belief of Ishi's descent.

KILL 2,000 RABBITS IN DRIVE.

California Farmers Wreak Vengeance on Field Pests.

Stockton, Cal.—It is estimated 2,000 jack rabbits were killed in the south San Joaquin district and at least one coyote met his fate in the rabbit drive held by the south San Joaquin farmers under the direction of Ed Powers of Manteca and county farm bureau officials.

Hunters from all parts of the country gathered in the south San Joaquin during the morning, and when the chase started at 9:30 o'clock there were more than 400 shotguns pointed out toward the hiding places of the long legged jacks.

The march on the rabbits lasted from 9:30 in the morning until after 2 o'clock in the afternoon, and during the afternoon hundreds of automobile parties visited that part of the country to see the huntsmen and others gathering up the slain field pests.

MONKEYS SCARE CO-EDS.

Human Skeleton Placed Near Girls' Dormitory Also Causes Terror.

Alliance, O.—Five stuffed monkeys taken by students from the museum of Mount Union college and placed at strategic points near the entrance of Elliott hall, the girls' dormitory, frightened the co-eds when they left the dormitory.

Scarcely had they recovered from their terror when they saw a human skeleton dangling from a tree near by. It, too, had been taken from the museum.

The library also was entered, and books and catalogues were disarranged. As a result an investigation is being made.

Brilliant Heads Are Wanted.

Winsted, Conn.—P. Davis Oakey of Hartford, who is not only a congressman, but president of the Bald Head Club of America, is enrolling as members of the organization the baldheaded members of congress, it has been learned by John Rodemeyer of Canaan, founder of the club. Mr. Oakey does not intend that any member of congress with a three inch bare spot on his scalp shall escape enrollment.

TODAY'S FASHION NOTE

A pretty conceit in natural color pongee trimmed with narrow silk braid. The skirt is plaited at both sides, while the blouse fastens at the left side, otherwise how would the dainty little trimming at the neck have a show? The high, turn-down collar is of crisp silk gauze. Six yards of 40-inch pongee are needed for this model.

Pictorial Review Blouse, No. 6,621. Sizes, 22 to 36 inches waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

PLANNING FOR THE COUNTRY.

It Needs a Propaganda Such as Awakened Municipalities.

City planning no longer needs defense, though it sometimes needs urging, says the Times of Washington.

But rural planning, touched upon at the recent conference of the American Civic association in Washington, needs the sort of propaganda work that city planning did two decades ago. It still seems to be the idea that man should look carefully after the city, but that Providence is directing the development of the country.

It was entirely logical, if startling, to have Professor Frank A. Waugh, a pioneer in country planning, advocate that the same care be exercised in placing country roads that is expended in laying out city streets; that the same attention be given to country homes that is given to the city blocks; that the same intelligence be expended on arranging a farm as in laying out a city subdivision.

There is plenty of public land, as he pointed out, in the country where beginnings may be made. There are the roads, which constitute one of the biggest problem; the schools and the churches. These need to be studied as to location and character of construction.

But in country, as in city, planning should center about the home. It is not exaggeration to say—for health records will bear it out—that the average farmhouse is a breeding place for disease.

Poor ventilation arrangement, lighting, heating, mark the average farmhouse even of more modern construction. Provision for the agricultural employee is worse, though that for his employer is bad enough. Arrangements for social intercourse are inadequate. The movement to get full value for investment in schoolhouses and churches has only just started. Moreover, with the growing road building the country faces the same condition that cities face—having alterations made in streets at enormous cost which might have been saved by intelligence in the first place.

Country planning is going to be harder than city planning, for its needs are going to be harder to demonstrate to those who will be benefited. John Jones of the city can recognize Tom Smith's needs when Tom Smith lives jam up against his wall, but Farmer Jones will find it harder to enthuse over Farmer Smith's needs when Smith lives halfway across the state.

Country planning, therefore, must be a state problem. It is too big for communities to handle alone. It requires that wise provision and supervision which can be had only by applying the best intelligence of a state to that portion where, with few exceptions, more than half its population lives and where that part of the population lives which keeps the city man clothed and fed.

PEARL 5,000,000 YEARS OLD.

Found on the Seacoast and Sent to Stanford University.

Stanford University, California.—A pearl estimated to have been formed 5,000,000 years ago and to be the oldest specimen of its kind in the world was found by Stanley C. Herold, a Stanford student, six months ago. The pearl will be presented to the Stanford museum.

The pearl and the cockleshell in which it was imbedded came to Stanford in a consignment of geologic material from the coast of the state of Washington.

According to university authorities, the pearl is of little value as a gem, but the oyster in which it was found originated, they said, probably in the paleozoic period.

"We have no record," said Herold, "of pearls having been formed before the time this one was created. It retains considerable luster and when thoroughly polished will regain more, but its 5,000,000 years of existence has taken out about 50 per cent of its luster.

"At the time this pearl was made the dinosaur, mastodon and sabre toothed tiger were in existence."

ROBINS ACCEPT HUMAN AID.

Man Replaces Fallen Nest and Birds Occupy It.

Seattle, Wash.—"I had always understood," said Crawford E. White, the attorney, who lives at 4203 Mead street, "that birds would invariably abandon a nest which had been disturbed by human hands.

"Something that happened in my yard the other day is a distinct exception to this rule. Two robins had a nest in the branches of a cedar tree. The cross limb which held up the nest fell away and let it down on the ground.

"I thought that would be the end of that nest. But the two birds stayed near it all the next day, and finally I got the idea of rebuilding it. I took a foot ladder and fastened the nest back securely in place with some ordinary hay baling wire.

"The robins apparently liked the rough job I made of it, for they came back and have been working together rebuilding the old nest."

GIRLS TOO BASHFUL.

Make Inquiries Over Phone Regarding Man Wishing to Wed.

St. Paul.—"Ambitious, but bashful," is the characterization Joseph Mounts, secretary to Chief of Police John J. O'Connor, made of a St. Paul young woman after a day of telephone calls regarding Elmer Johnson, rancher, of Sidney, Mon., who wrote to the chief making an offer of matrimony to a suitable St. Paul girl.

"Many girls," said Mr. Mounts, "called me asking about Johnson, but none would give me her name. I think the girls are passing up a good thing, because I think the man is on the level."

Johnson has 320 acres of fertile Montana land, two miles from a railroad, and says he is "well fixed."

"Some of the girls talked real fine, too," added Mr. Mounts, "and if Johnson had heard them maybe he would have liked to look them over. It's too bad they are so bashful."

Artful.

"Where did you find this wonderful follow up system? It would get money out of anybody."

"I simply compiled and adapted the letters my son sent me from college."—Kansas City Journal.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

French Designers Like The Simple Frock.

The single-breasted jacket is one of the style features of summer. Large pockets and a notched collar add much to the effectiveness of this model.

The single-breasted jacket expresses the last word in simplicity for the tailored frock. French designers are using it for suits made of faille, satin and taffeta. This model has a notched collar, large pockets that fasten over the belt and two-piece coat sleeves, with turn-back cuffs. The skirt is a two-piece design with a plait at center of back and front.

To make the costume requires 6 yards 40-inch taffeta.

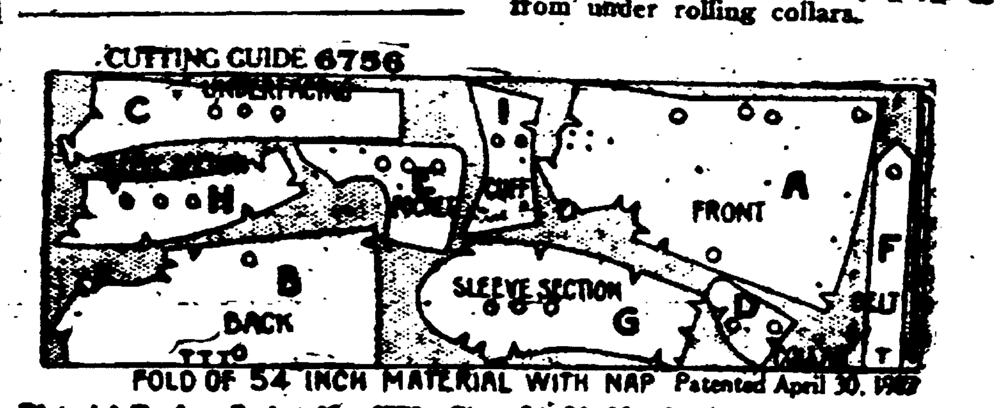
Although the suit is extremely easy to make, the jacket offers its greatest difficulties, perhaps, in the cutting. The back is cut on an open fold of the taffeta, but if 54-inch material is used the back and belt may be laid on a lengthwise fold. To avoid a seam in the back of the jacket, the pattern may be placed on a lengthwise fold of the material and the sides pieced to supply the additional width. The sleeve sections, underfacing, pocket, cuff and front are laid on a lengthwise thread of the silk.

Dark blues and checks seem the fashionable color schemes for spring tailormades, and if anything checks are going to be in greater demand than ever because of the difficulty manufacturers are experiencing in securing attractive blue fabrics.

Buttons are being used in larger quantities than ever. All of a sudden the mother-of-pearl button has sprung into popularity, and one sees it everywhere. It is an attractive decoration, but it will be necessary to guard against its being overdone.

Braid is use in many fascinating ways this season, nor is it limited to silks, satins and serges. A glance at the best model will show that braid trims linens and lawns quite extensively, while a new note in blouses and coats is introduced by the use of bits of braided embroidery peeping from under rolling collars.

CUTTING GUIDE 6756



Pictorial Review Jacket No. 6756. Sizes 34, 36, 38, 40, 42 and 44 inches bust and 14 to 20 years. Price, 15 cents. Skirt No. 6822. Sizes, 22 to 32 inches waist. Price, 15 cents.

Old Home Week Celebration Program

At last night's meeting of the Committee of 175 to arrange for the old home week celebration the following tentative program was prepared.

Sunday, July 2nd, 1916—

Services in every church in the morning by ministers who lived and preached here once.

Monster union service in the afternoon. Large community choir to sing and all priests and ministers to preach. Old timers to walk in a body to these services.

Monday, July 3rd, 1916—

Flower Carnival. All vehicles to be decorated and to compete for prizes.

Regular acquaintance meeting in the Tabernacle.

Dinner at the tabernacle.

Band Concert, Fireworks.

Tuesday, July 4th—

Oration by prominent speakers.

Gigantic entertainment on fair ground such as horse races, motorcycle races, bicycle races, etc.

Regular Fourth of July games as potato races, etc.

Parade of all organizations in the city.

Band Concerts, Fireworks, Public Dance.

Wednesday, July 5th—

Historical parade describing a certain event in the history of Fulton and Oswego County.

Band Concerts, Fireworks.

Thursday, July 6th—

Water pageant on Oswego river to Pathfinder Island.

Parade of Home Comers.

Friday, July 7th—

Farmer's picnic, water festival on Lake Neathawanta.

Parade of School Children.

Band Concerts, Fireworks.

Saturday, July 8th—

Goodbye, Band Concerts, Fireworks.

MILITARY MAN VISITED CITY

St. Jhon's Instructor Gave Talk Last Night on Preparedness at G. A. R. Post Rooms.

Edward Durston, instructor in military tactics at St. John's Military Academy, Manlius, N. Y., addressed a meeting of the Sons of Veterans, G. A. R., and Columbia Circle, Ladies of the G. A. R. at the Grand Army post rooms last night. His topic was "Preparedness—What it Means to the Citizen," and he described the necessity for proper and adequate preparedness at the present time in this country.

Comrade Diston, of the G. A. R., spoke on the work of placing the country in a proper defensive condition, and compared the means of warfare used at the present timewith the implements in use during the Civil War. He touched on the immigration question, and the hyphen, and expressed himself certain that most of the naturalized Americans could be depended upon to assist the country in waging a defensive war at any time.

Sisters Hamilton, Waugh, Wolever and Talman, made short addresses covering the work of the women in times of war, and reviewing the aid they have given in the past to the armies of this country.

A trio, comprising Messrs. Goodson, Knapp and Ferris sang several patriotic numbers, including the "Battle Hymn of the Republic," "Just Before the Battle, Mother," and "The Battle Cry of Freedom," Brother F. Connell, of Syracuse, spoke of "The Birth of Old Glory."

KNIGHTS TO GIVE A DANCING PARTY

The Knights of Columbus will hold a dancing party in the lodge rooms of the Council on Oneida street to-morrow evening. The committee in charge has completed extensive arrangements for the affair, which promises to be one of the most successful ever given by the Knights, an special music, under the direction of Prof. Loomis, of Oswego, has been engaged for the event. A banjo player, Bert Adkins, of this city, with drums and traps, and David Carrol at the piano will comprise the orchestra.

Cards of invitation have been sent out by the committee in charge, which is headed by Edward McGovern, assisted by James Lanigan, Arthur Davenport and Edward McNulty.

WEATHER FORECAST.

Moderate winds mostly south west; partly cloudy to-night and Wednesday.

MR. JOHN TORNEY.

John Torney, of 316 Rochester street, a well known and highly respected resident of this city, died at 8:30 this morning, after a short illness which was occasioned by a nervous breakdown. Mr. Torney's death came as a great shock to his friends here, many of whom did not know that he was seriously ill.

The deceased had lived in this city practically all his life, and for many years was employed as master mechanic at the Battle Island Pulp Mill. After the Battle Island mill ceased operations, Mr. Torney took a position in the same capacity with the American Woollen Company.

He is survived by his widow, his mother, and three children, Archie, Bella and Gordon Torney. Undertaker Edward Cole is in charge of the arrangements for the funeral.

CENSUS OF BIRDS WILL BE TAKEN

Local Observers to Make Report to Biological Bureau.

TO COVER ENTIRE COUNTRY

Valuable Information Concerning Character and Kind of Birds Has Been Obtained by Previous Counts—West Especially Called Upon to Co-operate In the Work.

A bird census will be taken during the breeding season this year by the bureau of biological survey of the United States department of agriculture. This will be the third annual bird count for the country taken by the federal government.

In making this survey the bureau will rely largely on persons interested in bird life who will agree to act as volunteer enumerators and count the different kinds of birds to be found near their homes in a farm or woodland tract of from forty to eighty acres. The agricultural department has been furnished with valuable information concerning the character, number and distribution of the bird population through similar counts made by unpaid observers during the past two summers.

This year the ornithologists of the department wish particularly to secure a large number of volunteers in the west to report on the bird life on the plains, the semiarid regions, the deserts and the mountains in that part of the United States. Especial attention also is to be given to securing data as to the birds in the fruit districts of the Pacific coast and in the south Atlantic and gulf states.

The information collected this year, it is believed, will be of special value in enabling the department to meet the effect of state and national bird laws and also in determining what relationship exists between bird life and the prevalence of locusts, grasshoppers and other insect pests in different localities.

Results to Be Approximate.

As it is impossible to make an actual count of all the birds in any extended district each enumerator is asked to report only upon the number of birds breeding in a selected area, in the country or in suburban districts. From the figures thus obtained those in charge of the work are able to approximate the total number of birds of each kind in different parts of the country.

Enumerators who wish to report on birds on farms are asked to choose an area which includes farm buildings, shade trees, orchards, plowed land, pasture, meadow or swamp, but not very much woodland. The enumerator begins his survey at daylight some morning and zigzags back and forth in the selected area, counting the male birds. Early in the morning during the last of May or the first week of June every male bird should be in full song and therefore be easily counted. The count of one day is to be verified by observation on several mornings.

The height of the breeding season should be chosen for this work. In the latitude of Washington the first part of June is the proper date for the count. In the latitude of Boston the work should begin a week later, and south of Washington even an earlier date should be selected.

"The work calls for considerable knowledge of birds, and only those who can readily distinguish the different kinds should undertake to make returns for their localities," says a statement by the department.

GAS MASK MEETS TEST.

Invention of New York College Man Proves Most Successful.

A gas mask designed for use in trench warfare, invented and patented by two instructors in chemistry in the College of the City of New York, has successfully passed tests of the medical division of the army. The inventors and patentees are William A. Prager and William H. Estabrooke, in collaboration with Dr. Neish of Columbia university.

Dr. Estabrooke has received a letter from the chief of staff of the medical division pronouncing the device satisfactory and stating that the tests to which it was subjected were more severe than those to be met in actual warfare. The United States army has not yet decided to add these masks to its equipment.

The mask may be of use in several industries and will be placed on the market soon. It is large enough to fit over the regulation army hat. It allows a foot of space in front and a few inches about the back and sides of the head. The bottom fits snugly to the neck. An exterior layer is composed of several chemicals and metals which filter the mixture of gas and air sent against it and permit only the air to enter.

In one of the tests a man wearing one of the hoods sat for several hours while chlorine was being pumped at his head. He suffered no ill effects. The external surface combined with the poisonous fumes gave forth a new substance inhalable without injury.

The mask can be recharged while being worn. It is somewhat like the English model. Thick celluloid pieces permit vision.

NO TRACE FOUND OF MISSING BLACKSMITH

Pulaski—There seems to be no solution of the mystery surrounding the sudden and strange disappearance of Joseph Manderville, a Pulaski blacksmith, who left his home in Church street on the morning of April 28. Bidding his wife goodbye, the blacksmith informed her that he was going to Watertown to buy goods for a new shop which he had the week previous opened in Maple avenue. Manderville was seen in Watertown the following day, having purchased a bill of goods of a hardware concern, and since that time all trace of him has been lost.

Manderville claimed Columbus, O., as his home and the facts of his strange disappearance were forwarded to Charles E. Carter, chief of police of that city. A letter received here Saturday from the chief stated among other things that Manderville was unknown to his department and that a sharp lookout would be kept.

NEW YORKER PLANTS TREES IN FRANKLIN CO.

Watertown—Richard James Donovan, of New York, is busily engaged in planting 40,000 white pine trees in Pine Park, Franklin county, which work he has been doing since 1912. Up to last year he had planted 430,000 pine trees, and this year's planting will bring the number up to 470,000. Nearly all the trees are white pine, with a few Scotch and Norway pine where experts recommended. The state is aiding in the reforestation by furnishing small trees at cost which is from $1.50 to $4 a thousand. The cost of planting varies from $2 to $7 an acre, depending on the character of the ground. Mr. Donovan who is a New York lawyer, is much interested in forest preserves and is anxious to have an association formed for the reforestation in the Adirondacks.

The Artichoke.

The artichoke has nothing to do with art or the choking of it. The artichoke is an innocent vegetable known to the Arabians as the ardischauki, or earth thorn. The Jerusalem artichoke was never seen near Jerusalem. Its first name is a corruption of the Italian girasole, which means turning to the sun. It is a species of sunflower, bearing a tuber like that of a potato.

The City Clerk As A Purchasing Agent

(Continued from Page One)

Board instructed Mr. Rumsey to order the removal of the dirt at once, or move it at the city's expense and charge it to Mr. Crandall. A bad hole on Nirth 6th street near Van Buren street, and the condition of the sidewalk near in front of the Mason excelsior mill on North 1st street, were causes for other complaints. It was stated that water forms a pool on the Mason walk and passersby are obliged to walk in the road. The Superintendent of the Board was directed to take steps to remedy these matters.

An ambitious citizen of the West Side, with the high cost of living in mind, perhaps, petitioned the Board through Mayor Lewis for permission to use the undeveloped part of Hart street as a vegetable garden. This unusual request was granted.

The Western Union Telegraph Company asked for a permit to suspend an electric sign over the walk before its office on East 1st street. Commissioner O'Brien brought up the question of a bond, and this remark led to a general discussion regarding the advisability of permitting merchants to hang electric signs over the walk. It appears that very few of the business men have protected the city with bonds for their signs, and according to City Attorney Hillick, any accident due to the falling of a street sign would furnish a case for damages against the city, provided the owner of the sign had been given a permit. In his opinion, every sign owner should be compelled to give a substantial bond which would cover the city's liability in case of accident.

Commissioner O'Brien was of the opinion that a sign on the building, parallel to it, was sufficient to make known the identity of the business, and said that many overhanging signs in the city were eye-sores, obstructed the rays of street lights, and were dangerous to pedestrians. He cited the case of one merchant who has three large signs suspended over the walk and asked whether or not this man had given a bond. No one present seemed to know. Mr. Rumsey was delegated to interview the owners of street signs and report the names of those who have filed no bonds with the city.

Mr. Rumsey reported that the new street flusher was enroute to this city, and the freight bill of $24.30 was ordered paid. He also requested the purchase of three hydrant valves, which can be attached to hydrants when sprinkling carts are being filled, and which save the waste of large quantities of water. The valves cost $7 each, and purchase of them was not decided upon.

Edward Van Amburg appeared before the Board to learn whether or not a permit was to be given him for the installation of a gas tank under the sidewalk on his property on West 1st street. A petition protesting against the project was found lying on the table when the Board gathered last night, and as it was not filed with the minutes, the Times' representative was refused permission to look at it. Mayor Lewis stated that the Board would make personal investigation of conditions in the vicinity of the Van Amburg store, with a view to learning the possibilities of additional fire risk to surrounding buildings, and the woolen mill. Mr. Van Amburg has already purchased the pump for his tank, and is now waiting for his permit.

A close inspection of the city charter last night failed to show specifically that the Board of Public Works has any authority to grant or refuse permission for the installation of a gasoline tank under the sidewalk, although it has jurisdiction over obstructions in the street and on the walks.

CARRANZA SAYS GET OUT OF HIS TROUBLED LAND

That is Text of Note Which He Sent to Washington, Claiming Expedition is Violation of Sovereignty.

Washington—Although without official information, General Carranza's new note to the United States demands the immediate withdrawal of all American troops from Mexican territory.

The action of the Carranza government in ordering 30,0000 troops into Northern Mexico, instead of the 10,000 agreed on by Generals Scott and Obregon, was regarded by army officers to-day as a menace to the United States.

No explanation was given in official reports announcing this heavy troop movement, but two views were generally expressed. They were:

First—That Carranza, by assembling the largest army he has yet had in the vicinity of the border hopes to demonstrate to the United State his ability to protect he American side from invasion, thus making the continued presence of American troops in Mexico unnecessary.

Second—That Carranza, by a show of force outnumbering the American troops in Mexico, plans this troop movement to back up his demand for withdrawal by force of arms.

One thing on which all officials agreed was that no consideration would be given to the request for immediate withdrawal.

General Carranza's attitude toward the presence of American troops in Mexico, as given in his communications with this Government, is as follows:

"He will not taint the sovereignty of Mexico by permitting armed forces of the United States to exercise privileges in that country which the troops of Mexico cannot enjoy in the United States.

President Wilson and Secretary of State Lansing are attempting through the guise of protecting the border to make a protectorate of Mexico, which neither he nor his people will tolerate.

MADERO GARRISON STIRS UP CIVILIANS

Headquarters, Namiquipa, Mexico, —Soldiers of the Carranza garrison at Madera are doing their utmost to arouse the civilian natives against General Pershing's men. Anti-American feeling is being increased daily through the efforts of Carranza's own soldiers in and around Madera, thirty miles west of the camp here.

Reports to General Pershing brought this information.

Detachments of cavalry are still engaged in patrol work south of headquarters but the expedition on the whole is practically inactive.

There are no Carranza forces in this vicinity, nor along the line of communication. They are apparently giving the Americans a wide berth. Small detachments of de facto government troops remain in the neighborhood of San Antonio, south of here and Conolia Juarez, eighteen miles from Casas Grandes.

General Pershing stated to-day that while he appreciated the donations of candies and other luxuries made by women in the States to the troops, his men are supplied now with all field necessities.

PEACOCK'S "FORTY-FIVERS" DIRECTED AGAINST THIS CITY'S SINS OF OMISSION

Luther Knox Peacock addressed an audience of 2,200 people at the Fulton tabernacle last night, and in the course of his remarks, poured some hot shot into the ranks of the liquor men, gamblers and business men of certain classes, of this city. The business man who compels his employes to work on Sunday came in for bitter condemnation, and the revivalist held that an employer of this class was answerable to his God for his employe's sin. He announced that he knew of the existence of a gambling dive in this city which was operating under the noses of the police, and said he had positive information that a woman in a local saloon made a practice of getting young girls drunk, and "God only knows what happens to them after that," said Mr. Peacock.

If Mr. Peacock's remarks of last evening are a forecast of the trend of his sermons during the coming week, the backsliders of this city are in for a warm period of publicity, as the evangelist's statements are specific when he begins to talk on municipal evils, and he minces no words.

Prayer meeting Districts Nos. 1, 2, 3, 4 and 21, 22 and 23 met at the Plaza at 7:15 last night and marched in a body to the tabernacle, preceded by a fife and drum corps. Three hundred men and women were in line, and each district carried a placard bearing its name. District No. 23 put on a yell when the members reached the tabernacle, as follows:

Who are we, We are District 23!
Peacock, Peacock, who is he?
He's the man for Christ, you see!"

District No. 1 had a special song written which they sang to an old revival tune. When Chorister Warth asked for the audience's favorite song "The Brewer's Big Horses" was requested, and the male chorus and the audience sang the famous Sunday song with a will. Sirens, rattles, bells and horns were brought into play in the rendering of the number.

Mr. Peacock handed a few stiff punches to the church members in this city who were opposing the tabernacle and refused to attend it because they thought they were too good, and too cultured for revivals. He classed them as hypocrites. In denouncing saloon keepers he said he pitied the man who was engaged in the liquor traffic.

"I'm sick of this business of knocking the poor drunkards," said the evangelist, "I blame the man who votes to license the sale of liquor which makes a man drunk, and the man who does this is lower than the beast creation."

NEW SUCCESS FOR AUSTRIA

London—The Austrians continue successfully to prosecute their offensive against the Italians in the Southern Tyrol. They have advanced on both sides of the Sugana valley, according to the Vienna statement. The Austrian gains and the fact that the Italians have again retired before the onrush of the attacking columns are admitted by Rome.

A Milan dispatch states that the Austrians are advancing between Lake Garda and the Brenta with 2,000 guns.

On the Isonzo front, Rome reports, Bulgarian prisoners have been taken with Austrians, indicating that Bulgaria has joined hands with Austria in the recent gigantic offensive.

The Italian report states that the defending army in the Sugana valley "fell back gradually on their main lines after repulsing Austrian attacks throughout the day."

The Austrian war office report issued to-day in Vienna says:

"Italian Front:—Our troops advanced on both sides of the Sugana Valley. The Italians hastily fled from Borgo about five miles north of the Italian frontier.)

"The Czar Corps crossed the border and harried the defeated Italians. The Italian fortification of Monte Velna is already in our hands.

"The number of cannon captured since May 16 has increased to 188.

The official statement issued at the Italian Headquarters to-night says:

"Between Lake Garda and the Adige the Austrians are massing great forces in the Riva zone.

"THE UNPARDONABLE SIN" Mark 3:28-29

Last night Evangelist Peacock preached one of his famous sermons, "The Unpardonable Sin," taking his text from Mark 3:28-29. The sermon in part, follows

Mark 3:28-29: "Verily I say unto you, all sins shall be forgiven unto the sons of men and blasphemies wherewith soever they shall blaspheme; but he that shall blaspheme against the Holy Spirit hath never forgiveness, but is in danger of eternal damnation.

Some people have an idea that every person shall be saved. Now, I have no disposition whatever to wound the feelings of any person. You have discovered by this time I am not here to knock against churches or fight against religious sects but to preach the gospel as God has revealed it unto me. I would consider myself a coward and unworthy of the name of Jesus Christ if I were to pass by some of the unpleasant things simply because some people do not like to hear about them. I believe just as true as I look into your face that there is a heaven and there is a hell and I believe we will go to one place or the other according to the teaching of God's word. These passages of scripture which I have read in your hearing certainly put a crimp in the doctrine of universal salvation. According to the teaching of these verses there is a place of future punishment. The Bible says "all manner of sin and blasphemy shall be forgiven unto men, but the blasphemy against the Holy Ghost shall not be forgiven unto men." Whosoever speaketh a word against the Son of man it shall be forgiven him, but whosoever speaketh against the Holy Ghost, it shall not be forgiven him, neither in this world nor in the world to come."

What Constitutes Sin.

Scripture like this should make men think. The Bible says "Be not deceived, God is not mocked, whatsoever a man soweth that shall he also reap." If we "sow to the flesh we shall of the flesh reap corruption but if we sow to the spirit we shall of the spirit reap life exerlasting." The Bible also tells us the "wages of sin is death." We are told that "the soul that sinneth it shall die." He that speaketh against the Holy Spirit "it, shall not be forgiven him neither in this world nor in the world to come."

No doubt most of us have our opinions as to what constitutes the sin against the Holy Spirit. One person may think one thing, another may think another but it is clearly revealed to us in these verses which I have quoted in your hearing. Some imagine it could be committed only by those seeing Jesus, by those who were permitted to hear him preach, by those witnessing the miracles performed by Christ, by those who lived and walked upon the earth at the time Christ was on the earth, but I know any unsaved person is in danger of sinning against the Holy Spirit.

Under the Mosaic law there were certain crimes for which no expiation could be such as willful murder and blasphemy. These were debarred from the priestly code of mediation, but the only sin debarred from the mediation of Jesus Christ is the sin against the Holy Spirit. Immediately someone says that is the sin against the Holy Spirit? Who can commit it? How does it show itself? How may I know I have committed it? Why will not God forgive it?

1st. What is the sin against the Holy Spirit? Matt. 12:31-32. "Wherefore I say unto you, all manner of sin and blasphemy shall be forgiven unto men but the blasphemy against the Holy Ghost will not be forgiven unto men. And whosoever speaketh a word against the Son of man, it shall be forgiven him; but whosoever speaketh against the Holy Ghost, it shall not be forgiven, neither in this world, neither in the world to come.

Blasphemy against Jesus Christ is not an unpardonable sin and never has been. A great many people who have blasphemed the name of Jesus are enjoying the blessings of Heaven. many are on their way to Heaven. No doubt many in the future who blaspheme the name of Jesus Christ will be saved. But if we blaspheme the spirit of God there is neither forgiveness in this world nor the world to come. Murder is not an unpardonable sin. Paul's hands were red with blood of people he persecuted because he was an enemy of Christ. H was not struck down with the lightning flash of God's wrath but with the lightning of God's love in order that the love of God might be manifested unto him. Many murderers have been saved through the atoning blood of Christ. It is not, adultery.

If it were adultery many people in

(Continued on Page Five)

ASSAULT CASE IN CITY COURT

With a badly bruised visage as mute evidence of violence done him, Nicholas Laboda, of Pine street, appeared in city court this morning against John Krupa, also of the west side, charging him with assault in the third degree, Laboda works at the Dilts' machine shop and when he returned home from work late last night stopped in a barroom on the west side to get some medicine. He met Krupa there, and in the course of a general conversation, Krupa remarked that he had "had it in" for Laboda for about two years, and had come to the conclusion that the time was ripe for vengeance.

Laboda decided about that time to go home, and he had reached the corner of Pine and West 1st streets, when Krupa made a flank attack, and knocked him down with a mighty wallop. As Laboda lay prone, Krupa executed a place kick with Laboda's head as the football, and his heavy shoe landed square in the fallen man's eye. Krupa ran off, as other men approached, and blinded by the blood, Laboda made his way to Dr. Anderson's where his injuries were treated. He immediately swore out a warrant for Krupa's arrest, and Officer Frank Smith served the warrant on Krupa this morning.

Krupa was represented by Herbert J. Fanning and James R. Somers appeared to press the complaint.

MEXICO RELIES UPON JAPAN AS WAR ALLY

Mexico City (via Galveston, Texas) —In case of war between Mexico and the United States, Japan will be an active ally of Mexico, it is stated here.

Japanese influence is seen on all sides.

The inflexible attitude of the Mexican Government is said to be directly attributable to the fact that it will have not only the moral but also the material support of Japan in any contingency.

WEATHER FORECAST.

Partly cloudy to-night and Thursday. General to moderate southwest winds, becoming variable.

GERMANS TAKE VILLAGE MILES FROM VERDUN

Fought for Hours to Regain Lost Ground From French Who Sent Regiment After Regiment Against Them.

Paris—German troops succeeded this morning in penetrating the village of Cumieres, nine miles northwest of Verdun, after making a desperate stand on the west bank of the Meuse.

The fighting on the western side of the Meuse has been almost equally severe. There the Frach by their offensive, which began on Monday morning,had established their positions on Hill 304 and Dead Man Hill. During Monday two German counter attacks were made on the former, but both failed.

Two more assaults were made to-day in great force on Dead Man Hill. The first failed at its outset; in the second the Germans burst into the first line trenches, but were driven out.

Iron troops were pitted against the Kaiser's cherished Brandenburgers in yesterday's battle for Fort Douaumont, which will live in France's annals as one of her most glorious military achievements

The first eye-witness accounts which reached Paris this evening represent the battle as unsurpassed for the savagery with which the finest fighters of both countries disputed the 388 metres height on which stands the fort which the Kaiser described as the "keystone to Verdun" when his Grandenburg corps seized it on February 24.

French Spring a Surprise.

I was able to-day to obtain a first hand description of this gigantic struggle from an officer who witnessed it.

The battle began in the morning when the French opened a murderous fire on the whole fort zone. They had the exact range of every spot the Grmans occupied, and so ploughed was the sunbaked soil with exploding shells that a huge dust-cloud soon enveloped the scene. At first the Germans replied shot for shot, searching vainly for the skilfully concealed French batteries.

Suddenly, General Nivelle doubled his batteries, till the din of battle rose to the greatest limit yet reached. With complete secrecy Nivelle had massed gun upon gun for his withering surprise attack on the biggest prize which the Germans had gained at Verdun.

When, later, prisoners began to stream to the French rear—crazed, unnerved and trembling with terror—it was learned that the terrific gunfire was such as no troops could be expected to stand against.

Position Won in 10 Minutes.

The French infantrys' orders were to throw back the German, recapture Douaumont and hold on at all costs. Regiments dashed over the fire-swept groun, separating the defence works, avoiding heavy loss from the German screen fire by dashing forward at great speed in extended formation until approaching the trench ramparts, they grew shoulder to shoulder and shrieking rather than singing the Marseilles, leaped among the Brandenburgers.

The foe was caught short of liquid flames an the French supremacy with the bayonet wrought terrible carnage among them. The advance position was won in the marvellously short spell of ten minutes. Then, without taking breath, the troops threw themselves on the second line.

Here they met a more stubborn defense. Twice they went forward and twice they were pressed back. Then the third onslaught bore down all resistance.

WHEN THE FLAG GOES BY

With the approach of Memory Day there is aroused within the body of the most phlegmatic person just a little more reverence for American institutions than is found there during normal times. Memory Day, or Memorial Day, is distinctly American. It is honored in the main and desecrated in spots, which is not as it should be; but page after page has been written upon the subject of holding the day in greater reverence than of recent years, and those writings are sufficient proof of the temper of the people.

If we do not care to accept the pleas of those who would maintain the sacredness of the day, then let us take a course easier for many by remembering our birthright when the flag goes by.

We Americans make much of our reverence for institutions but as a rule that is all there is to it; and yet at times there are encouraging signs of changes coming over the people. The changes are coming in spots, one of the spots most noticeable and, perhaps, most needful, is on Manhattan Island. Now New Yorkers it must be remembered are not famous for their recognition of American institutions, therefore some honor is due the police department there for issuing an order to its members to salute the American flag whenever it is carried in parade. That was surely a step in the right direction, and may it reach into some more remote corners of the country.

In commenting upon the disrespect shown the flag of our country, a Texas newspaper has the following to say:

"What has been responsible for the falling off of outward signs of respect toward the flag in recent years is not altogether clear. Possibly it is merely carelessness; perhaps shows of the George Cohan variety have had something to do with cheapening the national emblem in the popular mind.

"Someone once said—and brought down upon himself an avalanche of attack by saying it—that the American flag is 'nothing but a tri-colored fabric, sewn together.' He quite lost sight of the all important fact that this nation's flag—any nation's flag, for that matter, to those who belong under its folds—it the concrete emblem of patriotism and of the ideals that the nation stands for. It stands in the eye as representing the country itself.

"When men follow a flag to victory or death over stricken fields, it is not a tri-colored fabric that they win for or die for, but the principle or the idea that the flag means.

"The custom of saluting the flag, of showing the banner the outward evidence of respect, is a good one because back of it is the sentiment of respect and love toward that which the stars and strips represents. No soldier in the regular army allows a flag to pass him without coming to attention and removing his hat. Men who have once been in the army may be identified in crowds along the line of parade by the fact that they still keep up the practice.

"Sometimes this makes them conspicuous. It ought not to. It would be a good thing if everyone—soldier, policeman and civilian, man, woman and child—would gain the habit of standing respectfully facing it while the flag goes by and if all the men and boys removed their hats.

"This is a good year to start doing such a thing as this. With most of the remainder of the world fighting over territorial aggression and political and economical jealousies, we Americans are able to appreciate more than ever before just what our flag means. And the painful lesson we have learned during the last twelve months, that there are some men who call themselves Americans who do not care as much for our flag as they do for some other flag, gives us an additional reason for displaying our sentiment of loyalty on all proper public occasions.

"Tell the children, good Americans, to salute when the flag goes by. And set them the example."

TREMENDOUS FORWARD MOVEMENT

"Efficiency" and "Thrift" are the two dynamic words that constitute the slogan of the times. "Dynamic" is the right word for there is "dynamite" in the air that is destined to blow the old forms and methods of living to kingdom come. The man abreast of the times who has his mental wireless apparatus up to catch the vibrations of the new day can feel the prodding sensations of the new order of things and is putting his house in order to join the onward movement.

Do you note that the old things have passed away and all things have become new? In old days mankind dreamed of the day when some horse, with winged feet like Mercury, the messenger of the gods, would be able to make a mile in two minutes. Only last Saturday at Sheapshead Bay speedway Gil Anderson, in a Stutz car went 350 miles at an average speed of 102.6 miles per hour. What live individual would tie his future to a slowgoing two minute horse? The ordinary copper wire telephone but recently supplanted the slow going mail coach and now the ethereal current, laden with the tones of the human voice has torn itself loose from the obstructing wire and with nothing for a medium but the air and the harmoniously attuned call from the receiver in the distance has leaped across the continnent and hoary old ocean, and in the flash of the lightning has belted the earth with its message. Who would tie his future to the old slow-plodding mail coach?

Better, speedier, more perfect work; larger, better, fuller returns are demanded from office and field, from farm and factory that shall measure up to the quickening and intensifying of the means of communication and transportation and production, and the live men and women have caught the spirit of "Efficiency" and "Thrift," the expression that go forth as the slogan, and these will only suffice until something more expressive and intense is coined to convey the tenseness of the times and the tremendous pressure upward and to the front.

The new "dynamite" that is in the air is touching everything in state and church and office and farm and forum, and the person who stands in the way and tries to block progress will get run over, and the man who stands on the sidewalk, makes mouths and refuses to join the procession will be left standing on the sidewalk while the great cavalcade of progress goes straight forward. The only thing to do if you want to be "in it" is to get into the band wagon right at the head of the procession. That's the only safe place these tense days.

The businessman, the preacher, the physician, the lawyer, the salesman, the newspaper the manufacturer, the farmer, who catches the new spirit, which is in the air and gets into line does well. The lazy, the laggard, the coward, the craven will be lost in the dust of the hustling.—Logansport (Ind.) Reporter.

Opinions

RESPECTFULLY SUBMITTED WITHOUT ARGUMENT

Mr. Wilson's remark that every man who comes to fill an important political position either grows or swells is subject to amendment.

Some shrink.

A natural aversion to hurting anybody's feelings, as well as a great deal of respect for the office of Chief Magistrate of the Republic, restrains us from going into nice details to prove the shrinking process by the most eminent example on view in Washington.

Still we stick to the amendment.—N. Y. American.

A WARNING TO G. O. P. LEADERS

Do those whom a certain fondness for the obsolete phrase still moves us to call the leaders of the Republican Party desire to re-elect Woodrow Wilson?

The thing can be done. In fact it can be done with ease and with merely incidental campaign activities, if only Penrose, Barnes, Gallinger and a certain number of equally eminent gentlemen turn their entire effort to the task.

The Democratic Party cannot save Mr. Wilson, but the Republican Party can save him as easily as it assumed the responsibility for electing him four years ago.

If the men who are running Republican affairs at the present moment believe that the people of the United States dislike or distrust Mr. Wilson as much as they despise these Republican leaders, The Tribune thinks that they are in error, in grievous error.—N. Y. Tribune.

OVERLAND CO. ADDS SPACE

According to information received by R. L. McCully, the completion of another big factory structure at the plant of The Willys-Overland Company this week gives the Toledo automobile manufacturers an additional 500,000 square feet of floor space available for immediate use. This new unit of the Overland will be occupied at once by various departments of the factory proper which in the past few months have outgrown their old quarters.

The building, known as Number 49, is five stories high, built of reinforced concrete throughout and is one of the largest of the many new structures erected by the Overland Company. The entire amount of space will be given over to the manufacture of closed cars, a branch of the business which in the past year has developed beyond all expectations of Overland officials.

The first and second floors of the new structure will be used for final testing, the third floor for assembling of parts, and the fourth floor for trimming and painting of closed cars. The fifth floor will be used by the top and trimming departments and 700 power machines for sewing and stitching purposes already have been installed there. This is the only department in the entire Overland plant, outside of the administration offices, where women will be employed. A restaurant and rest room has been provided for them and this together with the fact that the top floor is equipped with every modern convenience in the way of heating, lighting and ventilation will give the 800 women employed there advantages equal to those now enjoyed by the girls in the offices.

Some idea of the mammoth size of the building can be gained by comparing it with the area covered by an average city block which in most instances is about 2 1-2 acres. The floor space are of the new Overland structure amounts to nearly 12 acres, which means that if it were spread over a section of a city it would cover nearly five full blocks.

When John N. Willys, president of the company decided to increase the manufacturing facilities of the plant to the point where it would be possible to build 1,000 motor cars a day, he mapped out a building program that would add 25 acres of floor space to the factory. That was less than a year ago and today the new factory additions are almost completed. Shipments at the present time average nearly 900 cars per day, and this will be increased to 1,000 cars when the last of the new buildings are completed and in operation.

No charge made for this space.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

A stranger walked in the office of the Chamber of Commerce yesterday afternoon about six o'clock and informed us that a man (by the way, we know who the man is) spoke in a very unfavorable way about the city of FULTON in a PUBLIC PLACE. Now, we are, thanks to the good God who gave it to us, living in a free country and can say anything we like, as long as we do not insult or harm somebody. But at the same time, we also have the liberty to discuss the matter in the open and we take herewith the liberty to tell we think of the man in question.

He has been in business for quite a number of years in the city and we believe that he received reasonable returns for his investment; in fact we know that he is able to maintain a staff of about three men (besides himself) and we therefor have a certain right to maintain that his business cannot be so very bad after all. This man told a few people in that public place that FULTON was going to that famous "warmer climate" very fast and that for all sorts of reasons, people were leaving here; factories were closed up; houses were vacant and more stories of distress, just as one may expect to be gossiped about in that kind of public place. The fact remains however, that we have not been informed as yet that this man is going to close up his business, for lack of patronage or that he is going to move his establishment to better territory. It is again an example what harm that soft of gossip will do. The stranger in question was about to buy a certain business in the city and would, according to all probabilities, have decided that this really WAS a bum city, had it not been that he is broad minded and does not believe in that sort of talk. Now this local business man should know better; he should know that if the city was on the bum, that KNOCKING IT WILL NOT BRING ANY NEW CUSTOMERS TO HIS PLACE OF BUSINESS. OR ANY OTHER MAN'S PLACE OF BUSINESS and that only through BOOSTING one can balance the shortage made according to that man. It may be true that certain employment agencies are coming here to get help; but is it not true that they have been doing that more than once, when all of a sudden a certain business in the United States prospered and the manufacturers were up against it for labor? Is it not true that mills have been closed before and will be closed all over the world, for that matter, for certain periods? Is it not true that we have had adverse conditions in FULTON on many occasions and that we ARE STILL HERE? Is it not true that the FULTON SAVINGS BANK has on deposit close to TWO MILLION DOLLARS; the First National Bank has on deposit close to ONE MILLION DOLLARS and so has the Citizens National Bank. What have you got to say about this my dear friend Mr. Croaker? We are NEVER telling people that there are no better places than FULTON, because we would be foolish in making such a statement, but YOU HAVE TO GO A VERY LONG WAY TO FIND THE EQUAL OF FULTON and we challenge you for an open debate on the question, time and place to be set by you. QUIT YOUR KNOCKING, because you are MAKING A LIVING HERE. Don't abuse your customers by telling them that they really belong to a no good town, because they PATRONIZE YOU. QUIT chewing the rag and help to rebuild FULTON, if you think it NEEDS rebuilding. Good bye, old top.

* * *

Notwithstanding all the efforts of KNOCKERS the deposits in the local banks are getting better; conditions are getting better; stores are doing a better business and thank God, we still live in FULTON.

* * *

FULTON is the QUALITY CITY of an EMPIRE STATE.

* * *

In Fulton quality counts first; you can get the best goods in this city you wish for your money.

* * *

FULTON was, is and will be the best city of its size in the State of New York.

APPROPRIATIONS REDUCED; NO DIRECT STATE TAX

Governor Whitman Concludes His Work on the Appropriation Bill and Renders an Account of His Stewardship---New Itemized Budget Will Return Between $2,000,000 and $3,000,000 to the State Treasury For Use Next Year---Over Half a Million Saved on Canal Operation---His Reason For Declining to Tamper With the Sinking Funds.

Albany, May 22.—In the statement accompanying his action on the appropriation bill Governor Whitman points out that this year's appropriations, exclusive of canal construction, are $1,241,821.28 less than last year's.

Including canal construction the appropriations are $4,895,821.78 less than last year's.

There will be no direct tax this year.

The segregated budget now in use will return to the state treasury for use next year between $2,000,000 and $3,000,000.

The appropriation for the operation of the canal through the department of public works is over half a million dollars less this year than it was last year.

The proposal of Mayor Mitchel to veto items for interest on state bonds and contributions to the sinking funds was not followed for the reason that such action would be illegal and unconstitutional. Had these items been vetoed the comptroller would be compelled by the constitution and the statutes to call upon the counties for a direct tax to the amount of these vetoes.

The proposal of Mayor Mitchel that the item for state aid to town highways was not followed for the reason that it would have meant the repudiation of a statutory obligation.

The governor disposes of the allegation by Mayor Mitchel that 2,500 salary increases had been made in the appropriation bill by an analysis of all the salary changes, which shows that the increase is not 2,500, but 485, most of them in the low class service of the insane hospitals and charitable institutions.

The change of the fiscal year makes for a great improvement in budget making. It gives to the comptroller a better opportunity for audit control. Provision can now be made in the appropriation bill for a full year, a thing impossible when the fiscal year closed six months after the adjournment of the legislature.

The full text of the statement follows:

STATE OF NEW YORK EXECUTIVE CHAMBER, ALBANY, MAY 20, 1916.

Statement by the Governor on Appropriation Bills of the Legislative Session of 1916.

The appropriation bills passed by the legislature of 1916, exclusive of reappropriations, appropriations for bond accounts and appropriations between funds not affecting the total cost of government, total $61,004,456.08. Of this amount appropriations aggregating $59,103,450.08 have been approved, and items aggregating $1,901,006 have been vetoed. The appropriations for 1915 were $63,997,271.36, including $3,654,000 for canal construction, making a total for other than canal construction $60,343,271.36, showing a decrease for 1916 below 1915 (exclusive of canal construction) of $1,241,821.28.

A total of $383,011.04 of reappropriation items approved by the legislature has been vetoed. Contrary to the situation last year, the veto of these items represents an increase in the resources of the state treasury to an equal amount, the funds released thereby being available for other needs of government.

The main appropriation bill passed by the legislature, together with the two principal highway maintenance appropriations, aggregated $59,840,087.86 as compared with the governor's tentative budget proposal of $57,161,517.44, or a net increase over the tentative proposal of $1,678,570.42. The appropriations as approved show a net increase over the tentative proposal of $1,941,932.64.

To arrive at a proper basis of comparison, however, each of these amounts should be increased by approximately $1,000,000, representing a reduction in the appropriation bill for debt service below the amount in the governor's tentative proposal for the same purpose, the reduction being due to the elimination of the September interests from the total in the tentative budget.

Items Which Account For Increase.

The principal items making up this increase of approved appropriations over the tentative budget are the following:

National guard mobilization	$500,000.00
Military training	100,000.00
Highway maintenance (add because of road destruction due to severe winter)	352,279.28
Town road, state aid	108,275.90
Grade crossings	175,000.00
Court of claims judgments	150,000.00
Court of appeals, courthouse	250,000.00
Schoharie Agricultural school, new activity	84,950.00
New prisons	400,000.00
Legislative deficiencies	350,000.00
Conservation, including Saratoga Springs	200,000.00
Support of common school deficiency	168,471.00
Indemnities for diseased animals	109,000.00
State taxes due counties	24,000.00
Board of prisons of penitentiaries	83,000.00
	$2,952,976.18

The approved items of the appropriation bill of this year, which represent the deficiency or supply bill item of previous years, amount to $1,877,375.76 as compared with $5,257,920.98, the amount of the deficiency bill for last year, showing a reduction in the amount appropriated to meet deficiencies this year as compared to last year of $3,380,545.22.

Principal Items of Deficiency.

The principal items of deficiency this year are the following: Board of prisoners in penitentiaries, $155,135.44; state taxes due counties, $363,716 (of this amount $190,000 is not a deficiency and should have been in the appropriation bill); election law printing, $32,000; legislative deficiencies, $196,983.33 (of which $160,000 is for printing, although $600,000 was included in the appropriations of last year, $300,000 to meet current charges for this purpose and $300,000 for deficiency due to deliberate failure by the previous administration to make appropriation for this purpose); support of common schools, $169,988 (due to an error in computation last year); contributions to agricultural fairs, $250,000; indemnity for diseased animals killed by order of the department of agriculture (approved claims for which were in the department of agriculture March 1, 1916), $240,000.

The cost of the constitutional convention last year, approximately $500,000, was a burden which the last year's appropriation bill had to carry because of the failure of the previous administration to make provision for it. That was a charge against the present administration which was not expected to recur, but we find that the advertisements of the new constitution inserted in the newspapers of the state last year, together with the cost of printing the copies of the constitution to be used at the election, resulted in a new constitutional convention item in this year's appropriation of $707,448.13.

The appropriation act of last year carried appropriations of $340,000 for deficiencies in the support of the national guard, which were not provided by the previous administration. While under ordinary conditions there should be an approximately equal decrease in the amount for this activity in the present appropriations, it has been deemed wise in the interest of preparedness to provide for the mobilization of the entire natonal guard this year, which necessitated a special appropriation for national guard purposes of $500,000. Another item of this character is the appropriation of $100,000 for military training, making new appropriations in this department of government of $600,000, which offsets the deficiency payment of last year and results in an increase for the next year of $343,438.10.

The debt service, which called for an increase in the cost of government in the appropriation bills of last year of $1,500,000 over the appropriations of the previous year, shows a still further increase this year over last year's total of over $980,000.

Saving on Canal Operation.

The appropriation for the general operation of the department of public works (canal operation) is $519,000 below the appropriation for the same purpose last year, although substantial additions to the mileage of the barge canal in use will be made this year. The appropriations for this purpose last year included over $700,000 for deficiency due to failure to appropriate by the previous administration.

The form of tentative budget as submitted by me to the legislature at the opening of the session of the present year was based upon a plan of transfer of allowances within schedules under large aggregate appropriations. When I submitted this plan to the legislature I expressed the view that if this plan was accepted the legislature could make substantial reductions in these scheduled appropriations.

This transfer within the schedules would have required legislative authority, delegating to a new agency the power to make such transfers, the equivalent of a power which, it is conceded, has been for years exercised under the lump sum appropriation plan by the various departmental and institutional heads of the state government. This procedure was not accepted by the legislature, as that body contended that such procedure was a delegation of its constitutional rights.

As an alternative the legislature adopted an appropriation bill segregated to practically the same extent as the tentative budget proposal which I submitted, but where my proposal included schedules supporting appropriations, each item in these schedules was made a separate legislative appropriation in the bill passed.

A Reserve For Next Year's Budget.

It is not possible in a highly segregated itemized appropriation act such as this, where all the items are separate appropriations and between which no transfers are to be made to express the needs of state government in anything like as low a figure as where transfers are permitted, but it is also true that this highly segregated itemized appropriation act will return to the state a very much larger amount of unexpended balances at the end of the year than a budget in the form of my proposal. A conservative estimate of the amount which will accrue from the unexpended balances of the present appropriation act to aid the financing of the expenditures of state government next year is in excess of $2,000,000 and probably will reach $3,000,000, so that while that amount of saving cannot be represented in a reduction at this time in total appropriations approved by me the amount of saving is assured by the form of the appropriation act itself. As there is no direct tax imposed this year the expression of the cost of government in this amount does not place any added burden upon the taxpayers, but, on the contrary, as I have shown, assures a reserve for future budget purposes.

A very great advance is made in the appropriation bill of the present legislature over any previous appropriation bill in the fact that it is for the first time based upon scientific expense classifications which, for instance, separate expenditures for personal service from every other kind of expenditure, classifying maintenance and operating expenses under their proper subdivisions, preventing the use of those appropriations for more than one kind of expense and giving opportunity to the state comptroller for proper audit control. This feature of the act, together with the fact that all maintenance and operation and personal service expenses and all other appropriations, except for repairs and construction, become available on the 1st day of July, 1916, and lapse on the 30th day of June, 1917, go far toward clarifying a very great deal of the previous confusion and obscurity in state appropriations. The bill for the first time in the history of the state makes complete provision for the maintenance and operating expenses of every department and activity of the state for the full year, a feature of appropriation the importance of which cannot be overestimated in future state financing.

An Impractical Proposition.

During my consideration of the present appropriation bills I have been asked by the mayor of the city of New York and an organization known as the Tax Reduction Committee of New York to veto items of appropriation in that bill providing for interest on outstanding state bonds and amortization contributions to eight of the sinking funds of the state, making an aggregate proposed reduction of appropriations of $6,216,914. The first of these items of proposed reduction, that of $1,600,000 for canal sinking fund No. 4, is impossible upon the argument advanced by the mayor and the committee because the appropriation referred to includes both interest charges and amortization in one item, which could not be vetoed separately, and the veto would reduce the fund in question below its actuarial requirements for next year.

I submitted the whole proposition, however, to the attorney general of the state and to three distinguished constitutional lawyers—Hon. George L. Ingraham of New York city, Hon. John G. Milburn of New York city and Hon. George Clinton of Buffalo. The attorney general has advised me in a lengthy opinion that a veto of any one of the items included in this $6,216,914 total would be illegal and unconstitutional.

Judge Ingraham and Mr. Milburn, who joined in an extensive and carefully considered opinion, after setting forth the constitutional provisions and statutes which require either the imposition of a direct tax or the setting up of an appropriation from the general fund to meet interest and amortization charges on all canal bonds say:

"We think, therefore, that the tax thus imposed must be collected unless the appropriation is made, and if the governor should veto the provision making the appropriation then it would be the duty of the public officials to levy and collect the tax and pay the proceeds thereof into the sinking fund."

Taking up then the proposal to veto the interest and amortization charges on highway bonds, Judge Ingraham and Mr. Milburn after reciting again the constitutional and statutory provisions with respect to the necessity for either a direct state tax or an appropriation to meet these charges say:

"These bonds having been issued under this express legislative pledge in pursuance of the provision of section 12 of article 7 of the constitution, and the constitution having provided that the force and effect shall not be diminished during the existence of any debt created thereunder, the state was pledged to provide such a sinking fund, and the purchasers of the bonds [illegible] tax [illegible] duty of the [illegible] unless the [illegible] the amount [illegible] such a tax would produce for the [illegible] of the [illegible] fund from any [illegible] moneys [illegible] the state treasury [illegible] this provision also we are of the opinion that if this appropriation is not made the tax imposed by the statute creating the bonds must be enforced and collected and the proceeds thereof paid into the sinking fund."

The opinion of Judge Ingraham and Mr. Milburn then takes up the assumption that certain canal and highway sinking funds now exceed actuarial necessity. On this point their conclusion is set forth in these words:

"Assuming the fact to be that the particular canal sinking funds Nos. 1, 2, 3 and 4 exceed at the present time the actuarial amount on a 3 per cent earning basis necessary for the amortization of the bonds which they represent, it seems to us to be entirely immaterial and that there is no warrant in law for the contention that you may lawfully veto the provisions in the appropriation bills now before you for contributions to those sinking funds pursuant to the constitution and the statutes providing for their creation in view of that excess. The constitution and statutes permit of no such suspension of their provisions in the event of such a contingency dependent upon actuarial computations and assumptions. The amount of the tax imposed when the bonds were authorized must be collected and paid into the sinking fund, in the absence of an appropriation from other funds of the state, until there is an amount in the sinking fund sufficient to pay the debt at maturity. When the amount in the sinking fund shall equal in amount the debt for which it was created no further direct tax is to be levied on account of said sinking fund, but until there is an amount in the sinking fund sufficient to pay the debt at maturity the tax must be levied as provided for or an appropriation made out of other funds."

Mr. Clinton in his discussion of the matter says:

"If I understand correctly the contention of the mayor of the city of New York and the organization known as the Tax Reduction Committee of New York, they ask for a veto of appropriations for the so called funds created under the act of 1903 denominated 4 and 7. In the case of No. 4 they ask for the vetoing of the amount estimated in the appropriation bill for interest only, admitting that the amount estimated for amortization is proper. Aside from the considerations which I have stated, it is quite apparent that this cannot be done, because the appropriation bill provides a rate for both amortization and interest, and the two items cannot be separated, because if one item in the estimate were vetoed the rate for the other would remain the rate for both. I understand that this is substantially your view."

Mr. Clinton says further:

"The only conclusion which I can come to is that it would be a violation of the statute and the constitution if there were a failure to make appropriations for amortization and interest and to provide a tax rate to raise the same and that therefore the so called funds Nos. 4 and 7 should be approved."

His final conclusion is:

"In my opinion, vetoing of any of the items would be unconstitutional."

The attorney general further advised me, as do Judge Ingraham, Mr. Milburn and Mr. Clinton, that if I did veto these items the state comptroller would be compelled by the constitution and the statutes of the state to call upon the counties of the state for a direct tax to the amount of these appropriations vetoed.

This same plan for reducing the cost of the state government was urged upon me last year by the authorities of the city of New York when the appropriation bills were under consideration, and at that time also I was advised by the attorney general that such action would be unconstitutional. I suppose the same proposal will continue to be made annually by the authorities of New York city regardless of what they must now know is a legal obligation of state government in the premises. The advancement of this argument annually, however, by those who make it gives them an opportunity, through the publication of their statements in the newspapers, to impress the casual reader with the idea that the state is making appropriations, as in this case, of $6,216,914, which are illegal and unnecessary, while the amount in fact is an absolutely mandatory and unavoidable item of the cost of state government.

State Aid to Town Highways.

The suggestion was also made that I should veto the appropriation of $1,956,275.98 for state aid to town highways. This appropriation was made by the state pursuant to the highway law, and its veto would mean the repudiation by the state of an obligation upon the prospective fulfillment of which the towns of the state levied their taxes last fall. Such a proposal for repudiation of this statutory obligation has never before to my knowledge been presented to a governor in all the years since this statute took effect.

These taxes have already been raised in anticipation of the state's appropriation in compliance with the statute. Misleading statements have been circulated in an endeavor to create the impression that this appropriation is in the nature of a purely local benefit to small localities from state moneys. The contrary is the truth, as any fair analysis of the highway law of the state would prove—that law contemplating a general and extensive improvement of the roads of the state specifying that the state would aid towns by contributions to town highways for the construction of roads which would eventually become a part of the state's highway system.

No Analysis, Just an Assumption.

The declaration of the mayor of the city of New York and the Tax Reduction Committee that a reduction of $4,000,000 could be made in the legislative appropriation act was based on no analysis of that act. It was simply an assumption based on the fact that the appropriation act as passed was $2,000,000 more than the tentative budget proposed (less the debt service reduction), and that fact, taken with my statement at the time of the submission of this proposal to the legislature that I felt sure that the total could be reduced $2,000,000, constitutes the sole basis for that declaration.

I have already shown that the change from the elastic form of appropriation, which permits transfers between items and schedules, to the inelastic form, where each item is an individual appropriation, would require at least $2,000,000 for its expression in excess of the appropriation in an appropriation act permitting transfers, but that two or more million would be saved to the taxpayers of the state by the lapses sure to occur in the appropriations as made.

I have also given a list of the items which make up the increase of the appropriation act over the tentative budget proposal. Such of these items as it was possible to disapprove in the appropriation act submitted to me I have vetoed. Those items which remain in excess of the tentative budget proposal are items which I regard as absolutely necessary to be approved to permit the state to pay its honest debts and its legal obligations to meet such emergencies as now confront the commonwealth and to provide absolutely necessary support to departments.

Salary Increases Analyzed.

Because of the allegation that 2,500 salary increases had been made in the appropriation bill passed by the legislature as compared with the tentative budget proposal I have had a careful analysis made of this feature of the two measures. Such an analysis is difficult, except for an expert, because where personal service is expressed in an appropriation in schedule form an increase in force or an increase in compensation for a given position may be confused one with the other. The result of the analysis made by my examiners shows that 1,095 positions, representing an increase cost of $825,886.48, were added to the tentative budget, and 610 positions, aggregating $503,872, were dropped, making a net increase of added force of 485 employees, at a net added appropriation of $222,014.48. The entire personal service for the Schoharie school of agriculture and the nautical school are included in this total, as well as a large increase in the industrial commission and the conservation department (special service for fighting forest fires.) Also nearly one-half of the new positions listed in the total of 1,095 are in the low class service of the insane hospitals and charitable institutions. For this reason this item does not appear excessive.

Salary increases as disclosed by the analysis were 484 in number, at a total appropriation of $115,394.68, as against 180 salary decreases, at a cost of $62,612.26, making the net total salary increases 254 and the net appropriation for salary increases $52,782.42.

This, I think, disposes of the allegation that there were 2,500 salary increases in the appropriation bill as compared with the tentative budget. The person who made this analysis failed to state how many decreases there were, which decreases as an offset to increases might have produced the same net result as my examination. There does not appear to be any basis whatever upon which that total could have been arrived at other than an incorrect reading of the meaning of the appropriations or an improper assumption with regard to a great many of the appropriations.

Appropriations Compared.

The following table gives a comparison of the appropriations as approved for 1916, with appropriations for similar functions of state government for 1915, showing the increases and decreases by functions:

	Appropriations, 1915.	Appropriations, 1916.	Decrease.
Executive	$317,287.54	$312,882.49	$4,405.05
Administrative	2,079,542.45	2,285,694.14	*206,151.69
Legislative	2,342,918.68	2,067,931.46	274,987.22
Judicial	1,974,279.46	2,275,037.92	*300,758.46
Regulative	4,229,460.84	3,342,635.50	886,825.34
Educational	9,674,190.68	9,643,970.22	30,220.46
Agricultural	3,168,951.47	2,430,124.96	738,826.51
Defensive	1,987,876.76	2,231,314.86	*243,438.10
Penal	1,898,994.05	2,206,723.38	*307,729.33
Curative	8,295,042.58	7,809,160.83	485,881.75
Charitable	2,714,895.71	2,736,657.41	*21,761.70
Protective	1,452,726.25	1,533,894.89	*81,168.64
Constructive	6,611,787.94	6,634,449.98	*22,662.04
General	1,041,112.61	780,442.26	260,669.35
Canal	5,746,180.32	1,442,290.30	4,303,890.02
Debt service	9,631,514.62	10,546,308.22	*885,794.86
Total	$63,997,271.36	$59,101,450.08	$7,115,774.60
			*$2,219,952.82
Net decrease			$4,895,821.78

Note.—*Designates increases.

CHARLES S. WHITMAN.

Terrible Fate.

Funny answers by school children are an old story, but the fact vouched for by one of these same children that "Louis XVI. was gelatined during the French revolution" is new enough to suit the most fastidious.

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 degrees, 02 minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

New York Ontario and Western Railway Co.

By Costello, Burden, Cooney and Walters, Attorneys for Petitioner, Office and P. O. Address, 935-955 University Block, Syracuse, New York.

Citation to Prove Will

THE PEOPLE OF THE STATE OF NEW YORK,—To Leon F. Titus, Traverse City, Mich.; Carlton H. Lewis, San Diego, Cal.; Nellie Bradt, Hannibal, N. Y.; Charles S. Orton, North Tonawanda, N. Y.; and Archie Thomas, Margaret Dean and Donald Thomas, all of whose places of residence are unknown, heirs-at-law and next of kin and other persons interested in the probate of the last will and testament of Marion J. Cowles, late of the City of Fulton, in the County of Oswego, New York, deceased, Greeting:

Upon the petition of Arvin L. Rice, of the City of Fulton, in the County of Oswego, New York, the Executor named in a certain instrument in writing, purporting to be the last Will and testament of said Marion J. Cowles, late of the City of Fulton, in the County of Oswego, and State of New York, deceased, and relating to both real and personal estate, praying to have said instrument in writing and the Codicils thereto proved and recorded as a Will of real and personal estate: You and each of you are hereby cited to show cause before the Surrogate's Court, of the County of Oswego, at the Surrogate's Office in the City of Oswego, in the said County of Oswego, New York, on the 12th day of June, 1916, at ten o'clock in the forenoon of that day, why said Will should not be admitted to probate, and such of you as are under the age of twenty-one years are required to appear by your general guardian, if you have one; or if you have none, to appear and apply for one to be appointed; or in the event of your neglect or failure to do so, a special guardian will be appointed by the Surrogate to represent and act for you in the proceeding.

In Testimony Whereof, We have caused the seal of the Surrogate's Court of the County of Oswego to be hereunto affixed.

[L.S.]

Witness, Hon. Clayton I. Miller, Surrogate of our said County of Oswego, at the City of Oswego, in the said County, the 8th day of May A.D., 1916.

H. E. HINMAN,
Clerk of the Surrogate's Court.

REQUISITION SYSTEM PREVENTS OVERDRAFTS IN CITY DEPARTMENTS

City Clerk C. Milton Allen, Jr., has received the blanks for the new requisition system which has been installed in the city departments, and explained the system now in vogue here to a Times reporter this morning.

Under the new system, if Superintendent of Public Works Frank Rumsey wished to buy some lumber or any other material or article for use in his department, he will procure one of the blanks from the city clerk, and fill out the spaces with his name, title, goods desired and their purpose. The clerk keeps a duplicate of this order.

Each day the clerk files a notice of these requisitions with the City Chamberlain and the amounts of the various purchases are charged against the funds they are drawn on, just as though the money was already spent. When the statements from the consignees arrive, the clerk writes a check in payment, and another notice to the effect that the accounts are paid, is given to the chamberlain.

By this method, the city chamberlain is able to tell instantly, from his books, just how much money is unencumbered in every city fund, how much has been spent and the results of the expenditure. When a fund is low, the department heads are at once notified, and an overdraft on any fund is impossible.

POSTAL SAVINGS IS EXTENDED

Postmaster Peter F. Conley has received the following bulletin from the United States Post Office department regarding changes in the limitations of deposits under the Postal Savings act. It is expected that the new rules will broaden the field of the Postal Savings banks, and increase the business of the institutions. John Hargraves is in charge of the Fulton bank, which has always done a creditable business since The Postal Savings Banks were created.

The bulletin follows:

"Larger postal savings deposits will now be accepted at the post office. This is made possible by an important amendment to the Postal Savings Act just approved by President Wilson. A postal savings depositor may now have an account amounting to $1,000 upon which interest will be paid. Formerly $500 was the maximum amount he could have to his credit. This enlargement of postal savings facilities will be very gratifying to thousands of depositors who have already reached the old $500 limit and are anxious to entrust more of their savings to Uncle Sam. Another feature of the amendment that will avoid further embarrassment to the public and to postal officials is the doing away with the limit on the amount that could be accepted from a depositor monthly. Under the old law only $100 could be deposited in a calendar month. The amendment abolishes this restriction. While the Postal Savings System has already proved a signal success as is shown by the face that more than half-a-million depositors have over eighty million dollars standing to their credit, still it has fallen short of meeting the full demands of the public because of the restricitions which have now been eliminated. Postmaster General Burleson and Third Assistant Postmaster General Dockery have been tireless in their efforts to secure a modification of the limitations and the new liberalizing legislation is partcularly gratfying to them."

THIS WEEK

Have the Rugs and Carpets made sanitary by our method of cleaning.

Have Linoleum placed in different rooms to add to their appearance and save the labor attached to bare floors.

Have new shades put on rollers where rollers are still good or a good roller put on that shade that will not work.

If you have any old carpet this is the time to have it made into one of those servicable rugs.

If you have any problem to solve relating to your floor covering, phone to

COMMANDER STEWART ASKS CO-OPERATION

J. H. Stewart, commander of Schenck Post, G. A. R., has issued the program of exercises in connection with the observance of Memorial Day, adding to his appeal for co-operation on the part of the people generally that the Grand Army Post, Sons of Veterans, and Ladies of the G. A. R. will meet at the post rooms on Tuesday, at 9 a. m.

All patriotic organizations are invited and the children of the public schools as well, and to bring flowers. All citizens who will, are invited to send flowers to the post rooms Monday afternoon or Tuesday morning early.

The morning parade to the cemetery will be headed by the Elks' band.

The memorial sermon will be delivered at the First M. E. Church by Rev. J. W. Barrett on Sunday, June 4th, at 7:30 p. m.

Comrades of the post, Sons of Veterans and Ladies of the G. A. R. will participate in the decoration of the graves in Granby on Sunday, June 4th, leaving the post rooms at 9 a. m.

On Sunday, June 11th, the graves at Mt. Pleasant will be decorated and Rev. T. J. Williams will deliver the address.

The people of both towns are requested to participate in these services.

For wire cuts, stings, lameness, swellings and other external ailments of horses and cattle, apply Hanford's Balsam to cleanse and heal. Having a bottle on hand may mean saving the life of a valuable animal. adv

HORACE BAGGS PAID HIS RESPECTS TO CITY

Horace Baggs, star clown with the Barnum and Bailey circus arrived in town this morning for a whirlwind visit at his home here. Mr. Baggs had just one hour in which to look over the town before getting back to the show for the parade.

A big delegation of Fultonians will attend the circus to-day and watch the Fulton man's work. He is considered one of the cleverest burlesquers in the business and this year he is putting on some novel features. The Fulton Lodge of Elks, of which Mr. Baggs is a member, will be well represented at the circus ring-side.

BERT ADKINS' DANCE DELIGHTED YOUNG FOLK

Fifty young people of the city attended an invitation dance given at Davis' Hall last night by Bert Adkins. Reynolds furnished the music for the dancing, and elaborate refreshments were served at midnight. Parker Van Buren assisted Mr. Adkins in arranging and managing the affair.

Very Valuable Household Liniment

Mrs. J. R. Higgs, New Hartford, N. Y., states. "About two years ago I used Chamberlain's Liniment when suffering from neuralgia in the face, and it affords me pleasure to say that I have never had anything equal to it. I have since used this liniment for lameness and soreness of my arms and shoulders with the best results. It relieves the pain almost instantly, and its effects are lasting."

For sale by all dealers.

PREPAREDNESS IN THIS CITY

Women Elect Officers of Society to Make Surgical Dressings for Greater Military Establishment.

Monday, the Surgical Dressings Committee of Fulton was organized in the Library hall; the following were elected: Mrs. B. Russell, local chairman; Mrs. F. L. Jennings, treasurer; Mrs. W. H. Brown, Miss Emily Hornibrook, Mrs. E. Rude and Miss Grace Tucker, money-raising committee. There were about thirty ladies present. The county chairman made an appeal to the ladies to do their best to make this committee one of the most useful in the United States. She told how these committees all over the country were part of the great preparedness movement which is being emphasized everywhere in America. In case of war these committees, with their efficient organizations could, in less than three weeks, make and deliver ready for use 1,000,000 surgical dressings to the military hospitals of America. The Library hall will be open Mondays and Fridays at 2:30 until 5:30 for the making of the dressings. This Friday the committee will roll bandages. All the women of Fulton are cordially requested to come an help sew or roll bandages. It matters not whether or not you were present last Monday; come when you can; stay as long as you can. Do just a little for humanity. Sincere thanks are due Mr. J. C. O'Brien for his generosity to the surgical committee; not only has he offered to sell anything the committee may need for the work at cost price, but he has promised them a whole piece of unbleached cotton out of which bandages are made. The ladies appreciate his kindness and sincerely thank him. Any one who will give old clean linen or cotton, please bring it to the Library; old linen is very useful in the work.—Contributed.

MT. PLEASANT.

A special meeting of the L. A. S. at the parsonage to-morrow. Ladies, please bake.

* * *

A special meeting of the Royal Neighbors will be held Friday afternoon at three o'clock, with Mrs. William Carl at her home in Seneca street.

Use Hanford's Balsam to reduce inflammation. adv

The exact formula on every can

Even an expert cannot tell by looking at varnish whether it is adulterated. That is why it is so important that you should always buy varnish with a guarantee formula.

DEVOE
THE GUARANTEED
VERNOSITE THE LONG LIFE SPAR VARNISH
PALE INTERIOR VARNISH
MARBLE FLOOR FINISH

For outside work and all surfaces exposed to water, use Vernosite. It will not turn white from rain or sleet and the sun will not blister it.

For inside woodwork where extremely transparent varnish is required, use Pale Interior. It preserves the natural beauty of the wood, is hard to mar and won't scratch white.

For all floors use Marble Floor Finish. It waterproofs the wood, and enables it to withstand the severest wear and tear without marring.

We strongly recommend these three varnishes, because the guarantee formulas on the cans prove that they have been properly aged and that they are absolutely free from rosin and other adulterants.

Never take chances with varnish. Get Devoe and be *sure*.

PEACOCK FLAYS MANY SINS

(Continued from Page One)

heaven would be compelled to leave and go to hell. If the adulterer repents there is forgiveness in Jesus Christ. Those living impure can be washed and purified and made to be whiter than the snow through the atoning blood of Christ.

Years ago in London a girl lay dying in a house of ill fame. They sent for a minister to talk to her about spiritual welfare. This minister read the Bible to her and talked to her about Christ but seemed to make no impression on her whatever. At last he asked her if he might be permitted to pray for her. She granted his request and in the prayer he used these words taken from Isa. 1, 18, "Come now let us reason together though your sins be as scarlet they shall be white as snow, though they be red like crimson they shall be as white as wool." When he finished his prayer the girl was crying. She asked him to read or to quote that passage of scripture again. Then she asked him to open the Bible and place her finger on the passage of scripture and pray again and when he had finished she said I am glad God said scarlet sins for that means me. She opened the door of her heart, permitted Christ to come into her life, was saved and died praising God. Revealing to us that the blood of Christ is able to cleanse from all sin those who have defiled the temple of God by impure living. Drunkenness is not an unpardonable sin.

The Minor Sins.

The Bible says no drunkard shall inherit the kingdom of God but the drunkard can repent. The blood of Christ is powerful enough to raise the drunkard from the gutter of hell up into the kingdom of God. Swearing is not an unpardonable sin. Every profane swearer is a violator of God's commandments. God has plainly stated, "Thou shalt not take the name of the Lord thy God in vain for the Lord will not hold him guiltless that taketh his name in vain." Many profane swearers have been saved from their profanity and are living pure lives and are glorifying God in their daily walk and conversation. It is not stealing. Many men and women who have stolen from others have given up their sin and are living honest lives.

Jerry McAuley before his conversion was a thief. Harry Monroe who was used by God to lead Mr. Sunday to a saving knowledge of Jesus Christ had in his possession when he found Christ in the Pacific Garden Mission a kit of burglar's tools, when he found Christ he threw them aside and from that day to this his desire has been to save people from their sin.

It is not lying. It is disdaining the spirit of God. It is speaking against the spirit of God. It is the constant and final rejection of the pleading of the Holy Spirit. God says "My spirit shall not always strive with man." The time will come when God will let you alone. When that time comes God only knows. "Ephraim is joined to his idols, let him alone." God will say, "he is joined to his sin let him alone." I have given them every chance but they have refused to come from now on my spirit will not strive with them any more.

When holding meetings in Buffalo, N. Y., Mrs. Ferguson in whose home I was being entertained told me this incident. She said in her home town a western states, there was a young business man who from all outer appearances seemed to have a wonderful business career before him. He courted and married one of the finest young ladies in the community. Two years after their marriage this young man took suddenly ill. They called in several physicians. The physicians had a consultation told the father and mother, and the young wife that they were unable to help this young man. When the physicians told him his case was hopeless he made the statement, "I know I would die" and he said "I am not only going to die but I am going to hell. I have committed the unpardonable sin." The physicians made a thorough examination, they said he was perfectly sane. They knew exactly what he was talking about. They called in his business companions and associates and tried in every way to pacify him but failed to in spite of all they could do and say he said I am dying and I am going to hell. He said "I am in hell and I am suffering the torments of the damned." He said there is a heaven and there is a hell and I am suffering the torment of hell.

They called in the ministers, they called in his business companions.

They tried in every way to divert his attention but in spite of all they could do he kept on and his dying statement was I am dying and going to hell because I have committed the unpardonable sin. He told his wife he had a desire to be a Christian but had quenched the workings of the Spirit of God. Any one can commit the unpardonable sin. Probably some of your people have been saying night after night I will not come tonight. Probably this may be the last chance the Spirit of God will ever give you to become a Christian.

Any man or woman refusing to become a Christian can commit the unpardonable sin.

You can be a good man or woman, morally, you may pay your honest debts, you may be kind to your family, you may be a honor to your children and to your parents, but you have refused to take the all important step, permitting the Spirit of God to come into your life accepting Jesus Christ as your personal Saviour. The Holy Spirit pleads with you to be a Christian. If you refuse to heed the pleading of the Spirit of God, some time the Spirit of God will leave you, and all desire to be saved will be gone. Someone may say "how does this sin against the Holy Spirit manifest itself?" It may manifest itself in many different ways.

Divine Power.

Some people are so bitter against these meetings they can't say mean enough things about them. Some of them can't say mean enough things about me. Men have gone out of this tabernacle and have cursed in such a terrible manner that even their companions have begged with them not to use such vile language. They cursed me because I have denounced impurity, and because I have preached against intemperance and because I have asked them to be men. They are angry because they are not in sympathy. They are angry because some of their sins have been denounced. They are mad because probably they have committed the unpardonable sin. I heard Mr. Sunday tell of a minister preaching in New York City. One night a young man came to the front and said "pray for me."

The minister closed the meetings in New York city and thought no more about the young man.

One evening this minister called at a hotel to visit a friend. While he was waiting for his friend he noticed the bar room door swing open and he saw in the mirror a familiar face. At the same time this young man standing before the bar recognized the face of the minister in the mirror. He sat down his glass of liquor stepped out through the swinging door into the office said to the minister, "do you remember my face?" Can you recall where you saw me?" He said, "do you remember a young man coming to you in New York City at the close of the meeting and asking you to pray for him." He said, "I am that young man." The minister said, "evidently you have never settled the matter for God or you wouldn't be where you are tonight." "No," he said, "I have not settled the matter for God and I never intend to." He said, "if Jesus Christ would walk in here I would spit in his face," and with oaths and curses he denounced Christ, he denounced the church, he denounced every person trying to do right and the last words the minister ever heard from the lips of that young man were oaths and curses against Him who had died on the cross in order that we might be saved. That young man had committed the unpardonable sin. The spirit of God had departed from him and his bitterness against God and everything good revealed that God's spirit had been taken away.

Then it may manifest itself by people being utterly indifferent to the spirit of God and to the self-sacrificing spirit of Christ. If you are indifferent to the pleading of the Holy Spirit you are on dangerous ground. So many young people in the church and out of it are indif-
thing but the salvation of the soul.
ferent, they are interested in every-
Many of them are good people morally, but they have no interest in anything spiritual. Many people in Fulton have never darkened this tabernacle. They would consider it beneath their dignity and their high standing in the community to condescend to come into crude building like this. Some of them are church members.

Immediately someone says "could a church member commit the unpardonable sin?" Why certainly every unsaved person is in danger of committing the unpardonable sin. Not all of the people having their names on the church rolls are Christians but it doesn't necessarily follow when we place our names upon a church roll and attend services occasionally and give a little money to support the church that we are Christians. Some church members have fought this campaign more than those who have never professed to be disciples of the Lord Jesus Christ. Some of the church people have been so indifferent that they have felt no concern whatever and have no responsibility.

Things Mysterious.

I cannot understand how any Christian man or woman can refuse to live up with any campaign that has for its aim the betterment of humanity and for the salvation of men and women. How may I know that I have committed the unpardonable sin. If you have concern about your spiritual welfare, you are on dangerous ground. If you have no desire to be a Christian you should be concerned about yourself. If you have a desire to be a Christian you have not committed this sin. You may be the worst sinner in Fulton, but if you have in your heart a desire to serve God encourage that desire and God will not permit you to be lost. At the close of a meeting a man came to Rev. Beiderwolf and said, Oh, sir, I want to be saved but I am afraid that I have committed the unpardonable sin. Mr. Beiderwolf said you have not committed the unpardonable sin or you would not have a desire to be saved. You are to be congratulated upon having this desire and the thing for you to do is to open your heart that the spirit of God may come into your life and no matter how low you have been in sin God can save you.

My friend, if you are here tonight and you have no desire to be a Christian do not congratulate yourself, pity yourself, pray for yourself. One year ago I was compelled to lay off work for several weeks on account of diphtheria. After getting out of quarantine I felt weak in every sense of the word. I thought for a while that probably I would become paralyzed. During the time that I felt so weak and so helpless, I did not congratulate myself on my fine physical make-up, I didn't congratulate myself because I thought I was going to be paralyzed. I was alarmed, I was concerned. I did everything in my power to build myself up physically. I would have been a fool to have said this is glorious I have no concern about myself whatever and you are a fool if you refuse to do what God has commanded you to do and by so doing shut yourself out of heaven and shut the Spirit of God out of your life. If you have no desire then pray for yourself that God may give you the desire. Why will God not forgive the unpardonable sin? I do not know. I know he says he won't and that is sufficient for me. He can't forgive it according to these passages of scripture. He can't forgive it according to his plan of selvation and this is perfectly satisfactory to me. Every person has a chance to honor God and if you sin away your day of grace and turn your back upon the pleading of the Holy Spirit and positively refuse to line up for God you cannot expect God to save you.

THE QUIRK TO-DAY.

Maude Gilbert, co-star of "The Fool's Revenge," a William Fox production, lay thinly clad in the snow for over thirty minutes during the making of certain scenes of that picture. Miss Gilbert, as the wife of Anson, a clown, is murdered by her husband, who is convinced of her infidelity. She is choked to death and then thrown over a cliff.

The scene was made on the heights of the New Jersey Palisades. In order to carry out the action of the piece it was necessary to show Miss Gilbert lying at the bottom of the Palisades. Four inches of snow and ice covered the elected spot, but Miss Gilbert ignored this fact and threw herself on the cold ground. During the time it took to make the scene she was given hot coffee four times and afterward rubbed vigorously by a maid.

A Word to Dyspeptics

Mr. Dyspeptic, if you knew how quickly and surely Chamberlain's Tablets would give you relief, you would certainly give them a trial. Read what Edward Gaffey, Newport, N. Y., says about them. "I am pleased to say a word in praise of Chamberlain's Tablets for the stomach and liver. I have been troubled with indigestion and constipation for the past three years, and this is the only medicine that relieves these attacks."
For sale by all dealers.

To Rid Child of Worms

Don't scold the fretful, nervous child. Often its due to worms. Get rid of these by giving one-half to one lozenge Kickapoo Worm Killer, a laxative worm candy. Give only plain nourishing food, lots of outdoor exercise and put to bed early. Watch stools and continue giving Kickapoo Worm Lozenges. they will positively remove the worms. 25c at Druggists.

HEART DISEASE A CHILD MENACE

New Problem Presented to Those Who Preserve Health.

TUBERCULOSIS DECREASING

Another Enemy Creeps Up Behind as Great Battle Is Being Won—Heart Trouble Leaves Child Handicapped For Life—Home Care Better Than Hospitals For Such Cases.

With heart disease spreading as tuberculosis is being curbed physicians and social workers are planning preventive work among children to cope with the rising death rate. An article on this menace and what experimental work has shown to be desirable toward curbing it as prepared for the Survey, an organization whose purpose is to investigate the facts of living and working conditions and to suggest means for social advance, is as follows:

Apparently while we have been fighting one enemy face to face another has stolen upon us from behind. New York has reduced her deaths from tuberculosis from 421 per hundred thousand in 1870 to 169 in 1914, but during the same time her deaths from heart disease have increased from 74 to 169.

Repeated In Other Cities.

The experience of New York is repeated in other cities. In Worcester, Mass., no less than 21.5 per cent of all deaths in the industrial population are caused by organic heart disease; 15.2 per cent is the proportion for the whole population of that city.

The situation, or, rather, the realization, has come upon us suddenly, and we are not equipped to deal with heart disease as we are with tuberculosis. Yet it is clear that we shall have to cope with it and devote to it the same study and the same persistent effort to get at underlying causes as we have given to tuberculosis ever since the eighties.

Several articles recently written for medical journals show how similar are the methods needed for the prevention and cure of heart disease to those we are familiar with the case of tuberculosis. In both it is in childhood that preventive work is most needed; in both the symptoms are slight and latent, and the treatment must be prolonged and persisted in after all signs of real trouble have disappeared. Both depend greatly upon environment for cure, and in both home care is beginning to take the place of institutional care.

Leave Child Handicapped.

Both leave the child handicapped and needing vocational training in some occupation which will not make too great demands on his strength.

The Massachusetts General hospital, Boston, has been making an interesting experiment in the home care of children with heart disease and with diseases which threaten the heart, such as chorea and rheumatism. At first these children were kept in the hospital for weeks and even months, but the results were discouraging. When they went home not only improved, but usually looking in the best of health, it was impossible to make the parents believe that the greatest care was still necessary. So relapses came, and the children returned to the clinic sometimes in a worse condition than before.

The physicians realized that "heart disease is a social disease and must be treated socially. The child and his family must be educated, his environment must be altered and adapted to his limitations, and he must be kept under supervision for a long period, not merely until he has recovered from the acute symptoms."

Home Care Best.

So in 1911 a social worker was secured to supervise the home treatment of these children. The results have been so gratifying that home care has been substituted for hospital care for all but the acutely sick.

There is not nearly so much danger of relapse if the child has been in his own home from the beginning and his parents have had the care of him during his sickness and have gone through the long, tedious process of nursing him back to health. There is no need then of readjusting him to his old environment, and there is much less difficulty in adjusting the environment to him when he is really ill than when he comes apparently well. When the home is manifestly unfit, boarding the child out in another family has been found better than sending him to an institution.

The hospital chose a visiting teacher rather than a nurse, for, though there are a few medical facts which she must be able to note, they are easily learned and most of her duties are nonmedical. She must be able so to arrange the home care of the child that he will have rest and quiet and yet be happily occupied, and later on she must be able to plan his return to school or his entrance into industry in such a way that it will not overtax his strength.

For the tuberculous child we have demanded open air schools; for the cardiac child we must demand schoolrooms on the ground floor and ungraded classes, where he can make up his lost time without too much effort and perhaps work only half time, being dismissed before the closing hour with its rush and crowd.

Billy Treadwell's Sacrifice

A Story For Commencement Days

By BARBARA PHIPPS

Billy Treadwell and his chum, Johnny Haywood, were lounging in Johnny's room, No. 42 University hall, when there was a rap at the door and a letter was handed in for Johnny. He opened it, read it and exclaimed:

"That's too bad!"

"What's too bad?" asked Billy.

"Why, my cousin, Bess Hinckley, who has been at school in Geneva ever since she was twelve years old, has come home. She writes me that she is dying to see an American college and will be down Saturday morning to spend the day with me. Saturday we play Claypole."

"Cut the game."

"Cut the game? Why, where will they get a pitcher to take my place?"

"I'll tell you what I'll do, Johnny. Of course it will be a sacrifice for me to spend a Saturday showing a young woman the college, but I'll meet your cousin, tell her of your engagement and how sorry you are and take her off your hands."

"Will you?" cried Johnny, grasping his chum's hands.

"I'll have to; there's no other way out of it for you."

On Saturday morning Billy met the train on which Miss Hinckley arrived. Seeing a pretty girl answering to Johnny's description of his cousin looking wildly about for some one, he walked up to her and asked:

"Cousin Bess?"

"Yes—how you have changed from the little boy I used to play with!"

"I've an auto outside," said Billy. "Let me take that wrap."

Billy led her to the auto. They got in and sailed away.

"We'll go up on to the hill, and I'll show you the college buildings. After that we'll do the country round about."

"I'm very anxious to see your chum, Mr. Treadwell, that you wrote me about."

"I wrote you about?" said Billy, pricking up his ears.

"Why, yes. Don't you remember saying that you had picked him out for me?"

"Did I say that? Oh, yes. Now I remember. Bill's a good fellow in his way. But"—

"But what?"

"Well, if I've picked him out for you where do I come in?"

"Oh, you're my cousin."

"I see. Well, you can't see Billy today. He's pitcher in the varsity team, and they're playing the Claypoles today."

"That's too bad."

"That's what he said when your letter came to say that you'd be down today."

They did the college buildings, then re-entered the auto and sailed away into the country. Billy addressed his companion as Cousin Bess and when they were in a secluded place endeavored to take a cousinly kiss, but, whether for propriety or that Billy's manner had passed from cousinly to lover-like, she would not permit.

"My kisses," she said, "I'll keep for my fiance."

"What fiance?"

"Why, the one you have picked out for me, of course."

"Humph!" said Billy. He was about to add, "Very well, I'll take one now," but thought better of it and refrained.

That was a delightful day for Billy, and he was accorded one cousinly kiss at parting. His conscience doubtless smote him, for when Johnny returned from the game Billy kept out of his way. However, the next morning Billy received his chum's thanks for having sacrificed himself in taking a girl around instead of enjoying a holiday.

Several days later Johnny went into his chum's room with an open letter.

"What the dickens does this mean, Billy? Bess writes me thanking me for my kindness last Saturday and says in a postscript: 'Never mind your chum, Mr. Treadwell. He will not interest me.'"

"I cannot tell a lie, Johnny. Your cousin mistook me for you, and I hadn't the heart to correct her."

"Well, I like that! And she supposed it was I who was her attendant?"

"She did."

"What does she mean by saying, 'Never mind you; you wouldn't interest her'?"

"A strict regard for truth compels me to say that she's wrapped up in you."

"Do you really think so?"

Of course Billy's regard for truth failed in the end, and he was exposed.

"What does she mean by saying, 'Never mind you'?"

"Why, you see, Johnny, she was so wrapped up in— Oh, you can never tell what a girl means by what she says. They are no more to be understood than so many Greek particles."

"H'm," replied Johnny, unconvinced. "I don't think this case is so unintelligible. Bess, supposing that she was talking to me, being really fascinated by that happy way you have with the creatures, tumbled to all the lies you told her and, like a wolf in sheep's clothing—I don't mean that exactly"—

"To tell the truth, Johnny, it was she downed me. Take me to see her for a week end, won't you?"

John, with a mock grimace, consented, promising to smooth Billy's way in accounting for his deception. But he only made the matter worse. However, Bess thought little of the trick that had been played upon her. Indeed, she considered it a compliment. At any rate, she and Billy are now life partners.

SECRETS OF A GUN

The Famous French 75 and Its Wonderful Mechanism.

IT HAS TWO HIDDEN DEVICES.

These Are the Fuse Setter and the Recoil Absorber, and They Make This Monster Weapon a Most Fearful Engine of Death and Destruction.

What is a 75? By this is conversationally understood a French field gun, the caliber, or interior diameter of the bore, of which is seventy-five millimeters. Incidentally it is the finest man killing machine the world has yet known.

In 1898 France surprised the armies of the world by the introduction of an artillery weapon which till then had only existed in the dreams of experts.

Till this period the slowness of artillery fire was due to the fact that after the gun was laid and fired the shock of discharge so upset the aim that the gun had to be relaid for a second shot. The rapidity of fire thereupon became a matter of how quickly and accurately a gun could be laid by the personal skill of the layer. The French, seeking artillery progress and confronted with the inexorable shortness of their conscripts' period of training, sought to improve in mechanism what they could not improve in personal skill.

Briefly, the new French field gun of 1898 ceased to be attached to its axletree, but was attached instead to a buffer in a cradle, which not only absorbed the shock of recoil, but ran back the gun so exactly into its former position that no second laying was necessary.

The primary trouble of laying having been got over, rapidity of fire appeared to have been attained. Experiments then proved that, though a rapid rate of fire was possible, this rate was only as fast as that at which the gunners could adjust the fuses of the shells.

How now improve the rate of fuse setting? This task was and is a matter of meticulous accuracy, needing careful training to be done correctly. Moreover, it could not be hurried, since a shell badly fused by ever so little was not only innocuous to the enemy, but was a danger to one's own side. Once more the French put aside any idea of brisking up the personnel and invented a machine to set the fuse. The details of this fuse setter are still a secret. Let it suffice that it is simple, accurate and very rapid in its work. Thanks to it and to the steadiness of the gun after each discharge, the French field gun is easily capable of twenty-five aimed rounds a minute.

One more word about the recoil absorber and the secret thereof. The recoil is taken up by a cylinder beneath the gun, which contains a combination of glycerin, compressed air and springs. It is this combination and the exact proportions thereof which make the secret of the gun. It is not even ascertainable from a captured gun, since if you take a cold chisel to it and try to examine the works by opening the buffer the compressed air escapes, and the secret which lies in its density evaporates with it.

Having solved the question of the rate of fire you would have thought that the French would have been content. Not they! Range and accuracy were successively taken in hand. Muzzle velocity, which, after all, means range, was increased not by increasing the charge and with it the thickness of the gun that withstood it, but by lengthening the gun to a hitherto unheard of extent and giving it a slow burning propellant.

The temptation to put in a lighter shell and so get it farther on the same bang was successfully resisted. The designers never lost sight of the fact that the primary object of the gun was to deliver death to its enemies at the greatest speed, range and effectiveness possible. So they concentrated their energies on a man killing shrapnel which in the end weighed sixteen pounds and left the gun on its long journey at the unprecedented pace of 1,739 foot-seconds.

And there you have the present shrapnel.

Tactics here began to get mixed up with mechanics and ballistics. It was pointed out that troops would not always remain in the open to be whiffed out of existence by shrapnel. Rather would they get under cover at what speed they might. So a shell to deal with entrenchments, buildings and fortifications was indicated. Here again careful thought showed the need of accurate gunnery and a still higher velocity in the shell which, being more local in its effects, could not be allowed the same latitude in its action as its shrapnel confrere.

So a high explosive shell weighing only 11.68 pounds was introduced. Thanks to the chemists this time, its contents were of such a startling nature that its weight became a secondary consideration. It raced away on its mission at a velocity at that time unequaled even by the latest small bore rifle, and when it exploded its melinite charge blew great holes in the scenery. — Pousse Cailloux in Blackwood's Magazine.

Are You Saving?

The little savings bank in the home means more for the future of the children of a family almost than all of the advice in the world. It gives them the right start.—William McKinley.

Duty and pleasure make a bad team to manage.

A Choice Negligee For The Languid Spring Days

FOR forty winks between functions is this beautiful kimono of pink silk brocaded with roses in a deeper shade of velvet. The robe has been cleverly cut to allow the handsome design to border the bottom and form the Japanese sleeves.

• • •

Kid is used as a trimming in many of the new spring clothes. It is fashioned into very smart collars and cuffs and straps of it are used on skirts and coats. There are kid flowers, too, for trimming straw hats.

• • •

Shoulder straps, in spite of the fact that sleeves are used in some of the evening frocks, are still often no more than a few strands of beads or a fold of tulle. ANNA MAY.

The Kitchen Cupboard

WEDDING CAKE.

THE housewife who is preparing for a wedding in her family in June should take note of the fact that fruit cake for the wedding should be made now, in order to have time to properly ripen. Provided that she has no favorite wedding cake recipe of her own to follow, she will no doubt find this a good one:

Four cupfuls of butter, four cupfuls of sugar, ten eggs, two quarts of flour, six cupfuls of currants, two cupfuls of almonds, one cupful of brandy, three cupfuls each of sultana raisins and citron, one-half cupful of candied lemon peel, two teaspoonfuls each of nutmeg, mace and cinnamon, one tablespoonful each of cloves and allspice.

Put the butter and sugar into a large bowl; break the eggs into a quart measure; cover a small tray with a clean sheet of paper and lay on it the sifted flour, the citron and the lemon peel, after cutting the fruit into shreds, also the almonds and spices. Have the brandy measured out and at hand. Also get ready a large cake tin, lining it with white paper and wrapping it around on the outside with several thicknesses of coarse wrapping paper, which may be tied on.

Having thus prepared everything (banked the fire to last in case the cake is to be cooked in a coal range), begin the mixing.

Beat the sugar and butter to a light cream and add the eggs gradually, beating after each addition. Mix the spices and fruit into the flour and add these, together with the brandy, all at once to the creamed mixture. Mix thoroughly and then put the fruit batter into the prepared tin.

Smooth over the top, shaping up a little along the edges, giving the effect of a hollowed center. Put plenty of paper on top, so that there will be no danger of the upper surface scorching. The side coverings are for the same purpose. This should bake for eight hours with the oven kept at a steady heat. It can be baked in a gas range, or it can be steamed instead of being baked. Remove from oven and cool.

To keep the cake in the best possible condition and allow it to ripen well, lay it on a bed of brown sugar in a box; fill brown sugar in all around it and on top and set away until a week or so before the wedding. If you have a crock of sufficient size that will be the best thing to put it in. A pasteboard box lined with several thicknesses of waxed paper is good.

Anna Thompson.

FOOTGEAR.

A Vivid Comparison of This and Last Year's Styles.

Anybody who predicted that so called "fancy footwear" would be out of fashion this spring made a wrong guess. It may be true that last autumn many of the extreme styles of ornate footgear that had been worn during the summer were discarded, but it is also true that they were discarded simply to make way for other styles of fancy footgear.

This spring the shops are as far from showing plain black boots and shoes as they were last year. Yet the boots and shoes of this spring are quite unlike those of last.

To begin with, a novelty is the return of the colonial pump. It is here in all its glory of tongue, and most women are thankful to see it again, for surely the colonial pump is comfort itself. It stays on without rubbing at the heel, which is something few other cuts of pump do.

Colonial pumps are made in patent leather, in black kid and in colors. Tan kid in various shades shows buckles of brown enamel or brass. Some of the black kid pumps have cut steel buckles, and the colored ones have either silver buckles of true colonial pattern—which also grace some of the smartest dull black kid pumps—or buckles covered with the colored kid.

Buckskin shoes are worn this spring. There are some very good high cream and light tan buckskin boots, both buttoned and laced, with French heels, that are admirable for street wear with light frocks.

The blind eyelets are still used for laced boots and the round laces. Cut work is shown on some of the white kid and buckskin boots and also on those of black patent leather. It forms a decorative band on each side of the front lacings.

Although leather or kid of two colors is not combined so much as it was last year, there are many sport shoes of white buckskin or canvas and tan leather. The combinations differ. Sometimes tan heel and toe caps on white boots with tan laces are found. Sometimes the vamps will be tan, with a white top and toe.

There are high buttoned or laced suede boots in violet, dark blue, green and other colors to wear with silk frocks of the same color.

Three buckled straps are found on some of the new low shoes. The buckles, of nickel, are small, but heavy. Sometimes the straps come from the edge of the sole.

FOR THE CHILDREN

A Sleepy Time Story For the Littlest Folks In the House.

FORGETFULNESS OF A KING.

How He Caused His Daughter a Great Deal of Unhappiness—What a Fairy Accomplished—Boy Scout Who Won Honor For Well Doing.

Hello, said Uncle Ben to Polly Ann and Little Ned; I'm just in time to tell you a story. It is about

THE PRINCESS' WISH.

Once upon a time there lived a little princess. She was so beautiful that the king gave her anything she wished. One day she expressed a desire for a doll, a truly wonderful doll, that could talk and walk and sleep in a flower. This the king promised to get for her. He forgot all about it the next day, however, and was much surprised to hear his little daughter say to the queen: "Mamma, I am quite unhappy. Father has not yet given me the doll I asked for."

The king immediately sent out and got her a doll that could walk and talk and was so small that it could sit in a flower. But this was not what the princess wanted. She wanted a doll that really lived. In vain did the king advertise by heralds for such a doll.

Meanwhile the princess was sitting at the window gazing out at the stars. She did not care for the many beautiful toys lying around her. She had foolishly set her heart on that doll. A beautiful rosebush climbed up to her window and was literally covered with the sweet smelling flowers. While the princess was gazing at one of the buds she saw a little green worm creep toward the heart of it. Now, the princess detested any kind of a worm, but when she heard a timid, soft voice say, "Help me, ah, help me!" her heart was touched. Reaching forward, she brushed off the worm, which fell to the hard stone pavement below. Then a little flower spirit rose up from the flower and said to the princess: "For saving me from such a horrible death I will let you have one wish. Tell me what you want most." So the princess wished that she had a doll that could walk and talk and sleep in a flower.

The fairy looked grave. "There are only fairies that do all you want, and I know that I could not get you one. For the great service you have done me, however, I myself will be your fairy. But I cannot come off the rose vine, for I belong to one of the roses. You can sit here whenever you want to, and I will come and talk to you."

The princess was happy then, for she had all she wished. Forever after that, with the little fairy to guide her along the path of life, the princess lived happily.

Purpose of Boy Scout Movement.

"The work of this organization is toward the right kind of preparedness," said Governor Whitman to the scout masters of the Boy Scouts of America in a recent address in New York city. "I know that you are not primarily trying to make soldiers out

RALPH MAYER, BOY SCOUT.

of these boys, whom we have seen with so much interest today. I know that was not the original intention and is not. I know that the real purpose is to make men out of these boys, and the right kind of men—the kind of men who are going to make the right kind of citizens."

The boy scout standing at attention in the picture is Ralph Mayer of Pittsburgh. He is an honor scout.

Charade.

My first to a type of man brought fame.
My next is made by many cooks.
Of my whole perhaps you say the same,
Though the recipe's not in all cookbooks.

Answer.—Hoe, cake—hoecake.

TODAY'S FASHION NOTE

A runabout frock may be both serviceable and pretty. Homespun, checked serge of English suiting may be employed to fashion this costume. Twin belts of suede trimmed with narrow buckles are the most noticeable of the decorative features of the suit. The pockets are large enough to be ornamental, but too shallow to be useful; but as long as the ends of fashion are served, there can be no word of protest. Four and one half yards 54-inch material make the dress.

Pictorial Review Blouse, No. 6,601. Sizes, 34 to 44 inches bust. Price, 15 cents. Skirt No. 6,622. Sizes, 22 to 32 inches waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

Rheumatic Pain Stopped

The drawing of muscles, the soreness, stiffness and agonizinz pain of Rheumatism quickly yield to Sloan's Liniment. It stimulates circulation to the painful part. Just apply as directed to the sore spots. In a short time the pain gives way to a tingling sensation of comfore and warmth. Here's proof—"I have had wonderful relief since I used your Liniment on my knee. To think one application gave me relief. Sorry I haven't space to tell you the history. Thanking you for what your remedy has done for me."—James S. Ferguson, Philadelphia, Pa. Sloan's Liniment kills pain. 25c. at Druggists.

Taxes and Billboards.

The imposition of a tax on mural advertisements, which Mr. McKenna is reported to be considering, has produced satisfactory financial results for many years past in France. Not a bill can be displayed on any hoarding or in any window in that country without having affixed to it an inland revenue stamp costing at least a penny. Theatrical posters, cards announcing apartments to let and bills offering rewards for the recovery of lost dogs all come under the same law. On printed matter the stamps are usually attached before printing. Frequent inspection renders evasion difficult. In this connection our French neighbors put into operation, just over three years ago, another excellent idea which might well be adopted in this country. This is the plan they adopted to get rid of the hideous advertising boardings, which then desecrated so many of the national beauty spots. A bill was brought in proposing a tax of £2 a square yard per annum on all boardings under six yards square, £4 a yard up to ten yards, £8 up to twenty, and £16 on those above twenty. If two separate advertisements appeared on the same boarding, the tax was doubled; if three, trebled, and so on. The bill was introduced solely on artistic grounds and was passed with the enormous majority of 500 votes to 3.—London Chronicle.

Avoid Spring Colds

Sudden changes, high winds, shifting seasons cause colds and grippe, and these spring colds are annoying and dangerous and are likely to turn into a chronic summer cough. In such cases take a treatment of Dr. King's New Discovery, a pleasant Laxative Tar Syrup. It soothes the cough, checks the cold and helps break up an attack of grippe. Its already prepared, no mixing or fussing. Just ask your druggist for a bottle of Dr. King's New Discovery. Tested and tried for over 40 years.

The Great Ship "SEEANDBEE"

The largest and most costly steamer on any inland water of the world. Sleeping accommodations for 1500 passengers.

"CITY OF ERIE" — 3 Magnificent Steamers — "CITY OF BUFFALO"

BETWEEN

BUFFALO—Daily, May 1st to Nov. 15th—CLEVELAND

Leave Buffalo 9:00 P. M. / Arrive Cleveland 7:30 A. M. — Leave Cleveland 9:00 P. M. / Arrive Buffalo 7:30 A. M. (Eastern Standard Time)

Connections at Cleveland for Cedar Point, Put-in-Bay, Toledo, Detroit and all points West and Southwest. Railroad tickets reading between Buffalo and Cleveland are good for transportation on our steamers. Ask your ticket agent for tickets via C. & B. Line.

Beautifully colored sectional puzzle chart, showing both exterior and interior of The Great Ship "SEEANDBEE" sent on receipt of five cents to cover postage and mailing. Also ask for our 24-page pictorial and descriptive booklet free.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

White Serge Trimmed With Braid.

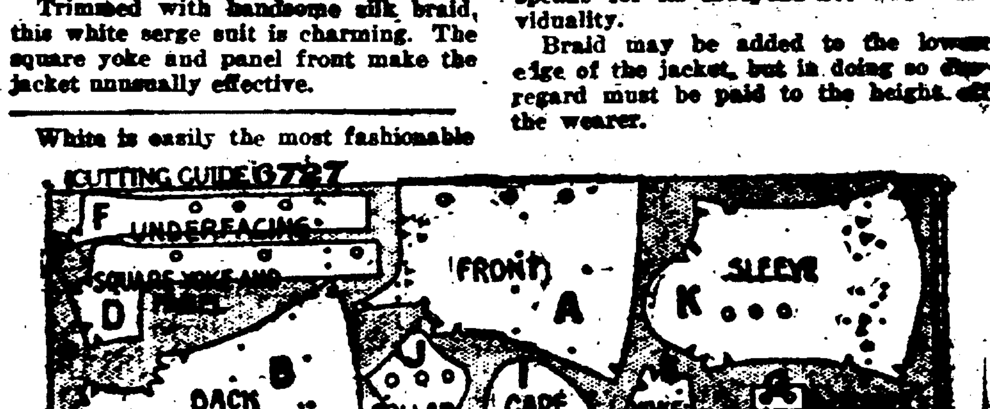
Trimmed with handsome silk braid, this white serge suit is charming. The square yoke and panel front make the jacket unusually effective.

White is easily the most fashionable color for the young girl this season. Serge is unquestionably the most serviceable material, because it is smart and inexpensive. So many of the other fabrics cost too much to be worn generally. This attractive tailored suit for misses has a jacket that is shirred at the waistline for youthful effect and made with a square yoke and panel front cut in one. The one-piece sleeves are gathered at the wrists and finished with cuffs overlaid with braid.

In medium size the suit requires 4½ yards 54-inch serge and 9 yards of braid. The various sections of the jacket are placed on the cutting guide so clearly that there should be no difficulty whatever in arranging the patern on the material before cutting the jacket. The back, cape and yoke are laid on a lengthwise fold, if one prefer the round yoke and cape effect to the square yoke and straight front panel. Otherwise the square yoke and panel are placed on a lengthwise thread of material as illustrated in the guide. The collar, stays, front and sleeve are also laid on a lengthwise thread of material.

If the square yoke and front panel are desired, cut off upper part of front along the small "o" perforations, indicating the square outline. For a shorter length than is illustrated, cut off lower parts of front, back, panel front. The absence of pockets on this suit speaks for its independence and individuality.

Braid may be added to the lower edge of the jacket, but in doing so due regard must be paid to the height of the wearer.



Pictorial Review Jacket No. 6727. Sizes 16 to 20 years, and 34 to 44 inches bust. Price, 15 cents. Skirt No. 6614. Sizes, 16 to 20 years. Price, 15 cents.

SALE OF LINEN

at Less than present Wholesale Prices

As a well known fact the war has stopped all importations of linens and what goods are to be had in this country are continually advancing in prices.

We have on hand a larger stock of table linens, napkins, etc., than we wish to carry and in order to reduce the lot offer, until June 3rd,

Table Linen prices range from 59c. per yard, up to $2.50 per yard

Napkins from $1.39 per dozen up to $7.50 per dozen.

Buy your Linens now—for they will not be offered again at such prices.

ALL TAILORED SUITS—Women's and Misses' to close out at reductions from 25 per cent., 33 1-3 per cent., to 50 per cent.

WANTS AUTOS FOR RURAL WORK

Bishop Fiske Says Something Must Be Done to Solve Rural Problem.

Syracuse—preceding the submission of the report of the Sovial Service Commission at the second session of the annual convention of the Episcopal Diocese of Central New York, at St. Pauls Church last night, Rt. Rev. Dr. Charles Fiske, bishop-coadjutor, recommended that he be given funds to purchase inexpensive automobiles for at least ten districts so the rural problem as regards its dormant state in church affairs.

Bishop Fiske said the automobiles could be used by missionaries for eight months of the year in covering their fields of labor.

With the church in the country showing a decline of 35 per cent. in two years, Bishop Fiske said a way to stem the tide must be found.

He declared that the church needs to sound a charge and not a retreat. In the opinion of Bishop Fiske if the small country church is abandoned, it will dry up springs which supply some of the best elements in the church life of the city.

Wants Fund Created.

He asked for a creation of a fund at once to take care of the missionary work of the diocese over which he has jurisdiction.

Bishop Fiske, in his address, gave figures showing the number of missions, the cost of pastoral oversight and the pledges. He said there are 107 dependent parishes and missions served by forty clergymen at an average salary of less than $925 a year. He declared the problem is a real one and has no glamour of romance.

The report of the Social Service Commission was submitted by Rev. Dr. Richmond H. Gesner, chairman, and adopted. This carries with it an appropriation for a rural survey.

The early part of the evening service was devoted to the reception of reports and minor changes to the canons. Rev. Jesse Higgins of Utica reported the deaths of Rev. Frank N. Westcott, Rev. John B. Wicks, Rev. W. W. Raymond and Rev. W. H. Hutchinson during the year and paid a tribute to each. On motion of Rev. Dr. William M. Beauchamp the report was accepted by a rising vote. The church pe nsion fund was made the first order of business for to-day after the election.

For Standing Committee.

Nominations for the Standing Committee were made as follows: George Underwood, Rev. E. H. Coley, George T. Jack, Rev. James K. Parker, Rev. A. A. Jaynes, Rev. Dr. William De Lancy Wilson, J. A. T. Doolittle, Rev. Karl Schwartz, Justice Edgar C. Emerson, Henry Ogden, George B. Cathers and Paul M. Paine.

The nominations for deputies to the general convention were as follows: Rev. F. W. Eason, Rev. A. R. B. Hegeman, Rev. Jesse Higgins, Rev. Dr. Herbert G Coddington, Rev. O. Applategate, Fred J. Bowne, Rev. William B. Clarke, Rev. William R. McKim, Rev. A. B. Rudd, H. L. Preston, Rev. R. H. Gesner, Rev. John T. Rose. Rev. Eugene S. Pearce, former Judge Charles Andrews, Nelson A. Noble, Lewis Leonard, Frank L. Lyman, J. F. Day, Thomas R. Proctor, George Underwood, Henry E. Hubbard and Henry Ogden.

Self Possession.

A man who does not possess himself enough to hear disagreeable things without visible marks of anger and change of countenance or agreeable ones without sudden bursts of joy and expansion of countenance is at the mercy of every artful knave or pert coxcomb. The former will provoke or please you by design, to catch unguarded words or looks, by which he will easily decipher the secrets of your heart, of which you should keep the key yourself and trust it with no man living. The latter will by this absurdity and without intending it produce the same discoveries of which other people will avail themselves.—Lord Chesterfield.

Trying to Signal.

"What did you tell that man who asked you if he could marry his daughter?"

"I acted as grouchy as possible," replied Mr. Cumrox. "I couldn't tell him right out that Gladys has a sharp temper, but I thought I'd sort o' hint to him that she might have inherited one."—Washington Star.

FULTON, N. Y.

FATE PLAYS STRANGE PRANK WITH SAILOR

After Crossing Ocean in an Open Boat He Loses His Life in River.

Lorain, O.—Ludwig Eisenbraun, a German sailor, who was drowned here recently in Black river, was treated very strangely by fate. Eisenbraun was the hero of one of the greatest feats in marine history, achieved when he crossed the Atlantic ocean in a nineteen foot dory.

After encountering furious storms at sea, facing death a score of times in his frail open boat, he lost his life when his hand slipped on an icy rope, which he was using to climb to the deck of a lake steamer on which he was a watchman, and fell back into the river.

On April 11, 1903, Eisenbraun sailed from Boston harbor in his dory, Columbus II. On Nov. 23 of the same year he docked his craft at Gibraltar.

Once in a storm his boat was capsized, and he lost water and provisions. He righted the boat, and two days later was reprovisioned by a British steamer.

He steered his craft against a sleeping whale, and the aroused monster nearly capsized him.

Eisenbraun had been a sailor on the great lakes for five years. He was forty-eight years old.

FINDS DIAMOND IN TOBACCO.

Railroad Engineer Discovers Gem in Tin of the Weed.

St. Mary's, Pa.—Patrick Fehley, an engineer on the Pennsylvania railroad, stationed here, considers himself a very lucky individual.

A few days ago he bought a ten cent tin of tobacco. While replenishing his pipe he was surprised to see a ring imbedded in the weed, and examination proved it to contain a setting which looked suspiciously like a diamond. He took his find to a jeweler, who appraised the stone to be worth at least $50.

With Choir, No Gift.

Topeka, Kan.—Property held for the Church of Christ in this city will revert to the original owners should there come into existence within the body any choir or other organization, according to the terms of the deed by which it was conveyed for church purposes, and which has just been filed for record.

When He Enjoys Home.

"Does your husband enjoy home?"

"Yes—whenever I want him to take me to the theater."—Cleveland Leader.

PENNELLVILLE NEWS.

An Utter Lack of Faith

It is surprising to know how many people there are, particularly women, who are utterly miserable in body and mind only because they have not enough confidence in Chamberlain's Tablets to give them a trial. Mrs. Sarah Hughes, Booneville, N. Y., was troubled with indigestion and constipation. She had bilious spells and would feel most miserable at times. She says, "Chamberlain's Tablets helped me from the first, and since using two bottles of them I have been in theb est of health."

Irving J. Galusha Writes Song for Tabernacle Meeting

Singing to the tune of "Tipperary," a song written for the occasion by Irving Galusha, 600 people, representing Prayer meeting districts 5 to 12 inclusive, marched into the Fulton tabernacle last night. A fife and drum corps headed the procession, and the effect created by the spectacle and the blending of the voices was most inspiring. Each district carried a banner with its number inscribed upon it, and District No. 6 carried a large painting of a peacock, very artistically executed by Miss Leona Joyce, daughter of William Joyce. One banner bore the inscription, "Who licked the devil? Peacock!" The assembled districts gave a yell for the evangelist before taking their places. Chorister Warth sang "The Ninety and Nine" by request last evening, and the general singing was exceptionally harmonious.

The Order of the Eastern Star, 100 strong, also occupied special seats. Every marcher was gowned in white and the effect was very striking. 2,300 people listened to the sermon, and 41 were moved to renunciation of a sinful life.

To-night the evangelist will preach on the 23rd Psalm, and Prayer Meeting Districts 13 to 20 inclusive will meet at the N. Y. Central station and march to the tabernacle.

There was another noon meeting at the Happy Hour theatre to-day, and the attendance was even larger than that of yesterday when 100 business men and women listened to a short sermon by the evangelist.

The evangelist's sermon in part was as follows:

John, 14:2 "In my father's house are many mansions; if it were not so, I would have told you. I go to prepare a place for you."

This chapter records Christ's farewell address to His disciples. The time had come when He must leave His disciples, and return to His heavenly Father. His disciples had been greatly disturbed at what He had said in the preceding chapters about His departure. They must have indicated their distress to Him in some manner, by their countenance or expression, for He immediately proceeds to administer to them such consolations as their circumstances demanded. This discourse was undoubtedly delivered while they were sitting at the table partaking of the Lord's supper. For in the last verse He says, let us arise and go hence. This is one of the most beautiful discourses that can be found in any language. Beautiful because it is so full of weighty thought, so tender and so adapted to produce comfort. It is the consolatory part of our religion, where Christ brings to bear on the mind full of anxiety and perplexity, and care, the tender and inimitably beautiful truths of His gospel. Truths fitted to allay every fear, silence every murmur, and give needed consolation to the soul. Just at this time there were many things to trouble the disciples of Christ. They were about to part with their best friend. One who had been a tender, loving, sympathetic, friend. One who had not spared Himself in any way, in order that His disciples might be prepared to carry on the work of God in a world of sin and wickedness. Now He was going away, and His disciples would be left alone to meet persecutions and trials for His sake. They were without wealth, without friends, without homes. No doubt they felt that His death would demolish all their schemes, for they had not fully learned the doctrine that the Messiah must suffer and die in order that poor sinful humanity might be permitted to enjoy the blessings of God and His son in that house of many mansions throughout the ages of eternity. And in order to drive away all fear from their minds, and prepare them for the terrible crisis awaiting them. Jesus said, Let not your heart be troubled. Ye believe in God believe also in me. In my Father's house are many mansions; if it were not so I would have told you for I go to prepare a place for you, and if I go and prepare a place for you, I come again and will receive you unto myself; that where I am there may ye be also. In this passage of scripture we have the assurance that there is a heaven for the people of God. This is clearly revealed in this farewell address though eye hat not seen, nor ear heard, the things which God hath prepared for them that love and serve Him. Jesus tells us that In His Father's house are many mansions. God hath revealed this to man by his written word, by His son and by His spirit. And all the assaults of Satan, and all the efforts of skepticism, and all the powers of the vain world cannot overthrow the doctrine that God has prepared a place especially for His own people. These things may obscure the prospects, and they may stagger the hopes of those who do not have implicit faith in God and His Son, But amidst all the confusion is heard the voice of Jesus Christ saying, Be not afraid, It is so, and if it were not so I would have told you, because I would not have allowed you to entertain so natural an expectation only to be disappointed. That the words of Jesus in this passage of scripture are true, can be proven by the life of Jesus here upon the earth. No matter what men say about Christ and His disciples, one thing is certain and that is this, no man can point out one flaw in the character of Jesus Christ.

Infidels Scored.

Look upon Him as you will, look at Him from all sides, follow His life from the manger to the cross, and I challenge the blackest infidel to point out one time when Jesus was false to the truth. Look at Him in the garden of Gethsemene. Look at Him in the judgment hall, when those demons spat in His face, and struck him with their hands. Look at Him on the cross, and who will dare to say that He belonged to this earthly sphere.

His works, His tastes, His longings, His infinities, were every hour proving Him to be what He claimed to be, the Son of God. And my friends, His miraculous life, His miraculous resurrection and ascension all reveal to man that there is a better world than ours; and that somewhere in God's great universe, there must be a land of purity, and blessedness and peace and glory, such as would be congenial to Jesus Christ and the people of God. And it was His mission in leaving His heavenly home and coming to this world of sin and wickedness to announce Himself as the way to that region beyond the grave, where there is purity and peace and blessedness forever. He says, I am the way, the truth and the life. No one cometh unto the father but by me. And wherever He went

Last Minute News

(By United Press.)

Paris—French troops advanced last night on the west bank of the Meuse to the village of Oumieres in a grenade fight. The Germans captured French trenches north of Douaumont, capturing many prisoners and inflicting appalling losses upon our forces, says the War Office this morning.

* * *

Rome—Two Austrian aeroplanes of a squadron attempted to raid Vienzce and Verona yesterday, but were brought down by well directed shots from anti-aircraft guns.

* * *

London—The steamer Washington, the largest U-boat victim since the beginning of the war, was sunk last night. The members of the crew were saved.

* * *

Berlin—German officials cherish no high hopes of an early termination of the war, despite the great amount of peace talk here and in London, Paris and Washington.

* * *

Berlin—The Italian Minister to Greece and the French Minister to Greece have been recalled by their governments because of their non-activity in negotiations which led to transportation of troops to Salonica.

* * *

Washington—Reversing the decision of the Court Martial, Secretary of War Baker has directed the 116th Texas Regiment to face the serious charge of failure to obey orders.

* * *

Washington—With the American mail seizure protest forwarded to London and Paris, this government will take strong action to prevent further depredations on the part of the belligerent antions until the time arrives when a reply to the note may be expected.

* * *

New York—Arthur Warren Waite will stand in his own defence, announced his counsel in court this morning.

* * *

Revere, Mass.—George Wiley, of Syracuse, showed the way to a big field of starters in the 25-mile motor paced race here last night.

* * *

London—Sir Roger Casement was indicted by the Grand Jury to-day for high treason in connection with the Irish revolution.

OLD GUARD PREDICTING CERTAIN VICTORY FOR HUGHES AT CHICAGO

New York—The political conferences of the "Old Guard" of the Republican party that have been held here almost daily for several weeks, have ceased.

In these various conferences there have been present, in person or through representatives, William Barnes, Jr., Governor Whitman, George R. Sheldon, Franklin Murphy, of New Jersey; Senator Brandegee, of Connecticut; Senator Lippitt, of Rhode Island; Senator Lodge, of Massachusetts; Senator Penrose, of Pennsylvania, and at rare intervals leaders from the Middle and Far West.

The conclusion reached, as expressed by some of these men, was that the Chicago convention will be a mere formality. Almost without except they profess to believe Hughes will be nominated. A small minority asserts Harding, of Ohio, will lead the party. At the moment they admit their plans have been changed because of the aggressiveness of the Roosevelt boom. Until recently there never had been any real intention of nominating Justice Hughes, and a month ago Senator Harding was regarded as the man to be selected.

All these men of Republican faith say Roosevelt is not a menace.

The first poll on Friday, June 9, perhaps, they say, will be sufficient to display the good qualities of the favorite sons. The second ballot they almost unanimously agree, on Saturday will surely nominate Justice Hughes.

The expressed belief of these statesmen is that the result to the Republican and Progressive gatherings in Chicago will be harmony and a restored Republican party.

They say Roosevelt will not again head an independent ticket. His desire to see the defeat of Wilson will compel him, however reluctant, to support Hughes, they assert. They cite the fact that not many months ago the Colonel was said to favor the nomination of Justice Hughes.

Germans Closing Jaws of Cracker on Verdun's Forts

Berlin—The giant German nutcracker is gradually closing upon Verdun, the right jaw of a front of three miles advancing in strong massed formation northwest of Verdun. The French are sacrificing thousands of men to stem the onrush and have lost one whole army corps in their efforts to hold back the tremendous German attacks.

Two new divisions of Bavarians were thrown against the ruined fort Douaumont, while great masses of Thurington troops swept the French out of the village. In both encounters the Germans made many prisoners. It is conservative to call the losses on both sides appalling.

Yesterday, with Fort Douaumont practically in their hands and their positions on the Dead Man Hill line strongly consolidated, the French hoped that their brilliant offensive was the turn in the tide. To-night there is the gravest disappointment in Paris.

The only saving clauses in the statement of the situation are those contained in to-night's French official report that they still "hold the immediate approaches to the Douaumont position," and that the German attempt to overwhelm the French positions in the Caillette wood, between Vanx and Douaumont, were defeated.

The gravity of to-day's French defeats lies in the fact that the Germans once more hold command of the ridge which runs from Pepper Hill, on the east of the Meuse, through Douaumont and Vaux. The Douaumont ridge is the highest point of this line, and for three months the Germans have held all the French positions on that side of the river under observation and artillery control.

It was evident, therefore, that the Crown Prince must retrieve the lost ground at Douaumont no matter what the cost might be.

WOULD MAKE PARKS INTO POULTRY FARMS

London—Give the hen a chance.

With eggs at seven cents each, Mrs. Lionel Guest, daughter of the late John Bigelow, American Ambassador to Paris, is uring a plane here today to turn London's public parks into poultry farms.

An enthusiast on pouultry breeding. Mrs. Guest has started a crusade to give the hen a chance. She is telling the authorities that every public park should have its chicken farm with a woman expert in charge to show the public how to get the best out of biddy.

Green park and St. James' park. Park, near Buckingham palace; Hyde park and other expanses of public greensward have been seleced by the American woman as the best locations upon which to try the poultry experiments.

FULTON HIGH LOST FIRST GAME YESTERDAY

The Fulton High school team lost a game for the first time this season yesterday, when the Solvay High school squad won a loosely played contest by the score of 9—3. The game was replete with errors, with the locals the worst offenders, and in every department the Fultonians showed a pronounced slump from their previous standard.

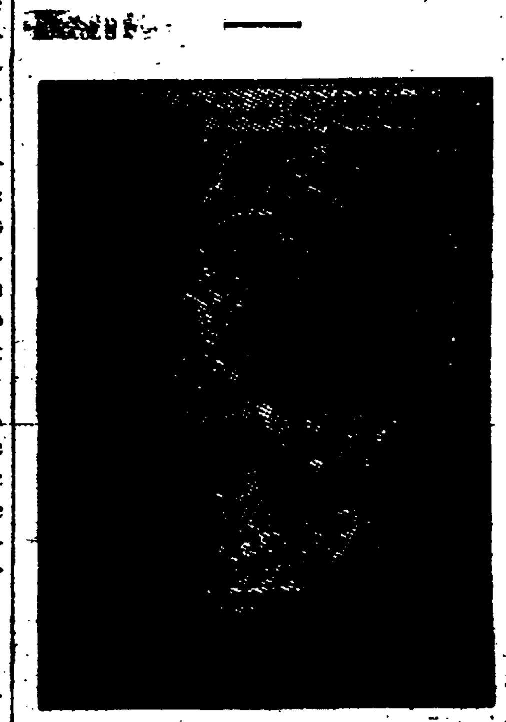
Shafter pitched for Solvay and he held the Fultonians to three scattered hits. Barnes twirled well for Fulton, but his teammates made nine errors behind him and practically booted away whatever chance of winning they had.

OSWEGO KNIGHTS JOINED IN DANCING LAST NIGHT

The Knights of Columbus held a very enjoyable dance at the Oneida street lodge rooms of the Fulton council last night. About sixty couples attended the affair, including a large delegation from Oswego, many of whom made the trip in a large auto-bus.

A special orchestra composed of Professor Loomis, of Oswego, banjoist; Bert Adkins, drums, and David Carroll, pianist; furnished the music for the dancing. Refreshments were served at midnight and the affair concluded at an early hour this morning.

REV. SAM SMALL TO SPEAK HERE



THE REV. SAM SMALL

Sam Small started fighting in the Civil war as a very youthful Confederate soldier. After he had, as he expressed it, "worn himself out whipping the Yankees," he began to practice law in Tennessee; was secretary to President Andrew Johnson, became an editor and public official and later, under the ministry of Sam Jones, was converted and became a preacher. Since then he has been fighting the devil diligently in high places and in low. For several years his work has been on behalf of National Prohibition. He is to speak in Fulton on May 30th at 7:45 p. m., in the tabernacle under the auspices of the Anti-Saloon League of America.

Dr. Small is one of the leading figures in that group of notable men taking part in the Anti-Saloon League's Campaign of a Thousand Meetings in New York. His addresses give special emphasis to what New York voters should do as American citizens in the Congressional primaries and election this year.

THE FULTON EVENING TIMES

HANDLING SPEED FIENDS

Last summer Chicago had an emergency court where speeders were given a chance to explain the whys and wherefores of their love for racing. In twenty-eight days the judge sitting in vacation collected something like $20,000 from speeders.

During the time that the "speeders' court' was in session the judge expressed a few of his beliefs in a succinct way, as follows:

"It's just as dangerous to run an automobile at forty miles an hour in the streets as it is to fire a bullet in a crowded thoroughfare. In fact, a man with a speed bug is more dangerous than a man with a gun.

"There ought to be a law that would send a man to jail if he traveled through the streets at more than thirty miles an hour."

The court continued with a number of other crispy ideas, but overlooked at least one of much importance, which is, that the enforcement of penalties for speeding on the streets of any city is as important as their levying.

There is nothing to complain about in this city in the matter of collecting fines from speeders, provided the minions of the law are handy with handsful of salt. With few exceptions autoists in passing through the conjested section of the city observe some respect for the pedestrian, but there are stretches of roadway within the city limits that are used by the speed maniacs with about as much freedom as their madness could wish for. It cannot be expected of a motorcycle policeman to cover all sections of the city at the same time, but after all is said and done, the sooner one example is made, the sooner will this city take another forward step to protect its citizens.

CITY BEAUTIFUL CONTESTS

A City Beautiful Contest has just been inaugurated by the Rotary Club of Auburn, attesting to a new interest of general civic improvement by that live organization. In our news columns yesterday appeared the conditions of the contest which is confined to residents of State and Clark Streets under the terms of the prize contest, but the purpose of which should enlist the active support of citizens living in all parts of the city. In all 13 prizes will be awarded on October 1 and the contest begins May 30. There are no entrance fees and all that is required to enable anyone to compete is to enrol and make some noticeable improvement in the appearance of his home by his own labor or that of a member of his family. Prizes range from $10 down to $2 apiece and should stimulate hundreds in making their homes the most pleasant place of abode possible under the existing conditions.

Unlike certain contests of a similar nature conducted several years ago by a local civic organziation that seems to be defunct and that defaulted on its promised prizes and other expenses, the contest now conducted by the Rotary Club is backed by live persons with real money, and with genuine interest in the community.—Auburn Citizen.

The Only Way the People Can Rule

There will be some indictments found against one or two wire tappers and desk breakers, and that will probably be about all that will happen.

After that, wire tapping will be resumed, and police officers and secret service agents and private detectives will burglar as merrily as of yore.

Of course, publicity has done good. For one thing, no sensible man will ever use the telephone to talk business over. He will not entrust any private conversation to the mercy of a dishonest and disloyal corporation which takes his money and betrays his secrets. So the business community will be that much safer.

But neither soft impeachment nor wide publicity will make sneaking [illegible] thieving private detectives respect the law or private rights.

The only remedy for the lawlessness of arbitrary officials and insolent burglars labelled private detectives is your taking control into your own hands, citizens.

You should at once begin to demand and to compel the institution of those two powerful and ready means of controlling your officials and your own affairs—the recall and the initiative and referendum.

With the club of the recall over their heads you can make your public officials your servants instead of your masters. There is no means like it to keep official heads from swelling.

With the initiative and referendum you can quickly pass laws and ordinances to enforce your will. You do not have to wait until it pleases State or city officials to let you have a law passed.

You speak and the word becomes law then and there.

Do you think that the financiers and promoters who robbed you taxpayers of millions in their subway and elevated transportation deals could have put over those steals if you had had the recall to keep conniving officials straight and the initiative and referendum to smash those thieving deals to pieces?

Why, those burglars would not even have begun to plan their raid on your treasury and your pocketbooks.

They would have known that they had not a chance to break into the public cash box with the recall and the initiative and referendum standing guard.

You people never will have municipal government responsive to the public will until you adopt the only means by which you can COMPEL your municipal officials to do what you want done, instead of what they decide you ought to want done.

Think it over.

Opinions

NORTH COUNTRY FIRST.

The United States is the best place to take this year's vacation and owners of summer resorts rejoice and are making ready for great season. Even Canada is not attractive because of war conditions that bring American tourists under suspicion and apt to subject them to inconveniences. At any rate naturalized Americans from countries now at war with Great Britain are asked to provide themselves with certificates of naturalization, which they must show to get freedom of movement. But they needn't go there. They can stop on this bank of the St. Lawrence, where there are greater pleasures, better hotels, better fishing and better scenery than they can get by crossing the river. They can avoid all inconvenience by coming to the Thousand Islands and stopping on the American side.—Watertown Times.

FUNNY.

Favorite occupation just now is to go back and take the political speeches of Justice Hughes and construct from them a platform for the present.

If Hughes is a candidate, why doesn't he get off the bench, come out in the open and be a man among men? There are several other candidates in the Republican party and they have not hesitated to put themselves on record this year an dunder present conditions. None of them is hiding under or behind a position that prevents his speaking out and telling the country where he stands. It is an honorable aspiration for a man to seek the Presidency, if he do it openly; and it is due the country that he declare his opinions as to policies and the great questions of the hour.

But isn't it an amusing thing to see the Republican party forced to go back five, six, eight and even 10 years to discover the opinions a supposable candidate for the Presidential nomination held upon national questions at that time, and which may have changed materially since then because of the readjustment of all business, industrial and even social life that has been forced upon us from the outside? Root and Roosevelt, Burton and Cummins, and each of the dozen or more candidates are coming out in the open and telling the country what might be expected of them were they nominated and elected. But Hughes stands back, not admitting that he is a candidate, and still not making it certain that he is not and would refuse to run!

This country has never before witnessed such a spectacle. No party has ever been confronted by just such a spectacle. No party has ever been confronted by just such a proposition. The great leaders of the Republican party realize the incongruity of the situation, but they seem powerless to get out of the dilemna.—Utisa Observer.

THE CREDITS BILL.

The rural credit project new pending in Congress, both the House and the Senate having passed bills which are substantially alike and which are to be reconciled in conference, is open to the criticism of being awkward and tentative, of being a grant of privilege, and economically alien. It is largely borrowed from abroad without intelligent adaptation to the habits, temperament and experience of American agriculture. Even so, it need not be dangerous. And yet it is dangerous, not only because it contains the potentiality of an enormous credit inflation in the hands of people whose appetite for credit in insatiable, who confuse solvency with politics and who are notoriously not the most prudent borrowers in the world, but because, moreover, it contains the possibility of putting in the hands of the Federal Government a power over current funds which is incompatible with every theory we hold of the Government's limitations in these matters.—New York Times.

Napoleon's Destructiveness.

Napoleon was destructive by character and custom. He stuck his paper knife into the costly chairs that were provided for him everywhere. He wasted huge quantities of paper. Whenever he took up anything that was frail or finely worked he was quite certain to demolish it or damage it before he put it down. He pulled up the choicest plants in the hothouses and when he could do it without being seen he used to shoot Josephine's rare birds.

One day the emperor shot out one of the eyes of Massena, the duke of Rivoli, but nothing was said of it. Berthier took the blame for it, probably because he was master of the hunt.—"Napoleon's Men and Methods."

A Schoolboy's Story of Jonah.

A school board boy, competing for one of the Peek prizes, evolved this confusion of widely different events. He had to write a short biography of Jonah, and he produced the following: "He was the father of Lot and had two wives. One was called Ishmale and the other Hagher. He kept one at home and turned the other into the desert, when she became a pillow of salt in the daytime and a pillow of fire at night."—From Wheatley's "Literary Blunders."

National Defense and International Peace

Business and Patriotism

A Nonpartisan Appeal to the Nation

The White House
Washington, April 21, 1916

To the Business Men of America:

I BESPEAK your cordial co-operation in the patriotic service undertaken by the engineers and chemists of this country under the direction of the Industrial Preparedness Committee of the Naval Consulting Board of the United States.

The confidential industrial inventory you are asked to supply is intended for the exclusive benefit of the War and Navy Departments and will be used in organizing the industrial resources for the public service in national defense.

At my request the American Society of Civil Engineers, the American Institute of Mining Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers and the American Chemical Society are gratuitously assisting the Naval Consulting Board in the work of collecting this data, and I confidently ask your earnest support in the interest of the people and government of the United States. Faithfully yours,

Woodrow Wilson

WOMEN RAISE BIG ENDOWMENT

(By United Press)

New York—We are ready to announce that the $100,000 endowment fund of the Federated Clubs has been fully contributed by the clubwomen of the United States. The announcement will be formally made at the National Convention now going on here.

When the growing need of a larger income for the General Federation became too great to be ignored it was proposed either to increase the dues or raise an endowment.

Larger dues might shut out some clubs from membership and the women gathered at Cincinnati for the Biennial Convention of 1910 realized the value, not only to the club women themselves, but to the country as a whole, of this body of women coming together from every State and from almost every condition of life to plan for the common welfare.

Women who were learning to understand and sympathize with circumstances foreign to their own home surroundings and to recognize the obligation resting on them to do their share in building up the nation.

To reduce the number of those brought under the inuence of the General Federation could not be considered so the plan of an endowment was adopted.

At the Convention in Cincinnati, 1910, it was voted to raise an endowment of $100,000.

At the Convention in San Francisco, 1912, the endowment was presented to the club women in a series of striking and effective talks under the direction of Mrs. Pennypacker, and it was shown to be well started toword success.

At the Convention in Chicago, 1914, the last $20,000 was promised.

JUST WAIT TILL THEIR WIVES HEAR OF THIS

(By United Press)

Cleveland—Mrs. S. T. Brixley put up an elaborate four apartment bird house in her back yard in Euclid Heights a few weeks ago. She was puzzled when half a dozen or more birds loafed on the roof of the house but built no nests. She finally figured out the situation.

"While their wives were nesting elsewhere, the men birds have been using my birdhouse as a club," said Mrs. Brixley, indignantly.

WOULD YOUR CHICKEN ENDORSE THE PLAN?

(By United Press)

Pierre, S. D.—Hens are laying for South Dakota prohibition to-day. Women prohibition workers are to use all profits from the sale of eggs this week for a fund to further prohibition in this state.

1916 CONVENTION OF THE REPUBLICANS MOST UNCERTAIN IN PARTY'S HISTORY

Large Number of Possibilities and Attitude of Progressives Add to the Interest.

History of Some Other Notable Gatherings—Lincoln's Nomination In 1860 Came as a Surprise.

THE sixteenth national convention of the Republican party, which meets in the Coliseum in Chicago on June 7, will be one of the most interesting and exciting gatherings ever held by that party. Excitement will be intensified because of the uncertainty of the nominee. When the first ballot is taken there will be a dozen men voted for, any one of whom may subsequently be the fortunate one. It is conceded that all of these have a chance, some better than others.

Another thing that tends to add interest is the attitude of the Progressive party. The split of 1912 is vividly recalled. Will the two factions get together this year, or will there again be a third ticket?

The history of this split is well known. Theodore Roosevelt, who had served one term of his own and three and a half years of McKinley's second term after the latter's assassination, unqualifiedly indorsed William H. Taft, then secretary of state, for president in 1908. Mr. Taft was overwhelmingly elected.

Break Four Years Ago.

The convention of 1912 approached. Roosevelt was then an avowed candidate. While he had not served two complete terms, the third term argument against naming him was raised. A bitter fight over seating the contested delegations was raised. Finally a majority of delegates with Taft proclivities were seated and the voting started. On the first ballot Taft received 561 votes and Roosevelt 107. A few others were scattered between Hughes of New York, La Follette of Wisconsin and Cummins of Iowa. However, there were 344 delegates who, vexed at the manner the contests had been settled, refused to vote for any candidate.

Colonel Roosevelt then organized the Progressive party, was declared the nominee for president and in the election the following November received a larger popular vote than did Taft, the nominee of the regular Republican party. The vote then was as follows: Woodrow Wilson, Democrat, 6,293,019; Theodore Roosevelt, Progressive, 4,119,507; William H. Taft, Republican, 3,484,956. Wilson received 435 votes in the electoral college, Roosevelt 88 and Taft only 8.

This was the birth of the Progressive party, which may be amalgamated with the Republicans again at the approaching Chicago convention or which may continue to exist and again name a third candidate. It will hold a convention in Chicago, also opening on June 7.

The Republican convention of 1860 was one of the most exciting and surprising ever held. Long before the convention met it was seen that the contest very likely lay between Lincoln and Seward. All the free and border states, with the addition of Texas, were represented. The first two days were taken up with seating the delegates and adopting a platform; on the third the candidates were formally presented without speeches. Seward was popular, and his cause was superbly managed by Thurlow Weed, one of the shrewdest politicians the country has produced. But there was a growing feeling that, much as he deserved of the party, Seward could not carry such doubtful states as Pennsylvania and Indiana. On the morning of the third day Weed, in attempting a Seward demonstration, was outwitted. He planned a monster parade in Seward's behalf. While his adherents were parading the streets the Lincoln managers packed the enormous Wigwam, where the convention was held, with their sympathizers. It was a bold stroke, and it gave the Lincoln cause the powerful aid that an enthusiastic audience alone can give. As the balloting proceeded every vote for Lincoln was cheered to the echo.

Seward led on the first two ballots, but on the second his gain was but 10, while Lincoln, largely through Pennsylvania's support, gained 75. While the third ballot was being counted a hush fell on the convention. It was known that Lincoln was either nominated or very close to it. The count showed him to be but two and a half votes short of a majority, with 231½ votes, 180 for Seward and 50 scattering.

At this juncture Chairman Carter of the Ohio delegation mounted a chair and called out, "I rise to announce the change of four votes from Ohio from Mr. Chase to Abraham Lincoln." As soon as it was realized that this gave Lincoln the nomination an uproar broke forth. An immense charcoal likeness of Lincoln was unrolled from the rear gallery, and the entire audience and convention, with the exception of the New York delegation, indulged in the wildest enthusiasm for some minutes. When order was restored there were other changes that gave Lincoln a total of 354.

Ingersoll on Blaine.

When the Republican convention convened at Cincinnati in 1876 Blaine was thought to have a safe majority of the delegates surely for him. As a matter of fact, he did receive the votes of a majority of the delegates, but not on any one ballot. Many delegates were held by instructions or other complications from registering their real wishes, and there was probably not a moment when, had they all been free to act as they chose, he could not have received a large majority.

The speech of Robert G. Ingersoll placing Blaine in nomination will go down in history as a most eloquent example of convention oratory. When the speaker finished the stirring tribute to the "plumed knight" even the opponents of the Maine statesman were stirred to enthusiasm in spite of themselves. The audience and delegates rose as one man, those who bore instructions for other candidates vieing with Blaine's most steadfast supporters in paying him the compliment of unrestrained applause. If a ballot had been reached that day it is doubtful if any power could have prevented Blaine's nomination. It was at this critical juncture that some of the cooler headed of the anti-Blaine leaders resorted to extreme tactics to save the day. They had the gas clandestinely cut off from the convention hall, so that when night came on adjournment was forced by the darkness.

Overnight the opposing forces regained their equilibrium and struggled desperately for delay. The key to the situation was held by the Pennsylvania delegation, which, under the head of Simon Cameron, one of Blaine's bitterest opponents, was instructed to vote for Governor Hartranft. At the end of the second day of balloting Cameron realized that he could not hold the delegates in line much longer. He therefore proposed that the delegation should continue to support Hartranft only so long as his vote increased. When it fell off they were to be free to vote as they chose. The Blaine members of the delegation eagerly accepted this apparently favorable proposal. Cameron, however, who knew arguments that would go with the southern carpet bag and negro politicians, arranged to have Hartranft's vote increase slightly on each ballot. By this method Hartranft's vote was maintained until the break to Hayes as a compromise candidate came on the seventh ballot.

Grant and Third Term.

When the Republican national convention met at Chicago on June 2, 1880, more than three-quarters of the delegates were found to be almost equally divided into two political camps. The two leaders whom they supported were General Grant, who was a candidate for a third term, and James G. Blaine, who had been a leading candidate in 1876. The two forces were completely organized and ably led, Roscoe Conkling being in charge of the Grant forces, while Senator Hale marshaled the Blaine cohorts.

Grant's opponents were fully realizing that in view of the remarkable manifestation of popularity which had been accorded him since his return in the previous fall from a tour of the world, their best ground of attack was the opposition to a third term. All attempts to get him to commit himself early in 1880 had been answered by the terse declaration, "I will neither accept nor decline an imaginary thing." His supporters took heart, however, and when the convention met it was evident that his followers were confident of winning.

Conkling adopted a truculent and arrogant attitude in the convention proceedings from the very start that stung the Blaine leaders to anger and destroyed all possibility of compromise. His first act in the convention was a play to the galleries and at the same time a studied insult of the Blaine faction. He moved a resolution binding the delegates to support the nominee of the convention, whoever he might be, thus showing a pretended distrust of the Blaine following. The resolution was adopted, but the debate upon it made him so unpopular with the supporters of all the other candidates that it really made the hope of obtaining recruits for Grant in other directions impossible.

Garfield Picked Out.

Conkling's next move was to attempt to force the unit rule on the convention by which he would have been able to cast New York's entire vote for Grant. As it then stood the delegation was divided 51 for Grant, 17 for Blaine and 2 for Sherman. James A. Garfield, chairman of the committee on rules, reported adversely on this proposal and defended his position so ably and eloquently as not only to defeat Conkling's move, but to make Garfield himself a marked man, to whom the convention could enthusiastically and gratefully turn when tired out with the hopeless struggle. Garfield's closing words in defining his position in opposition to the unit rule, that he stood his ground because he believed it "to be everlastingly right," not only carried the convention with him in the ensuing vote, but recurred to them with new force when his name came before them as a candidate later on.

Conkling's nominating speech was a masterly example of convention oratory, ranking almost on a plane with Ingersoll's speech of four years earlier. Its opening phrase, "When asked whence comes our candidate, our sole response will be, he hails from Appomattox and its famous apple tree," caught the fancy of the galleries and aroused enthusiasm, but it was very near doggerel. At one of the evening sessions a demonstration in Grant's behalf was started that precipitated a full half hour of ear breaking enthusiasm, during which the audience broke into song, bands played, and Conkling, standing on a chair in the center of the New York delegation, slowly waved the state banner back and forth.

Scarcely had this tumult died down when a handsomely dressed woman leaped to the pedestal of a statue of Liberty on the platform and waved a red parasol wildly. Then she caught up the flag and, winding it about her, called for cheers for Blaine. They were given with a spirit and vim that matched that for Grant a few minutes earlier. When the watches recorded the fact that the Blaine demonstration had lasted five minutes longer than that for Grant it subsided suddenly.

Grant led on the first ballot with 304 votes to 284 for Blaine, 93 for Sherman, 31 for Washburne and 30 for Edmunds. After thirty-five ballots had been taken with little or no change the convention became weary. When, therefore, the Wisconsin delegation after a caucus decided by a few votes to throw their support to Garfield it was a signal for the stampede which made Garfield the nominee and ended the most dramatic convention struggle in American history.

Harrison's Shouters.

"I am a Republican. I belong to the grandest political body ever organized by the human race"—

This was as far as he was allowed to proceed in the last speech Colonel Robert Ingersoll ever made in a national convention. The Republicans had gathered in Chicago in 1888 either to nominate James G. Blaine or Benjamin Harrison. Blaine was coaching in Scotland with Andrew Carnegie. The convention decided to offer him the nomination by cable and take a recess until a reply was received. This was about noon. There were fully 12,000 people in the big auditorium, and they made it plain that they wanted to hear from some of the leading Republican orators. It was decided to gratify their wishes. Frederick Douglass, the negro orator, was the first speaker, and what he said was highly pleasing to the crowd. He spoke for nearly thirty minutes.

While he was speaking the Harrison managers observed Colonel Ingersoll seated on the platform. He was there in the interests of Walter Q. Gresham of Indiana, Harrison's most formidable opponent. Only the preceding day there had been a very impressive "full dinner pail" parade for Gresham by Chicago workingmen. Here was a dilemma. Every man in the convention hall knew of Ingersoll's skill as an orator. Probably every one of them had read his famous "plumed knight" speech in which he placed Blaine in nomination at Cincinnati in 1876. To permit him to speak now, even though he should mention Gresham's name only incidentally, would be to imperil Harrison's chances. The Harrison leaders held a hurried consultation and dispatched runners to all parts of the building with instructions to stop Ingersoll at all hazards.

When Douglass concluded there were cries of "Ingersoll!" "Ingersoll!" Deliberately the colonel took his place in front of the rostrum. He was given a wildly enthusiastic greeting. While the cheering was in progress he stood calmly wiping his big bald head awaiting the restoration of order. The crowd seemed to feel that something unusual was about to happen. It was an anxious moment for the Harrison cohorts. Ingersoll surveyed his great audience slowly and then in a strong, rich voice, each word carefully measured, spoke the two sentences quoted above.

The effect was electric. Seventeen words had literally swept the audience off its feet. Every man and every woman stood up and cheered. There were three minutes perhaps of genuine applause. Then when it began to subside the Harrison claquers would renew the cheering. These tactics were continued for five minutes. Ingersoll attempted to resume his speech. Immediately his voice was drowned by the noise, which proceeded mainly from the floor of the convention hall. Each time the colonel tried to speak the uproar was renewed. At last, after at least half a dozen fruitless attempts to proceed, he retired in disgust.

A motion to adjourn until 4 o'clock in the afternoon was declared carried by the chairman. When the convention reconvened a cablegram from Blaine declining the nomination was read, and Harrison was named.

New Method of Making Bread.

A new method of making bread has been adopted in Italy. It is found that 660 pounds of grain produce 880 pounds of what is termed "natural bread." In the process the grain is sifted and washed. It is then left for from forty-eight to sixty hours in a warm bath, where it germinates and begins to sprout. When the germinating process has gone far enough the grain is crushed in a machine and made into dough, which is passed into the oven.

Eleven Cents Grew to $3.78.

In 1864 Charles J. Davis, then living in Baltimore, had an account with a savings bank, but, intending to move to Cecil county, drew most of his money, leaving a balance of 11 cents. He thought no more about it until a few days ago, when he found the bank book. Out of curiosity he wrote to the bank and received a check for $3.78.

ODD TOWN IN IOWA

Farmers Consolidate Interests, Transact Business Profitably.

FOUNDED AND RUN BY THEM.

Though Built Fourteen Years Ago, When Railroad Was Constructed, Fernald Has Population of Only 100, but Air of Mutual Interest Would Please Any One.

Des Moines, Ia.—Out on the prairies of Iowa is one of the most novel towns of the country. There is no bickering between townspeople and rural residents, as is often the case. The farmers for miles around feel perfectly free to go to town without wearing starched shirts and collars. There is an air of mutual interest between town and country which would gladden the heart of any rural life expert. The reason for this is that the town is owned by the farmers themselves.

When he goes to town to buy a bar of soap or a new plow the farmer buys of himself, or rather he is a partner in the store. When he goes to the elevator he sells to his company the grain he has brought in. Perhaps his next stop will be at a bank owned and managed by the farmers themselves.

The town is named Fernald. All of its business enterprises are owned by farmers living within a radius of three or four miles. Though built fourteen years ago, when the railroad was built, Fernald has a population of only 100 and probably will not grow much larger in the years to come, because of the nearness of numerous other towns. But this does not mean that Fernald does not expect to grow and prosper, for the farsighted farmers who own the town do practically all of their trading there instead of patronizing mail order houses or buying in neighboring towns. In fact, the town is just a big social center for the whole community.

The town was founded by the farmers in order to avoid making long hauls in delivering crops to the railroad. A line elevator was built shortly after the town was founded, but it was not until about two years ago that it was purchased by a group of farmers operating under the name of the Farmers' Grain company. H. S. Fleagle, the farmer who put through the deal, was made manager of the elevator. The investment proved a wise one, for in the first year under the new management the elevator paid a profit of 95 per cent on the $5,000 capital.

The Farmers' Lumber company was organized by four farmers with a capitalization of $6,400. Mr. Fleagle also manages the affairs of this company and its $10,000 stock. Another enterprise founded by the farmers was the Farmers' Co-operative Mercantile company. After a brief period of competition the rival mercantile store was compelled to close its doors, leaving the management of the town and its business affairs entirely in the hands of the farmers themselves.

The town's founders then established the Farmers' Savings bank, with a capital of $10,000. The deposits have reached the $40,000 mark in three years. Mr. Fleagle's ability for management was recognized a third time when he was made vice president of the bank.

Fernald is in Richland township, in Storey county. Extensive use of tile has converted the ordinary prairie land into some of the most valuable farms in the state.

CONVICTS FIND NEED OF SAFE.

Sing Sing Welfare League Locks Up Its Treasures.

Ossining. — Charles Gondorf, wire tapper and secretary of the Mutual Welfare league of Sing Sing prison, has installed a big safe in the league quarters to hold the books and treasures safely from the fingers of league members who might forget the honor system and yield to temptation.

First Deputy Sergeant-at-Arms Lutz, for several weeks assistant to Peter Cullen, the sergeant and prison bridegroom, has resigned his post. Sergeant-at-Arms James Green, Cullen's successor, will appoint an assistant to succeed Lutz.

JOKE A SLOW BOOMERANG.

Recipient of Note Takes Up Matter and Clerk Loses Job.

Winsted, Conn.—Linus A. Hill, for seven years a clerk in the postoffice in Wallingford, seven months ago sent a letter to a town official calling attention to the fact that the "town clock was on strike."

Hill inserted the joke in a franked envelope. The recipient took up the matter with the postoffice department at Washington, with the result that Hill has been dismissed.

Finds Oxen Handy.

Findlay, O.—The twentieth century rapid mode of traveling via the automobile has nothing on Winfield S. Rader of McComb. He owns a team of oxen, and with them he does nearly all his farm work. Within the past few weeks the team has pulled eight automobiles out of the mud near Rader's home.

Days You'll Never Forget

THE DAY YOU PLAYED THE BANK-ROLL AGAINST THE CIRCUS LEMONADE

RAYMOND FREIS

Hullo!

When you see a man in woe,
Walk straight up and say "Hullo!"
Say "Hullo!" and "How d'ye do!
How's the world been using you?"
Slap the fellow on his back,
Bring your hand down with a whack!
Waltz straight up and don't go slow,
Shake his hand and say, "Hullo!"
Is he clothed in rags? Oh, ho.
Walk straight up and say, "Hullo!"
Rags are but a cotton roll
Just for wrapping up a soul;
And a soul is worth a true
Hale and hearty, "How d'ye do?"
Don't wait for the crowd to go.
Walk straight up and say, "Hullo!"

When big vessels meet, they say,
They salute and sail away;
Just the same as you and me,
Lonely ships upon the sea,
Each one sailing his own jog
For a port beyond the fog;
Let your speaking trumpet blow,
Lift your horn and cry, "Hullo!"

Say "Hullo!" and "How d'ye do?"
Other folks are good as you.
When you leave your house of clay,
Wandering in the far away,
When you travel through the strange
Country far beyond the range
Then the souls you've cheered will know
Who you be and say "Hullo!"

—Sam Walter Foss.

VICTIM ON ENGINE'S FRONT.

Thompson Was Held There by His Clothes and Was Not Hurt.

Cedartown, Ga.—A peculiar accident happened at Greenway, six miles west of here. While crossing the railroad track Riley Thompson's buggy was struck by a passing freight train going about twenty miles an hour.

The buggy was torn completely up, the mule escaping unhurt. The train stopped, the crew going back to hunt for the occupant of the buggy. They could not find him and came on into town.

Here they discovered Mr. Thompson hanging by his clothes on the front of the engine, none the worse for his experience.

QUIET PLACE FOR WEDDING.

West Virginia Couple Married Amid Mummies and Antiques.

Charleston, W. Va.—With an Egyptian mummy as their only attendant and with thousands of antiques as the background Miss Laura Collins and Isaac Thompson, both of Comfort, Boone county, were married in the state department of archives and history by the Rev. A. J. Larabee of the Church of God, Winfield.

Asked why they chose such a peculiar place for the ceremony, the couple declared it was at the suggestion of the minister, who proposed a quiet place.

Thieves Stole House.

Deer Park, Wis.—Herman Larson purchased a farm in the vicinity of Frederic, in Polk county, and last summer built a house there and made preparations to move on the property, which he had been renting to neighbors. The other day he went up to Frederic ahead of his family, expecting to put things in readiness, when he found that the house had been carried off by thieves.

HUNG HEAD DOWN 48 HOURS.

New York Farmer Was Caught by Feet In Apple Tree.

Binghamton, N. Y.—R. A. Case of Galena was trimming his apple trees recently and slipped while up a tree. His feet caught in a crooked limb, and he hung head downward for forty-eight hours.

He was thought to be dead when discovered, but regained consciousness, and the physicians hoped for his recovery.

Angler Catches a Wildcat.

Lock Haven, Pa.—Wildcats are frightening trout fishers in Wayne township, Clinton county, and when they visit the streams in that section they now go armed. William H. Bierly of Wayne started out recently for McElhattan run, a short distance from his home. He encountered three wildcats along the stream. He made a hasty retreat to his home and returned with his rifle. Two of the cats had disappeared, but he killed the other one.

Wanted to Be Fined.

Portland, Ore.—"I want to be fined. That law ought to be enforced, and I'm willing to pay." E. A. Coe, postmaster at Svenson, Ore., insisted before Federal Judge Bean recently that he ought to be fined. His son had operated a motorboat without having sand aboard to extinguish fire. The judge obliged him $5 worth.

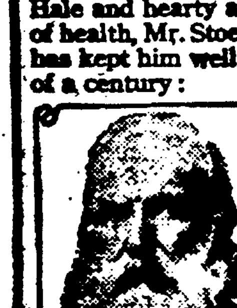
The Aspect.

"My family has a high descent."

"Yes; I understand it took a big tumble."—Baltimore American.

Duffy's "Elixir of Life"

Hale and hearty at 72, and a picture of health, Mr. Stoerzbach says Duffy's has kept him well for over a quarter of a century:



MR. H. STOERZBACH

"In my opinion there's nothing in the world to put vim, vigor and vitality into any run-down person as Duffy's Pure Malt Whiskey. I call it the 'Elixir of Life'" —Mr. H. Stoerzbach, 196 E. 76th St. New York City.

Duffy's Pure Malt Whiskey

a true tonic-stimulant, is a medicine for all mankind. Thousands of old people testify that its judicious use is responsible for the vigor and force of years which gives them an undisputed reputation for health and longevity. Determine today to regain health and strength—

"Get Duffy's and Keep Well."

At most druggists, grocers and dealers. If they can't supply you, write us. Useful household booklet free.

The Duffy Malt Whiskey Co., Rochester, N. Y.

IRON BY ELECTRICITY

Hundreds of thousands of housewives use the ELECTRIC IRON today.

It is always clean—no soot or dirt to soil the clothes.

It stays hot as long as wanted—no waiting for irons to heat.

No steps to take.

Those who use Electric Irons we sell never regret it.

You can attach the iron to any lamp socket and iron in perfect comfort, quickly and well.

Get an iron today. Thirty days' free trial, if you wish.

Just call 144 and we will send one to your home.

Have a talk with our representative if you wish information on house wiring, motors, appliances, etc.

PEACE MEETING IN NEW YORK

Delegates Deny They're "Mollycoddles"---Ex-President Taft Presides at Opening Session Today.

Washington—"We are not mollycoddles!"

Delegates to the first annual convention of the National League to Enforce Peace didn't say that in so many words when they gathere here to-day for the opening session under former President William Howard Taft, but that was the idea they wanted to convey.

"We believe," said Herbert S. Houston, President of The Associated Advertising Clubs of the World and a prominent member of the League, "that permanent international peace is a business proposition that has to be organized and pushed through by men with red blood in their veins just as anything else that is worth while has to be handled.

"Permanent peace means a great deal to the business interest of the world and they are behind this organization heart, soul and body.

"There is nothing visionary about the plans of this League. There are no dreamers in it. Look at the lists and I think you will agree that thy contain the names of big men who do big things in a big way.

"Two of the principal speakers at the convention will be Secretary of War Newton D. Baker and Major General Leonard Wood.

The arrival during the last few days of more than two thousand delegates from every section of the country is regarded as significant of the attitude toward peace among political, commercial, social, religious and educational interests in the United States,

States and cities have sent representatives, as have chambers of commerce, boards of trade, universities and collages, labor organizations, granges and churches.

The committee pointed out that the convention is not a mere pacifist gathering. The convention was called at this time, it was said, as a definite move to obtain political action on the part of the United States, in favor of the idea of a league of nations to be formed at the close of the present war in Europe.

According to the League's program of proposals adopted when it was organized in Independence Hall last June, the powers to be invited to join a league of nations, are expected to pledge the use of their joint armd and economic forces against any signatory power which shall refuse to submit a dispute to a court of arbitration or council of conciliation, before beginning hostilities or declaring war.

Other speakers beside ex-President Taft, Secretary of War Baker and Major General Wood are: President A. Lawrence Lowell, of Harvard University, James Cardinal Gibbons of Baltimore, Shailer Mathews, Dean of the Divinity School of Chicago University; Harry A. Wheeler, banker, of Chicago; Edward A. Filene, head of the Filene stores in Boston; President Benjamin Ide Wheeler, of the University of California; Hamilton Holt, George Grafton Wilson, Professor of International Law at Harvard University; Talcott Williams, John Bates Clark, Director of the Department of Economics of the Carnegie Endowment for International peace; R. G. Rhett, of Charleston, S. C.; President of the Chamber of Commerce of the United States; Samuel Gompers, Oliver Wilson, of Peoria, President of the National Grange; Theodore Marburg, ex-Ambassador to Belgium and Herbert S. Houston, President of the Associated Advertising Clubs of the World.

AT THE QUIRK TODAY.

DIOCESAN CONVENTION ENDS IN SYRACUSE

Syracuse—Rt. Rev. Dr. Charles Fiske, coadjutor bishop, during the closing hour of the diocesan convention at St. Paul's Church yesterday afternoon announced he had received the first $500 for an automobile to be used in rural work and $100 toward the next $500.

The number of trustees of the permanent missionary fund was increased yesterday by Bishop C. T. Olmsted, in view of the recommendations made by Bishop Fiske Monday night. The board is now constituted as follows:

Bishop Fiske, Archdeacon William Cooke and Frank L. Lyman, members er-officio; Rev. F. W. Eason, Rev. T. J. Dewees, Rev. R. H. Gesner, Rev. E. H. Coley, Rev. W. B. Clark, George Underwood, F. J. Bowne, Elmer Dean, Willis H. Howes and W. H. Diefendorf. These trustees will begin work at once to create a fund, and to increase the activities in the rural districts.

The election of deputies to the general convention in St. Louis in October resulted as follows:

Rev. A. R. B. Hegeman, Rev. Octavius Applegate, Rev. Dr. Herbert G. Coddington, Rev. Arthur B. Rudd, former Judge Charles Andrews, Thomas R. Proctor, Frank L. Lyman and H. L. Preston. The provisional deputies are: Rev. William B. Clarke, Rev. W. B. McKim, Rev. Richmond H. Gesner and Rev. H. E. Hubbard.

The Standing Committee was elected as follows:

Rev. Dr. William De Lancey Wilson, Rev. Dr. Karl Schwarz, Rev. James K. Parker, Rev. Edward H. Coley, Justice Edgar C. Emerson, George T. Jack, J. T. A. Doolittle and Geosge Underwood. Mr. Underwood suceeds the late John R. Van Wagenen of Oxford, who was a member of the committee for many years. Frank L. Lyman was re-elected treasurer.

AT THE QUIRK TO-DAY.

"By Whose Hand," with three stars.

Edna Wallace Hopper, leading star of the stage makes her debut in this motion picture.

Charles J. Ross, seasoned screen player, now appearing in the legitimate in "The New Henrietta" in New York city.

Muriel Ostriche, in her third Equitable appearance. Starred in "A Daughter of the Sea" and "A Circus Romance."

100 ATTENDED B. & B. CIRCUS

They Didn't Mind Delayed Performance--Quantity and Quality Made Up for Everything.

At least one hundred residents of this city attended the Barnum and Bailey circus at Syracuse yesterday, and were unanimous in the verdict that the performance this season for eclipses all previous shows, not only in variety and number of acts, but also in scenic beauty, which was especially evident in the costuming.

The circus was forced to contend with adverse weather conditions and a bad lot in leaving Rochester Tuesday night, and did not arrive in Syracuse until two hours after schedule time. The Syracuse show ground was soft and the heavy wagons sank to the hubs in the mud, necessitating the use of elephants in the work. The street parade, which ordinarily starts from the grounds at 11 o'clock, did not begin until nearly 2 o'clock and thousands of people waited impatiently along the route. The matinee performance went on at 4:45, almost three hours late, and it was nearly 7 o'clock before the show concluded, as the management did not omit a single display. The big top was well filled in the afternoon and the show played to a capacity house at the evening performance, which began on scheduled time.

Many Fultonians made the trip for the purpose of viewing the work of Horace Webb Baggs, who clowns with the show. Mr. Baggs is slowly recovering from injuries received when he fell from his revolving ladder in Madison Square Garden two weeks ago, but is able to perform very creditably.

Other Fultonians renewed old acquaintances with members of the company, and Mrs. Rose Wallace and Mrs. James Dawson, who jointly design the costumes for the show, were the guests of Fulton friends at the Onondaga last night. Mr. Baggs was also accorded an impromptu dinner party at the Onondaga.

MEMORY DAY THIS YEAR IN HANNIBAL VILLAGE

The village of Hannibal is always awake on Memorial Day, and will be especially so this year because of the inter-urban taxi service which will be able to accommodate hundreds of people who want to go there on that day. The G. A. R. Post has prepared the following program:

Sunday evening, May 28, at 7:30, M. E. Church, annual sermon to the veterans and their friends by the Rev. Willis Haven, pastor.

Tuesday afternoon, May 30, at 2 o'clock, at the M. E. Church. Song; prayer, the Rev. Jacob Hann; "The Meaning of the Day," Francis Rice; solo, Mabel Eckard; "The Little Army," Duane Fullerton, Harold Metcalf, Mahlon Matteson, Charles Kranz, Ned Babcock, quartet, Meesrs. Bradt, Cox, Powers and Wells; "Memorial Day," Dorothy Little; piano solo, Florence Liggett; "The Soldier's Reprieve," Elinor Babcock; Memorial exercise, Madeline Hill, Mildred Cooper; Decoration day song, Eleanor Lockwood, Helen Mills; "The Blue and the Gray," Ethel Hiney; quartet; benediction, the Rev. W. H. Liggett.

The members of the G. A. R. are requested to meet at the lodge rooms Sunday and Tuesday, onehalf hour before the programs and to march in a body to the church.

On Tuesday the teacher and pupils of the rural and village schools are invited to meet at the school building at 1:30 and march in a body to the church, where seats will be reserved.

SUPERVISORS WILL MEET AT HOSPITAL

When a hospital patient is unable to keep an engagement because of an injured leg, then the next best thing is to remake the appointment. This will be done by the highway officials committee of the Board of Supervisors in the near future. The action is made necessary from the fact that Supervisor V. V. Vant is still confined in the Lee Memorial hospital, this city. He is a member of the committee, and while his conlition is improving, it will be many days before the physicians will allow him to be taken home.

Mr. Vant is an enthusiast on the subject of good county roads, and his colleagues prefer to have his advice on all matters relating to building them.

The Graham Cracker with the Delicious Taste

N. B. C. Graham Crackers are incomparably the finest flavored of graham crackers. Thanks to our careful selection of grain and thorough preparation, we get just the right proportion of elements to make a wholesome biscuit and one that is the most palatable and appetizing of its kind.

Try N. B. C. Graham Crackers for their delicious nut-like flavor and flaky crispness. Use them regularly at meals and between meals, because they are as digestible as they are nourishing.

14. Mrs. Wright, Broadway; leader, Mrs. Wright.
15. George Hill, S. First street; leader, Rev. H. D. Holmes.
18. Mrs. L. D. Wilcox, S. Fourth street; leader, Mrs. Bogardus.
19. Mrs. Miller, Maple avenue; leader, Miss Ethel Allen.
20. Mr. Edward Reardon, 523 S. First street; leader, Mrs. George Newsbaum.
21. Union meeting with District 22.
22. Mrs. John Distin, 316 Hannibal street; leader, Miss Orra Spear.
23. Union meeting with District 22.
24. Mrs. Edmund Cox, 69 West First street; leader, Miss Hazel Dunton.
25. Mrs. James Stevens, 124 West First street; leader, Mrs. Franklin.
26. Mrs. W. H. Klein, 308 Leitch street; leader, Mrs. E. D. Perry.
27. Mrs R. J. Fiske, 122 West Broadway; leader, Mrs. F. J. Switzer.
28. Mrs. Fannie VanBuskirk, 262 West Fourth street; leader, Mrs. L. F. Wilber.
29. Mrs. Fred Ackroyd, 505 West First street; leader, Mrs. E. J. Bishop.
30. Mrs. C. C. Porter, 359 Broadwell avenue; leader, Mrs. Porter.
31. Mrs. Charles Cook, West First street; leader, Mrs. William Stewart.

HOUSEWRECKERS BUSY ON NORTHEND BUILDINGS

Several buildings along he O. and W. railroad tracks are being torn down preparatory to the construction of the new freight house north of the city. The building contractors plan to begin work as soon as the house wreckers clear the land.

Fulton Keynotes

Mrs. Lydia Burlingham visited her daughter, Mrs. Chester Keller, Wednesday, at Syracuse.

* * *

Mrs. Sarah Spencer, of Gilbert Mills, has been spending a week with Mr. Newton Johnson and family in West Broadway.

* * *

Mrs. Carrie Morehouse, of Ingalls Crossing, visited Mrs. Charles Washburn, Tuesday.

* * *

Mr. Fred Wadsworth spent Wednesday in Syracuse.

* * *

Mr. and Mrs. Newton Johnson visited Mr. and Mrs. Philip Thompson in Syracuse, Wednesday.

* * *

Mrs. Eunice Root, of the Whittaker road, spent Sunday with Mrs. Horace Burdick.

* * *

Mrs. Joseph Wesley is visiting friends in Constantia.

* * *

Mrs. Delos Eggleston, who has been visiting Mrs. Albert Brown, has returned to her home in Baldwinsville.

* * *

Mr. and Mrs. John Hunter have returned from New York city.

* * *

Miss Minnie True has been secured as teacher at Fruit Valley for the next school year.

* * *

Mrs. Myron Foster has as her guest, Miss Jennie Sykes, of Manatena.

* * *

Mrs. Solomon Caswell is ill at the home of her daughter, Mrs. Charles True.

Louis Graham, who was arrested last week, charged with attempted assault, in taking the arm of a young lady who lives on North First street, as she was walking home with another man, was released in City Court yesterday morning after the complainant failed to put in an appearance. It was evidently a case of mistaken identity, as Graham claims he never knew the girl, and had never seen her before his arrest.

MEET TO MAKE FINER CITIES

(By United Press)

New York—Twenty thousand leading American clubwomen at the Federation's national convention here today are learning how to make our ugly cities handsome.

They are, as it were, getting tips from experts on how to take a careless, slouchy, unkempt old municipality, wash its face, give it a new suit, manicure and barber it, put a posey in its buttonhole and set it up a truly handsome bdue altogether.

This is a part of the art program of the convention, at which the report of the art chairman will be given before the convention, followed by an address on "Community Art," by William Dudley Foulke, of Indiana, president of the National Municipal League from 1911 to 1915. Mr. Foulke is a life-long student of art in many lands, and an eloquent speaker.

At the art luncheon, at the Astor, there is a program of short speeches by well known artists. Four hundred tickets are issued for the luncheon at $1.50 a plate.

At the Art Conference, following the luncheon, there will be reports from members of the Department an address on "The Poetic Art in America," by Robert Underwood Johnson, secretary of the American Academy of Arts and Letters.

INGALLS CROSSING.

L. B. Babcock returned from the South last Saturday. He spent the winter in Ponter Garden, Florida. Upon his return trip he visited his brother, C. F. Babcock in Georgia and sons, C. L. in Knoxville, Tenn., and three sons in Pittsburgh, Pa.

* * *

M. H. Burton and wife spent Sun. with theim brother' Charles Burbus and family in Palmero.

* * *

O. J. Dexter visited his son, Ray, in Syracuse, Wednesday.

* * *

Ovid Cook has moved his family to their farm here.

* * *

Mr. E. Ingraham and family have their house completed and have moved in.

* * *

Volney Grange will observe memorial Day, on Saturday evening, May 27th, with appropriate exercises. Supper will be served.

* * *

Born to Mr. and Mrs. A. Balch, May 20th, an eight pound daughter.

* * *

O. J. Dexter is improving his home with a fresh coat of paint.

* * *

Miss Neva Waffle is spending some time with her parents.

* * *

Mrs. Nancy Moore spent Saturday with Mrs. R. O. Fisk.

FULTON PEOPLE GET INSTANT ACTION

Those who have used it in Fulton are astonished at the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. Because it acts on BOTH lower and upper bowel, ONE SPOONFUL Adler-i-ka relieves almost ANY CASE constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. W. H. Gayer & Son, druggists. adv

MOTHER ON TRAIN SEES SON'S BODY ON RIVER BANK

Cars Are Stopped in California, and Father Identifies Corpse of the Lad.

Redding, Cal.—While riding on the train from Delta to Redding, Mrs. Frank Brown, looking from a window, saw a body on the bank of the Sacramento river. She screamed and said, "There's my boy!"

The train was stopped, and Frank Brown, the husband and father, stepped to the rocks and identified the remains as those of his son Jesse, seventeen years of age, who disappeared from home Feb. 22.

Relatives hunted for two weeks and then gave up the search. No surmise can be made as to how he met his death in the river, except that he fell in while walking on the bank to avoid being seen.

ABOUT THE TOWN

George Washburn, of this city, well known for his talent in portraying a Rube constable, was offered a position with the Barnum and Bailey circus yesterday, by John Ringling, one of the owners of the show. Mr. Washburn has taken the matter under consideration, and if he accepts, will join the show in Boston where it will play next week.

* * *

City Sealer Harry M. O'Brien was the guest of an old friend, C. A. Hutchinson, treasurer of the Barnum and Bailey show, at the performance in Syracuse yesterday. Mr. O'Brien succeeded in passing eight of his friends in.

* * *

Alonzo Raffledaffle, the midget, who spent some time in this city last year, is one of the leading clowns with the big show. Alonzo twirls the drum major's stick in the clown band travesty number.

* * *

George Walker was another Fulton representative at the circus. Unfortunately, most of the circus people shave on Mondays, Wednesdays and Fridays.

* * *

Several of the local people who attended the show were forced to stay in Syracuse all night on account of missing the last car. This morning we noticed several coming out of the Hotel Onondaga—— alley.

* * *

The Jefferson bar did a big business, mostly in free lunch.

* * *

George Washburn knows a good joke. We print it by royal permission. It tells of a business man who walked into a bar one day to get a quick lunch, and in attempting to reach the crowded counter, found his way blocked by an inebriated party. The "happy one" kept moving into the business man's way, no matter what course he took to reach the counter, and the b. m. was out of patience when suddenly he waiter called an order, "One stew!"

The b. m. thereupon reached over, tapped the blockader on the shoulder and said, "Pardon me, but I think they're paging you." You gotta admit that's a pretty good story, if you get it.

* * *

The Fyfe and D-r-r-rum Corps will meet at the Elks' tonight for the purposes of organization, according to Bertram Adkins, the manager. Mr. Adkins will only remain for a short time. He will display his latest trained drum and then beat it.

* * *

Mayor Lewis has a new straw hat. It's an Alaskan Panama.

* * *

Several Fultonians told Mr. Ringling yesterday that they thought he had a pretty good show. Mr. Ringling was very much pleased.

* * *

This is an old one. Did you know that John Bunny was with Barnum and Bailey this year? But Barnum and Bailey are dead, you say? Well, so is John Bunny.

* * *

You guessed it, we went to the circus. Say, what did you think of that posing act? You know.

CHICKENS KNEW HER.

And Kansas Woman Had No Trouble Getting Them Back.

Wichita, Kan.—Mrs. John Matthews, residing on Kelly street, stopped abruptly in front of 312 West Third street one morning lately. Inside a chicken fence were many chickens. Among them were four large White Orpingtons. She observed them keenly.

"Those are mine," she said, satisfied, and then she sought out her husband. Together they went to city court and got out a search and seizure warrant. Then, in company with William Ballard, deputy marshal, they went back again to 312 West Third street, opened the chicken yard gate and walked into the pen.

A woman ran out on the back porch and demanded to know what business the party had in her chicken yard.

"Just came after my chickens," retorted Mrs. Matthews as she called to her "pets." The four big chickens ran up to her, and she picked them up.

"I had 'em marked with blue ribbons," she told the marshal as she lifted the feathers on the legs. Sure enough there were the ribbons!

"Yours!" said the deputy marshal. "But the judge will have to act before you can have them."

THEIR "AT HOME" IN JAIL.

Bride and Bridegroom Accused of Not Telling Truth About Ages.

Hart, Mich.—Albert White a-wooing went—went all the way from Colfax township, Oceana county, to Battle Creek. Now he's back and with him the bride he won, but they spent their "at home" period in the Oceana county jail.

Their offense against the peace and dignity of the state, as formally alleged, was that they didn't tell the truth about their ages when they got their license to wed.

The banana peel in the path of love was an angry mother. Albert slipped up and dragged down his bride when Mrs. Mary Decker, who objected to Mamie getting married, heard that the girl swore she was eighteen when she was seventeen, as her mother reckons it. White, who gave his age as twenty, is said to be nineteen.

The families lived on adjoining farms in Colfax. Decker and his family moved to Battle Creek last August.

17 SENIORS UNKISSED.

Class President Says They Are Crosses Between Heroes and Darned Fools.

Muskogee, Okla.—Of the thirty-five boy members of the senior class of Central high school in this city seventeen admit they have never kissed or been kissed.

Thomas Leech, president of the class, is not one of them. "As president of the class," he said, "I consider that the unkissed reflect great glory upon the seniors and upon Central high. As a man, speaking unofficially, I say I think they are darned fools or perhaps martyrs. That is what a martyr is anyhow—a cross between a hero and a darned fool."

The girl members of the class are, to put it mildly, astonished at the revelation. One of them declared that she was "for starting a campaign for the benefit of the seventeen," and that, if necessary, she was perfectly willing to undertake the whole task by herself.

Literal.

"I hear the Newlyweds had a falling out yesterday."

"So soon? What was it about?"

"About the turn in the road yonder. Their rear tire blew up."—Baltimore American.

SALE OF LINEN

at Less than present Wholesale Prices

As a well known fact the war has stopped all importations of linens and what goods are to be had in this country are continually advancing in prices.

We have on hand a larger stock of table linens, napkins, etc., than we wish to carry and in order to reduce the lot, offer until JUNE 3RD,

ALL TABLE LINENS, NAPKINS, ETC., at 20% DISCOUNT

Table Linen prices range from 59c. per yard, up to $2.50 per yard.

Napkins from $1.39 per dozen up to $7.50 per dozen.

Buy your Linens now—for they will not be offered again at such prices.

ALL TAILORED SUITS—Women's and Misses' to close out at reductions from 25 per cent., 33 1-3 per cent., to 50 per cent.

WHY TRADE ELSEWHERE AND PAY MORE, WHEN YOU CAN BUY IT FOR LESS AT

M. KATZ & CO INC.

AFTER ICY BATH HE WALKS IN UNDERWEAR

Fisherman Escapes Drowning, but Goes Four Miles Barefooted to Get Help.

Britton, S. D.—Compelled to walk a distance of four miles to the nearest farmhouse barefooted and clad only in his underclothing was the distressing experience of John Knaak, a Marshall county man, following a disaster which overtook him while fishing on Roy lake, some miles from here.

He was in a boat alone, and when he attempted to make his way to shore the boat, which it developed had been overloaded with nets, sank to the bottom, throwing him into the icy waters of the lake.

He managed to reach a nearby net stake and, clinging to it, divested himself of his rubber boots, oilskins and all his wearing apparel but his underclothes.

After resting for a time he started to swim to shore, some distance away. He reached shore in an exhausted condition, and when he had somewhat recovered himself he started on the painful four mile journey to the farmhouse for assistance.

MEN TALLER IN MORNING.

May Measure Half an Inch More After Breakfast, Marine Examiners Say.

Washington.—Men are taller in the morning than in the evening, medical examiners for the United States marine corps declare, and the applicant for enlistment who is of medium or small stature has a better chance just after breakfast to meet the height requirements than at any other time during the day.

The disks of cartilage between the vertebrae of the backbone yield considerably to the pressure due to the weight of the body when it is erect and expand themselves while the body is in a recumbent position.

This effect may amount to as much as half an inch in the case of a heavy many of, say, five feet ten inches in height, according to the marine corps medical examiners.

FINE DAY TO WED.

Girl Took Van Danacker After She Had a Breath of Spring Air.

St. Paul, Minn.—Wilfred Van Danacker of 459 Webster avenue strolled downtown the other day to keep an engagement with a young woman.

"Wouldn't this be a fine day to get married?" he queried to the young woman.

She took a deep breath of the warm spring air and agreed.

So they were married twenty minutes later by Harry Gallick, the court commissioner.

"I'll bet I get mine when the folks find out," the groom said. "Don't mention Miss—ah, I mean Mrs. Van Danacker's name. She has got to give her boss two weeks' notice."

Venezuela.

Venezuela received its name from the early Spanish residents, who saw in it a resemblance to Venice.

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 deegrees, 02 minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet, North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5296 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

IN THE WORLD OF SPORT

Heinie Groh, Cincinnati's Smart Third Baseman.

Photo by American Press Association.

Heinie Groh, who guards third base for the Cincinnati Reds, is considered one of the ablest performers at that difficult corner in the big leagues. Groh was formerly with the New York Giants, but went with Herzog to Cincinnati before the 1915 season opened in exchange for Fromme and Hans Lobert. Since joining the Reds [illegible] has played gilt edged ball. Last season he finished [illegible] the list of fielders in the [illegible] league, with a percentage of [illegible]. He really headed the list as he took part in 131 games, while of the three preceding him only one played as many as fifty-five. He also shone at the bat, finishing in twelfth position, with a mark of .290.

Billiard Prospects.

In the death of Firmin Cassignol in New York there has been lost to billiards one of the few men and perhaps the only one who could force Willie Hoppe to the supreme test. While the French expert did not come to this country ostensibly to play the present world's champion, the prospect of a match with Hoppe was the underlying motive for his making the trip. That it was futile in accomplishing the real purpose is a cause of regret. Those who saw Cassignol play were convinced of his skill, and many were confident that in him was the ability to capture the crown. Apparently the only hope for a player to match Hoppe in the course of the next year lies across the water, and there is small chance that the men considered most competent will come here. The two best billiardists in Europe are Mortier and Adorjan, the former a wealthy amateur and the latter a Hungarian now in Spain. Adorjan has expressed a desire to come to the United States, but will probably not gratify the wish until after the close of the European war.

To Test Football Officials.

At a meeting of coaches and managers of college football teams held recently at Philadelphia a plan was adopted whereby officials who are inefficient will be eliminated from the lists submitted to the central board of officials. Robert C. Folwell, head coach of the University of Pennsylvania team, suggested that the central board select officials, as it has done in the past, but have an elimination list of inefficient officials. Coach Cavanaugh of Dartmouth said that he knew of several men who officiated at big games who did not know the game. Coach Rush of Princeton suggested that new officials show their ability in preliminary games.

Bushers Always Hungry.

One Saturday afternoon during the training season the Giants' second team dropped a game to the Waco club of the Texas league. It was said later that the reason for the defeat was that the youngsters had overeaten at luncheon. This was borne out by one of the "bushers."

"We did eat too much," he said, "but there was a reason. We had breakfast at 8:30 and didn't get anything more to eat until nearly 2 o'clock. We sure were hungry."

"Do you mean to say you had to go without food for more than five hours?" he was asked.

"Yes; we did," he answered vehemently.

High Ball Hitters.

Alexander the Great, of the Philadelphia Nationals, pitcher extraordinary, declares that "high ball hitters are in the majority in the National league." Oh, no, not the kind you have in mind! The high ball hitters that Alex refers to are those who are partial to balls delivered shoulder high. Such batters experience little trouble in driving these out for safe hits. When the ball is kept low high ball hitters usually are helpless.—New York Sun.

Carrigan After College Pitcher.

Bill Carrigan, manager of the Boston Red Sox, has made a tempting offer for Bugs O'Connor, first pitcher for Manhattan college, New York city. O'Connor, who has seen four years' service with the Manhattan team, has excellent speed and control. Last year he pitched one no-hit and two one-hit games. In three games pitched this year he has struck out thirty-four men and has batted .316.

The Buttermilk House

How a Trust Was Busted by a Rich Young Man. By M. QUAD.

Copyright, 1916, by the McClure Newspaper Syndicate.

Did you ever hear how a hotel came to be called the Buttermilk House? It was first called the Mountain House. But a trust in buttermilk was smashed there, and that changed the name.

When the hotel had been running for a couple of years the buttermilk craze spread from east to west, and it soon found its way to the Mountain House.

There was only one man within ten miles of the Mountain House who saw money in buttermilk, and his name was Stebbins. He bought five cows, a big churn and cans, and he delivered buttermilk to the hotel in gallons and charged 25 cents for every gallon that he delivered.

Away off in New York city was young Carroll Harper, who held a situation in his wealthy father's bank. He was an industrious young man instead of a dawdler. He was anxious to learn the banking business, and, though rich in his own right, he stuck to his work like some of the employees who were getting salaries of only $20 a week. By and by a crisis came—that is, young Harper found his appetite gone, his nerves all aquiver and his ambition about faded away. He went to a doctor, and after being questioned and thumped and pawed over the doctor looked [illegible] in the face with sternness and said:

"Go west, young man! Go west, sir!"

"But why?" was asked.

"To breathe in great chunks of ozone and drink a gallon of buttermilk every day and to come back here in about sixty days feeling as well or better than you have in the past ten years."

And the doctor, who had heard of the Mountain House and had sent three or four invalids there, advised the young man to make straight for that spot and to order a supply of buttermilk as soon as he had registered. His advice was heeded, and one morning the young man descended from the stage and entered the hotel. The place was off the railroad by fifteen miles.

They generally find out all about you very soon at a country hotel, and it was scarcely two hours before it was generally known to the landlord and among the guests that Carroll Harper had a financial and social standing in the big city in the east. It was also known to Mr. Stebbins, and when he called to take the order for buttermilk he raised the price from 25 cents to double that sum because he was dealing with a rich young man.

"Isn't that double what the others are paying?" he was asked.

"Oh, it's a little more," was the reply, "but you are rich and can afford it. What is a quarter a day to a man of millions?"

"But it strikes me as extortion."

"Well, you can take it or leave it. I am the only one around here with buttermilk to sell, and I can put any price on it I like."

The young man who was the victim of an extortioner planned to get even. He took the landlord into his confidence, and there was a conspiracy to smash Mr. Stebbins' trust.

After a ten mile auto ride down the valley and back only one family was found so situated that they could help Mr. Harper carry out his plans. This family was composed of a widow and a strapping daughter. They owned and worked a little farm together, but they did not even have one cow nor any outfit with which to deal with the buttermilk question. In a conversation the young man had with the strapping girl on the doorsteps he asked:

"Can you and your mother milk and take care of six or seven cows?"

"Yes, or ten of them," she answered.

"Can you drive a horse and wagon?"

"You bet."

And what did young Mr. Harper do? He sent an agent out to buy six or seven cows, a big churn that turned with a crank, small cans and big cans and a horse and wagon to contract for a supply of alfalfa to feed the cows on during the winter. When all these had been secured everything was presented to the widow and the daughter as a free gift, and they were told to go into the buttermilk industry for all they were worth. They had to sign a contract to supply the guests of the Mountain hotel with all the buttermilk wanted for the next five years, and they were not to ask above 15 cents a gallon. It was figured that at this price the profits would be about 12 per cent.

One morning the mighty Mr. Stebbins, who had run a one man trust for two years, drove up to the hotel in his mightiness and began to unload his cans of buttermilk. The guests ranged themselves on the veranda with smiles on their faces, and the landlord kindly but firmly announced to Mr. Stebbins that no more of his buttermilk was wanted. The Stebbins buttermilk trust was smashed. It was smashed as flat as a pancake. It was smashed by a young man, a widow and a strapping girl.

And when the strapping young girl drove up to the Mountain House for the second time with the light of triumph in her eyes and about a barrel of buttermilk in her wagon she saw a painter on a ladder in front of the house, and he was painting out the old sign preparatory to painting in a new one which should read "The Buttermilk House." And the hotel is there yet, and the sign is there yet, and every guest there is following the doctor's orders and is drinking cool, good buttermilk. There is a two woman trust, but it is a trust to be praised and not busted.

STUFFING THE KING

A Dusky Kongo Monarch Who Fairly Reveled In Roast Pig.

HE WAS KIND TO HIS WIVES.

Anything on the Menu That Didn't Tempt His Dainty Taste Was Passed to Them, but When His Favorite Dish Came on It Was All His Very Own.

During his residence in the Kongo town of San Salvador John H. Weeks had many strange experiences, which he relates in his book, "Among the Primitive Bakongo," but one of the most entertaining pictures that he draws of the strange habits and customs of the people depicts the king, whose naivete and childish guilelessness are in strong contrast to the characteristics of his European contemporaries.

Occasionally, says Mr. Weeks, we invited him to dinner, and the piece de resistance was a sucking pig, which in those days we could buy for a shilling's worth of cloth or beads. Although his house was 400 yards away, he always came in his state hammock, carried by six of his headmen. Fortunately the headmen were strong and in the prime of life; otherwise the king's weight would have taxed them too much.

The hammock was of native cotton, grown, dyed and woven in a neighboring village. It was covered with red cloth adorned with tassels and bells, and a canopy was arranged to shield the rider from the sun. As there were no clocks in the palace, we asked our guest to come at sunset, and no sooner was the sun below the horizon than we heard the shouts of the people as they accompanied the king's hammock to the station.

As he got nearer we could hear the tinkling of the ferret bells on the hammock, the hurried, heavy breathing of the hammock carriers and their short, sharp sentences of direction to one another. They were not at all sorry to lower the hammock at our door, where we stood ready to receive and welcome him, who, although black, had come in the most kingly manner he knew and was certainly very dignified in most of his ways and words.

The boys quickly put the dinner on the table, and the king eyed every dish hungrily. I said to him one day when I was visiting him in his courtyard and we were both in a joking mood, "Do you know what the poorer class of English boys do when they are invited to a feast?"

"No," he said. And as he saw me hesitate he asked, "Well, what do they do?"

"Why, they eat very little all day," I replied, "so as to have plenty of room for the feast."

The old man rolled with laughter, snapped his fingers, slapped his thighs, and tears came from his eyes as he said: "Why, white man, that is what I do, but I did not know that anybody else was cute enough to think of that. But, Mfumu Weekisi, I am smarter than those white boys, for I don't eat anything all day when I am coming to take dinner with you at sunset." After that I could understand the hungry look in his eyes as he watched the dishes put on the table.

Native provisions of all kinds were very cheap, and by sacrificing one or two tins of preserved goods we were generally successful in working out a menu of six or seven single courses. Soup made of fowl and goat bones, with odd bits of meat and seasoning, a tin of fresh herrings baked or fried, a roast fowl, stewed goat, roast suckling pig and baked rice pudding with stewed papaws were our dishes. Our drinks were lime juice made from fresh limes and coffee grown in the district.

The king would squat on the ground, with a row of five or six favorite wives immediately behind him and the six headmen who carried the hammock standing against the wall. The king would take a few spoonfuls of soup and pass the rest down with a piece of bread to his waiting wives, who would quickly and quietly finish them.

The fish he would eat all up, because it came from the white man's country, while the wives pouted their disappointment. We would give him a liberal share of the fowl, but that was so common that after he had selected the best pieces the rest was finished by the expectant wives.

Goat came next, but was treated with as scant courtesy as that bestowed on the fowl, and meanwhile the old man would turn his eyes repeatedly toward the roasted pig.

When at last that was put before us we piled his plate with a liberal portion, which rapidly disappeared, while all the time his wives were making mouths in the semidarkness. He would grunt assent to more when we asked him, and again we would load his plate. It was the moment for which he had lived all the long hours of that day, for he had heard that the white man had bought a pig for dinner.

Farcical Roles.

An American actor of versatile talents was asked recently what type or role is most difficult to play. "The farcical," he answered. "To enact farce successfully one must play with deadly seriousness. Half the effect is gone once you begin to act your part lightly. The constant strain to maintain this mock seriousness is, of course, exhausting, since you have no outlet for your emotions."

Do not be like a shadow and follow your friends only when the sun shines.—Youth's Companion.

Awning Stripes For Outings

THE louder the plaid, stripe and check for all sport wear the more modish the garment. This skirt is king's blue and white, worn with a dashing white silk sweater with sash and patch pockets in novel ribbing. The straw hat has a band to match the stripe. Please notice how full the skirt is cut.

• • •

[illegible] buttons covered with silk to [illegible] the frock are used for trimming. Some of the sleeves, wide at the wrist, have buttonholes at each side of the cuff, and two buttons, held together with several strands of twisted silk, are used in these buttonholes like link cuff buttons.

• • •

High tan boots in a soft dark brown, cut on a most attractive last, have high heels and are laced through blind eyelets with round laces.

ANNA MAY.

NEW LINGERIE.

Suggestions For Women Who Make Their Own Underwear.

Women who do no other sewing sometimes make their own lingerie, at least part of it. Although the modern lingerie is so dainty, so elaborate, it is quite possible to make it if one follows the new patterns carefully, for they are, of course, designed by the best designers that money can hire, and they are, withal, practical.

To begin with, there are the usual patterns in the new silhouette. All underwear has taken on flaring lines. So there are patterns with a flare for all the lingerie one might desire.

There is the new petticoat that measures from three and a half to four yards around the bottom, a petticoat every one will need to wear with the summer's full skirted frocks. Such a petticoat can be finished in scallops or deep points at the bottom, or a straight flounce trimmed with lace or ruchings can be used. And it can be made with or without an extension under the flounce and with or without a dust ruffle.

There is a most attractive pattern for a nightgown with revers, back and front. There is a V shaped opening back and front, and little revers turn back from this opening. The gown is belted in at the empire waist line or left hanging, but the belted form seems prettier.

There is, too, the sleeveless nightgown, with points of the front and back meeting on the shoulders. This, too, is left flowing or else belted in, as one prefers.

There is a simply made princess slip with the required width at the bottom. It is in two pieces, shaped in at the waist and fitted by means of ribbons run through beading at the belt. It is made with ribbon or lace straps over the shoulder or with a shaped neck.

A lovely nightgown pattern for flouncing shows the embroidered edge toward the neck and with an inset strip of the flouncing back and front to form a shallow yoke above the high waist line.

TODAY'S FASHION NOTE

When one wants to look dainty and chic at the same time, there is nothing better to select to help the cause along than an inexpensive lawn in checked design. A dress made after this model is unusually attractive, the full skirt having deep tucks and the waist being fastened over to one side over a vest of batiste. Six yards 36-inch material make the frock.

Pictorial Review Waist No. 6566. Sizes, 34 to 44 inches bust. Price 15 cents. Skirt No. 6610. Sizes, 22 to 32 inches waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

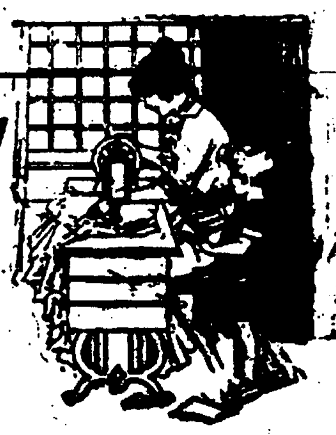
Easy & Practical Home Dress Making Lessons



Prepared Especially for This Newspaper by Pictorial Review

Engrossing Styles For Children.

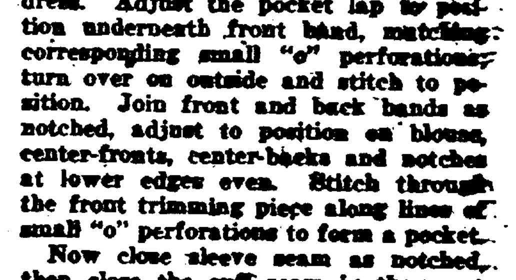
Among the engrossing junior styles is this frock with smocked middy blouse and plaited skirt. It requires both a plain and check material to produce best results.

A band of checked gingham to set off the middy blouse and establish a connection between it and the skirt is all the trimming required for this design for juniors and girls. The middy is made to be slipped on over the head and has a shoulder yoke and removable shield. The skirt is a one-piece affair, side plaited, and stitched to a sleeveless underwaist.

Medium size requires 2 yards plain material 36 inches wide for waist and sleeves, and 1⅜ yards contrasting material for skirt, trimming bands, collar and cuffs.

The blouse is made first, the front being gathered between double "TT" perforations and along crossline of small perforations to begin. Next, make three rows of gathers above crossline of small "o" perforations ⅝ inch apart; draw gathers, and stitch stay underneath. Sew front yoke to front as notched. Slash down the fold at center-front of yoke to small "o" perforation, finish edges for opening, and, if desired, work eyelets for lacing. Adjust back of yoke to position on back, center-backs, neck and shoulder edges even. Close under-arm and shoulder seams as notched.

Now, line the collar and sew to neck



edge, notches and center-backs even.

The trimming bands are important, as they add to the effectiveness of the dress. Adjust the pocket lap to position underneath front band, matching corresponding small "o" perforations; turn over on outside and stitch to position. Join front and back bands as notched, adjust to position on blouse, center-fronts, center-backs and notches at lower edges even. Stitch through the front trimming piece along lines of small "o" perforations to form a pocket.

Now close sleeve seam as notched, then close the cuff seam in the same way and sew to sleeve, bringing large "O" perforation at lower edge of cuff to single large "O" perforation in sleeve. Sew sleeve in armhole as notched, small "o" perforation at shoulder seam easing in any fulness.

To make the underwaist the home dressmaker has only to close the under-arm and shoulder seams as notched and hem the back.

Next, close the center-back seam of the skirt from large "O" perforation to lower edge and finish edges above for a closing. Turn hem at lower edge on small "o" perforations. Form plaits, creasing on slot perforations; bring folded edge near center-back to the seam, and bring remaining slot perforations to corresponding small "o" perforations; press plaits. Sew to lower edge of underwaist, center-fronts and center-backs even, large "O" perforation at upper edge of skirt at under-arm seam.

Plain blue and checked ginghams make up attractively after this model.

Pictorial Review Dress No. 6763. Sizes, 8, 10, 12 and 14 years. Price, 15 cents. Smocking No. 11752. Price, 10 cents.

YOUNG FOLKS' CORNER

Keen Eyed Seagulls.

The remarkably keen sight of the seagull was put to an interesting test not long ago by a well known American naturalist, says the Philadelphia Inquirer. A score of gulls were following in the wake of a steamer making twenty miles an hour. The birds kept up with the boat without making any apparent effort to do so. The naturalist referred to and a friend were watching the graceful movements of the birds.

Breaking a cracker biscuit into four parts, less than an inch square each, the naturalist handed one piece to his friend and told him to drop it into the seething waters on the starboard.

Immediately the biscuit became invisible to human eyes, and yet before it had gone thirty yards astern a gull detected it and, dipping into the foam, secured it. One by one it picked up the other bits of biscuit, though neither of the two men could see them. Tearing off a postage stamp from an old envelope, the naturalist dropped it overboard. The gull detected the waif and made as if to pick it up. But when within a yard or two of it the bird saw that it was nothing in his line and glided upward again to his favorite station on a line with the topmost truck.

Siberian Snowflower.

One of the greatest curiosities of nature is the Siberian snowflower—a flower of a day. It was discovered by Count Authoskoff in the bleak marshes of the tundra, where the ground is continually covered with frost. The wonderful object shoots forth from the frozen soil only on the first day of each succeeding year. It shines but for a single day, then resolves to its original elements. The leaves are three in number and each about three inches in diameter. They are developed only on that side of the stem toward the north, and each seems covered with microscopic crystals of snow.

The flower when it opens is star shaped, its petals of the same length as the leaves and about half an inch in width. On the third day the extremities of the anthers, which are five in number, show minute glistening specks, which are the seeds of the wonderful flower. Authoskoff collected some of these seeds and carried them with him to Petrograd. They were then placed in a pot of snow, where they remained for some time. On the 1st of the following January the miraculous snowflower burst through its icy covering and displayed its beauties to the wondering Russian royalty.—American Agriculturist.

Try This.

Here are twenty-one common words frequently misspelled. Get some one to dictate the following paragraph to you and see how many of them you can spell correctly:

"The privilege of separating ninety miscellaneous calendars arranged in two parallel lines was against the principles of the superintendent, so his niece, not to disappoint the government or cause it to lose business, removed the principal calendars and thus relieved her uncle of a strain which might have brought on a disease. Then she believed it had become truly necessary for her to receive her instruction in grammar."—American Boy.

Game of Animals.

This is a version of blind man's buff. All the players except the blind man station themselves in different parts of the room. The blindfolded player then feels his way round the room until he touches somebody. The player who is touched must immediately give an imitation of the noise made by some animal—a donkey, cat, dog, cow, pig, etc.—repeating it three times, if requested. The blind man must guess the name of his prisoner by the voice. If he is successful the person named becomes blind man; if unsuccessful, the blind man must release his prisoner and try again.

Tangled Words.

Each twisted word is the name of something that may be found on the dinner table. 1. Kutrye. 2. Gee! V bleats. 3. Mice race. 4. Lumping pudd. 5. E mice nip. 6. Dancy. 7. Eat, O Spot. 8. D steers. 9. Sapple. 10. R. V. Gay.

Answers.—1. Turkey. 2. Vegetables. 3. Ice cream. 4. Plum pudding. 5. Mince pie. 6. Candy. 7. Potatoes. 8. Dessert. 9. Apples. 10. Gravy.

Transpositions.

She was a —— pupil, but she —— sought to avert her teacher's displeasure by giving her a love that was little short of ——. Fill the blanks with words containing the same eight letters differently arranged.

Answers.—Dilatory, adroitly, idolatry.

Riddles.

What tune is a great favorite? Fortune.

What is that which is made by a train, that travels with a train, is of no use to a train, but a train cannot travel without? A noise.

Fairies, Cross and Otherwise.

The cross-patch fairies take delight
To bring around a storm at night.
They never fail to blow a gale
And tied the clouds from left to right.
They rip and tear things all around
And leave them scattered on the ground.

In the Garden.

Give the petunia a good soil, let it get a good start at the beginning of the season, and by the last of June it will begin to bloom, and from that time on to frost it will make the garden gay with its crimson and purple and white blossoms. If there should be a little falling off in the quantity and quality of its flowers in September cut away nearly all the old branches and allow the plant to renew itself.

After cutting back it will soon throw up new shoots and on these will be borne flowers quite as large and fine as those which characterized the production of the earlier part of the season, and there will be plenty of them until the coming of cold weather.

Broiled Swordfish With Horseradish.

Wash and wipe dry and season with salt and pepper slices of swordfish or halibut. Broil ten or twelve minutes, over a charcoal fire if possible. Serve with a horseradish sauce. Cream one-third cupful of butter, add two rounding tablespoonfuls grated horseradish, one teaspoonful made mustard, one saltspoonful of salt and two tablespoonfuls of hot vinegar.

Rhubarb Conserve.

Three pounds of sugar, three and a half pounds of rhubarb cut in small pieces, juice of three lemons and grated rind. Boil this thirty minutes; then add a cupful of chopped blanched almonds. Chop about the size of a bean. Boil from twenty to thirty minutes longer. Put in jelly glasses. This is very fine.

Deviled Almond Sandwich.

Chop the almonds and spread rather thickly on bread and butter. Press the slices together and cut in pretty shapes.

The KITCHEN CUPBOARD

A BALANCED MENU.

THURSDAY—BREAKFAST.
Stewed Prunes in Lemon Juice.
Cereal.
Boiled Ham, Sliced Thin.
Hashed Brown Potatoes.
Coffee.

LUNCH.
Eggs a la King.
Tomatoes and Dandelion Salad, French Dressing.
Baking Powder Biscuit.
Sliced Oranges and Sponge Cake.
Cocoa.

DINNER.
Round Steak With Brown Sauce.
Baked Potatoes.
Scallions or Creamed Onions.
Baked Bananas.
Cream Puffs. Coffee.

Spring Salads.

BANANA SALAD.—Remove a section of skin from each of four bananas. Take out fruit, scrape and cut fruit from one banana into thin slices, fruit from other three bananas into half inch cubes. Marinate cubes with French dressing. Refill skins and garnish each with slices of banana. Stack around a mound of lettuce leaves.

Brazilian Salad.—Remove skins and seeds from white grapes and cut in halves lengthwise. Add an equal quantity of shredded fresh pineapple, apples pared, cored and cut in small pieces and celery cut in small pieces; then add a quarter pound quantity of Brazil nuts broken in pieces. Mix thoroughly and season with lemon juice. Use mayonnaise dressing to which whipped cream has been added.

Tomato Jelly Salad.—A can of tomatoes, a sliced onion, half a cupful of chopped celery a teaspoonful of salt, a dash of pepper, half a boxful of gelatin, juice of a lemon. Put tomatoes in a saucepan with the onion, celery and seasoning; bring to the boiling point and add gelatin that has been soaked for half an hour in half a cupful of cold water; strain, add lemon juice and turn at once into small molds or after dinner coffee cups. When ready to serve dip these quickly into boiling water and turn out the jelly on a bed of either finely chopped celery or lettuce leaves. Use mayonnaise dressing.

Anna Thompson.

Wisdom and Knowledge.

Wisdom does not necessarily include knowledge any more than knowledge includes wisdom. Wisdom primarily means good sense, sound judgment, intelligence, while knowledge fundamentally means acquired information. One may in one way or another acquire lots of information and still be anything but wise, just as the man of sound judgment and quick and sure intelligence may be "short" on knowledge—that is, on the information acquired from books, learned intercourse, etc.—New York American.

The Man With the Iron Mask.

"The Man With the Iron Mask" was a mysterious French prisoner of state, whose identity has never been satisfactorily established. He was closely confined under the charge of M. de St. Mars at Pignerol in 1679, at Exiles in 1681, at St. Marguerite in 1687 and finally was transferred to the Bastile in 1698, where he died on Nov. 19, 1703, and was buried the following day in the cemetery of St. Paul under the name of Marchiali. Dumas made him a twin brother of Louis XIV.

AUSTRIANS WIN ELEVEN MILES OF ITALY'S SOIL NEARING RICH PLAIN

London—The Austrians, according to their official statement to-night, have invaded Italy for a distance of eleven miles and are now descending the slopes which lead to the broad and fertile Venetian plain.

They are reported to be measurably nearer Vicenza, the headquarters of Italy's Alpine rmy.

An official statement received to-night from Vienna reports the capture of Campologno, and armored work eighteen kilomeres across the Italian frontier.

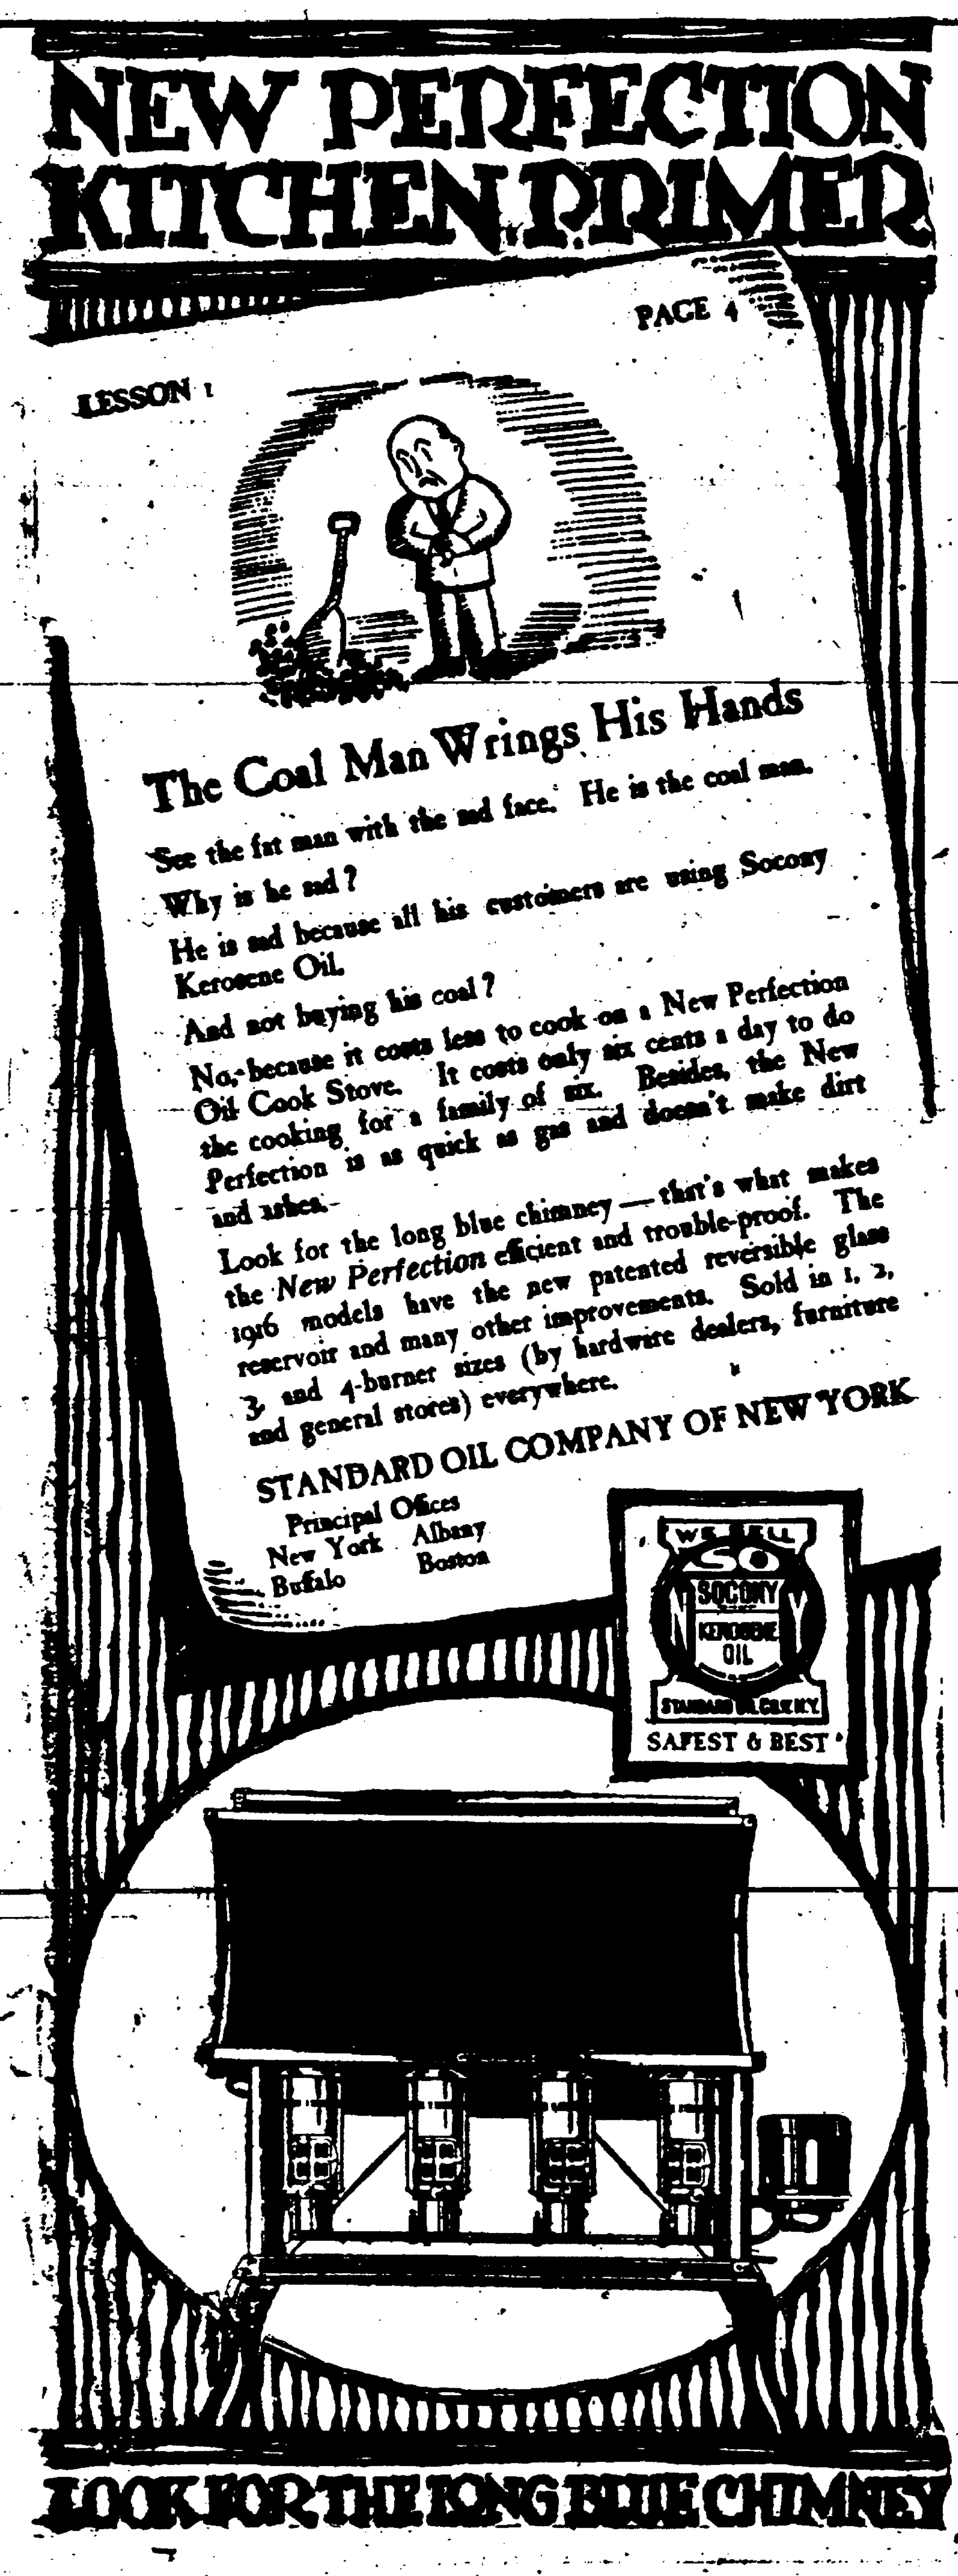
The main front of the Archduke Charles Francis Joseph's armies to-night rests on a slightly curving line stretching from a point before Asiago to the outlying stretches of the Arsiero district.

Rome dispatches report the arrival of great Austrian reinforcements at the northern end of Lake Garda. These men, all of whom are said to be veteran troops, will, it is expected, be thrown into battle immediately.

The Italians also are rushing huge bodies of troops to the front in a tremendous effort to stem the Austrian advance across the Ventian Plain.

Two thousand guns on a front of forty kilometres have bombarded the gates to Italy to open a passage for the Austrian troops. In the Italian advance trenches resistence seemed impossible, the positions being wrecked and destroyed, yet the Italian soldiers were firmer than rock.

There are mountain crests and walls of rock which, under the fire of the Austrian 305s and 385s have changed their outlines.



PEACOCK LICKED OLD SATAN

(Continued from Page One)

in this world He filled the air with the odors of that Heavenly Kingdom until the sick were revived, the dying healed, the dead raised, and the whole world pointed to that house of many mansions which God has prepared for His people.

Is it any wonder that His disciples were amazed? It is any wonder that the people of this world were and are perplexed concerning the Kingdom of God? Men have been puzzled to fix the locality of Heaven. They would like to know in what fair planet of God's universe is Christ's abode. But we should be content with this assurance, that where I am there ye may be also.

Now Christ's object in coming to this world was to make us residents of this heavenly Kingdom. He said to His disciples, there is a world of Blessedness and I have come to take you thither. I go to prepare a place for you, and if I go to prepare a place for you, I come again, and will receive you unto myself, that where I am there ye may be also.

Now if we should strike out from our Christianity the hope of Heaven, it would only be a system of disappointments, and would be contradictory in all its terms. If in this life only we have hope in Christ, we are of all men most miserable. But w have the assurance that Christ is our shepherd. And when we come to the valley and shadow of death, He will perform the office of the shepherd, so delicately and tenderly and surely and effectively, that we shall pass through the valley and shadow of death triumphantly to the other side safe in the arms of Jesus.

Glimpses Given Us.

That Christ was speaking the truth to His disciples when He said, in my Father's house are many mansions, has been clearly revealed. God has allowed us glimpses of that heavenly world of which Christ speaks. The gates have stood ajar for a moment and the inner glory has been revealed. Enoch walked with God and was not for God took him without the formality of death to be with Him in that Home in Heaven. And then, again, Elijah, the prophet of Isreal, was taken up from this world in a chariot of fire to be with God. This same Elijah together with Moses, returned to earth and stood together in their robes of white with Jesus Christ and the three disciples on that golden mount of the transfiguration. Then again we have the ascension of our Lord, who was caught up in a cloud of glory and parted from the sight of men. These things are not visionary but real. Men have beheld them with their own eyes and all these things prove to us that there is a heaven for the people of God. The apostle John on the lonely island of Patmos, was in the spirit on the Lord's day and was permitted to enbehold the glories of the Kingdom of God. Hear his words:

"And I saw a new heaven and a new earth, for the first heaven and the first earth are passed away, and the sea is no more. And I saw the holy city, New Jerusalem coming down out of Heaven from God, made ready as a bride adorned for her husband, and I hard a great voice out of the throne saying: 'Behold the tabernacle of God is with men, and He shall dwell with them and they shall be His people and God Himself shall be with them, and be ther God, and he shall wipe away every team from their eyes, and death shall be no more. Neither shall there be murmuring, nor crying nor pain anymore, for the first things are passed away and all shall be joy and peace in that house of many mansions which Jesus has gone to prepare for His disciples.

Not only for the disciples that were present on that occasion, but for the disciples of Jesus throughout all ages. What comfort and consolation come from these words to the dying soul in Christ. God alone can tell. Many called upon to pass from this life into eternity have had the valley and shadow of death lifted by the words of Jesus, 'In my Father's house are many mansions." There is one prepared especially for you. My friends do these words come to us to-day? Do they convey joy and gladness to our souls? Are we making preparation to enjoy that Home in heaven?

Remember, these words were spoken only to the disciples of Christ. They were not spoken to the whole world. There is nothing said about universal salvation. In order to receive these words we must become disciples of Jesus and walk in His footsteps. And when we accept Christ as our Savior, and do what Christ has commanded us to do, then these words come to us in all the fullness of their meaning, and the soul is filled to overflowing with joy and gladness, to know when we leave this world, we are going to enjoy the blessings of God forever.

The Way To Happiness.

My friends, have you been living the Christ life? Would you find heaven to be your home, if God should open wide the gate? Would you find there, your fond endearments, your favorite occupation, your most cherished friendships? And would your freed spirit sit down there as in your Father's house, as a member of that happy family? Or would your heaven be in the festive circle of worldliness? Remember you have much to do in deciding this matter. If you do not find pleasure and happiness and joy in God's service in this world, what right have you to anticipate joy and happiness in Heaven? You would be out of place in that house of many mansions, because you would not be prepared to appreciate God's love to His redeemed. My friends, let us seek Christ while He may be found, let us call upon Him while He is near. Let the wicked man forsake his ways, and the righteous man his thoughts, and let them return unto God. To our God who will abundantly pardon all their transgressions and give to them a place in that home in heaven. So that when we come to leave this world, we can make the words of the poet our own:

Jerusalem my happy home, Name
ever dear to me,
When shall my labors have an end,
In joy and peace with thee
When shall these eyes thy heaven
built walls and pearly gates behold?
Thy bulwark with salvotion strong
and streets of shiny Gold.
Oh! when thou city of my God, shall
I thy courts ascend?
Where congregations ne'er break up
and Sabbaths have no end.
Where happier bowers than Eden's
bloom. No sin nor sorrow know;
Blest seats through rude and stormy
scenes, I onward press to you.

PEOPLES GASOLINE

is a straight run 64 degree gravity Pennsylvania product.

¶ We believe that this is the best motor gasoline marketed in New York State today.

¶ Benzine testing under 60 degrees gravity, masquerading under the name of gasoline, is being sold at prices not warranted at todays' market.

¶ The company behind "PEOPLES PRODUCTS" have built up an enviable reputation for quality and fair dealing.

¶ The public is assured that in asking for "PEOPLES" they are getting the best that money can buy.

¶ It is better to say "PEOPLES" because "PEOPLES" is better.

PEOPLES OIL & FUEL CO.

WANTS GIRL FOR GODMOTHER.

Belgian Soldier Writes Burgomaster Mitchel, Asking For One.

Mayor Mitchel of New York has received the following communication from a Belgian soldier interned in Holland:

To the Burgomaster of the City of New York:

Sir—I, the undersigned, C. Lorrimier, quartermaster, have the honor of writing you this letter to beg you to be so kind as to give me the following information:

Is there not among the pretty girls of your city one who would be a godmother to a Belgian soldier and correspond with him? If so, I should be happy to be that soldier. Hoping that my request will meet with a favorable answer, I beg you, sir, to accept my respectful civilities.

C. LORRIMIER,
Quartermaster Fourth Belgian Lancers,
Car 26, Camp I, Zeist, Holland.

Burgomaster Mitchel thought that the best way to obtain the information desired by Quartermaster Lorrimier was to make his letter public. Some one in the mayor's office familiar with these matters appended to the letter the following inducement:

"This request for a 'marraine' is quite in keeping with what has been done during the winter all through France. Letters received in New York from young women in France show that there is a fairly widespread custom of the adoption of soldiers left without friends or family ('un poilu,' as they call them), and in some cases one girl is godmother to several 'poilus' and corresponds with them."

These Things Endure.

Some of the things that are not easily worn out by much using: The ground we walk on (but we can exhaust it by bad farming), the love we live by (but we can tarnish it), the mirror in which is reflected the true appearance of things.—Collier's Weekly.

Standing By.

"Didn' Mistoh Pinkly stand by you when de mixup took place?"

"Yes," replied Mr. Whiffletree Dawson. "He were standin' by me, jes' close enough to take a good aim when he hit me behind the ear."—Washington Star.

Inherited.

Knicker—Jones has a bad memory.
Bocker—His mother never knew what were trumps, and his father couldn't remember anything on the witness stand.—New York Sun.

Those who can command themselves command others.—Hazlitt.

LEGAL NOTICES

Notice to Creditors.

In pursuance of an Order of Clayton I. Miller, Surrogate of the County of Oswego, New York, notice is hereby given according to law, to all persons having claims against Eliza Birdsall, late of the Town of Granby, in said County, deceased, that they are required to exhibit the same, with the vouchers therefor, to the subscriber at law offices of Wilson & Rice, Savings Bank Building, Fulton, in the County of Oswego, New York, on or before the 4th day of December, 1916.

Dated this 22d day of May A. D., 1916.

ARVIN L. RICE,
Attorney.

MUST RUN TO AVOID KILLING.

Court Rules It's Murder to Stand When Life Is Threatened.

Trenton, N. J.—In an opinion filed here recently by Chief Justice Gummere sustaining a conviction of murder in the second degree the supreme court says:

"A person upon whom an assault is made so violent in its character as to endanger his life or threatens him with serious bodily harm is not justified or excusable in standing his ground and killing his assailant if he can avoid the impending danger by retreating."

The case was that of Nunzio di Maria of Harrison, who was sentenced to from twenty to thirty years in prison for shooting Frank Barber.

The charge of the trial court to the jury regarding the law of self defense was the only ground for reversal of the conviction. The instruction objected to was that the defendant had a right to save his own life.

SHIPS DOG FOR TREATMENT.

Injured Pet Sent Halfway Across Continent to Surgeon.

Milwaukee, Wis.—Struck by an automobile in a Los Angeles street, a pet house dog belonging to Charles Dyer was shipped to Milwaukee by express to be treated because the Dyer family insisted on having their family dog surgeon care for the pet.

Dr. E. M. Sullivan, who had the dog under his care, had him around again in about a week's time. A telegram from Mr. Dyer preceded the arrival of the dog. "He will not take a prize at the kennel show," said the message, "but he is one of the family."

"RAISE YOUR DAUGHTER TO BE A SOLDIER"

Two hundred young women in regular military dress have a camp in Washington in the interest of preparedness, learning the arts of warfare and Red Cross work. Some of them helped to make up the 145,000 in the big preparedness demonstration in New York May 13.

BICYCLE POLICE ANSWER EMERGENCY CALL

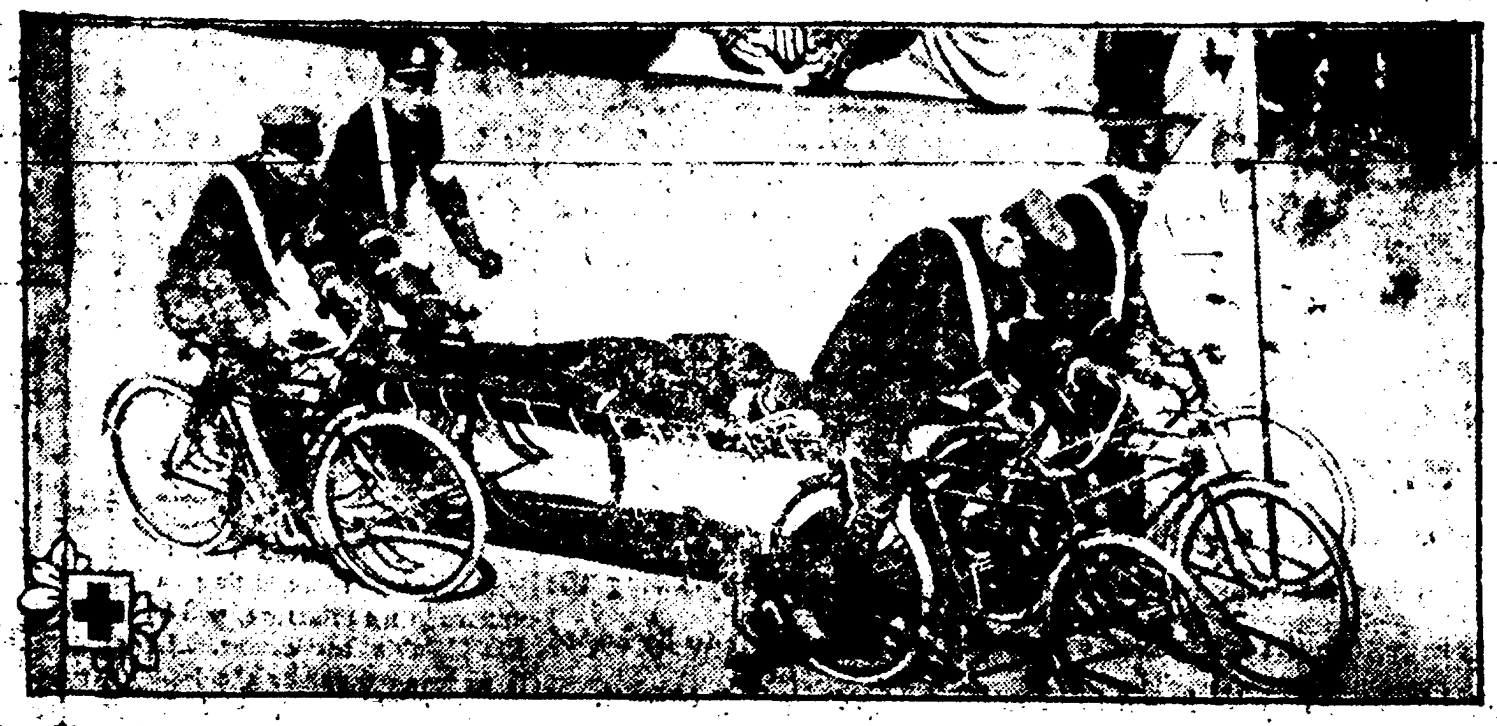

Photo by American Press Association.

As part of the show in the recent police parade in New York city a bicycle cop fell from his wheel, while four of his comrades quickly sprang to his assistance and carried off the "injured" one on a stretcher.

Live Bird and Music, Cheers and Singing at the Tabernacle

A live peacock, borne by Elmer Taylor, headed the parade of 300 members of Prayer Meeting districts 13-20 inclusive, who attended the meeting at the Fulton tabernacle last night. As the procession entered the auditorium to the strains of a fife and drum corps the audience rose an applauded heartily. Mr. Taylor held aloft the peacock, and as if conscious of its part in the occasion, the bird spread its beautiful tail and held its head aloft as the audience cheered.

Charles Sage carried a large banner at the head of the procession upon which was inscribed "Community Fellowship," "All Hail Immanuel" and "Where He Leads Us We Will Follow." At the command of Rev. D. H. Holmes, the delegation then arose, each holding aloft the Bible in their right hands, and recited, "Search the Scriptures, for in them ye think ye have eternal life, and they are they which testify of Me." The Peacock party then arose by request and was accorded a Chautuqua salute by the delegation.

"When the Lord Said Whosoever" was the favorite song of the audience and after various sections in different parts of the tabernacle had sung the verses and chorus, Chroister Warth requested all to whistle the chorus. "God Will Take Care of You" and "Let the Sunshine In" were two other numbers which found great favor with last night's gathering. Ensign Fitzgerald led the audience in prayer before Mr. Peacock began his sermon on the 23rd psalm.

The business girls met at noon today at the Presbyterian church, where they enjoyed a light lunch and listened to a short sermon. The ushers of the tabernacle met last night after the service. To-night after the services, Mr. Peacock wishes to meet all the men of the city who have rededicated themselves to Christ since the beginning of the campaign, and asked last night that every male trail hitter attend, as the meeting was to be a most important one.

There were 53 trail-hitters last night, the majority of whom were women. A desire on the part of several to leave the tabernacle before the close of the service was the occasion for a rebuke from the evangelist, who asked the congregation to remain seated and not walk into the aisles until the trail-hitters had come forward.

To-night the sermon will be on the subject, "I have sinned against the Lord" and prayer meeting district 24 to 31 inclusive, as well as all the other members who wish to attend, will meet at he N. Y. Central Station and march in a body to the tabernacle.

THE TWENTY-THIRD PSALM

Last night Rev. Peacock took his text from the 23 Psalm. The sermon follows:

Psalm 23.

All the material things which existed when this poem was written have crumbled away, but this poem remains, one of the sweetest ever written. This is the testimony of the millions, who have been comforted and helped by this Divinely inspired poem. This little psalm describes the peace and calm delight which dwell with one whose trust is wholly in God. It is precious because of the hold it has upon the heart by bringing God before us in such an endearing character; and because it gives such a beautiful picture of the blessedness of God's people.

Several thousand years have passed and gone since this psalm was composed. Yet it is one of the sweetest poems ever written.

Dr. Chapman says, the harp over which the fingers of David ran, the book of the law which was his diversion day and night, the sling which he used against the giant of Gath, the palace in which he lived —all these have crumbled to ruin and no trace of them could by any possibility be found, but this psalm is as sweet today as when first written. This is the testimony not only of the noted evangelist, but of mil-

Last Minute News

(By United Press.)

Berlin—President Wilson should make no attempt to interfere in bringing about peace negotiations between the warring nations, was the expression made by a German official this morning to the United Press.

* * *

London—General Brusati, commander of the Italian forces, is ordered by the War Office of Italy to retire on half pay. The relief of the General comes as a result of dissatisfaction with his failure to block the Austrian advance into Italy.

* * *

Washington—In denying unofficial reports that Secretary Lansing intends to resign from the cabinet, the State Department this morning announced the belief that the report is a part of the propaganda to discredit the Administration and comes from German sources.

* * *

Sag Harbor, N. Y.—Lieuenant Clarence Richards, commander of the U. S. Destroyer Fanning, is dead at the submarine station here, and it is believed he is a suicide.

* * *

Washington—Confirmation of Louis J. Brandeis by the Senate will occur this afternoon by a non-partisan vote, is the prediction of the Republican members of the Senate Judiciary Committee.

* * *

New York—Calm admission that he planned to kill his wife, as well as her parents and his wife's sister, Miss Katherine Peck, was made by Arthur Warren Waite on the witness stand this morning.

* * *

London—The Spanish steamer Aurrera was sunk in the Channel this morning by a submarine. She was of 2,845 tons and 395 feet long.

* * *

Rome—A terrific smash within the next two weeks will be aimed by the allied armies at the Turks and Bulgars in Salonica, is the report of the War Office to-day.

* * *

London—The Italian steamer Ercole was sunk in the Mediterranean by an Austrian submarine this morning. The steamer was of 12,200 tons and was registered in Genoa.

* * *

Paris—Lieutenant William Thaw, the New Yorker, flying with the French army ayiatorse, succeeded yesterday in bring down two German aeroplanes near Verdun.

HUNTER ARMS RUMORS ARE AGAIN HEARD

A strong rumor has been current for the past few days that the return of Thomas Hunter of the Hunter Arms Company from New York presaged the final closing of a munitions contract for the local company. It has been stated by men in close touch with the situation that a large sum of money has been, or is about to be, deposited to the credit of the Hunter company, so hat they may begin operations.

At the Hunter Arms plant to-day it was said that Mr. Hunter had returned to New York city.

COMMISSION MEET TO CONSIDER STARR CLAIM

The commission appointed to consider the claim of Starr F. Hill against the city of Fulton for change of grade on Oneida street, will meet this afternoon at the office of Floyd Spangle. Mr. Hill filed a claim of $800 against the city in 11910, claiming that his property had been damaged to that extent when the city changed the grade and paved Oneida street. The matter has hong fire through several city administrations and the commission, composed of E. A. Putnam, George Hackett and William Merton was recently appointed to investigate the claim and effect a settlement with Mr. Hill.

Germans Tighten Grip on Strategic Points Northwest of Verdun

Paris—French troops report violent German attacks west of Fort Douaumont and northwest of Verdun and great gains on the east bank of the Meuse, according to reports which reached the War Office this morning.

The fighting at Verdun continues with implacable fury. There is not even time to bury the dead or succor the wounded.

The Germans from their recaptured positions in the ruins of Fort Douaumont have swept forward south and southwest and taken more French trenches, and have retaken the quarry in the Haudremont woods (east of the fort) which the French carried by assault in their dash on Douaumont.

This afternoon the crown Prince made a determined effort to clean out every French position between these woods of Haudremont and Douaumont, which lies southwest of Douaumont. A whole "series" of attacks was delivered and a trench captured.

On their side, the French have not been reduced to the defensive. On Wednesday night they delivered three counter-attacks on Cumraes, in an endeavor to recapture that village, two miles east of Dead Man on the west side of the Meuse. They were all beaten off, the Germans say.

French military authorities declare that the last month's fighting has only given the Germans an average gain of a 300 metre depth on the west of the Meuse and that on the east of the river the line, except at Dauaumont, is the same as it was on April 25.

PACIFISTS IN MEETING TO TALK WORLD PEACE

(By United Press)

Washington — America's militant pacifists who, some unfriendly soul remarked, "intend to bring about international peace if they have to beat up the whole world to do it," convened here to-day for their first national convention, under the banner of The League to Enforce Peace, American Section. Ex-President Taft presided.

Mr. Taft will begin a series of speeches this afternoon on National Policies. George Grafton Williams, of Harvard will discuss the Monroe doctrine. Entangling Alliances will be dealt with by Talcott Williams, of Columbia. John Bates Clark, of the Carnegie Peace organization will talk about European conditions.

Other speakers to-day: Thomas R. White, of Philadelphia, "The League;" Oscar Straus, of New York, "Force, a Support of Law;" Edward A. Filene, of Boston, "The Soul of the United States;" Hamilton Holt, of New York, "Armaments.'

The effect of the League on American interests will be the general subject for discussion at the session this evening. Secretary of War Newton D. Baker will be the principal speaker. Other speakers will be R. G. Rhett, of Charleston, S. C., President of the American Chamber of Commerce; Samuel Gompers, of the Federation of Labor, President Oliver Wilson of the National Grange, from Peoria, Ill., and others.

The convention will conclude with a dinner to-morrow evening.

BUSINESS SIGN BOARDS MAY BE REMOVED

Any legislaion on the part of the Common Council or Board of Public Works in the matter of business signs suspended over the sidewalks of the city will result in the removal of the majority of the signs, if many Fulton merchants adopt the same attitude in the matter as that expressed by a prominent Fulton merchant this morning. This man operates one of the largest electric signs in the city and he says he will remove it from his building rather than give any bond protecting the city from damages in the event that the sign falls. He stated that very few of the merchants have filed any bond covering the city's liability, and that very few intended to file bonds.

WEATHER FORECAST

Parly cloudy and warmer. Probably showers. Moderate east winds.

Bikes, Tires and Supplies. Bogue's, East First Street.—Adv.

FRIDAY, MAY 26, 1916

THE SMALL DEALER

Though the tendency in this country has for years been toward bigness, there are a good many thoughtful persons who believe a reaction has set in and that the pendulum will presently swing the other way. In the interest of our common country it is to be hoped the latter view may be found to be at least approximately correct.

One of the best utterances made by Woodrow Wilson is this: "You know what the vitality of America consists of. The vitality of America does not lie in New York nor Chicago; it will not be sapped by anything that happens in St. Louis. The vitality of America lies in the brains, the energy, the enterprise of the people throughout the land. That is the heal of America and if America discourages the locality, the community, the self-contained town, she will kill the nation."

The founders of the American Republic were more apprehensive of the springing up of large cities than any other evil then thought of. It was Thomas Jefferson who more than a century ago described large cities as being "pestilential to the morals, the health, and the liberties of man." In Jefferson's day there were no such cities in size and wickedness and degradation as our Chicago and New York of to-day.

Students of government should never lose sight of the fact that no republic or empire ever perished so long as the rural population was in the ascendancy.

The disappearance of the cross-roads store is deplored by tenderhearted persons with strong predilections for the past. But the number of these pioneer institutions never was of much importance. It is far different with the village and small town store. The latter is a factor in business as well as in society. It is gratifying that the preservation of the town store is receiving some attention in trade organizations. Any practical suggestion relating to its maintenance and possible growth is worthy of earnest thought and consideration. The voice of practical experience should ever engage popular attention and fostering care.

Merchants who advertise in their local papers and in trade papers are the men who will make sales, according to Frank B. White, at the fourth annual convention of the Eastern Retail Implement and Vehicle Dealers' Association held not long since in Philadelphia. This advertising, however, according to Mr. White, must "be on the square, must not misrepresent and must not run down competitors. One of the things that has worried the local dealer, he said, has been the success of the mail order houses. These big houses do an annual business of $200,000,000 a year in this country, he stated, but after after all, this is only four percent. of the total. Therefore the competition of the mail order houses, he argued, cannot hurt the country dealers to as great an extent as some seem to think. Mr. White, it may be inferred, underestimates the scope of mail order house competition. The worst about these concerns is their immensity and their grasping propensities and that they are constantly reaching out for new conquests.

"Your trade comes from the farmer," Mr. White further said. "Therefore treat the farmer as a friend, visit him in his home, have him visit you, organize local clubs and gain the farmer's friendship. Once you do this, you will find them loyal. Aid in improving general countryside conditions. Every time you are instrumental in having a new bridge built or other improvements made you enhance the value of the nearby farms, and this, in turn, reacts eventually to your benefit."

During a general discussion that followed the dealers were urged to find out what their cost was for doing business. It was said by various dealers that the costs run from 14 to 22 per cent. of gross sales. It was shown that a man should know exactly what is his profit or loss from every line sold. If this is done, it was said, many a failure will be averted.

One dealer said he had given up the sale of automobiles for this reason, for instead of the 15 per cent. profit he thought he was getting, he found he was selling the motor-cars at an actual loss.

The high aim of those who are sincerely devoted to the safeguarding of the American Republic should be the uplift, growth and prosperity of villages, towns and small cities. Anything and everything that can be done to make such places inviting and attractive to live in and do business should be done willingly and cheerfully. Real life may truly be realistically enjoyed in such places. And real life is worth infinitely more than the enervating hurly-burly of the best of your overly large cities with all their seductive and equally destructive attractions.

Opinions

SHOE PRICES TO GO UP.

A conference of the National Retail Dealers' Association and allied organizations, representing a billion dollars in manufacture, will be held in Philadelphia to-morrow. Its object is to bring together the leading men of the leather trade, and arrange to obviate the present chaotic conditions. According to A. C. McGawin, president of this association, shoes have advanced a dollar a pair since the beginning of the European war, and the conference will doubtless prepare the public for another rise. In his opinion the war will last for some time yet, and the United States must therefore continue to produce shoes for the greater part of the world. Prices will continue to rise unless something is done, such as substituting cloth tops to save leather. The tanneries simply cannot keep up with the demands. Three hundred million dollars' worth of goods, with which dealers have been overstocked, have been thrown into the market without breaking prices.—Utica Herald.

TARIFF THE ISSUE.

Far-visioner men dread a return to normal conditions under a Democratic tariff. There is certain, in any case, to be a rebound from the excessive war prosperity now existing. It is a prosperity belonging not to the United States alone, but to Norway and Sweden and all the great entuarl nations in common, an international rather than a national prosperity. For us it is a prosperity which exists in spite of, not because of, present economic legislation. To permit the country to face during the next four years the renewed and virile competition of the great commercial powers under the handicap of the Underwood tariff would be a disastrous blunder. Never, we suspect, has a protective tariff been so needed as it will be needed during the next four years. The tariff remains, therefore, as it has been for half a century or more, the paramount issue. It must not be relegated to the rear; it must, on the contrary, be brought to the front. No man ought to be nominated at Chicago who is not as sound as a dollar on protection, not only in his belief in it but also in his conviction that it is the issue of issues in this period of the Nation's progress.—Philadelphia Evening Ledger.

THE OREGON VOTE.

The Oregon presidential primary presents three problems, How did the 37,600 supporters of Colonel Roosevelt in 1912 vote last Friday? Why was the wish of Mr. Justice Hughes, who was a candidate against his will as all men knew, not respected? How did the women vote? The Roosevelt supporters of 1912 either remained away from the polls (excluding the 200, some of whom may have been women), or they voted for Senator Cummins, ex-Senator Burton, or even Mr. Justice Hughes. As to the second question, 50,257 voters, women as well as men (almost one-third of the state still to be heard from), cast their ballots for the supreme court justice as their choice either because they believed he could not refuse a nomination by the Republican party or because they regarded him as a receptive candidate. As to the third question, it may be concluded that most of the women who voted preferred Mr. Justice Hughes—obviously few of the women were enthusiastic enough in the cause of the Colonel to write his name in.

Perhaps the most astonishing thing about the Oregon primary is that the Justice should have received such a large vote when it was well known that the Progressive leaders were anxious to see him run as lamely as Senator Burton did. Oregon is rather celebrated for doing queer things when it goes to the polls. But in this case there is no mistaking its preference for Charles Evans Hughes, or its indifference to Colonel Roosevelt, the women going to the polls and voting as well as the men.—N. Y. Sun.

PUBLIC UTILITY POLICY.

Conclusions Adopted by the National Municipal League.

At a recent meeting of the committee on municipal program of the National Municipal league the following conclusions were adopted and ordered to be included in appropriate sections for insertion in the league's model city charter:

The public utility and franchise policy embodied in a model city charter should be so formulated as to conserve and further the following purposes:

First.—To secure to the people of the city the best public utility service that is practicable.

Second.—To secure and preserve to the city as a municipal corporation the fullest possible control of the streets and of their special uses.

Third.—To remove as far as practicable the obstacles in the way of the extension of the practice of municipal ownership and operation of public utilities and to render practicable the success of such ownership and operation when undertaken.

Fourth.—To secure for the people of the city public utility rates as low as practicable consistent with the realization of the three purposes above set forth.

It should be no part of such policy to secure compensation for franchises or special revenues for general city purposes by an indirect tax upon the consumers of public utility services.

In formulating a policy to carry out the four purposes above stated as desirable the following principles should be recognized:

First.—Each utility serving an urban community should be treated as far as practicable as a monopoly with the obligations of a monopoly, and its operation within the city should be based as far as practicable upon a single comprehensive ordinance or franchise grant uniform in its application to all parts of the city and to all extensions of plant and service, as well as to the existing plant and service.

Second.—Every franchise should be revocable by the city upon just compensation being paid to its owners when the city is prepared to undertake public ownership.

Third.—The control of the location and character of public utility fixtures, the character and amount of service rendered and the rates charged therefor should be reserved to the city, subject to reasonable review by the courts or a state utilities commission where one exists.

Fourth.—The granting and enforcement of franchises and the regulation of utilities operating thereunder should be subject to adequate public scrutiny and discussion and should receive full consideration by an expert bureau of the city government established and maintained for that purpose or, in case the maintenance of such a bureau is impracticable, by an officer or committee designated for the purpose.

Fifth.—Private investments in public utilities should be treated as investments in aid of public credit and subject to public control and should be safeguarded in every possible way, and the rate of return allowed thereon should be reduced to the minimum return necessary in the case of safe investments with a fixed and substantially assured fair earning power.

What He Says About His Wife.

To his neighbor: "You will find my wife, sir, extremely fair and just in all matters, I assure you."

To his butler: "Your mistress will direct you in everything. She is a perfect housekeeper."

To his partner: "Yes, my wife is extravagant, but how can I help that?"

To his doctor: "You know her better than I do."

To his sister: "She is a wonderful manager, is Adele. I never saw a woman who could make a dollar go so far."

To his friend: "Yes, old man, all women, as you say, are alike, and I guess my wife is no worse than the rest of them."—Life.

The Word "Gent."

At one time the word "gent" was a reputable term for general use. A respectable writer in 1564 tells of "a supper to divers gentlemen of the Gray's Inne for the great amitie between them and the Middle Temple gents." The diarist Evelyn speaks of the "noise and tumult occasioned by three or four wild gents in drink." Soon after Queen Victoria's accession "gents" became vulgar. Thackeray speaks of it in [illegible] as an "affectionate diminutive much in use among commercial persons."

No charge made for this space.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

There are great wrongs for which only exposure and punishment can mete out justice, but it is not the great wrongs that sap life of all its joy. It is the little, everyday, thoughtless things that wear on patience and destroy good nature. Put these behind you and forget. When such thoughts come, think of something good and pleasant quickly. Dwell on fine things and the ugly thoughts will disappear. Real courtesy, which is kindness, a smile, a good word spoken in time, a helping hand, will conquer more than half the ill feeling anyone may have shown you. Resenting small offenses opens the way to greater ones. There are those who so entirely forgive as entirely to forget. These persons make friends of enemies. They are the peacemakers of a neighborhood. They follow a course that tends to bring out all that is good in those with whom they have to do. Forget your troubles, or if you must be thinking of them do not make a practice of talking them over to everyone and on all occasions.

* * *

According to Darwin, man has evolved from the lower forms of animal life. Man as an animal is still progressing upward, each step separating him more from the lower things from which he came. Throw food to almost any of the lower animals and they will fight among themselves for to get it. Men, ordinarily, will not fight among themselves for something to eat, but they scramble for money, the medium with which we purchase food. And the fight is more brutal than the struggle of hogs for an ear of corn. We still have a lot of monkey-business to cut out.

* * *

How a boy orders his dinner (when he is alone):

Ice-cream and pie and cake.
Nuts and more cake.
Ice-cream, cheese.
Salad.
Vegetables.
Meats, preferably chicken.
Soup.
Ice-cream, pie and coffee.
Ice-cream and cheese.

John D. Wells says:

When the last of Life's copy is finished
  And edited, baring the sin
When the stress of the toil is diminished,
  And final forms wait to go in;
When the types are locked fast in their places—
  Our lives written there, and their sum—
And we're gathered 'round here in our place
  All waiting for "30" to come;
When the Master Hand touches the lever
  To run the edition that day—
Then, my Brothers of ever and ever
  Then what will our printed page say?—
Will the Chief edit each little error?
  Each minor mistake will He see?
Will He visit the punishing terror
  On mortals as helpless as we?
Will He see the turned-rule in the column
  Each making a task left undone?
Will He note a mien, grave and solemn,
  Good works that were never begun?
When the Master Hand touches the lever
  To run the edition That Day,
Then, my brother of ever and ever
Look well to what your pages say!

MUNICIPAL BATHS MUST BE PROVIDED

Bathrooms Should Be Properly Constructed.

SIZE OF SWIMMING POOLS.

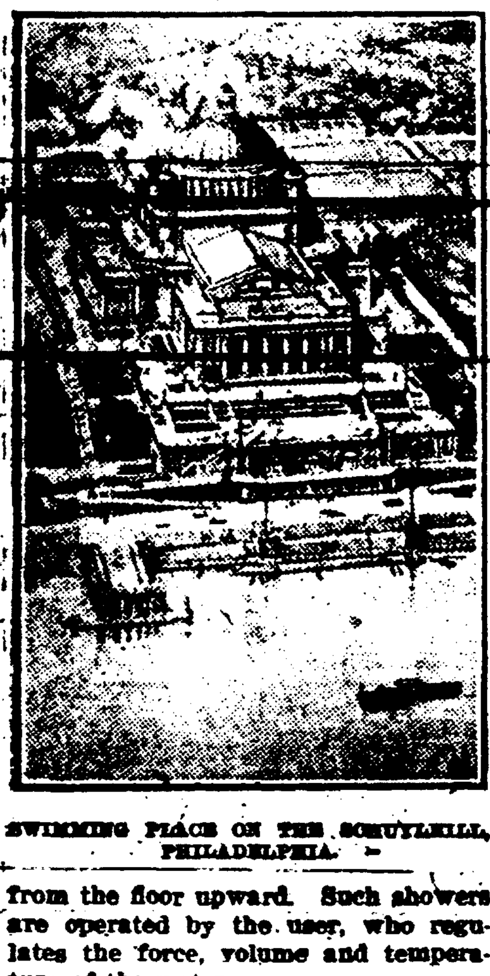
The City of New York Has Many Free Public Interior Baths and Free Floating Baths—All Are Run at a Very Low Cost—Other Municipalities Also Maintain These Sanitary Institutions.

By FRANK KOESTER, city planner and consulting engineer, New York, author of "Modern City Planning and Maintenance," etc.

While many municipalities have provided public baths, they seldom have been provided in sufficient number with proper equipment.

Such baths should be on a large scale and be what may be termed aquatic gymnasiums. There should be a large swimming pool some 100 feet or more in length and forty to fifty feet wide, varying from three to fifteen feet in depth at different parts, with springboards for diving and artificial waves.

Steam rooms, sweating rooms and shower baths should be provided, with both hot and cold water. The showers should be arranged to jet either from above, from the wall at the side or



SWIMMING PLACE ON THE SCHUYLKILL, PHILADELPHIA.

from the floor upward. Such showers are operated by the user, who regulates the force, volume and temperature of the water.

The gymnasium should include the various forms of gymnastic apparatus, and it is desirable also to have a running track, which may be constructed as a gallery around the building wall.

In construction the bath should be throughout of tile and of such other materials as will betray the presence of dirt in order that the most scrupulous cleanliness may be observed.

A heating plant must be provided for keeping the water heated to the proper temperature and also for keeping the rooms at a uniform temperature. Arrangements should be such that the pool may be drained and refilled in a short time. Such baths should be in charge of a skilled swimming master for the instruction of those who wish to learn to swim. Attendants should be at hand to massage those who desire such service.

It is advisable to supply the baths with as many features as possible in order that they may be utilized to the fullest extent. The price of admission should be low, just sufficient to cover the cost of operation, provided it is not free, while fees for special service, as for swimming lessons and massage, should be turned into the general fund.

Separate municipal baths should be provided for women, but if this is not feasible certain days of the week should be set apart for their exclusive use.

The city of New York maintains and operates twelve free public interior baths and eleven free floating baths. For the use of these institutions there is no charge whatever, the only requisite being respectable and orderly conduct on the part of the patrons, compliance with the rules and that the bathers furnish their own towels and soap. This has been the policy almost from the opening of the first public bath, although at the opening of one of the municipal baths the city did undertake to furnish towels and soap at a nominal charge to the bathers. But this was found impracticable.

Floating baths are all built about on the same plan, as follows: They are ninety-five feet long and sixty feet wide and are floated on eight pontoons, placed four on each side of the bath. In the center there is a large well divided into two parts, one, ninety-three feet long and thirty-four feet wide, for adults and one, seventy feet long and eight feet wide, for children. The depth of the water in the large well is four and a half feet and in the small one two and a half feet. There are sixty-eight dressing rooms opening upon a small gangway around the edge of the well. The floating baths, like the interior baths, are free, but the former are used only during the summer.

400 NEAR AN END

Fast Heading to Extinction, Says Mrs. Herbert Parsons.

BRAINY PEOPLE TOO BUSY.

Dull Ones Unable to Keep Game Going, and as a Result Dynasty Is Tottering, Declares Congressman's Wife. Sees Only Fortune Hunters Among Satellites.

Chicago. — After Mrs. Elsie Clews Parsons of New York, wife of Herbert Parsons, New York representative, and daughter of Henry Clews, financier, hurried back home, Chicago society folk were wondering if she really meant what she said in an address here recently before the City club.

Mrs. Parsons said society—the Four Hundred—was fast heading to extinction. She advised sociological murder for "society," and, as a matter of fact, she said the homicidal process was already well on the way.

As if that were not enough, she gave it a name which should slay it forthwith if it is subject to mortal wound. She didn't once mention "parasites," but she called it the "gynocratic class"

Photo by American Press Association.

MRS. HERBERT PARSONS.

—a woman bossed conclave, on whose bepowdered petticoats clung a few uninteresting men fortune hunters and an even less ambitious male contingent, who cultivated society for the bare sake of the meals involved in being asked out to dinner.

The crumbling of the dynasty she attributed to the following:

That people with brains no longer have time for it; ergo, it is losing leaders.

That, being a female organization in the beginning, it would no longer have cohesion when the little talent it possessed to amuse finds vent in woman suffrage, club life, business or sociological work.

The younger girls are demanding the right to select their own mates; therefore they will not frequent "society" where the men are uninteresting.

That an economic age is fast making it intolerably ridiculous.

Mrs. Parsons displayed the humorous deformities of her subject so general at first that her audience, consisting numerously of "society's" limbs, forgot to get angry and was soon laughing heartily—at itself. One or two dowagers got fussily up and left with husbands, who were red and seemed unhappy.

"The society group of any American community," Mrs. Parsons said, "is composed of persons sufficiently desirous to be in the group to pay the entrance fee, so to speak. Comparatively few persons can belong to society without having some source of revenue. Now and then in the larger cities may be found men who get their living by being in society.

"Conspicuous waste is a desideratum if not a requisite of a stable social position. For real estate men, brokers of various kinds, house decorators, architects, portrait painters and drawing room musicians it is good, sound business to be in society.

"Many smart society women eschew love altogether. They are like the saloon keeper who does not drink. But they will flirt, for flirtation means retainers, and retainers mean prestige.

"Prudent lovers withdraw as far as possible from society. Elderly matchmakers delight in nothing so much as trading in the marriage market, and young and tractable hearts are their counters. Therefore they suffer the courtship."

Horse Dislikes Cigarette.

Los Angeles.—A sensitive horse who has a dislike for cigarette smoke attacked Edgar Akers, aged twenty-five, of this city, and bit him on the right hand. Akers was smoking a cigarette near the horse, which was standing at the curb. With an angry squeal the horse seized Akers by the right hand. Akers managed to free his hand, but not until the horse's teeth had torn the flesh from the fingers.

Old Man Hobbles to Polls.

St. Paul.—An aged man limped into the voting booth of the Third precinct of the Sixth ward the other day. After he had marked a ballot William Casey, ninety-two years old, confided to the election judges that it was his thirty-sixth time for voting in St. Paul. Mr. Casey came to St. Paul in 1877.

Days You'll Never Forget

A SWISS MYSTERY

It Looked For a Time as if It Were Beyond Penetration.

BUT IT WAS ALMOST SOLVED.

An American Visitor in the Republic Who Wanted to Know About Its President, Finally Came Near Getting the Information He Craved.

Switzerland is a republic that runs with the exactness of a Swiss watch, its machinery as hermetically concealed. I had heard that the Swiss republic set the pattern of government for the world, and I was anxious to know something of its methods and personnel.

I was sorry that I was so ignorant. I didn't even know the name of the Swiss president and for a week was ashamed to confess it. I was hoping I might see it in one of the French papers I puzzled over every evening, but at the end of the week I timidly and apologetically inquired of our friendly landlord as to the name of the Swiss president.

But then came a shock. Our landlord grew confused, blushed and confessed that he didn't know it either. He had known it, he said, of course, but it had slipped his mind.

Slipped his mind! Think of the name of Roosevelt or Wilson or Taft slipping the mind of anybody in America—and a landlord!

I asked the man who sold me cigars. He had forgotten too. I asked the apothecary, but got no information.

I was not so timid after that. I asked a fellow passenger—guest, I mean—an American, but of long Swiss residence, and got this story. I believe most of it. He said:

"When I came to Switzerland and found out what a wonderful little country it was, its government so economical, so free from party corruption and spoils, from graft and politics, so different from the home life of our own dear Columbia, I thought, 'The man at the head of this thing must be a master hand; I'll find out his name.' So I picked out a bright looking subject and said, 'What is the name of the Swiss president?'

"He tried to pretend he didn't understand my French, but he did, for I can tear the language off all right—learned it studying art in Paris. When I pinned him down he said he knew the name well enough, parfaitement, but couldn't think of it at that moment.

"That was a surprise, but I asked the next man. He couldn't think of it either. Then I asked a police officer. Of course he knew it all right, 'Oh, oui, certainement, mais'—then he scratched his head and scowled, but he couldn't dig up that name. He was just a plain liar—tout simplement—like the others.

"I asked every man I met, and every one of them knew it, had it right on the end of his tongue, but somehow it seemed to stick there. Not a man in Vevey or Montreux could tell me the name of the Swiss president. It was the same in Fribourg, the same even in Berne, the capital.

"I had about given up when one evening in Berne I noticed a sturdy man with an honest face approaching. He looked intelligent, too, and as a last resort I said, 'Could you by any chance tell me the name of the Swiss president?'

"The effect was startling. He seized me by the arm and, after looking up and down the street, leaned forward and whispered in my ear:

"'Mon Dieu! C'est moi! I am the Swiss president; but—ah, non, don't tell any one. I am the only man in Switzerland who knows it.'

"'You see,' my friend continued, 'he is elected privately; no torchlight campaigns, no scandal, and only for a year.'

PULP FOR PAPER.

It Is Now Mainly Obtained From Wood and Vegetable Fibers.

Paper derives its name from the fact that it was originally made by the Egyptians from papyrus, a rushlike plant formerly common in Egypt along the Nile. Today paper is largely made from vegetable fibers and cellulose.

When it was found that the fibers of the cotton and flax plants were best adapted for making paper and the uses of paper were few the ragman did a flourishing business in buying old rags to keep the paper manufacturers supplied with raw material. The rags were first allowed to rot to remove the substances incrusting the cellulose and were then beaten into a pulp to which water was added. The pulp was then placed in a sieve and drained and subjected to heavy pressure which united the fibers and produced paper. By the modern method the rags are boiled with caustic soda, which separates the cellulose fibers, and placed in a machine in which rollers set with knives tear the rags to pieces and mix them with water to make a pulp. This pulp is bleached with chloride of lime and mixed with alum and a kind of soap to give a smooth surface.

The way man's discoveries operate to supply his needs in the progress of civilization is notably illustrated in the production of paper. Under the old method the big supply required today for newspapers and other uses could not have been produced.

The discovery that pulp could be made from the trunks and limbs of trees came to the rescue. It was found that by boiling wood shavings in strong solutions of caustic soda in receptacles that would withstand very high pressure the wood fibers were separated and a very good quality of cellulose for paper manufacture produced. As a result of this discovery paper today is mostly made of wood.—Boston Herald.

Nurse Weds Soldier Patient.

London.—Miss Alice Davis, a pretty Virginia girl, who has been nursing wounded soldiers at the County hospital, Dorchester, was married to one of her patients, Trooper Larkin of the Australian imperial force, who was injured while fighting in the Gallipoli campaign.

BALK AT MARRIAGE

English Nobility Reluctant to Talk Matrimony With Servian Prince

WARMLY GREETED ON VISIT.

Alexander Makes Great Impression For Himself and His People, but Rumor of a Wife Hunt Causes Many to Place Themselves on Guard Against Any Matrimonial Talk.

London. — Alexander, crown prince and regent of Servia, has been in England hunting a wife, it is rumored, as well as seeking political and financial assistance in recovering his country. He made a great impression and created a warm sentimeent for himself and his people. But fathers with marriageable daughters, from King George downward, did not appear anxious to meet any matrimonial advances from the prince. He went to Buckingham palace and was entertained by the king and queen. Prince Albert was delegated to meet him at the station and to see him off when he departed. But Princess Mary did not come in contact with him.

The hesitation manifested by English fathers and mothers of high degree to an alliance with Prince Alexander is largely caused by the uncertainty of his ever sitting upon the throne of his father and the certainty of his living in constant danger of his life if he ever is able to return to Belgrade. It has taken some time for England to over-

Photo by American Press Association.

CROWN PRINCE ALEXANDER.

come its feeling of repugnance to the prince and his father, King Peter having always been held responsible for the murder of King Alexander and Queen Draga, whose deaths removed the obstacles in the way of his own accession, while Prince Alexander was blamed primarily for the assassination of the Archduke Francis Ferdinand and the Duchess of Hohenberg. The prince's gallant conduct in the war and the general feeling in England that the British government was responsible for unwisely advising the Servian army to resist the invaders and hold out until the allies sent re-enforcements have created a reversion of feeling in his favor.

The government took pains not to involve England in any way with the affairs of Servia except as relating to this war. The prince was the guest of Lord Kitchener, and at York House Prince Alexander met Sir Edward Grey, the secretary of foreign affairs, in a party which included the Earl of Derby and Walter Long, both members of the government. Sir Edward Grey was likewise present at the dinner given in honor of the prince by Lewis Harcourt on behalf of the government. The Marquis of Crewe, leader of the government in the house of lords, presided at this dinner. The Russian ambassador, the Japanese ambassador, the Belgian minister, the Portuguese minister, the Marquis of Lansdowne, Lord Kitchener, Arthur Balfour, Walter Runciman, Lord Robert Cecil, General Sir William Robertson and the lord chancellor were present.

Sir Edward Grey was also upon the platform at Victoria station when Prince Alexander, accompanied by Prince Albert and Lord Kitchener, arrived to take the train for the coast and embark for the continent. The foreign secretary of the British government did not entertain the prince regent of Servia at any official hospitality. And, although the prince regent was accompanied by his prime minister, M. Pashitch, they were not received or entertained by the British prime minister, Mr. Asquith.

Seldom has any visiting royalty ever received in England such a deputation of distinguished men in different walks of life as waited upon Prince Alexander at his hotel.

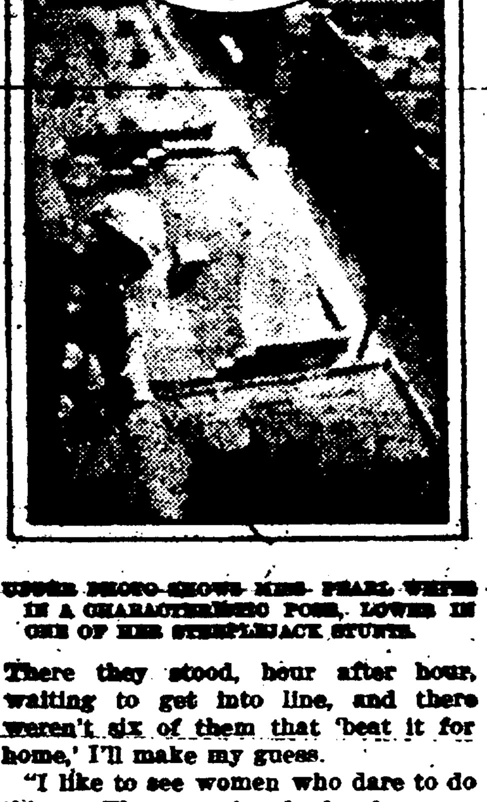
COURAGE WINS HER

Stand Made by Suffragists Impresses Pearl White.

ONCE SCORNED THEIR FIGHT.

Her Views Changed When She Saw How Bravely the Women Marched In a Parade In New York Despite a Cold, Miserable Day.

New York.—"You see, it was like this," said Miss Pearl White, curling her slender figure up on a corner of her couch. "I was one of those who found suffragettes funny. They handed me a laugh many a time just because I thought they were pulling a speech off to get themselves heard. But I tell you I didn't think that after their October parade. It was on an awfully cold, mean day, if you recall it, and the way those women came up the avenue beating against the wind, with their white dresses on, fairly gave one a thrill.



UPPER PHOTO SHOWS MISS PEARL WHITE IN A CHARACTERISTIC POSE, LOWER IN ONE OF HER STEEPLEJACK STUNTS.

There they stood, hour after hour, waiting to get into line, and there weren't six of them that 'beat it for home,' I'll make my guess.

"I like to see women who dare to do things. There are hundreds of women working for their living, and most of them don't dare say what they think. But those suffragettes, they've got their courage right with them, all the time," went on the plucky, daredevil "movie" star.

She it was who took up the dare when some one said no girl could be a steeplejack, and on April 15, dressed in the part of a sign painter in overalls and cap on which "Votes For Women" gleamed across the visor, Miss White let herself down an electric sign twenty-two stories above Broadway.

Miss White is as lithe as a panther. She can twist her pliant figure into more curves than most women. Half Italian and half Irish, she comes from Missouri, and so she adds keenness to her Celt and Latin traits. "I pay taxes," said she thoughtfully. "Why shouldn't I say something about what is to be done with my tax money? I pay income tax, too, just as if I were a man. I earn money too. In my profession a woman star earns more than a man, yet I have nothing to say about the income tax law nor about any other law. Why shouldn't I vote? Women are doing every kind of work men do, and over in Europe they are suffering as much as men suffer. If war should come to America they would suffer here. I want to vote for president of this country, for I know who I think ought to govern us. But I shan't have anything to say about the president. I'll have to abide by the decision of men, who may not care half as much as I care."

WIND IMPRISONS WOMAN.

Locked In Closet and Near Collapse When Rescued.

Bridgeville, Del.—Imprisoned in a closet by the wind slamming a door fast, Mrs. Mollie Cordery, who lives near Bridgeville, had a narrow escape from death and when discovered was nearly overcome by the shock.

Mrs. Cordery was cleaning the attic, and while she was looking in an old closet a gust of wind slammed the door and locked it from the outside. There was no one but herself in the house, and it was nearly an hour before Mrs. Cordery's screams happened to be heard by a gang of men who were repairing the road. With all the doors locked downstairs, Harley Rickards climbed to the second floor and got through by a window. When Mrs. Cordery was found she was in a pitiable state. She is still seriously ill from the shock.

METHODIST BAN ON AMENDMENTS

Conference Delegates Vote to Retain Rule---Withdrawal of Expulsion Clause Urged.

Saratoga Springs—The penalty of expulsion provided in paragraph 271 of the discipline of the Methodist Episcopal Church for members who play cards, dance, attend the theater or engage in other similar amusements will remain in effect for another four years at least, as the result of action taken today by the general conference.

An attempt which was led by Chancellor James R. Day of Syracuse University, to secure the removal of the prohibition failed by a vote of 434 to 360. The figures are almost identical with those of four years ago, when a similar proposal was defeated.

Paragraph 271 of the discipline, which is the basic law of the church, was enacted in 1872 and has remained practically without change. It reads:

"In case of neglect of duties of any kind, imprudent conduct, indulging in sinful tempers of words, dancing, playing at games of chance, attending theaters, horse races, circuses, dancing parties, or patronizing dancing schools or taking such other amusements as are obviously of misleading or questionable moral tendency, or disobedience to the order and discipline of the church; at the first offense let private reproof be given by the pastor or class leader, and if there be an acknowledgement of the fault and proper humiliation, the persons may be borne with. On the second offense, the pastor or class leader may take with him one or two discreet members of the church. On the third offense let him be brought to trial and if found guilty and if there be no real sign of humiliation he shall be expelled."

Never Strictly Enforced.

It has been urged as a basis for removal that this section is never enforced, and that the specific warning which is given in another part of the discipline should be suffivient to convince members that the church strongly disapproves of these diversions. The opposite contention has always prevailed in the conference, however, that by withdrawal of the penalty the church will indicate that it favors the ban completely.

The balance of voting power was held to-day by the eighty or more representatives of Negro conferences, who threw their support almost solidly against any change. The foreign delegates were about equally divided.

A majority of the others, particularly from the eastern part of the United States, voted for removal, although nearly every delegation was split. Baltimore, Newark, New York, Philadelphia and Rock River, Ill., voted overwhelmingly for the change. Detroit, Illinois, New England, Ohio, Upper Iowa, Southern California, Northwest Indiana, Minnesota, and West Ohio also gave good majorities. Pittsburgh, Kansas and Wisconsin were equally divided.

Puget Sound and Columbia River, Washingon, Erie, Pa.; Holston, Tenn.; North Indiana, Maine, Northwest and Southwest Kansas, and Southern Illinois were strongly opposed. Every member was placed on record individually.

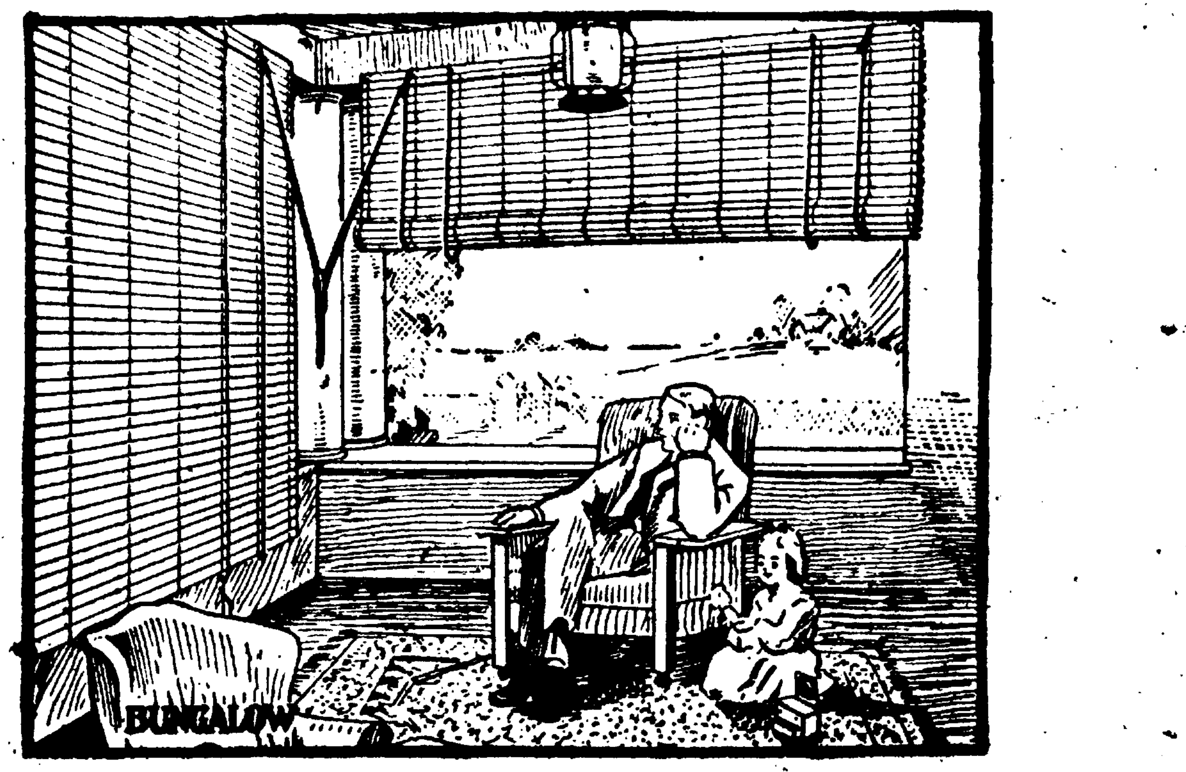
Debate Shut Off.

The conference shut off all debate by deciding to proceed with the voting as soon as Chancellor Day had read the report of the minority asking for a change, and Frank Neff of Tulsa, Okla., had read the opposing recommendation. Both were permitted to speak briefly.

"I am not opposed in any way to the most rigid attitude of the church on the question of amusements," declared Mr. Day, "but you and I know that paragraph 271 is an imperfect catalogue of evils, out of which are left evils as great as these that are specified. It is wrong in principle, and is impracticable in practice. If you continue it, it will come back to the general conference until the millennium to give us trouble, because it is wrong.

"The other paragraph has a sufficient enumeration to give the scope and the intent in the case and incorporates everything that a devout Christian ought not to do, but at the same time leaves him with the freedom that belongs to a Christian and that is indicated in the sermon on the mount. The lower the form or religion the greater number of rules for the government of the devotee. The higher the form the more is committed to his faith and heart. I am simply asking that we adopt such a measure as will be respected by everybody and disregarded by few, and if diseegarded, will be to their discomfort. It will not lessen our emphatic pronouncement on amusements, but will get us into such shape that we can bring the whole subject to bear strongly, impartially, intelligently, upon our people."

Mr. Neff declared that 114 memorials have been received asking that no change be made.



Some Reasons Why---

Verandas and Sleeping Porches should be fitted up with

Bungalow Patent Porch Shades

Verandas and sleeping porches equipped wih BUNGALOW PORCH SHADES not only afford protection from the sun, but add other rooms to the home, which during the sweltering summer months are the most attractive and comfortable places about the house.

The Misses Rosabelle and Zarina Phillips and Mr. Kerwin Phillips, of Los Angeles, California, who have been the guests of their aunt, Mrs. Harvey MacMurchy, left this morning for New York city.

MEXICO POINT INN TO OPEN MONDAY

The Mexico Point Inn will open with a large ball Monday evening, and several Fultonians plan to attend the affair. The music will be furnished by the Fulton Imperial Trio, and vocalists from this city will sing. An elaborate dinner menu has been arranged, and many from this city have made dinner reservations.

Ask Your Plumber What Flushometer Off of a Small Supply Means

It is the most important factor in closet construction—causing the bowl to be cleaned quicker and more thoroughly. Giving the householder with the small supply pipe the same efficient services as the large offie building with 1 1-4 inch supply.

THE AMERICAN CLOSET COMBINATION

Equipped with the American Tank Valve is the only closet that will give a flushometer off of small supply. Add to this main point of superiority over other closets, its simplicity of design—(there is nothing in the tank but air and water) durability of construction—(cast iron tank—finished with Chino enamel —easy to keep clean) and its economy in operation. Water fills in tank on top of valve—saving water. We have without doubt the best closet that you can install in residence, office building, factory or school house.

"Insist on the American Line—guaranteed for 5 years —we believe in it. We want to prove it to you.

ANNUAL REUNION OF 184TH N. Y. REGIMENT

Robert Simpson, Jr., secretary, and John W. Distin, president, of the reunion association of the 184th Regiment, announce that the twenty-eighth annual reunion will be held on the Oswego Falls Fair Grounds, Wednesday, June 14, 1916. An excellent program is being prepared, consisting of short speeches and good music. General exercises at 10 a. m. Special program and election of officers at 1:30 p. m. All surviving comrades of the 184th are earnestly requested to be present. All other comrades are cordially invited.

If you cannot be present please write the Secretary and enclose 50 cents for one of the beautiful badges and a fine engraved picture of Harrison's Landing as it was when the regiment encamped here.

Ladies are requested to furnish baked beans or scalloped potatoes. Dinner will be served at 12 m.

FULTON DRUM CORPS MET TO ORGANIZE

The Fulton Drum Corps met at the Elks' Home last night for purposes of organization, and plans for the summer season were discussed. Bert Adkins is manager of the corps, which has already secured engagements to play for several parades.

WOODMEN WILL JOIN IN MEMORY DAY PARADE

The Modern Woodmen of America have completed arrangements to join holding ceremonies with the G. A. R., for their departed neighbors on Tuesday. A committee has been appointed to gather evergreen to be used on this occasion. The regular Woodmen Memorial Day has been eliminated and the customary services will take place on that day.

All Woodmen are requested to meet at the rooms at 9 a. m., on May 30 and to march with the other fraternal organizations of the city.

LAST NIGHT'S PEACOCK SERMON

(Continued from Page One)

lions of those who have been comforted and helped by this Divinely inspired poem.

The Greatest Prize.

This little psalm is an idyll of great beauty, describing the peace and calm delight which dwell with one whose trust is wholly in God. No attainment in English literature can lead any student into the mysteries of a mother's love and no attainments in Oriental learning will help any one to learn the secret of the Lord which is here disclosed. We may understand the Hebrew language from beginning to end, but scholarship can not let any one into the deep meaning of this psalm. Only those who have had such a disclosure of God, as the author of this psalm had, can understand its meaning. This poem has brought comfort and help to many in the night of sorrow, and in the dark hour of disappointment, and because of this it is prized more highly by the people of God than any other poem.

The great majority of people have their favorite passages of scripture. Some love one part of God's word more than others. But it may be said of this psalm that it holds a peculiar position. It is precious to every believer of God. Jews and Christians alike hold it dear and there are few if they were asked but would thankfully confess that of all the psalms, it was to them the sweetest and most precious. Now I think undoubtedly the reason this psalm is so precious and holds such a high place is because of the hold it has upon the heart. And the reason it has such a hold upon the heart is because it brings God before us in so endearing a character. He is here represented as a shepherd. As the one caring for His people and providing for their every want. The psalmist says, "The Lord is my shepherd."

This is the voice of personal experience. David knew what he was talking about. He had experienced the loving kindness and tender mercies of God, and he knew that God had been a shepherd to him in the time of great danger. God's very presence had been manifested to him and he realized that God was his personal shepherd. The word shepherd is an interesting word, and the work of the shepherd is more interesting. From some height, as a rule, he overlooks the flock, and so our shepherd sitting at the right hand of God watches over us. The shepherd stands between the sheep and danger; so does our shepherd. He is between us and danger, and temptation, between us and trouble, between us and death. And none of these things can touch us without passing through Him. The shepherd takes the weak and wandering sheep in His arms and our good shepherd ever bears us in His arms with sympathy and love before God. This personal pronoun "my" makes the Bible a new book to us. Suppose some angel had said, "The Lord is my shepherd." This would bring no assurance to a frail, sinful human heart. Suppose a voice from heaven should declare the Lord is a shepherd or the Lord is your shepherd, this would not give to poor weak, sinful humanity the help and comfort they need, but when the voice of a brother man weak and needy as ourselves can say, "The Lord is my shepherd," it is inspiring.

A colporteur going through Switzerland saw a little shepherd boy minding his flock and taking out a Bible tried to teach him to read the twenty-third Psalm but failed. The little fellow could only learn the first sentence and he learned this on the five fingers of the hand giving a finger for each word "The Lord is my Shepherd." The colporteur left him and four years later came back again. He was interested to know about the child and sought him out in his home. The mother of the boy met him with tears when she found that he was the man that had taught him the verse of scripture she said: "My little boy is dead, and he left word for you if I should ever see you that he died holding the fourth finger of his hand. The Lord is My Shepherd." Oh! What a blessed thought. What comfort and consolation it brings to know that God is my shepherd, I shall not want. He is mine and I am his, and I know that I shall not want for any good thing in this life or in the life to come.

Why We Fail.

This psalm is precious and beautiful because it gives such a beautiful picture of the blessedness of God's people. In the second verse we are told that they are the sheep of His pasture. He maketh me to lie down in green pastures. He leadeth me beside the still waters. He restoreth my soul. He leadeth me in the paths of righteousness for His name's sake. We are told that a hungry sheep will not lie down, and when it does lie down it is a sign that it is satisfied. It is also said that sheep will not drink from a swiftly flowing water, but only out of some quiet still stream. So God satisfies the hungry soul, and quenches the thirst of our immortal spirits by speaking to us, and giving us of that spiritual bread and making us drink of the spiritual water of which if we eat and drink we shall never hunger or thirst again. In other words in this world we are under His gentle care and keeping, and when we depart this life it shall be to dwell in His house forever. The psalmist knew that he belonged to God's flock, and was safe under His care, free from all anxiety by the sense of His protection and that he could enjoy all the simple blessings and pleasure of life, in the green pastures and by the still waters.

It is the most complete picture of happiness that can be drawn. It represents that heaven which is everywhere, if we could but enter into it. But O how few of us do. How few people have such implicit faith in God. How few people are getting out the Christian life the blessings they should get out of it. My friend is Jesus Christ your shepherd Is He leading you through the green pastures and making you lie down in the green pastures in the kingdom of God? Is He restoring your soul and leading you in the paths of righteousness for His name's sake? Are you getting out of life the blessings you should get out of it? If not why not? Is it your fault or is it the fault of God. Remember God is able and willing to do His part, if you are only willing to do yours.

The psalmist says: "Yea though I walk through the valley of the shadow of death I will fear no evil for Thou art with me; Thy rod and Thy staff they comfort me. Thou preparest a table before me in the presence of mine enemies; Thou anointest my head with oil; my cup runneth over. Surely goodness and mercy shall follow me all the days of my life and I shall dwell in the house of the Lord forever." What a sublime close. Who could utter such but the true child of God? It is a sweet message. Nothing to fear. The psalmist says, He walks with all quietness and confidence, knowing that God is able to care for him in the time of death.

My friends, such faith makes the valley of the shadow not a place of gloom, but a place of joy because the light of eternity lights up that valley for God's children. Then this might refer to the life we live in this world. This is a world of death. But we have the assurance that God is with us and will protect us. And when we reach this point we are perfectly satisfied. Because we are enjoying the feast God has prepared for His own people. We have reached the place where the Holy Spirit comes upon us with great power, and our cup runneth over with joy unspeakable and full of glory. Goodness and mercy simply mean God's blessings all the time and will be permitted to enjoy His presence forever.

Faith Is Asked of Us.

John Robertson the great Scotch preacher tells this story about a little boy wounded in the war of the rebellion. The surgeon examined him and said it was a hopeless case. A message was sent to his mother, and she hastened to the hopital. She reached the door and the doctor aid the boy was asleep and would sleep away into eternity. To disturb him would cause his death instantly. The mother said: "Doctor if you will permit me to go in. I promise you I will not speak to him, but I want to be with him when he dies." So they led her to the bedside of her dying boy. She kept her word and did not speak, but as she saw that her boy was in pain she reached out her hand and laid it on his brow. He did not open his eyes. She bent down and heard him as he whispered, "I knew you would come."

So my friends the children of God know that Jesus will come to them in the hour of death. The psalmist knew this and this is what he said. "Yea though I walk through the valley of the shadow of death I will fear no evil." It was this faith in God that prompted Dwight L. Moody, that man of God, to make this statement in speaking of the troubles in this life said, But, look at the other world. No death, no pain, no sorrow, no old age, no sickness, no bending forms, no dimmed eyes, no tears. But joy peace, love, happiness. And when he came to the valley of the shadow of death he said to his son, who was standing by his bedside, "Will, this is my triumph; this is my triumph; this is my coronation day. I have been looking forward to it for years." Then his face lit up, and he said, in a voice of joyful rapture, "It is beautiful. It is like a trance. If this is death, it is sweet. There is no valley here. God is calling me, and I must go." Then with great joy, he cried: "Dwight, Irene. I see the children's faces, referring to two little grandchildren God had taken from his life in the past year. Then turning to them, he said, 'give my love to all.' What a glorious scene, Some day the papers will read that Dwight L. Moody is dead, he said, "Don't you believe a word of it. At that moment I shall be more alive than I am now. I shall have gone up higher that is all." My friends may we be sensitive to the presence of our good shepherd and when we walk through the valley of death may we be able to say, "I will fear no evil."

CARPENTER—STUBER

Solomon P. Carpenter, of Carthage, and Miss Emma M. Stuber, of this city, were married last Monday in this city by Rev. H. D. Holmes, pastor of the State Street Methodist Church. The marriage was kept a secret by the happy couple until yesterday, when several of the bride's friends here discovered that a marriage license had been issued to Mr. Carpenter on Monday.

Mr. and Mrs. Carpenter were attended by Miss Ruth Willet and Holly M. Guernsey, both of this city. After a short wedding trip to New York city, they will make their home in Carthage.

SAMUELS—GORE.

Miss Grace Gore, of West Fourth street and F. E. Samuels, of West Broadway, were united in marriage on Monday, at the parsonage of the Congregational Church by the Rev. Charles Olmstead.

Going to the Garden Party

Design by Best & Co., New York.

GRAY pussy willow ruffles and georgette crape of the same tone give this dressy result. Tiers of distended ruffles alternating with plain panels and bustle puffs achieve the skirt, while the basque takes a V front and sleeves of the crape. This is a fetching frock for youth to don.

A very pretty neckpiece that can be made at home is fashioned of a wide, soft faille ribbon, edged with a fringe of ostrich fronds curled a little. This is worn rather tightly about the neck and fastened with a large flat folded shaped pump bow, outlined by the same feather fringe. This bow is worn at the back, the side or wherever it may be most becoming.

• • •

Flowers, artificial ones, are almost as much in fashion as they were a couple of seasons ago. They are, as everybody knows, much used on hats. They are used, too, on evening frocks, singly and in strands, and they are used on collars and capes and ruches.

ANNA MAY.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

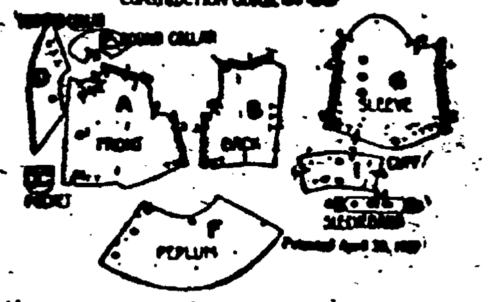
An Acceptable Negligee Design.

A comfortable and stylish dressing saque fashioned of sheer dimity and trimmed with embroidery.

This is not a fantastic dressing sacque, but it is an exceedingly dainty and serviceable one. One can foresee its comfort on hot days, if developed in plain dimity, with a bit of embroidery and lace added. The design may be made with square neck and finished with a circular peplum, or with V-shaped neck and a turn-down collar edged with lace. The simplicity of the embroidered design, however, appeals to the ultra-dainty woman. In medium size the sacque requires 3¾ yards 36-inch material and ⅞ yard lace insertion.

The first step to take in the construction of the sacque is to form a plait in the right front, turning under the front edge at notches and taking up a tuck on line of slot perforations near center-front; stitch both sides of box-plait ¾ inch from folded edges catch-stitch at center with tuck. Center-front is indicated by large "O" perforations in right front. Turn under front edge of left front 1½ inches for a hem. Close shoulder seam as notched and form tuck, creasing on line of slot perforations in front and back; stitch 1¼ inch from folded edge. Close underarm seam as notched. Gather lower edge of front and back between double "TT" perforations.

The center-front of the peplum is indicated by large "O" perforations, close center-back seam. Sew to lower edge of front and back, center-fronts and center-backs even, large "O" perforation at upper edge of peplum at underarm seam. Adjust belting 2 inches wide to position underneath waist; stitch lower edge of belting along the seam, joining the waist and peplum.



Close sleeve seam as notched. Gather lower edge of sleeve between double "TT" perforations. Turn under edge of cuff on slot perforations, lap to small "o" perforations, notches even, tack upper edge to position and finish for a closing. Sew to sleeve, as notched, small "o" perforation at seam of sleeve; and bring the folded edge of cuff to large "O" perforation in sleeve. Sew sleeve in armhole as notched, small "o" perforation at shoulder seam easing in any fulness.

Provision is made for the square neck, and it is easy to stitch a band of insertion about the edges for a finish. The embroidery design is worked on in satin stitch.

Pictorial Review Dressing Sacque, No. 6748. Sizes, 34 to 46 inches bust. Price, 15 cents. Embroidery No. 11004. Transfer pattern, 10 cents.

WALL COVERINGS.

What Kind of New Paper Will You Choose Now?

A WIDE RANGE THIS YEAR.

An Expert Tells How to Treat Walls and Colors So That Rooms Opening Into Each Other Give the Idea of Spaciousness and Harmony.

The day is already dawning when instruction in color values and house decoration will be a part of the course of study in every school. Then, and then only, will all of us be able to choose tasteful furnishings, restful walls and harmonious color schemes. Even if only a few artists be "born" all of us can be taught the principles of art and how to express it in the home.

Let us begin with a study of walls and wall coverings, because they are really the true framework of the room. They form the background for all pictures, ornaments, curtains and hangings. Therefore they must be chosen first if we are to have rooms that are restful and that also express best their relation to the windows and lighting.

We can be thankful that the days have almost gone when decorators offer us papers with climbing onions and interlocked rhubarb plants. Gone, indeed, are most of the medallion wall papers with their huge twelve inch repeating unit. We have today a selection from a wide class of more neutral papers in shades, such as putty, buff, sand, gray, etc., in which the variety is given not by the color, but by the texture, tiny stripe, dot or fleck in the grain of the paper itself.

While these neutral papers are not suitable or necessary in every room, it should be borne in mind—

That light colors make rooms appear larger.

That rooms opening into each other should not be papered with tones in violent contrast, but that similar or harmonious tones are best.

That long, narrow hallways and rooms with northern and eastern exposure are preferably treated with warm, light tones.

That light backgrounds with undecided pattern make the best surface on which to show off pictures, hangings and other furnishing.

Low ceilings will appear still lower if the wall space is broken by a frieze, plate rail, molding or other horizontal line which divides the space, so that it is best, particularly in our small rented homes or flats, to avoid papers or coverings with a break in the pattern near the ceiling or halfway down.

Horizontal stripes also make ceilings appear higher and are thus particularly suited to the small, low celled room. Papers with high gloss finishes, while attractive in bedrooms, are out of place and undignified for living or dining room or library. Everybody knows, but does not always follow the point, that warm, bright colors and tones are needed in "cool" rooms with north or eastern exposure, while those receiving southern and western sun can have their walls treated with the less heating colors and shades, particularly grays, blues and neutral tints.

Many fabric coverings for walls are on the market. In permanent homes they are most desirable because they do not mar, tear or show usage. The small rented bedroom should be tinted or painted for hygienic reasons, but in all rooms, whether fabric or paper covered, choice should be guided by means of light and art.

JUST FOR WEAR.

The Kind of a Hat That Has Good Style and Wearing Qualities.

This knockabout hat comes in the guise of a close turban set up in lisere navy blue straw. The high crown is

FOLIAGE A LA MODE.

wreathed with glossy green ivy leaves lined with white kid. Shining black berries peep out of the greenery, giving a modish touch.

Polishing a Range.

Stove polish when mixed with turpentine and applied in the usual manner is blacker, more glossy and more durable than when mixed with any other liquid. The turpentine prevents rust.

Rickrack Braid.

Of course you think of it as something old fashioned and out of date, but it is being revived again. As an edging one row of the braid is dainty and charming in its very simplicity.

VOTES IN CANADA

How Three Provinces Rapidly Got the Suffrage.

POLITICS AND TEMPERANCE.

1916 Brings Success to Canadian Women After Years of Indifference—No Speaking In the Streets Allowed, a Forum Is Demanded.

Three Canadian provinces have this year given complete provincial suffrage and eligibility to women. "How did the women of Canada get the vote so quickly?" is the question asked Miss Ines Perry of Toronto. "Suffrage was as dead as the much famed doornail all over Canada," said Miss Perry. "Trying to arouse public opinion was just like beating one's head against a stone wall. I suppose you don't know in the United States about the queer 'discrimination' we Canadians make against married women. Only widows and spinsters enjoy school suffrage in Quebec, and married women may not vote on tax questions in Ontario. In fact, the law rubs in its lack of confi-

MISS INES PERRY.

dence in married women in Ontario more than elsewhere, for it permits the husband of a woman who pays taxes to vote in her place and because of her tax qualification. In 1914 Toronto had a referendum on the question of the married women's right to vote, which showed two to one in favor, and, while the laws of Ontario are still stiffly opposed to suffrage, the demand for it is growing steadily. And the three powers that are shoving suffrage events right along in Canada are the temperance cause, the war and the wonderful woman of Canada, Mrs. Nelly McClung."

Miss Perry is a young, alert figure, full of life and energy. She, like many other Ontario suffragists, followed Lady Eaton into temperance manifestations. "Here also the war and temperance work and the suffragists worked together," explained Miss Perry, "for the war has pushed prohibition on as fast as it has pushed suffrage out into the light of day in the British colonies of North America. Yet when I asked Lady Eaton how she came to be so enthusiastic for temperance what do you think she told me? 'Just Billy Sunday; that's all.' Your Billy Sunday had preached his famous 'booze' sermon, and she had heard it. She was immensely impressed with what he said. It seems as if the grouping of so many motives into one and voicing them through such a wonderful woman as Mrs. McClung is what has brought the vote to the western Canadian provinces and has given us new hope in Ontario."

Miss Perry explained how she became a suffragist. "My sister and I were just taking a quiet stroll in London when we saw a poor little handful of about fifty suffragists being ridden down by more than a hundred police. It seemed so unfair to trample women down for what they honestly believed that it turned me into a strong suffragist that very day, and I came back to Canada to 'do my bit.' One of the things we are working for right now in Toronto is a people's forum. We can't speak in the streets there. One of our first speakers is to be Mr. Poultney Bigelow from your side of the boundary."

Pin Money.

Look about in the shops now to see what new utensils you desire this spring. Set aside whatever sum of money you can spend, be it counted in dollars or cents, and with it buy some utensils to make housework easier. Perhaps a strawberry huller will come in for your choice, with a pineapple eye remover too. Perhaps what you most desire will be an awning for some given window or porch that has heretofore always been too sunny. Whatever it is, shop for it wisely and get it if you can afford it.

Needlework Notes.

Fascinating workbags, made of Austrian handkerchiefs such as the peasants wear for headdresses, are being shown. The handkerchief is of a large size in cream white and has a border of purple plums and green leaves. The bags are half moon in shape and sixteen inches deep and are shirred on oblong wooden frames, which form the handles.

Smocking on Aprons.

Daintiness itself is an apron made of silk muslin, the fullness of which is confined by smocking instead of gathers. The smocking is arranged in five points, and a slight touch of color can be introduced by using a faint shade of blue or pink thread for the smocking.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

All Girls Like the Smock This Year.

The makers of junior fashions are doing wonderful things with the smock this season. As illustrated here, a white linen model is trimmed with plaid gingham.

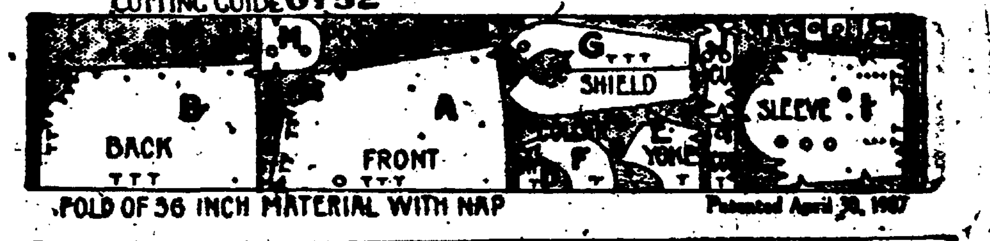
There is no more popular design than the smock with girls eligible for that awkward class known as junior. It is dressier in effect than the regulation middy blouse and seems to better justify the efforts to make it smart looking. A white linen smock with a dress of checked gingham or linen is the last word in both fashion and service. The model shown here is typical of the best smocks and is trimmed with the dress material. The collar and cuffs should be detachable so that they can be changed as often as desired. In medium size the smock, with which today's home dressmaking lesson deals particularly, requires 3 yards 36-inch material.

The home dressmaker who studies the cutting guide before she attempts to do anything with her material never makes a mistake, for the various sections of the pattern are placed upon it to the best possible advantage. Five sections, it will be shown, are placed on a lengthwise fold of the goods, the back, front, stay, yoke and collar. They are arranged one after the other, from left to right. The pocket is sandwiched between the back and front, on a lengthwise thread, near the selvage edge. The shield, cuff, sleeve and back and sleeve stays are also placed on a lengthwise thread of material.

If smocking is used, place it between the double "T" perforations.

Smocking is not difficult to do, and it is one of the most fashionable trimmings of the season. Not only does it appear on junior frocks, but for those for grown-ups as well.

Many beautiful plaids are shown among the new ginghams. Red seems to be a popular color and is effective combined with brown, blue, black and green. At least three colors are mingled in the latest checks and plaids.



Pictorial Review Smock No. 6752. Sizes, 8 to 16 years. Price, 15 cents. Dress No. 6384. Sizes, 4 to 18 years. Price, 15 cents.

TODAY'S FASHION NOTE

A big coat for general wear is absolutely necessary in mid July and mid August. Too warm? certainly not. It is fashioned from the light weight woolen materials designed for summer use, so that they are always comfortable. Perhaps it would be better to say that they are never uncomfortable. Orange and white checked summer serge trimmed with brown silk makes this coat. In medium size the design requires 4 yards 54-inch material.

Pictorial Review Coat No. 6657. Sizes, 34 to 44 inches bust. Price, 15 cents. Skirt No. 6640. Sizes, 24 to 36 inches waist. Price 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

BLUEFISH A L'ICARIENNE.—Scale and score two pounds of bluefish; cut into portions; place in a well buttered baking dish, moistening with four tablespoonfuls mushroom ketchup, one-half glass claret and strained juice of one-half orange. Season with one-fourth teaspoonful salt, a pinch of cayenne pepper and a saltspoonful powdered mace, baking in a moderately heated oven for thirty minutes. When cooked lift it carefully out, arranging it on a hot fish platter; pour the gravy into a small saucepan, adding one-half ounce finely minced cooked smoked beef tongue, six chopped olives and thickening with one tablespoonful flour. Boil for two minutes and then pour over the fish, garnishing with a border of mashed potatoes pressed through a pastry tube.

Seaqued.—Scale, clean and remove tails, fins and heads from half a dozen fresh herring. Season with a tablespoonful mustard, one of ginger, one of pepper, one of cloves, one of salt, a grated lemon peel, one-half cupful vinegar, a tablespoonful butter. Fill deep earthen dish, cover closely and bake till herring completely loses shape. This gives an excellent relish to a dinner.

Lobster Espanol (in the chafing dish).—Split down the back two medium sized lobsters, removing all the meat and cutting into pieces one inch in length. Place in the upper part of the chafing dish (dispensing with the hot water pan) a gill of olive oil, adding the lobster when the oil begins to bubble. Shake the dish for a moment or two and then stir in one small onion, peeled and finely chopped, one small tomato, cut into dice; one chopped sweet green pepper and half a clove of garlic. Simmer for five minutes, stirring constantly, seasoning with a pinch of paprika and one saltspoonful of salt. Reduce for two minutes longer before adding one tablespoonful of Madeira and a dash of tomato ketchup. Now cover the chafing dish, place under the hot water pan and cook five minutes, serving on rounds of hot buttered toast.

Annie Thompson.

ADRESS X, EVENING TIMES OFFICE

BANDIT KILLED; BORDER CONFERENCE TOMORROW

Field Headquarters near Namaquita, Mexico, May 25 via radio to Columbus, N. M., May 26—Candelelcerentes was killed by American troopers near Cruces to-day.

Another border conference will be staged if General Pershing is willing. The Mexican party to the proposed discussion is General Gabriel Gavira, commanding general of the forces of the de facto government of Mexico on the Chihuahua frontier. The officially announced purpose of the meeting between the two generals is "the avoidance of friction" in the joint patrol of the bandit-overrun border land.

A telegram addressed to General Pershing, "Wherever he may be found," was dispatched by General Gavira to-day. The commander of the Juarez garrison said in explanation of his message that his sole object in suggesting to General Pershing that they confer was to avoid friction between the American and Carranzista patrols.

If, however, General Pershing were willing to take up with him the general subject of withdrawal of the American soldiers from Mexico General Gavira said nothing would give him a greater pleasure than to meet General Pershing half way.

The telegram from General Gavira to General Pershing was sent this morning. No reply had been received to-night. General Gavira said he did not expect to receive a reply for a day or two.

"In ignorance," said General Gavira this afternoon, "of just where General Pershing has established his headquarters I did not know where to address my invitation. Consequently, I sent it to one of our commanders near Casas Grandes, requesting him to forward it with the least possible delay to the American commanding officer."

NOTABLES IN THE LIMELIGHT

Colonel Frederick W. Sibley, United States Army.

Colonel Frederick W. Sibley of the Fourteenth cavalry, who was sent in pursuit of the Mexican bandits who recently raided the little settlement of Glen Springs, Tex., has for some time been in command of Fort Clark, Tex. With him on his expedition Colonel Sibley took two squadrons of the Fourteenth and a machine gun troop.

A native of Texas, Colonel Sibley was graduated from the West Point Military academy in 1874 and was appointed a second lieutenant in the Second cavalry, since which time he has had a varied experience in the service of Uncle Sam. For ten years he fought against the Indians in the Rocky mountains and on the plains, participating in nearly all of General Crook's engagements with the Sioux and Cheyennes. For gallantry in action on the Little Big Horn in July, 1876, he was brevetted, and later "for distinguished gallantry in action against Crazy Horse's camp" on Powder river, Mont., March 17, 1876, was recommended for a medal of honor.

During the war with Spain Colonel Sibley commanded the headquarters guard of the Fourth army corps under Major General John Coppinger. In 1903 he was adjutant general of the department of Luzon, Philippines, and in 1905 was in command of the troops that suppressed the ladrones of Cavite and Batangas provinces, returning invalided to the United States. He was selected for detail to the general staff in 1908, but declined. From 1909 to 1911 he was commandant of cadets at West Point.

To Nominate President Wilson.

When the Democratic national convention meets in St. Louis next June the honor of nominating President Woodrow Wilson as the standard bearer of his party will probably fall on Governor James F. Fielder of New Jersey.

Photo by American Press Association.

JAMES F. FIELDER.

This was agreed upon at a meeting of national committeemen at Trenton. Attorney General J. W. Wescott of New Jersey nominated the president for his first term and is said to be Mr. Wilson's choice for the honor again.

When President Wilson was elected in 1912 he resigned as chief executive of the state, and Governor Fielder, who was then president of the senate, by virtue of his office became acting governor. Under the laws of New Jersey the president of the senate automatically becomes governor of the state either upon the resignation or the disability of the elected governor.

Governor Fielder is a native of New Jersey, forty-nine years old, a lawyer by profession and for the last twelve years has been active in state politics. He was educated in the public schools and was admitted to the bar in 1888 and four years later was made counselor. He went to the state assembly in 1903 and in 1907 was elected to the senate. There he remained until he succeeded President Wilson as acting governor. He was later elected governor.

LOCAL STREET MARKERS MAY BE PLACED

Within the next few days, one of the directors of the Chamber of Commerce intends to bring the matter of new signs for the streets of the city before that organization, in an effort to secure an appropriation from the city treasury for new signs all over the city. The city streets are nameless for the most part, at present, and strangers have a great deal of difficulty in finding their way about the town. Most of the signs in use at present are almost illegible because of age, and several of the most prominent thoroughfares have no designating signs whatever.

MEETING OF CREDITORS WAS HELD YESTERDAY

A meeting of the creditors of Harry A. Allen, of this city, bankrupt, was held in Oswego yesterday before Referee Avery S. Wright. It is very probable that some satisfactory settlement will be arranged between the creditors and the local merchant, whereby they will receive the greater portion of their claims.

MAILMAN RICH IS ELECTED AS DELEGATE

Raymond G. Rich, of Hannibal street, has been elected a delegate from the Fulton post office to the State Convention of Letter-Carriers, which will be held in Oneonta, Decoration day. Mr. Rich recently fell from his wheel while returning home from work, but is now able to be about again.

AUSTRIANS CAPTURE 25,000 IN 11 DAYS

London. Two great Austrian armies are surging in an apparently unending stream toward the Adriatic Sea, with Venice and Verona as their objectives.

With 300,000 men and 2,000 guns they are hammering on the Italian lines eight miles across the border line of Italy.

While it is claimed that the intensity of the Austrian attack has, for the moment, been diminished, it is officially admitted in Rome that the situation is "serious." During the last eleven days of fighting, the Austrians claim to have taken 25,000 prisoners.

Italian officers captured by the Austrians declare, say their captors, that the Italian soldiers have been completely unnerved by the fury of the Austrian bombardment. The infantry charges that followed the bombardment was so fierce and unexpected that the Italians were wholly unable to withstand them.

BIG ATHLETES AT HARVARD

(By United Press)

Cambridge, Mass.—Harvard stadium's great grey horseshoe encircled the mightiest and the best of American track and field athletes to-day, when more than 350 stars from twenty-four colleges and universities met for the trial events of the forty-first annual intercollegiate championships.

Probably no previous meeting of the I. A. A. A. A. has brought forth such a galaxy of sport stars as will listen for the starter's pistol or compete in the track and field events here to-day and to-morrow.

With record breaking performers here from the Pacific coast and the middle states, the meet should be more closely contested than it was last year, and some dark horse may walk away with a leg of the trophy.

The feature of the meet, scheduled as the last event to-morrow, will be the last undergraduate meeting of Captain Ted Meredith of the University of Pennsylvania and Captain Bill Bingham, of Harvard in the half mile.

To-morrow each man will don his spikes for his college for the last time. Both men have figured in some extraordinary athletic performances in the season now closing and each will run his heart out to win this climax event.

Meredith's time of 1:52 1-3(made in the Cornell meet, makes him a slight favorite, but Bingham will fight to the last inch; and no greater fighter than the Harvard leader ever trod the cinder path.

The Pacific coast stars were the center of atraction here to-day, for these California athletes have some record breaking performances to their credit.

In the hurdles and five field events, the westerners look mighty good. Drew, their star sprinter, is ineligible and will not enter.

Trials in the shorter runs and field events were held ta-day, so that tomorrow only the country's greatest athletes will be left in the competition.

Over 1,200 men were entered from the different colleges, but less than one third of them reported for actual competition.

Among the prominent individual entrants who have earned intercollegiate, National or International honors on field and track are:

Cornell—Shiverick, Shelton, Windnagle, Potter, Hoffmire, Starr, Richards, Feas and McCutcheon.

Leland Stanford—Murray, Lynn, Aupperle, House, Lachmund, Wilcox, Sisson and Caughey.

Pennsylvania—Kauffman, Meredith, Lennon, Berry, Newstetter, Dorizas.

Harvard—Teschner, Minot, Wilcox, Bingham, Johnstone and Haydock.

Michigan—Smith, O'Brien, Ufer, Carroll, Cattlett and Cross.

California—Preble, Baker, Nichols, Gildersleeve and Richardson.

Yale—Treadway, Overon, Leisenring, Oler.

Princeton—Moore, Barrett and Floto.

Dartmouth—Worthington and Miner.

Syracuse—Curtiss and White.

Penn State—Hammitt and Brown.

AT THE QUIRK TODAY AND SATURDAY

One of the most beautiful and remarkable posing acts ever seen in this city is now headlining the bill at the Quirk. It is remarkable, not only for the grace and unusual character of the poses; but also for the quick changes, one picture being shown immediately after another, with only enough time between for the raising and lowering of the curtain. It is Mlle. Lotta and her company, who appear in the exquisite pictures, but the manager of the act is William Austin, Mlle. Lotta's husband, and a veteran producer of acts of this kind. He has been in this business for 30 years, but says that he has not been in Columbus for about a quarter of a century, as he has chiefly been engaged in the East. Old-timers will remember the team of William and Ida Austin, who were among the first to give living pictures, and the very first to show silver and bronze models. Mr. Austin comes of a family, of showmen (the aerial Austins of circus fame were his forbears), and so it is not surprising that he has worked out the problems of posing acts to a high point of efficiency. One of his best devices is a sliding stage, which makes the quick change possible.

There are really two of these small stages. While a picture is being shown to the audience on one of them the other one is being prapared. When the curtain goes down the stage hands simply shove the two stages along, the curtain immediately rises on the new picture and another picture is at once set on the first stafe. It moves like clockwork, with the capable Mr. Austin constantly at his electrical switchboard, regulating the elaborate system of lights which are the beauty of the pictures. There are some exquisite representations of statuary among the poses. Mr. Austin's sliding stages are probably worked much the same as the sliding stages of the modern German stage, which are used there in dramas, but he developed them himself.

Prominent among the others on the bill ore Dillini, impersonator; E. T. Alevander, comedy oil painting, and Harry Lamont and Girlie, singing, dancing duo.

French Retake Nine Miles of River Bank From Prince's Army

Paris—French troops recaptured a large portion of the banks along the river Cumieres for a distance of nine miles north west of Verdun, according to bulletins received at the War Office this morning.

* * *

London—The Crown Prince continues to press back the French south of Fort Douaumont, on the east of the Meuse, but General Nivile has developed a sudden offensive in the Haudremont section.

Altogether the day was not so distinctively a German rush as yesterday and the day before.

The Germans crossed the Douaumont ravine south of the ruined fort last night or early this morning—the Berlin official report is not clear on this—and there captured an additional 600 prisoners and 12 machine guns. Late to-day the Germans attempted to clear out more French trenches on the same region, but this effort, according to the Paris official report, was "completely repulsed."

While these assaults of the German infantry were going on the French swept quickly between the Haudrement Wood and Thaumont and succeeded in recapturing a trench which the Germans had taken twenty-four hours earlier.

They succeeded also in repulsing a strong infantry attack on the French trenches on the western and southwestern slopes of Dead Man Hill.

KAISER REMOVES VON HINDENBURG'S VETS.

London—The Kaiser is stripping Von Hindenburg's lines in the Riga section of every available man to assist in conducting the Verdun defensive, according to advices received by the Minister of War to-day.

* * *

London—From the Valley of the Adige to the Sugana, nearly forty miles away, the Austrians and Italian armies of the Trentino are fighting as fiercely as ever.

Through these valleys and over the passes the armies of the Austrian Crown Prince are advancing, according to the Rome official report, "in dense infantry masses." The losses are, of course prodigious and the Italian defense is deadly, but the advance down the Vicauza plains seem to go on practically unchecked.

The Austrians, for instance, were halted yesterday in a huge infantry attack in the Lagarina Valley, fifteen miles south of Roueress but to the east, between Posina and Astico, on the highroad to Vicenza, the Italians were driven further back.

Still further east, near Asiago, a battle has raged all day, and is still in progress. In the Sugana Valley, at the extreme eastern end of the fighting line, the Austrians are delivering attack after attack on Mount Cuaron which guards the Brentes River.

At Mone Mazzio, which occupies the centre of the line, the Italians, according to a Rome dispatch to the Yondon Daily Telegraph, have assumed a definite defensive. Some positions there, the dispatch says, were lost and retaken four times and at last abandoned.

DEFECTIVE STOVEPIPE CAUSED SLIGHT FIRE

A defective stove-pipe in the kitchen of a dwelling occupied by Joe Shapiro, the junk-dealer, at the corner of North 5th and Seward streets, started a blize in the ceiling of the room this morning shortly before eight o'clock. The fife department was called and made a quick run to the place, where the use of chemicals soon extinguished the flames. The damage sustained was slight, and is covered by insurance.

WEATHER FORECAST.

Cloudy tonight and Sunday. Probably thunder showers.

EVENING TIMES PLANT TO HAVE MOVING DAY

Between Monday and June 1, the office and printing plant of the Fulton Evening Times will be moved from its present location into the Grange building, to the store formerly occupied by the Warner Grocery. Mr. Dwight J. Robbins, the new owner of this paper, completed arrangements for the rental of the property yesterday. The editorial rooms and job printing plant will occupy the first floor, while the large press will be installed in the basement. This is only the first of a series of improvements planned by the new owner in his desire to continue to give the people of this city a live, progressive newspaper.

FULTON MADE SWEETS AND GOLD SHOWERED UPON PEACOCK PARTY

The delegation from Prayer-Meeting Districts 24 to 31 inclusive, which attended the evangelistic services at the tabernacle last night, numbered 700 people, and made one of the finest showings from every standpoint of any organization or group which has turned out in a body to hear Luther Knox Peacock preach. The procession was led by 100 little girls, who were followed by 100 small boys. The adults of the districts, bearing banners of every description brought up the rear, and as the delegation marched around the auditorium they sang, "He Included Me." A yell for the evangelistic party was given before the company took their seats, and a song written for the occasion was sung.

Last night was "Presentation Night," and all the members of the Peacock party, even to little Baby Davidson, received tokens of esteem and appreciation from members of the tabernacle and other sources. Dr. Knapp presented Chorister Warth and Mr. Davidson, the pianist, with envelopes, containing gold pieces. Dr. Simpson, in behalf of the Peter's Chocolate Works, presented every member of the Peacock party including the ladies of the party and Baby Davidson, with large packages of Peter's famous chocolate, "Made in Fulton." Harry Stout, chief usher, presented Messrs. Peacock, Warth and Davidson with scarf pins and the ladies of the party with lavallieres, on behalf of the ushers of the tabernacle. Baby Davidson was given a handsome gold locket, which she may prize in after years as a memento of her visit in Fulton. Mr. Peacock thanked all of the donors for their gifts in a short appropriate speech.

The evangelist's sermon last night was on the subject, "I Have Sinned Against the Lord," and was an eloquent plea that the last days of the campaign be the occasion of greater fervor and zeal on the part of those interested, that the number of souls led to the light might greatly increase. Eighty-two persons were moved by his appeal to a renunciation of sin, and the number of trail-hitters reached the total of 2,993.

To-morrow the campaign will close, with three services, morning afternoon and evening. No collections have been taken up for the past two weeks, as all the expenses of the tabernacle were defrayed some time ago. To-morrow the collections will be in the nature of a free-will offering to the Peacock party, and the money received will be the evangelist's only recompense for the work he has done here. Rev. F. L. Darling addressed the audience last evening on the free will offering and asked that it be as generous as possible, in view of the amount of benefit derived by the people of this city from the work of Mr. Peacock.

SINNING: 2 SAM. 12:13

2 Samuel 12:13—"David said unto Nathan, I have sinned against the Lord. And Nathan said unto David, The Lord also hath put away thy sin."

This text forms a part of one of the saddest stories that has ever been written. It is one of the saddest stories that can be found in the Bible or in any other book. The saddest story that has ever been written by any pen. It is the story of a man who had a great opportunity. The story of a man who had a chance to make a great success out of life. It is the story of a man whom God and man looked upon with great favor. The story of a man who had sinned not only against himself, against his fellow man, but against God. He felt that no one had any business to interfere with him in any way. He had no idea that he could do just as he pleased. But when the Lord took a hand, it made all the difference in the world. If man had written the Bible, this story would never have been recorded. But one of the best evidences that the Bible is the word of God is this story.

God always tells the truth, the whole truth and nothing but the truth. Men try to shield their companions in sin. They try to give ecuses for the shortcomings of their loved ones. Bu when God writes about a man, He tells the whole story. God is no respector of persons. God will reveal to the world the sins of Kings just the same as of peasants. When God writes the history of man's life, He puts it all in. He tells us Noah was drunk. He tells us David committed adultery. He tells us that Peter denied Jesus. He tells us that Judas betrayed Christ. He tells us that Ananias and Sapphira lied about their poverty. He also tells us that Pilate was a moral and a spiritual coward. God never leaves anything out.

This story is sad because it reveals to us that David was a deceitful man in every sense of the word. It is a mighty sad thing when people discover that their loved ones and friends are deceitful. Sad when a wife discovers that her husband has been untrue, or sad when a husband discovers that his wife is deceitful. Sad when parents deceive their children or when children deceive their parents. Sad to think that people get so low down as to lose all respect for themselves and for every other person. David reached the place where he had lost all his self-respect. He made a sad mistake when he sinned. Any man or woman is foolish to defile the temple of God. David had defiled the temple of God. When he realized what he had done, he repented of his sin and said, I have sinned against the Lord. and Nathan said unto David, The Lord also hath put away thy sin. David's sin not only hurt him, but it hurt his Kingdom, and every person connected with him in every way, but he was man enough to acknowledge

(Continued on Page Four)

Gen. Pershing Must Not Talk Withdrawal of Troops at Conference

Washington—General Funston has instructed General Pershing not to discuss the withdrawal of American troops from Mexico in the coming conference with Carranza leaders at Chihuahua City, it was learned at the War Department to-day.

* * *

El Paso—Three Americans who came up to the border to-day from Chihuahua City predicted the Carranzista armies would be fighting the United States punitive expedition within thirty days.

They base their prediction on the unprecedented troop arrivals in Chihuahua City, on the elaborate preparations they saw being made to equip Trevino's army and on the plentiful fight talk they heard during their ten days' stay in Chihuahua City.

The returning Americans brought this information:

Forty-seven troop trains have jammed into Chihuahua City in the last ten days.

These trains have transported approximately 30,000 troops from the south to the north.

Four trains of artillery have accompanied the rush of Carranzista troops to the frontier. One of the arriving Americans said he personally counted fifty-six pieces of artillery on incoming trains. He estimated the equipment of artillery in Trevino's command at close to one hundred pieces.

"I had never dreamed before," he said, "there was all that artillery in Merico. But I saw enough of it with my own eyes to be convinced."

Chihuahua City was greatly excited over the situation said the Americans.

Last Minute News

(By United Press.)

Paris—Lieutenant William Thaw and Lieutenant Kiffin Brockwell, American aviators with the French flying corps, who were wounded near Verdun while attacking a German flying squadron, have been brought to Paris to recuperate.

* * *

Copenhagen—Ambassador Gerard believes peace proposals of a definite form will be presented in a few months, if not in a few weeks, according to advices received here from Berlin.

* * *

Paris—General Gallieni, until recently the French Minister of War, and generally proclaimed as the "savior of Paris" at the time of the attempted German invasion, died here to-day following a long illness.

* * *

Paris—The Germans have lost 300,000 men at Verdun and the French 120,000, according to information published by a Geneva newspaper to-day.

* * *

Petrograd—The United States faces great difficulty in the negotiations for a new commercial treaty with Russia to replace the treaty made during the Taft administration on account of the sentiment of the Jewish people and the position taken by them.

* * *

Boston—A broken wheel on a west bound freight caused a bad spill near Niverville N. Y., on the Boston & Albany road this morning, according to information received at the terminal here this morning.

* * *

New York—Both sides rested in the trial of Dr. Waite this morning at eleven o'clock. The case will be submitted to the jury to-day.

* * *

Buffalo—Miss Dorothy Dressert, 19, a cashier in a drug store at Main and Ferry streets, was shot dead by a man unknown to the police this morning. The man made his escape through the rear door of the store and into an alley at the end of which an auto was in waiting. He entered the car and was driven away at a rapid pace.

* * *

Washington—Colonel House has no intention of visiting Europe in the interest of peace negotiations, it was reported to the United Press this morning.

* * *

New York—Fourteen persons were injured in a collision on the Long Island railroad between a passenger train and a train of empty freight cars at Wading River this morning.

* * *

Mexico City—General Hill, in command of the troops here, has notified all merchants to at once cease charging exorbitant prices for food stuffs.

HIT OR MISS---MOSTLY MISS

The best current thought of many minds is embodied in the garbage disposal problem. It is here, there and everywhere. Somewhat unfortunately, though necessarily, the question seems to be neglected in this city, and yet figuratively speaking it should be the creature of of the day. Emphasis should be laid upon it until there is such an outburst of enthusiasm, or indignation, whichever way one chooses to look upon the problem, that nothing short of a war-locked condition could stop the movement.

The garbage question of Fulton is a serious question. It is paramount almost to any other question, because it affects the welfare and pocketbooks of a majority of the people. As it is now practiced it is a public scandal. Not many months ago its acuteness was brought to the attention of the administration by a citizen who suggested a remedy, but like too many other situations the remedy died of inanition and the corpse was not accorded as much as a decent burial.

The remedy suggested was one that would save the householder from paying exorbitant fees for having garbage removed, by adding to the city budget a sum sufficient to provide for removal at large. This was a straightforward business proposition, but no results are recorded in its favor, and in the meantime we are enduring a travesty on what is commonly called a garbage collection system.

It is all very well to boast and pad ourselves with the belief that "Fulton is first, last and all the time," provided we do not explore other cities of the size of Fulton, with its resources; and provided we do not take into consideration that some of those cities have efficient garbage collection; yes, and more than that, ash collection as well.

Mayor Lewis is giving the city an efficient administration, but if he can solve the garbage and ash problem he will be entitled to the gratitude of the present and future generation; and what is more to the point, he will be entitled to the support of every right-thinking person in his efforts to do so. The mayor is entitled to suggestions and if enough of them are not forthcoming he should call for more. The garbage problem is not for one or two to solve; it should call for the broadest deliberation. The best system will in the end be the cheapest—the hit or miss, collect-when-convenient, practice as we see it, should be awarded the grand prize.

THE CANNER AND REFORMER

Once upon a time a reformer and a Canner chanced to meet in a street of the city. Being old acquaintances, they repaired to an inn, and sat down there to talk over divers things.

"I think there should be a law in this state restricting the hours of labor, particularly of women and children," said the Reformer.

"Quite right," said the Canner, spreading out his hands. "Woman as the poet has said, 'is the noblest work of God.' Besides such a law would undoubtedly be in line with the most liberal modern thought of which, in my humble way, I have always been a disciple."

"What would you say to eight hours a day?" asked the Reformer.

"All right as an ideal," replied the canner, "but wholly impracticable. Make it nine hours. You and I are practical men."

Wishing to be entirely fair the Reformer accepted the Canner's suggestion, and agreed to compromise. Forthwith he called for ink and a pen, and wrote a labor law for the state wherein it is declared that eight hours shall in general constitute a legal day's work, and that no woman shall work in any factory for more than nine hours a day (all of which will be found in Section 3 and Section 77 of the Labor Law).

When he had finished inditing the law, the Reformer showed the draft to his friend.

"Pretty good," said the Canner. "But of course you will have to make exceptions. In the rigid form in which you have drawn it, such a law would work great hardship on many worthy enterprises. I hesitate to speak of myself, but I do not mind telling you that this law would put me out of business. You should make a special exception in the case of the canneries, and let them work their women 10 hours a day. Come, now, you and I are practical men."

But the Reformer demurred, for he was loath to make any special exemptions even for one so worthy and progressive as his friend the Canner. However, the Canner explained in great detail the evils of rigidity, and pointed out in ways which the Reformer found himself unable to controvert, that Flexibility is the Spice of Law. So with some misgivings, but with a desire not to work undue hardship on any man, the Reformer agreed to grant a special exemption to canners permitting them in the Summer to work their women 10 hours a day (and the same will be found in Section 78 of the Labor Law).

"I perceive that you are a man of parts and discretion," said the Canner, when he leaned over his shoulder and saw what his friend had done. "You are a person of Common-Sense, even after my own heart. There is just one little thing more. Not only is the business in which I am engaged seasonal, but there is a certain time, between June 25 and August 15, when we are rushed to death. We are not responsible. God made the peas and the beans and the tomatoes, and it isn't our fault that He should have decreed that they should all ripen in the middle of the Summer. Let us work our women eleven hours a day when the rush is on. The work is healthful. It will do them good. You and I have always been practical men."

And the Reformer sighed, and amended his bill. (An inquisitive person will find the amendment, permitting canners to work their women at the weekly rate of eleven hours a day, in the third subdivision of Section 78 of the Labor law.)

And the Canner arose and took up his hat to depart. And as he stood in the doorway, he bethought himself and spoke as follows:

"Oh, by the way, I forgot. You haven't provided for emergencies. While God in His infinite wisdom has so disposed the seasons as to make it necessary for us to work our women 11 hours a day much of the time in the Summer—I am glad to see that you, being a man of sense, have recognized our obligations to observe the laws of nature in this regard—there are certain days when 11 hours are not enough for our just needs. The little tomatoes ripen quickly. They must not be allowed to rot in the fields for lack of women to can them. Permit us to work 12 hours a day in emergencies. You and I are prac——"

But before he could finish his remarks, whatever their purport might have been, the Canner found himself alone and dishevelled in the gutter of the city street. And as he arose out of the mud he said to himself:

"Lo! here is a disappointing thing. I had believed the man was my friend, and a person of common sense. I had thought that he would be willing to co-operate with me. And behold, it turns out that he is nothing but a fool reformer, even a Lunatic Fringe."

And there came into the mind of the Canner an idea. Forthwith, he bought a dark gray suit with swallow tails, and he scrubbed his hands until they were white, and he handed all his cigars to a friend, and he took off his diamond stick-pin and gave it in charge to his wife, and he betook himself to the Capitol, and he stook before the office of the telegraph company in the lobby and sent sheaves of telegrams, and he said to himself:

"Now I am a reformer."

Thereupon a Special Committee was appointed by the Legislature to draft amendments to the Labor Law. And the committee brought in its report, and drew up a bill hereon, which was heralded as a reform measure. And when the bill was passed by the Legislature, it was found to contain much matter, but little substance. And lo, there was tucked away in the midst thereof a single paragraph, wherein it was provided that "in emergencies" females of 18 years and upwards might be employed in canning establishments for 12 hours a day.

This is the Argetsinger Bill that now awaits Governor Whitman's signature—or his veto.

Ed. Note—Governor Whitman vetoed the bill.—N. Y. Evening Post.

Rebuttal.

Employer—How dare you tell me you can't live on your salary? You haven't a car, have you? Employee—No, sir. Employer—Sufficient! Every fellow who really can't live on his salary has!—New York Globe.

And Elsa Was Only Seven.

"Don't you think little Elsa gets more and more like me?"

"Certainly! Soon we shan't be able to distinguish the difference between you. She grows older, and you grow younger."—Fliegende Blaetter.

LITTLE TALKS ON THRIFT

By S. W. STRAUS

President American Society for Thrift

No way is so calculated to teach a child habits of industry and the value of money as to make him earn money himself. There are many ways in which a child may earn money, and gardening is one of the most popular and healthful ones. One of the best plans has been organized in Chattanooga, Tenn., for starting school and home gardens. It embraces federal, state, city and local association agencies in the work. Similar work is being done in thirty-two American cities this year through a special appropriation of Congress made in 1915.

It is the idea of those back of the plan to keep the children occupied with this work after school hours and during the long vacation period. A special instructor who knows gardening both from the practical and scientific standpoints is employed. He teaches gardening in school hours and afterwards, and also assists in securing the use of grounds near the homes of the children.

A new source for national thrift is being advocated in Europe to curtail governmental expenses by adopting a franking system and abolishing the postage stamp. Germany is now considering this change, which is already in use in Bavaria and New Zealand, and when it goes into effect Germany will save nearly $25,000,000 a year.

The franking machine by a single operation would not only imprint the letter with a device indicating that the postal charges are prepaid but would also put on the postmark and obviate the necessity of using the canceling machine.

Thrift of time is one of the essentials of success. So decided Wendell Sooy, a former newsboy, who is now a student in the University of Pennsylvania through his own efforts. He has acquired distinction in mathematics and seems destined to a successful career.

Sooy began to earn his living by selling newspapers, and by that method worked his way through high school. He completed the usual four years college course in three years, and is now a graduate student, working for a degree of Ph. D.

Such students as this promising mathematician are living examples of what the thrift of time can accomplish, united with a positive desire to succeed.

Long Courtships.

Bohemia is the country of long courtships. In no other part of the world are they so abnormally drawn out. It is not rare to hear of engagements which have lasted fifteen or twenty years.

Superficial Impression.

"That man looks as if he had something on his mind."

"Yes," replied Miss Cayenne, "but his conversation doesn't sound that way. He is a walking optical illusion."—Washington Star.

FOR THE CHILDREN

A Sleepy Time Story About a Very Remarkable Bird.

WAR EAGLE OF THE SIXTIES.

About a Baby Camel Which Was Born in a Circus and Nursed on a Bottle. Many Interesting and Amusing Things For Little Folk.

As Memorial day will soon be here, Uncle Ben told the children this story about

AN AMERICAN EAGLE.

The eagle has always been the emblem of power and courage. It is pictured in many ways, the most popular way being spread out. This is called the spread eagle.

The United States in 1785 adopted the bald eagle, its wings displayed, as the national emblem. You know that sailors and soldiers always make a pet of something and take it with them on their trips. Well, in the civil war the Wisconsin soldiers took with them as their mascot a young eagle.

It is very hard to get an eagle from its nest, for the nests are usually very high up and in lonely places. An Indian once managed to steal a very young eagle from its nest, and he sold it to a soldier. The soldier named it "Abe," for he intended to present the bird to Abraham Lincoln when the war closed. The soldiers all made a great fuss over this bird. At mustering in they decorated him with red, white and blue ribbons, tying the colors around its neck and putting an immense rosette on its breast. The color bearer, the tallest man in the regiment, carried "Abe" on a staff, which was placed a little above the colors.

When any orders were given the colors and the eagle were always first in place. It would sit very still and look from side to side to see if everything was all right. When battles were being fought it would scream and flap its wings as if to cheer the soldiers. It seemed to understand all the orders given to the men.

Once when the men were ordered to lie on the ground it flew down and stretched flat beside the soldiers. When they got up it flew to the top of its perch again, so the story goes.

It went through twenty-two battles and thirty skirmishes and was wounded three times.

When the war was over it traveled all over the country and received as much homage as a great man. A veteran was detailed to take care of it and was well paid for doing so.

The bird died in 1881, and its skin was stuffed and put in the state capitol. But it was later burned in a great fire.

The Common Hen.

When you come right down to natural history facts there is no beast or bird about which a boy or girl knows more than about the common barnyard hen, which is a very industrious individual. But there may be some boys and girls who do not know that the hen and her male companion, the rooster, came originally from Asia. In the jungles of India they used to roam wild and were great fighters. When a couple of them engaged in battle the one that was victorious would shout it out with loud crowing.

There is also a negro variety that has not only black feathers, but a black skin.

You no doubt have seen the Cochins that came originally from China, and you may have heard or read that the Greeks and Romans and the Egyptians thought a great deal of the hen.

A Valuable Tree.

Whittier, in Los Angeles county, can perhaps claim the most valuable fruit tree in California. It is an avocado (alligator pear) and is insured against wind and fire by Lloyd's of London to the amount of $30,000. This tree in 1914 produced 3,000 pears, which averaged the grower 50 cents each; it also produced $1,500 worth of bud wood, making a total production of $3,000 for the year.

A Menagerie Infant.

Not long ago the menagerie of a great big circus received an addition that was hailed with delight by the circus folks. It was a baby camel,

Photo by American Press Association.

BABY CAMEL.

a cute and awkward little fellow, covered with soft brown hair. Sad to say, the baby's mother was unable to nurse him, so the kind hearted keeper fitted a rubber nipple on the neck of a bottle, and little Mr. Camel soon learned how to take his meals.

No Cause For Worry.

Painter (to his servant)—Now, carry this picture to the exhibition gallery, but be careful, for the paint is not quite dry yet. Servant—Oh, that's all right. I'll put on an old coat.—Fliegende Blatter.

Days You'll Never Forget

METHODISTS TO RAISE FUNDS

$10,000,000 the Mark Set by Conference ---- Endowment for Local Preachers Given Hearty Approval.

Saratoga Springs—Authorization of a campaign to raise $10,000,000 for the pension fund for retired Methodist ministers and their widows, was given to-day by the general conference which adopted a resolution continuing an effort which was begun eight years ago to secure an adequate competence for the clergy when they are too old for active work.

Four years ago the goal was set at $5,000,000, but this amount was found insufficient. Plans were adopted designed to provide the necessary funds to finance the campaign.

Authority was given to annual conferences to create a permanent endowment fund for local preachers.

The following corresponding secretaries of church boards were elected:

Foreign Missions—S. Earl Taylor and Frank M. North, New York city.

Sunday Schools—Edgar Blake, Chicago.

Conference Claimants—Joseph B. Hingley, Chicago.

Epworth League—Wilber F. Sheridan, Chicago.

Freedman"s Aid—Patrick J. Mavetty, and I. Garland Penn, Cincinnati.

Board of Education—Abraham W. Harris, president Northwestern University, Evanston, Ill.

Home Missions and Church Exension—David D. Forsythe, New York.

All were chosen on the first ballot except the secretary for Home Mission for which two ballots were required.

The ballot for a successor of Bishop Elect Thomas Nicholson, a secretary of the Board of Education, one of the most important positions of the church, was as follows:

Abraham W. Harris, Evanstoon, Ill., 417; John W. Hancher, New York, 195; Guy Poter Benton, president University of Vermont, Burlington, Vt., 129; H. F. Rall, president Garrett Biblical Institute, Evanston, Ill., 30.

The following editors of church magazines were chosen:

Methodist Review, William V. Kelly, New York; New York Christian Advocate, James R. Joy, New York; California Shristian Advocate, Francis M. Larking, San Francisco; Central Christian Advocate, Claudius B. Spencer, Kansas Ciy, Mo.; Advocate Journal, James M. Melaer, Lexington, Ky.; Northwestern Christian Advocate, E. Robb Zaring, Chicago; Pacific Christian Advocate, Robert H. Hughes, Portland, Ore.; Pittsburgh Christian Advocate, John J. Wallace, Pittsburgh; Southwestern Christian Advocate, Robert E. Jones, New Orleans; Western Christian Advocate, Ernest C. Wareing, Cincinnati; Epworth Herald, Dan B. Brummitt, Chicago; Christliche Apologete, Albert J. Nast, Cincinnati; Haus Und Herd, A. J. Bucher, Cincinnati; Sunday School Publications, Henry H. Meyer, Cincinnati.

WITH THE SUFFRAGISTS.

In Tennessee woman suffrage scored in the Republican State Convention which voted almost two to one in favor of including a woman suffrage plank in the platform. It scored also in the Tennessee Federation of Women's Clubs, which went on record for equal suffrage for the first time in its history, May 5, by a vote of 96 to 43.

Thirty-three State Federations of Women's Clubs in addition to the general federation, have lined up back of the demand for votes for women. Club women represent the thinking earnest women of every community. They have tried introducing reforms without the vote and evidently want a more effective tool to work with than "indirect influence."

* * *

The suffrage agitation in Iowa which is expected to come to a successful finish on June 5 began in 1870 when the legislature first passed a suffrage bill. Since then the bill has run the usual course of winning in one branch of the law making body and losing in the other, or winning in one legislature and losing in the next. In the mean time women by the hundred have secured entrance into offices including principalships of high schools, county recorders, and county superintendents of schools.

* * *

That a man can marry an alien woman, in fact a whole string of alien women, one after another, and yet remain an American citizen with voting rights, but that if a woman venture to fall in love and marry a resident in this country who is not naturalized or born here, she loses not only her vote, but is made into what she is not, an alien; this fact, according to the Spokane Daily Chronicle, was strongly impressed on her hearers by Harriet Stanton Blatch at the celebration in Spokane in honor of the Suffrage Special.

* * *

If women can leave their homes in order to earn their living in the market places of the world, and fears for the home are, according to that very conservative writer, Margaret Deland, "too folish for discussion," why then no one need hesitate any longer in coming out for woman suffrage out of regard for the safety of the home.

"Look at the women who are their hubands' good comrades," writes Mrs. Deland in The Independent of May 22, "Look at their well kept houses or flats, or single rooms—their "Homes" in fact! The right kind of a woman can carry 'Home' in a suit case."

* * *

"To my mind sex plays no part in religious, scientific, and philanthropic work. Our brains and our individualities are our potentialities. In Chicago we work shoulder to shoulder with the men," this was the message brought to the celebration of the fortieth anniversary of the Ethical Culture Societies held last week in New York city, by Mrs. Hamilton, representing her home society.

DERBY WINNER AND OTHER RACERS AT AUCTION

(By United Press)

Belmont Park, L. I.—The sale of the English and French breeding and racing establishments of the late Herman B. Duryea, which the Powers-Hunter company will conduct in the paddock at Belmont Park here to-day, will give to the thoroughbred industry of the United States another British Derby winner, Durbar 2d, a son of Rabelais and Armenia.

Durbar 2d, which was bred by Mr. Duryea in France, won the Derby of 1914 from Hapsburg and Peter the Hermit. Tapsburg defeated a first class field in the Jockey Club stakes a little later. After winning the Derby Durbar 2nd went over to France and finished third in the Grand Prixe de Paris and his caretakers had a brisk time getting him away from the German invasion later in the year.

Find Fossil Man In Mine.

Beckley, W. Va.—Miners digging in a coal mine of the East Gulf Coal company unearthed the body of a petrified man. The fossil is a perfect specimen of the human body. It was found several hundred feet below the surface.

"Fair-List" Factors

YOU can pay 10% to 50% MORE than Goodrich Fair-List prices, for *other* Fabric Tires of no better quality,—without averaging 1% MORE actual Mileage out of them!

You can *accidentally* Puncture,—or *accidentally* Ruin,—the *highest-priced* Fabric Tire that ever was frilled into Extravagance,—in the FIRST WEEK you use it!

And,—you would have no more *recourse* (with such Extravagant Tires), than you have on these Fair-Listed Goodrich "Barefoot" Tires, which cost you *one-third to one-tenth* LESS, for self-same Service, plus *more* Resilience,—*more* Cling, Spring, and true Pneumatic quality.

Now,—consider *that* Message,—for Thrift.

Then note following prices:—

FIRST RACING CLASSIC OF YEAR RAN TO-DAY

Belmont Park, L. I.—The Metropolitan Handicap, the first big racing classic of the year, will be run over the Belmont Park course here to-day. This stake is a mile struggle. Fifty-seven nominations have been named, which include most of the tiptop runners that can skim over eight furlongs.

Roamer, the great Knight Errant gelding, belonging to Andrew Miller, has been allotted topweight, the handicapper giving him 132 pounds.

Second on the list is Borrow, Harry Payne Whitney's whirlwind finisher, with 127 pounds.

Stromboli, which won the Metropolitan and Suburban for August Belmont last season, is weighted with 122 pounds, four more than he carried last year when he ran the mile in 1:39 4-5. The Finn is close to Stromboli with 120 pounds. The Butler star, Pebbles, is considered good enough to tote 116 pounds if he starts.

The three year old division includes some speed marvels. According to the scale the young distance runners have, in most cases, to make allowances to their older rivals.

The pair that will attract attention if they wear silks are George Smith, the Kentucky Derby winner, and Star Hawk, the imported colt that forced Smith to a nose finish. George Smith is allowed 109, while Star Hawk is in one pound lighter.

Then there is the highly touted Clapperbill, handicapper at 106 pounds. The weights run down to 90 pounds, given Daddy's Choice.

The handicaps are so cleverly adjusted that selecting the possible winner is nevt to impossible.

CARDINAL TO TELL LEAGUE WHAT CHURCH STAND IS

Washington—Delegates to the national convention of the militant League to Enforce Peace, which they hope will result in a league of nations to keep international peace just as a police department keeps municipal peace—by force, will this evening hear James Cardinal Gibbons discuss "What the Churches Have at Stake in the Success of the League."

Philip H. Kadsden, of Charleston, S. C.; J. Mott Hallowell, of Boston and Theodore Marburg, of Baltimore, former minister to Belgium, spoke today on organization; Herbert S. Houston, of New York, president of the Associated Advertising Clubs of the World, on publicity, while finance was spoken of by Charles S. Ward of New York, secretary of the international committee of the Y. M. C. A.

Benjamin Ide Wheeler of Berkeley, California, opened this afternoon a discussion of general league topics. Nehemiah Boynton, of Brooklyn closed the discussion. Other speakers are: President Lowell of Harvard, Harry A. Wheeler, of Chicago; Franklin H. Giddings, of New York, and Shailer Matthews, of Chicago, president of the Federal Council of Churches.

CHURCHES MOBILIZED FOR ATTACK ON RUM

Chicago—Chicago's saloons will be pictured in all the churches to-morrow as first aids to the devil. Nearly every church will devote its morning services to an attack on the saloons, and laudation of the Illinois anti-saloon league's candidates for legislative places.

A New Bread

The NEAPOLITAN BREAD is an Italian Bread

I has a natural sweetness of taste that is due to the particular way in which it is baked. No sugar or lard used in the recipe.

One loaf will convince you of its superior merits.

It is baked under the most sanitary conditions, and the loaves may be had in either the round or sandwich style.

As a mark of appreciation we are giving a coupon with each loaf, and 200 of these entitles one to a $2.50 coffe percolator. This is not an inducement to buy.

WE DELIVER TO ALL PARTS OF THE CITY

FRANK MASSARO
GROCER
Oneida Street, Fulton

SINNING LAST NIGHT'S SUBJECT

(Continued from Page One)

he had done wrong and he received the blessing.

That is more than some people in Fulton are willing to do. It takes a man to acknowledge he has made a mistake. It takes a man to repent. It takes a man to be a Christian. Any person can offer excuses for not doing their duty, but it takes a man to walk out publicly and say, I have been wrong, and I want to get right. Any person can serve the Devil. When Nathan told David he was wrong, David was willing to get right. It required courage on the part of Nathan to tell David he was wrong, but he was God's messenger to David, and there was no alternative. David needed someone to do some plain preaching to him. People need plain preaching at the present time. It stirs up the Devil and His Imps, but God knows they need to be stirred up.

People must realize they are sinners before they will repent. When David realized he was a sinner he cried for mercy. He said: "Have mercy upon me, O, God, according to thy loving kindness and tender mercies, blt out all my transgressioss." He knew that one unforgiven sin would send him to Hell. One unforgiven sin will send you to Hell. When David sinned, he hurt every person in the Kingdom. When we sin, we hurt other people. When wives sin they hurt their husbandss, when husbands sin they hurt their wives. When parents sin they hurt their children. And when children sin hurf their parents. David not only sinned, but he repented. Have you repented? Are you willing to repent? Remember, God calls all men everywhere to repent.

Simply being sorry for sin is not repentance, remorse is not repentance. Giving up your sin and turning to God and asking God to forgive you, that is true repentance. Jails and penitentiaries are full of people sorry for their sins. But probably they are not willing to give up their sins. Any one can repent if they will only do it.

Some people say I love to do this, and others say, I love to do that. But God says, Repent! Christ says, Ye must be born again. Accept Christ as your Savior, and God will adjust everything according to His plan. "The wages of sin is death, but the gift of God is eternal life through Jesus Christ our Lord."

Dr. Torrey tells of visiting an infidel on his death-bed. He talked to him about Christ, and asked him to prepare to meet Christ in the world beyond. After talking to him about Jesus, Dr. Torrey sang the hymn: "Just as I am without one plea, but that thy blood was shed for me, and that thou bidst me come to thee, O, Lamb of God, I come, I come."

When Dr. Torrey sopped singing, the infidel said, "I will come. I have sinned against the Lord. I have trampled under foot God's laws, but I come just as I am, pleading for mercy and pardon." He found Christ and was saved. My friend, if you have a desire to enjoy the blessings of God here and in the hereafter, it will be necessary for you to acknowledge your sin and to cry out to God for mercy. If you will confess your sin, God will hear, and God will pardon, and you will be saved.

Dancing Monday Evening

BOSTON'S BIG PARADE TODAY

Boston—Greater Boston, whose minute men so annoyed the pacifists of 1775, and which is the birth place of the American doctrine of get ready, is holding its preparedness parade today.

More than 60,000 men and women will be in line, parading through the narrow streets that once echoed with the footfalls of the men in homespun who fell in the Boston massacre, who fired from the redoubts of Bunker Hill and who went to the aid of the farmers at Lexington and Concord.

Lieutenant Colonel Beaumont B. Buck, U. S. A., is the chief marshal, with Major William J. Keville of the fighting 8th, as chief of staff.

Every member of the house of representatives and the senate will march to-day, as will many high officials of the Bay State. Members of every profession in the Hub will be in line, including hundreds of prominent lawyers, lead by Samuel J. Elder.

The new Harvard regiment, 1,100 strong, will be among the marchers before they break away for the intercollegiate meet at the Stdium.

The Ancient and Honorable Artillery will be a feature of the parade, in their Colonial uniforms, recalling the days of the Minute Men.

Another feature of the march will be the first public appearance of three newly organized Red Cross base hospital units.

Every unit of the State militia will march, and besides these will be the society women, who already have pledged their homes for emergency hospitals; suffragists, anti-suffragists, business men, fishermen, clam-diggers, society men, at least one son of Colonel Roosevelt; actors, sailors, and particularly farmers, to recall the "embattl'd" days.

Every band for miles around has been requisitioned, and 300 marchers from Providence will bring one of their own.

Boston today may not have the quantity that New York in her parade of the 13th produced, but for quality the committee in charge of the Citizen's Preparedness Parade, admits it can't be beat.

In the ranks are hundreds of direct descendants of the first disciples of preparedness, these uninvited guests of the Boston Tea Party, and these who heard Baul Revere go clattering by.

HARDWARE MAN IS TELLING OF HARD LUCK

While carrying a heavy ice box through the doorway of his store yesterday afternoon, Amos Druse, the East First street hardware dealer, stumbled and the ice box crashed through one of the large plate glass windows in the front of the store. The pane was badly smashed, and a new window will be installed.

'TIS BEST

When your dinner
Is a-cooking,
And you have a
Special Guest;
How it scatters
Every tremor,
When you know your
Meat's the Best.

DANN'S MARKET
EAST SECOND STREET

Pulpit and Pew

ALL SAINTS' CHURCH.

Rev. Minor J. Peters, Rector.

Sunday, May 28, 1916—Fifth Sunday after Easter.

Holy Communion, 8 a. m.

Matins and Sermon, 10:30 a. m.

Sunday School and Bible Class, 12:00 m.

Evensong and Sermon, 5:00 p. m.

All the seatings are free and visitors are cordially welcomed.

CONGREGATIONAL CHURCH.

Services of praise, prayer and testimony will be held at the Congregational Church on Monday, Thursday and Friday evenings of next week at 7:30. At these services an opportunity will be given to all who desire to unite with the church on the following Sunday to present themselves for registration if they have not already arranged. All are invited to attend these meetings.

CHRISTIAN SCIENCE.

Services are held at 55 South First street Sundays at 10:45 a. m., and Wednesdays at 8 p. m. Reading room open daily 3 to 5 p. m., except Sundays. Miss Ada F. Thayer, first reader; Mrs. Frank Wooley, second reader. You will be welcome. The subject for next Sunday will be "Ancient and Modern Necromancy, alias Mesmerism and Hypnotism Denounced." Golden text, Leviticus 19:31; responsive reading, Leviticus 19:1, 2, 11-18.

BIBLE STUDY CLASSES SUPPLANT PRAYER MEETINGS

Prayer Meeting Districts 23, 22, 16, 17, 20, 25 and 27 will meet next week for Bible study as follows:

District 23, at the home of Mrs. C. Wetherby, Monday evening at 7:30 o'clock, Mrs. C. Atwood, leader.

District 22, at the home of Mrs. R. Burt, Monday evening at 7:30. Mrs. J. Diston, leader.

District 16, at the home of Mrs. T. J. Redhead, Monday afternoon at 3:30. Mrs. H. D. Holmes, leader.

District 17, at the home of Mrs. Cardinal, Monday evening at 8 o'clock.

District 20, at the home of Mrs. Edward Reardon, Monday evening at 8 o'clock.

Districts 25 and 27, at the home of Mrs. Jerome Burns, Monday afternoon at 3:30.

PEOPLE URGED TO BUY COMMENCEMENT TICKETS

Prof. J. R. Fairgrieve is urging people to buy seats Monday at the Quirk box office for the class play, class commencement, and prize speaking contest, as by so doing they will be able to effect quite a saving in cash, to say nothing about the good that will come to the school system of Fulton.

The judges for the prize speaking contest are announced as follows: Dr. W. K. Wickes, Syracuse High School; Prof. E. W. Smith, Colgate University; Prin. W. B. Wilmot, Mexico High School.

ELKS WILL MARCH IN LINE WITH VETERANS

The members of the Fulton Lodge of Elks will march with the Grand Army Veterans and other local fraternal organizations in the Memorial Day parade next Tuesday, according to plans completed at the meeting of the local lodge last night. The members will meet at the club house Tuesday morning, and led by the Elks band will take their places in the parade.

Fulton Keynotes

Mrs. E. G. Middleton, of New York, Mrs. Harry L. Warner, of Binghamton, and Mrs. R. J. Storm and son, of Cleveland, are spending the week with Mr. and Mrs. F. J. Watson, of 622 Rochester street.

* * *

Mrs. Robert Bennett, of the East River road, is spending the week-end and Decoration Day with her daughter, Mrs. Lena Chapman, of Utica.

* * *

Mrs. Jeanette Smith and Miss Carrie Bennett entertained a party of friends Thursday morning at their home on the East River road and music was enjoyed and luncheon was served.

* * *

Miss Anna Lake Lynch, of Oswego, is visiting Mrs. William E. McCormick.

* * *

Mr. and Mrs. George Gilman and two children are visiting friends in and out of the city. They have recently returned from the west, deciding that the Empire State is about right, hence their desire to buy a farm in good old Volney town.

Lost—Bunch of keys, between Granby Mill and McGuinis' hotel. Reward if returned to John Painter, at Granby Mill. 446

MRS. OWENS PLEASED BY ORCHESTRA'S PERFORMANCE

The High School orchestra met last night at the home of Mrs. L. Roy Owens, of West First street. Thirteen members of the organbzation were present and the musical programs for Prize-Speaking and Commencement were rehearsed. Some of the most attractive numbers to be rendered by the orchestra include selections from the famous Broadway productions, "Katinka," "The Blue Paradise" and "Princess Pat," Victor Herbert's latest operetta.

The orchestra will be directed by Mrs. L. R. Owens, who is also first solo violinist, and those who comprise the orchestra are, first violins, Joseph Keenan, Harlow Palmer, William Miller and Miss Evadne Austin; second violins, Miss Ruth Loveland, Miss Ruth Niper, Joseph Mangeot and Earl Hopkins; cello, Philip Calkins; clarinet, Ralph Ferguson; flute, Fred King; cornet, Jesse Lawton; solo, and Harold Palmer; drums, Richard Murphy; piano, Miss Katherine Sullivan.

FATHER LEAVES TO BRING BACK INJURED SON

William Barnard, Sr., of East Second street, left last night for Greenwich, R. I., to return with his son, William, Jr., who sustained severe burns while working in a paper mill at that place. The young man's face and arms are badly burned, according to advices received by his parents. The father and son are due to arrive here next Tuesday.

ACCOUNTING RENDERED IN PATRICK ESTATES

Nora E. Partrick, of this city executrix in the estate of John C. Partrick, deceased, filed yesterday an account in the Surrogate's Court at Oswego, showing the receipt of a legacy of $930 to her. An account was also filed in the estate of Fred J. Partrick, a son, showing receipts for $130.13. Of this amount $111 was divided between Ruby A., Harry E., and Clarence M. Partrick.

CLUBWOMEN PLAN ARMY FOR PEACE AND WAR

(By United Press)

New York—Thirty thousand leading American clubwomen representing two million other women in the United States, got together at to-day's session of the National Federal convention to consider plans for the formation of a gigantic standing army that will do industrial work in time of peace and be instantly available in time of war. This is Conservation Day at the convention.

The speakers have expert knowledge of their subjpects. The Dpartment of the Interior is represented. Two hundred tickets have been issued for the luncheon; price $1.50.

Smaller conferences will be held on other days, these to be announced later. An exhibit of each of the eight divisions of the work of the Conservation Department has been provided by the Federal Government and by organizations of nation repute. These are in charge of Miss Mira L. Dock, Mrs. John Dickinson Sherman is chairman of this department.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

Can you wash your walls?

You have often wished that you could remove spots and stains from your wall paper. Perhaps the paper was almost new. In that case the marks must remain an eye-sore, or you must go to the expense of re-papering.

We can save you all such annoyances. We recommend that you use

DEVOE
THE GUARANTEED
VELOUR FINISH

in place of this unsanitary wall paper. It is an oil paint that gives to walls a beautiful, soft, water-color effect. If it becomes soiled, you can wash it with soap and water.

Besides being a thoroughly sanitary finish for your walls and ceilings, Devoe Velour Finish also offers artistic possibilities that cannot be attained by wall paper. Also, it is more economical—lasts longer than wall paper.

Devoe Velour Finish is not an experiment. We guarantee every can of Devoe we sell. Our customers tell us it gives them perfect satisfaction and that it is very easy to apply.

GERMAN AMERICANS OPPOSE T. R. AND WILSON

Chicago—"German-Americans unservedly against both Theodore Roosevelt and Woodrow Wilson for president of the United States." was the slogan Illinois German-Americans expected to plant in the minds of the officials of every German-American alliance attending the meeting of the National Alliance which convenes in Chicago to-morrow.

One hundred officials of state alliances and editors of German newspapers are expected to attend.

"Opposition to Wilson and Roosevelt is an Illinois German-American idea and we expect to promulgate it throughout the United States," Dr. Hermann Gerhard, chairman of the political committee declared today.

"I know the man I want to see president," Dr. Gerhard said. "I may get a chance to vote for him." He would not say who his choice is.

"I do not believe the Republicans will nominate Roosevelt and unless Wilson is nominated on the first ballot I don't believe he will be nominated."

MISCELLANEOUS WANTS

Rate—1c. a word each time. Minimum Charge 10c.

Wanted—Young man to take care care of milk route; must be able to give fifty dollars cash security and first class references. Good salary and commissions guaranteed also good chances for advancement. Apply at Borden's Milk Company, 121 East Onondaga street, Syracuse, New Cork, between 9 and 11 1a. m. 445

Women wanted—Full time salary $15, selling guaranteed hosiery to wearer; 25c. an hour spare time. Permanent, experience unnecessary. International Mills, Ann Street, Norristown, Pa.

For Sale—Model 17 Buick touring car, in first class running order; must be sold this week, $225. A. C. Inman & Son, West 8th and Oneida streets, Oswego. 445

Wanted—American or Polish Chambermaid. Good wages. Apply to Housekeeper, Pontiac, Oswego. 445

Boarders wanted—Modern conveniences. 420 Seneca street. 445c

Cows for Sale—Two; fresh. M. T. Colwell, Emery Road. Phone 5101. tf

For Rent—Five room apartment, all conveniences. 520 Buffalo st. tf

SUFFS SELL POSIES ON FIFTH AVENUE

New York—Hundreds of yellow peach basket hats, with the cutest little blue roses perked saucily upon them, bobbed merrily along Broadway and Fifth avenue today. The hats, designed by Mrs. Frank A. Vanderlip, were worn by New York suffragists who heard that Englishwomen got $1,000,000 selling artificial flowers on the streets of England one day last year, and decided to try it themselves. Mrs. Thompson Seton and Mrs. John Flagler, of Greenwich, Conn., were among the flower girls.

The Difference.

"Where's the young actress you were so interested in last year?"

"She's starring."

"And how about the young fellow who wanted her to marry him?"

"He's still mooning."—Exchange.

NOTE.—*"THE IRON CLAW," No. 5, due last Saturday, May 20 will be shown Saturday June 3.*

ABOUT THE TOWN

Mayor Lewis received a letter this morning from Edwin Duffy, State Highways Commissioner, to the effect that the contract for the paving of South First street would be let with the next group of road contracts, which will be distributed next week. The Mayor is in hopes that the contract will be let by next Saturday at the latest, in order that work may begin on the street by the middle of June.

* * *

Because of the fine "screen" used, the cut of Rev. Sam Small, the noted anti-saloon preacher who will speak here Monday night, which appeared in this paper earlier in the week, did not reproduce correctly, and depicted the gentleman with a slightly marred visage. Mr. Small does not look like that, and it is only fair to him to say so.

* * *

Reports from unauthoritative sources have it that the American Woolen company plant will re-open next Wednesday on full time, having secured one of the largest orders in recent years. This announcement has been hailed with delight by Fulton business men and the people generally, although there are a few skeptics who prefer to see how much truth there is in the report before they celebrate.

* * *

Again, and yet, rumors are in circulation that the Hunter Company has secured a war contract, and that only a few minor details remain to be settled before the work begins. The company has received assurances from most of its former employes who are now working in other cities that they will return if the plant begins operations and if the company is willing to pay the high wages [illegible] elsewhere. The question of machinery, also, has been settled satisfactorily. Most of the former employes of the plant are now working for the Remington company in Ilion, Eddystone and Bridgeport.

* * *

Elmer Taylor and Earl S. Brown were active participants in a Ford accident this morning in East First street. Both men were turning in the street, and both misunderstood the signals given by the other. As a result the cars came together with a loud crash, which brought the business men in the immediate vicinity to their doors in haste. Little injury was sustained by either limousine.

* * *

Employes and executives of various city departments have gone in strongly for horticulture, and few are the days now which do not see each city desk adorned with beautiful flowers, usually fresh from the radiant gardens of the owner of the desk. This morning, f'instance, City Clerk Allen had his office brightened with a large bouquet of tulips; City Sealer O'Brien wore a boutonierre, of orange blossoms, (and his friends say there is a significance in that). Chamberlain Adkins was the proud custodian of several long stemmed American Beauty roses, while the Water Department office was decorated with home grown water lilies, which made much more fragrant than the imported lilies, according to Chief Clerk Rugg. A movement is in progress to ask an appropriation from the city for the erection of window boxes in each window of the city hall. Several of the employes have volunteered their services as window-monitor, and promise the buds will have most particular care.

* * *

Mike Kaplan has offered to donate the boxes if Congressman Mott will donate the flower seeds. That's fair enough.

* * *

A suggestion has been received that a contest for the most popular young lady in the city be inaugurated early in June, to conclude in Old Home Week, when the winner of the prize shall be accorded a Throne of Honor during the carnival festivities and parade. The suggestion is a happy one and will doubtless add interest to the event. The plan of electing a queen of a carnival is in vogue in almost every large pageant of this kind in the United States, and occasions a great deal of interest in the event which could not be aroused by any other means.

* * *

And she said, blushing prettily, "I accept the nomination!"

No Faddism.

"Do you believe in telepathy?"

"No; our doctor is a good old allopath."—Baltimore American.

The Best Conveyance.

"Father, what is a logical way of reaching a conclusion?" "Taking a train of thought, my boy."

CHAUTAUQUA ENTERS NEW PHASE

Permanence of Parent Institution of Chautauqua Movement Now Definitely Established.

Over Quarter Million Dollars Being Spent on Plant at Chautauqua, N. Y., This Year, Making Largest Single Year's Development in History of the Movement Since 1874—New Entrances, Public Buildings, and Residences, All of Permanent Construction. City of Tents No Longer the Type to Represent the Chautauqua Idea.

NEW developments which are going on at Chautauqua, N. Y., in buildings, approaches and transportation facilities differ greatly from the prevailing notion of a chautauqua as a transitory thing. Brick paved highways, double track interurban car lines, entrances of brick and concrete in good architectural design, landscape treatment on a broad scale, educational buildings in comprehensive groups, hotel rooms with steam heat and other like conveniences, private residences costing a fortune to build do not grow up around an enterprise of fleeting character, yet all these things are taking shape this spring at Chautauqua. The fact is that the parent institution of the Chautauqua movement, on Chautauqua Lake, has within a decade passed into a wholly new phase, the "city of tents" giving way very fast to a city that "has foundations." Electric light and power plants, gas mains, water supply and sewage systems, paved sidewalks,

park, and the natural beauty of a stream and ravine at that point will be enhanced by planting trees and shrubs. A plaza near the station has also been reserved for park use. The planning of this addition has been done by George Y. Skinner, a specialist connected with the New York firm of Samuel Parsons & Co., landscape architects.

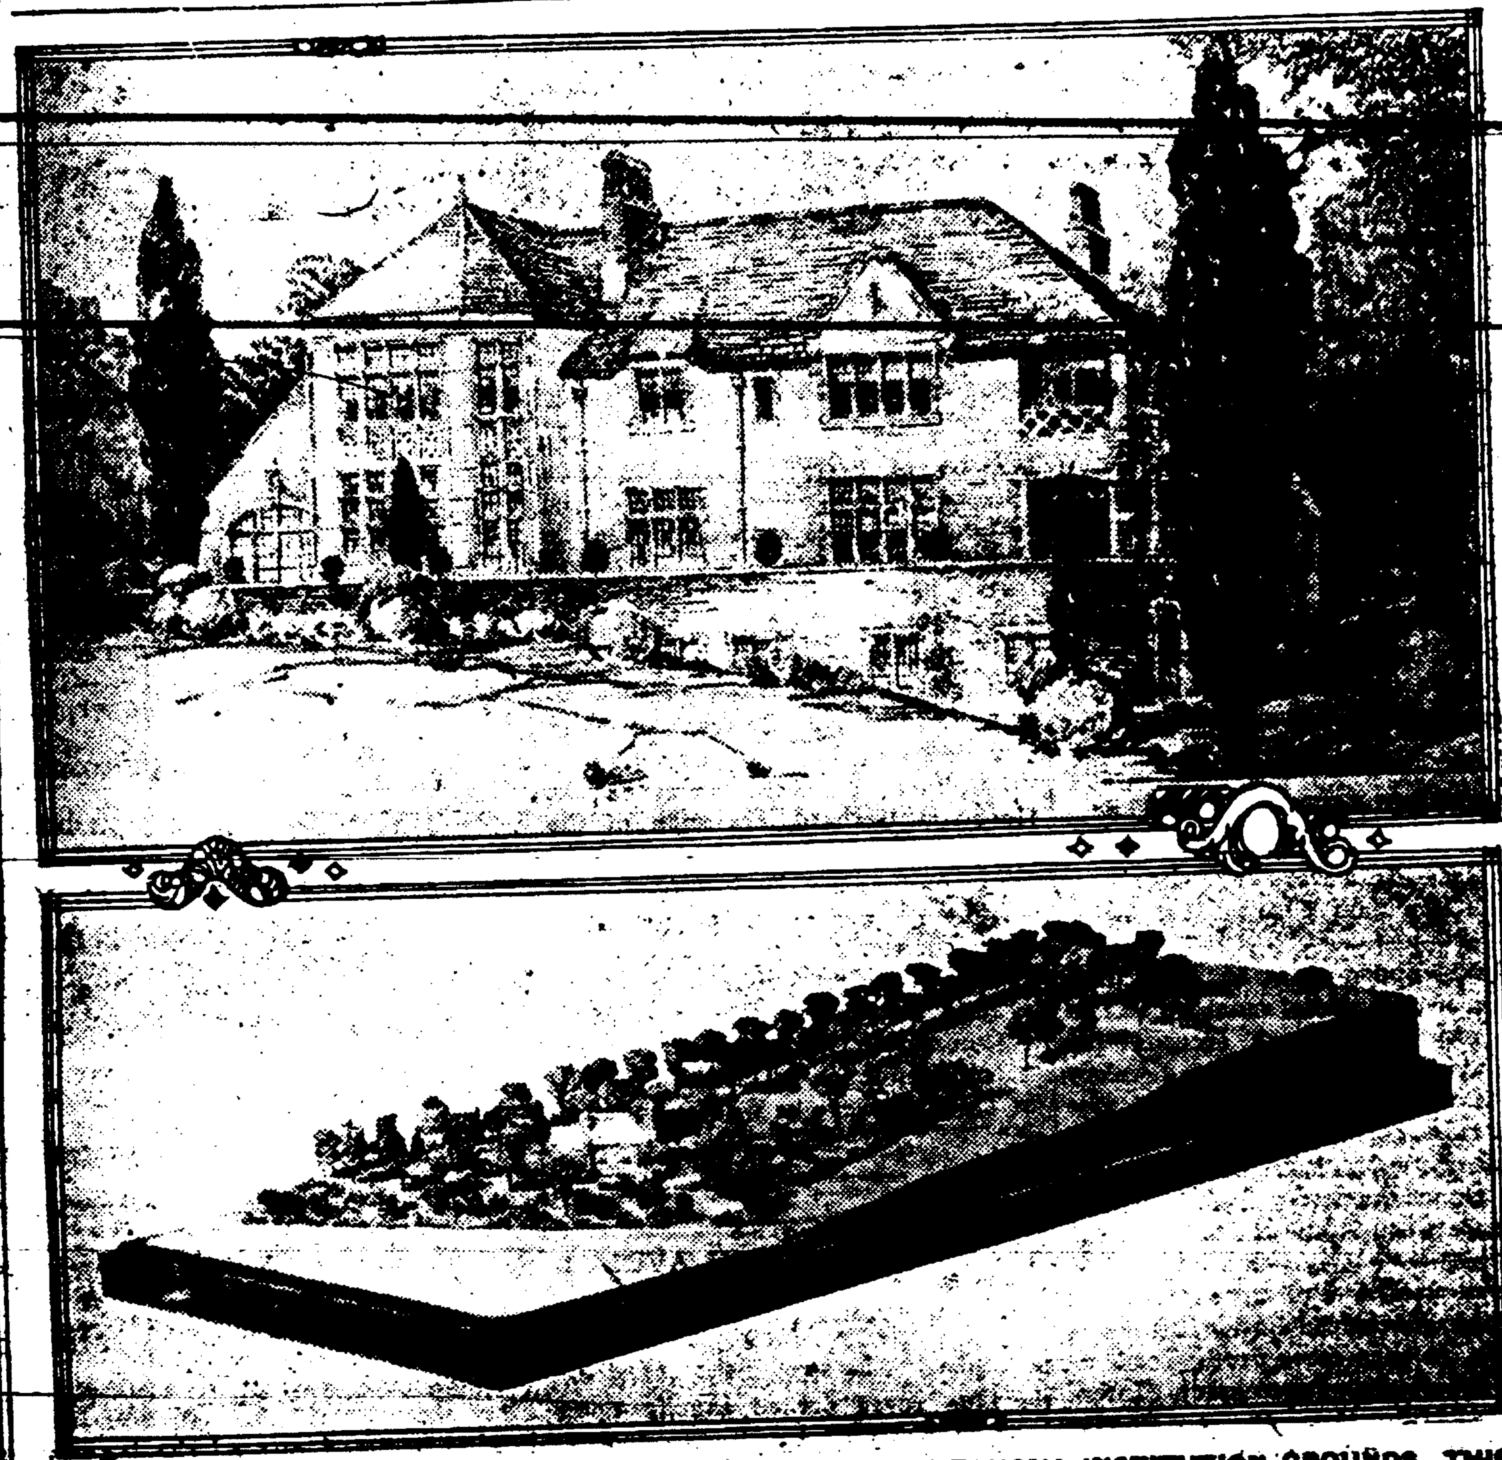
The Chautauqua High School, the Institution Garage and car parking place, the excellent Chautauqua golf links and the industrial center comprising repair shops of various kinds are located west of the Chautauqua enclosure on the highway and trolley line.

Chautauqua's New Water Gate.

Second in importance to the improvements of the land gate at Chautauqua, now under way, is the construction of the new pier building, on the site of the old wooden structure, which was torn down last fall. The Miller Memorial Bell Tower, erected in memory of the late Lewis Miller of Akron, O., co-founder with Bishop John H. Vin-

volves also the double tracking of the trolley line, the laying of needed switches and the construction of a new and complete station. The plans for the station building are by Freeburg & Fidler, architects, of Jamestown, N. Y.

There will be a double track in front and a switch to the rear for freight, baggage and express. The building will be 56 by 225, built of red brick, stone and concrete. The design will harmonize with the present permanent Institution buildings, with red tile roof and wide, projecting eaves. The outside passenger platform will be 28 by 72, so arranged that outgoing and incoming traffic may be separated. On the inside will be the Institution ticket office with incoming and outgoing passes, the exchange office, news and candy stands and the rest room for ladies. Toilet rooms, inside and outside, will be provided for both sexes. Adjoining the traction ticket office will be the baggage department with checking and transfer offices, the freight department and the express department, all to have ample platform space for



PACKARD ESTATE ON CHAUTAUQUA LAKE, ADJOINING CHAUTAUQUA INSTITUTION GROUNDS. THIS PALATIAL NEW RESIDENCE WILL BE OCCUPIED BY ITS OWNERS THIS SUMMER. BOTTON SECTION OF CUT SHOWS MODEL OF THE GROUNDS.

year-round office buildings of fire proof or slow burning construction are among the things that one by one have supplanted the earlier makeshifts. Over a quarter of a million dollars is just now being expended to present the assembly to 1916 visitors in its new character as a permanent institution, definitely come to stay.

The Chautauqua assembly at Chautauqua, N. Y., will this summer offer to the visitor's view two important and striking improvements in two approaches—the water gate or pier, where will enter the visitor coming by steamboat from other points on Lake Chautauqua, and the land gate, where will enter the visitor coming by trolley from any direction or by motorcar over the excellent highway which connects with the great east and west thoroughfare at Westfield, N. Y.

Chautauqua's New Land Gate.

The general highway improvement is the most extensive enterprise now under way at Chautauqua, N. Y. This has been secured by generous co-operation with Chautauqua Institution on the part of the State of New York, the county of Chautauqua and the Chautauqua Traction Company operating the electric railroad from Jamestown to Westfield. It comprises a modern passenger station, double tracking of the trolley line, a new brick paved highway and important changes in the boundaries of the Assembly enclosure.

Plans were made in 1913 by the State for the improvement of the highway. A magnificent new state road is now open through Mayville to Westfield, connecting with the great roadway east and west, known to all automobilists. The line of the highway at Chautauqua was changed and straightened and paved with brick. This change has made possible the addition of a considerable acreage to the lot and park space of the Institution. It in-

loading and unloading. Work has already been begun so as to assure completion before the season opens. The cost of the structure will be some $30,000 and incidental improvements by the Traction Company perhaps $10,000 additional.

The Institution has expended for land and buildings and for the improvements made over $40,000. The special piece of brick highway has cost the state and county $17,000, while the Traction Company expenditures, as just indicated, will aggregate at least $40,000.

For a quarter of a century the water gate was the principal and almost the only entrance to Chautauqua, and it will be remembered for its natural picturesque beauty by every one who has visited the assembly during the past forty-two years. More recently, since the development of the electric railway and since the automobile has become so important a factor, the roadgate has received the larger share of visitors, yet it has had nothing to suggest the real character of Chautauqua. It has been like the railroad approach to many a town, a back door entrance, crowded and comfortless, without character or convenience.

The change in the highway and trolley line has made available to the Institution a tract about 4,000 feet long, varying in width from 10 to 300 feet, or nearly thirteen acres, and brings the total area within the enclosure up to about 200 acres. The new section is laid out into eighty-eight lots and into parking. The lots thus made available for lease are somewhat larger than the older Chautauqua lots. Two of the new streets formed are named Harper and Massey avenues, to commemorate services to Chautauqua by Dr. William R. Harper of the University of Chicago and the Massey family of Toronto. In this extension about two acres have been added to the present playground

cent of Chautauqua Assembly, is an impressive enhancement of the natural charm of "the point." The new pier building, which will cost about $10,000, will be another added ornament.

The new pier building will be a two story structure of 40 by 100 feet, with concrete columns and red tile roofing. The first floor will contain the Institution ticket office, steamboat ticket office, waiting rooms, check room, baggage room and refreshment booth. The second floor will be entirely devoted to a covered promenade. A most attractive building is promised by Green & Wicks of Buffalo, the Institution architects.

For the past two years there has been a marked improvement in this entire section of Chautauqua, in ground, park and cottage betterments, to which the flew boat landing and water entrance will give final emphasis.

Summer Schools Growing.

The growth of summer schools throughout the country is being largely shared by the pioneer summer schools at Chautauqua, N. Y. This year's addition to the Chautauqua Summer Schools on College Hill will be in the form of two sixty foot ends added to the sides of the rectangle already well defined. When completed all the classes, comprising 3,000 students, will be provided for in this building, with the open end of the quadrangle toward the lake and "the old chestnut tree" a venerable Chautauqua landmark in the center.

It is to be hoped that friends of popular education will come forward to make possible in the immediate future the completion of this unique group of buildings which will serve as classrooms, laboratories and dormitories.

The Chautauqua Summer Schools themselves are unique in having always been self supporting.

AN ENGLISH LASSIE.

A Model From London Comes In a One Piece Suit.

Built of tan gaberdine is this British outfit, hung from a round yoke, belted with brown braid, above which, from two bone buttons, falls a front drape

in graceful folds. The high collar is held up by a black ribbon and rosette. The hat reminds us of the Coldstream guards.

JUST NERVES.

Don't Let Lowered Vitality Run You Down In the Spring.

If you should go to the doctor and tell him that you are given to being gloomy and blue at times; that you have apprehensions of dreadful things; that you are supersensitive; that you are constipated, given to headaches and vertigo or to other similar ailments the doctor would know that you were suffering from a case of "nerves." Naturally when you realize that these symptoms are signposts to "nerves" you can appreciate how impossible it is for a nervous woman to appear charming and beautiful. If these facts were only understood more universally by women they would be ashamed to admit they had "nerves," and they would do all they could to cure them.

No matter how talented a woman may be, how clever, how well read or how interesting, if she is a nervous wreck she will find that little by little her friends will see less and less of her until in time she will find it a rare thing to have a caller. Not because the friends mean to be unkind, but because human nature is so constituted that it longs for happiness and warmth, not for sorrow and gloom.

The fundamental cause of nervousness is lowered vitality. So the wise woman will do everything she can to keep her vitality up to its highest mark. If she feels that her vitality is ebbing away she will stop everything and concentrate on building up the system, the nerve force and supply.

Rhubarb Pie.

Three cupfuls of rhubarb, one cupful of sugar, two tablespoonfuls of flour, one tablespoonful of milk. Crust: One and one-half cupfuls of flour, two tablespoonfuls of lard or shortening, one-half teaspoonful of salt.

Sift the flour and salt into the bowl; add the shortening and rub in very lightly with the tips of the fingers until well mixed; add a few drops of cold water at a time until you can shape. Divide in two parts; roll out thin. Dust pie tin with flour, put in dough, cover with one tablespoonful of flour; then add the rhubarb, which has been washed, skinned and cut into one-half inch pieces; sprinkle with one tablespoonful of flour and brush edges with milk. Roll out the top crust, cover and press edges together. Make two or three cross cuts on top (for the steam to come out), brush top with milk and bake in a moderate oven thirty-five to forty minutes. Rhubarb pie is one of the most difficult to make, the rhubarb being so watery. Always be sure to put flour under and over the rhubarb before adding the sugar.

Strawberry Sunshine.

Take four cupfuls of white sugar and half a cupful of water. Boil these together for four minutes; then add four cupfuls of large strawberries and boil ten minutes longer. Pour out in shallow dishes and set in sun for two days; then put in jelly glasses and cover with paraffin. This is the most delicious way of preparing strawberries, as they retain their natural flavor.

Honey and Nut Sandwich.

Use white bread spread with honey into which some chopped nuts have been mixed.

REASONS FOR CLEANUP.

Health officials in scores of cities and towns of the United States have given substantial reasons for the annual spring cleanup, and the movement has been indorsed by medical societies, organizations of sanitary officials and other scientific bodies almost without number.

Among the reasons that have been given for a general community wide cleanup each spring are these:

Removal of winter collections of rubbish decreases the summer hordes of flies by eliminating their breeding places, for flies breed only in filth. If the material is removed and properly disposed of the flies cannot propagate.

Flies are the known disseminators of typhoid and other diseases. If there are fewer flies or no flies one prolific source of infection will be done away with. Every one is familiar with the word picture of the photograph of a fly crawling over a heap of decayed filth and then flying into the house and crawling over the baby's face, so this needs no elaboration.

YOUR RAINY DAISY.

Dress as Well For Storms as You Would For the Opera.

The up to date business woman refuses to work in unbecoming garments, no matter what the weather may be. Rain or shine, she insists upon looking well dressed, knowing that her appearance is no small part of her success. The time has passed when the efficient worker was content to wear any sort of clothes. She dresses herself for the office just as immaculately as for a drawing room.

An essential to a neat, attractive appearance on a rainy day is some sort of waterproof coat. This need not be a hideous affair of rubber, drab in color, shapeless as to fit. Really smart waterproof coats are to be found in these enlightened times, one seen recently being in pewter gray waterproof tweed, designed to withstand the wickedest weather. It was lined with a lovely wedgwood blue shade of silk. The coat buttoned at the top with two large tweed covered buttons, or it could be worn open. It had two capacious pockets at the sides, and the garb was completed by a jaunty and sensible little hat in blue straw, with a gray ribbon and untarnishable steel buckle, and a pair of high waterproof boots.

The whole was a judicious mixture of the picturesque and the practical and proved that we can wear the most perfectly weather resisting garments and still look quite charming on a wet day. The idea that "any old clothes" will do for bad days is quite exploded nowadays.

Bulbous Plants.

Many amateur gardeners when their bulbous plants are through blooming are in great haste to let the bulbs dry out and pull them up. This is a mistake. As soon as crocuses, hyacinths, tulips and narcissuses are through flowering remove blooms and begin a systematic preparation for next season's flowers. It must be known that just after a bulb has finished flowering is the time when it stores up nourishment for the next season, and if the flowers are not to degenerate in a few years the bulbs should be given attention. Give doses of liquid manure once a week for at least a month after the flowering is done and do not neglect to water the dry stocks. In this way one can materially help them to store up food. Rich soil is not necessary for very young plants, as they derive most of their sustenance from the air and moisture. The soil should, however, be kept light and porous.

How to Retick Feathers.

Get your new ticking ready for the beds, have it all sewed up, but have about ten inches open at one end. Now take your old tick from which you wish to change the feathers and rip it open about ten inches at the end. Then take your new ticking and sew it on to the old ticking, having the two openings together. Now you can shake the feathers from the old tick into the new without losing one of them. Before closing up your new tick turn your old tick inside out and pick all the down out of it and put into the new ticking. Now you can close up your new tick.

The Coffee Shrub.

As a rule, the coffee shrub first flowers in its third year and then bears only a small crop of fruit. The fifth year is usually the time of the first considerable yield. In Java three gatherings are made annually, called the "early," the "chief" and the "after crop," but only the second is of great importance. The flower enjoys but a very ephemeral existence, as the settling of the fruit generally takes place within twenty-four hours, and the petals wither and fall off almost immediately. A coffee estate in full flower is a very beautiful sight, but its glory is very soon past.—Westminster Gazette.

Explained.

Teacher—Wait a moment, Johnny. What do you understand by that word "deficit"? Johnny—It's what you've got when you haven't got as much as if you just hadn't nothin'.—Chicago Tribune.

Back We Go to a Check Suit

Design by Franklin Simon & Co., New York.

A TAILORED suit in light weight worsted, velours checks in brown, green or black and white, is quite the thing for travel, street and mountain wear. The flare skirt takes a coat of many bone buttons and deep revers, the pockets having a novel turn. The coat is silk lined.

Organdie is made into some of the most charming of spring and summer frocks.

ANNA MAY.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

Artistic Model For Dinner Frock.

Satin and chiffon consort most amiably in this dinner frock. The color scheme is white and pink, an exceedingly dainty combination.

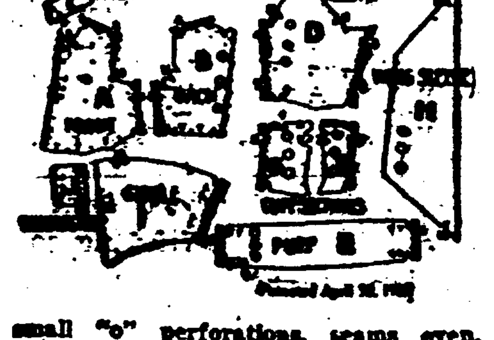
The scalloped ribbon ruffles are in the softest, daintiest shade of pink, and the pointed corsage is of the same silk. The skirt is of chiffon cloth, and the underblouse of figured chiffon. Needless to say to the ingenious woman that this is an excellent suggestion for a "make-over."

In medium size, however, the costume requires 4 yards 36-inch chiffon cloth, 2½ yards 40-inch satin and 1¼ yards figured chiffon.

To-day's dressmaking lesson tells how to make the bodice, for it offers excellent opportunities for independent use.

First sew the underarm and shoulder sleeves of the underblouse as notched. Gather the lower edge, turn hem in right back at notches and hem the neck; or, better, have it hemstitched professionally, which costs only a few cents.

Next, take up a dart at the lower edge of the sleeve as perforated. Close seams of sleeve, puff and cuff. Gather upper and lower edges of puff between double "T" perforations. Adjust puff to position on sleeve, seams and notches at lower edges even. Stitch gathers at upper edge to position along crossline of



small "o" perforations, seams even. Crease sleeve on slot perforations, lap folded edge over gathers in puff and stitch. Turn under upper edge of cuff on slot perforations, adjust to position lapping folded edge over lower edge of sleeve puff, notches and edges underneath even front seam of cuff at seam of sleeve. Sew sleeve in armhole as notched, small "o" perforation at shoulder seam easing in any fulness.

The girdle comes next. First turn under hem as notched. Gather back edge of girdle, and gather trimming piece between double "TT" perforations. Adjust girdle to position, bringing small "o" perforations near center-front, and under the arm to corresponding perforations in front and tack invisibly. Bring upper edge of girdle to indicating crossline of small "o" perforations in front and back and tack from single small "o" perforations in girdle to center-front and center-back. Draw gathers at back edge, and tack along center-back. Bring large "O" perforation in trimming piece to corresponding perforation in front and stitch gathered edge to position.

The shoulder straps may be of the same material as the girdle. Trimmed with tiny little steel or jet buttons, they make a very pretty trimming.

Pictorial Review Waist No. 6767. Sizes, 34 to 42 inches bust. Price, 15 cents. Skirt No. 6732. Sizes, 24 to 32 inches waist. Price, 15 cents.

The Kitchen Cupboard

PINEAPPLES GALORE.

FRESH PINEAPPLE SALAD.—This recipe is for a delectable pineapple salad that calls for the fresh fruit instead of the canned. The pineapple must be very ripe. You know how to tell a ripe pineapple, don't you? The yellow color is of course one symptom of ripeness. Another is loose spikes at the top. Seize one of these top spikes firmly between the thumb and finger, twist it, and if it comes out readily the pine is ripe. Remove the eyes and skin from a pineapple and dice the rest, save the hard heart. Get as much juice out of that as possible. Dice the pulp of two grapefruit. Drain both pineapple and grapefruit pulp in an enameled sieve. Chill on ice and then mix with half a cupful of celery hearts cut fine. Dress with French dressing and serve in lettuce leaves, and top each with a spoonful of mayonnaise dressing.

Pineapple and Strawberries.—Pineapple and strawberries can be combined in several delicious ways. The fresh fruit may be shredded, sweetened and chilled for several hours, then placed in a dessert dish and piled high with luscious strawberries. Or pineapple can be chilled after being shredded and sweetened if the fresh sort is used, merely shredded if canned; then, just before serving, it can be poured with the juice into a serving dish or into individual dessert glasses lined with lady fingers split in half. Over the pineapple whipped cream mixed with strawberries should be piled.

With Canned Pineapple.—A canned pineapple salad is this: On a couple of chilled white lettuce leaves lay a chilled slice of drained pineapple. In center place a ball of cream cheese rolled in parsley. Dress with French dressing. Another canned pineapple salad calls for the crisp lettuce leaves and the pineapple slice; then remove the pits from three dates for each person and fill the cavity with cream cheese. Place the dates on the pineapple and dress all with French dressing. Pineapple salad No. 3 calls for lettuce and pineapple as before. In the center cavity and above it make a mound of finely minced celery heart. Sprinkle French dressing over all and place a spoonful of mayonnaise on the celery.

Anna Thompson.

TODAY'S FASHION NOTE

Two cunning little play frocks are illustrated, either of which may be carried out at very small cost. Lawn, linen, gingham or chambray may be employed to duplicate the models, 2 1-2 yards 36-inch material being sufficient for average size. The dresses are pretty trimmed with gathers of smocking.

Pictorial Review Dress, No. 6,593. Sizes, 2 to 8 years. (Upper Figure) Price, 15 cens. Dress No. 6591. Sizes 2 to 6 years. (Lower Figure) Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department store, Fulton.

A Matter of Age.

Ella—She is a Daughter of the Revolution. Belle—She looks old enough to be the mother of it.—Judge.

READY FOR GARDEN PARTY

Gay Silks in the Shape of Coats Garnish White Frocks.

With the vogue for white gowns comes the contrast of gay coats, hats and parasols. The picture shows a dashing garment of many colored brocade set off with patch pockets and belt of silk cord and tassels. Worn with a white net skirt and picture hat, this is the ultra outfit for outdoor functions.

HER BROCADE.

YOUR NEW BUNGALOW.

Hints About Furnishing the Small Summer Cottage.

There are many houses in excellent taste and more or less modern where the latest novelties in painted ware, furniture and the like are decidedly out of place, but just picture a dear little bungalow on squatty, colonial lines aching to be furnished with just these odd little painted bits of brightness.

If the hall seems a bit somber you may set on the table beside the white candle base lamp painted with birds and flowers and topped with a colored silk shade, a white rack of tin for letters. At first you might think it a toast rack, but you wouldn't want to put toast between flowers and birds in gaudy coloring. It's just the receptacle, however, for exciting things like letters.

Near a side door on a small table or from a hook on the wall place a bright green painted tin basket to hold the gardening tools. A garden hat of cretonne may hang from it. They will help in the decorative scheme.

In the sunniest window of the living or dining room you may have a white wicker flower stand. It is fitted with a tin trough which lifts out for refilling, watering of the plants, etc. An arch of white wicker extends over this box, and one can just imagine a small climbing rose finding its way along this trellis. A white bird cage is suspended in the middle directly above the plant box, where a silver throated canary may trill his loudest among the plants and flowers.

Right in the same living room or on the porch one may tuck this mending basket without any fear of its jarring on the artistic and critical eye. It is a nice, plump market basket of stout wicker, rather round as to shape. Two flaps of stiffened cretonne are edged with a cotton braid and maybe lifted up like the lids of a market basket. This will be found a dustproof hiding place for mending or light sewing when the outdoors beckons.

On Being Natural.

The world has established certain standards of etiquette for those who would be recognized as well bred and cultured. The earlier in life these standards are adopted the better for the woman. Fortunate, indeed, is she who has cultivated early in life a soft voice, poise, grace of carriage and the "pretty" way of doing things. She need have no fear that in a moment of excitement she will forget herself and be guilty of a faux pas.

Absolutely destructive of naturalness in manner is self consciousness. This affliction amounts at times almost to an obsession. It causes women to shout who wish to speak low; it leads often to an assumption of bravado, causing criticism that may be unjust, but is invited and unavoidable.

It is a gentle art, the art of being natural; one that is essential to every woman who wishes to be regarded as interesting, attractive and popular. No woman with an ounce of [illegible] will allow herself to become the victim of affectation if she would [illegible] that is possible out of life.

Rich Strawberry Shortcake.

Two cupfuls of flour, quarter of a cupful of sugar, four teaspoonfuls of baking powder, half a teaspoonful of salt, one egg, a third of a cupful of butter, one tablespoonful of lard and a third of a cupful of milk. Mix carefully, roll in two cakes and bake in two pie tins. When browned split and butter generously, fill layers with fresh strawberries crushed in sugar, pile berries atop and over all pour a pint of sweet cream.

HIGH SCHOOL FRESHIES DEFEATED YESTERDAY

The Fourth and Rochester street school baseball team defeated the High school freshmen yesterday, 5—3. The game was cut to seven innings and was nip and tuck until the third, when the score stood, 1 to 1. The Freshies scored two tallies in this frame, but a batting rally by the graded school team netted four runs in the final inning.

ROYAL AND SELECT MASTERS ENTERTAINED

Royal and select degrees were conferred upon a large class of candidates last night at the Masonic Temple in this city, by a degree team of members of Oswego and Phoenix lodges and Fulton Lodge, No. 60. The assembly was largely attended by visiting Masons, and refreshments and a social evening were enjoyed after the degree work had been finished.

LANDLADY SEEKS TO RESTRAIN A TENANT

An action for an injunction has been instigated in Oswego by Mrs. Kittie F. Hall, of this city, who seeks to restrain Mrs. Letitia Whorl, also of Fulton, from occupying any part of a double house except four certain rooms. An undertaking in the sum of $500 was filed with the County Clerk yesterday.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

AN EIGHT YEARS' RECORD

A Test That Must Impress Times' Readers.

Over eight years is a long time.
A rigid test of merit.
Mrs. Hill testified over eight years ago.
She now says the results were permanent.
Can Fulton ask for better evidence?
Mrs. George Hill, 372 S. First St., Fulton, says: "One of the family complained a good deal of pains through the small of the back and seemed to be all out of sorts. One box of Doan's Kidney Pills cured the sufferer of backache and restored this one to good health. Another of the family suffered from sciatica and had trouble with the back. Doan's Kidney Pills acted splendidly in that case, too. (Statement given Oct. 25, 1906).

LASTING RESULTS.
MORE THAN SIX YEARS LATER
Mrs. Hill said: "The benefit Doan's Kidney Pills gave in our family has been permanent."
Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Hill has twice publicly recommended. Foster-Milburn Co., Props., Buffalo, N.Y.

CAMPAIGN FOR BETTER STATE LABOR LAWS

Washingon, Samuel Gompers, president of the American Federation of Labor, is on his way to Chicag to-day to inaugurate a nation-wide campaign for legislation making state labor laws conform to the labor provisions of the Clayton anti-trust law.

The Clayton law now provides that labor is not a "commodity nor an article of commerce." It effectually prevents prosecution of labor men for attempting, as they see fit, to try to get shorter hours or increased pay. Gompers has prepared a model bill, which he will try to have passed by state legislatures.

Gompers will speak at mass meetings of state labor men in four states Illinois, Indiana, Ohio and Michigan. He will speak a Chicago tomorrow, a Fort Wayne Decoration Day, at Columbus Wednesday, (on May 21), and at Detroit June 2. In a statement to the United Press just before his departure he said:

"The American Federation of Labor obtained amendments to the Clayton acts pointing out that labor is not a commodity nor article of commerce. This frees labor from the application of the provisions of the anti-trust laws and from judicial interpretation of the laws. Under this law a suit such as that against the hatters of Danbury will not be maintained. The rights of workers to exercise their normal activities for their own protection and welfare have been made lawful.

"The addition to the Clayton law corrects the abuse of the injunctive writ and provides a jury trial in any case of alleged contempt where the 'contempt' was committed outside of court.

"This, however, is a federal law, and covers only federal courts. State laws in many instances make organizations of co-workers amenable to prosecution. The abuse of the writ of injunction within the state still holds.

"Largely the campaign will be carried on by state federations. In Pennsylvania, Georgia, West Virginia, Michigan, Texas, Wisconsin and California, Legislatures have acted already to make the demand for this legislation paramount in their political activities.

"In Illinois, Indiana, Ohio, New York, Iowa and Oregon active preparation is being made to make the bill an issue in the state campaigns.

"The campaign will be inauguraed at Chicago to-morrow, May 28, at a statewide conference. Representatives of all state labor will be present.

"Besides the campaign in those states, organizers will carry to fight to other states—particularly to Utah and Colorado."

Acts of Parliament.

The wording of the acts of parliament today shows practically the exact same determination to rule by representative government as existed in the old, purely Saxon days.

"Be it enacted," the parliamentary law reads, "by the king's most excellent majesty, by and with advice and consent of the lords spiritual and temporal and common, in this present parliament assembled."

There is something even more royal and dominant in that phrase "by and with the consent of" the members of the two houses of parliament than would seem to lie even in "the king's most excellent majesty."—Woman's Home Companion.

The Copts of Egypt.

The Copts in Egypt are the bookkeepers and scribes; they are also the jewelers and embroiderers. Their ancient tongue has fallen into disuse and is practically a dead language. They now use Arabic, like all the rest of the nation, but the speech survives in their church service, a part of which is still given in the old tongue, though it is said that even the priests themselves do not always understand what they are saying, having merely learned the sentences by heart, so that they can repeat them as a matter of form.

The Angel.

Wifie—I am trimming up last year's hat to save the cost of a new one! Hubby—How good of you! You're a perfect little angel, my dear! Wifie—Am I? Then give me $10 to buy wings.—Exchange.

No charge made for this space.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

Assassins of character—gossips—were unsparingly denounced in a recent sermon delivered by Dr. Henry L. Davis, pastor of the First Methodist Episcopal Church in South Bend, Ind. The tenor of the minister's excoriations was such as could not be misunderstood, even by the most adamant, and reported to have left a noticeably pronounced effect wherever the pastorial influence of Dr. Davis is felt.

"More harm is done through the sins of the tongue than any other sins in the world," was one of his significant declarations. The sin of gossip, he said, was equally adjudged flagrant in church circles as in the social world. It afflicts alike the wealthy, the poor, the strong and the weak, the good, bad and indifferent.

Perjury, both in the court room and before the public; persecution in the religious and political world; slander and gossip were given as the three great ways in which sins of the tongue gain entrance into the world. That the great sin was not confined to non-Christians alone, he said, was proved by the quarrels that have for centuries existed between churches.

Examples were cited by Dr. Davis showing how promising careers, and innocent young lives had been ruthlessly wrecked by the idlest of gossips, growing falser, as it spread from mouth to mouth, into a crushing force.

"The great effect of this sin is threefold. It injures the man who utters the sin, for letting his tongue control himself he will also be under the control of the rest of his body. The person to whom it is spoken too, is injured, as the sin is like fire in spreading, when it is uttered. The people that it is spoken of are injured also, harm being done their character, as it is impossible to unsay things once said.

"No man who is good and loves God can utter slander or gossip against his fellow men, for a true Christian cannot hate a fellowman."

It must be conceded that this taking to task his parishioners evidenced no little spirit of courageousness in Dr. Davis. Even the most militant gossiper shrinks from the brand, and that the reverend gentleman's ears were not set burning by criticism for his sermon is possibly due more to fear of being charged with a pinching shoe, rather than the observance of charity. However that may be, the divine is to be strongly commended for his onslaught on tongue wagging, and his example could well be emulated in other churches and tabernacles throughout the land. It might have serious effect in reducing ministerial gifts in the way of sox, ties and slippers at Yule-tide, but it will prove highly beneficial to society, but immediate and in years to come.

Dr. Davis was unmistakably right in declaring that no person be he layman or minister—can be a slanderer and call himself a Christian. Nor can the assassin of morals lay much of any claim to good citizenship. It is eminently right and proper for ministers of the gospel to declare themselves strongly and unequivocally on this subject. The stamping out of the evils depicted by the South Bend clergyman should be esteemed as among the church's high aims and laudable achievements. Assassination of character is but slightly removed in degree from assassination of person. Infamy is indelibly stamped on both.

* * *

Schopenhauer says:

Politness is the conventional and systematic disavowal of egoism in the trifles of daily intercourse, and is, of course, a piece of recognized hypocrisy. Gentle manners are expected and commended, because that which they conceal egoism—is so odious that no one wishes to see it, however, much it is known to be there; just as people like to have repulsive objects hidden at least by a curtain.

Ill will, or spitefulness, is very frequent indeed, almost a common thing. It is very fortunate for us that the cloak which prudence and politeness throw over this vice prevents us from seeing how general it is, and how the war of all against all is constantly waged, at least in thought. Yet ever an anon there is some appearance of it, for instance, in the relentless backbiting so frequently observed, while its clearest manifestation is found in all outbreaks of anger, which for the most part, are quite disproportional to their cause, and which could hardly be so violent had they not been compressed—like gunpowder into the explosive compound of long cherished brooding hatred."

The Ruling Passion.

Among the well known figures of the Paris salons mentioned in "An Eighteenth Century Marquise" was Bossut, mathematician and abbe, who had translated Maria Agnesi's work on the infinitesimal calculus. "When he was dying Maupertius was by his bedside. No one knew whether the agony was ended. 'Twelve times twelve?' asked Maupertius in a distinct voice. 'One hundred and forty-four,' came the automatic answer as Bossut breathed his last."

A Matter of Looks.

First Boarding House Keeper—I always keep my boarders longer than you do. Second Boarding House Keeper—Oh, I don't know! You keep them so thin that they look longer than they really are.—Exchange.

An Indian Custom.

A social custom of the Crow Indian, which is often encountered among other Indian tribes and also among the natives of Australia and Africa, is the mother-in-law taboo. A man and his wife's mother never talk with each other, not from any motives of hostility, but rather as a token of mutual respect.—Southern Workman.

Poor Middle Child.

Middle children are to be pitied for being condemned to be constantly made over out of the luckier eldest's outgrown raiment. How can Tommy be sure he is Tommy when he is always walking around in Johnny's shoes? Or Polly, grown to girlhood, ever find her own heart when all her life it has beaten under Anna's pinafore?—Atlantic.

SCIENCE—INDUSTRY.

Potash In Western Utah.

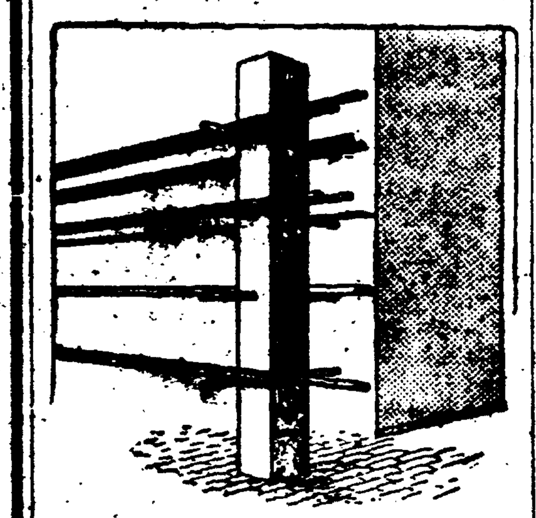
Potash in surprisingly large proportions is present in the brines and muds of the Salduro marsh, a sink in the Salt Lake desert, about sixty miles west of the southwest edge of Great Salt lake. From the clays underlying the salt body which covers the marsh the United States geological survey collected samples at depths of eight to twelve feet, in which the dissolved salts were found to contain from 2 to about 3½ per cent of potash, and 2¼ per cent was found in the soluble salts at a depth of about four feet. Of the dissolved salts contained in the brines occupying the spaces between the salt crystals in the crust overlying these muds 3 to 4 per cent was found to be potash. While no extensive exploratory work has been done by the survey to show the area of the deposit, it is believed that the amount of potash present in the region, if it can be extracted with commercial success, is sufficient to provide a valuable source of supply to the country.

Tempering Cold Chisels.

Draw the chisel down to the thickness you want it. Then take an eight inch flat file and bring the point of your chisel to a rather blunt but even edge. Then give it a dark cherry red heat, and be sure your heat is even. Then hold your chisel straight up and draw down and dip it slowly into cold water three-eighths or one-half inch. When that much of the chisel is cool take it out and watch your temper. Be sure it runs even. After it starts to run first comes the pigeon blue; when that disappears your will see a very pale straw color. When the straw color has very nearly disappeared dip it quickly in water to stop the temper from running. Do not hold in water too long. Dip it again, keeping it out of water long enough so that the point gets dry each time you dip it until cool.—Blacksmith and Wheelwright.

Guard For Blacksmith's Rack.

Danger from contact with exposed ends of iron bars in blacksmith shops is overcome by the device shown in the sketch, says Popular Mechanics. A curtain was hung at each end of the stock rack so that when there was



CURTAIN WARNS OF DANGER.

danger of striking the exposed ends the curtain gave warning. This device was found to be of especial advantage where the stock rack is placed in a dimly lighted portion of the shop. The curtain may be drawn aside or arranged to lift to the ceiling with a cord when stock is being removed.

Tool For Dynamite Caps.

A tool which undoubtedly will prove a great convenience to settlers and others who use dynamite has been invented, but not patented, by Carl D. Livingston of the College of Agriculture of the University of Wisconsin. It is a combination fuse cutter, cap crimper and fuse slitter all in one. The new tool, which is shaped like a pair of pruning shears, has an adjustable blade, which can be sharpened easily when desired. Firm, smooth and tight connections between fuse and cap are obtained by means of a special crimping device, which is placed directly under the axis. A special slitting device on the end of the cutting blade is a feature of the tool which makes it different from any hitherto introduced.

Making String Solder.

String solder of a size convenient for electrical work or other soldering, where only a small quantity is desired, may be made by adapting a ladle for the purpose, says Popular Mechanics. Drill a small hole through the ladle near its upper edge. Melt the solder and pour it through the small hole, permitting it to fall on a slab of marble, slate or stone. The ladle must be moved in zigzag lines in order to prevent the string from crossing and to make it possible to roll up the solder into rings of a convenient size.

Leather Tire Patch.

A leather patch fixed over a tire puncture with shellac will be found to give satisfaction and may be attached easily. Cut the patch somewhat larger than the puncture and thin out its edges with a knife, says Popular Mechanics. Melt flakes of shellac in a flame, fusing them, and rub the hot mixture on the patch and tire, smoothing it down quickly. Such a patch may be placed over a plug and will aid in holding it in place.

Largest Dredge Boats.

Two 1,700 ton dredge boats are pumping from 12,000 to 38,500 cubic yards of material apiece daily from the lake and harbor bottom at Toronto to make the 32,000,000 yard fill required for the harbor improvements now being carried out by that city. In point of capacity, if not of displacement, they are thought to be the largest single dredging units ever built.—Engineering Record.

Girl Born Blind Can See.

Lehighton, Pa.—Born blind, Miss Ida Friend now can see. She has passed her twenty-fifth year. Restoration came by an operation performed at the Wills Eye hospital, Philadelphia, Mrs. Eckley B. Coxe, owner of many coal mines, bearing the expense. Surgeons say she ultimately will have excellent vision.

MEMORY DAY SHOULD BE A GOOD DAY: TOMORROW

It does not always happen that the men who paint the best word pictures of country life are those who from actual experience know much about it. Sometimes it happens that such men were born in the country, and have never gotten over it, or they are more appreciative of what is to be found outdoors than those who live in the open. Right now is when most of us crave for the great-out-of-doors. We cannot help it and it is right that we should have a full and running over measure of the sight of nature in all its glory. Memorial Day, to-morrow, is a day of reverence for the memory of the men and women who gave freely of their lives and their fortunes that the Union of States might be preserved. It is good that the day should be set apart each year and it would be better for us as Americans were we to observe it as sacredly as we would have the first day of the week observed; but such is not the tendency of the times. We are living in an age when much thought, time and money are spent in amusements; when we feel that we must satiate our every inclination to indulge in thoughts distracting to sacred institutions. But to-morrow we may, if we will, take a day off and go into the country. Go anywhere we will. Climb up on the fence and sit down. Look across the fields. And then if we do not thank God that we live in this good land, there will surely be something wrong with us.

Yes, let us go into the country to-morrow—that is, if we have no sacred duty to perform. And let us look at the cattle in the pasture—their sides rounded from the juicy grass they browse. And then over there, on the hillside—at those white dots, the chickens. And then just behind the comfortable looking farm house the orchard of trees, every one of which is a bouquet; but who can describe an orchard? We feel that all one can do is to sit on the fence and look at it and marvel at the processes of God who builds an apple out of nothing and flavors it with sunshine and dew.

Please go out in the country to-morrow, anywhere, and thank God that you are living in this good old world, and maybe next year you will come to the conclusion that Memorial Day should be nothing else than Memory Day.

Opinions

BYRAN A THORN IN SUFFRAGE SIDE.

William Jennings Bryan has been speaking in Iowa at his own expense. He is engaged in advocating woman suffrage; but even the fact, somewhat surprising though it is, that the Great Commoner is receiving no monetary reward for his endeavors will not cause the votes for women enthusiasts to feel grateful for his present activities in their behalf. There is, of course, a widespread feeling that Bryan's support of any cause is detrimental to that cause, but the Suffragists have a concrete reason for resenting his championship. Bryan insists, against the earnest protests of the leaders of the suffrage crusade, in interweaving in his public speeches arguments in favor of votes for women with those which he advances in behalf of prohibition in such an adroit way that he strengthens the belief in many quarters that all women Suffragists are radical opponents to the liquor traffic. And his Iowa activities have been quickly followed by the announcement that he may run for president on the Prohibition platform.

The statesmanlike women at the head of the suffrage movement wisely refuse to fog the issue upon which they are seeking action by allowing questions alien to the main subject to become involved therein. They maintain that at the present crisis in the suffrage crusade it is inexpedient for any unfranchised woman to declare herself a Prohibitionist or a Republican or a Democrat or a Progressive or a friend or opponent of preparedness. After women obtain the vote, they declare, it will be time enough for them to make public as individuals their views upon political questions of the day.—N. Y. Sun.

GERMAN EFFICIENCY.

Dr. Charles W. Elliott believes that the war will mean a boom for civil service reform in this country because of the lessons taught by German efficiency. The German civil service is under a military autocracy and is of course, very efficient, but not over polite to the public it serves. It makes a civil bureaucracy, which is hardly compatible with democracy. In this country the civil service employe, winning his way by merit and fitness, nevertheless is not secure in his place if he does not keep the attitude of a public servant and not of a dictator. It is one of the marks of efficiency that the public servant shall not be autocratic before the public he serves. The civil service of this country is not yet completely organized and lacks the efficiency of the German civil service, but it is more pleasant to deal with.—Watertown Times.

THE JEW.

Primarily the word "Jew" implies those who profess the Jewish religon.

The second use of the word "Jew" implies that the person belongs to a particular race of people, quite apart from his religious beliefs.

Then there is the third use of the word "Jew." The medieval church purposely shut out all responsible callings to the Jew, in order to impress upon Christians the superiority of their faith. And it is this suggestion of opprobrium or contempt which I would respectfully call your attention to.

However obsolete, unjustified, this third application of the word "Jew" may be, it is an expression that should be molded into different form. All fair-minded individuals of whatever creed or station will like to see this common error done away with, because of a spirit of fairness and on account of other good and sufficient reasons.

The word "Jew" is a noun, and should never be used as an adjective or verb. It is both objectionable and vulgar to speak of "Jew girls," or "Jew stores." The phrase, "to jew down," is a slang survival of the medieval term of opprobrium.

However, the words "Jew" and "Jewish" can never be objectionable when applied to the whole body of Israel or to whole classes within the body; as, for instance, "Jewish wives," "Jewish children," etc. Also, when contrast is being made with other religions; as, "Jews observe Passover and Christians Easter."

Then again, the word "Hebrew" should not be used instead of "Jew." As a noun, it connotes rather the Jewish people of the distant past; as, "the ancient Hebrews." It is also used as an adjective; as, "the Hebrew language," "Hebrew literature," etc. But it is historical rather than religious, for one cannot say "the Hebrew religion," for it is "the Jewish religion."

A people that have passed through the fires of centuries, unscathed, trampled into dust, and yet never combining with the dust into which they were trampled—you must see in such lives a witness and a warning.

Finally, I ask you in a spirit of fairness, in the serene region of human sympathy, if you know of the generosity, the graces, the virtues of the oldest people on earth, or have you measured their moral worth by the latitude and longitude of a certain class of huddled humans on some particular Side! or, are you measuring the bloodless slave drivers who thrive on child labor, convenient fires, frequent failures, or continuous lying and deception in business?

Some day this magazine will publish several pages of human history that will show up this lower human stratum which is largely in the minority, and show it up all to the credit of the respectable, the high-class Jew.—The Silent Partner.

TOBACCO MEN IN NATIONAL CONVENTION

Washingon—A billion and a half dollars of capital was represented here to-day when the greatest convention of tobacco merchants in the history of the country began at the New Willard. There are 500 delegates from every section of the country, and representing every branch of the industry. From growers to leaf dealers, to manufacturer, jobber and the men behind the counters.

It is the first national convention of tobacco merchants. Cigars that king couldn't afford to buy in any quantity will be smoked at to-night's banquet.

When a man tries to stop smoking via the drop it in his coffee cure route, he takes a chance on contracting the cocaine or other drug habits, the conclave was told. It plans a fight on the forty-two varieties of compounds which claim to destroy the desire for tobacco.

Impressive figures of the tobacco industry were reported showing that tobacco raising utilizes 1,225 acres of land, the federal government collects $110,000,000 revenue tax, the industry pays $175,000,000 wages to 200,000 workers and advertising gets $30,000,000 a year.

MISS COSTER BECOMES COUNT'S BRIDE TO-DAY

New York—Count Otto Salm-Hoogstraeten, first lieutenant in the Austrian Thirteenth dragoon regiment, whose home is in Reichenau, Austria, and Miss Maud Coster of this city will be quietly married to-day at the home of the bride's mother.

The Count is the second son of Count Alfred Salm-Hoogstraeten and the brother of Count Ludwig, military aide to the Governor of Vienna. Count Otto has a younger brother, Alexander, who was in this country with him, but who sailed on August 6, 1914, to fight in the ranks of his Fatherland. Although Count Otto was supposed to have sailed about the same time, he is interned in this country, unable to get across.

Miss Coster is the youngest daughter of the late Charles Henry Coster, who was a member of the firm of J. P. Morgan & Co. She is a sister of Mrs. Sumner Gerard, whose husband is a younger brother of the American Ambassador to Germany.

Miss Coster's mother was formerly Miss Emily Pell, a daughter of the late Clarence Pell and of Mrs. Pell of Newport. Miss Coster has one brother, Charles Henry Coster.

LEGEND OF WILLIAM TELL.

The Story Was Old In Denmark Before the Swiss Borrowed It.

Do you know who shot the apple on the head of the little boy? Why, William Tell, of course! Everybody knows how Tell delivered Switzerland from the tyranny of Austria. At least everybody used to know. Unfortunately for pure romance, the historian and the investigator have been unduly active in the past quarter of a century, and the result has left us few heroes with enough clothing of romance to cover their skeletons.

We have read Schiller's beautiful and inspiring play, either in our college German course or in translation, and we cling to William Tell with all the ardor of youthful enthusiasm. And along comes the historian and tells us that it is all a myth, that the dates fixed by the Swiss chronicles on the subject do not coincide with the dates of the historic events that were supposed to be taking place in Austria at the same time and that earlier records of Switzerland make no mention of the archer's master shot.

The selfsame story is told in the Danish legends, two centuries before it crops out in the Swiss narrative, and further investigation shows that it was borrowed by the Danes, the original apple having been shot from the original child's head by a German bowman named Eigil, when King Nidung sought to test the man's skill and nerve. In that remote story it is related that Eigil concealed another arrow in his bosom with which to kill the king if he injured his child. John Fiske, the American historian, was largely responsible for robbing us of William Tell.—St. Louis Globe-Democrat.

JAPANESE STAGE CUSTOMS.

Actors and the Flower Path From the Green Room Entrance.

The profession of an actor in Japan is not considered a high one, says Mr. M. C. Marcus, the author of a work on the Japanese stage, and on the average they are not well paid. Still, there are exceptions. "When a play is staged it runs at least for twenty-three consecutive days. For such a term a first class man would earn about $1,200, and his annual income may be estimated at $7,500. But it must not be forgotten that out of this sum he must provide his own costumes, which are very expensive.

"The curtain does not rise, but is pulled sideways, and one can easily see the attendants who are intrusted with this work. The orchestra is hidden behind the scenery, while in a sort of proscenium box the reciter sits concealed behind a curtain of thin bamboo. There is no applause by clapping hands, as in our theaters, but the public stimulates the actors by exclamations in a way that may be compared to the encouraging and cheering of the dancers in Spain.

"From the greenroom a bridge leads to the platform. This bridge is called Flowerpath. The greenroom is closed by a drapery, which the actors of small parts must lift for themselves. When the performers have some importance and reputation they have an attendant for the purpose of lifting this drapery. But the first actors, as well of nogu (drama) as of kyogen (comedy), have the title taiya, which confers the right to two assistants to hold up the curtain of the greenroom for their entries and exits."

Sing a Song of Sixpence.

The London Globe's explanation of the rime "Sing a Song of Sixpence" is: "The four and twenty blackbirds represent the four and twenty hours. The bottom of the pie is the world. The top crust represents the sky. The opening of the pie is the dawn of the day, when the birds begin to sing, and surely such a sight is fit for a king. The king in his counting house counting out his money is the sun. The money the king is counting represents the golden sunshine. The queen, who sits in the parlor, is the moon. The honey she is eating is the moonlight. The industrious maid who is working in the garden before the sun has risen is the day dawn, and the clothes she hangs out are clouds. The bird that so tragically ends the song by nipping off her nose is the hour of sunset."

England's Coldest Days.

In his diary for March, 1658, John Evelyn records that the weather had been "the severest that any man alive had known in England. The crows' feet were frozen to their prey. Islands of ice inclosed both fish and fowl frozen, and some persons in their boats." For March 1667, he chronicles, "Great frosts, prodigious at the vernal equinox."—London Chronicle.

His Lucky Catch.

"H'lo, Jones! Hear you been fishing."
"Yep."
"When'd you go?"
"Four-thirty a. m. train out."
"Any luck?"
"Yep; great."
"What'd you catch?"
"Six-thirty p. m. train in."—Exchange.

No Change of Plan.

"And after they had married in haste I suppose they repented at leisure."

"No; they were perfectly consistent. They repented in haste also."—Richmond Times-Dispatch.

A Mistake.

"That baby takes after its father."

"Oh, you don't know anything about its father. He never would leave anything behind for even a baby to take."—Baltimore American.

[illegible] responsibility of human life.—Woodrow Wilson.

Days You'll Never Forget

CITES U. S. GROWTH

Uncle Joe Cannon Tells of Some Changes In Forty-four Years.

SHOWS AGE IS NO HANDICAP.

Says Uncle Sam Is Two and One-half Times Bigger Than When He Broke Into Congress—Has Retained Subtleness Despite His Eighty Years.

Washington.—Reclining on the sofa in his office just off the chamber of the house of representatives, his well known cigar at the proper angle in his mouth, Uncle Joe Cannon, who recently celebrated his eightieth birthday, told a correspondent on that occasion of some of the changes which have occurred in the United States during the forty-four years he has been in public life, forty of which have been spent in congress.

Taking his cigar out of his mouth, Uncle Joe squinted at the end of it a moment, and then, replacing it most carefully at its accustomed angle, he said:

"I suppose you want to know something about the changes which have taken place since I first entered congress back in 1873. Why, my boy, the

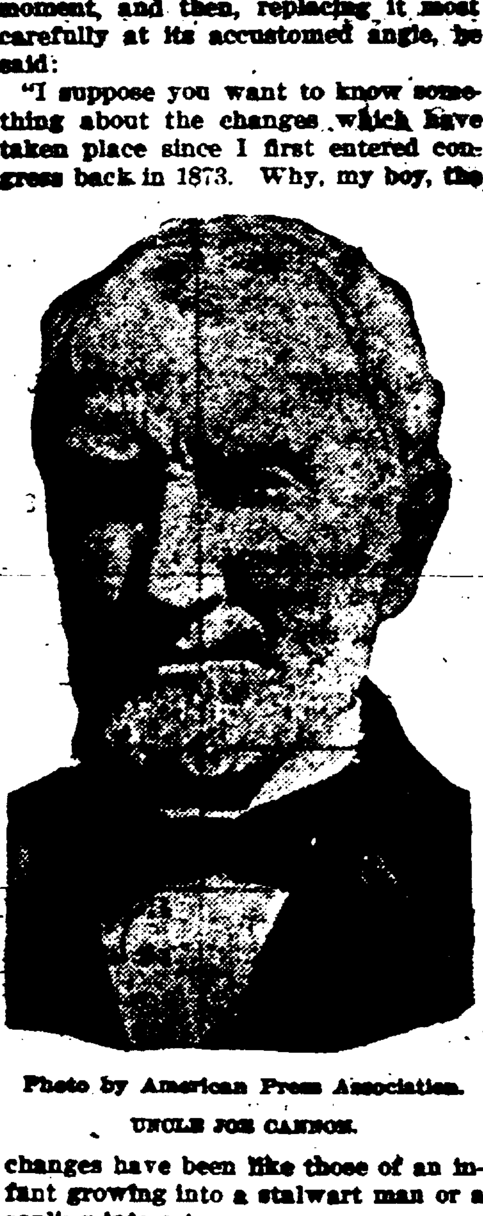

Photo by American Press Association.

UNCLE JOE CANNON.

changes have been like those of an infant growing into a stalwart man or a sapling into a tree.

"Uncle Sam is two and a half times as big as he was when I broke into congress. I mean by that in physical stature as measured by population. In other ways the country has multiplied four, five and even ten times.

"We had thirty-seven states and less than 40,000,000 population when I came to congress. We now have forty-eight states and 100,000,000 population at home, with ten or fifteen millions more in Hawaii, Porto Rico and the Philippines. Our total wealth then was given at $[illegible], gold basis, or $[illegible]000,000,000 currency, but now it is $187,000,000,000, without any distinction as to the unit of measure.

"This enormous wealth is not in Wall street or within a thousand miles of it. It is not gathered into banks or trust companies, but is scattered over the broad land—the prairies, the plains and the mountains as well as in the factories and commercial centers. In fact, there is more of this wealth west of the Mississippi river than in New York and New England combined. So you can see that Uncle Sam has grown, and it has been something of a job for congress to keep up with the development of the country."

"What do you think has been congress' most farreaching act during this period?"

"I would hardly call it an act. I would call it a discovery," replied Uncle Joe. "It was the discovery of the general welfare clause of the constitution. We used to have long constitutional arguments against any kind of internal improvements by the federal government, but now we just read the general welfare clause of that old document and appropriate money for any scheme that may be proposed.

"This change of sentiment is pretty general, but it is marked in the delegations from the south."

The correspondent met with this answer when he mentioned legislation: "I am not going to discuss politics."

Getting up from the couch, he stretched his arms, and then, just to show he is eighty years young, Uncle Joe kicked as high as his chin.

"Can you do that, young man?" he asked. And then in reply he said:

"No, and there aren't ten other men in the house who can."

The correspondent expressed the belief that when a person reached the fourscore milestone it was time to take it easy, and Uncle Joe replied:

"Well, I do take it easy. I'm entitled to it, am I not? I have things just about as fine as any man could wish. I have lots of friends, no enemies that I know of, and lots of hope and ambition."

Although he has been mixed up in every great political fight since the election of Lincoln in 1860, Uncle Joe declined to discuss politics in the concrete.

"It would be hardly fitting," he said. "People insist I am a partisan. I am a Republican, but this isn't a time for me to talk party politics. My friends are in all of the parties."

NURSE TO BECOME QUEEN OF ISLAND

Will Rule Small Tribe in the Mideastern Pacific.

KINGDOM HAS 195 SOULS.

Pitcairn Island, Belonging to Great Britain, Has an Area of Two Square Miles—First Settled In 1790 by Members of Ship Crew Who Had Mutinied. Twenty-six Persons Started Tribe.

Miss Emily McCoy, a graduate nurse, who has lived in Bridgeport, Conn., eight years, will start within a few weeks for Pitcairn island, in the mideastern Pacific ocean, where she expects in time to be chosen as queen to succeed her father, who has been ruler of the little kingdom of 195 souls for many years.

She is going back to her people with twentieth century ideas and many plans, one of which is the determination to practice the art of healing among the inhabitants, to whom physicians, nurses and dentists have never been known since the island was colonized by mutineers 126 years ago.

Miss McCoy left Pitcairn island fifteen years ago by a missionary boat following the death of her mother, who suffered much because of want of medical aid. She promised then that she would not return until she equipped herself as a physician and nurse in order to be able to minister to the physical wants of the people of the island on which she was born. She studied medicine and dentistry at Samoa, and since she has been in this country she has thoroughly equipped herself in the science of nursing. She believes that she is qualified to do a mighty work of mercy among those she loves.

Will Take a Piano.

Miss McCoy will take with her a piano. With the exception of an organ which Queen Victoria gave to the Pitcairn islanders in 1870 the piano, she says, will be the only musical instrument on the island.

Inasmuch as the Pitcairn women are in the majority and women have the vote as well as men, there doesn't seem to be any doubt that Miss McCoy will in time be called upon to step into her father's shoes as the ruler. The ruler is chosen by direct election.

Ships seldom go to Pitcairn island, and Miss McCoy has been figuring for eight years just how to get home. The opening of the Panama canal gives vessels a direct route to the Samoan islands, and she is confident that she will be able to complete the trip without much difficulty.

Pitcairn island belongs to Great Britain. It lies south of the Paumotu archipelago and is a hundred miles from the nearest member of this group. It has an area of two square miles. The island was settled in 1790 by members of the crew of the ship Bounty, who had mutinied. Headed by Fletcher Christian, who led the mutineers, eight white men, six Polynesian men and twelve Polynesian women took possession of the beautiful island and burned the Bounty. Alexander Smith was the only man alive by 1800. He later took the name of Alexander John Adams and trained the youths who were left in his charge.

He was succeeded after his death in 1829 by George Hunn Nobbs, who was appointed pastor. In 1831 Joshua Hill, an adventurer, appeared at Pitcairn and, making a bluff that he was a government agent, tyrannized over the islanders until a British man-of-war put him out of business in 1838.

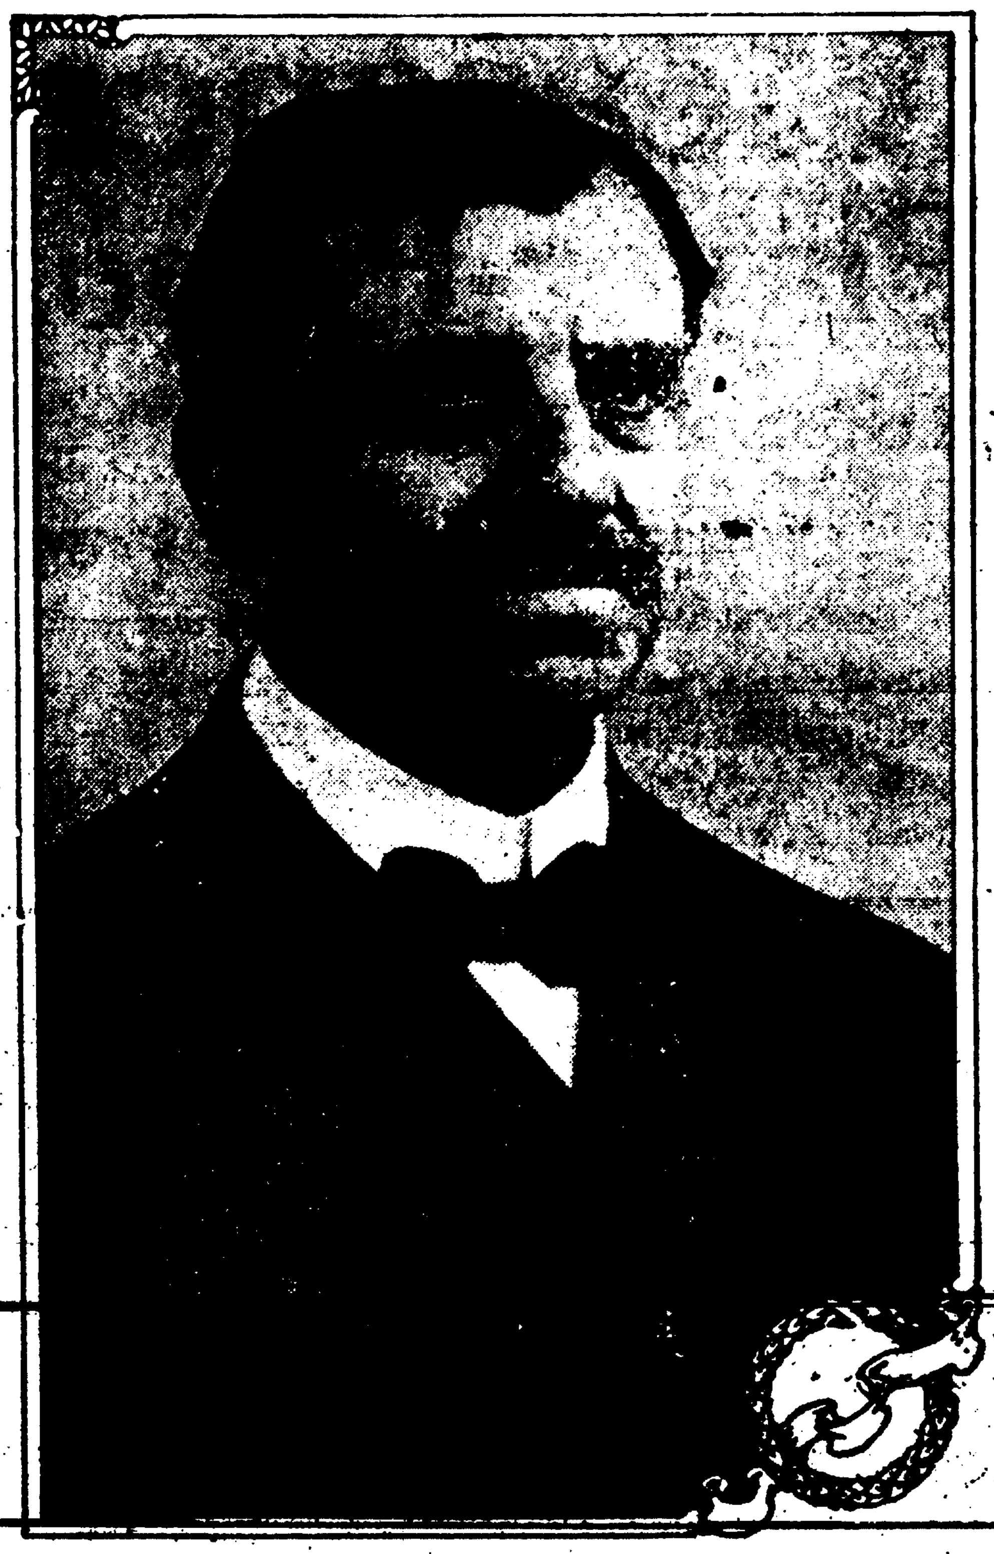
The islanders are closely intermarried and have, it is said, but five family names. All speak and write English and are Seventh Day Adventists. They have no money, and intoxication is unknown. Girls over seventeen can vote.

Ships rarely visit Pitcairn except when the crews are in need of vegetables and fruits.

Tin Can Hatcheries.

Empty tin cans, bottles and jars thrown into heaps in back yards or on vacant lots catch rainwater. Mosquitoes lay their eggs in stagnant water, and the water in an old tin can is just as good an incubator for mosquitoes as is that of a pond or a puddle. Mosquitoes carry the germs of malaria. Not all mosquitoes are malaria mosquitoes, of course, but any mosquito may be. If the empty can or discarded jar incubators are eliminated the mosquitoes will have fewer breeding places; consequently there will be fewer mosquitoes. Neighborhoods where there are no ponds, puddles or stagnant streams and no piles of cans partly filled with rainwater will have no mosquitoes, because the insects fly only a limited distance from their breeding places. Therefore if residents of such localities develop malaria they will have had to go somewhere else to contract it.

Dr. Russell H. Conwell



"THE most popular lecturer in the world." He is also one of the best beloved. The entire proceeds of his forty-five years of lecturing, over $8,000,000, have been devoted to the education of more than 3,000 young men. This man, pastor of America's largest Protestant church, college president, world traveler, author and lecturer, started as a farmer boy and worked his way through college. During his long lifework he has laid the touch of inspiration upon the hearts of more young men than perhaps any other living man. The famous lecture, "Acres of Diamonds," which he has delivered over 8,000 times, will be his contribution to the program Chautauqua week.

PUFFING UP THE OYSTER.

Showing How Easily Four Quarts May Be Swelled Into Five.

Adulteration of oysters on the half shell, freshly opened, might be thought as difficult as adulteration of unpeeled fruit. But the purists to whom all things are impure have discovered that oysters are "adulterated" by soaking them in fresh water. It is not suggested that the water is unwholesome, either for the oysters or those who eat them. But that is not to the point. These things are all arranged for us at Washington, and the department of agriculture, which is particularly devoted to oyster culture, has issued a formal statement to all and sundry regarding the heinous practice of making oysters look plump and white by soaking them in water. It is official information that if four quarts of oysters and a quart of fresh water are placed in a five quart container and the mixture allowed to stand for several hours there will be a marked change in the appearance of the contents of the container. To the naked eye there will appear to be five quarts of dry oysters, for the container will be full and there will be little or no water in sight, it being on the inside of the plump, succulent looking oysters. The average purchaser has no means of detecting the addition of water.

That relates only to "shucked" oysters. Half shell oysters "drink" water, and thus undersized oysters may be converted into "select," beyond the detection of any but a chemist. The purpose of publishing these facts is to make it known to all lawbreakers and oyster caterers that all such oysters are "adulterated under section 7 of the food and drugs act," which provides that food is adulterated "if a substance has been substituted in whole or in part for the article."

LAW OF MOTION.

Why a Ball Follows You if Thrown In the Air While You Walk.

When you throw a ball into the air while moving your body forward or backward, either slowly or fast, the ball partakes of two motions—the upward and the forward or backward motion of your body. The ball possessed the motion of your body before it left your hand to go up into the air because your body was moving before you threw it up, and the ball was a part of you at the time.

If you are moving forward up to the time you throw the ball into the air and stop as soon as you let go of the ball, it will fall at some distance from you. Also if you throw the ball up from a standing position and move forward as soon as the ball leaves your hand the ball will fall behind you, provided you actually threw it straight up.

Of course you know that the earth is moving many miles per hour on its axis and that when you throw a ball straight into the air from a standing position, the earth and yourself, as well as the ball, move with the earth a long distance before the ball comes down again. The relative position is, however, the same. We get our sense of motion by a comparison with other objects. If you are in a train that is moving swiftly and another train goes by in the opposite direction, moving just as fast, you seem to be going twice as fast as you really are. If the train on the other track, however, is going at the same rate of speed and in the same direction as you are you will appear to be standing still.

Going back to the ball again, you will find that it always partakes of the motion of the body holding it in addition to the motion given when it is thrown up.—Philadelphia Press.

Old Time Crinoline.

The crinoline—under another name—was known and denounced in the eighteenth century, as witness the pamphlet published in England in 1745 under title of "The Enormous Abomination of the Hoop Petticoat, as the Fashion Now Is."

At that time the hoop, usually of whalebone, was often "so large as to fill the space of six men," and in 1754 a writer in the Connoisseur speaks of "hoops" capable of contracting or expanding "from the size of a butter churn to the circumference of three hogsheads."

Opened the King's Eyes.

When Fenelon was almoner to Louis XIV. his majesty was astonished to find one Sunday, instead of the usual crowded congregation, only himself and the priest. "What is the meaning of this?" said the king. "I caused it to be given out," replied the prelate, "that your majesty did not attend chapel today, that you might see who it was that came here to worship God and who to flatter the king."

Memory Training.

"I have decided," remarked Senator Sorghum, "to train my memory."

"What system will you use?"

"I don't know. I'm looking for one that will enable me, when I am interviewed, to remember what to forget."—Washington Star.

Death on the Cross.

Crucifixion was a common mode of execution among most of the old nations. It was in constant practice, especially in Assyria, Carthaginia and the Roman empire.

His Treat.

Bacon—Been to see the doctor?

Egbert—Sure thing.

"Did he treat you?"

"Oh, no; it was my treat. It cost me $2."—Buffalo News.

Very Resourceful.

"And is your wife a good housekeeper?"

"Oh, perfectly, mother! She can make coffee perfectly lovely with an electric curling iron."—Louisville Courier-Journal.

A ROMANCE OF THE OLDEN TIME

Strange Adventures of a Knight of the Road.

My boy, I have sent for you to make a very important announcement. Since the Earl of Ballincorne is dead, childless, you are the rightful heir to that earldom. No, don't smile incredulously, thinking your old grandmother to be wandering or in her second childhood, but listen to what I am about to tell you.

I wish I could make you understand the difference in this early part of the nineteenth century, when Mr. Stephenson has succeeded in drawing coaches by steam, and the middle of the eighteenth, when coaching was in its prime and we who rode had the excitement of an occasional robbery. The highwayman was not the brute who now murders first and robs afterward, but was often chivalrous, especially to women. When I was a girl of twenty I traveled from London to York with my father, and on the road we met one of those gentlemen. We were passing a lonely part of the road in the dusk of the evening when we heard an order to the coachman to stop. A masked man rode up to the coach window, holding a pistol in our faces and demanding our valuables. His voice was soft and musical, his hand was white and shapely, and I noticed the lace that fell over it was of the finest texture.

My father had but little money with him, but did have a valuable snuffbox that had been presented him by the king himself. He told the highwayman that if he would send it to our house in York his messenger should receive five times its value and no questions asked. The robber scarcely seemed to hear him, so intent was he upon me.

"Good sir," said the robber, "I would not take your snuffbox but for the opportunity it gives me to take it to your house myself, and if I decline the price you put upon it please set the fact down to the influence of the young lady beside you, whose beauty and innocence prevent my retaining any article of yours. I have the honor, sir, to bid you good evening."

Raising his hat with all the grace of a courtier he turned away, directing the coachman to drive on.

That winter was a gay one in our set in town, and after attending numerous entertainments at the homes of our friends we concluded to return the civilities by giving a masked ball. Our house was lighted with a thousand candles, and the costumes of the guests were of the richest and wildest variety. One of the gentlemen personated a highwayman, wearing a brace of pistols in his belt, with an ugly looking knife to match. He came up to me and asked me to dance. The moment he spoke I recognised the man who had robbed us on the road from London.

I permitted him to lead me in the minuet. He danced so gracefully, his figure was so symmetrical, he was so courtly in his manner that every one noticed him. When the dance was finished he led me away to a window where we stood, partly screened behind the curtains. Then he handed me my father's snuffbox.

"How did you dare come here?" I asked.

"I would have dared anything to see you again," he replied.

"Go at once," I said. "You will be caught. Every one has noticed you."

"I would willingly hang for the pleasure I have gained in one dance with you."

Despite the danger he ran we talked together so continuously that we began to excite attention. A strange happiness thrilled me. This fascinating highwayman had caught the fancy of a young girl naturally full of romance and to know that he was risking his life to be with me was supremely delightful. I feared for him, but could not bear to let him go. Finally I saw my father coming toward us with flashing eyes. I knew by the way he looked at my companion that he had got some clew to his identity. We vanished in the crowd, slipped through a door into the garden, and my highwayman passed off the place in safety.

Later, when my father found me, I gave him the snuffbox. He sent out to notify the police that the highwayman was in town, but he was never caught.

One spring morning I was sitting in the garden in the rear of the house when above the wall I saw the head of a man. I was about to scream when he spoke. I recognized the voice of my highwayman lover. He persuaded me to make an appointment with him in a wood near the city, and there we met on several occasions. He confessed that he was the second son of a nobleman who had taken to the road from a true love of adventure. He finally persuaded me at one of our meetings to go with him to a magistrate and be married. I never returned to my home, but sailed to France with your grandfather.

Don't start, don't bend your head for shame, at learning that you have descended from—I will not say a highwayman—a nobleman whose love for adventure blighted his life and made him an exile. My husband was beloved by all who knew him and worshiped by his wife and children. Even in those youthful escapades he never benefited by a shilling dishonestly, and many a person whom he stopped on the highway and found in need he helped.

The Earl of Ballincorne, his brother, dying, the title and estates descended to his eldest son, who died childless yesterday. His death leaves you the next in line. Here are the papers confirming you in your claim.

How Gold Plate Is Made.

There is practically no solid gold plate. The so called gold plate services are silver gilt, and only a few pieces of pure gold are owned by the English crown or any other crown. It may interest our readers to learn how this fire, mercurial or water gilding—for it is known by all of these three names—is done. Pure gold and mercury are mixed into a paste. The silver article to be gilded has been chemically cleaned, is rubbed all over with this paste, which has been placed in a silk bag, just as the blue used in washing is put in a bag. When the piece of plate has been rubbed over it is perfectly white. It is then put into an oven, and gradually the mercury goes off in fumes, leaving on the article a deposit of pure gold, which has practically become one with the piece of silver and will last for centuries.—New York Post.

He Got Valuable Information.

The story is told of the times of Aretas Blood and the old Manchester locomotive works that a student came to Mr. Blood once and wanted to study the business of locomotive building in his vacation days. The student came well recommended, and Mr. Blood, who never had much use for these "tech" people, sent him down to the boiler shop and placed him in charge of the old foreman. The old man took the "tech" man around, and in the course of the inspection of the shop they came across one boiler on the inside of which was a man at work.

"How does that man get out?" inquired the "tech" man.

"Oh," said the venerable pilot, "he doesn't get out. We always count upon losing at least one man in building a boiler."—Manchester Guardian.

Surface Heat of the Sun.

We think the sun is pretty hot in summer when the thermometer goes up to 90 degrees in the shade or out. We begin to get sunburned a long time before it reaches that high. But right on the sun's surface it is between 10,000 and 15,000 degrees hot. That is, of course, a degree of heat which we cannot conceive. How much hotter still it is on the inside of the sun we do not as yet know.

SOME GOLF TERMS.

Taken From the Dictionary of a Disgruntled Player.

Bunker—A protuberance on the face of nature rising up out of the side of a sandy depression, designed to ruin the pleasure of golf, to test the patience of the player and to serve as an inspiration for philologists, amateur and professional, in the making of new and original contributions to the world's stores of profane speech.

Luck—The good play of your competitor and the bad play of yourself.

Driver—A contrivance consisting of a long, flexible shaft, at the end of which is affixed a wooden head of the thickness of that of a rural detective, designed to propel a golf ball into the nearest difficulty within reach at a single stroke, whereby the irritation of the player and the risibilities of the spectators may be materially enhanced.

Tee—An elevated bit of earth upon which golfers are expected to stand and make an exhibition of themselves for the delectation of passersby.

Ball—A small white object, sometimes spherical in shape, manufactured and sold in large quantities at a high price, for the purpose of being lost in long grass or on side bets at so much per hole, according to the sporting proclivities of the bettors.—Life.

ZULU ELEPHANTS ALL GONE.

Not One Left In the Land That Used to Be Their Paradise.

There is not a single elephant left in the whole of Zululand, a country that was once a veritable paradise for the ponderous animals. The last of them, once a mighty creature, was found dead some time ago on a farm on the banks of the Unfolozi river, where he had lived since the early part of the reign of the great Chief Cetewayo.

An immense herd once roamed the Dugugugu forest and along the Unfolozi, but it was diminished by incessant hunting until Cetewayo one day finally drove it away forever. The chief used to make medicine of certain portions of their bodies.

On the occasion referred to he organised a mighty drive in which two elephants were killed and many wounded. One of the latter turned and trampled one of his pursuers to a pulp. It was this animal, which was captured then, whose death marked the vanishing of the animals from the country. The remainder of the herd broke away, and thereafter none of them was seen again in Zululand.—New York Times.

Genuine Sardines.

Genuine sardines are the young of the pilchard. Their name comes from the fact that they are most numerous off the coast of Sardinia. They swim in the spring in shoals containing millions—fish shaped shoals ten miles long and a half mile wide. The sardines are netted and taken at once to the shore. There they are washed, scraped and sprinkled with salt. The salt is soon removed, the heads and gills cut off and there is another washing. Then, on beds of green brush, the fish are dried in the sun. Next they are boiled in olive oil till cooked thoroughly. The packers—women always—take them now and pack them in the tin boxes we all know, filling up each box with boiling oil, fitting on the lid and making the box air tight by soldering the joints together with a jet of hot steam.

Where It Went.

"There's lots of money in stocks."

"Quite right. That's where mine went."—San Francisco Chronicle.

YOUR CHANCE TO SAVE $100 ON A PIANO PURCHASE!

Annual Summer Clearance Sale of Pianos and Player-Pianos

BEGINNING JUNE 1st

Rock-Bottom Prices

If you have been thinking of buying a Piano this year, you can't afford to let this big opportunity pass. **Look at these Prices!**

Shoninger Piano, new instrument, superb tone, you can't duplicate it for less than $400.00. Only **$275.00**

Gabler Piano, you all know the quality of these instruments, regularly $425.00. Only **$300.00**

Cable Piano, one of the best styles turned out by the great Chicago house, regularly $400.00. Only **$275.00**

Ropelt Piano, a wonderful instrument, beautiful design, tone and action. Never sold for less than $350.00. Only **$225.00**

Wonderful Values in Player-Pianos

Compare these offerings with any you have ever received anywhere:

Lauter-Humana, made in Newark, N. J., regularly $650.00. Only **$425.00**

Cable, containing Strauch action, regularly $550.00. Now **$375.00**

Standard, good serviceable player, regularly $450.00. Only **$325.00**

Baumiester, transposing keyboard, regular $500.00. Only **$325.00**

You can buy any Piano in our store on Easy Terms. These prices prevail during this sale only. They must be closed out.

We also have several good Square and Second-hand Upright Pianos at from **$10.00** to **$25.00**, suitable for a summer camp or cottage—look them over.

YOUR HOME-TOWN DEALER WILL GIVE YOU A SQUARE DEAL

61 South First Street — Fulton, New York

PEACOCK PARTY LEFT TODAY

With the cheers and cries of "God Bless you" ringing in his ears, Luther Knox Peacock left this morning for a well earned vacation at his home in Houston, Pa., after a strenuous campaign of six weeks in this city. 200 people gathered at the New York Central station shortly before eight o'clock this morning, and when the evangelist made his appearance, followed by the members of his party, there was a rush forward by those who wished to shake his hand, that almost swept Mr. Peacock off his feet. After he had chanced a very sore arm by shaking hands with all who came forward, the assemblage sang some of the favorite tabernacle hymns. There were loud shouts of "Good-bye," "God blass you!" and "Good luck" when the train finally pulled in and the cheers echoed until the train had steamed far up the track.

H. C. Warth, who conducted the choral work of the campaign, will go to his home in Oberlin, O. Mr. Warth is an attorney of no mean ability, but has given up his profession for evangelistic choral work. Mr. and Mrs. L. C. Davidson and their infant son go to Huntington, W. Va., where they will spend the summer. Miss Tillie Painter, the tabernacle soloist, returns to Irwin, Pa., and Miss Ora Speer will spend the summer in Menominee, Mich. Mr. Warth and Miss Painter will return to this city in June and give a concert at the First Methodist church.

The Peacock party will re-unite again at Winterset, Iowa, September 10 next, where the evangelist will conduct a campaign.

MEMORIAL DAY OBSERVANCES

With very few exceptions, all the stores of the city will close all day to-morrow, Memorial Day. All barber shops will be closed all day, but will remain open until ten o'clock to-night for the convenience of the patrons. There will be only one mail delivery in the city, and the rural carriers will not make a trip. The Post-Office will close at ten o'clock and will remain closed throughout the day.

* * *

The usual Memorial Day parade and exercises will be held under the auspices of the Grand Army of the Republic and many fraternal organizations will take part. The parade will cover the principal streets of the city. A salute will be fired at the soldiers' monument in East-Side Park, and the graves of the dead veterans in the local cemeteries will be decorated with flowers and the national colors. Short addresses will be made by local clergymen.

* * *

In the afternoon a baseball game at the Fair grounds with the Rowan Stars of Oswego and the Independents of this city will be the central attraction for sport lovers. The game will begin at three o'clock and if good weather prevails the contest will draw a large crowd.

* * *

Rev. Sam Small, the famous anti-saloon evangelist will preach a temperance sermon at the Fulton Tabernacle in the evening on "Uncle Sam's Water Wagon." The service will begin at 7:45 o'clock.

* * *

The Pathfinder Club will open for the summer season to-morrow and the house committee has arranged an informal dance for the evening. The club house has been decorated for the event, and Steward Holmes will serve a special dinner from noon until seven o'clock. A short program of field sports, which will include a baseball game between two teams of members has been arranged by the committee.

* * *

A large number of Fultonians plan to go to Mexico Point to-morrow, when the Twice-Told Hotel and Mexico Point Inn will open for the summer season. The management of the Inn has arranged an extensive program of entertainment for the patrons, and the music for the evening dance will be furnished by the Fulton Imperial Trio. Several Fultonians have already made dinner reservations at the Inn, and most of the guests from this city will make the trip by automobile.

* * *

Long Branch will open to-morrow, and all the old attractions and several new ones have been overhauled and installed during the past few weeks. An excursion rate will be given by the trolley company, and many Fulton young people will go to the popular resort for the opening dance in the evening.

* * *

In accordance with its usual custom, the Fulton Evening Times will not print an edition to-morrow, and the plant will be moved from its present location into its new home in the Grange building over the holiday. The new owner, Dwight J. Robbins, hopes to have the paper installed in its new home by June 1, and in the meantime the publication will be issued each evening as usual.

MAYOR EXPLODES "SCARE" STORY

Mayor Lewis and Alderman Van Walkenburgh of the Sixth Ward made a personal investigation yesterday of the case of the colored family in the Sixth Ward, who were unable, it was stated, to obtain any assistance from the Charity department and were slowly starving to death. According to an interview which was given great prominence in one of the Syracuse papers, the family had resorted to seeking assistance from neighbors. The Mayor announced this morning that such was not the case, and that the people admitted yesterday that they had not made application for help from the charities department. The individual who helped them with a small purchase of food last week did so of his own accord, the Mayor said. The people told the Mayor they had enough to eat and while they would be willing to accept gifts of clothes or other articles, they were not in such dire need as the newspaper reporter had seen fit to place them.

WAR RELIC EXHIBIT IN STORE WINDOW

C. A. Beckwith, shoe dealer, has a window display that is particularly interesting at this time, in that it brings to mind some of the events of the Civil War. A large silk flag, presented to the Fulton company by Moses Ludington, who was a prominent lawyer of this city during the war time, is displayed in the center of the window. Three long rifles, which were purchased after the war from government salvage companies, and bayonets which can be attached to the rifles are placed in the northern end of the window. A regulation cartridge case, made to hold 100 rounds of ammunition is also on display. The articles were loaned to Mr. Beckwith by local civil war veterans.

WOODMEN COMPLETE MEMORIAL DAY PLANS

Special badges of black and white in the form of a cross, will be worn by the members of the Modern Woodmen of America in the G. A. R. parade to-morrow morning.

All Woodmen are requested to meet at the new Camp room at 9 a. m. with their regular badges.

A twig of evergreen will be carried by each member.

OFFICIALS TO ATTEND MAYORS' CONFERENCE

Mayor Lewis and practically every employe of the city departments will attend one or more of the sessions of the New York State Mayors' Conference, which will be held in Syracuse, Wednesday, Thursday and Friday of this week. Several of the department heads will go to the conference Wednesday in th Mayor's car.

Fulton Keynotes

W. H. Grier and Rob Ottman returned from the Ox Creek section Saturday, with a fair sized string of swamp trout, sometimes known as bull-heads. They report that there is no foundation to the rumor that a sea serpent has been seen near Big Island.

* * *

Mrs. William Smith, of Ilion, N. Y., spent Sunday with her daughter, Mrs. Robert Ottman, of South Fifth street.

* * *

Mr. Lem Nealis is spending the holidays with his mother and sisters. He will return to Ilion to-morrow evening.

* * *

Mr. G. B. Deuel is home from Ilion and will return to that place to-morrow evening.

* * *

Miss Helen Hayes has taken a position with the New York Shop.

* * *

Miss Agnes Frazier, of Stop 33, has taken a position with M. Katz and Co.

* * *

Mrs. John Atwood has secured a position with the Fulton Salvage Co., of West Broadway.

* * *

Mr. Anson S. Lay has been removed from a Syracuse hospital to the home of Mr. and Mrs. Lay Palmer, of 301 Oneida street.

* * *

Miss Geraldine Boyd spent Sunday in Syracuse with friends.

* * *

Miss Barguerite DeBarber is visiting friends in Syracuse for a few days.

* * *

Leamon Davis has accepted a position in the office of the Chamber of Commerce.

Evangelist Peacock's Most Successful Campaign Ends

(By Edmond J. Leporte)

With the greatest demonstration of religious fervor ever witnessed in this city, the evangelistic campaign under the direction of Luther Knox Peacock, which has been in progress at the Fulton Tabernacle for the past six weeks, came to a fitting close last night. The occasion was one long to be remembered by those who were present and should go a long way toward removing the erroneous, but prevalent impression that the people of this city do not possess the "Get-Together" spirit.

The great auditorium was filled to capacity long before the evening service began, and even though benches were hastily improvised, hundreds were obliged to stand along the walls of the building, and hundreds filled the doorways. If the building had been large enough to accommodate these, and the additional throngs of people who attempted to get in after the service began, found it impossible, and reluctantly returned home, it is safe to say that an audience of 5,000 would have faced the evangelist, when he began his farewell sermon. As it was, the ushers and newspaper men, approximated the attendance at between 2,800 and 3,000 people. An accurate count was out of the question.

Not alone was the occasion memorable because of the vast throng, but in earnestness, appreciation and high religious spirit, the audience last night far surpassed all those before. The number of trail-hitters was remarkable, and brought the grand total for the campaign to 3,354, which sets a new record for a Peacock campaign, the previous high mark, made in Greenville, Pa. being 3,046.

For perhaps the only time since the beginning of the campaign one matter was equally interesting to the "knockers" of Mr. Peacock and his supporters last evening, and that was the amount of the free will offering made yesterday—the evangelist's only return for his labor here, and when the sum,—$2,560.00—a hurricane of applause from the audience proved conclusively that the offering was not only "Free-Will" but "Good-Will." From this sum the expenses and salaries of each member of the Peacock party must be deducted, and the remainder, slightly less than $2,000.00, goes to Mr. Peacock. The evangelist tendered his most sincere thanks to the people for their gift.

At the first service of the day, 2,500 people crowded the tabernacle; 2,300 attended in the afternoon, and with the audience in the evening added the total for the last day stood between 7,500 and 7,800 people.

MORNING SERVICE

The morning sermon was on the text "Ye are My Friends, if ye do whatsoever I have commanded you." The evangelist spoke of his regret at leaving the city, and referred to the campaign as the most successful he has ever conducted. He said God should be given the credit for the work, however, and urged that the people continue in a religious spirit by attendance at their churches. He advised more hospitality among the church-members and more of a Christian spirit.

"I hate to see a hired quartet singing in a church," said the evangelist. "Let there be more chorus singing. The entire congregation should sing.

"Be liberal to your pastors, not only in your support of their plans, but also financially. The church needs money like every other institution of any kind, and you derive the benefits."

Rev. Charles S. Robertson, pastor of the First Presbyterian church, spoke of the free-will offering before the morning sermon, and lauded the work of the evangelist. Mr. Robertson said the revival would be evident in the increase in church attendance and membership in the future, and would also increase the zeal and earnestness of those who were already members of churches.

He expressed his high opinion of Mr. Peacock personally, and said he had never before known of an evangelist who did not have his own particular hobby or idiosyncrasy of some sort, but he had found "Peacock every inch a man."

Chorister Warth sang "His Eye is on the Sparrow," and the choir rendered several appropriate hymns.

AFTERNOON SERVICE

"For God so loved the world that He gave His only Begotten Son" was the text of the afternoon sermon by the evangelist, which was addressed to 2,300 people. Before the sermon Miss Painter and Mr. Warth sang, "The Heart That Was Broken For Me."

In the course of his sermon, the evangelist stated that nothing in the world was prized so highly as love, and deplored the fact that so many reject the great sacrifice Christ made for love of the world. He condemned those who refused to appreciate God's love, and said many were not even worthy of the love of a human being.

"Some of you men smell so of whiskey, booze and cigarettes that no one will love you, you old turkey buzzards" said the evangelist at one juncture. And later, in commenting upon the narrow avaricious spirit which predominates some men, he said, "Some of you are mean enough to steal the pennies off a dead nigger's eyes. No. I'm not talking to you, I'm talking to somebody miles away!"

He closed his sermon with an eloquent plea to those who had not already accepted Christ to come forward and openly renounce sin, and signify their intention of leading better lives. A large number "hit the trail."

EVENING FAREWELL SERVICE

Rev. Charles Olmstead, pastor of the Congregational Church led in prayer before the evening sermon. Mr. Peacock, in making the final announcements relative to the church services during the coming week, took occasion to express his appreciation and thanks to all those who assisted in any manner in making the campaign the wonderful success that it was. He thanked all the committees and the individual members of each for the good work they have done; thanked the ushers, and the chief usher, Harry Stout, for their excellent work in handling the large crowds which have attended the services, and told Mr. Stout that he was "a good scout, even if he was bald-headed."

All those who have extended the hospitality of their homes to the Peacock party—Mr. and Mrs. G. B. Farley, at whose home Mr. Peacock, Mr. Warth and Mr. and Mrs. Davidson stopped, and Mr. and Mrs. Morrill, with whom Miss Spear and Miss Painter made their homes during the campaign, the Lewis House, for the excellent service and many courtesies extended to the party; and also the gentlemen who placed their cars at the service of Mr. Peacock and his workers during the campaign,—all were heartily thanked by the evangelist. The Fulton Light Heat and Power Company which donated the lights and current during the revival came in for special mention, and Mr. Peacock said this donation, which saved the committee approximately $200, was a most generous one. The police and firemen who were on duty during the services were also recipients of the whole-hearted gratitude of the speaker.

The newspapers and reporters were not overlooked in the roll-call, and Mr. Peacock gave the papers credit for great assistance in the work of the campaign by the liberal publicity given the event.

The last group to receive the endorsement of the evangelist was the delegation of Fulton ministers, and Mr. Peacock's remark that "Fulton has the finest crowd of ministers I have ever had the good fortune to meet," was the signal for prolonged applause. He stated that no minister had ever evidenced anything apart from the most earnest and sincere co-operation in the movement, and that much of the success of the campaign was due to their efforts and support.

"I can't find words to express my gratitude to all of you for what you have done during may stay here," said the evangelist. "I have a heart, even if some of you think I haven't, and I guess I'm about as tenderhearted a fellow as anyone in this building. Right now, I feel like crying, when I think of leaving this city to-morrow morning. I have tried to tell you somehow how much I appreciate all that you have done, but I don't think words are adequate. I can only say that I love you all, and may God bless you!"

Rev. J. W. Barrett made a short address, interpolated with some very amusing stories, in which he asked generosity in the final free-will offering.

The sermon was on the text, "Come for all things are now ready." Luke. XIV, 17. The evangelist said in part:

"These are words uttered by Jesus Christ about three months before His crucifixion. He was at the home of a rich Pharisee seated at the table, and the occasion was a dinner given by the Pharisee to some of his friends. He was pointing out to them the folly of their wickedness in dining luxuriously among themselves, while the poor suffered, for He said, 'When thou makest a feast call in the poor.'

"In order to impress this point upon his hearers, Christ told them the parable of the great supper or feast, given by a rich man, to which he invited his friends. You all remember the parable, how the rich man sent his servants to his friends, and how each made an excuse to absent himself from the supper. In the end the man ordered his servants to go into the highways and byways and to bring the poor, the halt, the lame and the blind to the feast.

"The rich man represents God, your Creator. He wants us all to come to His great feast, which is eternal life. The poor, the lame, the halt and the blind are all welcome.

"In the eastern countries it is the custom to have two principal meals during the day. A light repast is eaten in the morning, and the second meal of the day is the supper or dinner, whichever it may be termed. It was at one of these that Christ addressed His parable to the Pharisees, who imagined themselves the chosen people of God, and were making merry and enjoying themselves.

"In God's feast there are blessings which men can never find elsewhere. No matter how much pleasure one may derive from association with friends, there is still greater pleasure in close association with God and in leading a life as God wills it.

"What are some of the benefits God gives to those who come back to Him? Forgiveness of sin, a new heart, the truth, and a greater usefulness in this world, and life eternal in the next world, those are God's blessings and rewards to those who follow His teachings.

"In these times when one intends to give a dinner or party of some kind, the invitations are printed and sent out to friends of the host. You aristocrats, you who give card parties and dances, you know what I mean. All those who are invited are expected to be present, and if they cannot come they are always carfeul to give a good excuse, in order that they may not slight the host, and thus be omitted in the invitations for another event.

"Christ invites all of us to His feast, and look at some of the excuses men give for failing to accept His invitation. Some of them are positively ridiculous. They are more ridiculous than the excuses given the rich man's servants when they went to invite his friends to the dinner.

"One man said, 'I have just bought a piece of ground and I must go and look after it. I must be excused.' He was a rich man who could have well afforded to allow the ground to go until some other time, but in truth he did not want the invitation.

"When Christ was on earth, the leaders among the Jews had such control of the people and money that they couldn't condescend to become followers of Christ when He refused to become a temporal king. They didn't believe He was the Messiah, and those that did were afraid to accept Him.

"Many to-day are also afraid to accept Him. The thief is afraid to accept Him because he knows he would have to return the money he has stolen. A lot of you don't want to accept Him because you'll have to give up your card decks. You don't want to accept Him because you'll have to give up booze. You're afraid to accept Him because you'll have to give up your dance halls and cabarets. You're afraid to accept Him because it will interfere with your business.

"You might have to close your stores on Sunday and right here let me say that I wouldn't buy a nickel's worth from any man who kept his store open on the Sabbath. The police of this city have no business to arrest a burglar, or a murderer, or any other criminal if they allow stores to remain open on Sunday, But if a man steals a loaf of bread to feed his starving children, the police are right on the job, put the nippers on him and take him to jail, send him to the penitentiary! But the man who keeps his store open on Sunday and disobeys the law of God and man, he goes free.

"If we are going to have laws, let's keep them. If not, let's throw them out altogether and have no law. That is what makes anarchists and murderers in this country, some people can do as they please and others cannot.

"I have no sympathy with anyone who desecrates the Sabbath in any way. You people who trot off on picnics and excursions, you are violating the law of God.

"How about the open saloons? Not the front door, perhaps, but go around to the back and see how easy you can get in. I haven't been in this town six weeks for nothing, and I want to tell you right now, I know what I'm talking about. And any of the bunch that has stacked up against me since I'ce been here, knows that I know what I'm talking about. When I come out here on this platform and talk, I have the facts! This is my last night here and anyone who wants to argue with me on this point can come on up!

"Wink at open stores on Sunday, wink at saloons! But put the nippers on the fellow that picks up an orange. It makes me sick and tired to see some of these fellows. And then they strut around like a peacock as if they owned the whole town."

"Now, about the second man who was invited to the dinner. He said he had just purchased a yoke of oxen and he wanted to prove them, so he would be unable to attend. This was a poor excuse and showed that the fellow was no business man or he would have proved the oxen before buying.

"When I first entered the ministry, I didn't have a thing. No, I'll take that back, I had a wife. I had nothing else to speak of, however, and Mrs. Peacock married me when I didn't even have my furniture paid for. It got so that I needed a horse to travel around, and I bought one from one of the deacons of my church. I figured that he wouldn't cheat me. Well, that horse was an outlaw, and tried to run away with me, but I managed to drive him. I told the deacon afterward, however, that he ought to look out for the horse, as he might get kicked some day for lying to me.

"The excuse of the man who had purchased the oxen is as poor as the one advanced by Mark Twain's Oriental, who said, 'I need my axe to use in eating soup.' And there are lots of people to-night who have excuses for not coming to the front that are just about as good. They haven't a straw to stand on, and yet they're pulling their toe-nails out trying to get to Hell as fast as they can. They say, 'I won't do it to-night.' And they keep on putting it off until they're snuffed down into Hell. I can't understand why anyone should refuse to be a Christian. I can't understand why they can turn down God's invitation.

"The third man said, 'I have married a wife, and cannot come.' He came right out, and made no bones about it. It's very likely that his wife put him through a course of sprouts before he married her, as he was admitting just what many men refuse to

(Continued on Page Eight)

GROWERS TO ORGANIZE ON A CALIFORNIA BASIS

Lockport, N. Y.—To do for New York and the East what organization has done for Southern California orange growers and Oregon apple men, and to lay the foundation for the standdardization, grading, packing and marketing of Western New York's famous apples and peaches, the Farmers' Congress will be held in Lockport June 1, 2, and 3.

Several thousand farmers are expected. Parades will be featured. The 74th Regiment of Buffalo will stage a sham battle. But the main purpose of the Congress is to organize the farmers and guard against another year such as last, when millions of baskets of peaches were left unpicked because the growers did not know how to dispose of them.

Governor Charles S. Whitman, will be a speaker at the Congress. Former United States Senator Theodore Burton, of Ohio, also will be here. Whitman and Burton will speak June 2nd. The country's leading authorities on the subject of fruit and marketing co-operation will attend, including Governor Dawe, organizer of the Southern Commercial Congress, State Commissioner of Agriculture Charles S. Wilson, W. H. Jordan, F. S. Walsh, of the New York Central; J. S. T. Bush, President of the Eastern Produce and Fruit Exchange and Marc W. Cole. It is hoped to organize the farmers of Niagara County into small co-operative units.

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 deegrees, 02 minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

New York Ontario and Western Railway Co.

Dorothy's Guardian

She Wanted Him All to Herself.

By CLARISSA MACKIE

When Dick Merwin graduated from college his classmates predicted that he would take high rank among men in the world's battles. While he was delivering his commencement oration there was one person in the audience who listened to his youthful effort without thinking or caring for its merit. She was wrapped in the speaker himself.

From the moment he made his appearance on the platform this young woman appeared as though she were under a spell, fascinated by the very presence of the man, from whom her eyes never wandered.

Linda Barton, an undergraduate of the woman's college of the same university, had met him, and there was something in that pair of gray eyes through which he looked at her that seemed to penetrate her very soul. From the moment of her meeting him she worshiped him.

On the evening of commencement day the president held his usual reception for the graduating class. Linda, whose tastes ran to music, was invited to add to the eclat of the occasion by the performance of a selection on the piano. She chose her piece from Beethoven's sonatas and while playing received rapt attention. On rising from her instrument she looked into the face of Merwin.

The campus was illuminated, and a throng passed from the president's residence out among the elms, some of which had been planted a century before. There on a bench in a secluded spot Merwin told his companion his story, a story which she listened to with delight.

But the course of true love did not run smooth. Merwin went from the university to the law school, and it was a year before Linda was graduated. A misdirected letter is quite enough between youthful lovers to change the current of two lives. Whatever was the cause, Linda never told, but there came a break. Neither married. Merwin became a prominent lawyer, and in time Linda, finding it necessary to earn her own living, availed herself of her taste for music to do so. A retiring disposition unfitted her for a public life, and she became a teacher in a young ladies' seminary.

But the betrothal that occurred on that commencement night, when they were in the first freshness of youth, lived in the hearts of both. Merwin became one of the legislators of the nation; Linda subsided into a quiet maiden lady teaching the next generation to play the piano.

* * * * * * *

Five eager, glowing faces were bent over the large photograph in Dorothy Blake's hands.

"Isn't he a perfect dear?" cooed Dorothy ecstatically.

"So distinguished with that touch of gray at the temples!" sighed Maud Benning.

"Such fine eyes! Are they gray, Dolly?" asked Eva Temple.

"M-m-m-m-m!" murmured Dorothy reminiscently. "But you must remember, girls, that I haven't seen my guardian since I was twelve, that is six years ago, and at that time I wasn't the least bit interested in the color of any one's eyes."

"Sweet child!" teased Susan Marr. "So you are interested now in this guardian who looks like an actor?"

"Dear, I'm in love with him!" gushed Dorothy.

"So are we all of us," lamented Amy Smith, with a rueful smile. "How old is he, Dolly?"

"Old as the hills. He must be nearly fifty; forty anyway."

"Methinks I've seen that face before," murmured Maud.

"Perhaps! Richard Merwin is a very prominent man, a United States senator."

"No, no," insisted Maud seriously. "Listen, girls; I believe I have it. Do you remember once when Miss Barton was ill she sent me to her trunk to get a box of papers? Well, the box was old, and as I carried it to her bedside the pasteboard cover slipped off and some letters and papers fell on the floor.

"I gathered them up, and among them was a man's picture. I scarcely glanced at it, yet it remained vividly in my memory. Girls, it was Senator Merwin's picture."

"Dolly's guardian?" they questioned incredulously.

Maud nodded. "I am positive. She acted quite embarrassed and slipped it under the pillow. Isn't it odd?"

"Perhaps they were sweethearts once upon a time," suggested Amy.

"Pooh!" said Dorothy coolly. "I'm going to marry him myself, so there!"

"Small chance for poor Miss Barton!"

"When is he coming, Dolly?"

"I don't know. I'm expecting a letter every day. I asked him to come to our dance."

"Oh, Dolly! Fancy a grave senator dancing the onestep!"

"Oh, he may dance the old fashioned waltzes with Miss Barton," laughed Dorothy over her shoulder as she placed the picture on her dressing table and blew a kiss toward the grave, handsome face.

There came a tap at the door, and Maud opened it.

"Come in, Miss Barton," she cried affectionately, as the slim, auburn haired music teacher smiled at her.

"I can't just now, dear; I've brought Dorothy the new music she asked for. Did I tell you that madame has engaged the Romany orchestra for the next dance?"

She laughed musically as the girls broke into noisy expressions of joy. Heretofore the school and its invited guests had danced to the tame music of piano and one violin.

"She is a dear," murmured Amy when they were alone once more.

"She would be beautiful if she wore something besides that tiresome black."

"I wonder why she never married. I wonder if it did have anything to do with my handsome guardian," said Dorothy.

"They will meet again here. If she married Senator Merwin, what relation would she be to you, Dorothy?" asked Maud mischievously.

Dorothy threw a sentimental glance at the picture.

"She would be my deadliest enemy!" she declared, and in a burst of laughter the conference broke up.

* * * * * * *

Mme. Hermaine's boarding school wore a festive appearance that April night.

Youthful beauty filled the staid reception rooms and overflowed upon halls and verandas.

There was a glimpse of the broad bosomed Pacific ocean, where the moon made a silver track that might lead to enchanted islands. Eastward the foothills loomed black against the evening sky. From the gardens below came scented reminders of rose geranium, carnations, heliotrope and mignonette; in the verandas were great tubs of pink oleanders.

To Mme. Hermaine's pupils enchantment lay here instead of unknown islands of the far east.

Friends and relatives of pupils thronged the rooms, and the young people danced to the entrancing strains of the gypsy orchestra.

Mme. Hermaine moved majestically through the rooms, pausing now and then to bestow a smile and a word on some favorite pupil or to linger in conversation with guardians and parents.

Fraulein Goebel, the German teacher, and Mlle. Specht, who taught a large French class, were dancing sedately together. Linda Barton sat in a corner and chatted with an unknown old lady, who afterward turned out to be Anne Ashbel's grandmother.

"And who is this tall man coming?" asked Mrs. Ashbel curiously. "The broad shouldered man surrounded by girls?"

Linda, looking rose flushed and lovely in a much darned black net evening frock, glanced carelessly at the group.

Suddenly all the roses vanished from her cheeks, leaving them white and wan.

"Who is he?" persisted the old lady curiously.

"I think, I believe his name must be Merwin," said Linda in a labored voice.

"I wonder if it can be Senator Merwin?" murmured Mrs. Ashbel.

"I don't know," said Linda, drooping her head to hide her emotion from half a dozen pairs of curious eyes.

"Did you see her?" whispered Maud Benning to Dorothy Blake as they accompanied Richard Merwin to the conservatory to show him Mme. Hermaine's collection of orchids.

"You mean Miss Barton?"

Maud nodded. "She must have recognized your guardian, Dolly. I thought she was going to faint, she grew so white."

"I wonder!" murmured Dorothy. "Maud, I'm going to bring her here to meet guardy."

"It would be cruel perhaps," protested Maud.

"It will be quite romantic," insisted Dorothy, moving away.

"I thought you—you admired him yourself," objected Maud.

"I do, and he admires me, too," said Dorothy egotistically. "He could not help drawing a contrast between us, and I am not a bit jealous of poor Miss Barton." She smiled with the cruel candor of youth and flitted away in the shimmering crowd.

Richard Merwin and the four chattering girls had seen the orchids and had paused by the fountain, watching the antics of the goldfish in the basin.

Suddenly Dorothy was in their midst, holding tightly to the hand of a slim, black garbed woman whose crown of auburn hair was powdered with the snow of late youth. White as death, she met the surprised gray eyes of the senator.

The gray of his eyes turned to black, the fine wrinkles and lines vanished from around his eyes and mouth, his face was afire with youth, and there was a look which caused the five girls to fall back in an abashed group near the door.

"Linda! Linda Barton, is it you?" he asked in a thrilling voice, and his eyes and hers seemed to bridge long years of pain and misunderstanding.

At last their hands came together, and he held her ringless fingers close to his heart while he talked in low tones. Her answers were breathless whispers.

"Come!" whispered Dorothy. And the five vanished silently, and knew they were not missed.

"I—I didn't know love was like that!" gasped Susan Marr.

The others sighed, for they, too, had had a glimpse into the paradise of perfect love.

"Dolly, they will marry. And what shall you call her," asked Maud, with a droll look at her friend—"the wife of your guardian?"

And Dorothy, who had seen Linda Barton's transfigured face, softly replied, "My guardian angel—and his."

FRESH CURTAINS.

How to Make Home Laundering Really Effectual.

AN EXPERT SPEAKS UP.

After Twenty Years' Experience With Window Hangings, a Professional Tells Us Just How to Manage Unruly Frames and Sopping Wet Curtains.

"Many women," says an expert, "think that the proper way to mount a curtain on a stretcher is to first fasten down each of the four corners and then to stretch the edges into shape by pulling from the corners.

"This is entirely a mistake, and curtains mounted in this way are almost sure to have the mesh broken or torn in several places, even if the pattern and the scalloped edges dry to look straight and even.

"In mounting a lace curtain over a stretcher, one should always begin at the middle point of the long border edge. Slip this over the pin at the center on the top edge of the frame; then, working from the center, first to the right and then to the left, slip the successive scallops over pins until the entire long border edge is attached to the pins on the upper bar of the frame.

"The curtain is now hanging with its unpatterned edge falling loosely downward. The next step is to attach the bottom end of the curtain to the frame pins. This usually has the same border as the long, patterned edge. In fastening it to the stretcher work downward from one of the top corners until you have all the patterned edge attached to the pins.

"Now notice how many inches on the top bar of the frame are covered by the long border edge and how many inches at the side and then adjust the remaining two sides of the frame to correspond exactly in the number of inches. Fasten the other short edge of the curtain, which will be the top edge when hung, and lastly fasten the other long edge to the frame pins.

"The last edge may have to be puckered a little to make it fit over the pins, but the puckering will not show when the curtains are dry, and, what is more to the point, the edge will not pull down after it is dry.

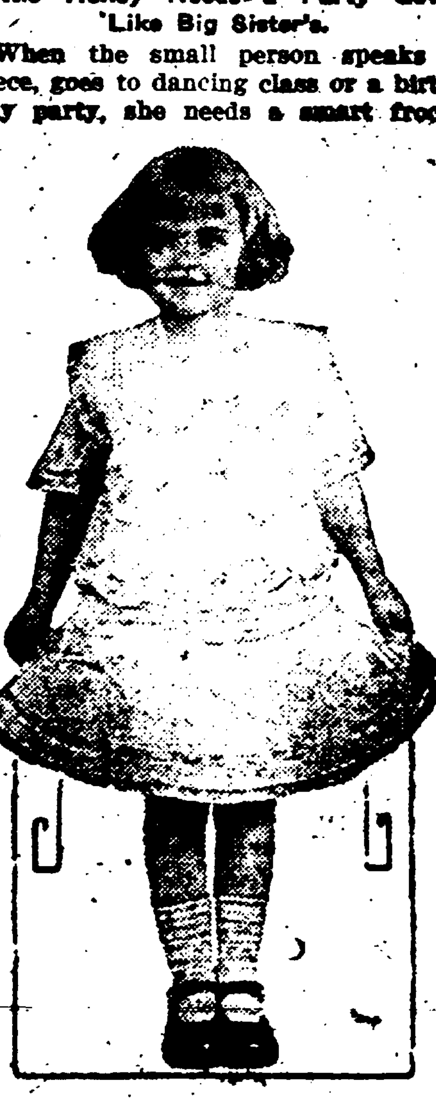
"One other thing that should be emphasized is that the long border or patterned edge of lace curtains should always be dried at the top of the frame. Removing the curtains from the stretcher after they are dry requires some care. One should not try to take the edges from the pins until the frame has been sufficiently loosened, so that there will be no strain on the delicate mesh; otherwise threads are almost sure to be strained and broken.

"A curtain stretcher to be entirely satisfactory should have movable pins and should be made of well seasoned wood. Stretchers having stationary pins may or may not have the pins placed at intervals which will match the scallops in the particular curtains one wishes to clean, and unless they happen to match exactly the size of the scallops it is not possible to dry the scallops in good shape. Stretchers which have movable pins can be perfectly adjusted to either large or small scallops."

A SMALL SIZE.

Little Honey Needs a Party Gown Like Big Sister's.

When the small person speaks a piece, goes to dancing class or a birthday party, she needs a smart frock.



[illegible]

The cut shows one of organdy trimmed with val lace and insertion set around inverted scallops. The tunic falls over a sash of pale pink ribbon, worn low, as do French children.

American Chop Suey.

Two pounds of veal from the shoulder or leg will be required for the chop suey. Cut into cubes and fry lightly in a little butter. Add a tiny bit of onion, two bananas cut in cubes and a small can of button mushrooms sliced. Season highly with salt and pepper and add half a teaspoonful of curry powder. When the bananas and mushrooms are brown cover with cold water and simmer for twenty minutes; thicken slightly and serve. The bananas may be omitted and celery substituted if desired.

WALL COVERINGS.

What Kind of New Paper Will You Choose Now?

A WIDE RANGE THIS YEAR.

An Expert Tells How to Treat Walls and Colors So That Rooms Opening Into Each Other Give the Idea of Spaciousness and Harmony.

The day is already dawning when instruction in color values and house decoration will be a part of the course of study in every school. Then, and then only, will all of us be able to choose tasteful furnishings, restful walls and harmonious color schemes. Even if only a few artists be "born" all of us can be taught the principles of art and how to express it in the home.

Let us begin with a study of walls and wall coverings, because they are really the true framework of the room. They form the background for all pictures, ornaments, curtains and hangings. Therefore they must be chosen first if we are to have rooms that are restful and that also express best their relation to the windows and lighting.

We can be thankful that the days have almost gone when decorators offer us papers with climbing onions and interlocked rhubarb plants. Gone, indeed, are most of the medallion wall papers with their huge twelve inch repeating unit. We have today a selection from a wide class of more neutral papers in shades, such as putty, buff, sand, gray, etc., in which the variety is given not by the color, but by the texture, tiny stripe, dot or fleck in the grain of the paper itself.

While these neutral papers are not suitable or necessary in every room, it should be borne in mind:

That light colors make rooms appear larger.

That rooms opening into each other should not be papered with tones in violent contrast, but that similar or harmonious tones are best.

That long, narrow hallways and rooms with northern and eastern exposure are preferably treated with warm, light tones.

That light backgrounds with undecided pattern make the best surface on which to show off pictures, hangings and other furnishing.

Low ceilings will appear still lower if the wall space is broken by a frieze, plate rail, molding or other horizontal line which divides the space, so that it is best, particularly in our small rented homes or flats, to avoid papers or coverings with a break in the pattern near the ceiling or halfway down.

Horizontal stripes also make ceilings appear higher and are thus particularly suited to the small, low ceiled room. Papers with high gloss finishes, while effective in bedrooms, are out of place and undignified for living or dining room or library. Everybody knows, but does not always follow the point, that warm, bright colors and tones are needed in "cool" rooms with north or eastern exposure, while those receiving southern and western sun can have their walls treated with the less heating colors and shades, particularly grays, blues and neutral tints.

Many fabric coverings for walls are on the market. In permanent homes they are most desirable because they do not mar, tear or show usage. The small rented bedroom should be tinted or painted for hygienic reasons, but in all rooms, whether fabric or paper covered, choice should be guided by means of light and art.

JUST FOR WEAR.

The Kind of a Hat That Has Good Style and Wearing Qualities.

This knockabout hat comes in the guise of a close turban set up in lisere navy blue straw. The high crown is

FOLIAGE A LA MODE.

wreathed with glossy green ivy leaves lined with white kid. Shining black berries peep out of the greenery, giving a modish touch.

Polishing a Range.

Stove polish when mixed with turpentine and applied in the usual manner is blacker, more glossy and more durable than when mixed with any other liquid. The turpentine prevents rust.

Rickrack Braid.

Of course you think of it as something old fashioned and out of date, but it is being revived again. As an edging one row of the braid is dainty and charming in its very simplicity.

The Three Piece In the Lead

Design by Franklin Simon & Co., New York.

FOR young ladies is this three piece suit of men's wear serge, which comes in navy, copenhagen, tan, white or black, and also of black and white checked worsted. A high belt, faille collar, finger pockets, horn buttons and adjustable bretelle are all interesting points. The hat is a quaint shape.

• • •

New silks are designed with even stripes four inches wide in white and red, in black and white and in blue and white.

ANNA MAY.

The Kitchen Cupboard

PRIZE WINNERS.

ROAST HAM WITH CIDER SAUCE.—Soak a twelve pound ham over night in cold water to cover. Place in kettle with one-half cupful each of sliced onions, carrots, two sprigs of parsley, four cloves, one-half bay leaf. Cover with cold water, bring slowly to boiling point, let simmer about four hours or until tender. After cooking two hours add one quart of cider. Allow ham to cool in liquor; remove from liquor, skin, sprinkle with sugar and breadcrumbs, put dashes of paprika over ham and insert a clove in each dash. Bake one hour and serve with cider sauce.

Bubble and Squeak.—Chop cold boiled cabbage fine, season with salt and pepper and fry in butter. Take some cold boiled beef, slice it thin, pepper it well and broil it. Then pile the fried cabbage in the center of a platter. Arrange slices of beef around and serve immediately.

English Head Cheese.—Take four pig's legs, the part above foot joint, and lean part from head; put in kettle and cover with boiling water; cook until meat falls from bones. Chop meat coarsely, season with salt and pepper after skimming fat from stock add meat; boil up once, put in mold and set away to harden.

Jellied Rabbit.—Cut rabbit into eight pieces, boil in about a quart of water: when meat falls from bones remove: set liquor to cool and remove fat; dissolve one-half box gelatin in one pint of water and add; season. Boil five minutes, strain and add chopped meat; garnish with parsley.

Beef Heart Chop Suey.—Boil beef heart, chop in small pieces. Take two minced onions, one pint tomatoes, two tablespoonfuls chopped suet, one-quarter pound of macaroni, cooked. Mix all together, put in baking dish, add cupful of boiling water. Bake forty to sixty minutes.

Ham Timbales.—Cook two tablespoonfuls of flour in one and one-half tablespoonfuls of butter; add slowly one cupful of milk and season with a dash each of salt and cayenne. When smooth and thick add one cupful of finely chopped ham, one-half cupful of stale breadcrumbs, one tablespoonful of chopped parsley and one beaten egg. Turn into buttered timbale molds. Stand them in a pan of boiling water and bake about twenty-five minutes. Unmold and serve with white or drawn butter sauce.

Anna Thompson.

The Kitchen Cupboard

A RUN ON CHICKENS.

CHICKEN PIE.—Put creamed boiled chicken into a baking dish and cover with pastry. The sauce may be made of stock instead of milk and thickened with cornstarch. Individual patty tins may be used instead of the deep pottery dish. Peppers cut up and added to the pie will improve its flavor.

Chicken Souffle.—Run cold boiled chicken through the meat grinder. When you have two cupfuls blend two tablespoonfuls of flour with two of butter, and to this add two cupfuls of milk. Season with salt, cayenne and chopped parsley and add the chicken to the white sauce. Half a cupful of breadcrumbs will thicken the mixture still more. Finally separate four eggs, add the beaten yolks to the chicken mixture. Fold in the stiffly beaten whites last of all. Bake in a buttered dish for thirty-five minutes. Serve immediately.

Chicken Turnovers.—Use a croquette mixture, but instead of frying lay the rolls on rounds of pastry, fold over, bake and serve hot or cold. A little minced ham or tongue may be added if you like the flavor.

Chicken Soup From Leftovers.—A chicken soup from leftovers is particularly good when herbs have been used in the stuffing. Cook the carcass, bones, skin and any stuffing until a sufficiently rich liquor is obtained. Strain, cool, skim and season. When ready to serve beat an egg yolk for each quart of stock, blend with the soup and float a spoonful of unflavored whipped cream on each plateful.

Club Sandwich.—Make two square slices of toast, previously trimming off the crusts of the bread. After buttering, lay upon the lower slice two thin slices of crisply cooked bacon, a slice of seasoned cold chicken, a tender lettuce leaf and spoonful of mayonnaise. Cover with the other piece of toast and cut diagonally. Serve while the toast and bacon are hot.

Anna Thompson.

BUILDING A LIFE.

To have a beautiful old age you must live a beautiful youth, for we ourselves are posterity, and every man is his own ancestor. I am today what I am because I was yesterday what I was.—Elbert Hubbard.

SHE WAITED IN VAIN.

Pathetic End of a Romance Lasting Over Thirty Years.

Many years ago while studying in Boston I lived for a time in a private boarding house of the Back Bay. As most of the guests were wealthy widows, I named it the House of Veils. Among those coming in from the outside to take their meals was Miss Adams, a descendant of the historical Adams family and a woman of about sixty years.

She was engaged to be married and had been engaged for more than thirty years. Her lover called, took her to dinners and the theater, sent her flowers and sweets as in the days of their youth. Those who knew her told me this story:

While still young she had been left an income sufficiently large to maintain herself in comfort, but not enough for the upkeep of a home such as she thought befitted her station in life. So she lived in lodgings, while her fiance cared for his widowed mother, who lived to be very old.

At the time to which I refer her lover held a responsible position, and the only obstacle in the way of their marriage was the aged mother.

They were devoted lovers at sixty and had been devoted lovers for thirty years. Being the longest engagement of which I had ever heard or read, I was interested to know the ending of a story so unusual in life.

Some years after, meeting a former guest of the House of Veils, I asked about Miss Abigail Adams. The mother had outlived the son!

A sad and lonely old woman was still living in lodgings, looking back to the pride and selfishness of her youth, which had cost her a home and all that home might mean.—Chicago Tribune.

FATHER'S PERIL.

What Would You Have Done Had You Been In His Place?

Just three or four time yellowed pages in an old colonial diary. How the manuscript came into my possession is immaterial. But here are two paragraphs:

"February ye tenth, 1628. This day A most terrible thing happened to Father. It hath been a long, cold winter, and ye members of our little colony have suffered grievously, supplies being scant. Our larder being well nigh bare, my goodly father started forth in search of game. Of late it hath grown exceeding difficult to obtain powder and lead. Father had but one charge left for his trusty blunderbuss; but, being a famous shot, he had no doubt that this would prove sufficient to bring down some wild creature that the household might be supplied with meat.

"He had wandered some way from ye settlement when he sighted a wild turkey perched on a limb. Drawing near, he took aim. At this moment a skulking savage leaped from behind a tree near by. An arrow hurtled past dear father's head, barely missing him. Quickly he turned his blunderbuss upon ye savage and prepared to fire.

"But ye thought came to him that his wife and children were in dire straits for food. Having but the one shot, what should he do? To slay ye savage would mean that ye turkey would escape. To shoot ye turkey would place father at ye mercy of ye cruel redskin. Momentarily he hesitated; but, suddenly determining upon a bold course, he took steady aim, fired and slew ye"—

Here the manuscript breaks off. I'm sorry that I ever ran across the confounded thing.—Walter G. Doty in Cincinnati Enquirer.

Oddities of Taxation.

In England there have been many amusing taxes and more amusing evasions. At one time the horse was singled out as a peculiar victim, and the farmer evaded the obligation by riding his cow to market or by harnessing his wife to the cart alongside of a big dog to drag the produce to town. The tax on chimneys resulted in the destruction of many fine old fireplaces, and the tax on windows had the effect of making the houses look as if they had been boarded up and deserted. It also impaired the eyesight of hundreds of Englishmen.

A Cobbler's Dozen.

In most countries thirteen is always spoken of as "the baker's dozen," but in Italy it is called "a cobbler's dozen." There is a tradition in that land that formerly there was a law compelling cobblers to put twelve nails around the edge of a boot heel and that when nails were cheap a thirteenth nail was driven in the center for luck.—London Mail.

Something Wrong.

"Is this a studied insult, or what is it?"

"How now, girlie?"

"This fellow writes on his card, 'Sweets to the sweet,' and sends me a package of lemon drops."—Louisville Courier-Journal.

The Back Yonder Club.

What has become of the family that used to eat Sunday dinner that was cooked on Saturday?

When did you ever see a sawbuck? Not to go back too far, do you know what a sawbuck is?—Richmond Times-Dispatch.

His Vile Disposition.

"Fine day, Mr. Gloom, and"—

"Well, you didn't make it, did you?" snapped J. Fuller Gloom. "Then what are you bragging about it for?"—Judge.

Quite Friendly.

Henpyeck—Scoots eloped with my wife last night. Gabbleton—Why, I thought he was your best friend. Henpyeck—He is.—London Telegraph.

THE CENTAUR COMPANY, NEW YORK CITY.

The Simplon Pass.

The Simplon pass was a famous highway of travel long before Napoleon constructed the highroad. Milton came home that way from his grand tour, and so did John Evelyn. The latter traveler went in fear of his life, not only expecting avalanches to fall on him, but being apprehensive lest bears and wolves should issue from the caves in the precipices and assail him. The only actual harm which happened, however, was that his companion's dog killed a goat belonging to one of the peasants and that heavy compensation had to be paid—"a pistole," says the diary, "for the goat and ten more for attempting to ride away."

Long Time Arriving.

"Some stars are so far away that the light from them hasn't reached us yet. But it will arrive eventually."

"Reminds me of my hired man coming from the postoffice," commented Farmer Heck.—Exchange.

Self Possession.

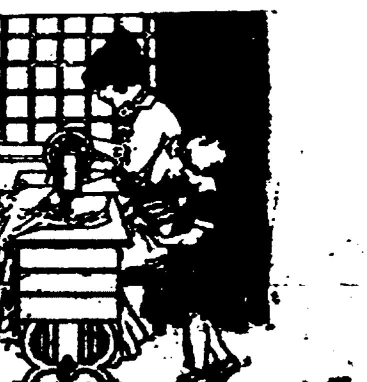
A man who does not possess himself enough to bear disagreeable things without visible marks of anger and change of countenance or agreeable ones without sudden bursts of joy and expansion of countenance is at the mercy of every artful knave or pert coxcomb. The former will provoke or please you by design, to catch unguarded words or looks, by which he will easily decipher the secrets of your heart, of which you should keep the key yourself and trust it with no man living. The latter will by this absurdity and without intending it produce the same discoveries of which other people will avail themselves.—Lord Chesterfield.

Superficial Impression.

"That man looks as if he had something on his mind."

"Yes," replied Miss Cayenne, "but his conversation doesn't sound that way. He is a walking optical illusion."—Washington Star.

Easy & Practical Home Dress Making Lessons



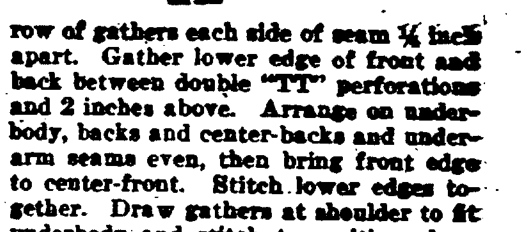
Prepared Especially for This Newspaper by Pictorial Review

When Bodice and Skirt Differ.

Afternoon dress of blue chiffon taffeta and all-over lace. The girdle is a noteworthy feature, extending into a trimming section on the front of the waist.

Uniformity is yielding to the idea that skirts and bodices may differ in costumes for ultra wear. What convention could resist this design in dark blue taffeta trimmed with blue silk braid and combined with blue lace mounted over white chiffon? For medium size the costume requires 6 yards 36-inch taffeta and 2 yards 40-inch all-over lace.

If the underbody is of silk, it will give a prettier sheen to the chiffon lining of the lace. A yard of taffeta is sufficient. The making of this part of the waist consists merely of closing shoulder and underarm seams as notched, hemming the front and facing the neck. To make the lace overblouse, close underarm and shoulder seams as notched. Gather along the shoulder seam in front and back and make a



row of gathers each side of seam ¼ inch apart. Gather lower edge of front and back between double "TT" perforations and 2 inches above. Arrange on underbody, backs and center-backs and underarm seams even, then bring front edge to center-front. Stitch lower edges together. Draw gathers at shoulder to fit underbody and stitch to position along shoulder seam; ease the fulness at neck edge of back to fit underbody.

Close the sleeve seam as notched and gather along crossline of small "o" perforations, draw gathers to the required size and stitch a narrow strip of material or ribbon over gathers. Sew sleeves in armhole.

There is nothing difficult about the girdle and trimming piece. First plait the front girdle section, placing "B" on corresponding small "o" perforations and tack. Join the front and back girdle sections as notched. Arrange on blouse, bringing large "O" perforation in back girdle section over corresponding perforation in underbody back; stitch the shoulder edge of the extension along the shoulder seam at neck edge; and bring the front, pointed ends together.

Braid and buttons are still in the limelight as fashionable trimmings for frocks for all occasions.

Pictorial Review Waist No. 6691. Sizes, 34 to 44 inches bust. Price, 15 cents. Skirt No. 6775. Sizes, 22 to 32 inches waist. Price, 15 cents.

Y. M. C. A. Needed in Fulton

"This town needs a Y. M. C. A. and whenever you get ready to start one I'll help you, not only with my efforts in organization but also with money," said Luther Knox Peacock to the audience at the tabernacle last night.

"The young fellows of this town have no place to go except saloons and pool-rooms," said Mr. Peacock, "and it would be a great thing for some of you men to get together and start a movement for a Y. M. C. A. here."

The large crowd heartily applauded the evangelist's remarks, and it is quite likely that the Y. M. C. A. movement which has been dormant for some time, will be given a new impetus. Several of the prominent supporters of the Peacock campaign have expressed a willingness to assist financially in the project, and all it needs now is a concerted action on the part of a few interested and influential citizens.

LAST NIGHT'S BIG SERVICE

(Continued from Page Five)

admit although they know it to be the truth that their wife is the boss.

"This man's excuse, however, was a fairly reasonable one when you consider the custom of those days. Then, when a young man married, he gave up business and everything else for one year, and devoted all his time to loving his wife. What a time we'd have if that some custom prevailed nowadays!

"There are a lot of women to-day just dying for a word of love, and there's nobody to love them. I know women in Fulton to-night who have their share and more than their share of the world's goods, who are dying for love, dying to have the man they are compelled to call 'husband' appreciate them and love them. It is a disgrace to any man to permit his wife to assume all the responsibility of the home. To let her do all the praying, to let her have all the responsibility of the children. If it fits you, put it in your pocket and chew on it.

"Some men think their wives are especially created to take care of them and their children. They don't appreciate their wives. They run off to their clubs and go out with the boys. If they would stay at home more their noses wouldn't be so red, and they would have more respect in the community. They expect their wives to stay home while they go out, slop up booze and tell dirty stories.

"For another reason, the excuse of the third man is a good one, because he could not go where he could not take his wife. You men ought never to go anywhere when you are ashamed to take your wife or your children.

"The excuses of these men of the parable are duplicated to-day by men who refuse Christ's invitation. Some say they don't want to go to church because they don't like the preacher. They'd rather go to Hell first. Some say they don't like the choir, and they'll tell you how the first soprano sings off the key.

"They don't like what the preacher says. That's because their hearts are not right. If the minister would preach the way you want him to he would be the laughing stock of the town.

"If you don't like the church, why don't you go in and clean it up? If you don't like the preaching why don't you get up some day and preach? If you don't like the choir, get in and sing yourself, and there will be more funerals the next day than the town undertakers can take care of.

"The excuses you offer don't amount to a snap. You don't go to worship the preacher. He doesn't preach especially for you. Because you don't like someone in church is no reason why you shouldn't go. Suppose you die and go to Heaven and find that some of the people you didn't like on earth are there? Will you say 'Let me out!'?"

"You should accept Christ's invitation because of your influence for good. The influence of many of you has been used for the devil in the past. You are afraid to show yourselves for God, and like the cowards you are, you put it off. If you would come, others would follow. A man in Sharon, Pa., came down the aisle one night, and twenty-five men behind him rose. He used his influence for good.

"Delays are dangerous. You may never have another opportunity. You might be dead before to-morrow night, there are several who have died suddenly in this city since this campaign began. Those who do not come now, may never come.

"The ship Royal Charter circumnavigated the globe and arrived in Queenstown harbor, the captain's home, late one night. It was too rough to anchor, and the ship drew off shore. In the middle of the night, during a terrific storm, the ship sank and all hands were lost. The captain's wife and little girl were eagerly awaiting his return after his long trip when a man came to their home next morning with the sad news. When the captain's wife heard that the ship had been lost just outside the harbor she cried out, 'My God, so near home and yet lost!'

"This is the closing night of the campaign and I am worried, I am afraid that there are some here tonight who are near home, yet will be lost. Don't shut the door against Jesus, don't shut out the spirit of God from your hearts!

"What an awful thing to be so near and yet lost? You are near home here in the tabernacle to-night and are you going to risk losing your soul? Don't put it off, my friends, don't reject Christ's invitation.

"I repeat to you the words of the Saviour, 'Come, for all things are now ready!'"

In his closing prayer, Mr. Peocock expressed his gratitude at being accorded the privilege to conduct a campaign here, spoke of his sorrow at saying farewell, but also of his joy at returning to his home and his family. He begged that hundreds would come forward to Christ and accredited to God all the glory of the salvation of many souls during the campaign.

The number of trail-hitters was well over one hundred, but men and women who had come forward at previous services, again came to the front in throngs to shake the hand of the evangelist and wish him Godspeed.

A. N. Hudson made a few remarks in behalf of the trail-hitters of the campaign in which he thanked the evangelist for his work in opening the eyes of thousands in this city, and wished him continued success and happiness.

IMPORTANT EVENTS DURING THE WEEK

The announcements made at the tabernacle last night were as follows:

The ushers will meet Wednesday evening. This is a very important meeting and all are requested to attend.

* * *

The high school girls will meet this afternoon after school.

* * *

The business girls will meet Monday evening, June 5th, at the Library for the purpose of organizing a business girls' Bible study club.

* * *

The men's club will meet at the First M. E. Church next Sunday afternoon at three o'clock, and all the men who hit the trail during the campaign are urged to be present.

* * *

On the same afternoon at the same hour, all the women who came forward during the campaign will meet at the Baptist Church. They will be addressed by Mrs. Robert Dey, of Syracuse, and a choir under the direction of Mrs. L. P. Smith will render a special musical program. This meeting has been arranged by the wives of Fulton ministers.

* * *

During the week, prayer meetings will be held Monday, Thursday and Friday evenings at the First Methodist, State Street Methodist, Congregational, Baptist and Presbyterian churches. There will be a prayer meeting at the Free Methodist church at 7:45 Thursday evening.

Rev. Sam Small will preach on "Uncle Sam's Water Wagon" at the tabernacle Tuesday night at 7:45.

MORE MEN THAN WOMEN HAVE APPENDICITIS

Surgeons state men are slightly more subpect to appendicitis than women. Fulton people should know that a few doses of simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka, often relive or prevent appendicitis. This mixture removes such surprising foul matter that ONE SPOONFUL relieves almost ANY CASE constipation, sour stomach or gas. The INSTANT, easy action of Adleri-ka is surprising. W. H. Gayer & Son, druggists. adv.

STUDENNS WON IN CLOSE GAME

Clearly showing their superiority over their older and more experienced opponents, the Fulton High school baseball team won a close game from the Maccabees at the Fair grounds Saturday afternoon by a score of 4—3. The high school boys won because they were able to connect with Snow when hits meant runs, and their support of Barnes in the pinches was gilt-edge.

The high school lads put over their first tally in th opening chucker, when a hit by Bray, followed by a double by Green, after O'Brien had been passed, netted one count. The Maccabees came back strong in the second and hits by Snow, Holden and Seymour, coupled with an error, accounted for two runs.

In the fifth the "Bees" increased their lead on safe hits by Ward, Decker and Baehr. Decker scoring. In the sixth the high school lads started a rally, and Green dented the rubber on Lewis's two base drive. Two runs were added in the seventh, when Bray doubled and scored on O'Brien's single. O'Brien was able to scamper home from second when Green got his second hit of the day, a single to right field.

Lewis, Bray, O'Brien and Green comprised the heavy artillery of the winners, and Green's work in the field was worthy of special mention. Baehr and R. Seymour starred at the bat for the Maccabees.

The score:

Summary—Two base hits, Baehr, Seymour 2, Bray, Lewis 2; sacrifice hit, Reynolds; hits, off Barnes 9, off Snow 10; stolen bases, Baehr 2, Holden, Bray 2, O'Brien 2, Green, Lewis, Reynolds; double play, Green to Lewis to Kraus; struck out by Barnes 4, by Snow 9; bases on balls, off Snow 3; hit by pitched ball, by Snow (Green). Umpire—McCollum. Time of game—1 hour 20 minutes.

Community Notes

Cort Dutton, of this city, who is employed by the Remington company, is visiting friends here over the holiday.

* * *

Mrs. Fred VanDyke, of Syracuse, who has been a guest of Miss Dorothy Allen, of Oneida street, for the past week, returned home today.

* * *

Mr. George Coffing Warner, of New York, and a party of men whom he has interested in the development of water power here, made an automobile tour of the river north and south of the city city yesterday.

* * *

Miss Isabella S. Diamond has returned home from Bryn Mawr, and will spend the summer at her home here.

* * *

Francis Murphy, of West Broadway, who will graduate from Mercersburg Academy this year, is expected home next week.

* * *

Leon Auringer and Carrie Phelps, of this city took out a marriage license at City Hall this morning. Mr. Auringer gave his age as 31, and residence as Cayuga street. Miss Phelps lives on Broadway and said she was 48 years old.

* * *

Dr. M. J. Terry, of Pulaski, motored here yesterday and called on political friends.

Children Cry FOR FLETCHER'S CASTORIA

FREED AT TRIAL FOR MURDER

Atlanta, Ga.—Tried and acquitted in Texas on the charge of murdering the two daughters, of Mrs. John H. Nelms, of Atlanta, Lawyer Victor E. Innes and his wife, Ida May Innes, went to trial here to-day for robbing one of the girls of $3,397.

Mrs. Nelms' two pretty young daughters disappeared in June, 1914 and have never been found.

"I am still convinced," said Mrs. Nelms today, "that my girls are dead and that Innes knows how they died and is responsible for it; but the Texas jury acquitted him and we can only try him for larceny."

Lois Nelms was married to Walter Dennis and lived here. In 1913 she went to Carson, Nevado and employed Innes to get her a divorce.

From the first meeting of Lois and Innes, according to Mrs. Nelms, dated the beginning of the alleged swindling, insincere promises of marriage and similar events which led to the alleged murders.

Beatrice Nelms, the other lost daughter, disappeared after she followed her sister Lois to Texas in 1914 to wean her away from Innes.

The only person to whom Lois talked much about her affairs was J. P. Weathers, a local real esate man, who will be the principal witness for the mother of the two lost girls.

One of the things Weathers is expected to testify that Lois told him, is hat she and Innes were to be married and, after a honeymoon in India, would return to this country to establish in Salt Lake City a new religious cult, of which they were to be the joint leaders.

Weathers asserts that Mrs. Dennis often consulted him about the "investments" which Innes was upposed to be making for her, with the money in question.

Weathers says Mrs. Dennis told him that she had sent Innes money to buy a lot in Salt Lake City, and ranches in Montana and in Sonora, Mexico.

On the occasion of a visit by Innes and his wife to Atlanta in May, before the disappearance of the girls in June, Weathers declares Mrs. Dennis introduced him to "Mrs. Margaret Mims, aunt of Mr. Innes." Weathers in the presence of numerous newspaper men, identified Mrs. Innes as the woman introduced as Mrs. Mims. He also identified Innes as the men who met Mrs. Lois Dennis several times in Atlanta.

Weathers says he read a number of Innes' letters to Mrs. Dennis, both on the subject of their religious cult and the investment scheme. Mrs. Nelms declares Innes had Mrs. Dennis return every letter to him so he could destroy it, and Mrs. Dennis, her mother asserts, blindly and implicitly followed the lawyer's instructions.

Mrs. Nelms declares her daughter was madly infatuated with Innes, and she entrusted him with practically all of the money left her by her father, the late Sheriff John W. Nelms, about $14,000 in all.

The mother of the missing girls declares that in June 1913, Lois began to send money to Innes. She told her, Mrs. Nelms says, that she was to be married to Innes.

Mrs. Nelms and her on Marshall have found ten receipts, either from a telegraph or express company, for sums of money it is alleged Mrs. Dennis sent Innes; also copies of messages alleged to have pased between the two.

Statements made by Innes indicate he will deny any communication with Mrs. Dennis after he secured her divorce for her, and that he will assert she did not leave here to meet him in Texas or anywhere else.

Mrs. Innes will assert she never posed as Mrs. Margaret Nims and has never known Mrs. Dennis.

The beginning of the trial of the Inneses marks the climax of a fight against them begun by Hrs. Nelms and her son, Marshall, immediately after the disappearance of her daughters.

The Inneses were arrested in Portland, Oregon and extradited to Texas, where they were trid in San Antonio on a charge of murdering the Nelms sisters. The state was unable to prove the girls are dead, and the case was thrown out of court.

While the murder case was pending nine indictments charging misappropriation of funds from Mrs. Dennis were returned here, and the fight to extradite the Inesses to Georgie began when the Texas case was dismissed. On technical grounds Innes carried the case to the supreme court of the United States, staving off extradition more than a year.

His final card in the fight against extradition was the plea to the governor of Texas that he had received threatening letters from Georfgia and feared that he would fall victim of mob violence if extradited. This plea did not avail.

INDUSTRIAL ACTIVITY RETURNS THURSDAY

The Fulton Woolen Mills will re-open on full time Wednesday, May 31, and all of the employes who were affected by the shut-down two weeks ago, as well as many former employes who have left the city have been notified to that effect.

It is understood that the Fulton mill has received an order large enough to necessitate operation on full time for the next eight months, even if no new orders are received from time to time, and all indications point to a period of the greatest industrial activity which has been experienced at the local plant in the last three years.

Since it is frankly admitted that the mill is the barometer of the town's prosperity, it is quite possible that increased activity will be evident in other industries and in business generally throughout the city, and that Fulton will soon take its place among the ranks of the industrial cities in the East which are now experiencing great industrial booms.

ABOUT THE TOWN

Michael Cuba has foresworn matrimony for all time. Raising his right hand aloft Saturday evening, Michael declared he would follow a life of single-blessedness until he shuffles off this mortal coil. And thereon hangs a tale.

Friends of Mr. Cuba remarked recently that he carried on a great deal of correspondence with a young lady in Utica, who often visits here at the home of one of Mr. Cuba's friends. It was understood that the Fulton man was "in right" and when Michael announced that his friend intended to visit here this week, his friends began to look for some action.

Saturday morning, his friends say, Mr. Cuba had perfected his plans, which included a quick trip to a clergyman about Wednesday of this week. But, alas it was not to were!

While he was nonchalantly removing the hirsute adornment of a regular patron Saturday evening a messenger boy handed Mr. Cuba telegram, marked "Collect." Michael opened it, and read with staring eyes, "I have just married a fellow in Albany. Very sorry, etc. etc."

Bring on the smelling salts!

* * *

It's a warm day!

AN EVENT IN THE LIFE OF MRS. GRISWOLD

One of this city's oldest persons, Mrs. Eveline Griswold, who lives at 808 Emery street, and is 93 years old, enjoyed the morning tabernacle services yesterday. She was taken there in a taxi and no one of the immense audience had keener delight in the doings than the old lady. Upon her return home she received a number of guests, one of whom Mr. L. B. Babcock found in Mrs. Griswold much of the same old spirit he had known in her younger days when they were pals.

Other guests at the Griswold residence included Postmaster Wilfred Coe and his family of Hastings. Mr. Coe is one of Mrs. Griswold's nephews, and also a Billy Sunday trail hitter. The great evangelist has no stauncher adherent than the postmaster.

MR. WARTH AND MISS PAINTER WILL RETURN

Rev. J. W. Barrett announced last night that Chorister Warth and Miss Painter of the Peacock party will return to this city in the latter part of June and give a concert under the auspices of the ladies of the First Methodist church.

The singing of Mr. Warth and Miss Painter has been one of the features of the Peacock campaign, and it is certain that many will take advantage of the opportunity to her them again. The program has not yet been arranged.

THE QUIRK TO-DAY

A bill of excellent merit awaits your approval at The Quirk to-day. A 5 part metro feature photoplay, "One Million Dollars," featuring William Faversham, and a Selig weekly constitute the movie portion and Bond & Bond, singers and dancers; Edward Hill, electrical novelty; Vy Linn, imitating Charlie Chaplin and Maley & Mack in a comedy skit, comprise the vaudeville contingent. The most exacting person will find their monye's worth and some to spare.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

ACID MAKERS WANTED

Volume 2, No. 447. WEDNESDAY, MAY 31, 1916 Price, One Cent

"UNCLE SAM'S WATER WAGON"

Sam Small Filled Big Tabernacle Last Night to Its Capacity.

A large audience greeted Rev. Samuel Small, the anti-saloon lecturer at the Fulton Tabernacle last night, and the occasion forcibly reminded one of the Peacock campaign. Most of the Peacock choir were in their usual places, and Dr. C. P. Knapp directed their work. Mrs. J. Harry Howe was the accompanist.

The Peacock Men's Club attended the lecture in a body and the delegation, which met at the New York Central station numbered about 200.

The Tabernacle double quartette sang "The Wall of Jericho," Dr. Knapp sang the solo parts of "The Brewers' Big Horses," and Miss Marion Lake gave a very pleasing rendition of "The Promise of Life."

After Rev. J. W. Barrett had offered a prayer, George L. Pratt, of the Peacock club, introduced Mr. Small. Mr. Pratt spoke of the evils resulting from intemperance, and alluded to Mr. Small as the man who has made a great fight against the evils of drink and has closed more saloons than any other man in the country.

Mr. Small related a few reminiscences of his part in the Civil War, when he fought as a Confederate soldier, and paid big tribute to the work of his Northern foeman, whose memories were being honored yesterday. Mr. Small enlisted in the Confederate army when only 14 years old, and served throughout the entire conflict. He also saw service during the Spanish-American war.

He alluded to the fact that Americans were patting themselves on the back and calling this nation "a Christian country—the greatest Christian nation on the globe." This he termed a great lie and if God should send Gabriel to Washington to blow his golden trumpet and tell the nation to pack up everything and move to heaven for a grand review, with its distilleries, breweries and saloons, what a gay looking nation it would be; the angels would be paralyzed, Peter and the 12 gatekeepers would be frightened and the other officials of heaven would be put out of commission, endeavoring to find locations for the above named industries. Mr. Small said, "Would not it be fine to lumber up heaven with all this paraphernalia of the devil? How in the world can we truthfully say we are hungry for the second coming of Christ? We are hugging the traffic to our bosom and squealing like a pig if anybody tries to take it away from us. What's the good of lying about it? Some good old Methodist brother says, 'What can we do about it?' Why, you putty-headed old jackass, do as Christ told you to do. But he says, 'I ain't in favor of prohibition.' No we know it; you don't have to advertise the fact, for the color of your headlight and the smell of your gasoline tank tells what you favor."

"If any of you smart people know how to make the liquor traffic respectable, go down to Washington and prove it and the liquor men will pay you big money. That's what they want above all other things so stop the wave of prohibition that is sweeping over the country.

"It is the most unwelcome business in the United States. Thank God, strong men are praying for prohibition. More than half the states are for prohibition now. We have the liquor interests backed up against the wall and they are crying for ice water and fans."

Mr. Small then outlined the start of prohibition in Maine in 1851 and the increase from that time until the present when half the states are for prohibition and that next December the national prohibition amendment to the constitution will be passed by congress—and four years later every state in the union will have ratified the amendment.

"During the past year the U. S. government has lost $24,000,000 in licenses; on beer alone the loss was $2,000,000 in ten months and in the last year 16,851 liquor dealers have gone out of business. Think of it. one dealer quits the liquor business every 28 minutes, days, nights and Sundays.

"New York can go dry in a short time with the proper organization."

The speaker alluded to the good work of the Peacock campaign and urged Fultonians to get busy at once. He said it was the third great emancipation. Cornwallis' surrender to Washington was an emancipation of America from British rule; Lee to Grant was an emancipation from slavery; the third emancipation is Old King Alcohol's surrender to Christ, and emancipation from the evils of intoxicating drinks. Organize and get busy and you can secure the last in 1920.

In closing he explained the plan of raising funds and circulated pledge envelopes to raise funds by monthly donations. A large number were filled out and there was a liberal offering to pay the expenses of the meeting.

Prayer and benediction was made by Rev. F. N. Darling.

Appeals to Women to Get Postmasters Out of Politics

New York.—An appeal to two million clubwomen to help takes the Postoffice department out of politics was made by the civil service reform leader Richard Henry Dana of Boston, before today's session of the Federated Women's club's national convention here today. Dana declared the political appointment system has made the United States postal service the poorest and most inefficient in the world. The remedy Dana suggested was to put every postal service job, from the four assistant postmaster-generalships down to the lowliest carrier of a rural route, on a competitive examination basis under strict civil service rules. The speaker asserted that more than 90 per cent of all postmasterships paying $1,000 a year or more are changed with every national administration; and that appointees to the big assistants' jobs in Washington sometimes are changed twice in an administration. Dana condemned "the vast majority of postoffice appointees" as being "either politicians or brokendown failures in business whom some politician desires to foist upon the United States for support and who almost never know or learn anything about the intricacies of the postal service." Dana declared the recent order that all postmasters devote all their time to the postoffice service will only "make postoffices a political headquarters." He pointed out that we have had 15 postmaster generals in the last 30 years and suggested a long term appointment. He suggested the division of the country into postal districts, with a division superintendent for each one. In praising the railway mail service, Dana said it was efficient only because it has been under civil service for years. In concluding, the speaker declared that, although our postal service is 60 years behind that of other countries, bills now in congress for its reform are ignored because the people do not rise up and demand that the reforms be put through.

PULPWOOD COMING BY RAIL INSTEAD OF BOAT

The newly re-organized Arrowhead Paper Company of Battle Island is expecting a monster shipment of pulp wood from Anticosti within the next few days. The wood will be transferred by steamer from Anticosti to Oswego and thence to this city by rail, as there is a shortage of available canal boats.

FIFTEEN HUNDRED PERSONS BEGAN WORK TO-DAY

The Fulton Mills opened this morning on full time, after a shut down of three weeks, much of which was occupied in overhauling the machinery. About 1,500 hands went to work today, and the amount of orders on hand will insure operation on full time for at least eight months.

WEATHER FORECAST

Fair to-night and Thursday; partly cloudy and warmer.

RAIN MARRED MORNING MEMORY DAY EXERCISES

Cold breezes and intermittent rains d id not interfere with the usual Memorial Day parade of the Grand Army veterans yesterday, and although the affair was held up almost two hours because of the falling rain, the march began abbout 11 o'clock. Headed by the Elks' band, the aged veterans, followed by the fraternal organizations of the city, including the Woodmen and the Elks' tramped over the muddy roads to the cemeteries, where they decorated the graves of their dead comrades.

A salute was fired at the soldiers' monument in East Side park during the course of the march, and the ranks were broken after graves in Mt. Adnah and the Catholic cemetery had been decorated with flowers and the colors.

A small crowd attended the exercises in the morning, but the short period of sunshine in the afternoon brought many more out, and there were few graves which did not receive their quota of flowers and plants.

The stormy weather interfered with the plans of most of those who had intended to spend the day out of the city. Comparatively few Fultonians made the trip to Mexico Point, although a large delegation went to Syracuse and to Long Branch which opened for the summer season yesterday.

The high school baseball team went to Mexico to play the high school team there, while the Rowan Stars of Oswego and the Independents of this city played before a small crowd on the Fair Grounds.

ABOUT THE TOWN

Officer Frank Smith narrowly escaped serious injury yesterday while on motor-cycle duty when the department motor skidded on the wet pavement in front of the Bank Cafe. The officer was thrown off and badly shaken up. The machine was uninjured and after first aid restoratives had been secured at the Boston Candy-Kitchen, the patrolman was able to resume his ride.

* * *

The trolley service between this city and Syracuse was very poor last night. Cars ordinarily intended to hold 100 people carried twice that number and hundreds returning home were obliged to stand throughout the entire trip.

* * *

The Fulton Imperial Orchestra returned to this city this morning after a triumphal tour of Mexico Point. All reports have it that the Fulton music-dispensers "knocked 'em cold" at the resort.

* * *

The High School baseball team won at Mexico yesterday, defeating the High School team of that place, 11—8. The team and a large contingent of rooters made the trip in the Wilson-Scott auto-bus.

* * *

Scandal!

* * *

Heard something this morning that made me open my eyes! What was it?

* * *

Big Ben!

* * *

John Holtz, well known purveyor of liquid refreshments for a Broadway hostelry, has quit hard work and has purchased the small lunch wagon near the corner of Broadway and South First street, where he will serve meals a-la-carte!

* * *

A benefit for those dependent upon the Department of Charities for the necessaries of life will be given at the Happy Hour theatre June 8. Manager Prowda will donate the use of the theatre and the entire gate receipts. The money will be turned over to Commissioner James R. Somers, who will use it in relieving some of the more extreme cases of poverty in the city.

VAN AMBURG AWAITS ACTION OF THE BOARD

Because of the absence of President Wiltsie, the Board of Public Works took no action on several important matters at its regular meeting Monday night. The question of granting a permit to Edward Van Amburg of West First street, who wishes to install a gasoline tank in front of his store was not brought up at the meeting.

Work on the Fremont street sewer, which has been delayed by bad weather and a shortage of materials, will be resumed to-day, under the direction of Frank Rumsey. The sewer extends for two blocks along Fremont street, beginning at Seventh street.

OFFICIALS OFF TO ATTEND MAYORS' CONFERENCE

City Chamberlain Adkins, Sealer Harry M. O'Brien, Charities Commissioner James R. Somers, City Attorney W. S. Hillick and other members of the municipal family, will go to Syracuse this afternoon in Mayor Lewis's touring car to attend the opening sessions of the Conference of New York State Mayors. Chief of Police Dyer will join the party at the Onondaga.

OSBORNE EXPECTS TO RETURN TO SING SING

New York—Thomas Mott Osborne, who quit Sing Sing under indictments, expects to return to his former post in the near future. Nearly all the charges have been dismissed. Mr. Osborne's plans became known yesterday following a conference between Governor Whitman and George W. Kirchwey, now warden.

Anti-Trust Law Must Be Amended, Says College Head

Chicago—Declaring the Sherman Anti-Trust law should be modified to permit business interests to co-operate and promote, not restrain, trade, President Charles R. Van Hise of the University of Wisconsin was applauded long and loud at the opening session of the National Lumber Manufacturers' convention here today. The address was declared particularly appropriate at this time, when business men in all lines of American trade are trying to have the New Federal Trade relations committee given authority to pass on co-operative contracts between business concerns. They want the line drawn between advantages co-operation and blighting monopoly. President Van Hise, who went before a committee of congress recently and asked the amending of the anti-trust law to permit the lumber manufacturers to curtail production, under federal regulation, to a point which would make it possible for them to profitably conserve their forest supplies for future generations, explained his views on this point. He declared that under present conditions it might be possible for an industry to waste its entire future natural supply to meet a present demand. Mayor William H. Thompson opened the convention. P. A. Long of Kansas City responded. The annual address of the president was then made by President R. H. Downman of New Orleans. At the afternoon session Dr. Herman von Schrenk of St. Louis read a paper on tests of fire-resistant paints, in which he touched on the latest move of the nation's lumbermen, to find means for making the nation's lumber building material non-inflammable.

CHICAGO BUSINESS MEN FOR COL. T. R.

Chicago—Completion of an organization of business men in every State in the Union pledged to use their influence to induce delegates to the Republican National Convention to vote for Theodore Roosevelt as the party's nominee for President was announced to-day by Herbert L. Satterlee, acting manager of the Chicago Roosevelt headquarters. Mr. Satterlee is son-in-law of the late J. P. Morgan.

PRIZE SPEAKING OCCURS TONIGHT

The Quirk Will be Crowded With Parents and Friends of Participants.

This evening at the Quirk Theatre, the annual prize speaking competition among the pupils of the graduating class of Fulton High school will be held, commencing promptly at eight o'clock.

Mrs. Laura White Kesler, teacher of elocution, has directed the rehearsals of the speakers who will contend for the prizes. As usual, four young men and four young ladies will speak and first and second prizes will be awarded to each quartet.

Under the direction of Mrs. L. A. Owens, the High School orchestra will play during the oratorical numbers, and the musical program to be presented is an exceptionally good one. Among the numbers selected, medleys from "Katinka" and "The Blue Paradise," two current Broadway successes, are certain to meet with the favor of the audience.

The judges of the contest are Dr. W. W. Wickes, of Syracuse High school, Professor E. W. Smith, of Colgate University, and Principal W. B. Wilmot, of Mexico High school. The winners will be announced after the speaking, but prizes will not be awarded until commencement.

Almost every seat in the theatre has been sold, and those who have not yet purchased tickets are advised to make early application at the box office, which will be open all day to-day.

Pupils of the High school will hold an informal dance at the Library after the exercises.

The program follows:

PART ONE

Grand March—Sparklets
F. H. S. Orchestra

Nature's Teachings ....
Charlton Hunter

Against Capital Punishment ...... Robespierre
Wallace Russell

Friml Waltzes ....

Citation to Prove Will

THE PEOPLE OF THE STATE OF NEW YORK,—To Leon F. Titus, Traverse City, Mich.; Carlton H. Lewis, San Diego, Cal.; Nellie Bradt, Hannibal, N. Y.; Charles S. Orton, North Tonawanda, N. Y.; and Archie Thomas, Margaret Dean and Donald Thomas, all of whose places of residence are unknown, heirs-at-law and next of kin and other persons interested in the probate of the last will and testament of Marion J. Cowles, late of the City of Fulton, in the County of Oswego, New York, deceased, Greeting:

Upon the petition of Arvin L. Rice, of the City of Fulton, in the County of Oswego, New York, the Executor named in a certain instrument in writing, purporting to be the last Will and testament of said Marion J. Cowles, late of the City of Fulton, in the County of Oswego, and State of New York, deceased, and relating to both real and personal estate, praying to have said instrument in writing and the Codicils thereto proved and recorded as a Will of real and personal estate: You and each of you are hereby cited to show cause before the Surrogate's Court of the County of Oswego, at the Surrogate's Office in the City of Oswego, in the said County of Oswego, New York, on the 12th day of June, 1916, at ten o'clock in the forenoon of that day, why said Will should not be admitted to probate, and such of you as are under the age of twenty-one years are required to appear by your general guardian, if you have one; or if you have none, to appear and apply for one to be appointed; or in the event of your neglect or failure to do so, a special guardian will be appointed by the Surrogate to represent and act for you in the proceeding.

In Testimony Whereof, We have caused the seal of the Surrogate's Court of the County of Oswego to be hereunto affixed.

[L.S.] Witness, Hon. Clayton I. Miller, Surrogate of our said County of Oswego, at the City of Oswego, in the said County, the 8th day of May A.D., 1916.

H. E. HINMAN,
Clerk of the Surrogate's Court.

To ALL PERSONS INTERESTED:
Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute, West 175.48 feet to a point; thence North 58 deegrees, 02 minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing .0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

AFTER ICY BATH HE WALKS IN UNDERWEAR

Fisherman Escapes Drowning, but Goes Four Miles Barefooted to Get Help.

Britton, S. D.—Compelled to walk a distance of four miles to the nearest farmhouse barefooted and clad only in his underclothing was the distressing experience of John Knaak, a Marshall county man, following a disaster which overtook him while fishing on Roy lake, some miles from here.

He was in a boat alone, and when he attempted to make his way to shore the boat, which it developed had been overloaded with nets, sank to the bottom, throwing him into the icy waters of the lake.

He managed to reach a nearby net stake and, clinging to it, divested himself of his rubber boots, oilskins and all his wearing apparel but his underclothes.

After resting for a time he started to swim to shore, some distance away. He reached shore in an exhausted condition, and when he had somewhat recovered himself he started on the painful four mile journey to the farmhouse for assistance.

MEN TALLER IN MORNING.

May Measure Half an Inch More After Breakfast, Marine Examiners Say.

Washington.—Men are taller in the morning than in the evening, medical examiners for the United States marine corps declare, and the applicant for enlistment who is of medium or small stature has a better chance just after breakfast to meet the height requirements than at any other time during the day.

The disks of cartilage between the vertebrae of the backbone yield considerably to the pressure due to the weight of the body when it is erect and expand themselves while the body is in a recumbent position.

This effect may amount to as much as half an inch in the case of a heavy many of, say, five feet ten inches in height, according to the marine corps medical examiners.

Tombstone For a Hearth.

Waynesburg, Pa.—Discovery that a tombstone had been used as a hearthstone in the residence of Miss Jessie Baer, in East Greene street, has been made. In making some repairs the stone was removed, and on the underside was the inscription, "Elizabeth, wife of George Heise, died Oct. 12, 1832, aged forty years, nine months and seventeen days."

ASK DELEGATES TO AID COLONEL

Republican Committee Appeals For Convention Support.

CALL HIM MAN OF THE HOUR

Other Candidates Merely Imitators of Roosevelt—National Honor Is at Stake.

Pointing out that Theodore Roosevelt is by common consent the spokesman of the kind of Americanism that makes one's blood tingle, the Roosevelt Republican committee sent a letter to each delegate and alternate to the Republican convention yesterday urging votes for the colonel's nomination at Chicago.

Colonel Roosevelt, the letter declares, first had the courage to lay bare the evils of divided allegiance among our citizens of foreign origin, and, almost unaided, above the stress and the confusion of the last two years, he has upheld and kept untarnished the standard of our highest patriotism.

The letter, which is signed by George von L. Meyer, chairman of the Roosevelt Republican committee, is as follows:

Dear Sir: The Republican national convention meets at a time of grave national concern.

For three years weakness and irresolution have characterized our government. The Democratic administration has failed to protect the lives of our citizens on the high seas or to hold accountable their destroyers. Disorder and rapine on the Mexican border were ignored until they culminated in actual invasion of our country, then met with an insufficient and ill equipped though gallant military force, so inadequate and ill supplied as to risk humiliation and disaster. Belligerent nations, convinced of the administration's timidity and heedless of its verbal protests, have openly disregarded international law and our rights as neutrals.

Democratic Irresolution.

No adequate measures are being taken to end this national humiliation or to insure the country's safety. The Democratic president began by opposing preparation for defense, suddenly urged it with perfervid exhortation; then, dismissing a cabinet officer who took him at his word, sanctioned an inadequate and vicious measure calculated only to give this country a false sense of security.

Thus irresolute in its foreign policy and irresolute at home, the administration has permitted our citizens to become confused, uncertain, disunited. Leadership due them from their constituted authorities has been altogether lacking. They have consequently divided into groups, some conditioned on allegiance to countries from which they or their ancestors came. Fostered by such circumstances, false leaders have arisen with vague assurances of security and evil counsels of inaction, adding to the confusion and exposing us to increasing dangers.

In its emergency our country turns to the Republican party for restoration and guidance. It will accept Republican leadership if real leadership is offered, but will turn away again from mere opportunism. It is for us as Republicans patriotically and loyally disregarding all other motives to perform the required service in the spirit the occasion and our fellow countrymen demand.

We urge a course for our party which we believe will instantly (even before the election and inauguration of the new president) unit our citizens in a common purpose. The convention can meet the emergency with a single name. Its nomination for president will be the measure of Republican capacity.

Speaks For Americanism.

Theodore Roosevelt, without official title, without a vestige of official power, is by common consent in this supreme hour the spokesman of our Americanism. He first discerned the weakness of our foreign policy, now so humiliatingly and alarmingly apparent. While others were faltering, he first began to arouse our national consciousness, to vitalize it, to give it purpose. He first had courage to lay bare the evils of divided allegiance among our citizens of foreign origin. His voice has been foremost in urging adequate preparation. He, almost unaided, above the stress and confusion of the last two years, has upheld and kept untarnished the standard of our highest patriotism.

If a spokesman were enough, if a standard held high were enough, the nation would have no need to call Theodore Roosevelt again to the presidency. Such service he is already performing. But they are not enough. National honor cannot be upheld nor our country maintain its rightful place among the nations by words or standards alone. Our country must act. It must act to insure peace with honor under adequate safeguards of peace, to guard its boundaries, to protect its citizens and to inspire and preserve loyalty among them. To compass this the spokesman must have authority, the leader power.

Roosevelt Blazed the Way.

Numerous candidates, some expressing their views, some silent, are the announced choice of groups of your fellow delegates, each assuring you that its favorite, if chosen, will follow where Theodore Roosevelt has blazed the way.

It is significant that the highest assurance any other can give of desire and intention, if chosen, to uphold the national honor and to prepare this nation is to declare that his policy is the same as the policy of Theodore Roosevelt; to endeavor to prove that his breadth of vision, his singleness of purpose, his disinterestedness, his insight, his courage, are equal to the breadth of vision, the singleness of purpose, the disinterestedness, the insight, the courage of Roosevelt.

The courage of wisdom is to choose Theodore Roosevelt himself, not one of his imitators, however worthy. This we urge. He is probably the only candidate who can attract a large body of support from individual voters regardless of party. He is certainly the only candidate who will draw enormously from the Democratic party. He is the one who has made the clear cut fight for Americanism and adequate defense. We urge you to put aside all lesser considerations, to regard only the need of your country and the opportunity of your party to perform a high service, and to vote for his nomination in the convention.

ROOSEVELT REPUBLICAN COMMITTEE.
GEORGE V. L. MEYER, Chairman.

BUNDYS CROSSING.

Mrs. Roy Dodge spent Friday with Mrs. Muriel Congdon.

Our cemetery has been beautifully decorated.

* * *

McDonald-Graham On May 24th, at the home of Mr. and Mrs. Samuel Graham, about thirty guests gathered to witness the marriage of their daughter, Goldia A. to Delos D. McDonald of Utica. The house was tastily decorated with evergreen and apple blossoms. Miss Dorcas Osborn presided at the piano and promptly at 3:30 the bridal party entered the room to the strains of a wedding march and took their places under an arch of evergreens and pink apple blossoms. The Rev. T. J. Williams of Mt. Pleasant performed the impressive service. The bride wore blue serge and carried a bouquet of pink carnations. The bridesmaid, Miss Marie McDonald, sister of the groom, wore blue serge and carried sweet peas. The groom wore blue as did his attendant, Mr. Lester Jenkins, cousin of the bride. After the service a bountiful repast was served.

They left by auto for a short wedding trip after which they will make their home at Mt. Pleasant. Two sisters of groom, Miss Ruby and Marie McDonald accompanied them as far as Utica. They received many beautiful presents among them silverware, glassware, table and bed linen. There were guests from Mt. Pleasant, Utica, Scriba, Fulton and Battle Island. Their friends all join in wishing them a happy married life.

Hall's Catarrh Cure is taken internally and acts through the blood on the muscous surfaces of the system.

Nice Table Ornament.

When Sir George Trevelyan was chief secretary for Ireland, in troublous times, the police made him carry a pistol about with him. One night after dinner he took it out of his pocket and put it on the table, saying to his host, "Pray forgive me, but if you knew how tired I am of carrying this thing about!"—London Standard.

No Mercy.

"Your wife's a judge of human nature, isn't she?" "Judge? She's a prosecuting attorney."

LOOK OUT, HERE COMES FIDO

Paris (By Mail)—The use of trained dogs and sea-ravens in the chase of enemy submarines is an idea just suggested to the new French Ministry of War Inventions.

The Ministry declines to reveal the name of the suggestor or to admit that experiments are being made at the present time with the animals. It is willing, however, that the public know about the idea.

According to the would be submarine catcher, all vessels should be equipped with a corps of trained dogs and Chinese sea ravens, the latter of the kind native to Chinee waters.

In training the animals the dogs should be taken either aboard ship or to the water's edge where a submarine is available; and where they would be taught to recognize the peculiar sound which comes from a submarine's propellor when the entire vessel is under water.

The keenness of a dog's hearing, it is asserted, could detect as no microphone or other mechanical instrument possibly could, the approach of a submarine. The dog would be taught to bark at the sound. This training would require but a few weeks.

With the sea-ravens, it is admitted, the schooling would be more difficult.

The sea-ravens would be taken to a submarine, to the periscope of which would be attached a piece of raw meat. The sub would then navigate with both the periscope and the piece of meat submereged.

The sea-raven, with its keen senses of vision and smell for under-water food, would quickly detect the chunk of meat and the periscope and follow them till they came to the surface, where the raven quite naturally would perch on the periscope.

After both the dog and the sea-raven became reasonably letter perfect individually they would then be tried out together.

Through the association the sea-raven, would come to know the instant the dog barks that there was a periscope in the vicinity presumably with a piece of raw meat attached.

Once the periscope reached the surface and the sea-raven perched on it the French gunners would of course fire the fatal shot.

Appended to the idea as submitted, is a long list of statistics on the number of sea ravens available in Chinee waters, together with detailed instructions for their importation.

The Ministry of Inventions feels that the only point the inventor overlooked was how to teach the sea-raven to get off the periscope.

War Oddities

London—Private G. Murkin, of Burton, owes his life to a "Made in Germany" watch which deflected a shrapnel bullet.

* * *

Amsterdam—A five act war drama entitled "Hindenburg" in which the German general whips the Russians in thirteen battle scenes is drawing crowded houses nightly in Berllin.

* * *

London—"Tommies" in a certain section of the British line in Northern France have amazed their benefactors at home by requesting practical books on bookkeeping.

* * *

Amsterdam — According to the Strassburg Zeitung, the Kaiser constantly carries on his person a psalm book which belonged to Emperor Frederick, who wrote on the flyleaf: "I carried this through the Schleswig-Holstein campaign, 1864 against Austria, 1866 and against France in 1870."

Dutch War Move Caused by Allies, Not by Germans

The Hague, (By Mail)—Despite the statements of certain pro-English newspapers, it is now known authoritatively that it was fear of the Allies, and not of Germany, that prompted the Dutch government to take ware-like measures a month ago. Certain reports reaching the Dutch government about steps taken by the Allies at the Paris economic conference caused grave concern here. The Minister of War informed newspaper men that the government was expecting an economic crisis of great importance, though he refused to go further in his statement. Evidently in anticipation of sharp measures by the Allies, the government chartered several steamers and sent them to America for wheat. Measures taken by the British government to enforce the blockade of Germany are steadily becoming more irritating to the Dutch. This does not mean, however, that the anti-German feeling of the greater part of the people of Holland has been lessened. Hollanders are generally convinced that Germany has respected Dutch neutrality in this war only because she depends upon Holland for her food supplies. The people blame high food prices upon Germany because exportations to the Kaiser's realm have lessened the supply here. The people of Holland want to be let alone by both sides.

Castor Oil, Not Cannon, Terrorizes Italian Soldiers

Florence, Italy, (By Mail)—Castor oils—not the great cannon of the Austrians—is the terror of the Italian army today. Even amid the tremendous business of battle Italy's brave warrior sons shrink from this sickeningly mellifluous remedy, Mrs. Edith Southwell, an English nurse in a local hospital for the wounded, has discovered. Nurse Southwell was told by the attending physician to dose her patients with castor oil. Anticipating no difficulties, she said: "Yes, doctor, I will do so tonight at their bed time." At the Sand Man hour she therefore appeared in her ward among her twenty-five crippled soldiers. In her hands she bore a tray, holding twenty-five individual portions of castor oil. Aroused by the sight, the battle-scarred heroes shouted. "What is it?" "Why, castor oil!" innocently replied the nurse. "Oh!" came a chorus of disgusted voices, "No! No! No! No!" And it was "No!" for the men in mild language and strong persisted in their refusals. Poor Nurse Southwell sat the tray and herself on the floor in the center of her rebellious company. What could she do? She pondered. Then came the inspiration. She vanished for a moment, returning with the twenty-sixth glass of castor oil. "See here, boys," she cried, "you don't understand. This isn't castor oil. This is an Austrian trench. Come, let's take, 'Avanti Savoia!' " The men took up the battle cry of the reigning house of Italy, "Avanti Savoia! Avanti Savoia!" they cheered. Meanwhile, Nurse Southwell heroically swallowed a dose of the castor oil and every single man of them followed her lead. They took the trench, but for an instant celebrated their victory with wry faces. But even these changed when Nurse Southwell disappeared for an instant and reappeared with twenty-six golden oranges. "Those are the medals of honor," she explained. "Upon each of you and upon myself I bestow one for conspicuous bravery."

If your horse suffers from mosquito bites, a bee sting or ivy poisoning, apply Hanford's Balsam to take the poison out and cool the inflamed skin adv.

GRANBY CENTER

The mumps are prevailing.

* * *

The Young People's Missionary Society will meet with Mrs. F. M. Wells, Friday, June 2.

* * *

Mr. Charles Allen spent Saturday in Rome.

* * *

Mr. and Mrs. George McCarthy of Fulton were over Sunday guests at Mr. and Mrs. Jesse King's.

* * *

The L. A. S. were very pleasantly entertained at the home of Mrs. Rush Fitch on Friday last.

* * *

Mr. and Mrs. F. M. Wells motored to Canastota Monday where they will spend Memorial Day.

* * *

Several from this place attended the closing meetings at the tabernacle Sunday.

HANNIBAL NEWS

The funeral of Mr. Elmer Wilson was held at the home south of this village Saturday at 2:30 p. m., Rev. Mr. Liggett officiating. Mr. Wilson was in usual health when he retired Wednesday night after his day's work. About midnight his wife heard him make a strange gurgling noise and hastened to his relief but life was extinct. His death was a great shock to his many friends, especially his invalid wife. He leaves besides his widow, one daughter, Miss Iva Wilson, and one son Horace.

* * *

Miss Lulu Adamy will teach at Pembers the coming year, Miss Gladys Knapp at the White school house, Miss Elinor Babcock at the Stone school house.

* * *

Mrs. Nellie Doxtater of Homer, N. Y., is the guest of Mrs. J. S. Stevenson.

* * *

Mrs. Springer of Canada is spending some time with her parents, Mr. and Mrs. John Patchen.

* * *

Mrs. Willis Haven is entertaining her sister from Pulaski.

* * *

Miss May Pellett is quite ill with inflammatory rheumatism.

* * *

Mrs. Bernham Moore and son of Rose Hill are guests of Mr. and Mrs. C. A. Cox.

* * *

Mr. Charles Hanlon lost a valuable horse the first of the week.

* * *

C. H. Leete of Bay City, Mich., is the guest of friends in town.

* * *

Miss Iva Wilson was called from her work in Syracuse to attend the funeral of her father.

* * *

Ray Crandall of Chester, Pa., is spending some time with his parents. Mr. Crandall has a position with the Remington gun works.

* * *

Mrs. J. S. Stevenson is the new vice president of the Oswego County Suffrage Association.

* * *

While playing ball last Thursday evening, Francis Green was struck in the face fracturing the left side upper jaw and loosening five teeth. Dr. Acker reduced the fracture.

* * *

Mrs. Nelson Gardner of Gilbert Mills is the guest of Mr. and Mrs. E. L. Gardner.

* * *

Mrs. Sanford Palmer is seriously ill.

An Ideal Spring Laxative
A good and time tried remedy is Dr. King's New Life Pills. The first dose will move the sluggish bowels, stimulate the liver and clear the system of waste and blood impurities. You owe it to yourself to clear the system of body poisons, accumulated during the winter. Dr. King's New Life Pills will do it. 25c. at your Druggist.

A SENSIBLE cigarette gives you far more than good taste

Any good cigarette is pleasant tasting. But for your steady, day-in and day-out cigarette, you want more than good taste alone. You want a sensible cigarette—a cigarette that will treat you *comfortably* at all times.

Fatimas are as sensible a cigarette as you can smoke because they are always cool and comfortable to the throat and tongue. And they allow you to smoke more freely than any other cigarette we know of without leaving a "mean" feeling of having smoked too much.

You can prove this for yourself.

Trial of Rofrano for Political Murder Begins Today

New York—Michael A. Rofrano, the Tammany politician and Assistant New York street commissioner who for more than a year walked around under the very nose of the Gothan police while they were scattering his picture and a $5,000 reward offer through every city in the country in an effort to capture and bring him to trial for hiring a gunman to do the political murder of Michael Gaimari, is scheduled to go to trial here today. Rofrano gave himself up. He said he was tired of being hunted. He had been living in a house near Washington Square, had gone to picture shows and stood beside policemen who were looking for him. He went about to conferences with his political followers. Rofrano in 1912 split with Tammany and formed The Home Rule Democratic club. March 8, 1915, Gaimari was shot to death. In May Gaetano Mentomagne, a New York gunman was convicted of the murder and sentenced to the electric chair. Gaimari named Rofrano as the man higher up. Rofrano resigned his $5,000 city job and disappeared. Gaimari's slayer, Montomagno, is now in the death house at Sing Sing, awaiting execution, but it is expected he will be brought from the death house to testify at Rofrano's trial. Rofrano said he hid because he did not want to be tried while certain political conditions obtained. He said today he believed he will be acquitted.

An Utter Lack of Faith
It is surprising to know how many people there are, particularly women, who are utterly miserable in body and mind only because they have not enough confidence in Chamberlain's Tablets to give them a trial. Mrs. Sarah Hughes, Booneville, N. Y., was troubled with indigestion and constipation. She had bilious spells and would feel most miserable at times. She says, "Chamberlain's Tablets helped me from the first, and since using two bottles of them I have been in the best of health."
For sale by all dealers.

SOUTH GRANBY.

Mr. Avery Paine and Miss Ruth Wilcox were united in marriage Sunday, May 21st.

Mr. Leland Sickler, wife and little son Victor of Fulton, visited their parents, Mr. and Mrs. George Sickler last week, returned home Friday.

* * *

Mr. Hume Hunter and family were over night guests at Harlow Sperbeck's Saturday.

Mrs. Bertha Stege entertained the South Granby Circle last Thursday. There was not as many as usual, being a busy time, but we had a very enjoyable time and the receipts were $4.45. The next Circle will be at Mrs. Fred Andrews'.

* * *

We are sorry to note that Mr. Pingree's folks are going to move to Lynn, Mass., the middle of June. They have been with us five years and we are very sorry to see them go. Mrs. Pingree's school will close June 5th. She has taught two very successful terms of school and will be missed very much as she has done a great deal to improve the schoolhouse.

Mr. Al Collins of Detroit, came to Mr. Sperbeck's Sunday morning and they took him to Warners with the auto. Mrs. Sperbeck is expecting her sister, Mrs. Collins Tuesday.

* * *

Quite a number from this place attend the tabernacle meeting Sunday and Sunday night.

Mr. and Mrs. Tillotson were guests at Sidney Bassett's Sunday.

* * *

Saturday Mr. Sperbeck and daughter Edna, and Mr. and Mrs. Joe Williamson motored to Rome and called on Mr. Bayne's people. They were gladly received and had a fine trip.

Mr. Ralph Brown and family started Friday for Schenectady to be gone until Memorial Day. They expected to stay over night in Utica on their way down. Mr. Donald Lake draws the mail while they are gone.

* * *

Mr. John Garrett was in town Sunday with his new auto. He was accompanied by his wife and little son and his brother Ovid and wife and little daughter, they called at Wilson Stewart's.

Mrs. Cynthia Lampman is in Fulton.

Only 25 of 20,000 Women Can Be Morgan's Guests

New York—Only 25 of the 20,000 women delegates attending the Federated Women's Clubs National convention here will be received today as guests visiting the famous library in the home of J. P. Morgan. No one knows exactly who those 25 women will be; and thereby hangs a tale. Miss Anna Maxwell Jones, chairman of the art committee of the General Federation thought it would be nice for the 20,000 delegates to the biennial meeting to visit J. Pierpont Morgan's famous library while they are here. She early arranged a program which included all the museums, art galleries and some wealthy persons' homes containing objects of interest and felt that the uplift tour would not be complete without a glimpse of Mr. Morgan's collection of books. So she wrote Mr. Morgan and he sent a favorable reply. It developed that there was a misunderstanding somewhere, and instead of extending the privilege to as many clubwomen as desire to visit the library Mr. Morgan limits the number to twenty-five. He sent out twenty-five engraved invitations for today and left to Miss Jones the task of choosing the lucky twenty-five. Miss Jones declines. She told Mrs. William Grant Brown, chairman of the whole biennial, that she did not lack courage, but when it came to meeting thousands of Western and Southern women, all eager to see the inside of that Morgan library, and having them know that she had left them out of the favored party, she backed out.

COLDS QUICKLY RELIEVED
Many people cough and cough — from the beginning of Fall right through to Spring. Others get cold after cold. Take Dr. King's New Discovery and you will get almost immediate relief. It checks your cold. stops the racking, rasping, tissue-tearing cough, heals the inflammation soothes the raw tubes. Easy to take. Antiseptic and Healing. Dangers of Draft

Drafts feel best when we are hot and perspiring, just when they are most dangerous and the result is Neuralgia, Stiff Neck, Sore Muscles or sometimes an attack of Rheumatism. In such cases apply Sloan's Liniment. It stimulates circulation to the sore and painful part. The blood flows freely and in a short time the stiffness and pain leaves. Those suffering from Neuralgia or Neuralgic Headache will find one or two applications of Sloan's Liniment will give grateful relief. The agonizing pain gives way to a tingling sensation of comfort and warmth and quiet rest and sleep is possible. Good for Neuritis too. Price 25c. at your Druggist.

OFFICER'S STORY OF TRENCH FIGHT

French Lieutenant Describes Intense Struggle Near Verdun.

NEW MACHINE GUN DEADLY.

One Group After Another Rushes Up to Clear German Trench That Menaces Defenders' Line—Few Prisoners Taken In Terrific Fighting, as Most of Enemy Are Killed.

The German drive for Verdun has passed now into a regular ebb and flow of position warfare in which local advances are the reward of individual dash and initiative, says one correspondent at the front.

In this fighting the French make unexampled use of the mitrailleuse, which is by general consent the deadliest of weapons in all this war of slaughter and originally of French contrivance. The gun is particularly employed in local attacks, and the account that follows may be taken as typical of the present French methods of procedure before Verdun.

The point attacked was a section of a German trench forming a salient on the northern slopes of the western spur of hill 304 and commanding the ravine between the hill and Le Mort Homme, along which the Germans vainly tried to force home a massed assault. This description is given me by the lieutenant commanding the attacking company, to whom a bullet through the left forearm seemed an infinitesimal price to pay for the first occasion he had led French soldiers to victory.

"About 1 o'clock this morning the fire of a battery of seventy-fives was directed against converging German trenches, which formed a V point forty yards in front of the French position. For two hours the hundred yard sides of the salient were enveloped in an eruption of flame and smoke until the first light of dawn showed the German wire entanglements torn to ribbons. At half past 3 o'clock four mitrailleuse sections began creeping forward in groups of five, dragging the new light mitrailleuses, which are especially suitable for such work. Each group aimed at reaching the V point angle, from which they could enfilade both sections of the German trench.

"Sheltered by the smoke of bombardment and taking advantage of the shell holes and undulations of the ground, they made fair progress, when suddenly one of the heavy German shells landed full on a hole where the foremost group were crouching. The result was that horrible fragments of torn flesh and splintered steel were scattered over their comrades waiting in the French trench.

"The second group was little luckier, for a German sentry in an armored turret shot three dead and wounded the fourth before a well aimed shell reduced him to silence.

Third Section Successful.

"The third section had better fortune, and as the cannonade died away into sudden silence, like a shock there began a rat-a-tat, like the explosion of engines of distant motorcycles from a crest of earth thrown up by a bursting shell, a scant five yards in front of the V point, which showed that it had placed its weapon in position.

"The remaining group managed to reach a vantage point whence they could partially sweep the other trench, but only after a furious hand to hand fight with an alert German patrol. This diversion prevented their getting sufficiently near, and they were soon forced to cease firing by the advance of our charging soldiers.

"The latter sprang forward in two lines, one against each side of the salient. On the left, where the mitrailleuse at the V point enfiladed the trench, the task was easy. They paused awhile on the brink of the trench, flinging grenades.

"The Germans had the choice of dying in their shelters or coming out to meet a storm of bullets. Some wallowed in the mud at the bottom of the trench to let the death stream pass over them and escaped for a moment, only to die later by bayonets of our infantry. Others tried vainly to climb the steep trench walls. Of the 150 defenders only two or three wounded survived to become prisoners when we finally occupied the position.

"Then the mitrailleuses, now reduced to three, were turned against the right side of the salient, where a desperate battle with grenades was progressing. The enemy fell dying under the leaden hail.

"Suddenly the rat-a-tat ceased, as the officers of the mitrailleuse groups perceived a French soldier, bolder than his fellows, who had hurled himself with his bayonet into the trench. Instantly he grasped the situation and shouted: 'Continue firing. Never mind me.'

"The rat-a-tat began again, and he fell dead amid a heap of the enemy. Then the mitrailleuses became silent and our infantry leaped into the trench, bayoneting the remaining survivors or hurling grenades into a few deep shelters, where a few might be lurking."

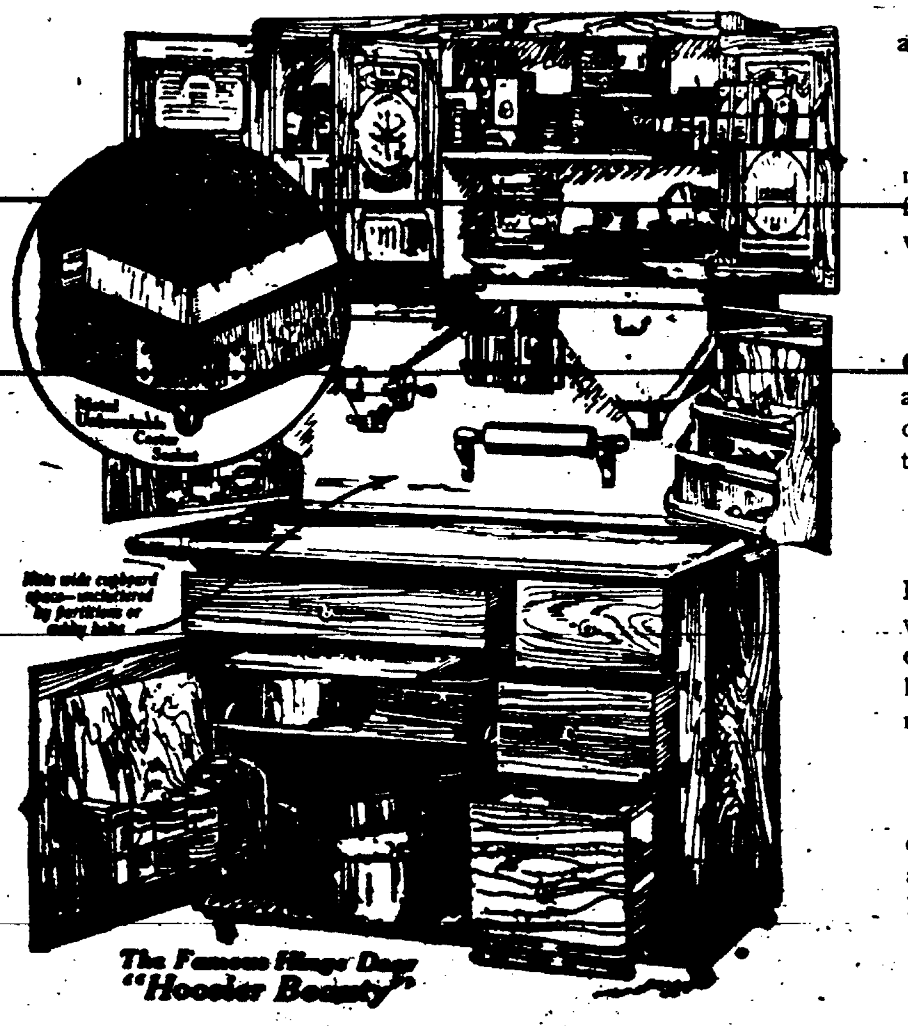
Hoosier Gold Medal Sale

Come and see what thousands of people saw at the great San Francisco Fair last year, what dozens of women saw Monday and yesterday at our store.

Learn why so many folks you know have paid us $1 in the past two days and ordered the Hoosier delivered to their homes. These neighbors will have many hours to spare when most women still are plodding 'round their kitchens preparing meals or putting away supplies and tidying up.

Hoosier has places for 400 articles all handily arranged at your fingers'-ends. But don't think it is merely a "shelf-room" cabinet. The Hoosier is really an "automatic servant." It has 40 features that aid you in cooking and save you time and labor.



Its perfect construction surpasses all other cabinets made:

1

Hoosier's Shaker Flour Sifter makes flour fluffy and light. Works faster than rotary wire. Can't wear out.

2

Hoosier's Revolving Spice Castor puts the spices you need at your finger tips. No danger of knocking over any or spilling them.

3

Hoosier's Double-Acting Sugar Bin is the only sugar bin from which sugar can be taken with equal ease from top or bottom; has three times the capacity of most bins.

4

Hoosiers are made with Hinge doors or full view Roll doors above the base. The Hinge doors have remarkably convenient utensil trays. The Roll doors are open —no pockets or cubby-holes. The price has only 50c. difference.

Remember there are Hoosiers for farms, camps, apartments, big kitchens, little ones, for window spaces and the center of big kitchens. No further need for old-fashioned, built in, uncleanable cupboards.

If you think that you can't spare the time to come, then you confess that you need a Hoosier badly, because it will give you so many spare hours for a lifetime.

Come see this Gold Medal demonstration tomorrow. Get our low prices and money-back offer. And please bring some friend with you.

BORDER TOWNS AROUSED BY CONSUL'S TALKING

El Paso—General Funston has directed a thorough investigation of a reportthat Mex icana Consuls north of the border have notified their people there will be hostilities within the next few weeks.

The American military authorities are greatly exercised over the activities of the Carranza consuls, which they call political incendiarism.

Watch Child for Worms

Worms sap child's strength, rob child of food and make child fretful, irritated, nervous. Watch stool and at first sign or suspicion of wormns give one-half to one lozenge Kickapoo Worm Killer, a candy worm remover. Gives immediate results, is laxative. Paralyzes and removes the worms, improves digestion and general health of child. Continue giving Kickapoo Worm Killer until all signs of worms are gone. 25c. at your Druggist.

Community Notes

Mrs. Lucy Pratt, of Mexico visited Mrs. Fred Boigoel recently.

* * *

Mr. and Mrs. J. H. Hurley and daughter, Ruth, of Mexico, were recent guests of M. B. Burns, 508 Oneida street.

Mrs. A. T. Dietrich, of Fulton, and Mrs. R. L. Dietrich, of Phoenix, spent Saturday and Sunday at Little Utica, as the guests of Mr. and Mrs. J. C. Dugers.

Stunning Genuine Palm Beach Suits at McDonald's $10.00.—Adv.

TAXES, AND STILL MORE TAXES

Internal revenue taxes that will be collected from the people of the United States during the year ending June 30 next, it is estimated, will amount to more than $500,000,000. The Democrats in Congress are working to devise still other taxes to be laid on our own people to make up the deficit due to the falling off in the customs duties.

In view of these figures, the attempt to belittle the tariff issue this year is futile. As a matter of fact the Democrats prefer any other issue for the approaching campaign to the tariff issue. But their treatment of the tariff, which, by reducing the country's revennes, made necessary the levying of war taxes while the Nation was at peace, cannot be relegated to the background.—Utica Dispatch.

FOR SALE

Five shares of stock of $100 each in the First National Bank of Fulton.

Will sell at par if the stock is taken within thirty days from date, May 31, 1916. Address,

MRS. W. N. FERRIS

515 Elm St. Big Rapids, Mich.

1916 CONVENTION OF THE REPUBLICANS MOST UNCERTAIN IN PARTY'S HISTORY

Large Number of Possibilities and Attitude of Progressives Add to the Interest.

History of Some Other Notable Gatherings—Lincoln's Nomination In 1860 Came as a Surprise.

THE sixteenth national convention of the Republican party, which meets in the Coliseum in Chicago on June 7, will be one of the most interesting and exciting gatherings ever held by that party. Excitement will be intensified because of the uncertainty of the nominee. When the first ballot is taken there will be a dozen men voted for, any one of whom may subsequently be the fortunate one. It is conceded that all of these have a chance, some better than others.

Another thing that tends to add interest is the attitude of the Progressive party. The split of 1912 is vividly recalled. Will the two factions get together this year, or will there again be a third ticket?

The history of this split is well known. Theodore Roosevelt, who had served one term of his own and three and a half years of McKinley's second term after the latter's assassination, unqualifiedly indorsed William H. Taft, then secretary of state, for president in 1908. Mr. Taft was overwhelmingly elected.

Break Four Years Ago.

The convention of 1912 approached. Roosevelt was then an avowed candidate. While he had not served two complete terms, the third term argument against naming him was raised. A bitter fight over seating the contested delegations was raised. Finally a majority of delegates with Taft proclivities were seated and the voting started. On the first ballot Taft received 561 votes and Roosevelt 107. A few others were scattered between Hughes of New York, La Follette of Wisconsin and Cummins of Iowa. However, there were 344 delegates who, vexed at the manner the contests had been settled, refused to vote for any candidate.

Colonel Roosevelt then organized the Progressive party, was declared the nominee for president and in the election the following November received a larger popular vote than did Taft, the nominee of the regular Republican party. The vote then was as follows: Woodrow Wilson, Democrat, 6,293,019; Theodore Roosevelt, Progressive, 4,119,507; William H. Taft, Republican, 3,484,956. Wilson received 435 votes in the electoral college, Roosevelt 88 and Taft only 8.

This was the birth of the Progressive party, which may be amalgamated with the Republicans again at the approaching Chicago convention or which may continue to exist and again name a third candidate. It will hold a convention in Chicago, also opening on June 7.

The Republican convention of 1860 was one of the most exciting and surprising ever held. Long before the convention met it was seen that the contest very likely lay between Lincoln and Seward. All the free and border states, with the addition of Texas, were represented. The first two days were taken up with seating the delegates and adopting a platform: on the third the candidates were formally presented without speeches. Seward was popular, and his cause was superbly managed by Thurlow Weed, one of the shrewdest politicians the country has produced. But there was a growing feeling that, much as he deserved of the party, Seward could not carry such doubtful states as Pennsylvania and Indiana. On the morning of the third day Weed, in attempting a Seward demonstration, was outwitted. He planned a monster parade in Seward's behalf. While his adherents were parading the streets the Lincoln managers packed the enormous Wigwam, where the convention was held, with their sympathizers. It was a bold stroke, and it gave the Lincoln cause the powerful aid that an enthusiastic audience alone can give. As the balloting proceeded every vote for Lincoln was cheered to the echo.

Seward led on the first two ballots, but on the second his gain was but 10, while Lincoln, largely through Pennsylvania's support, gained 75. While the third ballot was being counted a hush fell on the convention. It was known that Lincoln was either nominated or very close to it. The count showed him to be but two and a half votes short of a majority, with 231½ votes, 180 for Seward and 50 scattering.

At this juncture Chairman Carter of the Ohio delegation mounted a chair and called out, "I rise to announce the change of four votes from Ohio from Mr. Chase to Abraham Lincoln." As soon as it was realized that this gave Lincoln the nomination an uproar broke forth. An immense charcoal likeness of Lincoln was unrolled from the rear gallery, and the entire audience and convention, with the exception of the New York delegation, indulged in the wildest enthusiasm for some minutes. When order was restored there were other changes that gave Lincoln a total of 354.

Ingersoll on Blaine.

When the Republican convention convened at Cincinnati in 1876 Blaine was thought to have a safe majority of the delegates surely for him. As a matter of fact, he did receive the votes of a majority of the delegates, but not on any one ballot. Many delegates were held by instructions or other complications from registering their real wishes, and there was probably not a moment when, had they all been free to act as they chose, he could not have received a large majority.

The speech of Robert G. Ingersoll placing Blaine in nomination will go down in history as a most eloquent example of convention oratory. When the speaker finished the stirring tribute to the "plumed knight" even the opponents of the Maine statesman were stirred to enthusiasm in spite of themselves. The audience and delegates rose as one man, those who bore instructions for other candidates vieing with Blaine's most steadfast supporters in paying him the compliment of unrestrained applause. If a ballot had been reached that day it is doubtful if any power could have prevented Blaine's nomination. It was at this critical juncture that some of the cooler headed of the anti-Blaine leaders resorted to extreme tactics to save the day. They had the gas clandestinely cut off from the convention hall, so that when night came on adjournment was forced by the darkness.

Overnight the opposing forces regained their equilibrium and struggled desperately for delay. The key to the situation was held by the Pennsylvania delegation, which, under the head of Simon Cameron, one of Blaine's bitterest opponents, was instructed to vote for Governor Hartranft. At the end of the second day of balloting Cameron realized that he could not hold the delegates in line much longer. He therefore proposed that the delegation should continue to support Hartranft only so long as his vote increased. When it fell off they were to be free to vote as they chose. The Blaine members of the delegation eagerly accepted this apparently favorable proposal. Cameron, however, who knew arguments that would go with the southern carpet bag and negro politicians, arranged to have Hartranft's vote increase slightly on each ballot. By this method Hartranft's vote was maintained until the break to Hayes as a compromise candidate came on the seventh ballot.

Grant and Third Term.

When the Republican national convention met at Chicago on June 2, 1880, more than three-quarters of the delegates were found to be almost equally divided into two political camps. The two leaders whom they supported were General Grant, who was a candidate for a third term, and James G. Blaine, who had been a leading candidate in 1876. The two forces were completely organized and ably led, Roscoe Conkling being in charge of the Grant forces, while Senator Hale marshaled the Blaine cohorts.

Grant's opponents were fully realizing that in view of the remarkable manifestation of popularity which had been accorded him since his return in the previous fall from a tour of the world, their best ground of attack was the opposition to a third term. All attempts to get him to commit himself early in 1880 had been answered by the terse declaration, "I will neither accept nor decline an imaginary thing." His supporters took heart, however, and when the convention met it was evident that his followers were confident of winning.

Conkling adopted a truculent and arrogant attitude in the convention proceedings from the very start that stung the Blaine leaders to anger and destroyed all possibility of compromise. His first act in the convention was a play to the galleries and at the same time a studied insult of the Blaine faction. He moved a resolution binding the delegates to support the nominee of the convention, whoever he might be, thus showing a pretended distrust of the Blaine following. The resolution was adopted, but the debate upon it made him so unpopular with the supporters of all the other candidates that it really made the hope of obtaining recruits for Grant in other directions impossible.

Garfield Picked Out.

Conkling's next move was to attempt to force the unit rule on the convention by which he would have been able to cast New York's entire vote for Grant. As it then stood the delegation was divided, 51 for Grant, 17 for Blaine and 2 for Sherman. James A. Garfield, chairman of the committee on rules, reported adversely on this proposal and defended his position so ably and eloquently as not only to defeat Conkling's move, but to make Garfield himself a marked man, to whom the convention could enthusiastically and gratefully turn when tired out with the hopeless struggle. Garfield's closing words in defining his position in opposition to the unit rule, that he stood his ground because he believed it "to be everlastingly right," not only carried the convention with him in the ensuing vote, but recurred to them with new force when his name came before them as a candidate later on.

Conkling's nominating speech was a masterly example of convention oratory, ranking almost on a plane with Ingersoll's speech of four years earlier. Its opening phrase, "When asked whence comes our candidate, our sole response will be, he hails from Appomattox and its famous apple tree," caught the fancy of the galleries and aroused enthusiasm, but it was very near doggerel. At one of the evening sessions a demonstration in Grant's behalf was started that precipitated a full half hour of ear breaking enthusiasm, during which the audience broke into song, bands played, and Conkling, standing on a chair in the center of the New York delegation, slowly waved the state banner back and forth.

Scarcely had this tumult died down when a handsomely dressed woman leaped to the pedestal of a statue of Liberty on the platform and waved a red parasol wildly. Then she caught up the flag and, winding it about her, called for cheers for Blaine. They were given with a spirit and vim that matched that for Grant a few minutes earlier. When the watches recorded the fact that the Blaine demonstration had lasted five minutes longer than that for Grant it subsided suddenly.

Grant led on the first ballot with 304 votes to 284 for Blaine, 93 for Sherman, 31 for Washburne and 30 for Edmunds. After thirty-five ballots had been taken with little or no change the convention became weary. When, therefore, the Wisconsin delegation after a caucus decided by a few votes to throw their support to Garfield it was a signal for the stampede which made Garfield the nominee and ended the most dramatic convention struggle in American history.

Harrison's Shouters.

"I am a Republican. I belong to the grandest political body ever organized by the human race"—

This was as far as he was allowed to proceed in the last speech Colonel Robert Ingersoll ever made in a national convention. The Republicans had gathered in Chicago in 1888 either to nominate James G. Blaine or Benjamin Harrison. Blaine was coaching in Scotland with Andrew Carnegie. The convention decided to offer him the nomination by cable and take a recess until a reply was received. This was about noon. There were fully 12,000 people in the big auditorium, and they made it plain that they wanted to hear from some of the leading Republican orators. It was decided to gratify their wishes. Frederick Douglass, the negro orator, was the first speaker, and what he said was highly pleasing to the crowd. He spoke for nearly thirty minutes.

While he was speaking the Harrison managers observed Colonel Ingersoll seated on the platform. He was there in the interests of Walter Q. Gresham of Indiana, Harrison's most formidable opponent. Only the preceding day there had been a very impressive "full dinner pail" parade for Gresham by Chicago workingmen. Here was a dilemma. Every man in the convention hall knew of Ingersoll's skill as an orator. Probably every one of them had read his famous "plumed knight" speech in which he placed Blaine in nomination at Cincinnati in 1876. To permit him to speak now, even though he should mention Gresham's name only incidentally, would be to imperil Harrison's chances. The Harrison leaders held a hurried consultation and dispatched runners to all parts of the building with instructions to stop Ingersoll at all hazards.

When Douglass concluded there were cries of "Ingersoll!" "Ingersoll!" Deliberately the colonel took his place in front of the rostrum. He was given a wildly enthusiastic greeting. While the cheering was in progress he stood calmly wiping his big bald head awaiting the restoration of order. The crowd seemed to feel that something unusual was about to happen. It was an anxious moment for the Harrison cohorts. Ingersoll surveyed his great audience slowly and then in a strong, rich voice, each word carefully measured, spoke the two sentences quoted above.

The effect was electric. Seventeen words had literally swept the audience off its feet. Every man and every woman stood up and cheered. There were three minutes perhaps of genuine applause. Then when it began to subside the Harrison claquers would renew the cheering. These tactics were continued for five minutes. Ingersoll attempted to resume his speech. Immediately his voice was drowned by the noise, which proceeded mainly from the floor of the convention hall. Each time the colonel tried to speak the uproar was renewed. At last, after at least half a dozen fruitless attempts to proceed, he retired in disgust.

A motion to adjourn until 4 o'clock in the afternoon was declared carried by the chairman. When the convention reconvened a cablegram from Blaine declining the nomination was read, and Harrison was named.

New Method of Making Bread.

A new method of making bread has been adopted in Italy. It is found that 660 pounds of grain produce 880 pounds of what is termed "natural bread." In the process the grain is sifted and washed. It is then left for from forty-eight to sixty hours in a warm bath, where it germinates and begins to sprout. When the germinating process has gone far enough the grain is crushed in a machine and made into dough, which is passed into the oven.

Eleven Cents Grew to $3.78.

In 1864 Charles J. Davis, then living in Baltimore, had an account with a savings bank, but, intending to move to Cecil county, drew most of his money, leaving a balance of 11 cents. He thought no more about it until a few days ago, when he found the bank book. Out of curiosity he wrote to the bank and received a check for $3.78.

A Singular Find

It Occurred on a Battlefield In France.

By F. A. MITCHEL

George Elliott lived south of the border line separating Canada from the state of Maine. George was desperate. He was very poor, he was in love, and the country about him was a dead and alive region wherein it was hard enough for a man to pick up a living for himself, to say nothing of a possible wife and a family of children.

It is this kind of man which, when a war breaks out, furnishes food for powder. When a man sees only misery before him in life he looks upon death as not altogether undesirable. Besides, till it comes he has no responsibility as to food and clothes. The government takes care of him till he is told to stand up before an enemy and be shot down. His idea of being shot is a bullet in a vital part that will end his misery at once. He doesn't consider being maimed and turned again on to the world in a far worse fix than before.

One day George went to see his girl, Ellen Barry, and told her that he was going up into Canada to enlist. He reminded her that it was madness for them to think of marrying and his going to the war would be as good a way as any to end what was becoming torture. The only response on Ellen's part was tears. This made it all the harder for George, and, taking her in his arms, he kissed her, then, releasing her, turned and walked away without looking back. Ellen gazed mournfully after him through her tears till he had passed out of sight, then, sobbing convulsively, went into the house.

A year later Private George Elliott, who had been enlisted in a Canadian regiment of sharpshooters, was concealed among the branches of a tree in northern France picking off the enemy with his rifle when a shell burst under his perch. When George came to himself he was lying in the crater or hole made by the explosion. He tried to draw up one leg and failed. Then he tried to move his left arm and failed at that. His cheek was resting on something hard and cold, and he managed to raise his head sufficiently to see what his rigid pillow was. It was iron, manufactured iron, and, judging from what was uncovered by the earth, it was sheet iron.

One who covets death from a distance is not so anxious for it as it approaches. George's desire had been for a sudden taking off without knowing what was to happen. Now, lying in a shell hole in the ground, neither friend nor enemy about, he was very much concerned lest he die from inattention. He knew that he had been wounded, but how seriously he was ignorant. He made another effort to draw up his leg, and this time succeeded. It had only been benumbed. As to his arm, that was in very bad shape. It had been mangled, and arterial blood was flowing from it. Unfortunately he had been unconscious only a few moments, and there was yet time to stop the bleeding. Making a tourniquet of his handkerchief, he succeeded in compressing the orifice through which he was bleeding.

Having lain quiet for some time and feeling desirous to do something for his safety, he sat up and looked about him. Being in a hole, he could not look far. Indeed, the only thing of any interest whatever was his metal pillow. Only one or two square feet were uncovered, and George, tapping on it with the knuckle of his right hand, made up his mind that it was thin and there was a hollow space beneath it.

Meanwhile shells were falling and bursting about him. He had been when dropped from the tree in advance of the British line, and it did not seem to be any nearer him now. Nor did it appear that the Germans were any nearer. He had some curiosity to know what was under the iron covering, but, wounded as he was, this was impracticable. Having nothing to do, he looked up at the tree above him. It was a peculiar shape, and he noticed this particularly.

Presently a shell burst so near him that it shook down some earth from the side of the hole he was in and covered the metal that had interested him. He was sorry for this, because he had been contemplating an effort to examine it more thoroughly. But he was very weak and would not likely have succeeded. Soon after this he heard men tramping, the word of command, and his comrades charged past him.

It was not long after this that the Red Cross people came and, putting George on a stretcher, took him to the rear, where he was examined. His arm had been so badly shattered by a fragment of the shell that the surgeon attending him decided to amputate it. George sighed. He had come to the war to find release from misery and misery had been added. He had lost an arm, which would necessitate his being discharged. Death was as far from him as it had been before he enlisted.

When George was discharged from the hospital and the army he was told that he would be sent back to Canada. He said nothing, but he thought a good deal. He would have liked to see his beloved Ellen again, but it would only be a renewal of a situation which would again have to be ended. He might be returned to Canada, but from there would go anywhere so long as it was not back to her. While he was waiting he thought of the hole he had fallen into when knocked out of the tree and was seized with a desire to know more of his iron pillow. There was not much change in the situation of the British and German lines, and he thought it likely that he might be able to visit the spot.

One day he went out in search of it and found that his comrades had dug a line of trenches about a quarter of a mile in advance of it. There was the bustle usual to the rear of an army. Men, nurses, horses, motorcars, everything, anything, going and coming. He found the tree and recognized it by its shape. Standing under it, he looked down into the hole where he had lain wounded. It was sufficiently deep to admit of his going down into it without much likelihood of being seen. This he did, and, sitting down near the spot where the iron had been bared, he began to shove the earth with his heels.

It was not long before he uncovered the top of an oblong sheet iron box or trunk about three feet long by two feet wide. Scooping the earth away from before the lock, he looked about for a stone with which to break it open; but, testing it, he found that it was not locked. Lifting the cover, he saw a sight that surprised him. Lowering the lid, he kicked the dirt over it again and, making his way out of the hole, went back to his place among those discharged men waiting for transportation.

What he had found in the box was the valuables usually contained in the home of a rich man. Such as were not too bulky to go into the limited space had eventually been hurriedly placed there.

Keeping his secret, George the next day borrowed a needle and thread and remnants of cloth and began to make pockets in his garments, though they were rather baggy. When night came he returned to the hole and, uncovering the box, removed much of the contents, which he placed in his pockets. He did not need a light; the sense of touch was quite enough. He could only take the smaller articles, the others being too bulky. He had brought a shovel with him, and when he closed the box he put a couple of feet of earth on its top.

One day Ellen Barry was washing the breakfast dishes when, looking out through the window beside her, she saw a man coming in at the gate. He was well dressed, one sleeve being pinned to his coat front. When he came nearer she recognized her lover. Running to the door, she threw her arms about his neck, while he embraced her with his single arm.

"Oh, George!" she exclaimed ruefully, looking at the empty sleeve.

"I've got something for it," he said. "Come into the house and I'll tell you all about it."

When he had told her what has been thus far recounted he continued:

"When I opened the box I saw at once that some one, doubtless in view of an army coming, had put the family valuables in it and, taking it to the base of the tree from which I was picking off Germans, had buried it there, intending to recover it after the war. There was gold plate and loose jewels. On my second visit I took the jewels, leaving the gold plate. The owner had buried his treasure five feet under ground, not dreaming that it would be uncovered by a bursting shell.

"The jewels I have brought back with me, only having turned into cash those I needed for expenses. I doubt if they are more than a fraction in value of what remains in the box. When the war ends I shall return to France and see if I can find the owner, though I doubt it, and make a return of his property. I shall expect a reward large enough to enable you and me to be married and set up housekeeping without risk. I have had the jewels valued, and they have been pronounced a fortune in themselves. Whatever we need while the war lasts will come from the sale of such articles as will produce the required amount."

Ellen approved of her lover's way of looking at it. They were married and set up a small store. Their little home and their business are all they require to make them content, for it is not great possessions that bring happiness—indeed, quite frequently such sudden visits of fortune destroy happiness. Besides, to the couple falls a measure of comfort that they are appropriating from the treasure accidentally found only what the owner should have given them for their stewardship. For George argues that had he not covered the box containing the treasure it would have likely been discovered and looted.

George is looking forward to the day when the war will be ended and he will go to France to make a settlement. He and Ellen often wonder whether the box will be there. Likely this depends upon whether another shell will expose it. When either side attempts to demolish its enemy's trenches it hurls so many explosives that should the location of the treasure be bombarded it is quite likely that its contents will be scattered to the winds.

Recently a correspondent sent to a London newspaper an account of the finding, after a battle which took place on the English-German lines, of scattered articles of great value. They were picked up by British soldiers and appropriated by them. Some of them were purchased from the men by officers. This looks as if another shell had burst near the treasure box and blown the contents over the battlefield. Despite George Elliott's honesty, it is doubtful if he will ever be able to make a return of his find.

ODD TOWN IN IOWA

Farmers Consolidate Interests; Transact Business Profitably.

FOUNDED AND RUN BY THEM.

Though Built Fourteen Years Ago, When Railroad Was Constructed, Fernald Has Population of Only 100, but Air of Mutual Interest Would Please Any One.

Des Moines, Ia.—Out on the prairies of Iowa is one of the most novel towns of the country. There is no bickering between townspeople and rural residents, as is often the case. The farmers for miles around feel perfectly free to go to town without wearing starched shirts and collars. There is an air of mutual interest between town and country which would gladden the heart of any rural life expert. The reason for this is that the town is owned by the farmers themselves.

When he goes to town to buy a bar of soap or a new plow the farmer buys of himself, or rather he is a partner in the store. When he goes to the elevator he sells to his company the grain he has brought in. Perhaps his next stop will be at a bank owned and managed by the farmers themselves.

The town is named Fernald. All of its business enterprises are owned by farmers living within a radius of three or four miles. Though built fourteen years ago, when the railroad was built, Fernald has a population of only 100 and probably will not grow much larger in the years to come, because of the nearness of numerous other towns. But this does not mean that Fernald does not expect to grow and prosper, for the farsighted farmers who own the town do practically all of their trading there instead of patronizing mail order houses or buying in neighboring towns. In fact, the town is just a big social center for the whole community.

The town was founded by the farmers in order to avoid making long hauls in delivering crops to the railroad. A line elevator was built shortly after the town was founded, but it was not until about two years ago that it was purchased by a group of farmers operating under the name of the Farmers' Grain company. H. S. Fleagle, the farmer who put through the deal, was made manager of the elevator. The investment proved a wise one, for in the first year under the new management the elevator paid a profit of 95 per cent on the $5,000 capital.

The Farmers' Lumber company was organized by four farmers with a capitalization of $6,400. Mr. Fleagle also manages the affairs of this company and its $10,000 stock. Another enterprise founded by the farmers was the Farmers' Co-operative Mercantile company. After a brief period of competition the rival mercantile store was compelled to close its doors, leaving the management of the town and its business affairs entirely in the hands of the farmers themselves.

The town's founders then established the Farmers' Savings bank, with a capital of $10,000. The deposits have reached the $40,000 mark in three years. Mr. Fleagle's ability for management was recognized a third time when he was made vice president of the bank.

Fernald is in Richland township, in Storey county. Extensive use of tile has converted the ordinary prairie land into some of the most valuable farms in the state.

CONVICTS FIND NEED OF SAFE.

Sing Sing Welfare League Locks Up Its Treasures.

Ossining. — Charles Gondorf, wire tapper and secretary of the Mutual Welfare league of Sing Sing prison, has installed a big safe in the league quarters to hold the books and treasures safely from the fingers of league members who might forget the honor system and yield to temptation.

First Deputy Sergeant-at-Arms Lutz, for several weeks assistant to Peter Cullen, the sergeant and prison bridegroom, has resigned his post. Sergeant-at-Arms James Green, Cullen's successor, will appoint an assistant to succeed Lutz.

JOKE A SLOW BOOMERANG.

Recipient of Note Takes Up Matter and Clerk Loses Job.

Winsted, Conn.—Linus A. Hill, for seven years a clerk in the postoffice in Wallingford, seven months ago sent a letter to a town official calling attention to the fact that the "town clock was on strike."

Hill inserted the joke in a franked envelope. The recipient took up the matter with the postoffice department at Washington, with the result that Hill has been dismissed.

Finds Oxen Handy.

Findlay, O.—The twentieth century rapid mode of traveling via the automobile has nothing on Winfield S. Rader of McComb. He owns a team of oxen, and with them he does nearly all his farm work. Within the past few weeks the team has pulled eight automobiles out of the mud near Rader's home.

TAMENESS.

There are a vast number of people who think they are virtuous merely because they are tame and inoffensive. Tameness is not a virtue; it is merely the absence of vice.—John Stuart Blackie.

A ROYAL NURSE.

The Czarina of Russia as Red Cross Worker.

HER DAUGHTERS ALSO SERVE.

Sends a Message of Gratitude to This Country For the Relief Rendered Russian Soldiers by Americans. Saddened by the Long Strain of the War.

Mrs. Marye, wife of the former American ambassador to Petrograd, who recently returned to this country, spoke enthusiastically of the work of the American hospital in Petrograd, of which her husband was president and in which she served as a nurse almost to the day of departure from the Russian capital.

Just prior to leaving his diplomatic post Mr. Marye was decorated with the Order of Alexander Nevsky by the czar.

Mrs. Marye had an audience with the czarina a few days before leaving. The meeting took place in Tsarskoe Selo, one of the royal palaces.

"The czarina seemed very sad and sorrowful over the troubles of the war," commented Mrs. Marye in speaking of the visit. "She is a most beautiful woman, but her features show her inner sorrows.

"The czarina sent a message of gratitude to America for the relief work done for Russians by Americans. A great deal of effective work in aiding wounded soldiers has been accomplished by the hospital in Petrograd that was founded and is maintained by American money.

"It has been visited from time to time by the czarina, who, with two daughters, took a complete course in nursing. She has actually acted as a nurse in military hospitals too.

"There are forty-five beds in the American hospital, and they are always

CZARINA OF RUSSIA AS A RED CROSS NURSE.

occupied; also the institution has always been taxed to the utmost of its capacity, even though native hospitals have had empty beds in lulls in fighting.

"One of the most picturesque little figures in Russia is the eleven-year-old czarevitch. He hasn't ever been in good health, you know. But he's a game little youngster, and every time the czar goes to the front his little boy is certain to be in the trenches with him. The child is a great favorite with the soldiers."

Mrs. Marye said that, except for the omission of evening dress and the use of ordinary garb, Petrograd goes its merry way as usual. The opera and ballet continue despite the war.

Hotels are so crowded that they have to turn away persons every day. Many of the guests, she said, are American and English business men.

Flounce Skirts.

The flounced skirts are charming in thin black, whether two, three or five tiered or composed of many rows of little ruffles. A rival of these models is the petal pointed skirt, which, at first plain edged, now often has its points outlined with a narrow frill, sometimes plaited, sometimes gathered. A charming version of this idea was seen a few days ago. At first sight it seemed to be composed of haphazard points and frills, but there was really a definite scheme in the arrangement. There were three tulle skirts, one over the other, cut into different shapes, the two top ones edged with ruffles. Their placing was clever, and the dainty widening at the hips was insured by a bit of haircloth—or in braid it is now called—which was placed under the tulle.

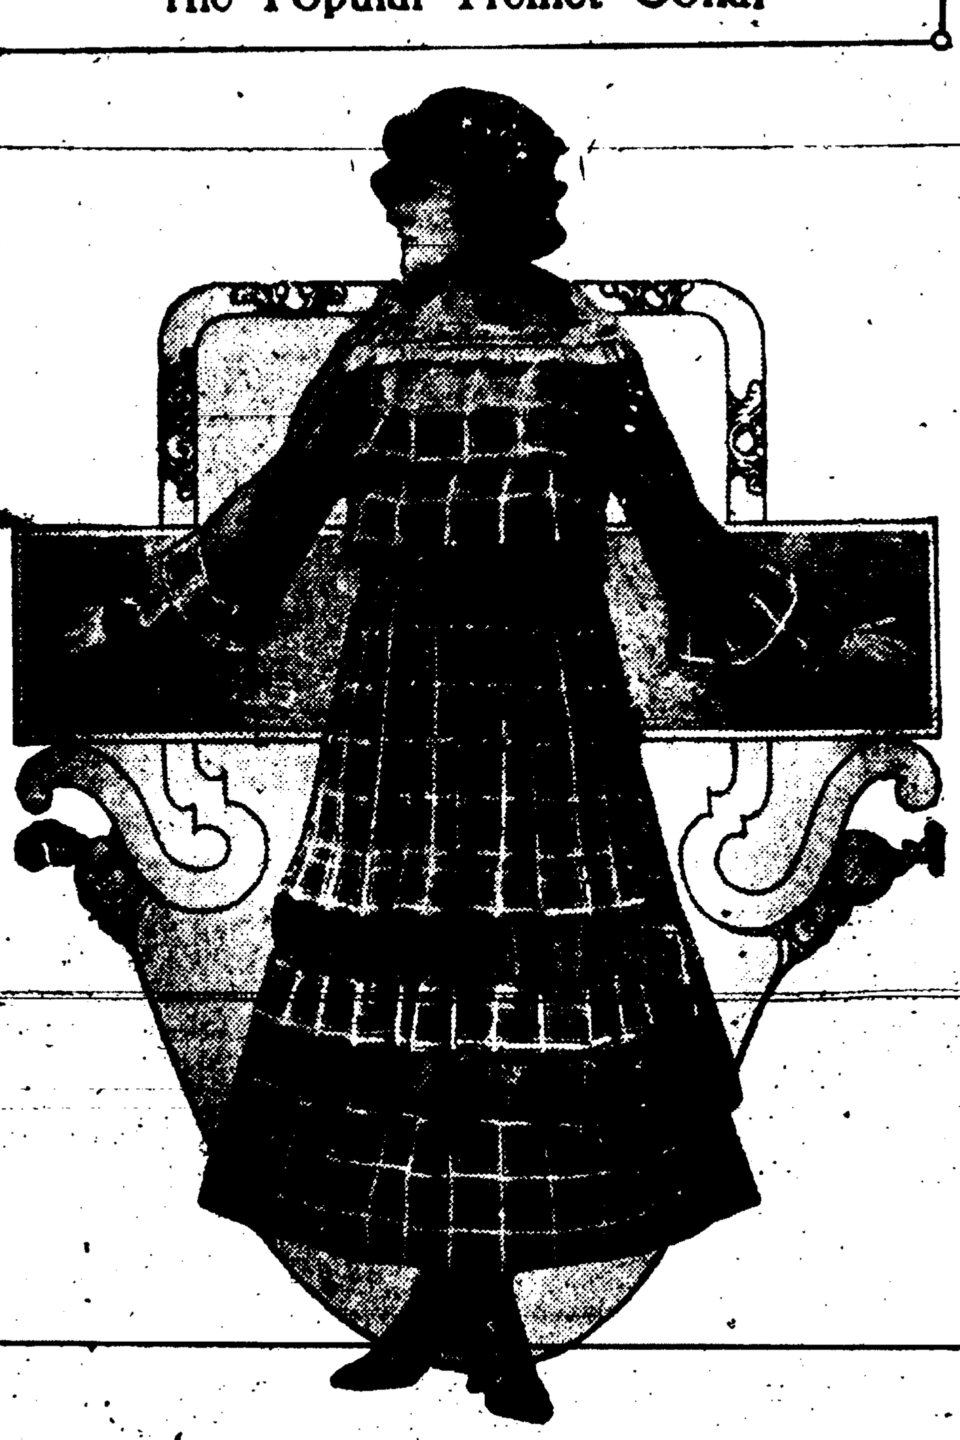
Maple Ice Cream.

Boil a pint of milk in the double boiler. Mix three beaten egg yolks with a cup of milk, then stir into the hot milk. Melt a cupful and a half of maple sugar, or take the sirup and add to the thickened milk, and take from the fire. Add a pint of rich cream and when, cooled, freeze.

Knickerbocker Salad.

Take head of romaine, cut lengthways in half, lay in regular order on each half one slice of orange, one slice of alligator pear or apple, one thin slice of tender green or red pepper, one slice of grapefruit, and repeat. Pour over French dressing.

The Popular Premet Collar



THIS is the kind of frock so suitable for summer afternoons. The material is navy and white plaided voile set off with ruffling of navy taffeta ribbon. The sleeves are of blue georgette crape, and deep tucks are the motif of both bodice and skirt. A wide collar of embroidered organdie is appearing on many thin frocks.

• • •

Much metal is used on the new frocks. There are sometimes trimmings of little metal chains at belt and cuffs of coats. Then there are metallic fringes on evening frocks. There are metal spangles and sequins, too, on evening frocks. There are tassels of metallic thread, and there are gold and silver cloths and laces too.

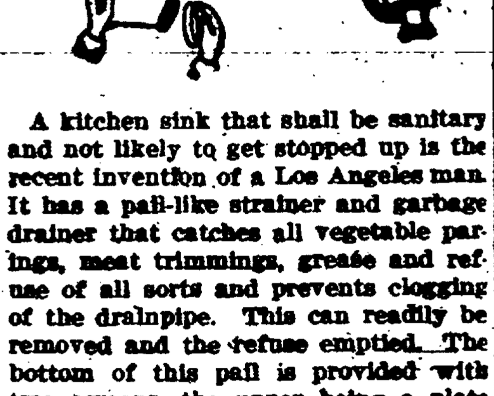
• • •

Leather is one of the season's trimmings. It is used for belts and collars and cuffs on suits. Separate collar and cuff sets of it are sold. These are sometimes in shiny finish, but some of the prettiest are in dull suede in old blue, tan, gray and other soft shades.

ANNA MAY.

HELPFUL HINTS FOR HOUSEWIVES

Sink Strainer That Prevents Clogging of Pipe.



A kitchen sink that shall be sanitary and not likely to get stopped up is the recent invention of a Los Angeles man. It has a pail-like strainer and garbage drainer that catches all vegetable parings, meat trimmings, grease and refuse of all sorts and prevents clogging of the drainpipe. This can readily be removed and the refuse emptied. The bottom of this pail is provided with two screens, the upper being a plate with holes punched through it and the bottom a finer screen attached to a panlike holder that can be engaged over the outwardly turned bottom rim of the pail-like first strainer.

Cheap Ice Cream.

Two quarts of whole milk, a tablespoonful of gelatin, a cupful of sugar, a quart of cream twelve hours old, an eighth teaspoonful of salt, a teaspoonful of vanilla. Soak the granulated gelatin in part of the whole milk, heat slowly the rest of the milk with the sugar to 140 degrees F., pour over the gelatin and stir well. Strain, and when cool add cream and flavoring and salt. Freeze as usual. Take dasher out and ripen for an hour.

Scalloped Cabbage.

Cut a small cabbage in quarters, boil with small piece of pork or spoonful of bacon grease until tender. Drain and let cool. Cut up, not too fine, season with salt, pepper, tablespoonful melted butter or bacon grease, one or two well beaten eggs and cupful of milk. Mix well together and put in baking dish. Cover with cracker crumbs, dot with bits of butter, cover and bake three-quarters of an hour. Uncover and brown.

Spice Cake.

One and a half cupfuls of sugar, two-thirds of a cupful of butter, three eggs, a cupful of buttermilk, a teaspoonful of baking powder a teaspoonful of soda, four teaspoonfuls of cinnamon, a small teaspoonful of cloves, a small teaspoonful of nutmeg, a square of melted chocolate, two and a half cupfuls of flour and the whites of the eggs beaten stiffly. Bake in layers and put together with whipped cream.

Baked Ham.

Place slices of smoked ham cut one-third of an inch thick in a baking dish and cover with about two cupfuls of milk, bake slowly, turning once or twice, until ham is tender and has absorbed almost all the milk and is brown on top. Serve hot with baked or mashed potatoes, spinach or string beans. Milk with a little flour added stirred into what is left in pan makes a delicious gravy.

Spanish Rice.

Boil one cupful rice in two quarts of boiling water to which has been added one tablespoonful salt. Fry large onion and two canned pimentoes, cut in small pieces in about two tablespoonfuls butter until onion is delicately browned. Add large cupful of tomatoes. Simmer few minutes and add to rice. Cook one-half hour or until rice is very tender.

Rice Chocolate Pudding.

Turn one cupful of well washed rice into a buttered dish with three cupfuls of cold milk. Mix together one cupful of sugar and two tablespoonfuls of grated chocolate. Mix this with the rice and milk, scatter over the top butter amounting to one tablespoonful and bake in a slow oven until nearly all the milk has been absorbed.

Potato Puff.

Pare and boil six or eight potatoes until tender; mash and season with two tablespoonfuls of butter, salt and pepper to taste. Add one cupful of milk or cream and beat until white and fluffy. Whip two eggs until very light. Add the potatoes and mix thoroughly. Put in a baking dish and brown. Serve immediately.

Baked Chicken and Lima Beans.

Prepare chicken for baking; season with salt and pepper. Place inside two medium sized onions, put in roaster and pour around it a pint of dried lima beans soaked overnight, onion, tablespoonful of butter, a few small potatoes and a pint of hot water. Before removing from oven add a pint of milk.

Curling Rugs.

Rugs which curl up are a nuisance, but this can be easily remedied. Turn upside down and glue along the edge at the wrong side, being careful to have the glue thickest at the corners. Let harden and place rugs on the floor, and you will find they will lie perfectly flat.

Cleaning Aluminum.

A few stalks of rhubarb boiled in aluminum ware will clean and brighten it. It does not injure it as so many of the soap powders and scouring agencies will.

Pretty Careful.

"Bill is one of those careful, saving fellows, isn't he?"

"Yes; he puts the cork in the ink bottle between pen dips."—Yale Record.

Knew the Outcome.

Sympathetic Father—Parted from Harry forever, have you? Well, perhaps it's just as well not to see each other for a day or two.—Life.

FOR THE CHILDREN

A Sleepy-Time Story About an Interesting Little Animal.

GAY FELLOW OF THE WOODS.

Amusing Ways of the Raccoon—Very Dainty In His Feeding—Catches Fish Like His Big Brother, the Bear. Things For Young Folks to Know—A Prize Baby.

This evening, said Uncle Ben to Polly Ann and little Ned, I am going to tell you about

MOOWEESUK, THE COON.

Mooweesuk, the little coon, builds his house in the very quietest spot in the wood, far from inquisitive neighbors. When twilight shadows gather and the big, round, yellow moon creeps over the mountain little Mooweesuk comes out of his house to look about and feed on frogs and fishes.

The coon is a joyous little animal and is very particular to wash, when possible, all food before eating it. Coons are fond of many things, roots, clams, fish, the eggs of birds and sweet corn being much appreciated by these little wood folk.

When they go out for a walk the mother always leads the way, and the children follow, bear fashion, in single file behind her.

The coon can also walk on its hind feet, sitting up like bruin.

Mooweesuk relishes most things found in the woods and when hungry will eat ants, worms and beetles, found by grubbing in hollow logs. Coons are very fond of sweet sap, turtles and watercress and wintergreen berries. In order to get the turtle meat they drop a stone upon its shell and crack it. The little chaps also relish chicken and pumpkin seeds.

The coon has a very clever way of catching his fish. Like the bear, he knows how to flip it out of the water with his paw. But in addition to this he has learned how to attract the fish to the surface by dipping his whiskers into the water and moving them slightly. Mr. Finny is a bit curious, comes too close to the surface and is flipped out of the water by Mooweesuk's paw.

The coon makes a most entertaining pet, as he is full of mischief and a droll little creature and has a childish pleasure in new playthings.

Presence of Mind.

A boy in northern Alabama recently, while coming from the postoffice along a country road, saw on the other side of a narrow valley and a large stream over which there was no bridge the cabin of a neighbor beginning to catch fire at one end. The lad yelled an alarm, but the inmates, who he rightly believed were at supper and whom he could glimpse through an open door, failed to hear him. He was carrying some rolled papers that had come in the mail. Having seen or heard of a megaphone he quickly tore off wrappers, rolled the broad sheets into a cone and began to roar through the little end: "Maynard, Maynard! Fire! Fire! Fire!" This the people heard, or enough of the strange noise to excite their curiosity, and they came out to discover the flames and quickly put them out. The boy may have been given credit for quick thinking; he certainly deserved it.

A Pretty Baby Boy.

Recently there was held in New York city a "baby week," which ended in a parade, in which several hundred little

Photo by American Press Association.

MRS. HEARST AND BABY JOHN RYAN.

people took part. John Ryan, eight months old, who was adjudged the most perfect baby, won the first prize, a gold cup. The lady who is holding John in her arms is Mrs. William Randolph Hearst, who gave the cup to John. Ten other babies received gold medals. The first thing Baby John did when Mrs. Hearst gave him the cup was to try to put it in his mouth. He failed because his mouth was too small. The hundreds of other babies present looked on, but without the slightest evidence of envy.

The Tea Party.

There are two of us and our guests are three,
And that makes five to have some tea.
The fluffy chick and the Teddy bear
Are waiting patiently for their share,
But neither of them can have any at all
Until after Goldie, our loveliest doll.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

Smock of White Cotton Gabardine.

Neatness and chic are combined in this smock of white cotton gabardine trimmed with blue. The front may be either gathered or smocked.

The sensible and up-to-date young woman likes the washable smock, because it is always fresh and dainty. When properly trimmed, not elaborately, the model is appropriate for morning wear with skirts of contrasting material.

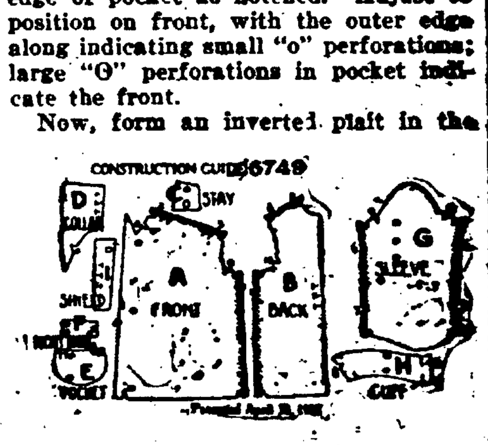
To make the smock shown here requires 3 yards 40-inch gabardine and 1 yard 27-inch material for trimming. It may be closed at the front or slipped on over the head and laced. Smocking trims either side of the front.

The home dressmaker, attempting to make this smock, must first gather the shoulder edge of front between double "TT" perforations, and along crosslines of small "o" perforations; adjust stay to position underneath gathers (small "o" perforation indicates upper front edge of stay) and draw gathers to fit stay. Turn hem at front edge of front at notch; center-front indicated by large "O" perforations. Close under-arm and shoulder seams as notched. Turn hem at lower edge on small "o" perforations. Tack a strap of material to position at under-arm seam between the small "o" perforations in back to pass a straight 2¾-inch belt through.

Sew the collar to the edge of the neck, notches and center-backs even.

Next, gather the upper edge of the pocket between double "TT" perforations; sew pocket band to gathered edge of pocket as notched. Adjust to position on front, with the outer edge along indicating small "o" perforations; large "O" perforations in pocket indicate the front.

Now, form an inverted plait in the



sleeve, bringing the "T" perforations each side of the single small "o" perforation, over to the small "o" perforation and tack. Close seam as notched. Turn under edge of cuff on slot perforations, lap to small "o" perforations; stitch ⅜ inch from folded edge. Sew to sleeve, bringing small "o" perforation in cuff to seam of sleeve, and bring large "O" perforation in cuff to corresponding perforation in sleeve. Sew in armhole, notches and small "o" perforations even, easing fulness.

If desired, herring-bone stitch may be applied over the gathers on front. This is sometimes used instead of smocking.

Pictorial Review Middy, No. 6749. Sizes, 34 to 42 inches bust and 14 to 20 years. Price, 15 cents. Skirt No. 6768. Sizes, 22 to 32 inches waist and 14 to 20 years. Price, 15 cents.

WANTS GIRL FOR GODMOTHER.

Belgian Soldier Writes Burgomaster Mitchel, Asking For One.

Mayor Mitchel of New York has received the following communication from a Belgian soldier interned in Holland:

To the Burgomaster of the City of New York:

Sir—I, the undersigned, C. Lorrimier, quartermaster, have the honor of writing you this letter to beg you to be so kind as to give me the following information:

Is there not among the pretty girls of your city one who would be a godmother to a Belgian soldier and correspond with him? If so, I should be happy to be that soldier. Hoping that my request will meet with a favorable answer, I beg you, sir, to accept my respectful civilities.

C. LORRIMIER,
Quartermaster Fourth Belgian Lancers, Car 25, Camp I, Zeist, Holland.

Burgomaster Mitchel thought that the best way to obtain the information desired by Quartermaster Lorrimier was to make his letter public. Some one in the mayor's office familiar with these matters appended to the letter the following inducement:

"This request for a 'marraine' is quite in keeping with what has been done during the winter all through France. Letters received in New York from young women in France show that there is a fairly widespread custom of the adoption of soldiers left without friends or family ('un poilu,' as they call them), and in some cases one girl is godmother to several 'poilus' and corresponds with them."

PROMPTNESS.

Avoid indecision. Promptness is a great leader, while procrastination limps behind. Today is master of the situation. To-morrow is an impostor who is almost sure to bring failure with him.—James T. Fields.

The KITCHEN CUPBOARD

PROTEIN FOOD VALUES.

PLEASE remember that increasing muscular activity does not mean that more protein is required, but more of the energy producing foods, as the regular amount of protein will take care of the growth of the muscle. Late experiments have shown that some proteins will support growth, others simply maintain life and still others will neither permit of growth nor maintain the bodily weight; hence the necessity of using a variety of protein foods.

If more protein food is eaten than is required there is an increased protein elimination without any beneficial and possibly with harmful effects.

Protein is found in animal foods and their products, in cereals, nuts, peas, beans and lentils and to a slight extent in other vegetables. By animal foods are meant beef, veal, mutton, pork, lamb, poultry and fish. By animal products are meant milk, cheese and eggs.

Here are the portions of some common foods which contain the same amount of protein as one pint of milk:

Walnuts 21	Lentils ......1-[illegible] cups
Potatoes..5 medium	Beans ......[illegible] cups
Apples 32 or ¼ bush.	Rice ......[illegible] cups
Beef (round) 1-5 lb.	Peanuts ......[illegible] cups
Eggs 3	Almonds ......[illegible] nuts
Cheese 2 sq're inch.	Bread ......[illegible] slices
Rolled oats 1¼ cups	

APPROXIMATE WEIGHT IN OUNCES OF PORTION CONTAINING ONE OUNCE OF PROTEIN.

Beef, salted...... 2.6	Beans, baked ...14.[illegible]
Eggs in shell.... 3.4	Rolled oats, dry. 6.
Codfish, salt and boneless 2.6	Bread, white ....10.
Cheese, Ame'can 2.6	Macaroni 7.6
Cheese, cottage 4.8	Wheat flour..pat. 8.[illegible]
Milk, whole......30.	Walnuts, shelled 5.2
Milk, skimmed...29.6	Peanuts, shelled 4.
Beans, dried..... 4.	Peanut butter... 3.2
	Lean meat, cook. 4.[illegible]

INDEPENDENT IN POLITICS

G. WILLIAM BRAUN, EDITOR
B. S. BRAUN, ASSISTANT EDITOR

WEDNESDAY, MAY 31, 1916

AN APPRECIATION

By B. S. Braun

With to-day's issue of the Evening Times are concluded the services of the "Ad Man" and "Assistant Editor" of this publication of the past year and a half, and hereby is voiced to the city's business heads a message of appreciation.

Some one has said that to know one's fellowmen is a blessing. To meet one's acquaintances but frequently, and then in an atmosphere of soft music and Sunday clothes, is not conducive to actually knowing these associates. But mid the strife of constant warfare in business, daily coming in contact with the heads that make the wheels of business spin 'round, through sunshine and storm, finding them knee-deep in the individual perplexities that try men's souls, is to come to know them.

To live in one's own house by the side of the road and view the world over the threshold is not propitious for cultivation of one's deeper sympathies. To go down the little road, and daily pass over the many thresholds is to become in interest a part of the whole. All the little joys and sorrows, all the doubts and fears and hopes become a passing panorama, fascinating compelling, interesting—and helpful.

In justice by one who has profited by this experience let it be said in the utmost sincerity that to know Fulton's business men and women is to admire and respect them. To day by day meet the glad good morning, to day by day hear the word of cheer, and to meet the stand-pat comaradierie that comes of weathering storms together, to laugh and work and talk and plan for blue skies and fair weather has been the part of Fulton's business men and women. Like links in a chain, each link tried and true, they stand, each in his separate place, the whole binding 'round an experience wholesome big and fine.

As a final word of appreciation and wish may they "always hear the thrushes singing in the lilacs round the lawn.

THE EXIT AND THE GREETING

(*By "the Inside Man"*)

When riding along a country road, the reader has noticed a distant hill, how it appears like a wall, the top in the clouds. "What an awfully steep hill," he says, wondering how it will ever be possible to reach the summit. And then he wonders if he will not topple over backwards. But he approaches the hill and when he arrives at its base is surprised to find that it stretches out, a gradual incline, which he climbs almost imperceptibly. So it is on the roadway of life, which includes, of course, the business world. One sees before him difficulties which seem as mountain peaks, as impossible of attainment; he may be faint-hearted and undertake to turn back or rest where he is. He may, indeed, try to find some way to avoid the difficulty, but at no place can he discover a byway or cross road. The path leads straight ahead. But if he marches boldly up to the seeming mountain, he finds that it is easily overcome, a gentle slope leading to its top and over the crest to the level road of achievement.

That is how it seemed to the retiring editor of this newspaper eighteen months ago when the people of Fulton were first presented with the product of a home enterprise. "An awfully steep hill" presented itself at that time and many were the fears expressed by good friends that the aspirant for the summit might topple over backwards. But as the days, weeks and months passed by the incline became less acute. Byways and cross roads loomed up in this case, but not once did they lure from the straight and difficult path up and over to the level road of achievement.

The task undertaken eighteen months ago has been achieved, for The Fulton Evening Times is to go on, to continue its mission in seeking to better conditions here in Fulton. The flag still waves and the retiring editor is recompensed in the knowledge that it is so ordained.

Gratitude is described as the fairest bloom which springs from the soul. This we feel toward the advertisers of the city who recognized in the paper a good medium, and toward the people in general—our subscribers—who have given us every reason to believe in their desire to have a daily paper in Fulton. And last, but not least, by any means, are the employes of the plant who have given the best of their ability and loyal support. To each and all we say, God bless you.

We feel that we can bespeak for our successor the same spirit of loyalty that has been manifest in our behalf; in fact it is our fervent hope that the people of the city may go further than that, by helping Mr. Dwight J. Robbins to achieve a full measure of the success which he truly deserves.

Exit the old, enter the new editor.

Opinions

THE BRANDEIS VOTE.

It will be interesting to take account of the vote next Thursday upon the confirmation of Louis D. Brandeis as associate justice of the United States Supreme Court. The confirmation is now conceded by the opposition. The judiciary committee recommended the confirmation by a strict party vote, and the Senate, no doubt, will follow somewhat along the same lines. But it is said that more Republicans will favor Brandeis than will Democrats vote against him.

During the past three years it has been most characteristic of the Republican opposition to raise a great deal of noise against Democratic measures, but when the vote came it has frequently happened that a majority of the Republicans, as well as most of the Democrats, voted for the bills. These votes have been upon bills which were of great importance to plain people. The vote which is to come is upon a matter which also is of particular moment to the average person. In the present instance a man is concerned, rather than things, except for what he represents, so that it is not to be expected that the Republican vote will be as great as it might be if the vote could be cast for the things for which Brandeis stands. Nevertheless, a number of Republicans will not support the trivial charges against the candidate, and they will not be found on the side of crusted conservatism.—Utica Observer.

A Word to Dyspeptics

Mr. Dyspeptic, if you knew how quickly and surely Chamberlain's Tablets would give you relief, you would certainly give them a trial. Read what Edward Gaffey, Newport, N. Y., says about them. "I am pleased to say a word in praise of Chamberlain's Tablets for the stomach and liver. I have been troubled with indigestion and constipation for the past three years, and this is the only medicine that relieves these attacks." For sale by all dealers.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

The Chamber of Commerce announces that a committee of citizens will be appointed to solicit funds for the Charity Department of the City of FULTON. Last Saturday the city had to take care of a case of charity and could only do this by asking a grocer to please wait for his money till October, when excise money will be available. This is a very serious case and we hope that the people of FULTON will donate their little share for the Charity Department so that the POOR, SICK and UNFORTUNATE ONES can be properly taken care of. Now then let's see what FULTON citizens can do in a case of this kind.

* * *

The Happy Hour theatre is going to give a benefit performance for the Charity Department of the city of FULTON; this movement has been endorsed by the Chamber of Commerce and it is to be hoped that the good spirit shown by the owner of that theatre, will be appreciated by FULTONIANS. We therefore hope to see the HAPPY HOUR FILLED TO THE DOORS. It is for a GOOD cause.

* * *

Come all ye good hearted citizens of FULTON, give liberally to the POOR FUND of YOUR city.

* * *

Who is going to be the first one to send a donation to the Chamber of Commerce?

* * *

CAESAR BUILT GOOD ROADS.

When Caesar took a westward ride
And grabbed the Gauls for Rome,
What was the first thing that he did
To make them feel at home?
Did he increase the people's loads,
And liberty forbid?
No, he dug in and built good roads—
That's what old Caesar did.

Did Caesar put the iron heel
Upon the foeman's breast,
Or did he trye to make them glad
That Roman rule was best?
He came their lands amid,
He built good roads in place of bad—
That's what old Caesar did.
He built good roads from hill to hill,
Good roads from vale to vale;
He ran a good roads movement
Till Rome got all the kale;
He told the folks to buy at home,
Built roads their ruts to rid,
Until all roads led up to Rome—
That's what old Caesar did.

If any town would make itself
The center of the map,
Where folks will come and settle down
And live in plenty's lap;
If any town its own abodes
Of poverty would rid,
Let it go out and build good roads—
Just like old Caesar did.

* * *

We have work for a few men; who wants the job?

* * *

A substantial amount is needed for the Department of Charities of the City of FULTON. Get busy and show that REAL CHRISTIAN SPIRIT and donate liberally. We will acknowledge all money in the Daily Paper.

* * *

Who is going to assist us in getting this fund raised?

THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 448. THURSDAY, JUNE 1, 1916 Price, One Cent

PRIZE SPEAKING CONTEST NOTABLE EVENT

Pensions Built From Many Sources

Mayor Lewis to-day received copies of three bills recently passed by the Legislature affecting the city of Fulton. One of the bills, Chapter 457, introduced by Assemblyman MacHold, authorizes the city to issue bonds to the extent of $15,000 with which to pay expenses incurred by past administrations and replenish department funds which have now been depleted.

The Fire Department pension bill, No. 456, and the Police Department Pension bill, No. 455, introduced by Senator Elon R. Brown, are the other bills in question.

Both pension bills contain practically the same provisions, and the allowances under both bills are identical. The Fire Department bill, specifies the city officials who shall act as the Pension Board, and the Mayor is appointed as chairman. In addition to the levy of one dollar a month from the salary of every department employe who benefits by the bill, the fund shall consist of all fines imposed upon members of the department, all rewards, the money from the sale of department condemned apparatus, the money collected in licensing the sale of fireworks, gasoline, naptha and all other combustibles and explosives and the penalties fines collected by the city from offenders under the law governing the sale and storage of these materials.

In the event that a fireman is killed in the performance of his duty, his widow is to receive $300 a year as a pension.

This pension will cease upon her re-marriage, and the pension to the children of a fireman, in the event that he has no wife living, will cease when they become sixteen years of age. If the fireman has no wife or children, but has parents dependant upon him for support, the pension of $300 is to be paid to the parents, provided the pension board shall decide that his parents were in fact dependant upon his earnings for their livelihood.

The disability pensions are divided into two classes, permanent and temporary. In the event of permanent disability incurred in the performance of duty, the fireman is to receive a pension of $600 a year. For partial disability he will receive 25 per cent. of his salar y, as long as the board shall determine that the disability exists.

For disability incurred outside of regular duty, and this includes a disease or injury sustained while not on duty, the fireman will receive a pension of $24 for each year of service in the department, the total not to exceed $600 a year. In the event that death occurs indirectly from any injuries so received, the widow will receive the $300 pension, with the same conditions that apply in the case of death in the performance of duty.

Any man who has served 20 years in the department, provided he has reached the age of 60, is entitled to retirement, with a pension for life of $50 per month.

All of the provisions of the pension fund apply to regular paid firemen only, and not to extra firemen or to members of call men. The police pension fund provisions are the same.

The pensions are to be paid in monthly installments, and the bill will go into effect January 1, 1917.

CLEVELAND TO HAVE EXPENSIVES WEDDINGS

(By United Press)

Cleveland—Two hundred and fifty thousand dollars will be spent on 1,000 June weddings in Cleveland, according to Frank Zizelman, marriage license clerk.

Last year there were 933 June weddings here, but with an increase in the last twelve months of one thousand in the total number of marriages, Zizelman figures there will be at least 1,000 during the bridal month.

"The average wedding here costs $250," said Zizelman. "Some folks spend thousands on the ceremony, while there are others who just buy a license and give the minister a fee. But they'll average $250 each, counting florists', tailors', jewelers' and dressmakers' bills."

MOVE TO CONDEMN OIL LAND FOR NATION

Washington—A resolution directing the Secretary of Interior to report on the advisability of Government acquisition of all oil properties in the country by condemnation or purchase and another resolution to have the Bureau of Mines collect statistics relating to production, manufacture and marketing of petroleum and its products, were approved to-day by a House sub-committee.

The resolution of Representative Randall, of California, also asks for an estimate of navy fuel needs for ten years and the effect upon the navy if oil lands are permitted to remain in private ownership.

CONTEST DEVELOPED HISTRIONIC ABILITY OF EACH PARTICIPANT

The 27th annual prize speaking contest of the Fulton High School was held last night before an audience that filled almost every seat in the Quirk theatre. Seven pupils of the graduating class competed for the prizes and the excellent training they have received at the hands of Mrs. Laura White Keeler, teacher of elocution, was manifest in the work of every contestant. Unfortunately, only two prizes for the young ladies and two for the young men were to be awarded, and it required capable and discerning judges indeed to select the winners, in view of the remarkable ability displayed by all.

First Prize to Miss Carroll

Miss Mary Carroll, however, was unanimously selected in the first vote of the judges as the winner of the first prize for the young ladies, and the outburst of applause which followed the announcement was sufficient proof that the judges' decision agreed with the opinions of the audience. Miss Carroll's oration was remarkable in many ways, not only for her clarity of enunciation and her splendid rendition of dramatic passages, but in stage presence and personality she was easily the star of the evening.

"The Fall of Rienza" by Sir Edward Bulwer-Lytton, was Miss Carroll's selecction and the last days of the famous Roman tribune, whose personal ambition brought about his downfall, composed the theme of the work. Rienza had incurred the enmity and hatred of others high in Roman politics and an uprising against him had been incited by his enemies. The story describes his fortitude and courage in his last moments, his efforts to save his wife, who finally perishes in the burning palace, and his defiance of the mob which stormed his home. Perceiving finally that no mercy would be shown him, Rienza attempts to escape, and had almost reached a point of safety when he was recognized by one of his traitorous followers. The denunciation was most vividly portrayed by Miss Carroll, and throughout the entire mob scene her dramatic ability was evident. Miss Carroll's interpretation of the passages which describe the murder of Rienza and the death of his wife was truly remarkable, and in the opinion of many who have attended Prize Speaking competitions for several years, her work should be considered easily equal to, if not surpassing that of any other young woman who has represented the graduating class upon the platform.

Miss Clara Sylvester, who was to give "The Mallet's Masterpiece" was indisposed and unable to appear. It was hoped earlier in the day that she would recover sufficiently to speak, but Mr. J. R. Fairgrieves announced from the stage last night that her number would be omitted.

Miss Merle Bartlett and Miss Lena Kaplan were the other contestants in the young ladies' division, and second prize was awarded to Miss Bartlett. She gave "The Rivals" which described a situation which arose after the battle of Sedgemoor, during the Srmowell rebellion in England. Two rebels, both of whom were to be executed at day-break discover during the night that both love the same girl.

One of the men is the successful suitor, and the other and older man has been rejected by the girl. The young man is rated as the fastest runner in all England, while the older is considered the greatest rider in the country-side. As they are led out to be executed in the morning, one of the officers recognizes them and suggests to his chief that a race be held between the men, the winner to be given his freedom. The suggestion is accepted, and although the older man, riding a fast horse has an opportunity to win, he remembers the love of the girl for his rival and generously sacrifices his life by allowing the younger man to win the race and his freedom.

Miss Kaplan's selection described the wild ride of Madame Rolande to save her husband from the guillotine during the Reign of Terror in France. Robespierre tricks the woman into revealing information concerning his enemies with the promise of a pardon for

(Continued on Page Eight)

Chocolate Works Employes Strike

After the officials of the company had refused to even consider several demands submitted by a committee, 50 employes of the Peters Chocolate Works went on strike at noon yesterday. When the night shift of workers went to the plant last night they were met by pickets who explained the situation to them and the majority of the night force also walked out.

At eight o'clock this morning, 50 girls who work on the day shift put on their hats and coats and left the factory. According to the leaders among the strikers there are 200 employes now on strike, and a conference held this morning between I. Achilli and A. I. Morton of the company and a committee of three strikers resulted in nothing remotely resembling a compromise.

When interviewed this morning, Mr. Morton admitted that the operation of the plant was seriously affected by the strike and although still operating the working force was inadequate and would be increased as quickly as possible by the addition of several men from this city and elsewhere, who were arriving to-day. He said no compromise had been submitted nor even considered by the company, and added that the demands of the strikers were beyond the power of the company to grant.

In a set of resolutions which were drawn up by some of the leaders among the strikers, the strikers have set forth their grievances against the company. The resolutions are as follows:

"Reasons why we should have more wages.

1. It is impossible to get the necessaries of life unless we have the money to get them.
2. It will be found, on investigation, that nearly every man who is taken sick is not able to take care of himself. Collections have been made among the workers, but after that he must get along as he can.
3. One man who had worked as high as 100 hours a week had not enough money to bury his wife when she died, and a collection among the employes here was necessary.
4. Another has not been able to pay for his winter's coal yet, and most of our men have to send their wives out to work, keep boarders, or take in washings.
5. Our condition has grown worse every year. Eight years ago we had a fine dining hall. We also had a full hour for dinner. Now the hall is overcrowded and half the dining room has been taken away. Our closets are unsanitary. We are producing from 400 to 600 per cent. more chocolate.
6. All we ask is a 20 per cent. increase in wages.

(Signed) THE COMMITTEE.

Representatives of the strikers say that few men are able to make more than $15 a week at the plant and that the girls' pay is sometimes as low as $4 a week. The men get 17 and 18 cents an hour, while the girls get from 7 to 10 cents an hour.

When three men representing the strikers waited upon the officials of the company yesterday morning to submit their grievances, they were called into the manager's office one by one and discharged, the strikers say. The men will insist that their demands be granted and that a 20 per cent. increase be made in their wages, and state that no middle course will be accepted. Several of them have already taken positions elsewhere and the leaders argue that the company will have a hard time finding men to work at the prevailing rates, when better wages and shorter hours are offered in other factories.

WORKINGMEN'S HOUSE COMPETITION CLOSES

(By United Press)

New York—The Immigrant Housing Competition organized last month at the residence of Mrs. Vincent Astor, to inaugurate a propaganda for better homes for immigrant workingmen closed to-day.

Prizes will be given for the best plans. The first competition calls for a substitute for the freight cars used to house construction gangs along railways. The prizes include $300 for first, $200 for second and $100 for third.

It is to be succeeded by a series of public exhibits in New York and elsewhere, which will include, not only the results of the competition but any housing plans now in operation.

There will be a second competition for plans for a house for a single family requiring two bedrooms; a house for a family with four lodgers, providing for the separation of the lodgers and the family, and a boarding house for thirty single lodgers, two lodgers in each room.

SPECIAL SERVICES AT PRESBYTERIAN CHURCH

Every member and friend of the Presbyterian church and congregation is invited to the service in the church auditorium to-night at 7:30. The pastor will preach, the chorus choir will sing and the session will meet to receive members.

EUROPE'S STEAL ON FATHER TIME IS OLD TO CLEVELAND

American City Was Practicing This Efficient Increase of Daylight Long Before War Made It Necessary in Europe.

Some of the Advantages That Ohio City Have Found In System—Detroit Has Also Adopted It and Chicago May.

AMERICA first!

First in the matter of practical invention, anyhow! For that much mooted plan of the Europeans to prolong daylight by putting the clock ahead has been practiced quietly but successfully in Cleveland, O., for the past two years.

So notable have been the advantages gained by this "made in America" device that Detroit, Cleveland's sister city, has adopted it; a number of Canadian cities have come into the ring and even Chicago is thinking seriously of the project.

It all began with this stern and unimpassioned ordinance:

Be it ordained by the council of the city of Cleveland, state of Ohio:

Section 1.—That the standard of time throughout the city of Cleveland shall be that of the seventy-fifth meridian of longitude west from Greenwich, known as "eastern standard time." Municipal offices and legal or official proceedings of the city of Cleveland shall be regulated thereby, and when by ordinance, resolution or action of any municipal officer or body an act must be performed at or within a prescribed time it shall be so performed according to such standard of time.

Sec. 2.—When a clock or other timepiece is in or upon a public building maintained at the expense of the city of Cleveland, the board, commission, officer or other person having control and charge of such building shall have such clock or other timepiece set and run according to the standard of time as provided in section 1 hereof.

Sec. 3.—This ordinance shall take effect from and after the thirtieth day of April, 1914.

And so at 12 o'clock, midnight, preceding May 1, 1914, some 670,000 Clevelanders turned the hands of their clocks one hour ahead and have never since wanted to turn them back.

Since the adoption of Eastern standard time 2,000 more Clevelanders have been daily playing baseball in the Cleveland parks during the summer season, and an additional 1,000 others have been playing tennis for that hour of daylight which they have secured for themselves by one hour of earlier rising.

But not only have the beneficent effects of securing an extra hour of daylight been conferred upon the men, women and children of Cleveland, but this city has "let her light so shine" that her sister city of Detroit has adopted the same system with the same beneficial results.

For Eastern Time.

The adoption of Eastern standard time by the city of Cleveland was the result of considerable careful and painstaking study on the part of a special committee of the Cleveland chamber of commerce. It was on Oct. 1, 1913, that the Cleveland chamber authorized its president "to appoint a committee to study and report to the board on the advantages to be derived from the establishment of Eastern time in Cleveland, and its disadvantages if there be any." The project, as considered by the committee, was primarily that of securing more daylight for the community during the active hours of the day by advancing the hands of the clock one hour.

The committee at the beginning of its deliberation considered the change to eastern time both with regard to its adoption by the state through legislative action and by Cleveland alone. The arguments for both are practically identical. It was assumed "that the railroads would not be compelled to comply with the action that might be taken in the consummation of either plan of adoption."

Here are a few facts with regard to the hours of daylight in this latitude: Light before the sunrise and after sunset varies from fifteen minutes to one and a half hours, depending upon weather conditions, and the figures to be found on daylight and darkness as presented by the committee were based upon ideal weather conditions. The day of June 22 of each year in Cleveland shows the greatest amount of daylight, or fifteen hours and fourteen minutes. The 22d day of December, on the other hand, experiences only nine hours and eleven minutes of daylight, which is the smallest amount of the year. The earliest rising of the sun is at 3:51 o'clock and the latest rising at 6:54 o'clock; also the earliest setting occurs at 3:55 o'clock and the latest setting at 7:06 o'clock. These figures show that on the day of the most sunlight the sun rises at too early an hour to benefit the majority of our citizens, and on the day of latest sunlight many are deprived of the sunlight after working hours by its early setting. Assuming that the average hours of rising and retiring are 6 and 10 o'clock, respectively, 201 hours, or the equivalent of thirty-three minutes more daylight each day, during the year are secured for added activities by the adoption of eastern time.

In a city like Cleveland the recreation of the majority of its citizens is taken during the afternoons and early evenings. This part of their lives is one of the most important and is essential to the success of their more serious efforts. By the adoption of eastern standard time these citizens were given 234 hours of additional daylight during the year. That time has been devoted to many forms of outdoor recreation. Two hundred and seventy-six days, or over 75 per cent of the year, were afforded daylight after 5:30 o'clock in the evening.

As For Newspapers.

When the Cleveland baseball club is at home reports of the game are ready for the evening newspapers an hour ahead of previous times, thus giving the reader an extra hour of daylight in which to read it, and distributors of papers need not be told what that would mean to circulation. It has been found of mutual advantage both to the evening newspaper reader and to the newspaper maker in Cleveland.

The saving in the cost of artificial illumination has proved of great benefit to the people of Cleveland. The private residence uses artificial illumination only during the hours between rising and retiring. With 201 hours of daylight added during the year between the hours of 6 o'clock a. m. and 10 o'clock p. m. the item of saving in illumination cost is considerable, both in private and public buildings.

Stores Open at Eight.

The majority of Cleveland's stores open at 8 o'clock and close at 5:30 o'clock, and changing to eastern time threw them from an hour to an hour and a half behind the setting of the sun on the day of least daylight. By the adoption of eastern standard time an attendant decrease of 131 hours of darkness in the year was attained.

The movement started by the Cleveland chamber of commerce committee on eastern time, of which Mr. Samuel H. Hall, a Cleveland merchant, has been chairman continuously, at once caught the attention of the Cleveland Federation of Labor, the Cleveland Amateur Football association and the Cleveland Amateur Baseball association, which is one of the largest in the world. These organizations immediately indorsed the project and have been the happy recipients of many of its benefits.

It is true that travelers must change their watches upon arriving in Cleveland. The Erie railroad and the suburban lines entering Cleveland have alone adopted eastern time. This, however, is a very small inconvenience compared with the following benefits:

A benefit to health.

Additional hours of recreation for the toiler.

Better conditions for sleep.

A benefit to the welfare of children.

An advantage to suburban residents and nearby farmers.

More daylight for the return of workers to their homes.

More efficient work in industrial plants.

Closer mail, telegraph, telephone, freight and express connections with the east.

Saving in the cost of artificial illumination.

A general step toward ideal time conditions.

As a result of the interest created by the report of the chamber committee the council of the city of Cleveland on March 9, 1914, passed an ordinance declaring that on and after May 1, 1914, eastern time should be established in Cleveland.

The committee on eastern time is still retained by the Cleveland chamber of commerce not because there is any thought in Cleveland of returning to former conditions, but because other western cities are watching the movement with interest, and the committee, having already conferred these benefits upon Detroit and some Canadian cities, hopes ere long to bring Chicago under its beneficent influence.

WOMAN IS A DOG CATCHER.

Milwaukee Millionaire Asks City to Increase Her Salary.

Miss Lenore Cawker, Milwaukee's millionaire dog catcher, wants a raise in pay. She has been paying the entire cost of the department, including the operation of a dog hospital automobile, besides giving her own stables for a dog pound, all for a salary of $500 a year. She has asked for an appropriation of $1,200 for her services, representing half the expense of her work.

She says she is willing to pay, as evidence of her love for animals. But she thinks the city ought to show that it appreciates her efforts. Her dog pound is in the aristocratic west side district, where her home covers half a city square.

Devise New Army Biscuit.

A new emergency army ration of flour, lean beef and dried milk, to be used where it is impracticable for troops to carry food that has to be cooked, will be tried out soon by the war department. The new ration is in the form of a biscuit, and the materials are bound together with grape sugar. Ten thousand rations have been ordered for experimental purposes.

Days You'll Never Forget

HORSES IN BATTLE.

Methods of the Days When Chariots Were Used In Warfare.

In the old days when the Romans and Greeks fought furious battles the charioteers drove their cars in all directions, hurled their javelins and by the din and clatter of horses and wheels commonly threw the ranks of the enemy into disorder and, making their way among the squadrons of the enemy's cavalry, leaped down from their chariots and fought on foot.

The charioteers then withdrew little by little out of the fight and placed their chariots in such a way that if they were hard pressed they could readily retreat to their own side. Thus in battle they afforded the mobility of cavalry with the steadiness of infantry.

Daily practice enabled them to pull up their horses at full speed when on a steep slope or to run out on the pole and stand on the yoke and to get nimbly back into the chariot.

With the introduction of cavalry in the later iron age came larger horses, but their use for this purpose seems to have been restricted to isolated areas. There is no doubt that the west German tribes as late as the campaign of Caesar in Gaul used only the shaggy pony. It is said in cavalry actions they held it disgraceful and slothful to use any kind of saddle, and instead of charging in squadrons they dismounted and fought on foot.

As far as England is concerned the art of riding seems to have been introduced by the Normans. The Saxons appear to have been but indifferent horsemen.

Dickens' Last Letter.

The last paragraph of the last letter written by Charles Dickens read:

But I hope I may be ready at 3 o'clock. If I can't be—why, then I shan't be. Ever affectionately. C. D.

This was written an hour or so before the fatal seizure. Every word droops below the level from which each starts, each line of writing descends across the page, the simple C. D. is very shaky, and the whole letter is broken and weak. Charles Dickens was not "ready" at "3 o'clock." He died at ten minutes past 6 p. m.

A Woman's Solace.

"Silas, I often think of the time when you came courting—it's a woman's solace. And when I entered the room you hastened to assist me to a chair—near your own. And now I select my own chair."

"Yes, Samantha, I remember it. I was always afraid you would stumble and fall and have fidgets. But I learned long ago that you are able to take care of yourself."

"And also of you, Silas."—Richmond Times-Dispatch.

The Sultan's Dreaded Shadow.

Ispahan has been for long interesting to Europeans as the home of that romantic person Zill-es-Sultan, the uncle of the last shah. A strong, bullying autocrat, his name became a word of terror, a bogy. When a southern Persian's horse refuses to drink he asks it: "What's the matter? Do you see your shadow (zill) in the water?"

Fitted Her.

"What is a coat of arms, pa?"

"Something that the Venus de Milo didn't have to wear."—Exchange.

HIS TWO BAD DAYS.

Lord Byron Had a Positive Dread of Fridays and Sundays.

The belief in palmists and soothsayers is not, as is sometimes supposed, confined to the ignorant and the credulous. Lord Byron was not a skeptic in these matters. Just before his death, as recorded in "Byron—The Last Phase," by Richard Edgecumbe, "he said he had reflected a great deal on a prediction which had been made to him when a boy by a famed fortune teller in Scotland.

"His mother, who firmly believed in chiromancy and astrology, had sent for this person and desired him to inform him what would be the future destiny of her son. Having examined attentively the palm of his hand, the man looked at him for awhile steadfastly and then with a solemn voice exclaimed, 'Beware of your thirty-seventh year, my young lord, beware!'

"He had entered on his thirty-seventh year on Jan. 22, and it was evident from the emotion with which he related this circumstance that the caution of the palmist had produced a deep impression on his mind, which in many respects was so superstitious that we thought it proper to accuse him of superstition.

"'To say the truth,' answered his lordship, 'I find it equally difficult to know what not to believe. * * * You will, I know, ridicule my belief in lucky and unlucky days, but no consideration can now induce me to undertake anything either on a Friday or a Sunday. I am positive it would terminate unfortunately. Every one of my misfortunes—God knows I have had my share—has happened to be on one of those days.'"

Efficiency of the Human Face.

No stone crusher ever devised possesses relatively one tithe the force of the human jaws. No nicely adjusted mechanical contrivance ever approached the precision and delicacy of the human eye, writes Dr. William P. Cunningham of New York in the Medical Record.

Safety First and Last.

Mrs. Catterson—I am actually afraid to get my bank book balanced for fear I have made a mistake. Mrs. Hatterson—Why don't you do as I do? I keep on drawing the money out until they won't let me have any more.—Life.

Still an Amateur.

"Have you ever loved before?"

"Not enough to affect my amateur status, dearest," he replied.—Baltimore American.

Curbing the Kickers.

"These are the smallest sandwiches I ever saw for the money," said the traveler to the waiter in the restaurant.

"Yes," replied the waiter. "There was so much complaint of the quality of them that I thought I would make them smaller so that there would not be so much to grumble about."—London Answers.

SUBMARINE OIL LINES.

How the Wells of Vera Cruz Are Tapped For Tank Steamers.

Many of the most productive oil wells in the state of Vera Cruz, Mexico, are situated near the port of Tuxpam. For some distance from the shore there the water is so shallow that few of the large oil steamers can get into port. The oil companies hit upon the idea of laying submarine pipe lines to points where the largest oil tankers can be conveniently moored for loading in any state of the tide and weather.

There are now five of these great iron pipes in duplicate. They are from six to eight inches in diameter, and four of them are nearly a mile long. They terminate in forty-three feet of water, where it is so deep that the waves have no effect on them. When they were laid divers fastened to the end of each 120 feet of flexible hose. When not in use the free end of the hose is closed and allowed to lie on the bottom of the sea, where its position is marked by a small buoy attached to the hose by a stout chain.

When the tank steamers arrive they moor themselves to the permanent buoys near by, lift the marked buoy with a derrick, raise the flexible hose to the deck of the ship and attach it to the tank openings. By means of a signal code the captains of the ships notify the pumping station on shore, in which are the valves that control the flow of oil through the pipe line. Generally speaking, it takes about twenty-four hours to load one of the large 15,000 ton tankers, which means that the pipes deliver 4,375 barrels of oil an hour.—Youth's Companion.

WHERE MEN WEAR COMBS.

In Ceylon They Mark the Native Male's Social Standing.

Ceylon is perhaps the only country in the world where men wear combs. It is the delight of the native males of the low country to wear their hair twisted into a roll at the back of the head, with a horseshoe shaped tortoise shell comb at the top. The women, curiously enough, do not affect this ornament.

It appears that one of the great ambitions of the Cingalese man of humble position is to possess and wear a huge comb of the finest luster and most perfect manufacture, and many indicate their higher social status by means of an additional comb rising to a considerable height above their glossy coil.

The artist in tortoise shell who makes these combs obtains his raw materials from the hawk bill turtle. The turtle is killed and its carcass immediately immersed in boiling water. The plates when separated from the bony part of the animal are very irregular in form. Being brittle, they require careful manipulation, especially as a high temperature, which would soften them, tends to darken and cloud the shell. They are therefore treated at as low a heat as is possible for the work.

Thickness is obtained by softening several plates and then applying pressure, when a union of the surfaces takes place. Under heat the shell also is molded into various artificial forms.—Exchange.

Waterspouts.

A waterspout is a miniature tornado originating in a strong upward draft of air which occurs above the surface of a body of comparatively warm water. Its effect first becomes visible in a circular motion at the point of the cloud to which it ascends. This becomes a whirl, which condenses the vapor at its center, causing the portion of the cloud there to drop downward in the shape of a gigantic jelly bag. At the same time the continuing upward draft increases the rapidity of its original swirl and the condensed vapor caught within it until the ascending and descending masses join to form the waterspout. Necessarily by this process the air beneath the spout is rarefied, and thus where the phenomenon occurs at sea the water always seems to be sucked up into it, although this is not really the case to any considerable extent.

Secret of Harmony.

Pull together. This is the real secret of harmony. There is a story told of a man who had committed the care of one of his teams to a faithful servant for years. At last one of the horses sickened and died. While the servant was burying the faithful animal the other horse came across the field and stood by, watching the work as a silent mourner.

The master said, "I believe Dick loved Billy."

Instantly the servant replied: "In case he did, massa. Why, they pulled together nigh twenty years."—Christian Herald.

An Old Massachusetts Law.

The general court of Massachusetts Bay Colony, following the example of the English parliament, in 1659 enacted a law that "anybody who is found observing by abstinence from labor, feasting or any other way any such day as Christmas day shall pay for every such offense 5 shillings." This law was repealed in 1681.

Getting Into Society.

"Guess I'll have to rig up a middle name," declared Flubdub. "I never really had one, but I gotta have one now."

"Why so?"

EXPECTATION OF LIFE TABLES TO BE ISSUED

Uncle Sam to Tell How Long You Should Live.

How long will you live? Uncle Sam can tell you—almost—in the first life expectation tables this government has ever prepared and which will be issued soon by the census bureau. The tables are similar to those prepared by life insurance companies, but relate to the whole population in the territory covered, while the company tables relate only to the insured persons. The population embraced by the tables is that of the "registration area"—New England, New York, New Jersey, Michigan and the District of Columbia—a population which is, however, characteristic of an important additional portion of the United States.

One interesting point brought out by the tables is that female whites have consistently a longer expectation of life than male whites at all times from birth to ninety-four years of age. Another matter of interest is that the healthiest year of life for both male and female native whites is the twelfth, when the death rate, which for the first year was more than 12,000 for boys and 10,000 for girls per 100,000, is reduced to 228 and 198, respectively.

At birth, it is shown, the average expectation of life for native white males is approximately fifty- and one-half years and for females fifty-three and one-half years. For those who manage to reach the first milestone, however, the expectation is, respectively, fifty-seven and sixty years.

A striking difference between expectation in city and country is shown. The average white male at birth in rural districts has 7.7 more years to live than if born in a city. The expectation of the average female is increased also, but only six years.

LATEST CHANGES IN FOREIGN TARIFFS.

A report on the latest changes and developments in foreign tariffs has just been issued by the bureau of foreign and domestic commerce, department of commerce. In addition to the usual notices of recent changes, actual and proposed, in import and export duties, customs regulations and internal taxes of foreign countries, this publication contains the more important embargo and contraband provisions, an important summary of the regulations affecting commercial travelers in Central America and articles on a number of other subjects more or less intimately connected with foreign tariffs. There is a timely discussion of the anti-dumping legislation of Australia, Canada and the Union of South Africa and an interesting article on the probable revival of German commercial influence in Russia after the war. The report is designated "Foreign Tariff Notes No. 19" and may be had free of any charge upon application to the bureau of foreign and domestic commerce or to any of its district offices.

"DON'TS" IN CASE OF FIRE.

The federal government at its recent "Safety first" exhibit in Washington had a few fire "don'ts," which if carefully followed would mean the prevention of much loss. They were in part:

Don't allow children to handle matches.

Don't throw lighted matches, cigars or cigarettes where they may set fire to inflammable material.

Don't enter any building without finding out how to get out quickly in case of fire.

Don't fill lighted lamps with kerosene or use this liquid to light fires with. The application of heat to kerosene results in the generation of gases which are highly explosive when confined in small air spaces.

Don't put ashes in wooden boxes or barrels or allow rubbish to collect in cellars, attics, workshops or areaways.

Don't use candles on Christmas trees. Each year the number of deaths is increased at the Christmas season, due to this cause.

Don't permit greasy rags to lie around or store paints, oils and fats in the house. Greasy rags often start fires without the application of flame.

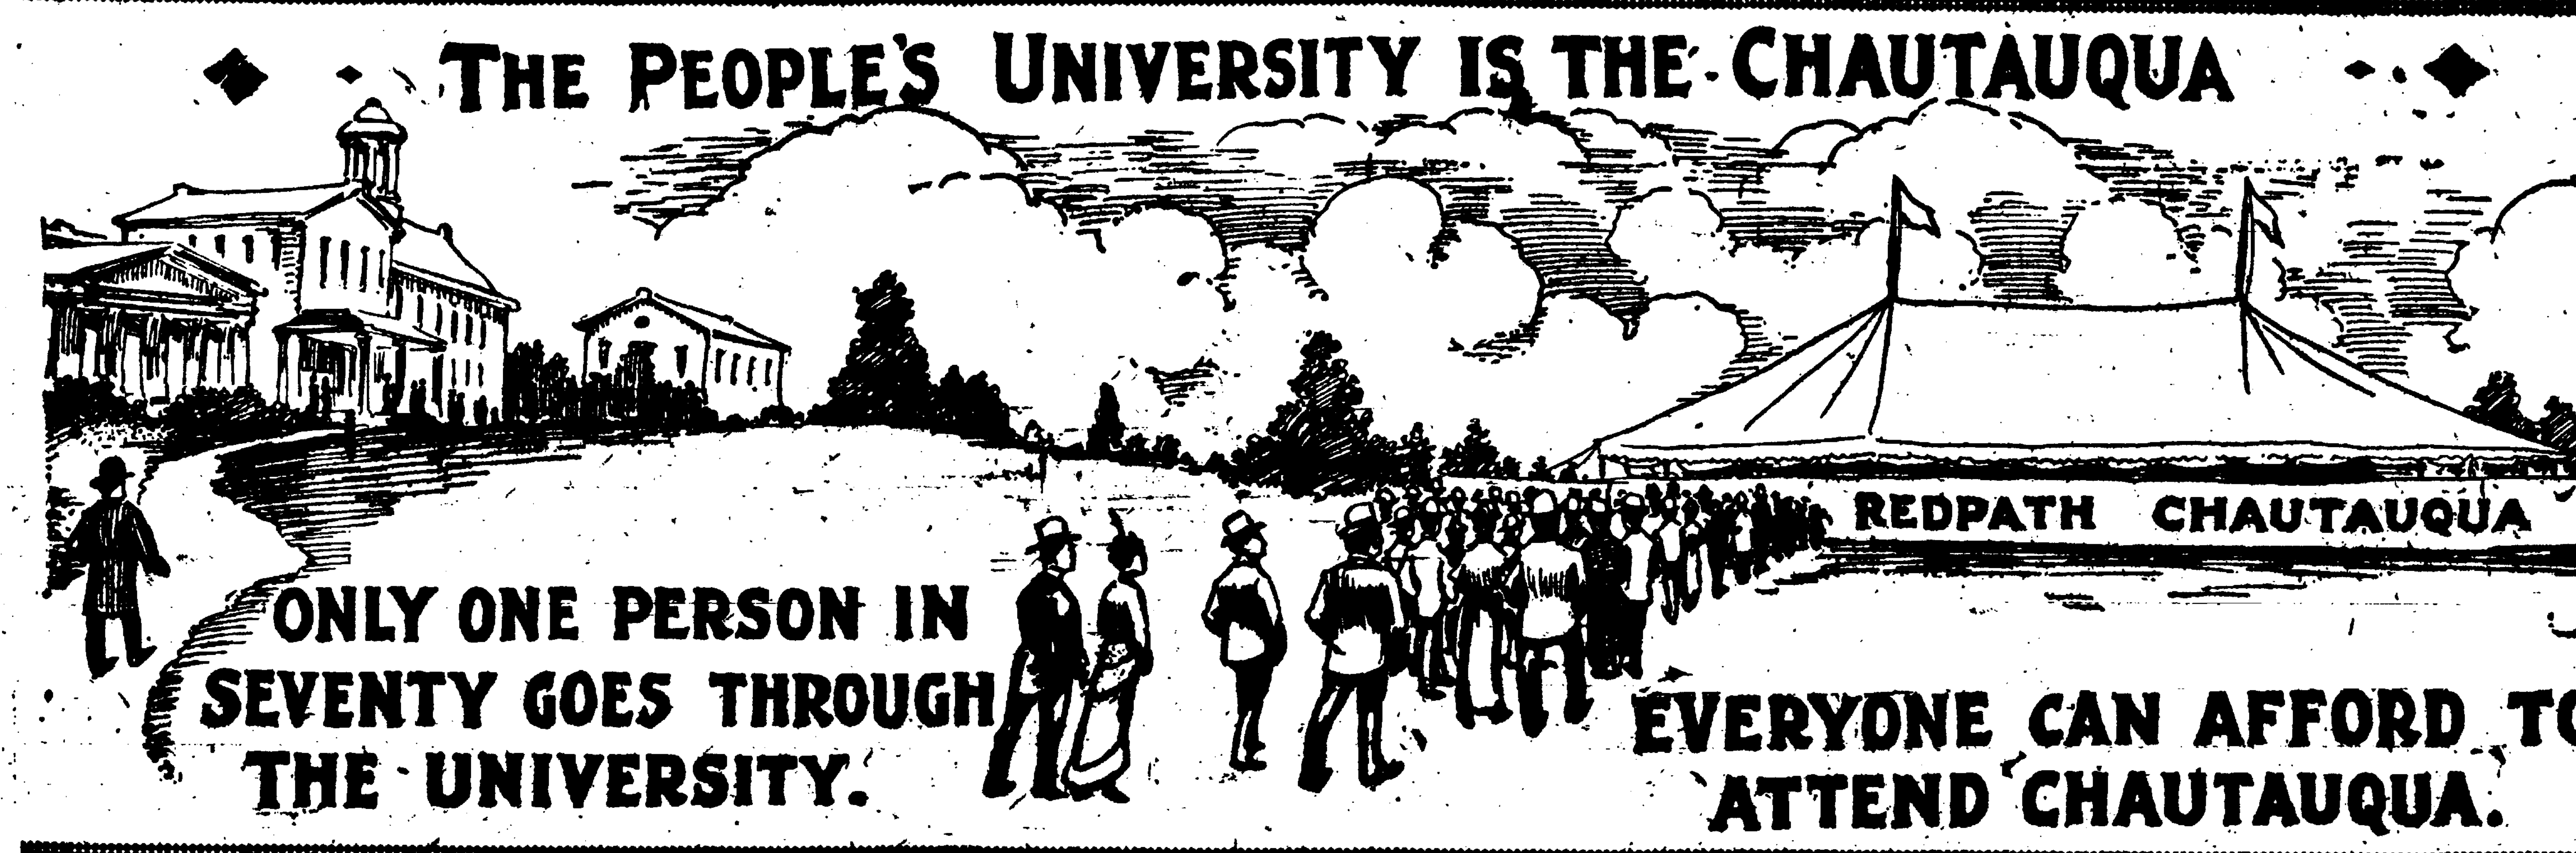
Last, remember, it is much easier to prevent a fire than to put one out.

BUGS ON TOAST.

Insect broth, beetles à la mode, larvae lachnosterni on toast and white grub salad are possibilities of the hotel menus of the future.

Dr. L. O. Howard, chief of the bureau of entomology of the department of agriculture, says that there is no reason why people should not eat bugs except that they don't do so. Dr. Howard confided this news to the Washington Biological society at the Cosmos club. Several scientists present declared that insect broth was very appetizing.

The subject came as a result of inquiries in regard to what hungry humans were going to do if the food supply continued to decrease.



THE CITY BEAUTIFUL

PLACE OF ARCHITECTS IN CITY PLANNING

Needed in Development of Civic Ideals, Says William W. Emmart.

William W. Emmart, writing in the National Architect on "The Architect and the Community," says:

"All things seem to move in circles, yet the interval of recurrences may at times be so long that the movements are not readily seen. For centuries all social effort has been more or less pronouncedly individualistic, but today we are in a measure turning back to the principles of the times of the patriarchs. Under such conditions the government of the city must become something more than a restraining and protecting force, for cities are no longer sovereign states and do not wage war one against the other. Their functions are limited to conserving the health, morals and commercial interests of the people. City government is no longer military in spirit, but a centralized social force, and since the nation has also passed from the early constructive stages, when the lawmaker was the all important factor, so have we also come to the time when the lawyer should in great measure give way to the constructive expert.

"The architect, because of his artistic and technical training, has a greater measure of responsibility than the average citizen, and he should be a forceful factor in all movements for civic reform and advancement. That he has signally failed to recognize the obligation is too often evident. At a conference on city planning the architect is noticeable by his absence, and in most cities a public discussion of harbor improvements, railroad terminals and the like will bring out the fact that apparently the architect, with but few exceptions, has given little or no consideration to such projects. Even housing reform is passed by with much the same indifference.

"While all such matters may not be directly 'grist to the mill,' yet it is indisputable that the architect who does study such problems and takes part in their discussion is both broadening his outlook and ideals and emphasizing the importance of his profession in a way that must ultimately work to his betterment. There are still far too many people possessed of the fancy that the architect is a mere maker of pictures.

"The city needs the architect's help in the development of a right civic ideal just as much as it needs the help of the engineer, social worker or banker, and the architect must give this help even at the risk of being out of favor with the powers that be if he would secure for his profession the respect due it from his fellow citizens."

Community Housekeeping Co-operation

Community co-operation in housekeeping is a profitable practice, in the opinion of Miss Frances L. Brown, director of home economics, division of extension, Kansas Agricultural college.

"The housekeepers of a community," says Miss Brown, "may combine as a club to buy a good vacuum cleaner, each family using it a certain time each month. The equipment of a simple laundry may be purchased. This laundry should be open to all members of the club at some time. The machine and wringer may be operated by water power, although this method is not always satisfactory. Equipment for a modern laundry is comparatively inexpensive if purchased by several families on shares. The price of power washers ranges from $25 to $125, the higher priced machine having motor attachment."

Nature.

"I just adore nature. Don't you?"

"Yes; in moderation, but one can't help feeling that nature was intended for the lower classes."—Browning's Magazine.

NEIGHBORHOOD CLUB OUTLINES ITS PLANS

List of Community Needs Will Be Studied by Members.

Glenside's Neighborhood club, a suburban organization recently organized in the vicinity of Philadelphia, plans departmental work covering every phase of community life, with divisional branches for literary work and music and current events, with the ultimate object of the erection of a clubhouse, a "neighborhood house," equipped with library, gymnasium and all the essentials. With nearly 200 residents of Glenside, many of whom are property owners and the major number of whom are representative of all the different businesses and professions, already interested, the initial activities will be prompt.

That the Neighborhood club plans to be an aid to the constituted government of the city's suburb is shown by the array of community topics, "all of which require the consideration of a united community."

Transportation facilities, good roads and clean streets, disposal of garbage and refuse, prevention of promiscuous throwing about of waste paper and circulars, legislation of local character, public health, pure food and home economics, tree planting, beautification of lawns and yards, care of vacant lots, protection of birds, ridding the community of mosquito and fly nuisances, clean entertainment for all and especially for children; celebration of all holidays, particularly the Fourth of July; use of school plants and good citizenship in general.

Specifically, the Glenside Neighborhood club will "get busy" immediately with community movements as applied to beautification of the lawns, the elimination of the mosquito, a fly swatting campaign and will take an active interest in all local legislation of the boards of commissioners in both Abington and Cheltenham townships, as the divisional lines of these run through Glenside. Not far distant, action is contemplated as applied to transportation facilities. One of the most important matters for consideration will be to have the different home and school associations act together in order that the best effect possible can be attained.

GIVING A TOWN WIDE RANGE.

Dirty Towns Are In Class With Individuals Who Don't Keep Clean.

A town or community that doesn't clean up in the spring and doesn't maintain a decent degree of cleanliness throughout the whole year is in the same class with those individuals who never clean up for Sunday and who themselves have never got on friendly terms with the cleansing power of water. Their personal appearance tells, if anything, a worse story. Everybody knows the wide range that he wants to give such people, while as far as they are concerned they are perfectly agreeable to themselves.

That's just it. Not even towns are always aware when they are disagreeable to other towns and are given the wide range by people who if they had been attracted by the town's cleanliness, healthfulness and otherwise good looks would have made desirable citizens. Towns, like people, are guilty of that weakness that makes other towns and other people's filth look more filthy than their own, that makes them tolerate their own filthy conditions, which would be nauseous to other people.

But there is one standard for a town and for individuals as well that personal relation or association cannot blind, that will stand the test whether viewed by visitors or people at home—that is, cleanliness. Clean streets and alleys, clean food shops, grocery stores and markets, clean restaurants and hotels, clean offices and public places, clean houses and back yards, clean milk and water, no breeding places for flies, no surface closets where flies are admitted—this is cleanliness which is healthfulness.—North Carolina State Board of Health.

THE FLOWER CITY.

Rochester Committee Justifies by Popular Action the Lovely Synonym.

The Rochester chamber of commerce has a flower city committee, whose purpose it is to further justify by popular action the synonym for Rochester—the Flower City. This demonstrates that the chamber of commerce is as much interested in the homes of Rochester as in its workshops. The method is described in the American City by Roland B. Woodward, secretary of the Rochester chamber of commerce.

First of all, members of the committee prepared a pamphlet containing

AN OLD FASHIONED GARDEN.

general planting suggestions and a list of plants suitable for garden use in Rochester. This was printed by the chamber of commerce and distributed in response to requests. The demand for it was so great that the first edition was quickly exhausted, and a second edition was issued. The educational influence of these publications was undoubtedly very great.

The committee next created an advisory board, and on its recommendation the city was divided into ten districts. One of these districts included the downtown business streets, where, no yards being available for gardens, the dependence was on the window box. In each of the other ten districts a prize was offered for the best gardens on those competing lots that had less than fifty feet of frontage and another prize for the gardens on competing lots having a frontage of fifty feet or more. By this arrangement the small lot, where the work is generally done by the householder himself, was not in competition with the large place, where a trained and paid gardener is likely to be in charge. In the business district also two prizes were offered, one for the general building effect and the other for individual exhibition.

In all cases it was required that competitors must enter their premises in the competition before it began. The responses numbered between 200 and 300, representative of all parts of the city and of all classes of property.

LEAVES ARMY CAREER TO WED CONVENT GIRL

(By United Press)

Garden City, L. I.—Love for the convent girl he met in Paris caused Robert Breckenridge Steele, of New York and Louisville to abandon his career as an army officer and become a New York business man.

Miss Stevenson's romance began in Paris two years and a half ago. She had finished her studies at a convent and was making a tour of the continent when she met Mr. Steele, who had just ended his course at the United States Military Academy at West Point, N. Y. He is a son of Mr. R. Breckenridge Steele, of Louisville, Ky., and is a member of the Breckenridge family of that State.

That meeting in the French capital resulted in a change in Mr. Steele's arrangements.

GRANULATED SUGAR HAS HEALING POWER

Doesn't Adhere to Flesh and Obviates Necessity of Frequent Washing. German Surgeons Using It.

Berlin.—German army doctors are using sugar with great success in the treatment of wounds. The wound is dressed with granulated sugar and then bound.

The sugar does not act as a disinfectant and must not be applied until bleeding has been arrested. But when applied to a clean wound surface healing proceeds with astonishing rapidity.

No washing of the wound is necessary when redressing, which is merely a matter of renewing the application of sugar every second or third day. The sugar dressing has also the advantage that there is no adhesion to the flesh.

SAY GIRL PUPILS WORK HARDER THAN THE BOYS

Teachers Declare Girls Are Interested in Details, While Boys Give Attention to Essentials.

Minneapolis, Minn.—A characteristic difference between girls and boys was revealed in Miss Jessie Taylor's class at Whittier school when the pupils took down the following problem recently read to them by the teacher:

"What are the proceeds of a ninety days' note for $789.96 discounted at 6 per cent?"

Seven girls and two boys wrote out the problem exactly as given. Three boys jotted down the three essential conditions of the problem and nothing else. The remainder of the class abbreviated the conditions more or less, with the majority of the girls writing it out more completely than the boys.

The following interpretations were offered by various school authorities:

"Girls are interested in details, while boys are interested in essentials—this is a characteristic sex difference."

"Girls are more conscientious than boys. The latter are usually more awake to possibilities by which they may save themselves useless labor."

A history teacher, commenting upon the sex difference thus exemplified, said one of the late graduating classes, which contained more boys than girls, had been keen for current events.

This class was greatly interested in woman suffrage, while another class, where the girls predominate, preferred history and takes no interest in current events.

These instances are properly coupled with two events which reveal the increased activity of schoolgirls in masculine affairs.

WEDDING RINGS THINNER.

English Government Keeps Tight Hand on Gold—Quality Not Inferior.

London.—Future war brides will have to be content with thinner wedding rings. The government is keeping a tight hand on all gold, and the practice of making jewelry from sovereigns is shortly to be stopped by legislation. London dealers say, however, there is no question of a shortage of rings. The thinner rings will not be of an inferior quality, and they will wear nearly as well as the heavier rings.

In the east end of London what, with the abundance of money, owing to war work, a tremendous trade is being done in all kinds of cheap jewelry, especially "diamond" rings.

Quite the Reverse.

Newpop—Well, my dear, did the photographer succeed in making the baby look pleasant? Mrs. Newpop—No; the baby succeeded in making the photographer look unpleasant.—Boston Transcript.

GOT BLACK EYE FOR WAITING.

Took So Long to Answer Wife's Question She Hit Him With a Broom.

London.—The poor, weeping woman stood before the judge, and the sympathies of the spectators went out to her. She looked muscular, but so miserable.

"You are charged," said the magistrate sternly, but kindly, "with assaulting your husband."

Gulping down her sobs, the prisoner wiped away her tears with a brawny hand and replied sadly:

"Yes, your worship. I only asked the brute if he would ever cease to love me, and he was so long in answering that I hit him in the eye with a broom. I'm only a defenseless woman."

MISSING HEIR RETURNS.

Declared Legally Dead, He Came Back After Fourteen Years' Absence.

Arcola, Ill.—John Hood, long lost heir to a portion of the $200,000 estate of his father, the late James Hood of this city, has returned to Arcola after an absence of fourteen years, during which the Douglas county court declared him legally dead and consented to his share of his father's property being paid to his wife and children.

J. R. Beggs of Arcola was administrator of the estate, and he refused to accept John's supposed death as a fact, requiring that he be furnished with a bond, approved by the court, to protect himself in case the missing heir should return.

Crow Stops Trolley Traffic.

Reading, Pa.—A crow, alighting on an iron crossarm carrying high tension wires, created a short circuit that delayed trolley traffic on the suburban lines fifteen minutes. A few feathers were all that was left of the bird.

LUMBER MEN MUST ADVERTISE MORE

(By United Press)

Chicago, Ill.—More extensive newspaper and magazine adxertising is essential to the future of the lumber industry, from toothpicks to houses, according to every speaker at the Lumbermen's national convention here today.

The day's speakers included James Kelley, editor of the Chicago Herald, who talked on Publicity, and the other phases of the merchandising problem all hinged on the same general question of advertising the products of the sawmills. A dozen papers on this subject in its various forms were presented. The speakers were: E. E. Pratt, chief of the Bureau of domestic and foreign commerce; Dean H. P. Baker, of the New York State College of Forestry at Syracuse; Franklin H. Wentworth, secretary of the National Fire protection association, Jay S. Hamilton, of Portland, Ore.; Frank D. Chase, of Chicago; F. A. Good, of Cowles, Neb.; J. R. Moorehead, of Kansas City, and Warren B. Bullock, of Milwaukee.

CHICAGO OPENS MUNICIPAL PIER

(By United Press)

Chicago—Chicago's biggest playground, 25 miles of Lake Michigan front, came into its own today when 60,000 bathers went to the beaches for the grand opening.

The great new municipal pier, which stretches for nearly three quarters of a mile into the lake at the foot of Grand avenue, began it first season to-day. Aquatic sports of every sort—yacht, canoe, boat races—were planned for the dedication ceremony. The recreation end of the pier will be given over all summer long to dances, band concerts and other festivities.

The pier will be the starting point for the small steamers running to the north and south parks of the city.

The lid was off to-day on bathing suits. Short skirts—cannibal style—for the men and no stockings, no skirts for the women, marked the official style.

THE FULTON EVENING TIMES

Published Daily, except Sunday, at the Grange Building, East First Street, Fulton, New York.

Entered as second-class matter at the Post Office at Fulton, New York, under Act of March 3, 1879.

DWIGHT J. ROBBINS, Owner and Publisher

THURSDAY, JUNE 1, 1916

GREETING

To-day we have taken possession and assumed the management of the Fulton Evening Times and removed it to new quarters in the Grange Building, two doors south of where formerly located.

There is a vast amount of work necessary to bring about changes that are essential to a newspaper that will be for and with Fulton, but our people will be quick to see the results of the improvements in the paper.

The former editor worked under many disadvantages in bringing the Fulton Evening Times up to the high standard that he was striving to acquire in your midst and we trust the business men of the city will realize our position in succeeding him.

A typical characteristic of a progressive town is a keen sense of the gains that may come from the growth of a town as a whole. The people clearly see that if they can make their town and its business increase every form of property and business will go ahead.

The first essential is to develop an intense feeling of community loyalty. It should be realized that everyone who owns a business or any real estate is going to gain by the growth of the town as a whole. Also, everyone who has a job in a growing town is a gainer, though this is not always realized. In a growing town, employers are better able to pay good wages, and there are more opportunities for advancement. The first step in community Loyalty is to patronize your home merchants. We are here to advocate that at all times. The man who sells supplies in your town and derives profit from so doing is in a sense your business partner. He is working for ends that are vital to your success. Every purchase made at home helps you. We are here to help, we know you need the paper and with your co-operation the Fulton Evening Times will be made a credit to your town.

DWIGHT J. ROBBINS.

A PROBLEM IN EDUCATION

At the recent institute of the Dunmore teachers Vice-principal M. J. Costello, of the Technical High School of Scranton, dwelt in a most interesting and convincing manner upon one of the problems of education, the study of pupil's lessons at home.

Professor Costello most emphatically placed himself in opposition to this plan, declaring it to be both ancient and ineffective. His reasons are based on practical results attained, not on sentiment or the convenience of parents.

Since, to a very large extent, the professor says, education in the schools is obtained from the textbooks, then the schools, above anything else should take the precaution to teach the boys and girls the most intelligent use of their books, how to get therefrom the best they contain and how to make the best use of it.

Will not almost everyone agree that Professor Costello is right in saying that, trained for that purpose, the teachers can best direct the study of textbooks?

Not only that, but is it not a well known fact that many parents do nothing to assist their children in study at home? This is seldom the result of indifference or disinclination, particularly in families where there are several children. The father comes home fagged from the toil of a gruelling day. The mother has a multitude of duties to perform, some of which extend into the evening. Social matters, to some extent engross the attention of both parents.

How then, can they find time to assist their children in the intelligent study of textbooks such as should be given them? Is it not true also that many parents are not qualified for this kind of work?

It would seem therefore that Professor Costello has sounded the note of a real school reform and in doing so has touched upon a matter very precious to the average family, the education of boys and girls along effective lines that will prove of greatest use to them in the coming days when each will be striving for a credible future.—Scranton (Pa.) Republican.

The Butterfly.

The butterfly has a delicate little pump inside of itself, with which it pumps nectar from the flowers.

Scene from "THE CLARION" at the Quirk To-day.

ABOUT THE TOWN

Mayor Lewis, Bert Adkins, W. S. Hillick, John Murray and D. S. Hollenga motored to Syracuse to-day to attend the Conference of New York State Mayors at the Onondaga.

* * *

They are telling a pretty good story on Horace Sylvester and Charles Ne ttles. Decoration Day, these gentlemen went on a fishing trip down the Oswego river, and Sylvester generously offered to row down—with the current. They dropped anchor off the Tannery Creek, and proceeded to fis h and cut bait.

"Well, let's go home," said Sylvester, after they had fished for a few hours, "We ought to leave a few for othe r guys."

It was Nettle's turn to row, and after they had hauled in their lines and unshipped the oars, (that's nautical stuff) he settled down into an easy, vigorous stroke. Somehow the boat didn't seem to move very fast, so Nettles asked Sylvester to place his sylph-like form farther a ft. At the end of five minutes rowing, Nettles took off his coat. His collar soon followed.

"Gosh, this current is strong," he said, as he pulled manfully on the o ars. "I never seen it so strong! Did you?"

Suddenly a great light dawned on both men. They had forgotten to ship the anchors!

* * *

In to-day's Post-Standard, Fulton news, we l earn that Mrs. Anna Willis of this city and John J. Scmitt, of Okmulgee, Okla., are "Wed in Oklahoma." (Headline.) That may be but they were married last week in Syracuse.

* * *

"There was a young lady from Siam,
Who had a lover named Priam.
She said, 'To kiss me, of course,
You will have to use force,—but
Gawd knows you're stronger than I am!"

* * *

Several members of the graduating class, and friends to the number of forty, enjoyed an informal dance at th e Library last night, after the Prize Speaking exercises at the Quirk. The affair was chaperoned by several teachers of the H igh School, and dancing continued until one o'clock. Reynolds furnished the music. John Reynolds and Nicholas Wallace were the committee in charge of the dance.

Pays $800,000 For Two Tapestries

(By United Press)

New York—Eight hundred thousand dollars in cash was paid to P. W. French & Co., here to-day by Joseph E. Widener, of Philadelphia, for two pieces of cloth, neither of them very large.

For one Mr. Widener paid $600,000 and for the other, $200,000.

They were two of the $2,000,000 collection of rare tapestries, gathered together from the four corners of the earth by the late J. Pierpont Morgan and sold after his death by his son J. P. Morgan.

The Tapestries were to-day removed from their places in the Metropolitan Museum and delivered to Mr. Widener, who took them to his Philadelphia home.

The Mazarin tapestry is one of the greatest works of its kind extant and some authorities have written that it is without a peer in the whole world of art.

It was owned by Cardinal Mazarin, who guided the Government of France during the minority of Louis XIV and hence it is always identified by his name.

It is one of those splendid picture cloths which are associated with the golden age of tapestry. It was woven about the year 1,500. Its foundation is silk and wool and it is rich in thread of silver and gold.

Its striking contrasts in material and the treatment of ribs and hatchings combine into a woven picture which is convincing and comprehensive. The work is composed as a triptych. It is divided by Gothic columns into three divisions and the side wings in turn are divided two-thirds of the way up by Gothic arches.

The subject of this notable work is "The Triumph of Christ and the New Dispensation." In the upper half of the middle wing Christ is represented as sitting on the throne. His right hand is raised in benediction and His left is holding open a richly illuminated book of the Gospels.

On one side of Him stands the Angel of Mercy bearing a long lily branch, and on the other side is the Angel of Justice with a sword.

Between Christ and the world below there is shown a landscape intended to separate the world beneath from the heaven above.

In the world are two groups of figures, one representing the Church and headed by the Angel of Mercy, and the other headed by the Emperor. Both groups are represented as kneeling in adoration of the Savior.

On the capitals of the Gothic columns which separate the middle wing from the side wings are two figures, one blindfolded, carrying in its right hand a broken staff and in its left a tablet on which is written the Mosaic law. The other figure, which carries crozier and chalice, typifies the Christians Church of the New Dispensation.

The story of the two wings is told by the Latin inscriptions in Gothic letters which hang from the middle arches. In the left wing is Augustus, who built a temple to the Unknown God. The laying of the cornerstone of this edifice in the smaller scene, above Augustus typifies the empire of the New Dispensation, the empire of Rome which overwhelmed and succeeded all the realms which had preceded it.

The other tapestry is generally known among the collectors as the Dollfus Crucifixion. It is wonderfully rich with gold. It once belonged to the magnificent Berwick and Alba collection, which was spoken of so reverently by William Morris at the time of the sale. It is a few years later in date than the Mazarin tapestry, having been woven about 1525, and is in the style of the early Renaissance. The design was the work of the Fleming who originated more tapestries than any other designers, Bernard Van Orley.

Opinions

FAIR PLAY FOR THE STATE

If all the graduates of agricultural schools supported by the state were to go to the farms with the knowledge the state has paid to impart in five years every farmer would know that his farm was a plant which might turn out product at a profit and a laboratory where with knowledge of the essentials of chemistry he might produce food in greater quantities or of superior quality at a given effort. A farm is an agriculturist's factory. The manufacturer makes machinery or wearing apparel, cut glasss or sewing machines according to his aptitude or the demands of the market. So the farmer fully aware of his opportunities will grow grain or meat, potatoes or hay according to the soil he possesses and the market within his reach. The state certainly pays enough money to bring to the farmer the last word in methods for productivity of the soil. The trouble is that too many enjoy the state's bounty and give no return. The state cannot take away the cost of insruction once given, but it can contract with a man that if he is to receive an education at the expense of the state, that he will follow the business for which he has been fitted for a named period or return to the state in money its investment in his case thrown away.—Watertown Standard.

A GREEDY FIEND.

The convictioı o' Dr. Arthur Warren Waite after a trial of only six days, in which he confessed the murder of his father-in-law and mother-in-law, Mr. and Mrs. Peck, his attempts to murder Miss Peck, his wife's aunt, and his intention to murder his wife, is quick and prompt justice, if followed, as it will be, by the death sentence. His only defense was the insanity of natural badness. He was possessed of greed and wanted to remove every obstruction to his inheritance of the wealth of the Peck family. The judge and the jury brushed aside the insanity plea; he knew that arsenicc would kill, he knew what would happen when he gave it, he knew his motive. The young wife, hearing his confesssion that he married her for money and that he did not love her, naturally turned against the murderer of her parents. The ccase was not without a bit of humor in describing how he gave the aunt ground glass, typhoid germs, diphtheria germs and every other kind of disease germs and even a bit of arsenic and failed to cause her death. She must have a strong constitution. Waite in the first place claimed that he was inspired to his deeds by a "little black man from Egypt." The name of the apparition was simply Greed. Waite appears to have been a man without a conscience and for that reason, which he offered as a defense, he should be put out of the world. His presence in it could not be endured. The promptness of his trial and conviction is a salutary lesson.—Watertown Times.

HUGO SPEAKS AT MAYORS' MEETING

Syracuse—"Municipal government is the largest corporation, in the world. Every citizen-inhabitant is both stockholder and customer. Its dividends are not money, but safety, prosperity, health and happiness," declared Francis M. Hugo, secretary of state, today in his address at the seventh annual conference of New York state mayors which opened here this morning at the Hotel Onondaga. Speaking on the subject of "The State and Municipality," Mr. Hugo referred in the course of his speech to the numerous problems affecting the welfare of cities which had arisen during his four consecutive terms of eight years as mayor of Watertown.

Mr. Hugo pointed out that although every citizen-inhabitant is directly interested in municipal corporations because he helps organize them, names their officials and finances them, consuming their products which are necessaries to be paid for at any price, nevertheless, he asserted, they are the most poorly managed enterprises in the world, characterized by lack of interest on the part of stockholders and customers, by extravagance and absence of business methods on the part of the officials. But there is no worthier nor more inspiring cause presenting greater opportunity for constructive statesmanship, according to Secretary Hugo, than the movement for better municipal government. The largest proportion of the population—nearly 75 per cent in New York state—live in cities, hence their relationship to the state is vitally important. How the 7,500,000 people live in the cities of New York state is the big problem for the government of this state.

Speaking of home rule, Mr. Hugo said that two of the latest phases, lying at the very heart of the problem, affect the power of the locality to determine the form of its charter as well as the scope of its own activities. He explained that nearly all reforms so far in this state have been those in the organization of local areas, pointing out that the people have experimented with one plan or another and that at present they are busily engaged in watching the development of the "City Manager" form. "While it is undoubtedly true that city conditions have thereby been improved," said he in conclusion, "nevertheless, such organisation alone cannot solve all municipal problems because the basis defect in the present scheme is the confusion between state and local functions."

"The constituion fails to map out a distinct field for both state and local action. Since there is a vital connection between both, a local administration entirely independent of the state could not be maintained because the state's sovereignty must be preserved. Consequently, the constitution should give the state and city separate and distinct powers, making each public official responsible to his special constituency and permitting neither to exercise other than directc representative authority. The result will be a simple, responsible and efficient government."

50,000 GERMANS DEAFENED; SCHOOLS THEM TO WORK

Berlin—According to official estimates, more than 50,000 German soldiers have lost their hearing in the terrible battles of this war. To enable these unfortunates to earn their bread after the war a number of schools have been established with the aid of the government.

The largest onee is in Hamburg and has about 300 pupils, who receive careful instruction and in a comparatively short time becocme proficient in lip reading. Many of them are able to take up their former trades and professions again, but some have to be trained for other vocactions. About 15 per cent. have their hearing partly restored by delicate operations and special training.

Recently 30 deaf soldiers were "graduated" from the Hamburg institute. Among them were three lawyers, two school teachers, five clerks and bookkeepers, two civil engineers and two office managers, who all have returned to their former occupations.

FULTON ASTONISHED BY SIMPLE MIXTURE

Fulton people are astonished at the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. ONE SPOONFUL removes such surprising foul matter it relieves almost ANY CASE of constipation, sour stomach or gas. Because Adler-i-ka acts on BOTH upper and lower bowel, a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. W. H. Gayer & Son, druggists. adv.

REAL ESTATE TAX BURDEN

Syracuse—Four resoslutions offered at the afternoon session of the Conference of Mayors yesterday by Mayor Cornelius F. Burns of Troy probably will be reported favorably by the Resolutions Committee this morning.

The first resolution seeks a more equable adjustment between taxation of real and personal property and suggests that legislation be enacted for that purpose, the Taxation Committee of the conference to meet with the State Board of Tax Commissioners to frame the proposed measures.

The resolution asserts that governmental expense is becoming such a great burden upon real estate that it threatens to become confiscatory.

Burden on Real Estate.

"This burden falls on real estate," the resolution says, "on account of the failure to receive income from other sources, which is in a measure due to corporate bodies and owners of public franchises not paying their just shares, and because of the lack of proper laws for the imposition and collection of taxes upon personal property, which laws as at present existing have come to be cynically and even humorously regarded and disregarded."

The second resolution proposes the appointment of a special committee to take up the question of establishing a code of uniform traffic laws for cities of the second and third classes, in harmony with the laws of the state. This action was requested by the New York State Auomobile Association.

Would Abolish Toll Bridges

The third resolution advocates abolishing all toll bridges in the state. New York is one of three states in the Union which still tolerates toll bridges, the resolution says, and, as a means of terminating this it is suggested that a portion of the fees for automobile registration be set aside each year for the purchase of toll bridges.

The fourth resolution reads:

"Whereas, the recent changes in the election laws impose a great expense upon municipalities of the state;

"Resolved, that action be taken by the conference * * * to see through appropriate legislation the removal of a part of the expense of holding elections in the cities of the state."

Resolution for Suffrage.

A resolution was introduced by Mayor Walter R. Stone of Syracuse, at the request of suffrage workers, committing the conference of mayors to the extension of the franchise to women, and was referred to the Resolutions Committee. If it is reported at all it will be without recommendation.

General opinion among the mayors is that the conference ought not to take up subjects not directly connected with municipal government. They do not include "Votes for Women" under that head.

Mayor Burns is chairman of the Resolutions Committee which meets this morning.

NEW RIVER CURRENT MOTOR MAY CHANGE METHODS

Memphis, Tenn.—A practical test is to be made on the Mississippi River at Memphis of an invention which may revolutionize waterpower development, making the construction of great dams unnecessary. It is planned to build gigantic water motors which float in the current from an anchorage. The water flows through the screws or water wheels. They operate electric generators and the power is transmitted by wire, just as is done where the power is generated by a wheel running by reason of water falling over a dam.

J. M. Stukes, a Texas man, is the inventor of the new waterpower system and has succeeded in interestsing local capitalists in building a plant on the Mississippi River. The site of the plant has been selected near Hopewell Point. At that place the current has an estimated speed of more than five miles an hour during high water and four miles an hour during low water.

If the Memphis, plan is successful another plant will be built on the Potomac, near Washington, and another is being projected for the upper Mississippi River.

WEIGHING ICE WINHOUT SCALES

Albany—State Superintendent of weights and measures John F. Farrell, who has sthe well being of the householder at heart and is ever alert to disclose the diverse schemes of unscrupulous dealers who seek to profit by short weight, has formulated a rule whereby ice may be approximately weighed without the use of any weighing devise.

The familiar expression, "How would youlike to be the ice man?" does not necessarily imply that the vendor of that substance occupies an enviable position because the profit from ice is unusually substantial. As in practcically every line of business there are dishonest ice men and it is to round up short weight ice men that Superintendent Farrell has prepared the following check upon them:

"Ice is usually too bulky to be weighed upon household scales," the head of the State Department of Weights and Measures points out. "The amount delivered, however, can be judged approximately by the use of the following method of computation: Ice weighs about 57.5 pounds per cubic foot, therefore one pound of ice measures 30 cubic inches. The iumber of cubic inches in a regularly shaped block is obtained by multiplying the length by the width, by the height, all in inches. To obtain the number of cubic feet divide the iumber of cubic inches by 1,728."

The harvest of the ice man is now at hand, so that if any short weight deliveries are to be made they will doubtless occur during the present and subsequent hot monts of summer. The rule that Superintendent Farrell has worked out is timely, it would appear.

It is indeed a curious condition of affairs when dishonest methods are practiced in connection with the sale of so ccommon a commodity as frozen water, yet were the practice of leaving undersized and underweight cakes of ice not prevalent, Superintendent Farrell would not have devoted the time to figuring out a method whereby those who receive money for something they do not deliver or sell could be brought to task.

Ice dealers are subject to a regulation by the State Department of Weights and Measures, just as much as the dealers in any other commodity that is sold by either weight or measure.

"If you do not think you are getting the proper quality, do not hesitate to complain to your merchant," Superintendent Farrell advises. "If he does not explain satisfactorily communicate with a weights and measures official. A complaint to us does not necessarily mean that the party complained of is going to be prosecuted. If we find he is willing to do right, we help him to do so.

"It is not fair to your merchant to suspect him and to say nothing about it. Give him a chance to explain. The honest merchant welcomes honest criticsm."

It would be well for the ice consumer, who may decide to set a trap for the ice man, to remember that the formula, as it were, that Superintendent Farrell has devised to measure ice, should be resorted to immediately the ice has been delivered. Frequently ice melts rapidly and unless the test be at once applied, Dame Nature and not dishonesty may be blamed for an undersized chunk of frigidity.

Ice has been a luxury during many warm seasons, especially during a summer when the ice crop has failed because of an open winter. This condition should not prevail this year, for there has been a good ice crop and artificial ice is manufactured in large quantities.

MANY CHANGES NOTED IN ELECTION LAW

The new primary and election law provides for many changes from that of last year and a few of the most important ones are said to be as follows:

Moving primary day two weeks ahead, making it the seventh Tuesday before general election day. The date is September 19 this fall.

The enrollment blanks are simply to be folded by the voter so that the marking on the inside cannot be seen, and then they are to be deposited in a box provided for that purpose. Heretofore they had to be enclosed in sealed envelopes, but the envelope is now done away with.

Provides for 75 extra enrollment blanks in each district over the registration. Heretofore only 25 extras have been required and in several districts in this city last year the number of extras supplied was not sufficiently large. It is believed that 75 will correct the tendency to run short.

The State and county committeemen will meet within 15 days after their election to organize, instead of within 10 days as heretofore.

The polls on primary days will be open from 7 o'clock in the morning until 9 o'clock in the evening, instead of from 3 in the afternoon till 9 at night.

Permitting removal in any Assembly district, as long as the voter continues his residence in that district. Heretofore, any voter, after registration, moving from one election district into another, lost his vote in primary. The voter must notify the bureau of elections between the first of February and 30 days before the primary day.

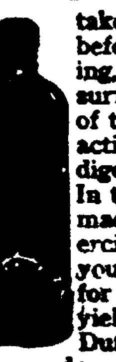
Do You Know the Benefits of a Medicinal Whiskey?

Not a beverage, mind you, but an absolutely pure distillation of thoroughly malted select grain. In fact, a predigested food in liquid form—for such is Duffy's Pure Malt Whiskey. During 56 years, it has been a recognized standard tonic and stimulant for the sick and ailing, the weak and run down; recommended by both physicians and the laity as a wonderful promotor of health.

Duffy's Pure Malt Whiskey

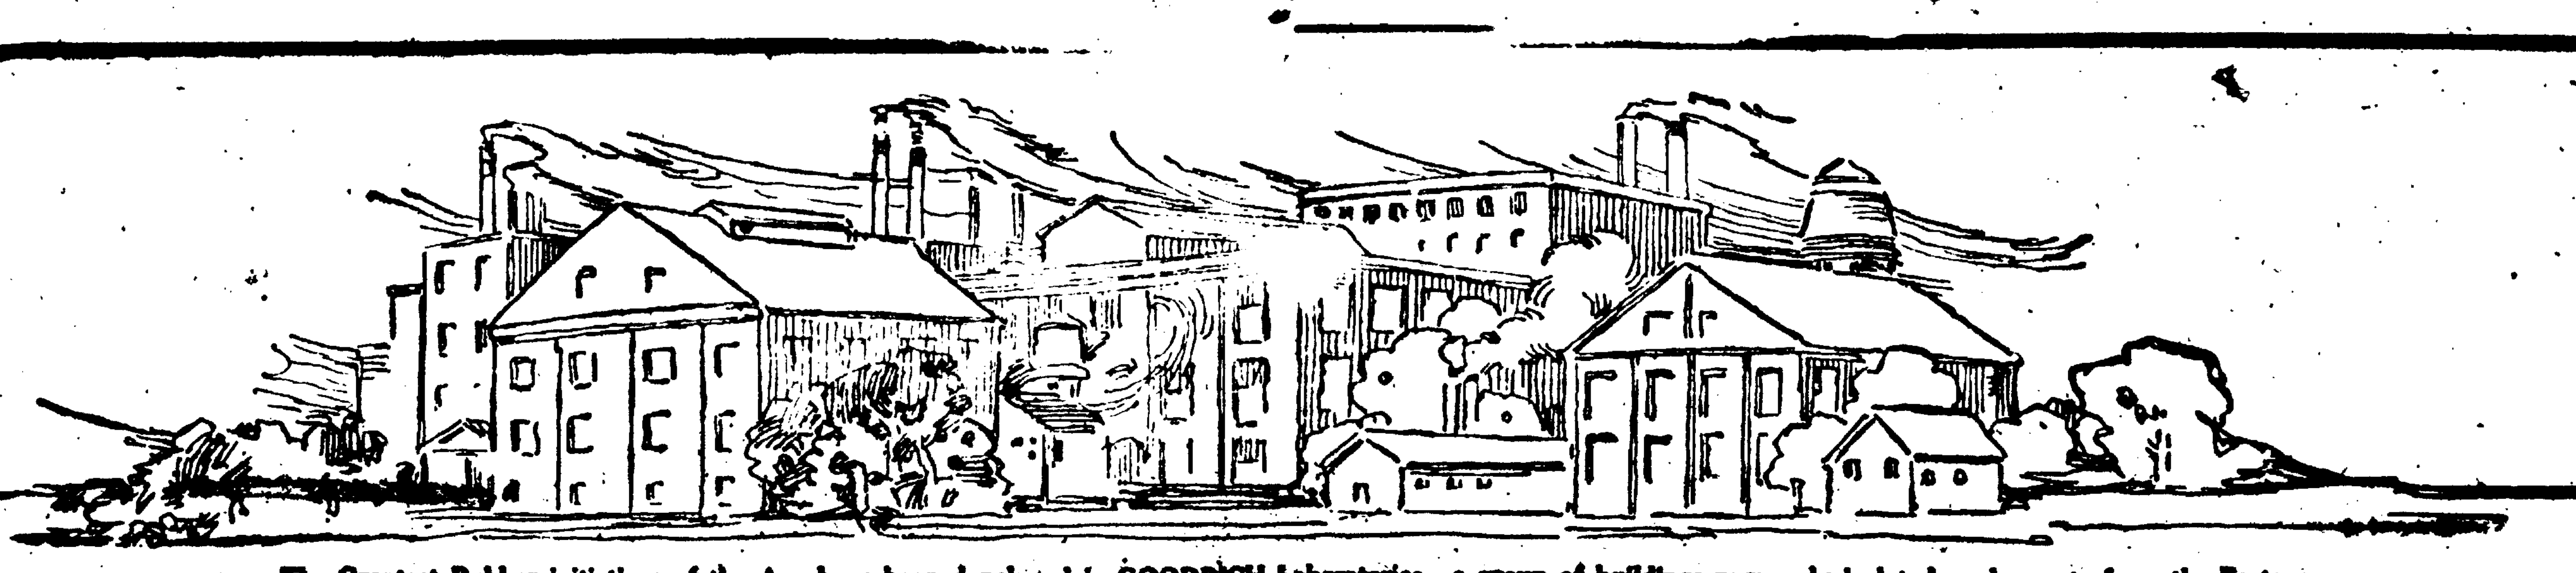


taken in tablespoonful doses before meals and on retiring, stimulates the mucous surfaces and little glands of the stomach to healthy action, thereby assisting digestion and assimilation. In this manner the body is made strong and fit for exercise and work. Don't say you're "Not feeling well," for many human ailments yield to the judicious use of Duffy's Pure Malt Whiskey where drugs and other medicines fail. Just as thousands of others do, you'll feel fit and fine if you,

"Get Duffy's and Keep Well."

At most druggists, grocers and dealers. If they can't supply you, write us. Send for useful household booklet free.

The Duffy Malt Whiskey Co., Rochester, N. Y.



The Greatest Rubber Initiatives of the Age have been developed in GOODRICH Laboratories,—a group of buildings purposely isolated, and remote from the Factory.

INTEGRITY—and the House —behind the Tire

THE greatest Word in the whole Lexicon of Commerce is NOT "Service!"

It is "INTEGRITY!"

Because, that term embodies Good-faith,—Dependability,—the *Intention* to play fair, at any cost, *as well* as good Service.

Its essence, so far as business is concerned, consists in living-up to the last letter of that Americanism, —"The Square Deal."

It demands from its practitioners not only a due respect for the Rights of Others (whether they be strong enough to enforce these Rights, or weak enough to be at the mercy of the strong) but goes *further.*

It implies a charitable attitude toward those well-meaning persons who see "Rainbows," and who *cannot* live up to promises they really *intended* to keep.

An old-fashioned Virtue is this "Business Integrity," —sometimes crowded close to the Wall by that modern idolatry called "Business-Expediency."

But,—there being something MORE than Money, worth striving for, in Business-Expansion, (as *well as* Money) this old-fashioned Virtue lives on, thrives and flourishes, in many quarters, like the Folk-Songs of a Nation that never die.

May we here pay *tribute* to "BUSINESS-INTEGRITY," wherever it abides, and,—with all due modesty,—CLAIM it as the Watch-word which has ruled *Goodrich* Activities over 47 years of Rubber Manufacturing, Selling, and DELIVERING?

◆ ◆ ◆

"BUT,—does this Policy of Business-Integrity pay, *in Dollars and Cents?*" the Cynic may inquire.

From even *that* cold-blooded standpoint we may answer (to the growing youth of this country) YES!—it HAS paid even in *material* Success.

—Witness the Goodrich growth from a very small "Acorn" indeed, to the 90 Square ACRES *of Floor Space in the largest Rubber Factory of the World,*—at Akron,—requiring 15 Square ACRES of Window-Glass alone to light these Goodrich Factory buildings.

—Witness the *Tire Output* of 1915 which, if the Tires were placed flat on the ground in a row, would *reach more than 1,400 Miles,*—from New York City to Omaha, —although Tires are only *one* of the 267 lines of Rubber Goods made by Goodrich.

—Witness the present Staff of 18,147 People, who produce the 120,000,000 pounds of Rubber Goods, manufactured, marketed, and shipped, during the year, by *Freight,* from this Goodrich Factory, in addition to the 10,000,000 pounds manufactured and shipped by *Express,* from same Factory during same period.

Contrast this Goodrich Rubber Goods Output, with the *total Imports* of Crude Rubber into the entire United States, during 1915,—viz:—172,068,428 pounds,—and the total WORLD *Consumption* of Crude-Rubber for same year,—viz:—142,000 Tons, or 284,000,000 pounds!

Then, *who* shall question that the Goodrich Watch-word and Policy, of "INTEGRITY FIRST" pays, even in *material* Results.

—This, exclusive of the Good-will, Prestige, and Public Confidence that flows from 47 years *consistent practice* of such a Policy, which may well be worth as much more, in *personal satisfaction,* to each Goodrich Stockholder, each enthusiastic Officer, and each loyal Employee of the B. F. Goodrich Co.

But, "How does this Concern YOU, the Consumer?"—you now ask.

It concerns you, first of all, as a *proof* that Square-dealing, Straight-thinking,—and Business-Integrity PAYS,—even in Coin of the Realm.

It concerns each Parent,—and the Son and Daughter of each Parent,—as a vivid *demonstration* of the fact that the modern god of "Expediency," is a *false* god,—and that all the brilliant feats, and dexterous manipulation of facts, which pass current as "Expediency" are *needless,* for permanent Success.

It concerns the Consumer of, or the Dealer in, Rubber Goods because he *knows* that, in dealing with a House of Integrity he can TRUST the Statements, the Products and Trade-Marks, of *such* a House, *implicitly,*—can save Time and Trouble and can abandon that costly and unpleasant *Watchfulness* which is necessarily involved in buying anything under the old Law of Caveat Emptor, (let the Buyer beware).

◆ ◆ ◆

WHEN, therefore, the largest Rubber Factory in the World (with a 47 year Experience in Rubber-Working) and 47 years of *Business-Integrity,* Good-faith demonstration, and Square-dealing, TELLS you that *Money can't buy* BETTER *Fabric Tires,* at *any* price than *Goodrich* Fabric Tires at their very *moderate "Fair List"* price,—you can well AFFORD to believe it.

When they tell you that nothing *but* Business Integrity *prevents* their charging you prices *as high* as those charged for other Makes of Tires, of no better quality, you can *rely* upon this:—

The difference in price is then a REAL Saving.

It is the *Cash Value,* to you, of dealing with a House which has *made "Integrity" its Watch-word* through 47 years of Rubber Manufacturing and Selling, and which has *never yet* sacrificed Principle to Profit, nor Good-faith to Expediency,

Then accept this SAVING which Goodrich Integrity brings to you every time you buy the *best* Fabric Tires in America, at the following "Fair List" prices:

Goodrich "Fair-List" Prices

BLACK "BAREFOOT" SAFETY-TREADS

30 x 3	Ford Sizes	$10.40
30 x 3½	Ford Sizes	$13.40
32 x 3½		$15.45
33 x 4		$22.00
34 x 4		$22.40
36 x 4½		$31.60
37 x 5		$37.35
33 x 5½		$50.60

Goodrich "Barefoot" Tires

LIGHT in weight, and close grained; because relatively free from inert substances or "fillers" that give excess Weight to Rubber, at the expense of Liveliness, Springiness and Endurance.

Goodrich Safety-tread Tires, of black "Barefoot" Rubber, are therefore Lively, Springy, Clingy, and Long-lived.

Through their high *Pneumatic* quality, they give "Pep" to Car-Action, while stretching out Mileage, per Dollar invested, in a way that sets Users thinking.

More than 200 different Makes and Brands of Auto Tires were made and sold in U. S. A. last year, 1915, to the total extent of about 12,000,000 Automobile Tires.

Of that 12,000,000 *total* Tires, the B. F. Goodrich Co. made and sold *one-fourth.*

Yet—Tires are only *one* of the 267 different lines made by the Goodrich Rubber Factory.

This indicates *why* Goodrich Best-in-the-Market Fabric Tires *can* be, and *are,* sold to Consumers (via Dealers) at the lowest price in America per delivered Mile of Performance.

Compare price-list on left column and see!

Goodrich Truck Tires

REPLACEMENTS of *other* Makes of Truck Tires with *Goodrich* Truck Tires during last four years were as follows:—

1912	Change-overs to Goodrich	3,590
1913	" " " "	6,357
1914	" " " "	10,725
1915	" " " "	14,000

These Change-overs to *Goodrich* tell their own story to the *thinking* Truck Owner.

Goodrich Bicycle Tires

HERE, in America, the B. F. Goodrich Co. was the *first* and *largest* Maker of Pneumatic Bicycle Tires, developing, among other types, the famous "Thread-Fabric" Tire called the Palmer Bicycle Tire.

"Integrity" of Construction, and Square-Deal in Treatment of Consumers and Dealers, results in our *holding* this largest business in America on *Bicycle* Tires, as well as on Truck Tires,—and Automobile Tires.

GET a sample of black "Barefoot" Rubber to-day,—from your nearest Goodrich Dealer or Branch!

Stretch it a thousand Times, to its extreme limit, but BREAK it you CAN'T!

That is the sort of "SERVICE" which Goodrich Integrity of Purpose and Policy, translates into.

THE B. F. GOODRICH CO., Akron, O.

GOODRICH SAFETY-TREAD TIRES

A Quarter Section, only, of the Goodrich Rubber Factory,—at Akron, O.,—the LARGEST in the World,—with more than 90 Square Acres of Floor-Space

IN YOUR KITCHEN.

Not Expensive Equipment, but Arrangement Counts.

STEPS IN GETTING MEALS.

An Expert Tells Us the Necessary Work In Preparing and Clearing Away Foods, While Cutting Out All Pottering That Takes Time and Energy.

Have you ever watched yourself preparing supper? What are all the steps you must take from the time you take the roast from the refrigerator until the last dish is washed and laid away on its shelf?

1. Remove foods from refrigerator, pantry or other storage.
2. Beat, cut or mix materials and put in cooking utensils.
3. Place on stove or cooking device.
4. Serve completed dish to dining table.

These four steps are taken in preparing any meal in any kitchen and are always done in this order, although we may not notice it. This is the reason why the equipment which corresponds to these steps or on which they are done must also be arranged in the same order—that is, the equipment which corresponds to step 1 is refrigerator or pantry, to step 2 the table or kitchen cabinet, to step 3 a stove or fireless cooker, to step 4 another table or working surface.

Because these same steps are taken in every kitchen the arrangement of this equipment can be exactly the same. In some homes a larger refrigerator may be required, or there may be an electric stove instead of a gas stove. But the placing or the arrangement of them will be the same in their respective kitchens. So you can arrange your particular equipment in the same right order, so that the refrigerator, table, stove and serving table are in one group on one side of the room. For clearing away meals—

1. Take soiled dishes from dining table and lay to right of sink.
2. Wash dishes.
3. Drain to left of sink.
4. Dry and lay away.

Therefore on the other side of the kitchen we arrange the equipment to correspond to these steps. In other words, the "clearing away" equipment of drainboards, sink and shelves are in another separate group from those of "preparing."

The basis of the labor saving kitchen is here: Keep the equipment of preparing the meal and clearing away the meal entirely separate. The reason some kitchens are difficult to work in is just because the sink is next the stove or the refrigerator is away from the kitchen table, or there is some other poor arrangement which makes it necessary for the worker to trot back and forth, taking useless steps. You will know how to arrange every single piece of equipment in your kitchen if you see that it is so placed that in working you move continuously in the same direction, making a "chain of steps." For instance, you know that it must be wrong to have a sink at the right of the stove because you never take the hot pots from the stove and lay them into the sink! No! You need a table to the right of the stove, do you not? Similarly you want the shelves on which dishes are to be laid away near the sink to avoid carrying trays some distance.

DAINTY NECKWEAR.

Georgette Crape and Organdie Are Vying For Popularity.

For hot weather is this stock of georgette crape crushed and wired to flare, with a rippling jabot picot edged.

THE NEW STOCK.

This is most practical, because it launders well and is becoming with almost all kinds of dark shirt waists.

Removing Mildew.

An excellent remedy for mildew is to saturate an article with kerosene. Roll it up and let it stand for twenty-four hours and then wash in very hot

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

Softening the Lines of a Plain Waist.

As plain as plain can be, yet with a delightful touch of femininity, is this separate waist of sheer white lawn with hemstitched collar, revers and cuffs.

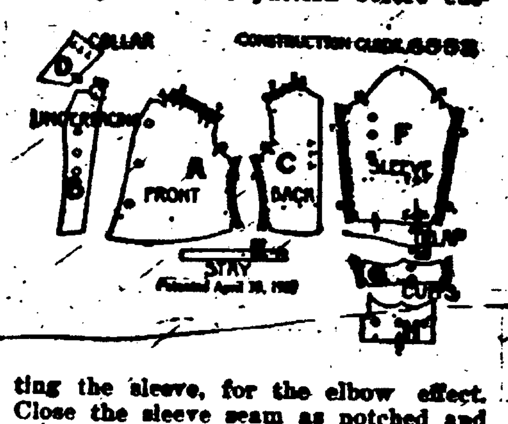
The shirt waist has long since become a law unto itself. If it wants to be mannish, mannish it is, and no one protests. This season, however, Dame Fashion is strong on distinctly feminine touches, therefore she softens the severity of the tailored waist with hemstitching and dear little pearl buttons of unusual shape and design.

Sheer lawn that comes in very good quality at twenty-five cents a yard may be used for this shirt waist. If desired, the collar and cuffs may be of pink or blue. In medium size, the waist requires 2¼ yards 36-inch material.

The woman who wants something that she can "put together" between meals will like this model. For the preliminaries of construction, adjust the underfacing to position underneath front, corresponding edges even. Gather shoulder edge of front between double "TT" perforations. Close under-arm and shoulder seams as notched. Gather back on crossline of small "o" perforations, and ½ inch above: adjust stay to position over gathers, center-backs even, small "o" perforation in stay at under-arm seam, and fasten at center-front. Center-front of waist indicated by large "O" perforations.

The center-front of the waist is indicated by large "O" perforations. To finish the neck, face and sew to its edge the collar, notches and center-backs even. Roll collar and front as pictured.

It will be necessary to cut off the lower part of the pattern before cut-



ting the sleeve, for the elbow effect. Close the sleeve seam as notched and plait lower edge, bringing the two single "T" perforations together on single large "O" perforation and tack. Face cuff (G) and sew to sleeve, double "oo" perforations even, single small "o" perforation in cuff at seam of sleeve. Sew sleeve in armhole, notches and small "o" perforations even, easing any fulness.

Separate waists are indispensable to the summer outfit and are shown in great variety this season. In addition to lawn, batiste and crepe de chine are used extensively for the development of sheer blouses of plain design.

Pictorial Review Waist No. 6552. Sizes, 34 to 48 inches bust. Price, 15 cents.

CARIBOU OF THE YUKON.

Caution of an Old Bull In Guiding and Guarding His Herd.

In his book, "Campfires In the Yukon," Harry A. Auer tells how his party watched through powerful glasses an old bull manage a herd of caribou:

"Five miles into the sea of peaks above our camp we saw a herd of thirty-four caribou that had been summering in the high altitudes, but were now driven out by the winter and were on the march to lower levels. There were cows, calves and small bulls in charge and under the strict domination of a fine old bull with a big head, which we decided not to shoot for fear of alarming the sheep that might be within hearing distance.

"We were quite content to watch the old patriarch manage his large family. We saw him lead the way to a small willow patch, and after his flock had browsed a few minutes he deliberately drove them away and headed them down the valley toward us, rushing first on one side and then on the other and finally at the rear of the column, trying to keep his charges from straggling or wandering off the course.

"When the caribou saw us at about 200 yards they started to stampede in different courses, but the old bull ran to the head of the column and changed the leader's course and, utterly regardless of his own danger from us, he rushed about, herding the animals in the way he had selected and was himself the last to follow, and as the flying band vanished around a low ridge the old fellow was charging a few smaller bulls from behind, driving them forward to make a compact formation."

ORIGIN OF WORDS.

Expressions Sometimes Stray From Their Original Meanings.

The word "sweetheart" seems everything it ought to be for expressiveness. One would naturally think that it had been coined for the occasion, like such a word as "honeysuckle."

But that is a delusion and a snare. It has no more to do with "heart" than it has with "lungs." It is a word that belongs to the class which includes "sluggard" and "coward" and "dullard" and "niggard." Pretty company for a poet's word! But it is true, though sad, that "sweetheart" ought to be spelled "sweetard."

Who has not joined in a country dance? Of course the country dance reminds one of maypoles and merrymakings and harvest homes. Sir Roger de Coverley and his quaint rural manners and ways seem inseparably connected with the dance. But it has no more connection with fields and haystacks and cornricks than the turkey trot. The partners in the dance face each other, and the French therefore called it a "contre danse." There you are! The secret's out.

What are "kickshaws?" Just the French "quelques choses," which means "anything."

What is the origin of tramway? It is short for Outram way, because a man named Outram invented them, just as a man named Macadam invented macadamized roads.—London Answers.

A CARRIAGE ROBE.

Baby Will Need This Lightweight Blanket Before You Know It.

Use crochet twist. Comes in 1⅛ ounce balls, 10 cents a ball.

This has two narrow panels of linen or whatever material desired at either end and a wider panel in the center, with two rows of insertion and an edging of lace to match.

First Row—Ch 71, 4 d c, 1 sp, 4 d c, 3 sp, 28 d c, 3 sp, 4 d c, 1 sp, 4 d c.

Second Row—13 d c, 1 sp, 10 d c, 5 sp, 10 d c, 1 sp, 13 d c.

Third Row—16 d c, 9 sp, 16 d c.

Fourth Row—7 d c, 1 sp, 10 d c, 2 sp, 7 d c, 1 sp, 7 d c, 2 sp, 10 d c, 1 sp, 7 d c.

Fifth Row—4 d c, 3 sp, 4 d c, 2 sp, 10 d c, 1 sp, 10 d c, 2 sp, 4 d c, 3 sp, 4 d c.

Sixth Row—7 d c, 1 sp, 7 d c, 2 sp, 7 d c, 3 sp, 7 d c, 2 sp, 7 d c, 1 sp, 7 d c.

Seventh Row—16 d c, 5 sp, 4 d c, 5 sp, 16 d c.

Ninth Row—7 d c, 5 sp, 10 d c, 1 sp, 10 d c, 5 sp, 7 d c.

Tenth Row—4 d c, 7 sp, 7 d c, 1 sp, 7 d c, 7 sp, 4 d c.

Eleventh Row—4 d c, 2 sp, 7 d c, 1 sp, 7 d c, 5 sp, 7 d c, 1 sp, 7 d c, 2 sp, 4 d c.

Twelfth Row—4 d c, 1 sp, 10 d c, 1 sp, 10 d c, 3 sp, 10 d c, 1 sp, 10 d c, 1 sp, 4 d c.

Thirteenth Row—4 d c, 1 sp, 7 d c, 3 sp, 7 d c, 3 sp, 7 d c, 3 sp, 7 d c, 1 sp, 4 d c.

Fourteenth Row—4 d c, 4 sp, 4 d c, 9 sp, 4 d c, 4 sp, 4 d c.

This completes one-half of design. Work back from thirteenth to first row to complete. Four of the designs are enough for the length.

Dainty Boudoir Cap.

A dainty boudoir cap can be fashioned out of a bit of shadow lace and a scrap of crepe de chine. Make a crown of the lace, and attach to it the silk, which is gathered a trifle. The joining place is concealed with twisted ribbon, which is studded here and there with a tiny rosebud. Gather the silk about an inch or so from the bottom, and see that it slips over the head easily. Finish with a ruffle of lace sewed inside the edge. Long loops of ribbon placed on the side will still further improve the appearance of this dainty bit of feminine wear.

Rush Cake.

Into a sieve put one cupful of sugar, one and one-half cupfuls of flour, pinch of salt, one teaspoonful of baking powder or one teaspoonful of cream of tartar and one-half teaspoonful of soda. Sift twice. Add one-quarter cupful of melted lard. In the cup you have melted the lard in put one-quarter cupful of sweet milk, break in two eggs and fill the cup up with sweet milk. Pour into flour and sugar and beat five minutes. Flavor. Bake in moderate oven about one-half hour.

Potted Plants.

When potting plants put a piece of coarse muslin over the hole in the pot before putting in the bits of stone and sod, which keeps the drainage good. The muslin prevents the earth from washing away.

HERE'S A SPORT FROCK.

For Hot Weather We Now Have Striped Pongee.

Striped pongee is all the vogue. The frock pictured is put up in the natural color contrasted with a green that harmonizes with the plain green pongee

SPRING NOVELTY.

blouse, which is corded twice around the bottom and has sash ends in the back. Collar and tie repeat the skirt material.

BEAUTY IN THE BOUDOIR.

How Smart Rest Gowns Flame In Oriental Colors.

In the direction of the boudoir gown the feeling for rainbow radiancy is specially marked, and, as there are no hard and fast rules as to styles to be observed, it follows that no limit is placed on the creative genius of the clever costumiere, whose fancy in the matter of cut and color is given free rein. The little shoulder capes, the wide turnover collars, the short, straight coats now in vogue and the varied forms of stole and pelerine provided for wear over the transparent corsage, which is the corsage of the moment, are excellently adapted for diversity in the matter of color treatment.

Gossamer chiffon and stiff brocade of an oriental gorgeousness of hue are alike employed. Taffeta, faille, satin, lace—none of these materials comes amiss to the dressmaker with ideas. The gorgeous costumes of the princes of India have inspired some of the boudoir coats, which are not only eastern in the splendor of their coloring, but in actual shape resemble more than a little the long coat which so often forms part of an oriental's dress. Large paste or enamel buttons, such as the native loves, lend an added touch of realism, and the slightly decollete neck is often bordered by a band of fur. La Mode never does things by halves, and when it comes to the point of paying compliments she can hold her own with the most accomplished flatterer. In the winter it was the bersaglieri hat; just now it is the Queen of the Adriatic to whom grateful homage is paid.

HUGE FLOWERS BLOOM.

On the New Hats Blossoms Not Yet Classified In Botanies.

After several seasons of small flowers fashion has suddenly swerved to the other extreme and is now advocating the use of immense flowers for both hat and dress decoration.

An instance of this is found in a Paris hat of red straw, whose high crown and very broad brim are connected by a narrow ribbon of the same hue tied in a bit of a bow at the back. Posed directly in front is an immense rose of silk and velvet, also of the red color.

Poppies of tremendous size are being employed for dress hats. They are reproduced in natural colors, with emphasis on the red and pink nuances. Frequently the poppies are pulled apart and the petals in some fantastic and overlapping manner are arranged about the base of the crown. The effect is very striking when the hat is of azure blue crin straw and the poppies in flame color.

Another novel bloom is found in flowers of mica—translucent and having the appearance of a grayish alabaster. Such blossoms are sometimes placed on the top of the crown of a hat of black milan straw, the additional altitude serving to balance the extreme width of the brim. Besides the flowers, sometimes a glazed band of ivory ribbon is employed.

A Useful Bag of Strings.

A bag of pretty, sturdy cretonne divided inside into four generous sized pockets. Four balls of different kinds of string, commencing with the thin but strong and growing heavier and stronger ball by ball until the fourth is a near cable. Four eyelets in the bottom of the bag—one from each pocket and each eyelet duly buttonholed—to let the strings pull through more easily. And a blunt pair of strong scissors fastened on "for keeps" to the side of the bag.

Spring Vegetables.

SPRING DISH OF EGGS AND SPINACH.—One-quarter peck of spinach, six eggs, one tablespoonful butter, one tablespoonful flour, one teaspoonful salt, one-eighth teaspoonful white pepper, one teaspoonful grated onion, one-quarter teaspoonful paprika. Wash and clean the spinach and then wash through several waters; put on to boil with one cupful boiling water, cover until it comes to a boil and then uncover and keep turning ten to fifteen minutes, or until tender. Drain (save the water), chop fine and cover with the sauce made as follows: Put the butter and onion into saucepan, add the flour and mix well or until smooth, then add the spinach water (if there is not a cupful add enough cold water to make one cupful); boil three minutes; add the salt and pepper; pour over the spinach and spread on platter (one that can be put in oven), and with spoon make six places big enough to hold one raw egg. Be sure the cavity is deep enough. Break one egg into a saucer and slide into the space in the spinach. After the six eggs are in the spinach dust with salt and paprika, place in moderate oven five to six minutes for medium cooked eggs, ten minutes for firm eggs.

Savory Rice.—One cupful rice, two cupfuls tomatoes, one-half cupful finely cut onion, two tablespoonfuls chopped parsley, one teaspoonful drippings, one teaspoonful salt, one-fourth teaspoonful paprika, one-fourth teaspoonful Worcestershire sauce. Put the onion and drippings into pan, fry until the onion is tender; add the strained tomatoes, salt, paprika, Worcestershire sauce and rice, which has been washed, boiled, drained and blanched; stir until the rice is hot; sprinkle with chopped parsley.

Tipsy Potatoes.—Take large sweet potatoes. Peel and cut in slices about half an inch thick and place in a baking dish, adding sugar, mace, lemon peel, ground cloves, a single peppercorn and half a cupful of boiling water. Bake until soft. Then uncover and add a glass of rum. Sherry or claret may be used instead. Keep warm, but not hot, until ready to serve.

Beet and Egg Salad.—Cut six boiled beets into dice, marinate with French dressing and let stand one or more hours. Cook four eggs twenty minutes in water just below the boiling point; then cover with cold water; let remain ten minutes, strip off the shells, chop the whites and press the yolks through a sieve. Arrange the beets in a mound, surround with alternate rows of the whites and yolks and garnish with mayonnaise and sprigs of parsley.

Anna Thompson.

Shaking Hands.

Few people know how to shake hands well. The general run of folk either give a limp paw and allow it to be shaken or else grasp yours in theirs and nearly dislocate it with their violence.—London World.

Divorce In Ancient Rome.

The first divorce in Rome was in 234 B. C. after the city had been in existence for over 500 years.

When the Cat Was Sacred.

In the middle ages brute animals formed as prominent a part in the devotional ceremonies of the time as they had in the old religion of Egypt. The cat Aelurus was embalmed after death and buried in the city of Bubastis because, according to Herodotus, Diana Bubastis, the chief deity of the place, was said to have transformed herself into a cat when the gods fled into Egypt.

All things come to those who wait, but it takes a lifetime to prove the truth of this.—Philadelphia Record.

fronts of the coat end in satchel pockets, convenient for golf balls. The jaunty patent leather belt is navy blue, to match the two novelty buttons.

HEN 29 YEARS OLD LAYS EGG.

Spanish Annie Breaks All Records, Delighting Her Owner.

Hartford.—Spanish Annie, the grand old hen of twenty-nine years (duly authenticated), owned by Colonel James Blanchard of Dayville, is quite content to die because recently she performed what is probably her last labor in this world, something beyond "all the king's horses and all the king's men," for she laid a nice brown egg.

Spanish Annie, called because she is of the black Spanish variety, hasn't laid an egg in years. However, within a year she got her name in the newspapers and her picture in many of them when she hatched out a fine brood of chickens and was hailed as the world's champion Biddy.

Colonel Blanchard, who is proud of his famous hen, has discovered from his poultry records that Spanish Annie was hatched July 4, 1887, and for years contributed generously to the Blanchard daily egg supply. Some years ago her shiny jet black feathers began turning white and her eggs were fewer. Then she lost her quick, dashing gait, and at present her feathers are a mottled gray.

Spanish Annie made no particular commotion after laying her egg, but her happy owner arranged a special feed for her.

Died From Terror.

Perhaps the most remarkable death from fear was that of the Dutch painter Pentman, who lived in the seventeenth century. One day he went into a room full of anatomical subjects to sketch some death's heads and skeletons for a picture he intended to paint. The weather was very sultry, and while sketching he fell asleep. He was aroused by bones dancing around him and the skeletons suspended from the ceiling clashing together. In a fit of terror he threw himself from a window, and, though he sustained no serious injury and was informed that a slight earthquake had caused the commotion among his ghostly surroundings, he died in a few days in a nervous tremor.

NOBLES AS AIR MEN

Kaiser Selects "Superior Type" Only to Pilot Zeppelins.

COURSE OF TRAINING SEVERE.

Commission In Air Service of Germany Is Considered More Honorable Than Even Crack Regiment—Seldom Fail to Pass Hard Test Because of Interest Taken.

Geneva, Switzerland.—When the English took a Zeppelin crew recently the two officers included among the prisoners were referred to in London dispatches as Germans "of quite a superior type."

They ought to have been if social and educational "superiority" was meant.

The kaiser has chosen his Zeppelin commanders as far as possible from the eldest sons of the noblest families in Germany.

That the pair on the airship which fell in the Thames estuary were of this class is not necessarily indicated by the names they gave—Captain-Lieutenant Breithaupt and Ober-Lieutenant Kuhne. It is surmised here, however, that they did not give their real names.

Selections are usually made of men between the ages of eighteen and twenty-one, and from the fact that Breithaupt is described as thirty-three years old it is guessed that he has been in the German aerial service for a long time, his earlier experience probably antedating the war and reaching back to the time when the Zeppelin was in only its experimental stage.

This is thought to accord with the story that he was decorated with the insignia of the iron cross and the pour le merite, implying that he has had a brilliant career and much experience as an airship commander.

Kuhne, his subordinate, is supposed to be a younger and less thoroughly tried man.

A commission in the air service is considered in Germany more honorable than even one in the crack regiments.

Training for the service begins on one of the huge rafts, each surmounted by a Zeppelin shed, on the German side of Lake Constance.

The course begins with a detailed mechanical course. Meteorological and navigation studies follow.

After three or four months of this a party of five candidates is allowed to make a flight under an experienced pilot, who explains the use of rudder, propellers, elevators and the best methods of rising and descending.

Several such trips take place, and then the most promising cadet is given command for a trial voyage under strict orders not to venture out of sight of his home shed.

Little by little these trips are extended to Berlin, Leipsig, Brussels and finally Helgoland.

By this time the student is supposed to have gained a full knowledge of handling a Zeppelin, working its engines and of the principles of aerostatics, wireless telegraphy, gunnery and the theory of flight.

In the meantime instruction in bomb dropping has not been forgotten.

The young pilot is trained always to have the wind astern, with his airship's bow pointing at his target.

Formulas have been worked out minutely, allowing both for the Zeppelin's speed and the strength of the wind.

Altitude also figures importantly in the calculations.

Practice is obtained by bomb dropping upon miniature dummy warships on Lake Constance.

At length the student is allowed to make a trial flight or two across the fighting lines and, if he acquits himself creditably, is considered ready to take part in a real raid as second in command.

A little later, if he acquits himself creditably, he is given a Zeppelin of his own.

Examinations during the period of instruction are monthly and of great severity.

In the final examination a percentage of 70 must be reached. If he fails he is dropped from the service.

So carefully are selections originally made, however; so stringent is the subsequent weeding out process and so anxious is the average young German to succeed as an airship skipper that there are said to be few failures.

FLED FROM CROQUET BALL

It Was Not a Bomb, but There Was a Bit of Blasting Fuse on It.

Milwaukee, Wis.—While the band at Grand Meadows, east of here, was practicing in the town hall some one opened the outer door suddenly and threw a lighted "bomb" among the members. The musicians ended their piece with a wail of thirty different notes and, joining the small audience, knocked over furniture and stampeded to a place of safety.

Puck Crane grabbed the bomb and tried madly to stamp out the fuse, but in vain. He dropped it and joined his fleeing mates.

A minute passed. Two, three, five, ten, had elapsed before one member volunteered to return cautiously to the hall to investigate. Breathless, he approached the dark object on the floor. It was a croquet ball to which had been fastened a piece of blasting fuse.

Didn't Shave For Thirty-three Years.

St. Clairsville, O.—Robert Newlin has had the whiskers he has worn for thirty-three years shaved off. Friends figure that, including interest, he is more than $1,000 better off than if he had [illegible] twice a week.

CRUSADERS CAPTURE AND HOLD MEMBER'S HOME

Thirty members of the Crusader class of the State Street Methodist Church tendered a farewell surprise party to Mrs. Frank Sherman, of 361 Park street, last night. Three members of the class made a social call on Mrs. Sherman early in the evening, and engaged her in conversation until the arrival of the c lass, which met at the church at eight o'clock. As they neared the house, the class song "He Included Me," one of the favorite songs of the Peacock campaign.

Mrs. William Singleton, in behalf of the class, presented Mrs. Sherman with a salk parasol. After the surprised hostes had recovered her composure, she thanked the members of the class heartily for their visit and gift.

Refreshments were served and the evening was spent with songs and several members of the class rendered vocal selections.

Mrs. Sherman is to leave this city shortly for Dayton, O., where she will make her future home. Mr. Sherman, a canal con tractor has just secured a large contract in that city.

THE GLAD HAND TO BE EXTENDED SIGNERS

The Rev. Charles Olmstead, pastor of the Congregational church extends an invitation to those persons who have recently signed cards, expressing a preference for that church, to attend a reception on June 2 at 7:30 o'clock.

It is expected that the members and friends of the church will be present without further special notice, and that everybody will be present to meet the "old guard."

NOVEL FEATURES TO ATTEND PARISH HOUSE OPENING

Something unique, if not "classy" will mark the opening of the new parish house of All Saints' Episcopal Church, which will occur the evenings of three days, June 19, 20 and 21. The committee of arrangements announce a rare treat, but retain further particulars.

"THANK YOU"

The Ladies of the Surgical Dressings Committee wish to extend their sincere thanks to the editor of the Times for his kindness in inserting notices in the paper; to Mr. Bogue for allowing them to use a sewing machine at extremely low cost; and to Mr. Patterson, who kindly sent up to the Library, last Monday a forty yard piece of unbleached c otton out of which the ladies make bandages. The ladies had used the entire piece of unbleached cotton which Mr. O'Brien had sent them last Friday; consequently, Mr. Patterson's piece was most welcomed.

POLICE COURT NOTES.

Della Chesbro, charged with assault by her sister-in-law, Nettie Robinson of the west side, will be arraigned in City Court to-day for a preliminary hearing.

Last Minute News

(By United Press.)

Berlin—The French are preparing to surrender Hill 304, the last of the strongly fortified heights northwest of Verdun. Several French positions have been evacuated. It is ex pected that th next German assault will result in the capture of the most important positions held by the French.

* * *

London—Italian troops have evacuated Asiago before the Austrian advance, according to the Rome correspondent of the Times today.

* * *

Paris—A complete repulse of the German attacks on the eastern slope of Dead Man's Hill is announced by the War Office to-day. The Germans bombarded the Verdun section to-day. With the result that the ground between their lines and many of the strongholds is swept clean of everything left standing by previous storming.

* * *

Paris—The Germans have rushed 75,000 fresh troops into the section of Verdun, says the War Office report t o-day.

* * *

Buffalo—Hugh F. Coyle, division superintendent of the Grand Trunk sys tem, with headquarters in Quebec, died here late last night.

* * *

New York—Dr. Arthur Waite was sentenced this morning to die in the electric chair at Si ng Sing during the week of July 10.

* * *

Providence, R. I.—A graphic story of a suicide pact, in which two lovers died together, came to light here this mo rning, when Beatrice Walker's body was found with a bullet wound in the breast. Authorities are searching for the "ma n in the case."

* * *

Chicago—The G. O. P. National Committeemen are endeavoring to untangle the situation involving 62 delegates from Southern States.

Prize Speaking Contest Close

(Continued from Page One)

her husband. This pardon proves to be worthless when she presents it to the executioner on the guillotine, but another rider with an order from the Assembly stops the wholesale executions.

A patriotic selection, "The Bronze Button" which was especially appropriate at this time, was the number given by Wendell Carrier, who was awarded first prize in the young men's division. The selection described an incident in the Civil War and was an eulogy on the bravery and patriotism of the men who fought that this country might remain a Union.

Joseph Mangeot, with "It Needed God" a reminiscence of the life of Lincoln, won second prize. The story deals with the Emancipation Proclamation by which Lincoln set free the slaves in 1863.

Charlton Hu nter, who rendered "Nature's Teachings" and Wallace Russell, whose subject was "Against Capital Punishment" one of Robespierre's speeches before the French Legislature, also acquitted themselves very creditably and were heartily applauded by the audience.

The judges were Dr. W. K. Wickes, of Syracuse; E. W. Smith, of Colgate, and W. B. Wilmot, of Mexico. Dr. Wickes announced the decisions.

One of the features of the evening was the work of the High School Girls' Quartette, the Misses Medora Halstead, Lillias Waugh, Rose Walsh and Zetta Babcock. They sang "Moonlit Meadows" by Czibulka, and were obliged to respond to an encore. The solo work of Miss Halstead and Miss Walsh was particularly good.

Under the direction of Mrs. L. A. Owens, the High School orchestsra played selections during the program, and were complimented for their ability by Mr. Fairgrieves in his opening address.

The entire graduating class, bearing the class colors, and led by Alfred Fivaz, grand marshal, marched into the theatre before the speaking began and gave their class yell, before occupying seats reserved for them in the right hand tier of boxes.

Change.

A little change in the hand is worth more than a great change in the weather.—Philadelphia Record.

WEATHER FORECAST

Fresh south west winds and partly cloudy tonight and Friday. Showers Friday.

No charge made for this space.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

Charities Committee

Mr. Charles Hall, chairman; D. L. Lipsky, E. J. Penfield, Rev. M. J. Peters, C. W. Streeter, Rev. J. J. Lindsman, Mr. H. L. Paddock.

* * *

Robert J. Burdette, says:

"There are two days of the week upon which, and about which, I never worry, Two care-free days kept sacredly free from fear and apprehension.

"One of these days is yesterday. Yesterday with all its cares and frets, with all its pains and aches, all its faults, its mistakes and blunders has passed forever beyond the reach of my recall. I cannot undo an act that I wrought. I cannot unsay a word that I said on yesterday. All that it holds of life, or wrong, of regret and sorrow is in the hands of the Mighty Love that can bring sweet waters out of the bitterest desert—the love that can make the wrong things right, that can turn weeping into laughter, that can give beauty for ashes, the garment of praise for the woe of the night.

Save for the beautiful memories that linger, sweet and tender like the perfume of roses, in the heart of the day that is gone, I have nothing to do with yesterday. It was mine. It is God's.

"And the other day I do not worry about is tomorrow. Tomorrow with all its possible adversities, its burdens, its perils, its large promise and poor performance, its failures and mistakes, is as far beyond the reach of my mastery as its dead sister, yesterday. It is a day of God's. Its sun will rise in roseate splendor, or beyond a mask of weeping clouds. But it will rise. Until then the same love and patience that held yesterday and holds tomorrow, shine with tender promise into the heart of today. I have no possession in that unborn day of grace. All else is in the infinite keeping of that Infinite love that holds for me the treasure of yesterday, the love that is higher than the stars, wider than the sky, deeper than the seas. To-morrow? It is God's day—it will be mine.

"There is left for myself then, but one day of the week—to-day. Any man can fight the battles of to-day. Any woman can carry the burdens of just one day. Any man can resist the temptations of to-day. It is only when the burdens and cares of to-day, carefully measured put to us by the infinite wisdom and might that gives with them the promise, 'As thy day so shall they strength be,' we wilfully add the burden of those two awful eternities—yesterday and to-morrow—such burdens as only the Mighty God can sustain that we break down. It isn't the experience of to-day that drives men mad. It is the remorse for something that happened yesterday, the dread of what tomorrow may disclose. Those are God's days. Leave them to him.

"Therefore, I think that I do, and I journey but one day at a time. That is my easy day. That is man's day—nay, rather that is our day, God's and mine. And while faithful and dutifully I run my course, and work my appointed task on that day of ours, God the Almighty and the All Loving, takes care of yesterday and to-morrow."

* * *

It is a shame that a city of about 12,000 people should have no funds in the Charity Department; however, it is a fact and we have to find a way to provide the necessary funds for that purpose. Give something to the committee for YOUR poor and YOUR sick and YOUR unfortunates. Remember that we have been taught to be kind and generous to the other fellow who is in distress.

* * *

FULTON will of course provide money to feed the poor; it has done so many other things and will also do this.

SAN FRANCISCO GIRLS OPEN TRAINING CAMP

(By United Press)

San Francisco—Washington's women's training camp isn't such a much. A squad of girls from San Francisco's most exclusive society circles went into camp here today as soldiers in the east cantonment of the Presidio. They are to be taught how to be Amazons, and here is their daily stunt:

6:00 a. m. Reveille. Dress within 30 minutes. Powder, f ancy hair and beauty spots barred. Uniform khaki skirt, shirtwaist, elksskin boots, and campaign hat.

Drill for half an hour to get up an appetite.

Eat at the general mess table with 250 other women, strangers.

Make beds, get lunch ready for instant preparation, be ready for first aid class at 8:30.

All morning learn how to wrap him dummies in 157 varieties of bandages.

Noon-lunch.

1 to 4, forced marching.

4 to 6 visitors.

6, dinner.

7, assignment of sentries and inspection and 10, taps.

THE QUIRK TO-DAY

Carlyle Blackwell, the Equitable Motion Picture Corporation's internationally popular star, will be seen on the screen of the Quirk today in a remarkable picturization of Samuel Hopkins Adams' vital American novel, "The Clarion." The names of the star and author are alone sufficient to attract the attention of all motion picture patrons, to this production.

The story of "The Clarion" has a two fold value. Firstly, it is a story that will grip and hold its audience from the first to the last foot of the five reels in which it is pictured. Secondly, it is a story that exposes one of the most devilish practices of the day, the manufacture of fake patent medicines. In its picture form "The Clarion" makes the lesson it teaches subsidiary to the sweep of its dramatic episodes and its final tremendous climax, in which a mob of several thousand persons participate.

Mr. Blackwell has been surrounded by a big cast of motion picture favorites including, Marion Dentler, Howard Hall, Charles Mason, Rosemary Dean, Albert Hart, Jean Stewart, George Soule Spencer and Philip Hahn. The picture was directed by James Durkin.

THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 449. FRIDAY, JUNE 2, 1916 Price, One Cent

Ft. Douamont Under Worst Bombardment by Kaiser's Big Guns

London—Fort Douauмont since early in the more than 100 day struggle, and blocking the way of the Germans who continue to direct their energies to capturing Verdun, is today under the worst hail of shells that it has yet withstood. This is due to a shift made by the German artillery.

It develops that during yesterday's battle west of the Meuse the Germans sent back the French line between Dead Man Hill and Cumieres for a distance of three-uarters of a mile. The French battalions, however, which had retired before the unprecedented artillery fire, re-formed and made a desperate counter attack, supported by reinforcements. After nearly two hours of violent fighting they recovered all the lost ground. The infantry fighting in this struggle is described as the fiercest of the war.

The actions late to-day were confined to the east side of the Meuse, where the Germans made a slight gain.

The official communication issued by the War Office to-night reads:

"On the left bank of the Meuse there was an intermittent bombardment in the region of the Avocourt wood and Le Mort Homme.

"On the right bank after a very violent artillery preparation, the enemy attacked our positions from the Thiaumont farm as far as Vaux. After several fruitless assaults, the enemy succeeeded in penetrating our trenches of the first line between Fort Douaumont and Vaux Pond. Everywhere else the German, attacks were broken by the fire of our machine guns, which caused heavy losses to the enemy.

"There was less artillery activity on the rest of the front.

"Aviation—This afternoon a group of German aeroplanes dropped several bombs on the open town of Bar-le-Duc. Eighteen of the [illegible]ian population were killed, of whom two were women and four [illegible]ren. Twenty-five persons were wounded, among whom were [illegible] women and eleven children.

"An aviatik, attacked by one of our aeroplanes, was compelled [illegible] land in our lines south of Bernecourt, in the region of Toul. The [illegible] enemy aviators were made prisoners."

The text of the afternoon statement follows:

"On the left bank of the River Meuse the bombardment con[illegible]ed with great violence last night in all the territory around Dead [illegible]n Hill. A determined German attack delivered yesterday even[illegible] at eight o'clock against our positions upon the eastern slopes of the hill were completely repulsed by our fire.

CITY PLANS TO REFUND OLD SEWER BONDS

W. S. Hillick announced this morning that the city would refund the sewer bonds issued in 1896, as soon as they became due by issuing new bonds to cover the amount. The bonds total $67,500 and were issued when Thomas D. Lewis was president of the village of Fulton.

The city has been paying interest on the bonds at the rate of 4 per cent. ever since they were issued and the amount of interest paid almost equals the total indebtedness of the bonds. Under the present administration some plan may be devised under which a small amount may be cleared from the bonds from time to time in order that the city may be free from the debt in a few years.

POSSIBLE GOVERNORSHIP FIGHT WHEN OHIO DEMOCRATS MEET TODAY

(By United Press)

Columbus, O.—Ohio Democrats in convention here to-day were to choose district presidential electors.

Interest centered in the row which threatened between adherents of former Governor James M. Cox and Former Governor Judson Harmon—both gubernatorial possibilities.

Cox has announced himself as a "receptive candidate" for the democratic nomination for governor. Harmon until now has remained silent, leaving to his friends all efforts in his behalf.

Indications this morning were the convention, if it endorses either, might lean toward Cox.

This belief was based upon the slating of War Secretary Newton D. Baker for temporary chairman and U. S. Senator Atlee Pomerene for permanent chairman. Both Pomerene and Baker are close to President Wilson and administration Democrats.

It was W. L. Finley, Democratic state chairman and sponsor for Cox, who, after a hot fight in the state central committee, succeeded in swinging the temporary chairmanship for Baker—and thus assuring a "keynote speech favorable to Cox."

Owing to the fact that the Democratic national convention is yet to come, little platform drafting was expected here today. Uncertainty of national issues has forced Ohio Democrats to use extreme caution in suggesting any state issues.

Finley and his henchmen were hopeful that to-day no action will be taken that might embarras Democrats later on in the campaign.

WEATHER FORECAST.

Strong south to shifting west winds. Thunder storms tonight and Saturday cooler.

Justice Hughes Didn't Authorize Hitchcock to Present His Name

Washington—Justice Hughes' secretary told the United Press correspondent this morning that Frank Hitchcock is not authorized to work for the Justice at the Chicago convention.

The men behind the Hughes boom and most inelastic of the "Old Guard" members were thrown into a state bordering on panic tonight when it became known that the men representing Theodore Roosevelt have begun negotiations with some of the "favorite son" boomers. The Roosevelt men want to strike an agreement whereby Mr. Roosevelt can have the support of the "favorite son" delegates and one of the "favorite sons" may be nominated for Vice President. Charles W. Fairbanks is preferred.

The hotel lobbies where the politicians gather were buzzing with comment late last night over the negotiations which had been opened up between men representing the Roosevelt boom, and some of the "favorite son" representatives.

It was stated that Mr. McGrath bore written credentials from Mr. Roosevelt to speak for him in any matter that might come up during the next few days. The importance of this may be gauged from the fact that the vital manoeuvring and skirmishing of the entire Presidential race among the republicans is likely to take place between now and next Wednesday. Among the politicians the word was passed around that the Roosevelt men would direct their first attention to the Fairbanks representatives and that there were strong indications that some sort of a "deal" might be effected in that quarter.

It was asserted also that if such an arrangement were made it would embody conditions satisfactory to the other favorite sons. Some of the gossip in inner circles was in effect that if Mr. Roosevelt should be elected President Elihu Root might be designated Secretary of State and Mr. Burton a second member of the Cabinet. While it was agreed that conditions were almost too problematical for serious discussion, it was nevertheless believed that in a situation so tense and potential as the present almost anything might be suggested or even promised.

The projection of the new Roosevelt development into the situation did not appear to dishearten the Hughes men. Senator Smoot, a Hughes recruit from the "Old Guard," late to-night re-emphasized his prediction that Justice Hughes probably would be nominated.

"It looks very much," said he, "as if Justice Hughes will be nominated on an early ballot. Everything points that way."

Last Minute News

Rome—A declaration of war is believed to be imminent between Bulgaria and Greece, according to news which reached here today from Athens.

* * *

Petrograd—A series of sharp attacks is reported by the Turks against the Russians in their advance into Asia Minor.

* * *

Rome—A violent Austrian offensive is in progress near Arsiero with the apparent object of surrounding the town of Chio.

* * *

Paris—In a pitched battle between German and French aeroplanes yesterday, two of the French planes of the squadron were brought down by the Germans.

* * *

Pontiac, Ill.—Twenty persons were injured, one seriously, when a midnight special Wabash fast mail was blown from the tracks near Saunenin, early to-day, in a severe wind storm, the worst that has visited Central Illinois in many years.

* * *

New York—Two bets of $10,000 each that T. R. will win the Republican nomination were placed this morning in Wall Street by Chester Thompson, one even money and one 10—11.

* * *

Washington—The careful study being given to Carranza's wordy note demanding the withdrawal of American troops from Mexican territory to the Administration, leads to the belief that the American reply will be sharp and decisive.

* * *

La Crosse, Wis.—Loss of life is feared at all points north of McGregor, Iowa, where a terrific tornado swept over that section this morning, causing heavy damage to all kinds of property. All wires are down between here and McGregor and no authentic news is available.

* * *

Paris—Violent infantry attacks have taken the French troops 100 meters into the German trenches south of Caurettes, says the official statement of the War Office to-day.

Complete Tieup Today at Chocolate Works; Arbitration Later

With the exception of a few men working in the milk room every employe of the Peters Chocolate company plant here was on strike this morning. Last night all who had not walked out earlier in the day, joined the strikers' forces and this morning none of the manufacturing machinery is in operation.

At a conference this morning between I. Achilli, the manager of the plan, and Harry Allen, Clinton Yardley and Alfred Copely, representing the strikers, Mr. Achilli announced that the company had no plan of arbitration to offer the men and would make no offers until Monday. A New York representative of the company, who was called to this city by wire yesterday, conferred with Mr. Achilli last night, and telegraphed all information concerning the strike to the directors of the Company in New York. A meeting of the directors will be held tomorrow at which time the company will decide whether or not to accept the strikers' demands.

A reporter of the Fulton Evening Times interviewed Mr. Achilli over the telephone this morning. In the course of the conversation, Mr. Achilli said the statement that girls were paid as low as $3.25 a week at the plant, was a falsehood, and that this sum was only paid to learners who were given a piece-work rate as soon as they had become familiar with their work. Taking up other statements made by the strikers in a resolution which appeared in this paper yesterday, Mr. Achilli admitted that the condition of the toilets at the plant was not all that could be desired, and hat he had been ordered to install a new system by the State inspectors. The work has been held up by the contractors, Mr. Achilli said. He said the men receive from $2.00 to $2.83 a day.

Mr. Achilli made practically the same statements to the strikers' committee this morning, and the men insisted that the statements they had made yesterday were true. Three girls among the strikers told Mr. Achilli that they were receiving only $3.25 a week. Mr. Achilli refused to allow the men to interview the New York agent.

The strikers have posted pickets at all points around the factory and are awaiting with interest the arrival of many new employes who may be hired by the company, as some of the men feel that the company's delay is for the purpose of securing new hands.

Although one of the evening papers stated yesterday that Mr. Achilli had offered the strikers an increase of 10 per cent. subject to the confirmation of the New York office, the manager denied this morning that any such offer had been made, and said the matter was now entirely in the hands of the directors.

SPECTATORS WILL BE BARRED FROM ST. LOUIS CONVENTION

(By United Press)

St. Louis—Final plans for the Democratic National Convention, opening June 14, were approved by the National Committee's Committee on Arrangements to-day.

National Chairman McCombs presided at the session. The entire seating plan, arrangements for more light and ventilation, decorations, badges, and conveniences for delegates were gone over in detail.

Ten days from now the National Committee meeting here will place its final approval on the convention arrangements.

The arrangement committee has determined to keep spectators off the main floor of the convention hall.

Seven thousand five hundred seats have been provided for spectators, the 3,500 places on the floor and platform being reserved for delegates, the press, and officials of the convention. This will be the first convention at which spectators have been barred from the main floor.

The interior of the coliseum has been re-painted white, so that greater light will be reflected in the vast hall. An emergency hospital has been equipped and a special system of artificial ventilation installed.

Opinion

HAVE 'PHONE-USERS NO PROTECTION?

Quite apart from other questions involved, the disclosure of specific instances of promiscuous tapping of private telephone wires in this city has started in the mind of the telephone-using public doubt and misgiving which onght to be promptly allayed.

In the interests of justice and the detection of crime the Police Department must no doubt arrange for a certain amount of "listening in" on private telephone wires by department officials or detectives.

But how many persons in the Police Department have unrestricted power to tap telephone wires?

How is authorization for the use of such methods obtained?

How far is it possible for persons provided with necessary instruments to tap any telephone wire without the sanction of either the police authorities or the telephone companies?

These are the questions that naturally arise in the mind of the ordinary telephone subscriber, who ought to be protected from the risk of having his private business intercepted by listeners whose purposes may little resemble those of justice. Too much opportunity of this sort could hardly fail to become a dangerous instrument in the hands of detectives and police.

The situation calls for a plain statement from the police commissioner and from the New York Telephone Company showing exactly what restrictions are placed upon telephone tapping and what guarantees the innocent telephone subscriber has against unwarranted eavesdropping.—N. Y. World.

COMMUNITY CENTER SONGS

Five community center songs, especially designed for schoolhouse community forums, have been brought together for the use of the Grover Cleveland Forum of Washington, D. C., of which Miss Margaret Wilson is honorary president, and copies may be obtained from the Commissioner of Education, Department of the Interior, Washington, D. C. Two of the songs are entirely new, having just made their bow to the public at the Grover Cleveland forum. One is called "It's a Short Way to the Schoolhouse," and is sung to the air of "Tipperary;" the other, entitled "Neighborhood," is sung to the air of "Die Wacht am Rhein." The others are: "The Fellowship of Folks," a song of neighborhood, sung to the air of "Drink to Me Only With Thine Eyes" or "Auld Lang Syne;" "Heart and Hand" and "This Good Common Ground."

These songs all emphasize the significance of the schoolhouse as the common meeting place. In the words of one of them: "We'll strike that fine old chord again—a song of neighborhood." All five songs were written by E. J. Ward, specialist in community organization of the Bureau of Education. They are unusually well adapted to the communal singing that has become so popular a feature of the neighborhood meetings in the schoolhouse. It was with regard to this communal singing that Dr. Samuel McChord Crothers, at a general neighborhood gathering in a schoolhouse community gathering, said:

"You have found a substitute for war. The military fellows say that it takes a war to make people really feel together—to know a common interest, to own a common country. And how do they prove it. They tell us that from '61 to '65 we were a singing nation, and that's true. Those were the days we learned "Tenting To-night." "Mine Eyes Have Seen the Glory," "Maryland, My Maryland," "Tramp, Tramp, Tramp," "When Johnnie Comes Marching Home." We learned them then and we sang them then. Since then we've just been 'warming over' the words. I was a boy in those days. I heard it and I never expected to hear that note again. But I have heard it again. I have heard it here. You sank in that spirit. What does it mean? It means that down underneath you have been gripped by that same throbbing common reality—not limited by any fear or hate this time. You know a common interest. You own a common country. You've proved it, for you've sung in that spirit.—Utica Dispatch.

The Eternal Motion.

Nature never stands still, nor souls either. They ever go up or down.—Julia C. R. Dorr.

To Be Fashionable You Must Get on Ragged Edge

By Margaret Mason

(Written for the United Press)

Her parasol is edged with fringe
And she's fringe on her dainty gown;
Her curling lashes fringe her eyes
And she lives on the fringe of town.

New York—To be on the fringe of society is the last thing one could wish, but to have on the fringe of fashion is the latest thing one could wish.

Indeed it seems as if fringe were infringing on the popularity of all other trimmings.

The fringed frocks is omnipresent and boasts anything from tiny edging of vivid hued yarn fringe to a deep fringe of silk, either black or of a tone to match or contrast with the gown.

It is used effectively on the bottoms of the wide skirts and to edge the bell shaped sleeves.

One stunning evening model shows an entire overskirt of knotted silk fringe of yellow, black, blue, green and old rose over a petticoat of turquoise-blue chiffon. The sleeves are mere shreds of fringe and the apology for a bodice is a scrap of turquoise chiffon.

The new wide cape collars are edged with narrow, colorful fringe; hats have a narrow yarn fringe edging and I even glimpsed a swagger damsel who wiped her up-tilted up-to-date nose on a handkerchief of pale mauve with a tiny old blue edging of thread fringe. Fringe is certainly up to snuff.

On the loose long taffeta coats and wraps either for day or evening wear the fringe is vieing with the pinked ruchings as a finish but it is as a finish for a parasol perhaps that fringe reaches its truly highest point.

One smart sunshade of emerald green taffeta is built on the flat, many ribbed Chinese parasol lines with a blunt little snubnose ebon ferule and a long knob-finished handle of the same glossy black.

A bright green silk cord is knotted round the handle, with a fitting loop through which its owner's fair arm is meant to stick when she shuts up her sunshade in shady byways and chooses to dangle it at arm's length.

The real finishing touch of this adequately lovely parasol, however, is an edging of three inch black silk fringe that brooks no infringement of the sun's rays across the summer girl's countenance.

A zebrassque sunshade is one of black and white striped taffeta. The stripes radiate outward from the center and end in a fringe of alternate black and white striping to match the silk. The handle to this is of white with a black knob at the top.

A cerise parasol fringed like the black and green one is also very stunning though a bit prone to cast a too rosy glow over a healthy countenance. No one may expect to look pale and interesting under cover of a cerise sunshade.

A shell pink taffeta sunshade that is a mass of petal shaped scallops like a huge pink rose just adds the pink of perfection to a summer toilette of white net and pink picot ribbon, but a shade deeper it is wiser not to go.

A purple satin parasol veiled in a film of black Spanish lace with a quaint purple glass knobbed sticked, in a Fifth avenue window is a replica of great grandmother's that now moulders in the attic and proves the aphorism that there's nothing new under the sun—not even a 1916 parasol.

THE HNMAN OSTRICH OF HOLLAND IS DEAD

(By United Press)

London—Halland's human ostrich is dead.

The 'Lancet," leading British journal of medicine, in an exhaustive technical treatise on "pica" or human craving for unnatural, articles of diet, announced today that a Dutch wharf laborer recovered after attempting to digest three pounds and eleven ounces of hardware.

Discharged from hospital, the patient behind a 5 inch coal chisel weighing eleven ounces and a large assortment of coins, bolts, nuts, rivets, wire nails, tin tacks, screws and hooks and a number of small flints he had swallowed.

Six months later he returned, suffering weakness and loss of appetnte, symptoms which he evideneed on the first visit.

This time a piece of tin plate and a portion of slate pencil were removed from the patient and he immediately succeded in evading the hospital attndants to swallow a piece of soap and two ounces of camphorated spirits.

Again he recovered and was removed to an insane asylum where he succumbed to fever and inflammation of the right lung.

WILSON URGES NATION TO OBSERVE FLAG DAY

Washington.—President Wilson today issued a proclamation calling upon the people of the United States to celebrate Flag Day, June 14, with patriotic exercises, giving expression to "our thoughtful love of America."

The President declared the people should rededicate themselves "for an America which no man can corrupt, no influence draw away from its ideals, no force divide against itself."

Christmas Island.

Christmas island, in the Pacific ocean, is so named because Captain Cook landed there Christmas day, 1777.

The Flax Plant.

Linen is obtained from the flax plant, a small, delicate annual with a tiny blue flower. The plant is pulled by hand in the summer, the seeds, known in commerce as linseed, being removed and the straw subjected to various processes to separate the fibrous part which constitutes the linen. First it is steeped in water and then passed through a drying and heating process on revolving wheels until all foreign matter is removed. It is then ready for manufacture.

Graduation Gifts

We are showing an extremely fine line of jewelry suitable for graduation gifts. The superior quality and reasonable prices will surely appeal to you.

As the engraving of initials or monograms may necessitate a slight delay, we suggest that you make your selection as early as possible.

ENGLAND OPENS FASHION SHOW DESPITE WAR

(By United Press)

London—Great Britain to-day struck the first blow in disregard of the Rue de la Paix's feminine fashions.

It was an all British fashion show at Agricultural Hall, Islington, North London, which, despite the government mandate of wartime economy, displays all of the frills and furbelows of milady's summer supply.

Wax fingers and animate flesh and blood models displays the lampshade skirt, the shepherdess' design and panniers, all of which emphasize hips and fall toward the floor away from the ankles.

Aich shades of brown and emerald greens give no hint that Germany has kept all the dyes.

There also is the wartime garment recommended for working girls, a kind of harem skirt—really baggy trousers devoid of manishness.

Bathing costumes so complete from cap to slippers that even Hyde Park wouldn't blush, are a feature of the exhibition. Contrassted shades or plain black or brown promise to be the prevailing mode on British bathing beaches.

Blouses, waists and other things are designedo by British "modistes."

Over 200,000 buyers were invited to the all British fashion show from everywhere, including America and excepting Austria, Germany, Bulgaria, Turkey and other enemy lands.

RIGID ECONOMY NOW IN FAMILY OF KING GEORGE

(By United Press)

London, (By Mail)—War economy is being rigidly practiced in the royal household at Windsor Castle.

To save petrol, the royal motor cars are now seldom used. The Queen usually ridles behind her team of greys, while Princess Mary travels horse-back.

No alcohol is used in the Castle, either by the King's family or his servants. Cider-cup is the strongest drink served; lemonade, orangeade barley water are the customary drinks.

The King also has given up plovers' eggs, one of his favorite dishes, and eats pheasants' egg instead. As shooting has been abandoned both at Windsor and Sandringham, the eating of pheasants' eggs saves the food needed to rear young birds, and also lessens the damage to wheat fields from the game. Many pheasants' eggs are sent daily to the army hospitals from the royal preserves.

JOHN D. WILL BE HOST TO 600 CLUBWOMEN TODAY

(By United Press)

New York—John D. Rockefeller will be host to-day to 600 women delegates of the General Federation of Clubs, whose convention closes in this city to-night. On this last day of their official stay he will open his estate at Tarrytown and give them free range of his Japanese, Alpine and Italian gardens. Miss C. E. Mason of the Castle School, Tarrytown, is chairman of the delegation.

Beautiful Bust and Shoulders
are possible if you will wear a scientifically constructed Bien Jolie Brassiere.
The dragging weight of an unconfined bust so stretches the supporting muscles that the contour of the figure is spoiled.
BIEN JOLIE BRASSIERES put the bust back where it belongs, prevent the full bust from having the appearance of flabbiness, eliminate the danger of dragging muscles and confine the flesh of the shoulder giving a graceful line to the entire upper body.
They are the daintiest and most serviceable garments imaginable—come in all materials and styles: Cross Back, Hook Front, Surplice, Bandeau, etc. Boned with "Walohn," the rustless boning—permitting washing without removal.
Have your dealer show you Bien Jolie Brassieres, if not stocked, we will gladly send him, prepaid, samples to show you.

"WOBBY AND WEGGY"—WEGGY WINS AN EASTER BET

MAN'S REAL WORTH.

A man should always be judged by his real worth. The prevailing fault of our time is the estimating of manhood by the accidents of life rather than by its essentials. Not what a man has or what happens to him; not wealth, nor noble blood, nor crowns, nor titles, but the things that are in him and shining through him; his thoughts, motives, springs of action—these constitute the man.—D. J. Burrell.

Telling the Difference.

"No, sir; not a penny!" was the reply of young Ardup's opulent but immovable relative. "I've lent you more money already than you will ever pay back. You can shift for yourself henceforth. The difference between us is that I am provident and you are improvident."

"The difference between us," vehemently retorted young Ardup, with his hand on the doorknob, "is that I'm a man of moderate means and you're a man of immoderate meanness!"

Then he fled.—Pittsburgh Telegraph.

Severe Test.

A young man given to purple and fine linen, but not at all addicted to work, waited upon a prominent citizen and asked for his daughter's hand.

"What are your prospects?" asked stern papa.

The young man was rather indefinite on this point, but finally blurted out that, although he had no position at the time, he would die for the young lady in question.

"All right," snapped the father. "Get insured for $10.000 and make good."—Exchange.

Had a Ready Reply.

An Irish soldier had lost his left eye in action, but was allowed to remain in the service on consenting to have a glass eye in its place. Being a typical "absentminded beggar," he appeared on parade one day minus his left "lamp."

"Nolan," said the officer, "you are not properly dressed. Why is your artificial eye not in its proper place?"

"Sure, sir," replied Nolan, "I left it in my box to keep an eye on my kit while I'm on parade."—Boston Transcript.

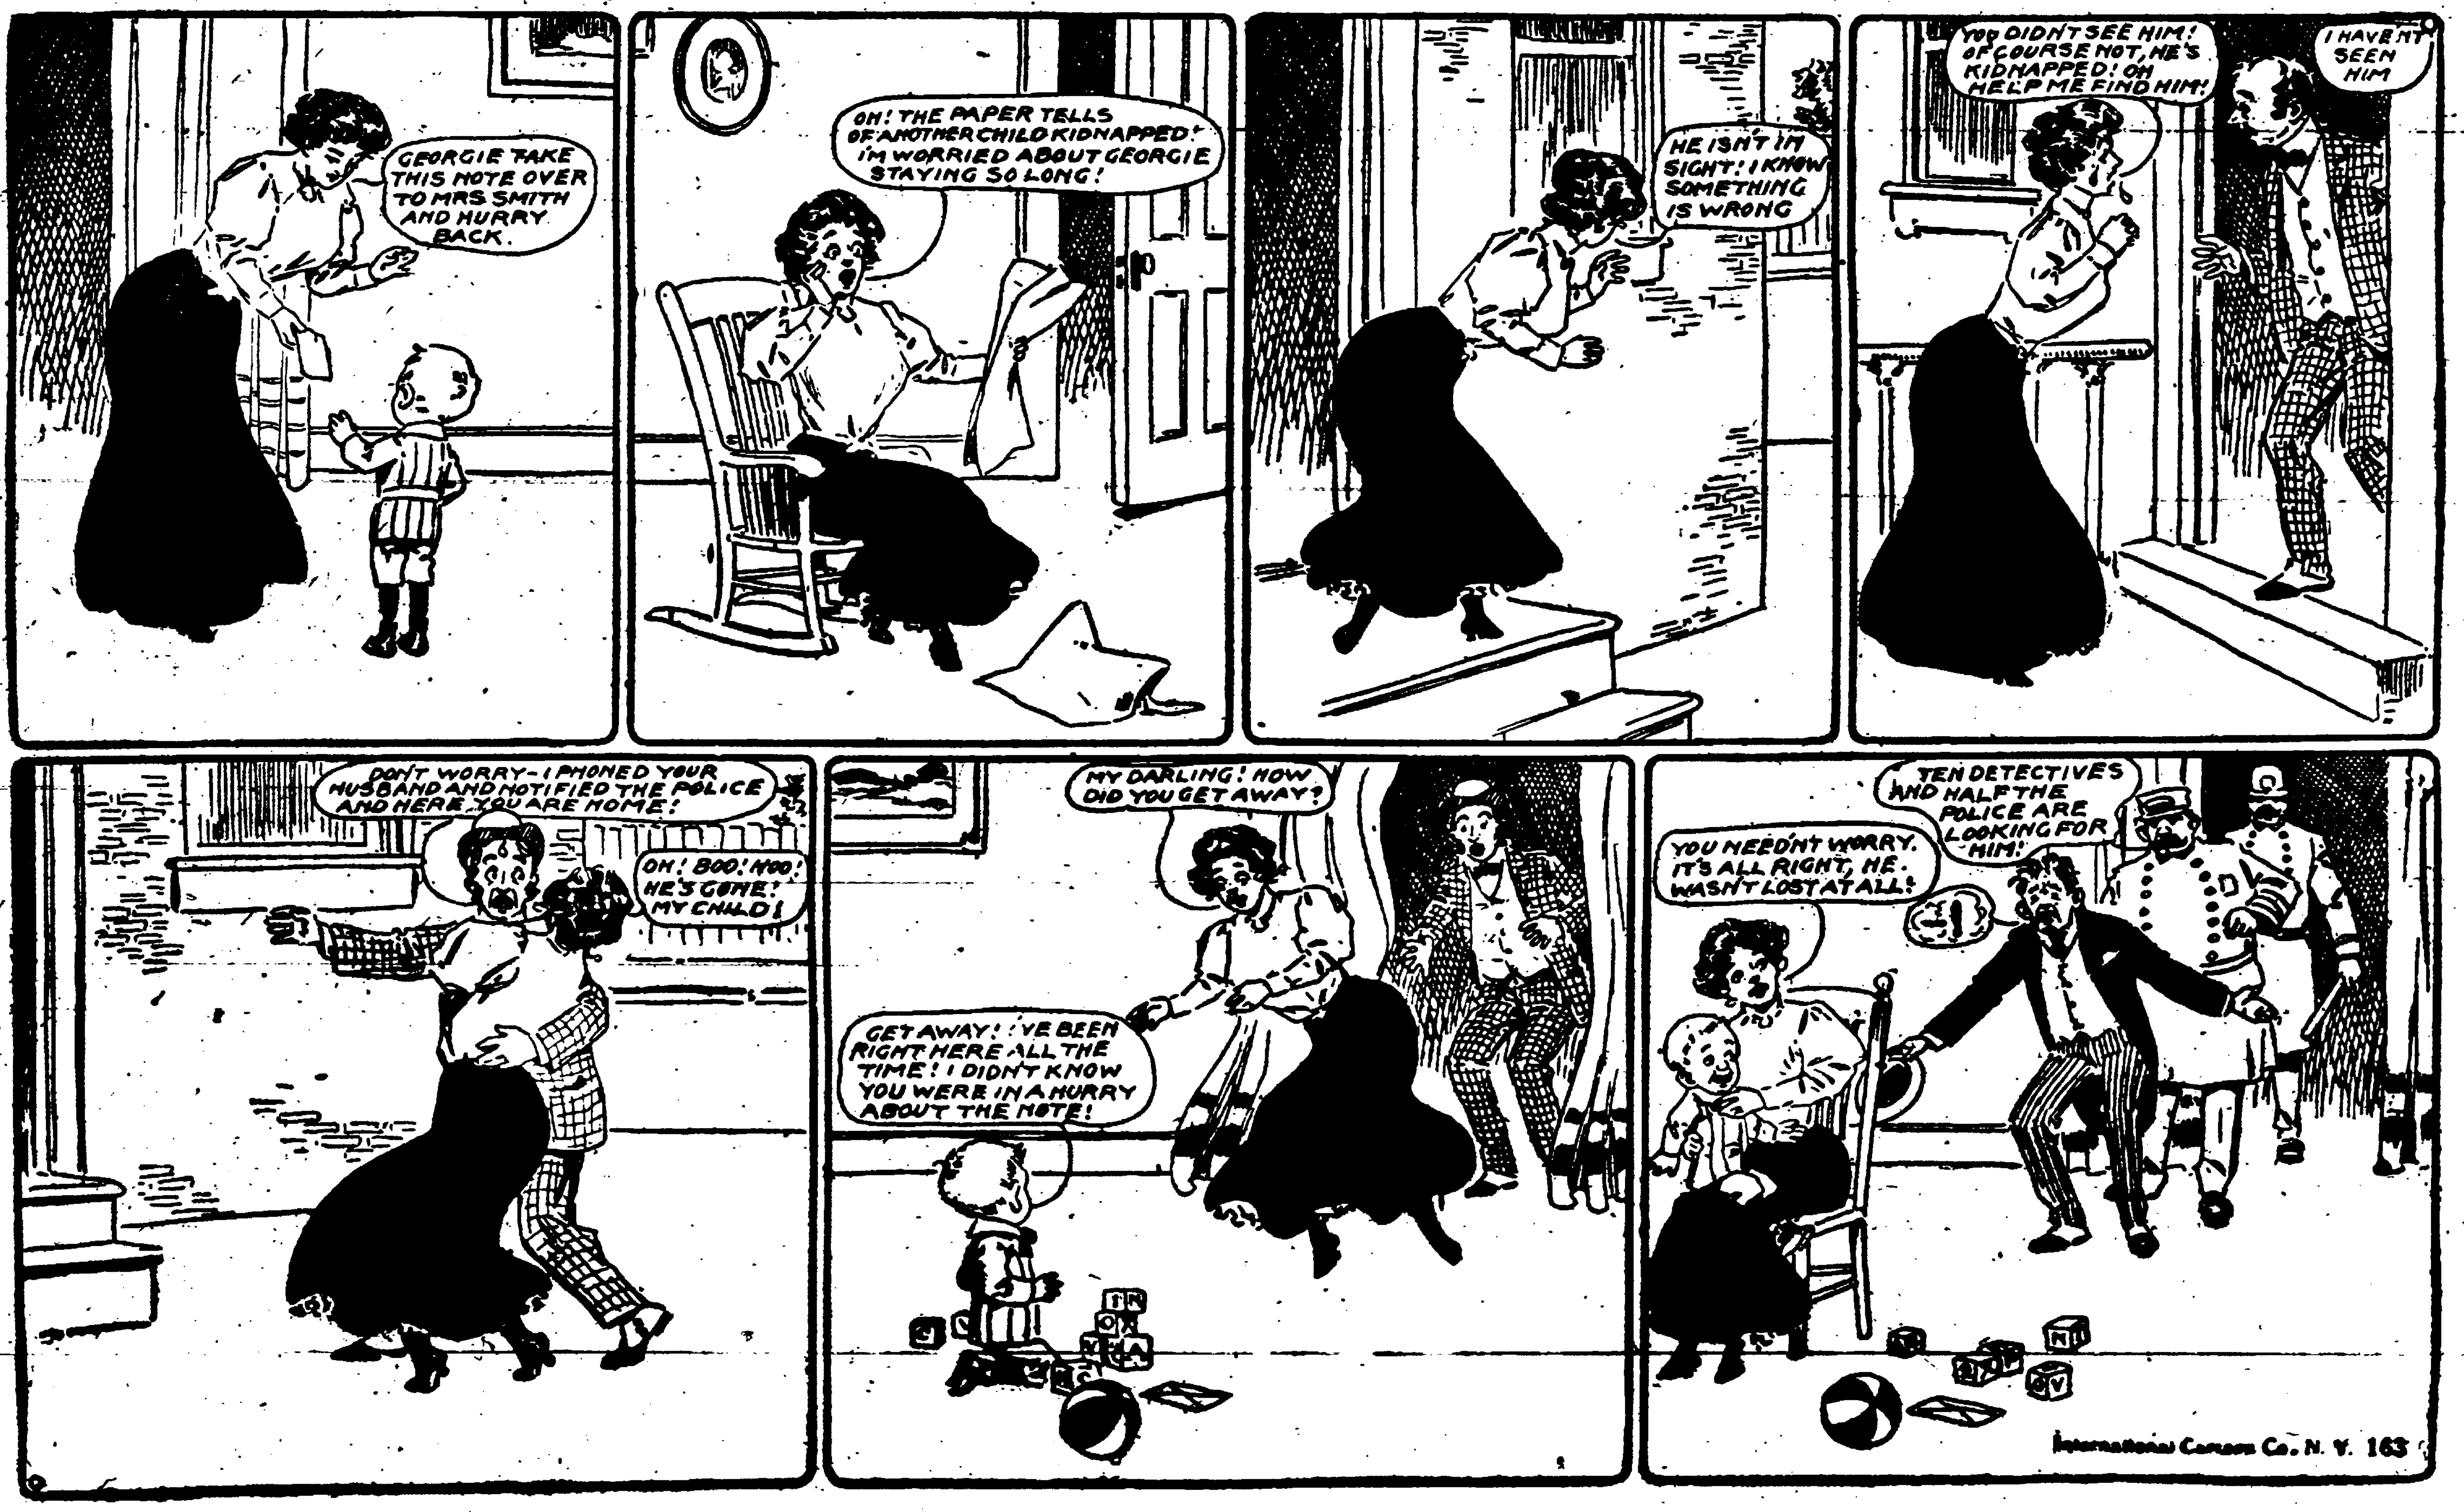
Japan's Jinrikisha.

Curiously enough, the inventor of Japan's famed jinrikisha was an American and a minister, the Rev. Jonathan Gable of Philadelphia. It is on record that he accompanied Commodore Perry on his epoch making trip to Japan in 1853, where he seems to have remained. At any rate, in 1859 he was requested by Prince Ito to draw the plan of a vehicle that could be used in the imperial park at Yokohama. He took his idea from a London bath chair, substituting a man for the small front wheel.

ENJOYMENT.

Why not enjoy the beauties of nature while you may? You were made for enjoyment, and the world was filled with things which you will enjoy unless you are too proud to be pleased by them or too grasping to care for what you cannot turn to other account than mere delight.—Ruskin.

MRS·WORRY: SHE WOULDN'T BE HAPPY IF SHE COULD



Band Concerts Meet With Mayor's Approval

When the City Council holds its regular meeting next Monday night, the matter of summer-band concerts will be one of the important subpects considered by the aldermen. Mayor Lewis today stated that he would request immediate action on the part of the council in the matter of band concerts, in order that the first concert might be given about July 1, if not before.

The council is limited by law to an appropriation of $300 for the concerts, and since the expense of each concert approximates $60, the city fund alone will pay for only five concerts. Last year seven concerts were given after the Chamber of Commerce and John W. Stevenson had donated the necessary funds. The council did not make any appropriation last year.

With Old Home Week coming in July and other extraordinary events planned for the summer months, it will be necessary to plan for more than eight concerts if the usual weekly concert is to be given.

Last year the concerts were held in different sections of the city each week in order that all sections might be equally favored. This year most of the east side concerts will probably be held on the Plaza and in East-Side Park, while the west side concerts will be given at Triangle Park and on West Broadway. Some arrangements may be made whereby the city can defray some of the expense of the concerts by the sale of ice-cream and other refreshments.

WOODMEN WILL TRY DROPS ON CHOCOLATES

The Modern Woodmen of America and the Chocolate Works baseball teams will cross bats tomorrow afternoon, at the old High School athletic field.

The Woodmen's pitcher has recently developed a new curve for the special benefit of the makers of sweets, which is known as the "Chocolate Drop."

And to reciprocate, the opponents have on hand a new one which they will endeavor to mystify the Woodmen team.

The game promises to be a very interesting one and should be heartily supported. Everyone is invited to attend.

JORDAN PLAYERS AND FANS COMING

Utola Tribe of Red Men will play the Jordan, N. Y., semi-professional baseball team on the Fair Grounds Sunday afternoon. The game will be called at 3:30 o'clock.

The Jordan team is one of the strongest semi-pro aggregations in this section of the state. Wright, a former Newark pitcher will do the mound work for the visitors, and Keegan and Conway, two former Syracuse University players will also appear in the Jordan line up. Meeker of the Syracuse New York State League team is another Jordan player well known to the locals fans.

The complete line up of the Red Men has not yet been decided. The team has gone to considerable expense in bringing the Jordan nine to this city, and it is hoped that a large crowd will turn out to attend the game.

MISS ROBBINS GIVEN A FAREWELL PARTY

Prior to her departure for this city, where she will make her future home, Miss Bertha Robbins, daughter of Mr. and Mrs. Dwight J. Robbins, was given a farewell dinner by several of her girl friends in Byesville, Ohio, Monday evening.

Miss Robbins will come to Fulton as soon as her father, who recently purchased this paper, closes negotiations for the purchase of a home here.

MRS. CHARITY G. CHRYSLER

Mrs. Charity G. Chrysler, 75, widow of the late Jacob Chrysler whose death occurred about seven years ago, died this morning at 63 North 3rd street.

Mrs. Chrysler was well known in this vicinity where she resided all her life. She was born in the Town of Volney and for many years lived in this city. She is survived by two brothers, Franklin Collins, of Mexico, N. Y.; Henry Collins of Naples, N. Y.; and two daughters, Mrs. Harriett Bond and Mrs. Fred Brown, both of this city; one sister, Mrs. Norris Miller of West 2nd street, and many neices and nephews.

The funeral will occur Monday.

GIVES AID TO BLIND

New Head of Ohio School For Years Has Helped Sightless.

HAS AN EXCEPTIONAL CAREER.

C. F. F. Campbell Sacrifices $2,000 Yearly to Accept an Opportunity to Continue Work—Much Is Expected From Him Because of His Many Achievements.

Columbus, O.—Charles F. F. Campbell, internationally known, has assumed his duties as superintendent of the State School For the Blind, to which office he was recently unanimously elected by the state board of administration to succeed H. C. Maurer, resigned. This came after he successfully completed nearly six years of executive secretaryship of the Ohio commission for the blind.

Mr. Campbell himself is also secretary of the commission, an unsalaried position, succeeding Edward G. Pease of Dayton, resigned. By virtue of being superintendent of the state school Mr. Campbell also is an ex officio member of the commission.

This arrangement made Mr. Campbell head of the juvenile work for the blind and also made it possible for him still to continue participation in the work for the adult blind. It is for this reason that he was willing to resign a $3,500 position for one paying $1,500. He said:

"It was not a question of seeking any particular position, but rather that of accepting the greatest opportunity in the United States to do the largest amount of good for the blind in any state."

Mr. Campbell has had an exceptional career as a worker in the interests of the blind. He is the son of the late

CHARLES F. F. CAMPBELL.

Sir Francis Campbell, founder and for forty years director of the Royal Normal College and Academy of Music For the Blind at London.

The son received his kindergarten and grammar school education side by side with blind pupils. After graduation from the Massachusetts Institute of Technology in 1901 he took a course in pedagogy and music in the University of Leipsic. He then became an instructor in his father's school and has given his life to the blind, serving with the New York and Pennsylvania commissions.

In 1903 Mr. Campbell was asked to organize the first state association for promoting the interests of the blind in America. The following year he opened what he called an "experiment station for the trade training of the blind." In this interesting place he discovered some new industries for the blind, which today are being followed by the sightless in most of the states. During this time—in fact, before graduating from Boston "tech"—he had begun giving illustrated lectures to show how the blind can become more useful citizens in the economic world. One of the chief objects of these lectures, which took him all over Massachusetts and sometimes into Maine and New York, was to arouse the public to the necessity for creating some practical agency for aiding that considerable group of the blind who lose their sight in adult life.

Unquestionably Mr. Campbell's efforts were largely responsible for the establishment in 1906 of the first permanent state commission for the blind, and not unnaturally he was given an important position with the Massachusetts commission.

In 1910 the Pennsylvania Association For the Blind, with headquarters in Pittsburgh, was established, and Mr. Campbell was asked to start the work. Inside of eighteen months the Ohio state commission for the blind urged him to come to Ohio to reorganize its work. When he arrived in October, 1911, the annual budget was less than $3,000. At the end of 1915 he increased it to $90,000, including the sales of the work of the blind. As the result of this kind of work many predict that he will quickly bring his institution up to the same standard of efficiency that he has achieved with other organizations with which he has been connected.

One Cent For Smashed Nose.

Memphis, Tenn.—A jury has decided that 1 cent was damages enough for having a fellow's nose smashed in a fight and awarded a verdict in favor of George Holland against T. P. Nugent. He asked for $2,500 as damages.

CITY COURT NOTES.

In City Court this morning, Harry G. Scudder obtained judgment over Victor Bennet by default, for a bill amounting to $32.97 and costs totaling $5.45.

* * *

The Detroit Scale company in an action against Angela Cannaro was awarded a verdict of $64.96 damages and $6.40 costs. This case also went by default.

THE QUIRK TO-DAY.

The noblest and bloodiest pages in history owe their authorship to the influence of good or evil women and it was with this mighty power in mind that the author of "A Woman's Power" conceived the thrilling and dramatic story to be presented under that title by the World Film Corporation with Miss Mollie King as the star at the Quirk today.

TELEGRAPHERS DECIDE ON STRIKE TO-DAY

New York—Demands for an immediate strike against the Western Union Company were renewed yesterday at the Convention of Commercial Telegraphers. The matter finally was disposed of, for the day, by a vote to appoint a committee of five, with power to act, to determine the question of a strike after consultation with the new officers.

The new officials of the International Union will be elected to-day. Nominations will be made at the opening of the session this morning. The election will be completed before the close of the afternoon session.

Roland B. Mahany, Federal conciliator, told the convention of a telephone message he received yesterday from William H. O'Brien, chief of the telephone and telegraph department of the Massachusetts Public Service Commission.

Crushing Indifference.

"You don't love me any more," said young Mrs. Dubson, weeping copiously.

"What's wrong, my dear?" asked Mr. Dubson anxiously. "What makes you think I don't love you any more?"

"Last night I pretended to be talking in my sleep, and you didn't even stay awake to listen."—Birmingham Age-Herald.

BIG MEN BEHIND AIR NITRATE COMPANY

New York—L'air liquide, the liquid oxygen and liquid nitrogen produced from the air by a process invented by the French chemist, Georges Claude, and said to have been used by the Germans as their own invention in procuring basic products for explosives, is to be manufactured in this country in large quantities by a company which has purchased the American rights to the French patents and has been launched by men of wealth and standing.

The enterprise has been incorporated in this state as the Air Reduction Company with a capitalization of $2,500,000 preferred stock and 35,000 shares of common of no par value. Its largest stockhelder is Percy A. Rockefeller, son of William Rockefeller and most enterprising of the younger generation of the Standard Oil families. Associated with him on the board of directors are Lorenzo Semple, counsel for the French government and for many French corporations; R. C. Pruyn, president of the National Commercial Bank of Albany; W. T. P. Hollingsworth, for many years manager of the Westinghouse interests in Europe; Paul Delorme and M. Deschieres of France and Walter Birge of St. Louis.

40,000 MEN INVOLVED IN RAILROAD DISPUTE

New York—Representatives of employers and employes of the railroads met yesterday for the first of a series of conferences over questions of wages and hours of labor. More than 400,000 men are involved in the proceedings, and wage increases which, it is claimed, would amount to $100,000,000 a year.

The occasion was the opening of the joint convention of the four big railroad brotherhoods. Of 800 elected delegates 350 gathered in the auditorium of the Engineering Society. No. 25 West Thirty-ninth street, for the opening session, which began at 10 o'clock yesterday morning.

W. S. Stone is president of the Brotherhood of Railway Engineers, A. B. Garretson of the Order of Railway Conductors, W. S. Carter, of the Brotherhood of Locomotive Firemen, and W. G. Lee of the Brotherhood of Railway Trainmen.

The demands of the four organizations are for an eight-hour day, with time and a half for all, with the same pay for eight hours which now is received for the ten-hour day. Officials of the four brotherhoods declared arbitration would not be welcomed by the unions. It would, it was said, most probably result in a compromise which would satisfy neither side, leaving the real struggle to be fought out later between the employers and organized employees.

20 YEAR OLD GIRL LEADS MEN JUDGES

Devon, Pa.—A twenty year old girl from the eastern shore of Maryland, whose parents are raising her to be a "farmer," to-day proved to be the best judge of horseflesh among the veterinary students from the University of Pennsylvania, Delaware, Pennsylvania State College, Rutgers and Williamson Trade School. She is Miss Ruth Clendaniel, daughter of George Clendaniel, a farmer of Still Pond, Md., and she blushed a more rosy hue than the reddest of sunshades as the judges handed her the prize.

Miss Clendaniel triumphed over mere men in one of the novelty classes at the Devon Horse Show. She is taking a course in agriculture in the Women's College affiliated with Delaware College, at Newark, Del., and was chaperoned by Mary A. Rich, professor of education at the Delaware institution. She was the only woman in the competition, and so accurate was her judgment of conformation, quality, substance and condition of model saddle horses shown that the judges—William Du Pont, Wilmington, and J. Garner West, Garnessville, N. Y.—with no hesitancy, corroborated her decision.

"What I know about horses I picked up on papa's farm down in Maryland," said Miss Clendaniel, while vanquished embryonic veterinarians from the larger schools doffed their hats to their conqueror.

WATER ENERGY TO BE MANUFACTURED

Waterloo—The villages of Waterloo and Seneca Falls, the two largest in the county, have often been referred to as "the power villages" a name that will be more strongly impressed on the minds of the people in days not far away. In the Town of Waterloo is now developed 2,500 electrical horse power 24 hours of the day while practically all the gas consumed in Geneva, Waterloo, Seneca Falls, Auburn, Palmyra, Lyons, Phelps and other Central New York cities and villages is manufactured here.

CHICKEN CASE MAY GO HIGHER

Judge Wilson Decides in Favor of Plaintiff--Hens Returned to Original Owner

The famous Kelley--Dunham chicken case, which has been the chief topic of discussion for the past two weeks among the residents of the Third Ward has finally been settled and all is once more serene along the Oswego river. Yesterday, in City Court, Judge Wilson decided in favor of Roy Kelley, the plaintiff in the action, and awarded him the possession of the chickens in question, or their equivalent value, placed at $10. Wilbur Dunham, the defendant will probably appeal the case.

The famous case, which bid fair to divide the Third Ward into two rival factions, began about three weeks ago, when Kelley went to look over his coterie of egg-producers and found that seven of his finest pedigreed hens were not preseant at the roll-call. After a little sleuthing he discovered them in the neighboring pen of Dunham, and when he asked the reason for the change in residence, Dunham told him that Mrs. Kelley had sold him the chickens for $10.

Kelley immediately brought civil action against Dunham for the possession of the chickens, and the case came to trial before Judge Wilson April 23.

At the trial, Mrs. Kelley testified that she was not living with her husband, and that he had written her a letter just before she sold the chickens, telling her she must vacate the house in which she lived and authorizing her to sell all articles on the premises, with certain exceptions. He did not mention the chickens in the list of exceptions, and Mrs. Kelley sold them to Dunham, receiving a ten dollar bill in payment.

Kelley's attorney, Hubert L. Gilman, argued that Dunham knew the chickens were Kelley's property, and that Mrs. Kelley had no right to sell them, as they were not kept on the premises occupied by Mrs. Kelley, but in a barn next door.

Judge Wilson reserved decision until yesterday when he awarded the chickens to Kelley, and also ordered Dunham to pay the costs of the trial, amounting to $6.95.

Therefore, by the process of simple addition, Dunham is out the $10 he paid for the chickens, $6.95 costs—and the chickens. The chickens were reported in good health this morning, but none of them would make any statement concerning the case.

MISCELLANEOUS WANTS

Rate—1c. a word each time. Minimum Charge 10c.

ABOUT THE TOWN

After the parade which will mark the closing of the Mayors' convention in Syracuse to-day, most of the delegates will motor to South Bay where they will enjoy a shore dinner. Mayor Lewis will entertain the executive members of the Fulton administration at the resort, and the party will make the trip in the Mayor's car.

* * *

Several Fultonians will go to Oswego to-night to attend the Junior Prom at the Oswego Normal school. The dance will begin at seven o'clock and will conclude at 11:30.

* * *

Dr. Harriet M. Doane, of this city, accompanied by Mrs. J. S. Stevenson of Hannibal, will leave Monday for Chicago to attend the Republican National Convention. After a short trip to Winona, Minn., they will go to the Democratic Convention at St. Louis. Both women are prominent suffragettes, and Mr. Doane was once a candidate for coroner of this county.

* * *

Wilson and Scott have announced a reduction of rates on the Hannibal-Fulton bus line. The new rates will become effective June 5, and on that date a night bus service between this city and Hannibal will be inaugurated, the bus leaving Fulton at 11 o'clock every night.

* * *

When the sewer bonds amounting to $67,500 were issued by the village of Fulton in 1896, just twenty years ago, Thomas D. Lewis was president of the village, and W. P. Hillick was village clerk.

This year, when the bonds fall due, Victor C. Lewis, son of Thomas D. is mayor of the city, and W. S. Hillick, son of W. P. Hillick is city attorney.

"The sins of the fathers, etc."

* * *

Just an instance of the support accorded a local institution. When a Fulton company facing a long strike, decides to hire new men, they choose the columns of the Syracuse papers for their advertising. And to cap the climax, in one of the papers, directly under the advertisement, appears a story of the strike, which describes working and sanitary conditions in such a manner that the chance of anyone paying any attention to the advertisement are reduced to a minimum.

NORTH VOLNEY

The Ladies' Aid Society will meet at the church parlors on Wednesday, June 7th. Everybody cordially invited. Supper will be served.

* * *

Preaching services will be held here as usual on Sunday at 2 p. m.

* * *

The funeral services of Mrs. Martha Looker were held at the home of her great-granddaughter, Mrs. Delos VanWormer, on Sunday. Burial in Mt. Pleasant cemetery.

* * *

Mr. and Mrs. Ira Baker and son, Clayton, Syracuse, spent from Sunday until Tuesday with their aunt, Mrs. H. L. Bowen.

* * *

Mr. and Mrs. Jay Baker and son, of Syracuse, spent Tuesday with their aunt, Mrs. H. L. Bowen.

* * *

Mr. and Mrs. Arthur Rogers and Miss Grace Analds, Oswego, spent Sunday with Mrs. Roger's aunt, Mrs. Mary Wilbur.

* * *

Charles Sikes, Oswego, spent a few days this week with his mother, Mrs. G. B. Cook.

* * *

Miss Goldie Sikes, Fulton, spent Decoration Day at the home of her parents, Mr. and Mrs. Byron Sikes.

* * *

Mrs. Jennie Carr and daughter, Mrs. Arthur Vandish, Oswego, and Mrs. Frank McDougall, Svriba, were in town on Sunday. They spent some time at the home of their mother, the late Mrs. Betsy Wright.

* * *

Mrs. Addie Keller, Fulton, spent spent Tuesday with her daughter, Mrs. Arvin Sikes.

* * *

Miss Bertha Druce, teacher of the North school, closes her school next week Wednesday, June 7th.

* * *

Miss Grace Hull is spending a week with her cousin, Mrs. Edward Buell, Fulton.

* * *

Mr. and Mrs. Burton Whitney, Henderson, are spending a week with relatives in New Haven and with Mrs. Whitney's parents here, Mr. and Mrs. John Cunningham.

* * *

The friends of Roy Davis will be glad to learn that his ship is stationed at Vera Cruz, Mexico. His time in the navy expire in October.

* * *

Arthur Vandish, who married Mr. Davis's sister, Miss Leah Davis, and who is a nurse in the army, is stationed with his regiment in Texa.

MOUNT PLEASANT.

The W. F. M. S. will meet with Mrs. Byron Distin Wednesday, June 7th. Supper will be served by Mrs. O. Cole, chairman; assisted by Mrs. J. W. Distin, Mrs. DeLos Distin, Mrs. Edward Grant, and Mrs. Allan Osborne.

* * *

Enos Lamb has accepted a position in Canada in a creamery.

* * *

Mr. and Mrs. George Glinan and son, Charles, were guests at Charles and Ernest Rowlie's last week.

* * *

Mrs. Arthur Paige entertained two of her aunts from Fulton, Sunday and Monday.

PARTIAL PAYMENT PLAN MEANS INTEREST IS COMPOUNDED QUARTERLY

By S. L. FOSTER

Chief Electrician, United Railroads of San Francisco, San Francisco, Cal.

All money earners are urged to save as much as possible and to invest these savings so that their money will work for them. Rockefeller said, "Save your pennies. Make your money work for you." Carnegie said, "Savings the first thousand dollars is the hardest thousand to save."

When saved, money can easily be made to earn simple interest. If it can be made to earn compound interest, that is a step in advance. Money deposited in a savings bank will earn from 3 1-2 to 4 per cent. compounded semi-annually.

There are many safe securities that can be bought to yield six per cent. and which pay quarterly dividends. The usual interest paid on unpaid balances when buying securities on the Partial Payments Plan is six per cent. also. As all accruing dividends are credited, the net result of quarterly dividends, omitting the broker's commission which is so small as to be negligible, practically amounts to quarterly interest paid on the amount so far advanced on the security by the purchaser, and the gain by buying six per cent. securities on the Partial Payment Plan is that the savings are earning six per cent. interest compounded quarterly, which is about the limit of safe investment for savings.

For example: Ten shares of six per cent. preferred stock bought at par under the Partial Payment Plan call for $200 down, require 6 per cent. per month interest to be paid on the unpaid balance of $800 or $12 per quarter. When quarterly dividends of $15 are received by the broker and credited to the purchase of the security, there remains $3 more than the $12 interest due, and this $3 can be considered as interest on $200 for three months or exactly 6 per cent. This $3 deducted from the unpaid balance reduces that balance, and on the principle that "a penny saved is a penny earned," this $3 really amounts to compound quarterly interest on the money saved and invested on the Partial Payment Plan.

There are many preferred stocks with a long, unbroken history of continuous dividends and with a wide margin between net earnings and dividend requirements that even under the present high prices yield 6 per cent. and over.

What regular monthly savings will amount to at the end of twenty years if invested on the Partial Payment Plan in securities yielding 6 per cent. and paying quarterly dividends or compounding quarterly, can be found by multiplying the dollars saved per month by 462.7.

For example: $25 invested per month on this plan will amount in twenty years to $11,554, of which $6,000 represents the total of these $25 monthly savings and $5,554 is the accumulation or result of "making your money work for you"—a total yield of over 90 per cent. on the savings—without further effort on the saver's part.

MUST RUN TO AVOID KILLING.

Court Rules It's Murder to Stand When Life Is Threatened.

Trenton, N. J.—In an opinion filed here recently by Chief Justice Gummere sustaining a conviction of murder in the second degree the supreme court says:

"A person upon whom an assault is made so violent in its character as to endanger his life or threatens him with serious bodily harm is not justified or excusable in standing his ground and killing his assailant if he can avoid the impending danger by retreating."

The case was that of Nunzio di Maria of Harrison, who was sentenced to from twenty to thirty years in prison for shooting Frank Barber.

The charge of the trial court to the jury regarding the law of self defense was the only ground for reversal of the conviction. The instruction objected to was that the defendant had a right to save his own life.

SHIPS DOG FOR TREATMENT.

Injured Pet Sent Halfway Across Continent to Surgeon.

Milwaukee, Wis.—Struck by an automobile in a Los Angeles street, a pet house dog belonging to Charles Dyer was shipped to Milwaukee by express to be treated because the Dyer family insisted on having their family dog surgeon care for the pet.

Dr. E. M. Sullivan, who had the dog under his care, had him around again in about a week's time. A telegram from Mr. Dyer preceded the arrival of the dog. "He will not take a prize at the kennel show," said the message, "but he is one of the family."

17 SENIORS UNKISSED.

Class President Says They Are Crosses Between Heroes and Darned Fools.

Muskogee, Okla.—Of the thirty-five boy members of the senior class of Central high school in this city seventeen admit they have never kissed or been kissed.

Thomas Leech, president of the class, is not one of them. "As president of the class," he said, "I consider that the unkissed reflect great glory upon the seniors and upon Central high. As a man, speaking unofficially, I say I think they are darned fools or perhaps martyrs. That is what a martyr is anyhow—a cross between a hero and a darned fool."

The girl members of the class are, to put it mildly, astonished at the revelation. One of them declared that she was "for starting a campaign for the benefit of the seventeen," and that, if necessary, she was perfectly willing to undertake the whole task by herself.

FINDS DIAMOND IN TOBACCO.

Railroad Engineer Discovers Gem In Tin of the Weed.

St. Mary's, Pa.—Patrick Fehley, an engineer on the Pennsylvania railroad, stationed here, considers himself a very lucky individual.

A few days ago he bought a ten cent tin of tobacco. While replenishing his pipe he was surprised to see a ring imbedded in the weed, and examination proved it to contain a setting which looked suspiciously like a diamond. He took his find to a jeweler, who appraised the stone to be worth at least $50.

Days You'll Never Forget

NEUTRALS' TASK.

Problems For Scandinavia Multiply as War Drags On.

HOPE IN NEW CONFERENCE.

Officials of Norway, Sweden and Denmark, However, Feel That They Have Yet to Deal With Real Crises of Conflict—Rumors of Sinister Intentions Are Active.

Copenhagen, Denmark.—Although no official statement has been made as to the detailed deliberations of the conference of Scandinavian premiers and foreign ministers recently held here, the meeting itself seems to have wrought a noticeable feeling of relief in the three neutral nations of the north, and there is without doubt just a little more confidence that these countries will be able to fight their way through the difficulties of the war without being drawn into the hostilities.

The position of the Scandinavian countries—Denmark, Norway and Sweden—has been more or less a delicate one ever since the war began. With each day that the fighting continues the problems of commerce and diplomacy multiply.

For almost two years each of the three countries has been dealing individually with the problems of war. There had been no thorough exchange of views since the gathering of the

Photo by American Press Association.

KING GUSTAVE OF SWEDEN.

Scandinavian kings at Malmo in December, 1914, when the neutrality of the north formally was proclaimed. There was perhaps just a little feeling of uneasiness, attributable to a lack of counsel, when King Gustave of Sweden suggested the conference which was recently held here.

Officials of the three governments feel that, difficult and complex as has been the situation in the past, they have yet to deal with the real crises of the war. It is realized here that before peace possibly can bring an end to hostilities the situation on one side or the other must be far more desperate than it is today.

Ever so often there spreads over Scandinavia the report that Germany intends eventually to "seize" Denmark. Of course these reports seldom get beyond word of mouth—travelers returning from Germany assure their friends they heard the news from reliable sources—and consequently they do not call for official or other denials.

On the other hand, there comes just as often from Sweden or Norway the report that England, with a prolonged stress of war, would eventually shut off all supplies from the Scandinavian countries as the one sure method of stopping "leaks" to Germany and Austria. England has trade agreements with Norway and Denmark, however, which seem to be working in a satisfactory manner.

The wholly unauthenticated rumors as to the sinister intentions of the opposing belligerents are set aside, of course, as worthless. They would be completely dismissed if it were not for the ever increasing fear that there may be two or three years more of fighting. The complications that these years would bring about, the effect of the long drawn out struggle upon the belligerents and the constant encroachments upon neutral rights are looked forward to with anything but quietude.

In connection with the conference the general feeling here was that Swedish sentiment favored a more aggressive attitude by the northern states toward the belligerents. This tendency in Sweden already had been shown, it was said, by her strong protests to Great Britain against the action of that government in holding up and confiscating much of the parcel post passing between Sweden and the United States. This was followed by Sweden's act of retaliation in stopping all parcel post between England and Russia.

Norway and Denmark, on the other hand, feel that, bad as the situation is with respect to shipping, it might still be worse.

In considering the attitudes of the Scandinavian countries it must be borne in mind that in Norway and Denmark public sentiment greatly favors the allies, while in Sweden the majority sentiment appears to be pro-German. There are close ties of kinship between the reigning families of the two former countries and the royal family in England.

Paul Revere.

Paul Revere's memory will always be honored because of the warning he carried to the patriots at Lexington and Concord, but that was by no means his only service to the colonies. He was one of the prime movers in the Boston tea party and also engaged in what proved an unsuccessful expedition against the British post on the Penobscot in 1779. In private life Revere was a copper plate engraver and an artist. He made many caricatures illustrative of pre-Revolutionary topics, printed the provincial paper money of Massachusetts in 1775 and in the same year built a mill for the manufacture of gunpowder.

Clove Trees.

Twenty pounds of cloves a year are produced by an average ten-year-old tree.

SILVERWARE IN MAN'S STOMACH A MYSTERY

Removal of Forks and Spoon Baffles Surgeons of Stockton—Believed He Swallowed Them When Delirious.

Stockton, Cal.—Surgeons have removed two regulation sized silver forks and a teaspoon from the stomach of Richard Williams, who formerly conducted a clothing store in this city. Removal of the silverware solved the mystery of an ailment from which Williams had suffered for about two years.

It is thought that Williams swallowed the cutlery when delirious. A year ago a surgeon operated upon him and opened an abscess which had formed in the posterior part of the stomach, evidently caused by one of the tines sticking into the tissue. Recently the surgeon made an X ray of the man's stomach and discovered the silverware. The operation was the result.

In addition to removing the forks and spoon the abscess made it necessary to make a new opening from the stomach into the duodenum. If no infection sets in Williams is expected to recover. The walls of the stomach were thick and leathery from being much inflamed.

WAR OF "COLONELS" THREATENS GEORGIA

Real Ones Are Up In Arms Against Use of Complimentary Title in That State.

Atlanta, Ga.—A new order of things has come in Georgia and with it no less startling a radicalism than an attempt to restrict the title of "Colonel," which for generations has been an institution. Those called "Colonel" rightfully have risen in protest against the designation being applied to any one who is not justly entitled to it, and men who have been addressed as "Colonel" unchallenged for many years are up in arms against this attempt to deprive them of their "birthright."

The fight waxes warm, and the end is not in sight, for there is no way to prevent a man being called "Colonel" if his friends and the admiring public choose so to address him. Meanwhile newspapers are being besieged with communications from real "colonels" asking that the news staffs use discretion in the use of the title. All the while "pieces for the paper" concerning pseudo "colonels" reach the editors.

It is likely that Georgia has more "colonels" than any other state. In addition to the real colonels who have survived the civil war and the Spanish American war and the colonels active and retired of the national guard and regular army, it has been the custom of governors for time immemorial to appoint upon entering office a staff of prominent men in all parts of the state with the title of "colonel."

SAVED HUSBAND'S LIFE.

Woman Was Going to Have Him Arrested, but Changed Her Mind.

Dagsboro, Del.—Instead of bringing an officer to arrest her husband for beating her, Mrs. John Burton of near Omar hurried back with a physician when she learned that during her absence he had attempted to commit suicide.

Burton and his wife had trouble, and in the fight the wife declares that Burton kicked and choked her badly. She hitched up the horse and drove to Dagsboro to have her husband arrested when she was greeted with a call to the telephone shortly after she had arrived. It was a neighbor to tell her that Burton had just swallowed a quantity of concentrated lye and was at the point of death.

Securing a physician, the woman raced the horse back and arrived in time to save the husband's life.

COURT UPHOLDS MULE.

Kicking Justifiable After Licking, Kentucky Tribunal Rules.

Frankfort, Ky.—"The kicking propensity of a mule is a matter of common knowledge," held the court of appeals here in reversing a verdict of $500 damages awarded J. M. Pratt against the Consolidated Coal company. From the testimony it appeared that Pratt, an employee of the company, was kicked by a mule when he struck the animal with a whip as he stooped behind it.

"The mule would have been untrue to itself and false to every tradition of its breed if it had kept its heels on the ground," said the court, "and an employee cannot court danger by inviting a mule to kick him and then recover for consequent injuries."

FELT SAFE IN JAIL.

Man With $1,000 Applied For Lodging at Ballston Spa.

Ballston Spa, N. Y. — Undersheriff James Betts had the surprise of his life when Peter Turton applied at the county jail for lodging and handed over $1,000 and securities for safe keeping. Turton insisted on staying in jail overnight and agreed to be arraigned as a prisoner in the police court in the morning.

Turton said he was afraid to stay at hotels for fear of being robbed. In court Magistrate Groat allowed him to go without exacting a fine from the "roll" of which Undersheriff Betts was guardian.

WOMAN'S PART IN BIG CONVENTIONS

Assemblages Are Complete Picture of Composite America.

ARE NOT MERELY POLITICAL

No Other Gathering Can Show Real Uncle Sam Like These—Headquarters of Various State Delegations Are Meeting Places For Friends From Every State.

To the traveler who happens into a city where one of our big national conventions is being held, or to any one making his first pilgrimage to one of these affairs, there is much of interest to be observed in addition to the politicians themselves. There are no gatherings like them. Religious bodies and nonreligious organizations with a country wide membership may hold interesting meetings that draw together folks from the two oceans, the north and the south, but it takes a national convention of one or the other of the two great parties to present a composite picture of Uncle Sam, a picture which once seen is never forgotten.

He begins to pour into a convention town long before the real show begins, does this composite American. He brings with him the costume characteristic of his community and of his particular section under the flag. You can tell him frequently by his clothes, the big hat of the plains or the more conventional attire of the east. Bankers mix with the boys from the range, men from the south with men from the north, and to what this composite American was in the past have been added the swarthy features of the Philippines, Hawaii and Porto Rico. When he comes in all his glory once every four years to help in naming a man for president he almost always brings his women folk with him.

Women's Active Part.

The women one sees at these great shows are just as interesting as the men; also they are just as interested as the men in what is going on. They stand around and talk in hotel corridors; they parade the streets wearing badges; they wave flags in restaurants for their particular candidates. They are part and parcel of America's biggest show. The typical woman of the convention is out for votes for men or some particular man whom her husband or brother favors. She visits the headquarters of other delegations, where she meets the women of other states, and she urges them to urge their husbands and brothers to come out for the man her husband favors. She does this when her husband is busy with the men either at the convention hall or in the turbulent hotel corridors. But there are times when the two are seen together sightseeing and having the time of their lives.

The state headquarters afford perhaps more joy to the women of a convention than to the men. The political purpose of these headquarters is obvious, but really not a great deal goes on at them most of the time that has to do with politics. But as calling places, as bureaus of information, as exchanges for news of sons and daughters who have shifted abodes and as general state boosting bureaus they are one of the unique institutions which a convention brings forth.

One has not done a convention properly until he has made the round of these headquarters. The women have done most of the decorating, and it's a matter of state pride with them. Californians fill their rooms with a sort of pure food show. On tables they lay out those fairy fruits for which their state is famous, and you have only to enter to eat. Kansas brings her golden grains and her wheat, and so it goes. The conservative eastern states do not go into the thing in this way, and their headquarters don't begin to be as interesting.

Social Meetings Too.

At these headquarters, usually consisting of a suit of several rooms, social meetings take place entirely apart from politics, the women wear their prettiest gowns, and you go away declaring that you never saw anything lovelier than "those girls from Texas," only to enter another headquarters and be overwhelmed by a bevy of beauties from the far northwest. If you come from the east you want to travel home with all of them and see what these homes in that faraway country are like.

A convention thus is more than a political gathering. It enables the American to rub elbows with himself. The lobbies of the principal hotels for a week are places for the exchange of general information, for crop news, real estate values, all that make up the merits of one state or one section as compared with another. And these hotel corridors are great sights in themselves. Hundreds of men and women are packed in like sardines at times, so that you can't move around, and all are talking. To the man who doesn't know it looks as though the real work of the convention was being done right there, but it isn't. There are quiet rooms on the floors above all this hubbub where that work is being done, and this scene downstairs is merely a sort of reaction.

Psychological Puzzle.

Girls know more about onions but less about other vegetables and flowers than boys, Kansas college reports after examination of class in gardening.

A Reunion

By BARBARA PHIPPS

I was a very little girl at the time, but a great sorrow or a great happiness will impress itself on the mind of a very young child so strongly that it will never be forgotten. Mother died, and my brother Jimmie was taken away by a lady, while I was placed in an orphan asylum.

However, this lugubrious beginning was the harbinger of a life of ease and comfort. In time I was adopted by a wealthy couple and treated as affectionately, as much lavished upon me, as if I had been their real daughter. I was given a liberal education and as many accomplishments as I had a fitness for. Then I was "brought out" in the most approved fashion and entered society as a young lady.

One summer a girl friend of mine, the daughter of Major Shelbourne of the army, invited me to visit her at her father's post in what was then Indian country. I had seen enough of society to tell me of its hollowness, insincerity, selfishness and bargain and sale in the matter of favor, and it occurred to me that I would find something more satisfying in one of those army posts that had been described to me as constituting a large family. I went to Fort Tomkins and found things very much as they had been described to me.

One day several of the younger officers and the daughters of the older ones went on a picnic. I learned before starting that the major commander objected to our going, but I did not hear why. I learned soon enough, to my cost. The Indians had for some time been very unruly, and while we were leaving the fort they were leaving their reservation, murdering and pilfering as they proceeded.

We had gone to a stream at the foot of a mountain range wooded on its banks and, entering a spot well shaded, had partaken of our luncheon when a soldier rode up and told us that he had been sent to inform us of the Indian situation and that we must return immediately. But before we could collect our paraphernalia and get into the mule wagon that had brought us one of the party saw several Indians riding hard to cut us off.

The major had sent six mounted men with us for our protection. There were three lieutenants and the man who had come to warn us. The officers held a quick consultation and decided to ascend a ravine in the mountain where we could the better defend ourselves and not attempt at once to reach the fort. The ravine lay but a short distance on the other side of the stream, which we crossed in the wagon and were soon in a position where we could hide behind rocks, which also furnished a defense from which to fire.

I shall only speak of our defense by a few brave men against several times their number of Indians so far as to show that the soldiers fought skillfully and with sufficient knowledge of Indian warfare to keep the savages at bay. One of the men being severely wounded, I took up his carbine and, climbing to a rock higher up and at the side, where I saw Indians trying to get around us, endeavored to pick them off. I was followed by one of the privates, who told me that I should take more care to conceal my person or I would be hit. I didn't ask him why he had come to help me, supposing that he saw the danger of being taken in the rear as I had seen it.

We two kept widening the distance between us and our party, because the Indians kept circling to the side in an effort to get past us to our rear. Then suddenly we saw an Indian between us and our friends.

I saw by the expression on the soldier's face that we were in terrible danger. He swept his eye about us for a position of defense and found one in a crevice between two rocks where we could not be attacked except from the front. Another rock formed a rampart before a part of the space into which we retreated. My companion told me to crouch down behind this rock. I refused till he told me that I could shoot from there, and at the same time he took a position beside me.

It seemed half a day—it may have been an hour—that we defended ourselves from the Indians who endeavored to kill or capture us. My companion laid low a number of them. I fired at several, but hit only one—that is, so far as I knew. After awhile we saw across the level plain a troop of cavalry coming from the fort, and the Indians scurried away.

My life had been saved by the private who had followed me. Together we returned to the party, and he received the thanks of the officers for what he had done.

Well, as soon as we returned to the camp I made inquiries concerning my deliverer. The major sent for him, saying to him when he arrived that I desired to thank him for having saved my life. I did the thanking and, believing that my foster father would send him a substantial present, asked him his name.

"James Waterhouse," he replied.

"Have you a middle name?" I asked.

"I don't know. I came out of an orphan asylum, and they called me Jim Waterhouse."

"You are my brother," I said and, running toward him, put my arms about him.

"Are you my sister Adelia?"

"I am."

My foster father took Jimmie out of the army and gave him a place in his counting house.

His Favorite Phrase.

Once when they were talking literature Mrs. Isobel Strong said to Robert Louis Stevenson, "At least you have no mannerisms," whereupon Stevenson took a copy of his own "Merry Men," which she was reading, out of her hands and read, "It was a wonderful clear night of stars." "Oh," he said, "how many, many times I have written 'a wonderful clear night of stars.'"

A Test Case.

"Father," inquired the small boy, "what's a test case?"

"A test case, my son," replied his parent, "is a case brought into court to decide whether there's enough in it to justify lawyers in working up more cases of the same kind."—Exchange.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

Batiste and Pompadour Silk.

This frock attains a certain originality because it combines batiste and pompadour silk in its development. It is trimmed with satin and lace.

Just a wee bit too expensive in the original, but easy to duplicate in cheaper materials, is this frock in pink batiste and pompadour silk. Figured organdy and batiste would be quite as effective, while costing a great deal less.

The skirt is made with a pointed tunic, bound with a deep fold of satin. This trimming also forms the belt and outlines the batiste and all-over lace collars on the waist.

Because draped skirts are so much in demand this season, the home dressmaker will find herself compelled to attempt one. This model is both stylish and simple to make. In medium size the costume requires 3 yards 36-inch and 4 yards 44-inch material.

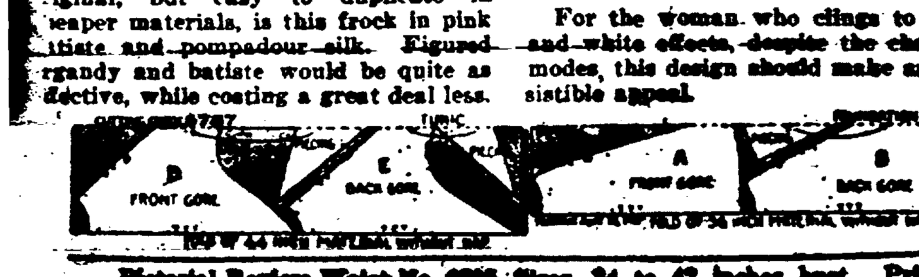
The wider material, or the figured organdy, is used for the tunic, and a study of the cutting guide will show that it is best to lay the tunic sections on a lengthwise fold of the organdy. The piecings may be cut from the selvage, being placed on a lengthwise thread.

The foundation has the front and back gores arranged on the lengthwise fold of material the same as the skirt, with the piecings for the gores cut from a selvage of the batiste.

There are also many good looking dresses in combinations of cotton crepe and taffeta. Pongee and crepe de chine go well together, too. In fact, there are many unusual ways of combining materials of widely contrasting design and texture. When in doubt seek some of the models exploited in the smart shops, then copy them in materials as nearly like the original as possible.

One is not apt to go astray if the fashionable shades or blue and pink are selected. These combine well with white or natural color, and a touch of black always improves an unhappy combination.

For the woman who clings to black and white effects, despite the changing modes, this design should make an irresistible appeal.



Pictorial Review Waist No. 6805. Sizes, 34 to 42 inches bust. Price, 10 cents. Skirt No. 6787. Sizes, 22 to 32 inches waist. Price, 15 cents.

MILLINERY NOTES.

Low Crowns and Broad Brims Are Spring's Features.

There is a rather pronounced tendency toward moderately low crowns and broader, flattish brims in soft felt hats for the coming summer season. It is the opinion of some prominent hat men that in the more popular proportions, because of the fashion among young men of wearing their hats well down on the back of their heads, very few hats with crowns lower than five and one-quarter inches will be sold. Women are following the masculine lead in hats now.

Outside of a very slight inclination in certain parts of the west toward greens and a little disposition in the east to favor browns, no "leading color" has developed in the advance summer business. A few manufacturers are forecasting light colors, but such forecasts at the present time probably are born of hopes rather than facts, for, as one manufacturer expressed it, "light colors can be stained into hats, but dark colors have to be dyed in," and never before have dyes cost so much as they do now.

Also in straw hats will these moderately low crown, broad brim styles be most popular. While the regular sailor shapes will be, of course, most generally worn, there will be some very smart shapes made of leghorn and panama straws, and in the soft straw hat we shall see the panama with large or wide brims and slightly conical crowns. The leghorns in these same shapes may be in black or dark brown. The former is a very smart hat with dinner clothes. Then there will be the soft straw with a creased top, as in the Homburg shape, and perhaps many others. Some of the boat shapes will be made of panama or leghorn straw, but, as heretofore, the most popular straw hats of the season will be the boat shapes and split braid straws.

THE FLAPPER'S FROCK.

Heydens Sometimes Like This Kind of a Gown.

Dimity set off with a figured stripe is the material used here. The full skirt is finished with a valance heading and knotted black velvet, the waist cut surplice under a double fichu of white organdie picot edged. The perky black bow is a concession to femininity.

LAST DAY OF SCHOOL.

LACE BLOUSES.

What Is Fashionable In the Realm of Dainty Waists.

Lace blouses with the bib collar of crepe are comparatively new. Then there are the cape blouses which give a pretty finish across the shoulders, but are so contrived that they do not add any suggestion of breadth across the chest. Some of these capes are bound with satin or moire ribbon while others have a quilling of net or chiffon.

Striped messaline has been chosen for the development of a semi-tailored blouse, which later may be worn with the outing skirt. In fact, the outing season has been very well considered in the planning of the blouse models. This is evidenced in the smock blouses, which are really a sort of coat and which are either quiet or very gay.

In some instances the smock blouses are trimmed with the stenciled designs in high colors; other ideas are expressed in applique motifs of cretonne. It is not uncommon to have the smock trimming to match that of the sport hat.

Pongee has come into its own once more. One of the most recent models is a coat blouse of pongee made in Norfolk style with large pockets and big collar. Some of the models are laced in color on the hips and part way down the front.

Almond Rusks.

A cupful melted butter, a cupful milk, one and one-half cupfuls sugar, three eggs, two teaspoonfuls baking powder, a teaspoonful almond extract. Cream butter, add sugar, eggs well beaten, baking powder with flour and milk alternately. Roll like loaves of bread in shape and bake in hot oven. When done and cool cut up in slices and halves (about one and one-half inch slices) and put back in moderate oven until golden brown; then keep in oven with door open about one hour.

CIMERA'S AMERICAN BAND

THE music of a splendid brass band has a sweeping appeal to which everybody, old and young, responds. Cimera's American Band, which appears here the fourth day of Chautauqua, has furnished programs with just this sort of effect for the past five Chautauqua seasons. Jaroslad Cimera is a leader with a notable reputation. He has been trombone soloist with Innes', Sousa's and Kryl's Bands. He was assistant conductor of Kryl's Band before taking charge of this band which bears his own name.

This great band will give two grand concerts, afternoon and evening. The programs will range from the thrilling martial selections and heart warming favorite songs to the noble overtures of the world's great masters.

With the band will be Miss Lillian Heyward, a lyric soprano who has gained an enviable reputation with her beautiful voice. Three years ago in competition with thirty-nine other sopranos she captured the prize in the Welsh International Eisteddfod. This striking achievement indicates the pleasing quality of her very unusual voice.

Fruit Tapioca. Coffee.

For Sunday Night Suppers.

KIDNEY STEW.—One beef kidney, about one pound, one small onion, one cupful of vinegar, one cupful of water, one small piece of suet, one bay leaf, one tablespoonful of flour, one tablespoonful of butter, one clove, pepper and salt to taste. Place the suet in a deep saucepan. Chop the onion fine and put it in the pan with the suet to brown. Cut the kidney into small pieces and add it to the browned onion. Allow to simmer for five minutes. Add clove, bay leaf, pepper and salt, vinegar and water. Simmer briskly for about twenty minutes. Then take a tablespoonful of flour and brown it in a tablespoonful of butter. Add this to the stew and allow it to come to a boil. Serve on toast.

Steak Birds.—A tasty way to cook round steak is by making small birds. Have the steak cut thin and then cut it into pieces about three inches square. Make dressing as you would for fowl, fill the pieces of steak with it, double them over and tie with a cord. Roll in flour, put into a baking pan with enough hot water to baste and bake until tender. Lay the birds on a platter and serve with a garnish of parsley.

Angelo on Horseback. — Use three large oysters to a person, wrap each oyster in a very thin slice of fat bacon, then arrange on steel skewers, three oysters on a skewer, with about one inch space between each oyster. Dip in batter and fry in deep fat from eight to ten inches. Serve hot (still impaled on skewers) on thin triangular slices of buttered toast from which the crusts were removed before toasting.

Batter for above: One cupful of sifted flour, one egg, well beaten; one-half cupful of milk, a pinch of salt, one saltspoonful of baking powder.

Scalloped Fish. — Three cupfuls of cooked fish, three cupfuls of milk, three tablespoonfuls of flour, three tablespoonfuls of butter, two eggs, one teaspoonful of salt, one-half teaspoonful of pepper, one tablespoonful of chopped onion, one teaspoonful of chopped parsley. Pick over and flake the fish into small pieces. Blend the flour, butter and milk together into a cream sauce. Boil this a few minutes and then add the eggs, well beaten. Add fish, salt, pepper and onion, also parsley. Sometimes we add thin slices of potatoes, but usually not. Put into a buttered baking dish and cover with fine breadcrumbs and dot with pieces of butter. Bake half an hour in a moderate oven.

Anna Thompson

Sufficient Cause.

"What started the fight?"

"Well, you see, Jones handed in an item stating that he was engaged in raising chicks, and it came out in print that he was engaged in raising checks."—New York Times.

MELLOW GLOW.

A Lamp For Summer Porches and Bungalow Living Rooms.

With the lightening up of winter heaviness for summer convenience comes this lamp of glass standard hung with crystals. It is easily cleaned and filled and with the pretty shade of old rose silk festooned with garlands makes an attractive addition to your summer cottage.

CHARMED LIGHT.

In the Garden.

Give the petunia a good soil, let it get a good start at the beginning of the season, and by the last of June it will begin to bloom, and from that time on to frost it will make the garden gay with its crimson and purple and white blossoms. If there should be a little falling off in the quantity and quality of its flowers in September cut away nearly all the old branches and allow the plant to renew itself.

After cutting back it will soon throw up new shoots and on these will be borne flowers quite as large and fine as those which characterized the production of the earlier part of the season, and there will be plenty of them until the coming of cold weather.

Broiled Swordfish With Horseradish.

Wash and wipe dry and season with salt and pepper slices of swordfish or halibut. Broil ten or twelve minutes, over a charcoal fire if possible. Serve with a horseradish sauce. Cream one-third cupful of butter, add two founding tablespoonfuls grated horseradish, one teaspoonful made mustard, one saltspoonful of salt and two tablespoonfuls of hot vinegar.

Rhubarb Conserve.

Three pounds of sugar, three and a half pounds of rhubarb cut in small pieces, juice of three lemons and grated rind. Boil this thirty minutes; then add a cupful of chopped blanched almonds. Chop about the size of a bean. Boil from twenty to thirty minutes longer. Put in jelly glasses. This is very fine.

The Largest Domes.

Some of the largest domes in the world are: The Pantheon at Rome, 142 feet diameter, 143 high; baths of Caracalla, Rome, 112 feet diameter, 116 feet high; St. Sophia, Constantinople, 115 feet diameter, 201 feet high; St. Maria delle Fure, Florence, 139 diameter, 310 feet high; St. Peter's, Rome, 139 feet diameter, 330 high; St. Paul's, London, 112 feet diameter, 215 feet high.

NEW LINGERIE.

Suggestions For Women Who Make Their Own Underwear.

Women who do no other sewing sometimes make their own lingerie, at least part of it. Although the modern lingerie is so dainty, so elaborate, it is quite possible to make it if one follows the new patterns carefully, for they are, of course, designed by the best designers that money can hire, and they are, withal, practical.

To begin with, there are the usual patterns in the new silhouette. All underwear has taken on flaring lines. So there are patterns with a flare for all the lingerie one might desire.

There is the new petticoat that measures from three and a half to four yards around the bottom, a petticoat every one will need to wear with the summer's full skirted frocks. Such a petticoat can be finished in scallops or deep points at the bottom, or a straight flounce trimmed with lace or ruchings can be used. And it can be made with or without an extension under the flounce and with or without a dust ruffle.

There is a most attractive pattern for a nightgown with revers, back and front. There is a V shaped opening back and front, and little revers turn back from this opening. The gown is belted in at the empire waist line or left hanging, but the belted form seems prettier.

There is, too, the sleeveless nightgown, with points of the front and back meeting on the shoulders. This, too, is left flowing or else belted in, as one prefers.

There is a simply made princess slip with the required width at the bottom. It is in two pieces, shaped in at the waist and fitted by means of ribbons run through beading at the belt. It is made with ribbon or lace straps over the shoulder or with a shaped neck.

A lovely nightgown pattern for flouncing shows the embroidered edge toward the neck and with an inset strip of the flouncing back and front to form a shallow yoke above the high waist line.

This Is Travel.

To travel, then, is to do, not only to see. To travel best is to be of the sportsmen of the road. To take a chance and win; to feel the glow of muscles too long unused; to sleep on the ground at night and find it soft; to eat, not because it is time to eat, but because one's body is clamoring for food; to drink where every stream and river is pure and cold; to get close to the earth and see the stars—this is travel.—Mary Roberts Rinehart in Collier's Weekly.

Leather Tire Patch.

A leather patch fixed over a tire puncture with shellac will be found to give satisfaction and may be attached easily. Cut the patch somewhat larger than the puncture and thin out its edges with a knife, says Popular Mechanics. Melt flakes of shellac in a flame, fusing them, and rub the hot mixture on the patch and tire, smoothing it down quickly. Such a patch may be placed over a plug and will aid in holding it in place.

Largest Dredge Boats.

Two 1,700 ton dredge boats are pumping from 12,000 to 38,500 cubic yards of material apiece daily from the lake and harbor bottom at Toronto to make the 32,000,000 yard fill required for the harbor improvements now being carried out by that city. In point of capacity, if not of displacement, they are thought to be the largest single dredging units ever built.—Engineering Record.

AGED HINDU SOLDIER WANTS TO DIE IN BATTLE

Although Seventy, Sir Pertab Singh Is Returning to the Front.

Sir Pertab Singh, veteran Indian soldier, has left India on his return to France.

In this brief statement lies the story of a man who wants to die.

But Sir Pertab Singh, seventy-year-old Indian noble, despite his years is particular about his mode of demise.

Demanding his right to fight for the king-emperor of India—George V.—at the beginning of the war, this aged Indian officer for months invited death on the bloody battle grounds of Flanders. With fanatical bravery he repeatedly charged at the head of his men toward the German trenches. But fate and German bullets denied him death. No bullet even grazed him.

The story has reached the India office in London of how Sir Pertab shrinks in horror from the sneaky death that comes to soldiers in the trenches. He has no desire for death from trench bombs that come lobbing over from the German side or from shrapnel fire or hand grenades. He insists that there could be no greater glory than to be punctured by an enemy missile while on the charge. To be thus punctured was his sole aim during his several months in Flanders.

Some time ago Sir Pertab reluctantly returned to India on account of pressing business. He announced that he would return at the earliest possible moment.

The cablegram from Bombay announces that he is coming back to France to have another flirt with death. Forthcoming casualty lists will be closely watched.

CIGARETTES BAR RECRUITS.

Marine Corps Doesn't Want Men With Faulty Respiration.

Faulty respiration and tachycardia, or rapid heart beat, due to excessive cigarette smoking, caused 50 per cent of rejections at the United States marine corps recruiting station in New York city since May 1, according to Captain Frank E. Evans, recruiting officer.

Although many young men were influenced by the preparedness parade to seek out the recruiting officers for the marine corps, not a single applicant has been accepted of those who applied.

The marine corps standard is very high, Captain Evans explains, and of the last 149 applicants examined nearly half were found upon examination to have rapid pulses, shortness of breath and other symptoms easily recognized in the applicant who smokes cigarettes excessively or incessantly.

Don't Be Selfish.

If you acknowledge your faults you deprive your friends of the pleasure of pointing them out.—Life.

FORD CO. BUYS BROADWAY LOCATION

New York—Frank L. Klingensmith, vice president, treasurer and general manager of the Ford Motor Company, of Detroit, came to New York yesterday especially to close the purchasse of the property at the northeast corner of 54th street and Broadway.

Mr. Klingensmith, in a statement made yesterday, said the property had been bought for improvement with an automobile salesroom for the Ford Motor Company, which originally had intended to erect only a three or five story building for its own use, but that Gaston Plantiff, the Eastern representative of the Ford company, who several days ago steamed for Sweden, had been negotiating with Thomas D. Green, proprietor of the Woodward Hotel, with a view to leasing him the twelve upper stories of the building to be erected by the Ford Company for use as an annext to the Woodward Hotel.

If the transaction in its entirety is consummated the total investment will be considerably more than $2,000,000.

THREE BRITISH SHIPS ARE SENT TO BOTTOM

London—Lloyds reports that the British steamships Baron Tweedmouth and Julia Park, both unarmed, have been sunk. The British steamship Ladly Ninian also is reported sunk.

The Baron Tweedmouth was 5,007 tons gross, and was last reported arrived at Clyde on April 23. She was built at Glasgow in 1907, and was owned by the Hogarth Shipping Company, Ltd., of Liverpool.

The Julia Park was 2,900 tons. She was last reported arrived at Liverpool on May 14. She was built at Glasgow in 1894 and was owned by the Park Steamship Company, of Glasgow.

The Lady Ninian was bound for Newport News on May for for Leghorn, and passed Gibraltar on May 26. She measures 4,297 tons gross and was built at West Hartlepool in 1906. The Lady Ninian was owned by the Rederoft Steam Navigation Company, of Cardiff.

TOO MUCH FOR ONE STORK.

Arrival of Boy Is Climax to Bewildering Number of Animal Births.

John Harman of near New Market, Del., had an exciting time the other night when he was wakened by considerable noise in the barn. Hurriedly donning his clothing, he rushed down to investigate and was greeted with a new colt.

He had hardly finished looking it over when a lowing in the stables began, and going there was astonished to find a pretty little calf had arrived.

At the woodshed he found a whole nest of little bird dog pups and on returning to his room was astonished to find that his wife had presented him with a bouncing baby boy in his absence.

Baffled by Name.

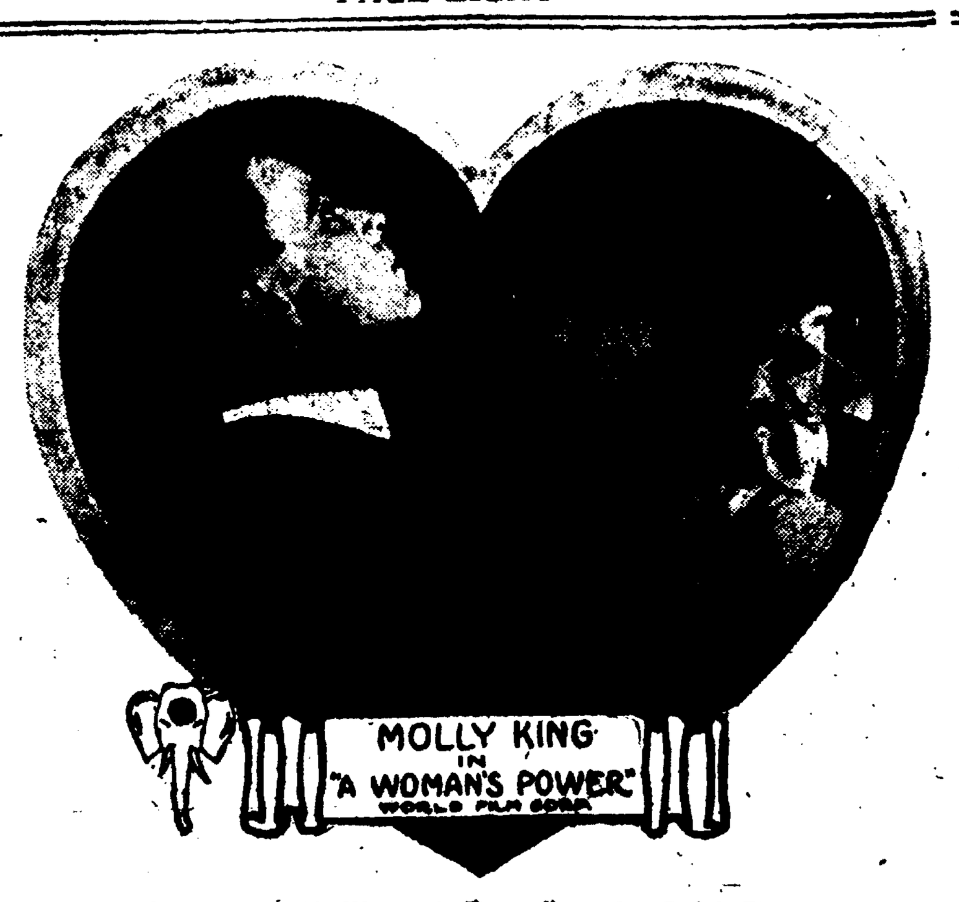
The clerk of the United States senate started to read the name "Bruusgaardkusterud Dampskibsaktieselekab," but broke down and was about to skip it when Senator Knute Nelson of Minnesota, himself a Norwegian, volunteered and rattled it off as easily as you would say Smith.

Well Named.

Salesman—Why not try one of our Rip Van Winkle rugs, madam?

Prospective Purchaser—What kind are they?

Salesman—They have an unusually long nap.—Indianapolis Star.



Scene from "A Woman's Power" at the Quirk To-day.

MAKING YOUR WILL

Have You Put Off This Important Task, and, if So, Why?

DRAWING UP THE DOCUMENT.

Rules by a Probate Law Authority That Tell Just What to Do and What Not to Do In Making a Last Testament Secure in Its Provisions.

"More than 97 per cent of Americans die without making a will," says Frederick Halsey in the American Magazine. "Have you made yours? It is conceded by legal authorities that it is the duty of every person to leave a written will in order that the estate may be closed, the property divided among the proper beneficiaries and that the family or friends may have the benefits of the property, yet more than 80 per cent of the holders of valuable property neglect this duty.

"The old superstition that the man who makes a will writes his death warrant is one of the chief causes of delay in making proper provision for the distribution of any estate after death. It is hard to calculate what percentage of men and women believe this superstition, because the majority will deny it. Court experts know that the percentage is large. Yet life insurance figures, taken in comparison with dates on wills, seem to show that instead of being correct the superstition is without basis and that men who have made wills have lived longer than the average."

Charles S. Cutting, who is one of America's foremost authorities on probate law, gives the following directions for making a safe will that can't be broken:

Before you consult anybody decide how you propose to leave your property.

If the disposition to be made is simple any ordinarily skilled person can draw your will.

If your will is complicated, including trusts, life estates and so forth, employ the most skilled draftsman within your acquaintance.

Do as your legal adviser tells you as to matters concerning which there may be doubt.

Be sure to comply with all formalities required by the statute, especially the following:

Subscribe your name to the will in the presence of witnesses.

Declare it to be your will in their presence.

Have at least two witnesses sign in your presence.

If you sign by mark or for any reason are unable to write your name have at least three witnesses to the fact of your signing by mark or that you requested some other person to write your name.

Ask people who have long known you and who have no doubt as to your sanity to be witnesses.

Place your will in the custody of some perfectly responsible person or corporation or in some receptacle, as a safety deposit vault, which cannot be opened after your death without the presence of public officials.

Remember that any provision you make for your wife is an offer to her to purchase from her her statutory rights and that if she chooses she may reject your offer and take under the statute.

Don't put off making a will until you are ill and your disinherited relatives will say that your mind is affected.

Don't believe that making your will will hasten your death.

In states where the statutes give a widow dower only in her husband's real estate don't get the idea that she will be the owner in fee of one-third of his realty.

Don't attempt to tie up your estate for a long period, providing for ultimate distribution in the distant future. Courts are very apt to find ways to construe such a will contrary to your intention.

Don't let your will be the vehicle of conveying to posterity your hatred or dislike of individuals.

If you are wealthy and have provided well for your family don't forget the obligation you owe to the community.

Don't attempt to change your will after it is written and witnessed by drawing lines across certain portions of it and writing in other directions. Such attempts will fail.

Don't make a nonresident of your state executor of your will. Many states will not permit him to act.

Don't have the man you selected as executor sign as a witness. It may disqualify him.

Don't allow any legatee or devisee in your will to sign as a witness. If he does he may lose his legacy or devise.

If you wish to add a codicil to your will don't fail to have the codicil refer unmistakably to the will and to attach the codicil thereto physically.

Don't hesitate to change your will by codicil or otherwise whenever you see fit.

Impossible Ones.

"He was a born fisherman and could swear to the truth."

"He sought the office only for his country's good."

"He took his own advice and never failed to practice what he preached."

"He presumed that an editor's time has a certain value, always wrote briefly and to the point, and never stopped his paper because he knew it all before it got into print."—Atlanta Constitution.

COSTLY TO STEAL POLICEMAN

Fined $5 and Costs and Sentenced to Six Months For Taking Cop.

Lafayette, Ind.—A policeman in good working order here is worth $2.50, that and nothing more. In fact, they come so close to being a gratuity that to steal one and be caught means only the facing of a petit larceny charge.

Party De Vault was arraigned before Judge Prass the other day for the abduction of a traffic policeman. The affidavit against him read in part as follows: "Party De Vault did then and there feloniously take and steal a policeman, the property of Al Meyers, then and there being of the value of $2.50."

De Vault was fined $5 and costs and sentenced to six months at the state penal farm. The "policeman" he stole was an automobile decoration.

RUSH BRINGS NEW DISEASE.

Says "Angina of Effort" Is Prevalent Among Professional Men.

Philadelphia.—The rush of modern life has produced a new disease, greatly increasing in extent and especially prevalent among doctors, teachers, clergymen, editors and other men of affairs.

Dr. Oliver S. Haines, who announced the new ailment at the Hahnemann Medical college, calls it "angina of effort." In plainer English that means a sudden shooting pain under the breastbone because you are working too hard.

No connection with spring fever was hinted at. It comes from living too hard and sometimes from an "antagonistic attitude toward the problems of life." No happy go lucky person ever gets it.

BIRD CARRIES AWAY DOLLAR.

Makes Good Catch and Flies Off With Loot to a Tree Far Away.

San Bernardino, Cal.—"I'll bet you this dollar bill I can hit that blackbird over there," said Herbert Hill, a freshman at Redlands university, to a crowd of fellows as the bird fearlessly fluttered near the group as if challenging the young men to capture it.

"Take you," said another, and Hill crumpled up the bill into a ball and hurled it at the blackbird.

Hill missed. The bird flew a few feet and then circled back, seized the dollar in its bill and disappeared through the park into a tree far away. Hill could not pay the bet. Somewhere inside a blackbird's nest or under a tree a bill eventually may be found.

MARRIED AT BIER.

Wedding Hastened to Obey Mother's Dying Wish.

Marion, O.—Conforming to the dying wishes of the bride's mother, Miss Katherine E. Titus, aged twenty-eight, and William Baumert, forty-years old, were married at the bier of Mrs. Samuel Titus, mother of the bride. Mrs. Titus had been ill a week.

She expressed the wish that her daughter's marriage be hastened before her death. A telegram was sent to Baumert, and he left Montana immediately. He arrived a few hours after Mrs. Titus died, and the ceremony took place at her bier.

WEATHER SCIENCE

It Is Good as Far as It Goes, but It Doesn't Go Far Enough.

SECRETS HIDDEN IN THE SUN.

Changes In Intensity and Quality of Solar Rays Cause Effects That Bother Meteorologists—Why Forecasts of Experts Often Go Astray.

The most imperfect science is meteorology. The margin of error in its calculations is sometimes enormous—sufficient to completely reverse a prediction.

The weather bureau is a useful institution, based upon an incomplete system of correlated facts of observation, which are scientific as far as they go. But there are elements concerned in the production of weather about which the methods of meteorology give no information.

There are birds, insects and four footed animals which have an incomparably greater foreknowledge of weather changes than the entire scientific corps of the agricultural department possesses.

When the predictors of the weather bureau give warning of an approaching storm they act on very much the same principle as that on which a railroad time table is based. A train having been announced by telegraph as started on a given line will arrive in regular succession at certain points along that line, and a station agent at any given point can, if no accident intervenes, foretell the moment of the train's arrival at his station.

Storm centers, or cyclones, moving across the country are in some ways comparable to trains following a time schedule. But, unfortunately they do not run on rails, they are not driven by an invariable force, they are subject to interruptions and obstacles of many kinds, and instead of always keeping the track and following the course they frequently wander vaguely about or take an unexpected turn or else fade away like exhausted whirls in water.

In fact, the weather bureau predictors are in the same quandary in which train dispatchers would find themselves if railroad tracks were shifting lines, continually drifting this way and that, getting crossed and entangled or sinking into suddenly formed quagmires and thus disappearing for good.

Meteorology as a science of weather prediction fails just because it possesses too few facts. With the aid of the telegraph the weather bureau can if lucky follow the trail of a storm center across the United States, but it cannot tell just how a new storm is born nor just when or where it will begin its course.

The one only great fact on which it bases its whole system of prediction is the general tendency of cyclonic disturbances in this country to travel eastward with a northerly trend, while storms originating around the gulf of Mexico and the Caribbean sea usually come up the coast.

But the official weather prognosticators are as much in the dark as the ordinary citizen concerning what is going to happen in the atmosphere next week, and they really know nothing about any storm until after it has begun its career, and then all that they know is the course that it will take—in case it doesn't happen to change its mind.

A slight variation in the intensity, or quality, of the radiation received from the sun might account for sudden changes or abnormal weather, and recent investigations show that such variations occur, but what is needed is more accurate knowledge about them and their effects. Heat and light are only two of an infinite number of forms of vibration sent to us from the sun. Everybody knows that when the weather records show that two days are precisely alike in temperature, in humidity, etc., human nerves prove that they are vastly unlike in some unnamed peculiarity which affects the springs of life.

The spider busily and confidently spinning her webs in preparation for a spell of fine weather which some unerring mechanism of foreknowledge within her enables her to detect, is a surer guide than a barometer. She responds to vibrations as yet only guessed at by science, and so perhaps do the supersensitive nerves of many human creatures.—Garrett P. Serviss in New York Journal.

Glass Cups.

The first glass cups were made at Alexandria. Some were colored like Bohemian glass and decorated with glass pastes, imitating precious stones and cameos. Some were opaline, others clear as crystal and still others formed of opaque layers welded together like the famous Portland vase, in which the white upper layer had been cut away like a cameo, leaving a blue ground around the figures.

Watered.

"If you are looking for bargains," said the broker, "I can suit you. I can offer you some stocks at 10 cents a share."

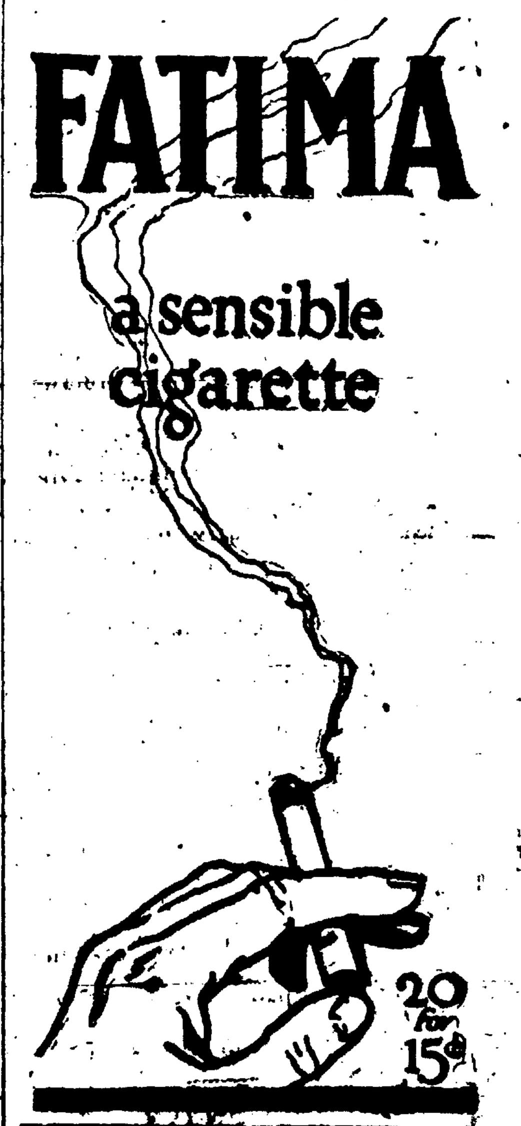
"But why are they so cheap?" demanded the lady shopper.

"You see, they have been slightly damaged by water."

A Sable Philosopher.

Don't go ter growlin' kase de rollin' world don't turn ter look at you. Ef it did it might be disapp'inted an' you'd hear it sayin', "Ter think dat I got ter give de likes er dat a free ride 'round de sky!"—Atlanta Constitution.

He that lives upon hope will die fasting.—Franklin.



LEGAL NOTICES

TO ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the Commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 degrees, minutes West 20.76 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.40 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

New York Ontario and Western Railway Co.

By Costello, Burden, Cooney and Walters, Attorneys for Petitioner, Office and P. O. Address, 935-955 University Block, Syracuse, New York.

NEW YORK CENTRAL EARNINGS ADVANCE

New York—An increase in net operating revenue for April of $1,254,679, as compared with the corresponding month of the preceding year, was reported yesterday by the New York Central Railroad. The Boston and Albany Railroad, which is not included in those figures, reported an increase in net operating revenue of $236,914.

The same circumstances which were leading factors in bringing the big advances in April earnings to the Pnnsylvania figured with the New York Central—the relief of congestion at tidewater terminals and the increased capacity of plants for turning out the large orders received from domestic and foreign quarters. All the subsidiaries of the New York Central lines reported marked earnings advances.

AN IMPOSSIBLE IDEA, SAY, GRAIN MEN HERE

New York—Leading grain men in New York were much interested when told last night of the proposition advanced in the Argentine to regulate prices of grain through a combination with this government, as revealed in the cable despatch to the Herald. The impression was general that such an idea could not be carried out unless this country were at war with some other nation, and that the conditions complained of in the Argentine prevailed to some extent in the United States.

THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 450. SATURDAY, JUNE 3, 1916 Price, One Cent

Thieves Get $275 and Make Escape

Cracksmen broke into the office of the Morin Bros. Lumber Company in this city sometime last night and ransacked the place, securing about $275 in cash and several valuable papers, as far as could be learned this morning. The theft was discovered by Frank and Willis Morin, when they went to open the office early to-day.

The police department was immediately notified and Chief Dyer detailed some of his best men on the case. A thorough investigation failed to reveal any clue which might enable the police to trace the robbers, and as no one who had seen any strange men in the vicinity of the building yesterday could be found, even a description of them is not available.

Neither the officials of the company nor Chief of Police Edward Dyer would make any statement whatever concerning the case this morning, intimating that to public the news might warn the thieves that their visit had been discovered, and if the job was engineered by local crooks they might take flight.

From all accounts the job was carefully planned and well executed, and bears all the earmarks of professional yeggs. Entrance was effected either by a window or a back door of the office, as the police have learned, and once inside the men wasted no time but soon rifled the place of everything of any value.

The policeman on duty in that section reported no noise or disturbance of any kind during the night, and saw no strangers in that locality. With no clues to work on, not even finger prints, the department has adopted a policy of "watchful waiting," and meanwhile detectives are trying to learn whether or not any strangers of a suspicious character were seen in the vicinity of the office yesterday.

MAIN BRITISH FLEET SENT TO MEET KAISER'S SHIPS

Three British battle cruisers, the Queen Mary, the Indefatigable and the Invincible; three armored cruisers, the Defence, the Black Prince and the Warrior, and eight destroyers were sunk in a twenty-four hour naval battle off the coast of Jutland, which began Wednesday afternoon.

The German losses, so far as they are definitely known, are one battle ship, the Pommern, and two cruisers, the Wiesbaden and the Frauenlob. Several German destroyers are reported missing, and it is believed at least one battle cruiser, either the Derfflingr or the Lutzow, was sunk. Late reports from the Grand Fleet early this morning indicate too that the Kaiser, a superdreadnought of 24,700 tons, was the victim of a British torpedo.

This, in a paragraph sums up the results of the greatest naval battle in the history of the world. Other engagements have called more ships into action and more vessels have been lost. But no such tremendous masses of steel, no such armaments, no such issues ever have been joined in a battle on the water as were joined on the turbulent North Sea.

Even this morning, two full days after the battle was broken off by the Germans, who withdrew to the shelter of the mighty Heligoland fortress, London does not know its full import. The Press Bureau late last night issued a statement in which it explained that information regarding the engagement is meagre and that not until the Admiralty has received full reports and is able to verify or deny the dozens of rumors which are afloat will any articles be passed by the censor. The bare announcement, however, that the British battle cruiser fleet, under the commanl of Vice Admiral Sir David Beatty, and the German fleet had met and that the British losses included fourteen ships sent a painful shock through the country.

This was scarcely counteracted by the news that one of Germany's latest and most powerful superdreadnoughts was blown up and that the German fleet declined to stand and fight when the British main fleet appeared on the scene.

Rumors of an engagement in the North Sea were heard in the West End most of yesterday, but since such reports are of almost daily occurrence little credence was attached to them. Late in the afternoon the evening newspapers issued special editions containing the official report by the Admiralty and work of all kinds was dropped for consideration of the portentious despatch. No such excitement has been witnessed since the days when war was declared. The frankness of the Admiralty statement concerning the seriousness of the British losses and the apparently small losses of the Germans led naval authorities to believe the British had been led into a mine field. Later developments, however, tended to disprove this theory and to indicate that the engagement was one of those running fights dear to the heart of the chronicle of sea history in which destroyer and submarines with their deadly torpedoes took a prominent part.

VAN WAGENEN EST. SEEKS TO ENJOIN MEXICO MAN

The case of Eleanor V. VanWagenen of this city, as executrix in the estate of F. D. Van Wagenen, deceased, against John E. Unger, of Mexico, came up before Fred G. Whitney, as referee in Pulaski yesterday. The plaintiff seeks to establish the fact that Mr. Unger was a partner in a business established by Mr. Van Wagenen in Mexico some years ago, which was conducted under the firm name of F. D. VanWagenen and Co., and as such is liable for a share of the debts of the company, which was dissolved after Mr. Van Wagenen's death.

Mr. Unger was in sole charge of the Mexico business, where the company engaged in the sale of agricultural implements, hardware and general supplies. He claims that he was not a partner, and that the sum of $3,000 is due him from the company for rent, wages and other incidentals.

With several other creditors he presented his claims yesterday. Howard Stone was appointed the receiver of the company after its dissolution, and it is evident that the claims may exceed the assets.

The Mexico business was a separate venture of Mr. Van Wagenen, and had no connection whatever with the Fulton company of the same name. The case will be resumed in Pulaski, June 21. Giles S. Piper is the attorney for the VanWagenen estate.

GERMANS TO SALUTE FLAG MADE OF GIRLS

(By United Press)

To demonstrate their patriotism 500,000 German and Austro-Hungarian Americans and their friends will go to Sheepshead Bay Speedway, tomorrow and salute a gigantic American flag composed of 2,000 girls attired in the national colors.

The event is under the auspices of the American Liberty Day Committee and, is intended to impress the country with the love these citizens of foreign birth have for the Flag and the welfare of the United States.

There will be exhibitions by turners and mass calisthenics of 3,000 men and women members of the clubs in the North American Turner Band and chorus singing by 10,000 children of German congregation.

A special program of daylight fireworks is listed, and a parade with floats will illustrate a number of great examples of Germans who, from Revolutionary days have been of great importance in shaping the course of the American Republic.

THOUSANDS OF ACRES OF LAND OPENED

Little Rock, Ark.—The United States Land Office to-day filed plots for 23,0000 acres of land in the Big Lake and Hound Lake section of Mississippi county. Many filings for this land were expected to-day. Four thousand acres of this land have been set aside as a bird reserver by President Wilson's proclamation.

FIGHT SHOWS GERMAN HAND

New York—That the conflict off the coast of Jutland is the greatest naval action of modern times is indicated by the reports, according to naval experts in this city.

While the versions of both sides are conflicting the concensus is that a fast British patrolling squadron composed of battle cruisers ran into the main German fleet, which had issued from the protection of Heligoland. To the aid of the battle cruisers came four dreadnoughts, but even this force was unable to sustain the German fire. Although outnumbered and outgunned, the British advance squadrons stood off the German attack until the arrival of the rest of the main high seas fleet, upon which the German fleet retired, with heavy loss. The brunt of the attack thus fell on the British battle cruiser fleet and the four supporting dreadnoughts.

Although the German version asserts that the Warspite, pride of the British navy and one of the most powerful war ships afloat was sunk the British Admiralty report denies this. It is reasonable to suppose, however, that the Warspite was engaged because of her great speed.

Too Early For Verdict.

"This is the first opportunity we have had to observe a modern fleet action," said one American naval expert. "As yet not enough details are obtainable to give a decisive opinion, but it may be taken for granted that the losses on both sides were heavy. The German scheme of campaign was most probably a development to insure the immobilizing of the force of 2,000,000 men said to be on British soil, thus preventing their use as reinforcements on the French front, where they would turn the balance of power against the German arms, and may also be a trye-out of the heavy armament that has according to popuuar rumor been mounted on the German high seas fleet. The severe British loss would lead us to believe this last to be a fact. Despite their great speed the battle cruisers could not get away from the German gunfire. Hence the probability that the Germans have mounted on their dreadonughts and battle cruisers guns of much greater calibre than originally used—probably all main batteries of 14 or 15 inch guns.

"Insofar as concerts the immobilizing of the British troops, the German excursion probably has succeeded. Throughout England much fear of an invasion will be aroused and to calm popular opinion the troops will in all probability be left there. So far as the actual fighting is concerned the Germans by their ability to judge when to retire on the 'He fights and runs away will live to fight another day' principle may be considered to have had more than a shade the best of it.

TO ASSIGN INSTITUTES AND EXTENSION SCHOOLS

Director of Farmers' Institutes, Edward van Alstyne, of the State Department of Agriculture, Albany, and Prof. D. J. Crosby, of the State College of Agriculture, Ithaca, will meet in conference all persons interested in the assignment of Farmers' Institutes and Extension Schools to be held the coming winter in Oswego County at the Oswego Chamber of Commerce rooms, Saturday, July 17, at 9:30 a. m.

The number of institutes and schools which can be allotted to each county is limited, and all communities desiring this work should send a representative to this conference. It is desirable that as many interested in the work as possible be present in order that the best interests of the county may be served by placing the meetings whee they will be of the greatest value.

FIVE DEAD IN IOWA ACCIDENT

Des Moines, Ia.,—At least five persons lost their lives, a score were injured and fifteen are missing in the wreck of Rock Island train No. 19, northbound, which plunged through a bridge at Packard early to-day.

The wreck was due to the storm which swept the northeastern section of the State, and so crippled telephone and telegraph wires that it was impossible to obtain accurate information.

The heaviest loss of life was in the day coach, which toppled on its side under ten feet of water. Wreckers are attempting to raise the car. It is feared many more dead will be found inside.

"GUARD" UNABLE TO NAME THE MAN

The "Old Guard" has arrived. It sincerely believes it can do anything it wishes, with the possible exception of blocking the nomination of Justice Hughes. It is not certain it could not prevent that, but there is grave doubt about whether it would be the part of wisdom or politics to do so.

The nominating Convention is only four days off. The lines are being tightly drawn. There is no individual leader. There is no group of leaders as powerful as was the Barnes-Penrose-Crane group of four years ago. About 300 of the 985 delegates are here. They are running around in circles trying to ascertain what is going on. Never in the history of the republican party has there been such a headless or tailless situation as exists here now.

There are as many opinions as there are candidate for the Presidential nomination. Simmered down, the situation to-night is about like this:

"The Republican leaders feel that Justice Hughes is very likely to be the nominee—providing always that he will accept. They don't want him. They have temporarily laid him aside with the idea of seeing if they can't do better. They believe that they can take him any time. They feel confident they can carry the election with him.

"There is a possibility that they will, in the last analysis, turn to Theodore Roosevelt. With him they could overcome the Hughes boom. With him, they assume, they would be able to 'do business' after he became President. With Justice Hughes as President they fear they would not 'do business' at all.

If the members of the "Old Guard" where were humiliated by the Roosevelt campaign of four years ago can be pried loose from their anchorage of bitterness and hatred Mr. Roosevelt will get the nomination. If they cannot he will not be the nominee. There are no two ways about that. The "Old Guard" is actually in the position of holding the balance of power, but it can't exercise it as it pleases. It can use it to bring about the defeat of some one, but not necessarily the nomination of any one.

The Hughes boom took on new impetus to-day. W. Murray Crane, of Massachusetts, arrived here. He announced that he favored the nomination of the Supreme Court Justice. He has no personal liking for him. He looks upon him as a foe of political machines, but he has declared that he believes him to be the logical man to weld the hostile elements of the party and bring about victory in November.

The attitude of Mr. Crane caused surprise. He was one of the "Old Guard" magic circle in 1912. He is the king pin of the situation now. He is the rallying point for the other members of the "Old Guard," and his active participation in the Hughes propaganda unquestionably has put new fear in the hearts of the Roosevelt men. He not only has come out himself for Mr. Hughes, but he has urged Boies Penrose to do likewise. Mr. Penrose is saying nothing of importance. He is waiting until his move may decide the game. He came to town to-day. His rooms in the Congress Hotel were quickly filled with influential republicans. They, like every one else now here, were eager to learn something—anything.

During the day Mr. Penrose saw James A. Hemenway and Joseph B. Kealing, of Lndiana, the home of the Fairbanks boom; Mr. Crane, the fountain head of the Weeks and McCall booms; Mayor Thompson, of Shicago, and S. A. Perkins, of Washington. William Barnes was not there. He was confined to his room by indigestion. He has apparently been eliminated as a powerful factor in the 1916 situation. He had no callers.

915 Emery St.—8-room house, barn 30x30, hen house. All kinds of fruit and three acres of good land $2,200.00

515 Harrison St.—F. C. Reynolds property, consisting of 7-room house, small barn, 1-2 acre of land. Conditions necessitate a sale. A good speculation at $1.150.00

Cor. of So. 4th and Division Sts.—In this especially good section a building lot 66x100.

36 Acres—Of level productive fields, free from stone. Good set of buildings, together with team horses, 4 cows, 60 hens, wagons, harnesses and farming tools, all for $3,500.00

Auction Off Social Position at Bazaar

(By United Press.)

New York—"Here you are! Only $5 a day in the most exclusive home in Newport! Buy a chance, and if you win you'll be entertained by one of Newport's most charming hostesses!"

This is the cry that resounded to-day when the Million Dollar Allied Bazaar began in Grand Central Palace.

Among the many things to be raffled off, from neckties autographed by poets to high power touring cars, is a free trip to Newport and a day's entertainment in some villa where hitherto only those whose names are in the social register have been permitted to enter.

Just who the hostess is to be, whether it is Mrs. Vincent Astor, Mrs. O. H. P. Belmont or somebody else, has not been disclosed.

Not even the possibility, immediately suggested, that some I. W. W. person might get the price and buy a chance and win the day at Newport has deterred the Newport hostesses.

Another alluring chance that will be sold is "the day of ladylike thrills," only men may compete for this, and the lucky winner is to be handed the following nice feminine thrills:

A morning trip with Katherine Stinson in her airship, a regular scorcher of a rde with the most daring woman automobilist the committee can find, an afternoon spin with Mrs. J. Stuart Blackton in her motor boat, several hours of posing for the movies as the hero in the most strenuous play that can be found and dancing in the evening with Florence Walton as partner.

France's $200,000 exhibit is made up largely of weapons and war paraphernalia and is in charge of the Marquis de Polignac, special representative of the French government for the bazaar.

* * *

Among the many interesting features of the exhibit are two aeroplanes and a hydroaeroplane, captured from the Germans, a big collection of parts from a Zeppelin brought down by French guns and 5,000 steel arrows which Teutonic aviators rained down on ground occupied by French troops.

There is a big mortar of the type used by the French troops, several captured German guns and hundreds of articles of every day use made by French soldiers in the trenches.

The two captured German aeroplanes are of the Albatross make. One of them was shot down "somewhere in France" by French antiaircraft guns and the other fell inside the allied lines after being subjected to a hot fire from French aviators. The hydroaeroplane was shot down at sea by gunners on board allied warships off the Belgian coast. There is 100 tons of the exhibit in all.

The bazaar, which is to cost approximately $1,000,000 will last until June 14. The proceeds, expected to total near the million mark will go for relief work in Allied countries.

The affair is national in scope and will be directed by representatives of every patriotic allied order in the United States and Canada.

Members of the committee directing the bazaar are Mr. Joseph H. Choate, Mr. Myron T. Terrick, Mr. William F. McCombs, Mrs. William Alexander, Mrs. J. Borden Harriman, Mr. Frederick H. Allen, Mr. Gifford Pinchot, Mrs. Barrett Wendell, Mrs. Fiske Warren, Mrs. Schuyler van Rensselaer, Mr. August Belmont Mr. Howard Elliott, Mr. Frank H. Mason, Mr. A. Barton Hepburn, Mr. Horace E. Andrews, Mr. S. R. Berton, Mr. Charles R. Bangs, Mr. Edmund L. Baylles, Mr. C. A. Coffin, Mr. W. P. T. Hollingsworth, Mr. Cornelius Vanderbilt, Mr. Whitney Warren, Mr. Walbridge Taft, Mr. John Moffat, Mr. James Marwick, Mr. Augustus W. Kelley, Mr. Edwin G. Merrill and Mr. James A. Blair.

How He Got Her.

"The psychological moment counts for much in a love affair."

"That is true. Ferdinand, for instance, asked father for my hand the afternoon my dressmaker's bill came in."

Those Proofreaders!

"The toastmaster called my speech a trophy of good sense."

"Odd expression — rather neat, though."

"Yes, but the types made it atrophy!"—Judge.

Opinions

FARM WAGES

Surely Wisconsin may be taken as one of the section's on the earth's surface where the farm larborer gets the largest wage going. The Milwauke Journal makes a vigorous comment on the difference in wages paid in Wisconsin on dairy farms and those paid in Denmark. Both are dairy countries where dairy farming is the leading industry in agriculture.

On dairy farms in Wisconsin the ruling wage is from $30 to $40 a month. In Denmark the women, who in many instances do a man's work, get $6 a month, and the men are averaging $10 a month and board. The figures given for Denmark are for 1915, which is considered one of the best that country ever had. It is a fact, however, that the cost of farm help in Wisconsin is leaving a great many farmers seriously in the lurch.—Hoard's Dairyman.

HUGHES AND PEACE.

Justice Hughes cannot from his seat in the supreme court bench make a declaration of his ideas of preparedness, nevertheless one can find included in a statement of his views on national questions made in 1908 a pretty certain line on what his views are. He then stated them in a public speech, when he said:

"We are devoted to the interests of peace and we cherish no policy of aggression. The maintenance of our ideals is our surest protection. It is our constant aim to live in friendship with all nation and to realize the aims of free government, secure from the interruptions of strife and wastes of war. It is entirely consistent with the aims and it is our duty o make adequate provision for defense and to maintain the efficiency of our army an navy, and this I favor."

This was spoken in calm and sober days and not when preparedness has become a bid for office.—Watertown Times.

MOTORCYCLE MADNESS.

Danger hitherto unknown, from the reckless overspeeding of motorcycles, which continues in spite of the recently enacted restrictive law, was brought to notice somewhere in the City of New York a day or two ago.

An infant held in the arms of a woman who was riding in the side seat of one of the vehicle which was driven by a male person with utter disregard for safety, narrowly escaped death by suffocation.

The mother noticed, fortunately before it was too late, that the child had ceased breathing. The terrific air pressure against its face caused by the excessive speed had made exhalation impossible. A physician's services were required to restore the little one to normal condition.

But probably nothing short of general and strict enforcement of the law regulating motorcycle speed, through imposition of its penalties, will cure the madness that afflicts many riders of such vehicles.—Albany Journal.

PHYSICAL UNPREPAREDNESS

There are other forms of unpreparedness, that characterizes this nation besides that concerned with our defence. The Sun has spoken of hygienic preparedness and of medical preparedness. Are the men of this country physically prepared to meet the demands that may be imposed upon them by the strenuous activities involved in drilling, marching and other exertions incident to preparation for a soldier's life?

Is it not high time, in view of this fact, that our resources in men were scrutinized that we may know exactly the number of physically fit men upon whom the nation may call when it prepares for self-defence?

While it is probable that the brief instruction received in Plattsburg in military discipline and tactics may be sufficient to enable intelligent citizens to develop these important elements of training by study and practice at home, it is impossible to accomplish their physical preparation. The conclusion from Mr. Rittenhouse's statement is inevitable that much longer physical training, as in the Swiss and Austrian plans, is absolutely demanded for the preparation of our prospective officers and soldiers. This is imperative to insure that the average citizen, who is far below the physical plane of last year's Plattsburg contingent, shall possess sufficient bodily vigor to fit him for service in his country's defence.

The addresses of Job E. Hedges and General Wood, reported in The Sun of May 25, advocating universal military service, should be well taken to heart. Whether universal military service be on the whole advantageous to our people we should at least know where we stand in regard to the health and capacity for endurance of the men upon whom we may be forced to rely for service in time of need.—The New York Sun.

WITH THE SUFFRAGISTS

In Chicago next week will be launched the Woman's Party at a convention called by the Congressional Union. Interest in this new political venture was aroused throughout the West by the Suffrage Special which recently returned from a tour of the principal cities in all the equal suffrage states.

The attendance promises to be enormous if western enthusiasm is any criterion. The policy of the new party is direct action of women voters in the interest of a national suffrage amendment. In short there is to be but one way for a political party to win the votes of western women and that lies in advancing the woman suffrage amendment to the national constitution.

* * *

"To dodge the suffrage issue," according to Representative Mondell in a Washington dispatch, "the judiciary committee has not only neglected suffrage, but all the other important matters responsibility for which has been placed on the committee by Congress. Honest opposition might be forgiven, but the policy of cowardly dodging and of neglect of duty will not be justified by anyone."

* * *

On May 22 the House of Representatives in Committee of the whole voted 67 to 43 in favor of including woman suffrage in the Porto Rican Citizenship bill. On May 23 the provision was struck out by a vote of 80 to 59. Though inserted by the minority leader the vote showed a complete disregard of party lines. The failure of anyone to ask for a record vote prevents, it is believed, any record vote on suffrage before election.

* * *

The mascot of the Iowa suffrage campaign is one Gus Rofipot, who as a resident of Colorado voted for suffrage in 1893, as a resident of Kansas he voted for suffrage in 1912, and therefore as a resident of Iowa he will vote for suffrage next Wednesday expecting a repetition of his former successes.

* * *

Voters who are keenly for or against woman suffrage in Iowa need sacrifice no business or pleasure trip in order to cast their votes on the question. According to the Des Moines Register the election law of Iowa provides for voting by mail.

This convenience for voters also silenced one ubiquitous objection to votes for women based on the fear that a woman's absence from home to cast a vote would injure the home and her presence at the polling place would injure her. Neither is necessary.

CITY HONORS MEMORY OF SONG WRITER

(By United Press)

Pittsburgh—Not the least interesting part of to-morrow's celebration in this city will be the formal opening of the Stephen C. Foster home, dedicated about a year ago to the city in perpetuation of the composer's name and works.

All day and far into the evening a band will play his songs on the lawn. "Old Black Joe," "Swanee River" "Nellie Gray", "My Old Kentucky Home" and other favorites he wrote will be played.

The piano that Foster frequently used and a score of other interesting relics of him have been loaned indefinitely to the city by his descendants and will be attractively placed in the house.

PAPER MAKERS---NOTICE!

[THREE TOUR MILL]

Can use two or three Backtenders and Third Hands, who can handle Fourdrinier machines on dry and water finish. First-class mill, fine locality, houses to rent, good schools.

HIGHEST RATE OF WAGES

Address X, Times Office.

LITTLE TALKS ON THRIFT

By S. W. STRAUS

President American Society for Thrift

The thriftlessness so characteristic of Americans concentrated in cities is becoming quite as common in farming communities and this fact has caused much alarm among those who note the signs of the times and seek reasons and remedies for certain existing conditions.

In the twenty-five States which produce most of the perishable products, the grain, and the cotton of this country there are 2,500,000 tenant farmers. In the last ten years in Texas and Oklahoma the percentage of increase in tenant farmers over the increase in land-owning farmers has been 2 to 1. In Alabama, Arkansas, Tennessee, Georgia, Louisiana, Texas, Mississippi, South Carolina, Missouri Kentucky, Indiana, Nebraska, Michigan, Wisconsin, Minnesota and California there has been an increase since 1880 of 994,361 tenant farmers, while land-owning farmers have increased only 606,755. In Illinois, Iowa, Kansas, New York, Ohio and Pennsylvania, tenant farmers have increased by 121,167, while the number of home owning farmers have decreased by 62,915.

This is alarming for the rural communities when we consider that out of 2,354,676 tenant farmers in the United States at the time of the last census, 2,188,586 were found in these twenty-five states.

The Right Hon. Andrew Fisher, ex-prime minister of Australia, who went to London recently to take up the duties of high commissioner for the commonwealth, is fifty-four years of age and began life as a pit boy with his father, who was a working collier in Kilmarnock, Scotland. He practically educated himself. When he was thirty-one, he entered the Queensland parliament. He steadily climbed the ladder of success, culminating in his appointment as prime minister of Australia in 1910. Men like Andrew Fisher never wait until middle life to begin their economies. They learn to deprive themselves so that they may have independence, and they do not waste even their time, but improve it so that when the opportunity presents itself they will be ready to fill the place of the "man higher up."

George B. Cox of Cincinnati, who died recently, rose from bootblack, newsboy and butcher boy. In the last interview he gave to the public he attributed his financial success to his early habits of thrift. He said:

"From the very first I knew what poverty meant, and for that very reason I began to save small amounts every week.

"The first $1,000 I ever possessed I saved in small amounts. It took years to do it, and it was the hardest money I ever earned, but it taught me the value of saving, for with it I got my start in life.

"When I grew too big to sell papers I became a butcher's boy at $5 a week. I next became a wagon driver, and after I had saved a nest egg I became a salesman."

Afew years ago his wealth was estimated at from $2,000,000 to $5,000,000.

A Rite and a Wrong.

"Marriage," remarked the professor, "was a rite practiced by the ancients"—

"And bachelorhood," interrupted a maiden of forty, "is a wrong practiced by the modern."

Criticism.

"She needn't put on so many airs."

"I should say not."

"It's only two years since she was just as poor as we are."—Detroit Free Press.

BELL-ANS
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

The Season Opens

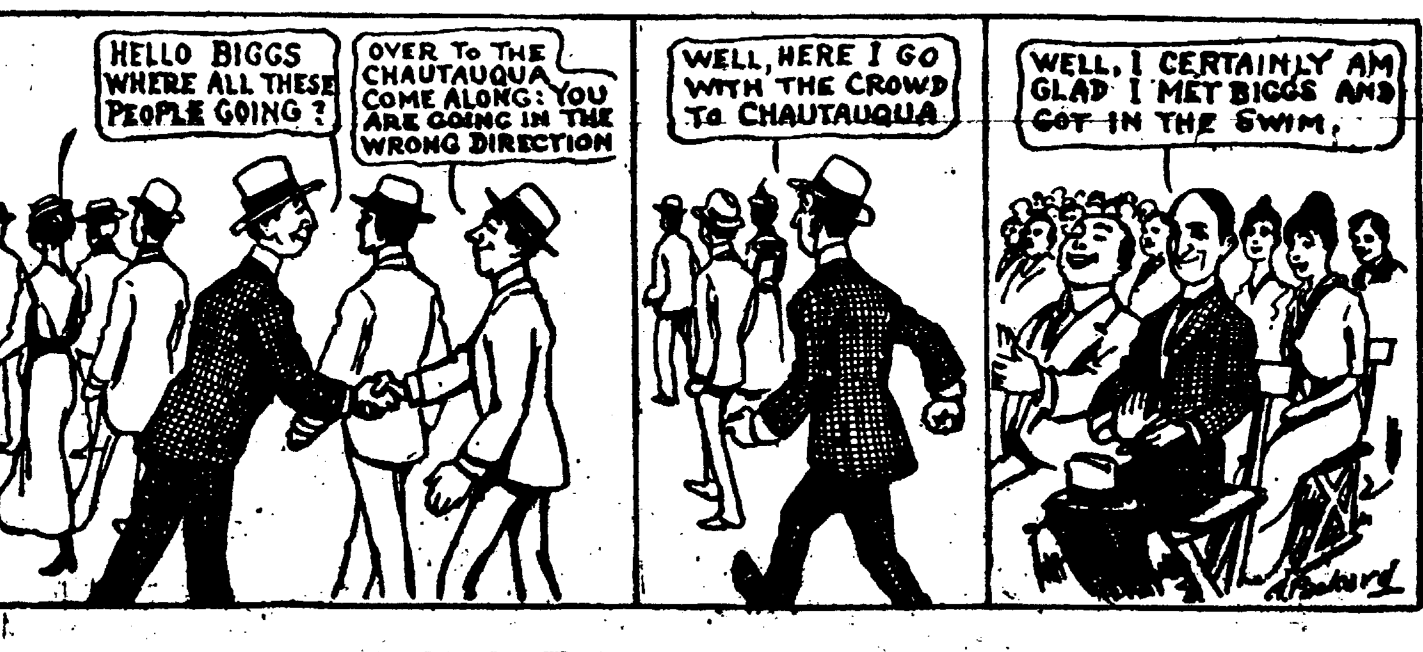
We've had another building boom along
our street this spring.
On every sightly vacant space construction's in full swing.
The masons and the carpenters are busy
every day
To get new summer homes in shape before the 1st of May.
The families have all come back that went
away last fall,
And you can't find a vacant house along
the street at all.

The robins, who are always keen for
places in the sun,
Have picked a plot that's called "The
Elm" and have their camp half done.
The orioles—they like to have a wide and
sweeping view—
Have built an airy bungalow, all spic and
span and new.
And in a leafless hickory stump—half
crumbling and decayed—
You'll find, perhaps, the sheltered home
that Mr. Flicker's made.

The blue birds took the same old house
they had last year again
And let the upstairs tenement to Mrs.
Jenny Wren.
They quarrel sometimes; but, oftener you
know by shreds of song,
They get along about the way most neighbors get along.
Some distance from the busy street, half
hidden in the brush,
A fine large house is going up—the house
of Mr. Thrush.

There's lots of life about the place before
the peep of dawn,
Until the earliest stars are out there's
something going on.
With musicales at 4 a. m. and twilight
serenades,
And picnics every afternoon among the
grassy glades,
And with a peppery fight or two, for ginger now and then,
The long neglected little street is quite
itself again.
—James J. Montague in New York American.

Six Big Days of Choice Entertainment and Instruction



A Little Tale Entitled "I Went"

"I WENT to the bridge at midnight,
While the stars brightly shone overhead,
And wondered what I was doing there
When I should have been home in bed.

I went to a deep running brooklet,
I sat there from morning till night,
And drowned a hundred poor fish worms
Without ever getting a bite.

I went on a bloomin' jury
And balloted three days straight
Till a bailiff came along with a mop rag
And wiped us clear off the slate.

I went to a big street fair carnival,
Then an old fashioned log rolling bee,
But of the places that I have visited
There's one which makes the big hit with me.

I met my friend Biggs one hot weekday,
He was moving along with the crowd.
'Come on, join the bunch at the big tent,'
He said to me, looking quite proud.

So I went to the Redpath Chautauqua;
They gave me a comfortable chair,
And that program was sure a hum dinger—
Say, man, I was glad I went there!"

—Contributed by a Chautauqua Fan.

PENSIONS FOR GEESE.

Pair Will Have a Pond and a Grass Plot In a Zoo.

Cleveland, O.—Age, a cook executioner, a platter on the dinner table and a hungry family have no terrors for a goose and a gander penned up in Mrs. Ray Boey's back yard at 3420 West Forty-ninth street.

Having reached the ripe old age of thirty-six years, Dick and Mary—for these geese have names—are going to be pensioned. They will spend their declining years in luxury on a pond and a plot of grass in Brookside zoo.

These geese were raised by Mrs. John Benns, Mrs. Boey's mother. It was her wish that they be allowed to die a natural death.

Mrs. Boey, unable properly to care for her elderly charges, appealed to Councilman Dickerson to provide a home where they might enjoy comforts which the confines of a back yard denied them. Councilman Dickerson secured their admittance to pension privileges at the zoo.

HARVARD'S LOVE OF DRAMA.

Over $20,000 Spent by Students For Tickets Last Year.

Cambridge, Mass.—During the theatrical season now closing Harvard students have paid between $20,000 and $25,000 to support the drama in all its forms, according to N. R. O'Hara, a graduate student with a fondness for statistics, who has visited the box offices of the principal theaters. Musical comedy, he finds, has the greatest following in the student body.

The down front seats, retailing at $2, have a steady sale at Harvard. Next to musical comedy, farce and the straight drama fight it out for second place. The average Harvard student, O'Hara says, sees at least five theatrical performances a year, at an average of $1 a ticket. The movies are not counted in.

A Prince Edward Island Legend.

There is a delightful legend among the people of Point Prim to the effect that when the English attacked the French fort at that place a chain ball from one of the attacking vessels cut the steeple from the old church located over the promontory and carried the bell which it contained into the sea. Dwellers along the point affirm that from time to time the sound of that bell comes over the waters at eventide and that its phantom tone is ever a warning of a fierce storm or some imminent danger to those who make their living by the spoils of the ocean.—Exchange.

A Hunting Expedition.

One night a pretty young matron was sitting in a moving picture theater with a young friend when a young woman came in and took a seat beside her.

"Why, Bessie," wonderingly exclaimed the young matron, recognizing the newcomer, "what in the world are you doing here alone?"

"I'm looking for a husband, dear," was the quiet response of the other.

"A husband!" exclaimed the first, full of perplexity. "Why, you have a husband!"

"Yes," sweetly smiled Bessie. "That is the one I am looking for."—Philadelphia Telegraph.

Its Style of Conversation.

"Money talks."

"So it does, and it generally talks cents."—Baltimore American.

TRIBE NOW DEAD.

Ishi, Noted Aborigine, Succumbs to White Plague.

ORIGIN MADE HIM FAMOUS.

Shown as Survivor of Last Tribe of Deer Creek Indians of Yano Line. Lived on Victims of His Bow and Arrow.

San Francisco.—Ishi has been gathered to the land of his fathers.

Last of the Deer Creek Indians, tribe of Yano, Ishi has gone to the happy hunting grounds. He died at the University of California hospital, a victim of the "white plague," disease of the paleface.

For several months the aborigine, who was captured in the wilds of northern Butte county in the summer of 1911, had been in ill health. A year ago he developed acute lung trouble, and at times he suffered greatly, bearing his pain with the stoicism of his kind.

Just a few minutes before he passed away Ishi joked with Curator Gifford of the affiliated colleges. At that time he was in agony. Final relief came with a hemorrhage.

Ishi, who never had seen any money of the white man until he was brought into civilization, left what he considered a fortune in worldly goods—about $350 and personal effects. With the common desire of all California Indians, Ishi labored to accumulate wealth. Unlike the members of most tribes, whose standing is rated by what they give away, Ishi, with the characteristics of California and British Columbia Indians, hoarded his pennies, which he earned in various ways. His estate was taken in charge by the public administrator.

Ishi, living the life of a savage in Butte county, stole a calf in the summer of 1911, and officers of the law ran him down. They were amazed to discover the thief was a primitive creature, clad in animal skins and armed only with a bow and arrow. The prisoner was taken to the Butte county jail, and it was there that T. T. Waterman, assistant professor in anthropology, pronounced him to be the only surviving member of the lost tribe of Deer Creek Indians of the Yano line.

The scientific world was greatly interested in Professor Waterman's announcement, and Ishi became famous. He was brought to this city and lodged at the affiliated colleges on Sept. 4, 1911. After months of patient effort Professor Waterman was able to talk with Ishi. What he learned from the captive left no doubt in his mind that Ishi really was the last of the savage tribe of Deer Creek.

Ishi adapted himself to the ways of the white man. He built himself a home on the grounds of the affiliated colleges, where he was the object of much curiosity. He attended lectures by Professor Waterman and other savants of the State university.

In May, 1914, Ishi took Dr. A. L. Kroeber, head of the affiliated colleges museum, and Dr. Saxton T. Pope to Butte and showed them his former haunts, reverting to his skins and bows and arrows. The report of Dr. Koeber and Dr. Pope confirmed the belief of Ishi's descent.

KILL 2,000 RABBITS IN DRIVE.

California Farmers Wreak Vengeance on Field Pests.

Stockton, Cal.—It is estimated 2,000 jack rabbits were killed in the south San Joaquin district and at least one coyote met his fate in the rabbit drive held by the south San Joaquin farmers under the direction of Ed Powers of Manteca and county farm bureau officials.

Hunters from all parts of the country gathered in the south San Joaquin during the morning, and when the chase started at 9:30 o'clock there were more than 400 shotguns pointed out toward the hiding places of the long legged jacks.

The march on the rabbits lasted from 9:30 in the morning until after 2 o'clock in the afternoon, and during the afternoon hundreds of automobile parties visited that part of the country to see the huntsmen and others gathering up the slain field pests.

MONKEYS SCARE CO-EDS.

Human Skeleton Placed Near Girls' Dormitory Also Causes Terror.

Alliance, O.—Five stuffed monkeys taken by students from the museum of Mount Union college and placed at strategic points near the entrance of Elliott hall, the girls' dormitory, frightened the co-eds when they left the dormitory.

Scarcely had they recovered from their terror when they saw a human skeleton dangling from a tree near by. It, too, had been taken from the museum.

The library also was entered, and books and catalogues were disarranged. As a result an investigation is being made.

CHICKENS KNEW HER.

And Kansas Woman Had No Trouble Getting Them Back.

Wichita, Kan.—Mrs. John Matthews, residing on Kelly street, stopped abruptly in front of 312 West Third street one morning lately. Inside a chicken fence were many chickens. Among them were four large White Orpingtons. She observed them keenly.

"Those are mine," she said, satisfied, and then she sought out her husband. Together they went to city court and got out a search and seizure warrant. Then, in company with William Ballard, deputy marshal, they went back again to 312 West Third street, opened the chicken yard gate and walked into the pen.

A woman ran out on the back porch and demanded to know what business the party had in her chicken yard.

"Just came after my chickens," retorted Mrs. Matthews as she called to her "pets." The four big chickens ran up to her, and she picked them up.

"I had 'em marked with blue ribbons," she told the marshal as she lifted the feathers on the legs. Sure enough there were the ribbons!

"Yours!" said the deputy marshal. "But the judge will have to act before you can have them."

These Things Endure.

Some of the things that are not easily worn out by much using: The ground we walk on (but we can exhaust it by bad farming), the love we live by (but we can tarnish it); the mirror in which is reflected the true appearance of things.—Collier's Weekly.

Standing By.

"Didn' Mistoh Pinkly stand by you when de mixup took place?"

"Yes," replied Mr. Whiffletree Dawson. "He were standin' by me, jes' close enough to take a good aim when he hit me behind the ear."—Washington Star.

Inherited.

Knicker—Jones has a bad memory.
Bocker—His mother never knew what were trumps, and his father couldn't remember anything on the witness stand.—New York Sun.

Makes Her Dumb.

Nodd—What! You are out every night until 3! Isn't midnight late enough?
Todd—I find that when I get home at midnight my wife can talk to me, but when I get home at 3 words fail her.—Life.

IN YOUR KITCHEN.

Not Expensive Equipment, but Arrangement Counts.

STEPS IN GETTING MEALS.

An Expert Tells Us the Necessary Work In Preparing and Clearing Away Foods, While Cutting Out All Pottering That Takes Time and Energy.

Have you ever watched yourself preparing supper? What are all the steps you must take from the time you take the roast from the refrigerator until the last dish is washed and laid away on its shelf?

1. Remove foods from refrigerator, pantry or other storage.
2. Beat, cut or mix materials and put in cooking utensils.
3. Place on stove or cooking device.
4. Serve completed dish to dining table.

These four steps are taken in preparing any meal in any kitchen and are always done in this order, although we may not notice it. This is the reason why the equipment which corresponds to these steps or on which they are done must also be arranged in the same order—that is, the equipment which corresponds to step 1 is refrigerator or pantry, to step 2 the table or kitchen cabinet, to step 3 a stove or fireless cooker, to step 4 another table or working surface.

Because these same steps are taken in every kitchen the arrangement of this equipment can be exactly the same. In some homes a larger refrigerator may be required, or there may be an electric stove instead of a gas stove. But the placing or the arrangement of them will be the same in their respective kitchens. So you can arrange your particular equipment in the same right order, so that the refrigerator, table, stove and serving table are in one group on one side of the room. For clearing away meals—

1. Take soiled dishes from dining table and lay to right of sink.
2. Wash dishes.
3. Drain to left of sink.
4. Dry and lay away.

Therefore on the other side of the kitchen we arrange the equipment to correspond to these steps. In other words, the "clearing away" equipment of drainboards, sink and shelves are in another separate group from those of "preparing."

The basis of the labor saving kitchen is here: Keep the equipment of preparing the meal and clearing away the meal entirely separate. The reason some kitchens are difficult to work in is just because the sink is next the stove or the refrigerator is away from the kitchen table, or there is some other poor arrangement which makes it necessary for the worker to trot back and forth, taking useless steps. You will know how to arrange every single piece of equipment in your kitchen if you see that it is so placed that in working you move continuously in the same direction, making a "chain of steps." For instance, you know that it must be wrong to have a sink at the right of the stove because you never take the hot pots from the stove and lay them into the sink! No! You need a table to the right of the stove, do you not? Similarly you want the shelves on which dishes are to be laid away near the sink to avoid carrying trays some distance.

Saving His Strength.

"Say, you, I advertised for a strong boy."

"Well, ain't I a strong boy?"

"You don't show it. Why, you make a four round contest out of licking a stamp."—Pittsburgh Post.

CHAMBER OF COMMERCE

"Fulton First, Last and All the Time"

Edward O Tilburne says:

"Publicity is the art of making matters public. It is the act of letting people know. It is the business of letting others know what you know concerning some things which you believe he ought to know.

"Publicity calls for giving information. Information should be based on facts. Facts are the figures of God. God is truth—therefore, publicity is the art, act and business of telling the truth concerning any matter of information coming from the informant to the informee (if this word be allowable).

"Publicity as now practiced may be classified as follows: First—The Flim kind; second—the Flam kind; third, the Real kind. The first may be termed the Flimsy kind, of publicity (flim for short) which takes a little bit of truth and stretches it so thin that it is easily seen through and is not recognized as being substantial.

"The second may be termed the Flamboyant kind (Flam for short) which deals in adjectives and indulges in exclamation points. It goes largely to brass bands and torchlight processions and red letter scareheads. It carries weight through excitement which some folks think is synonymous with enthusiasm. The flamboyant kind of publicity finds a village and calls it a city. It discovers acreage tracts in the sand hills and dubs them "Magnolia Terrace." It is largely in evidence in rapidly growing cities and is the ammunition of the 'town boomer.' The politician adopts it as his regular diet. These two first may be termed for the sake of brevity, 'Flim-Flam publicity,' which being defined also for the sake of brevity, is pure 'bunk' or 'con' or in other words—representing with the appearance of truth that which is questionable as to value, or unquestionably valueless. And here you have flim flam publicity.

"Real Publicity tells the truth. Tells it in an attractive manner and appeals to the intelligence of the people. It gives facts, presents proofs and craves investigation. It is modest, yet positive. Dealing in statistics, it leaves no avenue open for doubt. It convinces because it is truth. It accomplishes good because it is the soul of verity, incarnated in the body of veracity. It asks no better favor than a thorough delving into the facts offered for consideration. It may be a matter of opinion as to its ultimate outcome, but it is a matter of fact in its presesntation of conditions. One fact outweighs in importance a million theories or matters of opinion."

Our Employment Bureau has work for three teamsters—four farm helpers—two or three helpers in machine shop and one bookkeeper. Who wants the job?

* * *

June the 8th through the kindness of the Happy Hour Theatre Manager there will be a benefit for the CHARITY DEPARTMENT of the City of Fulton. This movement is endorsed by the Fulton Chamber of Commerce. Good true Fultonians help your city first. Buy a ticket and attend the movies on Thursday, June 8th, at the Happy Hour Theatre. Tell all your friends, let's all help to swell the fund. It will only require a smal amount from each one to make a large amount to help the charity department.

A Useless Member.

Unlike most little boys who have never attended school, little Arthur was firm in his determination not to go. Finally his favorite Aunt Emma was called in to use her persuasive powers in breaking his will.

"Why, surely, Arthur," said his aunt, "you are going to school with your big sister in the fall."

"No, I'm not going to school at all," steadfastly declared the little chap. "I can't read, nor I can't write, nor I can't sing, so I'd like to know what good I'd be at school!"—Exchange.

Modern Persian Is Simple.

Modern Persian shares with English the reputation of being a singularly easy language to learn, the chief trouble being that it is written in the Arabic character. It had, however, at one time three numbers and eight cases, and the Avesta, the chief book of the Zoroastrians, is only to be understood by the ripe scholar. But modern Persian has no cases, no declensions and no genders and may therefore be mastered without tears and without the application of wet towels to the head.—London Chronicle.

7 REASONS WHY

you should wire your home for electricity:

1—It is absolutely safe.

2—Electric light is the next to daylight light.

3—Convenient—Just push the button.

4—Service—when and where you want it.

5—Cleanliness—no soot dirt or matches.

6—Household Helps—the greatest aid to modern housekeeping are run with electricity.

7—The Home beautiful—the home wired for electricity.

Have a talk with our representative and learn about electric service.

THE ELECTRIC CO.

Phone 144

ELECTRIC CO. IS THANKED

The Rev. Charles S. Robertson, in behalf of the executive committee of the Peacock campaign has sent to the Fulton Light, Heat and Power Company the following letter of appreciation:

Gentlemen:—It gives me great pleasure to send you herewith the unanimous action of the Executive Committee of the Fulton Evangelistic Association.

"Moved that we instruct the secretary to express our heart-felt gratitude to the Fulton Light, Heat and Power Company for its great and unusual generosity in supplying without charge the power for the lighting of the tabernacle during the six weeks of the Evangelistic Campaign. We recognize the kindly spirit that prompted this donation of hundreds of dollars. We assure you that no money expended by you could possibly do more good, as thousands of people have been led to begin better lives and the entire community and surrounding country have been immeasurably benefitted. Copies of this resolution are to be supplied to all the local newspapers, sent to the local office of the Light Company and to Mr. Warner, its president."

Respectfully yours,
CHARLES S. ROBERTSON,
Secretary Executive Committee.

YOUNG PEOPLE DANCE AT THE OSWEGO NORMAL

Among those who e attended th Junior Prom at the Oswego Normal school last night were Miss Mary Webb and Miss Katherine Merriam, Theodore Foster, Edward McGovern, Fred Feeley, Edward Carroll, Vincent Carroll, of this city. The dance was one of the most enjoyable ever given at the Normal school and continued from an early hour in the evening until 11 o'clock. Music was furnished by the Loomis orchestra.

WANTED!

Girls at 551 West Third Street,

TELEPHONE 175

STARS ON BOTH B. B. TEAMS

When the Fulton Red Men take the field against the Jordan semi-professional team at the Fair grounds tomorrow afternoon, the local team will present one of the strongest line-ups of the season. Painter has been selected for mound duty by the locals and Briggs will do the receiving. Other well known players who will wear Fulton uniforms are E. Brown, Dingle, McCullom, Hayes, H. Ingamells, W. Ingamells, and F. Brown.

The Jordan team is one of the strongest in this section of the state and some of the several former college stars and state league players will appear in the line-up tomorrow.

In order to pay the heavy expense of the game, The Red Men will need the support of all the local fans and a large crowd of rooters is expected. Accompanied by a large delegation of fans from their home town, the Jordan team will make the trip here in a special trolley.

Fulton Keynotes

The women of Columbia Circle will meet at headquartess tomorrow evening at seven o'clock, to march from there in a body to the First M. E. Church, where memorial services will be conducted by the Rev. J. W. Barrett.

* * *

The G. A. R. and Sons of Veterans will march to the First M. E. Church tomorrow evening. Memorial services will be held under the auspices of the two organizations.

* * *

Edmund H. Deuel, of Chester, Pa., has returned to that city after spending the holiday with his family in this city.

* * *

It was "get-together" night at the Baptist Church last night, when the new members became acquainted with the new pastor and with each other. It was good to be there, too.

Flower Scents.

True flower scents are obtained in three ways—first, by spreading fresh blossoms upon glass thickly smeared with pure grease, letting them stand in the sun and as they wilt replacing them until the grease is as fragrant as the flowers; second, by repeatedly infusing fresh petals in oil, and, third, by infusing them in ether, which is then distilled to a dry solid.

SAVINGS ACCOUNTS

More people are opening Savings accounts this year than ever befor. Prosperity is here; now is the time to save.

Open your savings account and send your deposits by mail.

Prompt and efficient service.

ABOUT THE TOWN

Rev. H. D. Holmes and Dr. P. C. Knapp of this city, assisted at the noon meeting given by Rev. Sam Small, the anti-saloon evangelist before the men of the New York Central shops in Oswego yesterday. Mr. Holmes introduced Mr. Small and Dr. Knapp sang two solos during the service, both of which were generously applauded.

* * *

Before The Public Service Commission of the Second District, the Fulton Light, Heat and Power Company yesterday made application to issue common capital stock in the company to the amount of $150,000, par value, or such other amount of par value as may hereinafter be determined.

The company also made application to hold and to sell such stock for the purpose of reimbursing its treasury for money spent for improvements in its system here and other expenses.

* * *

A large delegation of Irishmen and those in sympathy with the Irish movement for freedom, from this city, will go to Syracuse Sunday night to attend a meeting under the auspices of the Brian Boru branch of the Friends of Irish Freedom. The meeting will be held at the Empire theatre and the chief address will be delivered by Justice John W. Goff, of the Supreme Court, who will speak on "The Dead of Dublin." Justice Goff has been very prominent for many years in the ranks of the American movement to aid the Irish people in winning their complete independence from English rule.

Jeremiah A. O'Leary, well known New York attorney and an orator of some repute, will also deliver an address and it is quite likely that aJmes K. HacGuire, former Mayor of Syracuse will speak. An extensive program of Irish music, which will include vocal solos by well known artists, has been arranged for the meeting.

* * *

The strike situation at the Peter's Chocolate Company plant in this city remains unchanged to-day. The company has engaged a few new men, but most of the machinery is not in operation, and no arbitration with the strikers will begin until Monday, when orders from the New York office will be received here. One of the strikers said yesterday that the company was 800 cases of chocolate behind on one of their orders, and that some action would have to be taken in a very short time if the company did not wish to default on several contracts.

* * *

Mayor Lewis has not yet received a notification from the State Highways Commission concerning the contract for the paving of East First street, but news of the letting of the work is momentarily expected.

* * *

All of the Old Home Week committees are hard at work on the plans for the celebration which is slated to take place here early in July. Secretary D. S. Hollenga of the Chamber of Commerce anticipates 15,000 visitors during the week, and as one man remarked yesterday "There's plenty of room for them here."

LOCAL MARINE AT THE FRONT

Eugene A. Cushman, son of William A. Cushman, a former resident of this city, who entered the United States Marine Corps service in Syracuse February 4, has been detailed for service in Santo Domingo and selected as a member of a force of picked men to guard the American Legation there during the current revolt. Several skirmishes between rioters and the American troops have already enlivned the young soldier's life, and in a letter to a friend in this city, Mr. Cushman says there is little likelihood of his becoming tired of the service for lack of action. The presidential forces under President Jimines and the revolutionists have engaged in many hot battles.

Young Cushman and the other marines were transported to Santo Domingo on the battleship Tennessee. The former Fulton lad, while still very young, stands well over six feet in height and always evidenced a desire to follow a military life. While at school in this city he was one of the star athletes of the Fulton High School, a strong swimmer and a crack shot. His father, who made his residence here during the Barge Canal operations, is now living at 712 East Jefferson avenue, Syracuse.

Took the First Prize.

Cook—My dog took first prize at the cat show. Hook—How was that? Cook—He took the cat.

MERCHANTS' CREDITORS ACCEPT 20 PER CENT.

Referee Avery S. Wright filed in Federal Court yesterday a report in the case of Harry A. Allen, merchant of Fulton. The referee recommends to the creditors of Mr. Allen that they accept his offer of settlement, which is at the rate of 20 cents on the dollar. A majority of the proved claims, both in number an damount, have already signified in writing a willingness to accept the offer.

The bankruptcy proceedings have cost only $33. Among the creditors is the city of Fulton, which will be paid $76, its full claim for taxes. The other Fulton creditors are William J. Hartnett, $500; Birney Clark, $120 and First National Bank, $1,563. The liabilities of Mr. Allen, according to his schedules, amount to $12,763 and assets, $5,093. Judge T. Ray will approve the settlement unless some creditor gives good reasons why it should not be approved.

WOMEN TO HOLD MASS MEETING TOMORROW

There will be a mass meeting for women only at the Baptist Church tomorrow afternoon at three o'clock. This will be a union evangelistic service, to be addressed by Mrs. Robert Dey of Syracuse. The chorus choir under the direction of Mrs. L. P. Smith will lead the singing and everyone is requested to bring the tabernacle song books. A cordial invitation is extended to every woman in the city to be present.

FSB

William J. Lovejoy, PRESIDENT — Harry L. Stout, TREASURER

HAVE YOU PLANTED YOUR GARDEN?

If not, do it now, and at the same time plant $5 in this bank. We will increase it at the rate of 4 per cent. Enrich the account with $1 each week and you will soon have a fine healthy growth.

Pulpit and Pew

CHRISTIAN SCIENCE.

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday, in the Van Wagenen Block. Miss Ada Thayer, first reader. You will be welcome and interested to attend one or both services.

The subject for next Sunday is: "God the Only Cause and Creator." Golden Text: Isaiah 43: 15. Responsive Reading: I Kings 18: 1, 17, 18, 21-24, 36, 38, 39.

ALL SAINTS' CHURCH.

(Rev. Minor J. Peters, Rector.)

Sunday, June 4th—Sunday after Ascension Day.

Services as follows:

Holy Communion, 8:00 a. m.

Holy Communion and Sermon, 10:30 a. m.

Sunday School and Bible Class, 12:00 n.

Evensong and sermon, 5:00 p. m.

All will receive a cordial welcome at these services.

FREE METHODIST CRURCH.

State and South 3rd Streets
(Rev. C. A. Balch, pastor.)

Sunday services as follows:

10:15 a. m., preaching by the pastor; subject, "The Simplicity of the Gospel."

12:00 o'clock Sunday School.

6:45 p. m., Prayer service.

7:30 p. m., Preaching by the pastor; subject, "The Sleeper Awakened."

Tuesday night, class meeting.

Friday night, cottage meeting.

PRESBYTERIAN CHURCH.

(Charles S. Robertson, pastor)

Point meeting of the three official Boards at 10:00 o'clock.

Morning worship at 10:30 with sermon on the theme, "God Speaking Through His Son."

Bible School at noon. All scholars urged to attend.

Evening worship at 7:30, with sermon on "The Ways God Draws Men to Himself." This service will be followed by a meeting of the session to receive members.

CONGREGATIONAL CHURCH.

(Rev. Charles Olmstead, Pastor)

At the morning service to-morrow, at 10:30 a large class will be received into membership, either on confession of faith and baptism or by letter. Sunday School will meet at the noon hour, with classes for all. Christian Endeavor Society will hold the monthly consecration meeting at 6:30 and it is hoped to make this a rally for the new and old members.

At the evening service at 7:30 the pastor will speak specially to the new church members and all who are setting out on the Christian life. The tabernacle song books will be used at this meeting.

On Monday night the members of the Brotherhood will hold their monthly business meeting in their rooms in the church basement. All members are urged to be present and a cordial invitation is extended to all men among the new "trail hitters." Lunch will be served and a social time enjoyed.

The hard storm of last evening prevented many from attending the "Get Together" and "Get acquainted" meeting at the church, but over a hundred gathered to enjoy a social time. The chapel was artistically decorated in purple and white with a huge centerpiece of lilacs, and cake and ice cream were served. Those who braved the weather felt that the occasion was worth while.

The pastor and committee will be at the church this evening at 7:30 to meet any others who have not been able to come the previous nights this week, to enroll for church membership, in order to unite tomorrow.

STATE STREET CHURCH.

(Rev. H. D. Holmes, Pastor.)

A large class of probationers will be admitted at the Sunday morning service at 10038 o'clock, and the same ceremonies will be conducted in the evening at 7:30. The pastor will preach at the latter service, the subject to be announced from the pulpit.

The Sunday school will rally at the noon hour; classes for everybody.

For the first time since the beginning of the tabernacle campaign, the Epworth League will hold a meeting at 6:30 p. m., and a large attendance is anticipated.

A cordial welcome awaits the stranger in the city at all services in State Street church.

IT'S FOOLISH TO SUFFER

When So Many Fulton People Are Pointing the Way Out

You may be brave enough to stand bachache or headache or dizziness. But, if, in addition urination is disordered, look out! If you don't try to fix your sick kidneys, you may fall into the clutches of dangerous disease before you know it. But, if you live more carefully and help your kidneys with Doan's Kidney Pills, you can stop the pains you have and avoid future danger as well. Don't experiment—use the remedy Fulton people are publicly endorsing. Read this case:

Mrs. E. Randall, 222 S. Second st., Fulton, says; "I had kidney trouble and suffered from lameness in my loins. I also had dizzy and nervous spells. I did not rest well and was annoyed by the kidney secretions. Doan's Kidney Pills stopped the pains and aches and regulated the kidney action."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Randall had. Foster-Milburn Co., Props., Buffalo, N. Y. adv

AUTO OWNERS' REAL LIABILITY

Their Relation to the Railroad Companies in the Event of Accidents.

In its current issue Bench and Bar considers the question of liability for automobile accidents. It points out that the liability of the owners is governed by the ordinary rules in the law of master and servant; but these rules now have at times a novel application. In probably the majority of actions against railroad companies the question whether the agent was acting within the scope of his uathority does not arise, whereas it probably does arise in a great majority of automobile cases. The chauffeur usually has access to the machine and can, if so disposed, use it for his own purposes. His liberty of action is much greater than that of the driver of a locomotive engine or the motorman of a street surface car. Hence the question whether his acts are attributable to the owner is continually litigated.

The cases in which he chauffeur is engaged upon his own business, not mis master's, fall roughly into three classes—where the owner expressly forbids the chauffeur to use the car except when instructed to do so, upon the business of the former; where the owner neither permits nor forbids the chauffeur to use the car, and where the owner expressly permits the chauffeur to use the car upon his own affairs. The courts in this State have so far refused to make any distinction between the three classes of cases. In each of them the owner is absolved from liability for an accident which happens while the chauffeur is thus acting for himself, although the rule that the owner is not liable where he expressly permits the chauffeur to take out the car for his own purposes has met with considerable opposition.

In this state of the law it is hardly to be wondered at that the question whether the chauffeur's negligence is impuable to the owner is so often raised, or that the owner so frequently succeeds in escaping liability. The case is one peculiarly susceptible of a dishonest defense. All that is necessary is for owner or chauffeur, one or both, to swear that the latter, either with or without permission, was using the car for his private purposes. This testimony, if believed by the jury, would defeat a recovery; and it would often, perhaps ordinarily, be impossible to contradict such a story by direct evidence. It is not, of course, to be presumed that the owner would deliberately perjure himself, or suborn perjured testimony from his chauffeur, but where the payement of thousands of dollars depends upon the precise circumstances under which the machine was being used, the testimony of the person directly interested, and, of the servant who caused the injury, is legitimately subject to careful scrutiny. A witness far above the telling of a deliberate falsehood might exhibit a defective memory on such an occasion. Data of this character are too abundant to be overlooked by the student of the psychology of human deception. It is a case where the good sense of a jury ought to play an important part. Where they have seen all the witnesses, and, under proper instructions, find a verdict for the plaintiff, it ought not to be lightly disturbed, even if in arriving at it they have disregarded the testimony of some of the interested witnesses. Such a verdict, in the opinion of Bench anr Bar, should not ordinarily be set aside on appeal, although there are instances in which this has been done.

Phoenix Caused H.S.'s Second Grief

The All-Phoenix baseball team proved too strong for the Fulton High School lads yesterday afternoon, and won the final decision in a closely contested game by the score of 6—5. Some absent-minded moments on the part of several local players were responsible to some extent for the loss of the game, for the Fulton lads were able to find Thomas for nine hits, while the Phoenix team gathered only six safe bingles from Rowlee's delivery. Poor base running and inability to hit at opportune times on the part of the Fultonians were the direct causes of the defeat.

Phoenix put over a run in the first inning. After Hotaling walked, and stole second, Rowlee fanned Seabury, but Reagan doubled, scoring Hotaling. Fulton took the lead, however, in the second frame, when Green took first after stopping one of Thomas's fast ones with his bean, and Reynolds almost started a riot by actually driving out a three bagger.

Phoenix came back strong in the third and scored four runs, by a batting rally that had Rowlee looking toward the bench with fond eyes. Hotaling ambled, Seabury doubled, C. Reagan was hit by a pitched ball, and Thomas pulled the clean-up with a triple. Thomas scored on Murphy's long liner.

The locals showed their gameness by staging a rally in the fourth that netted two runs. Green was passed, and Lewis doubled. Rowlee reached first on an error while Lewis was scoring, but Dingle went to the bench via the strike-out railway.

In the seventh the Fultonians made frantic attempts to win before sinking for the third time. Dingle hit safely and went to second on Bray's single. Dingle was caught off second but poor handling of Barnes' roller allowed Bray to score. O'Brien flied out and Green fanned.

Bray carried off the batting honors for the locals, getting three hits out of five times at bat. Barnes and Lewis also did good work with the war clubs.

Denver Abandons Commission Gov't.

(By United Press)

Denver—Denver has just overthrown the commission form of government after three years' trial. The city to-day is under the former mayoralty scheme.

The change was made at a special election held last month, Rober W. Speer being elected mayor on a charter amendment which was the antithesis of commission government. Instead of five commissioners, Mayor Speer is the government.

While the legilsative power under the new charter is vested in a councilmanic board of nine members, Speer appointed four of them.

The other five were chosen in a manner novel for a city of Denver's size. The Denver Civic and Commercial Association, the Trades Assembly, the Real Estate Exchange, the Rotary Club and the Manufacturers' Association each elected a councilman.

This plan was followed to save the people the cost of an election. Future boards will be elected by popular vote.

The new charter created an Industrial Bureau to encourage industries and the employment of labor.

A "Mayor's Cabinet" was created, consisting of the Mayor, the Manager of Improvement and Parks, the Manager of Revenue, the Manager of Health and Charity and the Manager of Safety and Excise.

Speer appointed these heads of departments.

Division of responsibility caused the downfall of the local commission government. The people wanted a centralized authority and responsibility.

SLAUGHTER OF ROOSTERS GRIEVES THE BIDDIES

Harrisburg.—And now the Pennsylvania hen is a victim of compulsory birth control. Somewhere between half and three quarters of a million roosters which trod Pennsylvania poultry yards happily last Monday morning have gone where the dead roosters go. "Rooster Week" proclaimed by the State Department of Agriculture came to an end today. Officials believe final figures will show close to a million fowls killed.

Suffs Sell Peanuts at Polo Grounds

(By United Press)

New York—The suffs will prove they are real sports at "Suffrage Day on the Diamond" at the New York Polo Grounds while the Giants and Cincinnatis struggle for supremacy before the admiring gaze of thousands of suffrage baseball fans here today.

Twenty-five charming young women in yellow, white an blue will circulate through the crowds dispensing peanuts, peanuts and votes-for-women buttons.

Among those who will carry trays suspended from their necks by yellow ribbons are Miss Agnes Morganthau, Miss Bessie Brainerd, Miss Clara Greenhut, Miss Hannah White, Miss Molly Tolman, Miss Elka Lewi and Miss Elizabeth Seeber.

Last year the suffragists had to ask on bended knees for the privilege of having "Suffrage Day" on the diamond. This year they were cordially invited to return.

The generals who have conducted Suffrage Day are Mrs. Norman de R. Whitehouse and Mrs. John Blair, assisted by Miss Jane Thomson, of Chicago, who has been baking cakes for suffrage in one of Broadway's show windows and selling tickets to her patrons between bites.

The baseball boxes went fast and the following social leaders will appear in their front row boxes—Mrs. Ogden Mills Reid, Mrs. Charles Tiffany, Mrs. Joseph S. Stevens, Mrs. Charles Noel Edge, Mr. Henry White Cannon, Mrs. John Humphreys Watkins, Mrs. Bernard Gimbel, Mrs. Daniel Guggenheim, Mrs. Arthur Scribner, Mrs. Sidney Borg, Mrs. Laurent Oppenheim, Mrs. A. C. Bartlett, Mrs. Newbold Le Roy Edgar, Mrs. Alfred Hess, Mrs. Herbert Collins, Mrs. Richard Billings, Mrs. L. Everit Macy, Mrs. Sam A. Leishon, Mr. E. E. Lews, Mrs. Myron Borg, Mrs. F. Louis Slade, Miss M. D. Barrow, Mrs. H. Hooker, Mrs. Percy H. Stewart, Mrs. Charles P. Howland, and Mrs. Norman De R. Whitehouse.

STREETER & VAN SANFORD.

MUST WOMEN BE CHIVALROUS?

Have Business Demands on Men's Time and Modern Ways of Running Homes Put a New Chivalry In Women's Hands?

ACCORDING to the old conception of chivalry, woman was always the recipient of the care and protection of man. She and her household were defended by man from invasion by enemies, from plunder and other sources of harm.

But is it not possible today that there is a new conception of chivalry in which man is the recipient and toward whom woman must extend a peculiar kind of chivalry developed by modern demands, that the burden of responsibility for family welfare is being more forced into the hands of the woman in the home?

The taking of woman's industries out of the home has not resulted in freeing women from responsibility. On the contrary, it would seem that the more complex our modern living and the more apparently housekeeping burdens are being lightened the greater are certain kinds of burdens which the woman must assume.

Who is responsible for the kind of food, its quality and its nourishing value to the man and the other members of the family if not the woman? Must she not exercise a new kind of chivalry in protecting her family from adulterated foods, from foods made in insanitary conditions, from foods which are denatured of nourishment?

If the modern man is going to be able to meet the increasingly stern struggle for the survival of the efficient must not he be fitted, physically to meet competition? The damsel of old was wont to offer her knight a sleeve of broidered pearls as an incentive to valor, or she gracefully handed him his plumed helmet to make him ready for the fight. But today it takes a great deal more than these slight courtesies on the part of woman to enable her to keep her knight in fighting trim. To a great extent the quality and blending of the foods he eats daily will have more to do with his success than any gaudy trophy woven by her hands.

Today the coffers of the home are guarded or betrayed by the woman. If she is extravagant, if she mismanages, if she refuses to follow businesslike methods in the handling of the gold intrusted to her care, the valor and bravery of the man are all for naught. With the new opportunity of sharing in man's income has come the new responsibility of expending it wisely.

In order to meet these new demands and needs of the times adequately, to assume the attitude of protector and guardian, which is becoming increasingly more difficult, woman will have to adjust her ideas and interests. Instead of spending hours weaving favors she must know if the garments she purchases are made in a sweatshop; instead of gracing the trencher board she must be acquainted with the foods that are used and be responsible for the nourishment of her family; instead of disbursing largess she will sit down with an account book and outline her expenditures after a budget plan.

Woman's chivalry to man—her protection and defense of the home in all of the newer, more ethical and spiritual interests—is the new responsibility the age imposes on her.

Three Small Meals Best.

At the first signs of hateful fat a woman should begin a vigorous campaign against the enemy before she is completely conquered by it. The first and most powerful weapons to use in this warfare against flesh are diet and exercise. The diet should eliminate all sweets, cakes, candies, desserts, sodas, sugar in tea or coffee, all starchy foods, such as rice, white bread, potatoes, beans, peas, and all fatty foods, such as cream, milk and chocolate.

However, it is a great mistake to cut down too much on the amount of food, for it will only produce weakness. Another point about the diet is that it is better to take three slim meals, consisting of nonfattening foods, than to eat only one meal a day in which enough is eaten to make up for four other meals. A great many women follow this form of dieting, giving up all but one meal, but they eat enough at this one repast to make up for all of their dieting.

Washable Dogskin.

We have almost all of us become devotees of washable kid gloves. And each season these gloves become more worthy of our devotion. Somthing new now is the washable dogskin glove—a really dark, heavy glove of dogskin, which is at the same time entirely and satisfactorily washable.

INSTEAD OF STIRRING.

To save yourself the trouble of constantly stirring such things as milk, stews, sauces and custards when cooking them, keep a large marble on hand in your kitchen. Place it in the vessel containing your boiling liquid and it will do the stirring for you by its rolling around automatically. You can then leave the milk, stew or custard and attend to other dishes instead of having to put everything aside to watch the one.

The Pentateuch.

The Pentateuch, or, as it is usually called, "The Book of Moses" (the first five books of the Old Testament), is not thought by the scholars of today to have been written by Moses. Moses could not have written the whole work since it contains the account of his death and burial. The opinion of the best scholarship of today is that Genesis dates from 750 to 850 B. C., Leviticus about 450 or 500 B. C., the whole five books (Pentateuch) reaching its present shape between 450 and 550 B. C.—New York American.

He Went.

Visitor—Is your clock right? Tired Hostess (at the end of her patience and politeness)—Oh, no! That's the one we call the visitor. Visitor—What a quaint name! Why? Hostess—Because it doesn't go.

HE TEMPTS DEATH

Deadly Dangers a Nitroglycerin Maker Must Face.

NEVER IS SURE OF HIS LIFE.

Any Moment the Worker In a Nitrater May Be Blown to Atoms—A Calling That Demands Coolness, Prudence and Daring—One Man's Experience.

Nitroglycerin is made by ordinary sweet glycerin acting with a mixture of strong sulphuric and nitric acid. The glycerin is dropped by a very thin stream slowly into a mixture of three parts nitric and five parts sulphuric acid. During the process the containing vessel is kept cool by a water jacket, and the acid mixture is agitated by a stream of cool air. The temperature is maintained at about 80 degrees. After the operation the whole mixture is drawn off into a tank and is allowed to stand in this vessel, cooled by a water jacket. The glycerin, which is now nitroglycerin, immediately begins to come to the top like cream on milk. This is at once taken care of and is put through various processes to cleanse it of all remaining traces of acid.

In no department of our plant must greater care be exercised than in the nitrator, which is the name given to the building where nitroglycerin is manufactured.

Explosions are frequent, and it takes a man of iron nerve to conduct this department. It is like going into battle every day. Yet in the face of this we have one man who has successfully made nitroglycerin for twenty years, and he lives to tell you about it, only he won't. He is as reticent as the sphinx.

Like any other man of great courage, he does not boast, and John Viewberger will talk about anything except the miracle of his continued existence. I can only say that Divine Providence, a cool head and hands and a stout heart have kept him at his work.

The acid fumes that fill the building at all times when nitration is taking place have long since eaten away the very teeth in his head, but not his pluck. It is a fact that he is provided with a new set of false teeth on an average twice a year. The hair on his head has long ago disappeared, and the fumes have tanned his skin to the color of bronze until he resembles a cave man of old. And yet he has never had a day of sickness in these twenty years. He thinks, as I do, that no disease, no matter how virulent, could successfully combat the nitric fumes that he inhales. So his work has its compensations, if you are pleased to look at it that way.

While nitration of glycerin is going on Viewberger sits on a high stool, his arms stretched over the nitrating machine, one hand on a faucet that controls the flow of glycerin into the acid, the other hand on a valve regulating the cooled compressed air that is forced into the mixture and his eye glued to the thermometer that extends well down into the mixture. I have said that the glycerin undergoes nitration at a temperature of 80 degrees. The temperature is regulated by the quantity of glycerin that flows into the acid. If the temperature begins to rise above 80 degrees he closes his valve slightly, reducing the flow of glycerin, and increases the flow of cool air.

Any little foreign substance that might get into the mixture, even through the acid of glycerin or otherwise, would cause immediate trouble. The slightest leak in the water cooling coils, permitting a little water to get into the mixture, would be the signal for the thermometer to do a marathon, and in a few minutes the whole mixture would reach the degree of heat that would result in an explosion. Viewberger cannot desert his post when the temperature begins to rise rapidly. This condition frequently takes place, and most of the time it can be reduced by cutting off the flow of glycerin entirely and by turning on the air to the full pressure of fifty pounds. Sometimes, however, in spite of all, it will continue to rise, and Viewberger knows or feels that he has lost control. He must leave his mixture to its fate and "dig out."

His building, the nitrator, is located on a hill higher than its surroundings. The hill is a high sand dune. Immediately back of the stool on which he sits is a big door that is always left open when he is manufacturing. Viewberger's method of exit or getaway is to jump out of this door and roll down the hill. While he is on his way the explosion takes place. He has done this some twenty times and yet has never received an injury. He has never been struck with flying debris, although the air is filled with flying pieces of lead and iron. Does history record a greater miracle? Dug out of the sand semiconscious from the impact of an explosion, in the course of half an hour he has been quite himself again, ready to go to work if need be, his only regret being the loss of property sustained by the company.—Willard Fay in Collier's Weekly.

HEN 29 YEARS OLD LAYS EGG.

Spanish Annie Breaks All Records, Delighting Her Owner.

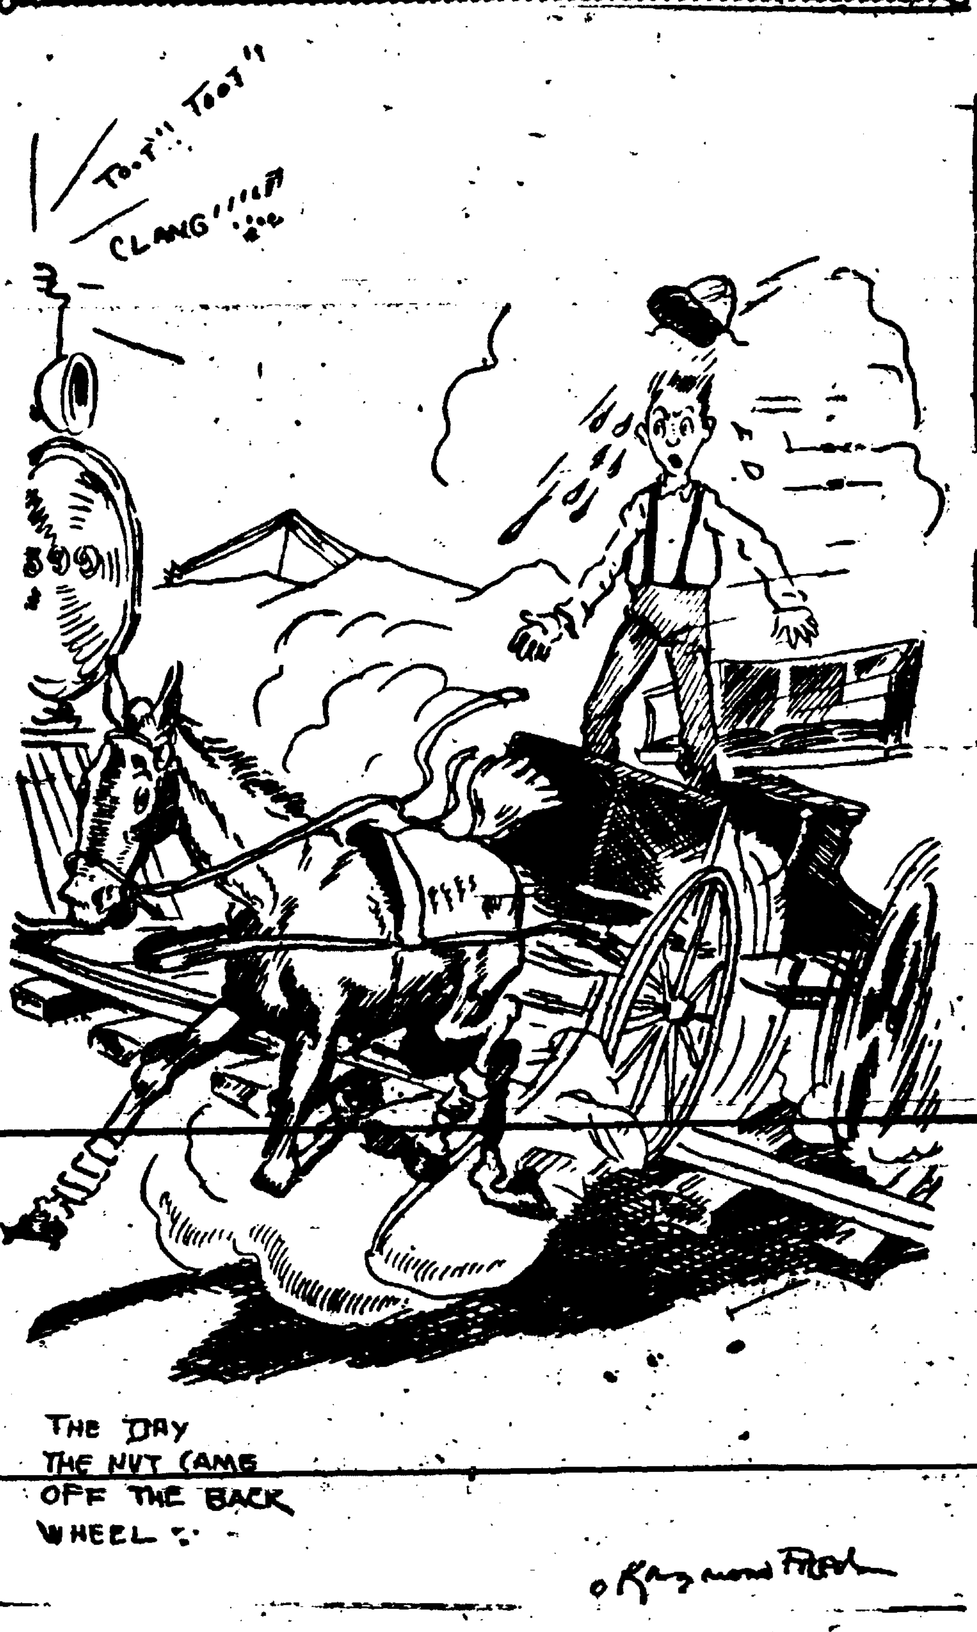
Hartford.—Spanish Annie, the grand old hen of twenty-nine years (duly authenticated), owned by Colonel James Blanchard of Dayville, is quite content to die because recently she performed what is probably her last labor in this world, something beyond "all the king's horses and all the king's men," for she laid a nice brown egg.

Spanish Annie, called because she is of the black Spanish variety, hasn't laid an egg in years. However, within a year she got her name in the newspapers and her picture in many of them when she hatched out a fine brood of chickens and was hailed as the world's champion Biddy.

Colonel Blanchard, who is proud of his famous hen, has discovered from his poultry records that Spanish Annie was hatched July 4, 1887, and for years contributed generously to the Blanchard daily egg supply. Some years ago her shiny jet black feathers began turning white and her eggs were fewer. Then she lost her quick, dashing gait, and at present her feathers are a mottled gray.

Spanish Annie made no particular commotion after laying her egg, but her happy owner arranged a special feed for her.

Days You'll Never Forget



The Romans as Fighters.

The Roman became the greatest soldier in the world simply because he made soldiering his one supreme aim and business. The Romans studied war just as the Greeks studied art, the men of the middle ages theology, the Egyptians the art of agriculture. They despised literature, art, philosophy, commerce and even luxury and set their whole heart on becoming fighters and conquerors. In that way they developed very naturally the genius and means for successful warfare which made them the masters of the world.

There was nothing miraculous in the prowess of the legions. It was the natural result of their undivided effort, protracted through generations.

Eating Meat.

Mankind at large uses in the neighborhood of 47,000,000,000 pounds of meat a year.

Took It Literally.

Just outside Stockport, on the Great Central railway, is a station named Hyde.

The other day a farm laborer was somewhat startled on arriving at the station by hearing the guard shout "Hyde!" The station master, in a raucous voice, also shouted "Hyde!" and several porters took up the refrain, "Hyde! Hyde!"

Wondering what could be the matter, but thinking discretion the better part of valor, the man immediately got under the seat, and it was there the ticket collector found him when the train reached Stockport.—London Tit-Bits.

Glass Eyes.

The world's population makes use of 2,500,000 glass eyes in the course of each year.

CENSUS OF BIRDS WILL BE TAKEN

Local Observers to Make Report to Biological Bureau.

TO COVER ENTIRE COUNTRY

Valuable Information Concerning Character and Kind of Birds Has Been Obtained by Previous Counts—West Especially Called Upon to Co-operate In the Work.

A bird census will be taken during the breeding season this year by the bureau of biological survey of the United States department of agriculture. This will be the third annual bird count for the country taken by the federal government.

In making this survey the bureau will rely largely on persons interested in bird life who will agree to act as volunteer enumerators and count the different kinds of birds to be found near their homes in a farm or woodland tract of from forty to eighty acres. The agricultural department has been furnished with valuable information concerning the character, number and distribution of the bird population through similar counts made by unpaid observers during the past two summers.

This year the ornithologists of the department wish particularly to secure a large number of volunteers in the west to report on the bird life on the plains, the semiarid regions, the deserts and the mountains in that part of the United States. Especial attention also is to be given to securing data as to the birds in the fruit districts of the Pacific coast and in the south Atlantic and gulf states.

The information collected this year, it is believed, will be of special value in enabling the department to meet the effect of state and national bird laws and also in determining what relationship exists between bird life and the prevalence of locusts, grasshoppers and other insect pests in different localities.

Results to Be Approximate.

As it is impossible to make an actual count of all the birds in any extended district each enumerator is asked to report only upon the number of birds breeding in a selected area, in the country or in suburban districts. From the figures thus obtained those in charge of the work are able to approximate the total number of birds of each kind in different parts of the country.

Enumerators who wish to report on birds on farms are asked to choose an area which includes farm buildings, shade trees, orchards, plowed land, pasture, meadow or swamp, but not very much woodland. The enumerator begins his survey at daylight some morning and zigzags back and forth in the selected area, counting the male birds. Early in the morning during the last of May or the first week of June every male bird should be in full song and therefore be easily counted. The count of one day is to be verified by observation on several mornings.

The height of the breeding season should be chosen for this work. In the latitude of Washington the first part of June is the proper date for the count. In the latitude of Boston the work should begin a week later, and south of Washington even an earlier date should be selected.

"The work calls for considerable knowledge of birds, and only those who can readily distinguish the different kinds should undertake to make returns for their localities," says a statement by the department.

Cards on Sunday.

Pepys, the diarist, was greatly scandalized when he first saw cards played on a Sunday. "I did find the queen, the Duchess of York and another at cards, with the room full of ladies and great men, which I was amazed to see on a Sunday, having not believed, but contrarily flatly denied, the same a little while since."

GAS MASK MEETS TEST.

Invention of New York College Men Proves Most Successful.

A gas mask designed for use in trench warfare, invented and patented by two instructors in chemistry in the College of the City of New York, has successfully passed tests of the medical division of the army. The inventors and patentees are William A. [illegible]ger and William H. Estabrooke, in collaboration with Dr. Neish of Columbia university.

Dr. Estabrooke has received a letter from the chief of staff of the medical division pronouncing the device satisfactory and stating that the tests to which it was subjected were more severe than those to be met in actual warfare. The United States army has not yet decided to add these masks to its equipment.

The mask may be of use in several industries and will be placed on the market soon. It is large enough to fit over the regulation army hat. It allows a foot of space in front and a few inches about the back and sides of the head. The bottom fits snugly to the neck. An exterior layer is composed of several chemicals and metals which filter the mixture of gas and air sent against it and permit only the air to enter.

In one of the tests a man wearing one of the hoods sat for several hours while chlorine was being pumped at his head. He suffered no ill effects. The external surface combined with the poisonous fumes gave forth a new substance inhalable without injury.

The mask can be recharged while being worn. It is somewhat like the English model. Thick celluloid pieces permit vision.

Fashionable Calls.

"Who rang the doorbell just now, Katie?"

"A woman who found you out, ma'am."

"But I'm not out, Katie."

"I know, ma'am, but the woman looked as if that was what she wanted to know."

The Fish Course.

BLUEFISH A L'ICARIENNE.—Scale and score two pounds of bluefish; cut into portions; place in a well buttered baking dish, moistening with four tablespoonfuls mushroom ketchup, one-half glass claret and strained juice of one-half orange. Season with one-fourth teaspoonful salt, a pinch of cayenne pepper and a saltspoonful powdered mace, baking in a moderately heated oven for thirty minutes. When cooked lift it carefully out, arranging it on a hot fish platter; pour the gravy into a small saucepan, adding one-half ounce finely minced cooked smoked beef tongue, six chopped olives and thickening with one tablespoonful flour. Boil for two minutes and then pour over the fish, garnishing with a border of mashed potatoes pressed through a pastry tube.

Seaquod.—Scale, clean and remove tails, fins and heads from half a dozen fresh herring. Season with a tablespoonful mustard, one of ginger, one of pepper, one of cloves, one of salt, a grated lemon peel, one-half cupful vinegar, a tablespoonful butter. Fill deep earthen dish, cover closely and bake till herring completely loses shape. This gives an excellent relish to a dinner.

Lobster Espanol (in the chafing dish).—Split down the back two medium sized lobsters, removing all the meat and cutting into pieces one inch in length. Place in the upper part of the chafing dish (dispensing with the hot water pan) a gill of olive oil, adding the lobster when the oil begins to bubble. Shake the dish for a moment or two and then stir in one small onion, peeled and finely chopped; one small tomato, cut into dice; one chopped sweet green pepper and half a clove of garlic. Simmer for five minutes, stirring constantly, seasoning with a pinch of paprika and one saltspoonful of salt. Reduce for two minutes longer before adding one tablespoonful of Madeira and a dash of tomato ketchup. Now cover the chafing dish, place under the hot water pan and cook five minutes, serving on rounds of hot buttered toast.

Suitable Description.

"That girl is loud in her dress."

"Yes. Isn't she a perfect scream?"—Baltimore American.

FATE PLAYS STRANGE PRANK WITH SAILOR

After Crossing Ocean In an Open Boat He Loses His Life In River

Lorain, O.—Ludwig Eisenbraun, a German sailor, who was drowned here recently in Black river, was treated very strangely by fate. Eisenbraun was the hero of one of the greatest feats in marine history, achieved when he crossed the Atlantic ocean in a nineteen foot dory.

After encountering furious storms at sea, facing death a score of times in his frail open boat, he lost his life when his hand slipped on an icy rope which he was using to climb to the deck of a lake steamer on which he was a watchman, and fell back into the river.

On April 11, 1903, Eisenbraun sailed from Boston harbor in his dory, Columbus II. On Nov. 23 of the same year he docked his craft at Gibraltar.

Once in a storm his boat was capsized, and he lost water and provisions. He righted the boat, and two days later was reprovisioned by a British steamer.

He steered his craft against a sleeping whale, and the aroused monster nearly capsized him.

Eisenbraun had been a sailor on the great lakes for five years. He was forty-eight years old.

THE NEW SMOCK.

VOTES IN CANADA

How Three Provinces Rapidly Got the Suffrage.

POLITICS AND TEMPERANCE.

1916 Brings Success to Canadian Women After Years of Indifference—No Speaking In the Streets Allowed, a Forum Is Demanded.

Three Canadian provinces have this year given complete provincial suffrage and eligibility to women. "How did the women of Canada get the vote so quickly?" is the question asked Miss Ines Perry of Toronto. "Suffrage was as dead as the much famed doornail all over Canada," said Miss Perry. "Trying to arouse public opinion was just like beating one's head against a stone wall. I suppose you don't know in the United States about the queer discrimination [illegible] Canadians make against married women. Only widows and spinsters enjoy school suffrage in Quebec, and married women may not vote on tax questions in Ontario. In fact, the law rubs in its lack of confi-

MISS INEZ PERRY.

dence in married women in Ontario more than elsewhere, for it permits the husband of a woman who pays taxes to vote in her place and because of her tax qualification. In 1914 Toronto had a referendum on the question of the married women's right to vote, which showed two to one in favor, and, while the laws of Ontario are still stiffly opposed to suffrage, the demand for it is growing steadily. And the three powers that are shoving suffrage events right along in Canada are the temperance cause, the war and the wonderful woman of Canada, Mrs. Nelly McClung."

Miss Perry is a young, alert figure, full of life and energy. She, like many other Ontario suffragists, followed Lady Eaton into temperance manifestations. "Here also the war and temperance work and the suffragists worked together," explained Miss Perry, "for the war has pushed prohibition on as fast as it has pushed suffrage out into the light of day in the British colonies of North America. Yet when I asked Lady Eaton how she came to be so enthusiastic for temperance what do you think she told me? 'Just Billy Sunday; that's all.' Your Billy Sunday had preached his famous 'booze' sermon, and she had heard it. She was immensely impressed with what he said. It seems as if the grouping of so many motives into one and voicing them through such a wonderful woman as Mrs. McClung is what has brought the vote to the western Canadian provinces and has given us new hope in Ontario."

Miss Perry explained how she became a suffragist. "My sister and I were just taking a quiet stroll in London when we saw a poor little handful of about fifty suffragists being ridden down by more than a hundred police. It seemed so unfair to trample women down for what they honestly believed that it turned me into a strong suffragist that very day, and I came back to Canada to 'do my bit.' One of the things we are working for right now in Toronto is a people's forum. We can't speak in the streets there. One of our first speakers is to be Mr. Poultney Bigelow from your side of the boundary."

Pin Money.

Look about in the shops now to see what new utensils you desire this spring. Set aside whatever sum of money you can spend, be it counted in dollars or cents, and with it buy some utensils to make housework easier. Perhaps a strawberry huller will come in for your choice, with a pineaple eye remover too. Perhaps what you most desire will be an awning for some given window or porch that has heretofore always been too sunny. Whatever it is, shop for it wisely and get it if you can afford it.

Needlework Notes.

Fascinating workbags, made of Austrian handkerchiefs such as the peasants wear for headdresses, are being shown. The handkerchief is of a large size in cream white and has a border of purple plums and green leaves. The bags are half moon in shape and sixteen inches deep and are shirred on oblong wooden frames, which form the handles.

Smocking on Aprons.

Daintiness itself is an apron made of silk muslin, the fullness of which is confined by smocking instead of gathers. The smocking is arranged in five points, and a slight touch of color can be introduced by using a faint shade of blue or pink thread for the smocking.

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

Both Interesting and Discreet.

Nightgown for ladies and misses, fashioned from soft nainsook and made to be slipped on over the head. The front is drawn to give an Empire effect.

Not all of the underwear of the season is as discreet as it is interesting, but this one-piece nightgown is all that and more. It is practical and demure. It is made to be slipped on over the head, with the sleeves in the kimono style. The neck is finished in square outline, though provision is made for the round effect, if preferred.

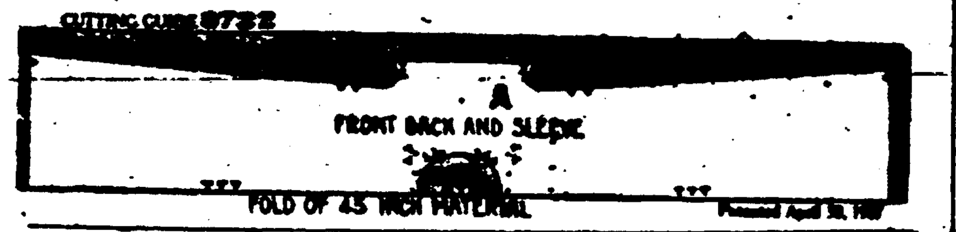
In medium size the gown requires 3⅝ yards 45-inch material, with 1½ yards banding for the neck and as many yards of ribon as the wearer's preference for bows dictates.

Study the cutting guide and see if there is anything about it that the veriest neophyte could not understand at a glance. The material is folded in half, and the pattern is laid on the lengthwise fold so that there is only one seam—the underarm seam.

For the square neck, cut out the front and back of the gown on indicating small "o" perforations. Then all is ready to proceed with the making. Close the underarm and sleeve seam as notched. Adjust a casing about ⅝-inch wide underneath the front of the gown, when finished, the upper edge of the casing along indicating crossline of small "o" perforations. Insert ribbon and draw to the required size. Tie ribbon at front and finish with a rosette or a large bow.

Next, gather the upper edge of the front and back of the gown between double "TT" perforations and 1½ inch below; draw gathers to the required size and adjust stays underneath gathers in front. Turn under lower edge of nightgown 2⅝ inches for a hem. Finish the neck with a band of lace or embroidery insertion.

CUTTING GUIDE 6722



Pictorial Review Nightgown No. 6722. Sizes, 36, 40 and 44 inches bust and 15 to 20 years. Price, 15 cents.

FRAMING PICTURES.

The Art Reached Its Climax In Italy In the Sixteenth Century.

It is a significant sign of the unimportance accorded to picture frames that in attempting any research on the subject one can only discover an occasional notice of some individual frame among a mass of detail comprised under the generic title of "Frames," which ranges from chimney pieces, door furniture and girandoles down to the designs employed in book illustration, called by the French "cartouches."

Only in Italy was the art of picture framing a fine art, and the examples worth studying belong almost entirely to that country.

Picture frames are of comparatively modern origin, for during the long period of the middle ages such portable pictures as existed were inclosed in wooden cases with doors and had, consequently, no frames, while mirrors were not yet in existence. It was not till life became more settled and houses were considered in relation to peace as well as war that the custom began to prevail of placing pictures on walls. They start, therefore, in the fifteenth century and are at the height of their perfection in the sixteenth.

From the earliest times Italian artists knew that for a painting to be rightly appreciated it was necessary to inclose it in a kind of surrounding. They knew, too, that it could never be a matter of caprice what that particular surrounding should be, but that it must be chosen scientifically and with due regard to the effect of the painting on the spectator and of the whole as a work of art.

It is only necessary to study the fine examples that are still in existence from the best period of this art, which appears to have been exclusively Italian, to realize that neither chance nor fashion entered into it. On the contrary, it was the outcome of an instinctive aesthetic sentiment of feeling for the beautiful in conjunction with an almost scientific appreciation of what would enhance the intelligent understanding of the picture. Whether we look at them in their richness or their simplicity, we shall note that the structure of the frame was first carefully studied and adapted to its purpose of suitably inclosing the picture and that its subsequent enrichment, whether by modeling, gilding, painting or however, lost their native character, and coming under French influence became more and more debased until all sobriety of treatment disappeared.—Scribner's.

Measuring Your Pace.

How many steps do you take to the mile? Even if your considered reply be "Seventeen hundred and sixty," I shall take leave to doubt it. Should you be a British infantryman your pace will be the longest of any infantryman in the world. The Russians' pace is the shortest, being but twenty-seven and one-half inches; the French, Italian and Austrian pace is twenty-nine inches, the Germans do thirty-one inches, while British soldiers stride an extra half inch. But your own pace, what of it? It depends upon your height. Take your eyebrow height, halve it, and that represents your pace. You will find it to be somewhere between thirty inches and thirty-two inches, so that you will need between 2,000 and 2,100 paces to the mile.—London Chronicle.

Ancient Barber's Forfeits.

Customers of hair dressers at one time were in danger of having to pay a forfeit as well as their fee when entering the barber's shop. Until half a century ago some barbers still kept a list of rules hanging in their shops—chiefly concerning swearing, seeking to be served out of turn, etc.—the penalty for breaking which was the price of a pint of ale. The antiquity of the practice is evident by Shakespeare's allusion to it in "Measure For Measure:"

The strong statutes
Stand, like the forfeits in a barber's shop,
As much in mock as mark.

—London Standard.

A Grievous Burden.

"Just think!" exclaimed the humanitarian, "when a man enters prison he loses his identity and becomes simply a number."

"Well," replied the man in motor togs, "except for the fact that he is confined and has to do hard labor, I don't see that he is much worse off than I am. I not only have a number, but I'm compelled to pay for it."—Birmingham Herald.

A Statesman's Queer Ambition.

The great Lord Grey had an ambition far above politics. He passed the reform bill, but that did not satisfy his soul. There was talk of Taglioni, and Grey said quite earnestly, "What would I give to dance as well as she!" The statesman who had been prime minister and had left an indelible mark on the history of his country was envious of an opera dancer!—London Saturday Review.

Father Time.

Time waits for no man—he's goin' jes' a-skimmin', an' he'd never make the journey if he waited for the women. Don't stop for sigh or song—he's stronger than the strong; to gloom time or glory he's a-goin' right along!—Atlanta Constitution.

The Attraction.

She—So you are engaged to Miss Baggs. I'm sure I can't see anything attractive about that woman. He—Neither can I see it, but it's in the bank, all right.—Boston Transcript.

He lives in fame who died in virtue's cause.—Shakespeare.

FLORAL ARISTOCRATS.

Orchids Are Not Parasites, and It Is Difficult to Raise Them.

Aristocrats of the flower kingdom—and probably the least understood. You hear them called parasites, which is only one of the common mistakes made about the orchid. You see a hundred different shapes and a dozen different colors grouped together, each shape perhaps a distinct family and each with a separate name.

In the first place, orchids are not parasites. A parasitical plant is one which gets nourishment from another plant. Certain orchids live on trees, but they get their food and drink from the air by means of aerial roots. We call them epiphytes. Other orchids get their nourishment directly from the ground. They're called terrestrial orchids.

People don't understand, either, why orchids cost so much. They fail to see why a tiny plant is sold for, say, $1,000. If they realized that rare orchids may have cost a long trip into a tropical jungle to obtain and that it takes from eight to ten years to raise a plant from the seed, with patient care and treatment, they could see why these flowers remain in the aristocratic class.

Only the orchid grower can understand all the details of his art, but the flower lover can easily learn to distinguish the various types.—Philadelphia North American.

THIS FISH IS A BUTCHER.

And He Carries His Saw In His Ugly Mouth at All Times.

Moral of this fish story is: The value of anything depends on how it is used. A safety match used to light a beacon lamp and another match used to set fire to a city have widely separated ranks in the realm of utility. On the same principle of values the sawfish belongs near the bottom rank in the ocean kingdom.

His saw, the presence of which you may have guessed already, consists of a long, beaklike mouth decorated with many sharp, firm spines. It varies in length with the size of the fish, some monsters twenty feet long carrying saws six feet long and a foot wide.

A saw, like a match, varies in value according to the way it is used. That's where the sawfish makes a fizzle of life. Think how much good he could accomplish by using his saw on harbors choked up with weeds, channels blocked with logs and lagoons crowded with trees and undergrowth.

Instead of a carpenter, a road builder, a farmer, the sawfish becomes a butcher. He swishes his saw this way and that quite recklessly and cuts up smaller fish into steaks and sausage; then he eats the pieces.—Philadelphia North American.

The Better Ways.

Let it be said once for all that it is better for both body and soul to be obliged to go hungry sometimes than to be full always; it is wholesomer to be weary frequently from hard work than to keep on a dead level of comfort or to know weariness only from the spinning dance and the daily pleasure; it is cleaner to be dusty and bathed in the blood and sweat of battle than to be so sheltered as not to know the meaning of a hand to hand conflict with a real problem or fierce temptation; it is grander to break the shackles of exclusiveness and walk free in the dingy city of social unpopularity than to be the idol of men and women who do not count for, but rather against, the progress of the race.—From "The Inspiration of Responsibility," by Bishop Charles H. Brent.

Meteors.

Meteors had an unusual influence on the Greeks and Romans, who in a way worshiped the falling bodies of luminosity. It is declared that the Palladium of Troy and the image of Diana at Ephesus were erected to meteors. At times the fall of these mysterious strangers has been accompanied by disastrous results, for it is on record in China that ten persons have been struck and killed by them. The Smithsonian institution has among its meteoric collections one which weighs in the neighborhood of 500 pounds, whose composition is nearly pure nickel. There have been discovered by chemical analysis twenty-nine elements in meteors, all of which are found on and in the earth.

Cats and Needles.

Cats seem to have a habit of swallowing needles. When a cat is brought to a veterinary hospital suffering with a cough the doctor always looks for a needle. In one instance Dr. Childs of New York operated on a cat to remove what he thought was an ordinary needle. He found a hatpin nine inches long. But the cat's life was saved.—Popular Science Monthly.

The Modern Moses.

"What's your idea of a party leader?"

"A party leader," replied Senator Sorghum, "is a man who finds out what the people want."

"And then gives it to them?"

"No; promises it."—Washington Star.

Pleasant Words.

Poet—I seek a phrase that shall express the joy of life in two words. Can you suggest anything? Unfailing Friend—Received payment!—Judge.

Without an Effort.

Jack—Did your friend, Miss Howler, ever reach high C? Maud—Yes; one day at the dentist's I believe she did.—Boston Transcript.

Even the man who thinks he knows it all may change his mind after he gets married.—Philadelphia Record.

400 NEAR AN END

Fast Heading to Extinction, Says Mrs. Herbert Parsons.

BRAINY PEOPLE TOO BUSY.

Dull Ones Unable to Keep Game Going, and as a Result Dynasty Is Tottering, Declares Congressman's Wife. Sees Only Fortune Hunters Among Satellites.

Chicago.—After Mrs. Elsie Clews Parsons of New York, wife of Herbert Parsons, New York representative, and daughter of Henry Clews, financier, hurried back home, Chicago society folk were wondering if she really meant what she said in an address here recently before the City club.

Mrs. Parsons said society—the Four Hundred—was fast heading to extinction. She advised sociological murder for "society," and, as a matter of fact, she said the homicidal process was already well on the way.

As if that were not enough, she gave it a name which should slay it forthwith if it is subject to mortal wound. She didn't once mention "parasites," but she called it the "gynocratic class"

Photo by American Press Association.

MRS. HERBERT PARSONS.

—a woman bossed conclave, on whose bepowdered petticoats clung a few uninteresting men fortune hunters and an even less ambitious male contingent, who cultivated society for the bare sake of the meals involved in being asked out to dinner.

The crumbling of the dynasty she attributed to the following:

That people with brains no longer have time for it; ergo, it is losing leaders.

That, being a female organization in the beginning, it would no longer have cohesion when the little talent it possessed to amuse finds vent in woman suffrage, club life, business or sociological work.

The younger girls are demanding the right to select their own mates; therefore they will not frequent "society" where the men are uninteresting.

That an economic age is fast making it intolerably ridiculous.

Mrs. Parsons displayed the humorous deformities of her subject so general at first that her audience, consisting numerously of "society's" limbs, forgot to get angry and was soon laughing heartily—at itself. One or two dowagers got fussily up and left with husbands, who were red and seemed unhappy.

"The society group of any American community," Mrs. Parsons said, "is composed of persons sufficiently desirous to be in the group to pay the entrance fee, so to speak. Comparatively few persons can belong to society without having some source of revenue. Now and then in the larger cities may be found men who get their living by being in society.

"Conspicuous waste is a desideratum if not a requisite of a stable social position. For real estate men, brokers of various kinds, house decorators, architects, portrait painters and drawing room musicians it is good, sound business to be in society.

"Many smart society women eschew love altogether. They are like the saloon keeper who does not drink. But they will flirt, for flirtation means retainers, and retainers mean prestige.

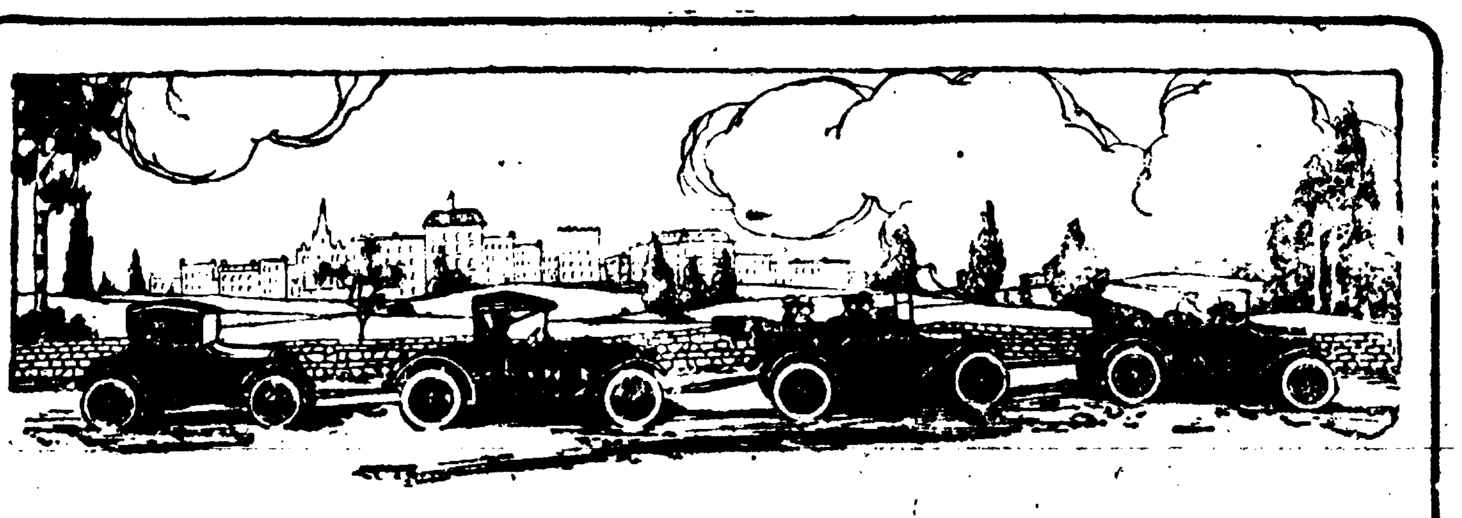
"Prudent lovers withdraw as far as possible from society. Elderly matchmakers delight in nothing so much as trading in the marriage market, and young and tractable hearts are their counters. Therefore they suffer the courtship."

Horse Dislikes Cigarette.

Los Angeles.—A sensitive horse who has a dislike for cigarette smoke attacked Edgar Akers, aged twenty-five, of this city, and bit him on the right hand. Akers was smoking a cigarette near the horse, which was standing at the curb. With an angry squeal the horse seized Akers by the right hand. Akers managed to free his hand, but not until the horse's teeth had torn the flesh from the fingers.

Old Man Hobbles to Polls.

St. Paul.—An aged man limped into the voting booth of the Third precinct of the Sixth ward the other day. After he had marked a ballot William Casey, ninety-two years old, confided to the election judges that it was his thirty-ninth time for voting in St. Paul. Mr. Casey came to St. Paul in 1877.



How the Texas Tube test happened!

IT nettled Bill Parr considerably!

So many Motorists had carelessly stated that "all Tire Tubes are just Rubber."

He determined to show some folks the *difference,* in a way they would never forget.

There were four Cars at the door, and their Owners or Drivers at his elbow.

To these he said,—

"Boys,—how *strong* do you think this Goodrich Brown Tube *actually* is?

"Do you believe it is strong enough to tow Mr. Oden's five passenger Car, with four people in it, for 20 blocks?

"You don't, eh!

"Well now here's a bit of a Bet I want to make with any, or all, of you.

"I will bet you a Dinner that this little old regular Goodrich Tube (34x4) will not only tow Mr. Oden's Car, but will tow *all three of your Cars,*—fully passengered,—through the streets, for the full 21 blocks (more than a mile and a half)—starting and stopping as many times as the crowd makes it necessary.

"I will,—if you Gentlemen are agreeable,—line up all four of your Cars, right here and now, take three regular Goodrich Tubes hap-hazard out of their boxes, —tie one tube between each two Cars, (which means hauling three Cars on the *first* Tube) and tote You-all that way to "The Corners."

"Are you willing to bet a Dinner that any one of the three Tubes will 'go broke' on the way, or show a flaw which would leak Air, or prevent its being used for its original Tire purpose afterwards?

"You are, eh?

"Well,—the Bet's on!

"Come along, and you be the Judges."

• • •

THE Dinner was a very Cheerful Affair.

As Oden said afterwards (when putting up his share of the Bet) "you could have bet me a Million on that, Parr, and I'd have taken you up,—even if I had to *borrow* the Million.

"I don't see how the blamed Tubes ever *did* hold out,—especially going up Saco St. under such a strain.

"With eight people in the last three Cars,—and a total load of over 8,800 pounds I sure thought to hear *something* snap before Second Block.

"Whaddye put *into* that brown Goodrich Rubber anyhow, to make it *hang together* like that?"

Fritz said that what puzzled *him* most was the brown Rubber Tubes "not being all *stretched out of shape* after such a tug, even if they *did* hang together at the finish.

"Look you," said he, "when we released the load,—after the Haul,—they instantly snapped back into just three-quarters of an inch longer than they were at the start!

"And that ¾ of an inch, they *took up* again in less than two hours rest."

• • •

"WELL, boys,"—Bill Parr remarked,—as he smoothed out a wrinkle in his well-filled vest, "*that'll* stop the Argument about *all* Tire Tubes being 'just Rubber,' won't it?"

"If the Brown Stuff that toted all you Heavy-weights,—and your Cars,—for 21 blocks, without a Sign of Heavy Duty afterwards, isn't something MORE than 'Just Rubber' like other Tubes,—then you'd better buy the 'Just Rubber' kind hereafter.

"I'm going to ask *all* of you to sign your names to this 'Texas Tire Tube Test,'—just to show that you have taken part in a *regular* Exploit which is mighty well *worth* recording."

So indeed they did,—and here is the affidavit:

AFFIDAVIT.

This certifies that we, the undersigned, took part in and witnessed, the Texas tube test referred to in the advertisement entitled "How the Texas Tube Test Happened!"—that the test was made on date of Nov. 11, at Waco, Texas, the distance covered being twenty-one blocks and that the result was as described.

Signed— W. M. ODEN, J. M. NASH, B. A. FRITZ, W. A. PARR.

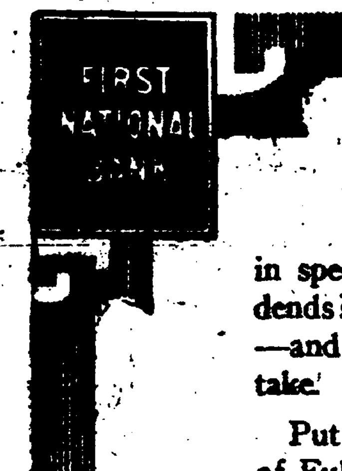
Subscribed and sworn to before me by W. M. Oden, J. M. Nash, B. A. Fritz and W. A. Parr this the 3rd day of May A. D. 1916, at Waco, Texas.

Signed— F. G. WREN, Notary Public, McLennan County, Texas.

Now what *think* *you* of these GOODRICH Tire Tubes that could *bear up* under such a gruelling test?

Reflect that they *cost* you no more than the "*ordinary*" Tubes you so carelessly accept!

GOODRICH "Texas-Test" INNER-TUBES TIRES



WHY RISK YOUR MONEY

in speculative schemes that promise big dividends? You may lose your money in this way —and the risk involved is too great for you to take.

ORLANDO SANT.

After an illness of five weeks, Orlando Sant, aged 66, died at the Lee Memorial Hospital last night. The remains were removed to-day to the family home, 67 West First street, where the funeral will be held Monday afternoon at 1 o'clock. Rev. J. W. Hulett of First Methodist Church will officiate at the services and burial will be made in the family plot at Spring-brook cemetery in Fair Haven.

Mr. Sant had been employed in the dye department of the American Woollen Company for many years, and he is survived by his widow, one son, Earl; Genevieve, a daughter; Eugene Sant, of Seneca Falls and John Sant, of Rochester, brothers; and Mrs. Charles Wilkinson and Mrs. Maggie Cullen of Fair Haven, sisters.

MONDAY'S MEETINGS FOR PRAYER ANNOUNCED

The following program of prayer-meeting services has been arranged for next Monday by the committee in charge:

District 2 will meet at the home of Mrs. E. Wells, Seneca street. Mrs. Gifford, leader. 7:45 o'clock.

Districts 25 and 27, at the home of Mrs. C. Mills, West 2nd street, at 3 o'clock.

District 16, at the home of Mrs. Doty, Park street, at 3:30 o'clock. Mrs. H. D. Holmes, leader.

District 5, at the home of Mrs. E. J. Robinson, at 7:30 o'clock.

District 28, at the home of Mrs. G. Dingle, West 5th street, at 3 o'clock.

WILLIAM J. DRAPER LEFT MONEY FOR RELATIVES

Under the will of William J. Draper, deceased, of Hannibal, which was filed for probate in Oswego yesterday, Curtis Draper, of this city, is bequeathed a legacy of $100. The other beneficaries are as follows: Anna Nipper, Oswego, $50; Russell Draper, formerly of this city, but now of Chester, Pa., $100; Mertle Cool, Auburn, $100; Cora M. Hall, $500. The remainder of the estate goes to Emma G. Wilson, of Hannibal, a daughter. The entire estate is valued at $3,000.

CHICAGO DUPLICATES PREPAREDNESS PARADE

(By United Press)

Chicago—A preparedness demonstration equal to New York's gripped Chicago to-day. It was the prelude to a series of big events which throw this city in the world's spotlight of news for the next ten days.

Nearly a quarter of a million Chicago men, women and children, it is estimated, marched to-day in a parade to arouse the nation to preparedness. Sober minded men and women—bankers, politicians, society women, clerks, shop girls—from all walks of life who want peace but not "at any price" marched. There were 50,000 marchers from the United Young Men's Clubs alone.

One feature of the parade was the suffragist section. Another was the motorcycle section, in which several thousand motorcyclists rode their machines.

One hundred and eighty union chauffeurs offered their cars without charge to anyone desiring to take part in the parade. The steel mills in South Chicago and Gary, Ind., sent five thousand men.

Illinois National Guard regiments marched by special permission of Governor E. F. Dunne.

It was estimated that Mayor William Hale Thompson will have to sit in the reviewing stand twelve hours if he plans to see the parade from start to finish.

Major General E. C. Young headed the parade. His chief aid was Colonel Milton J. Foreman, of the First Illinois Cavalry regiment, one of the best equipped cavalry bodies in the National Guard.

H. L. Van Wuck, who organized the huge preparedness parade held in New York City recently co-operated with August Hibbard, of Chicago, in organizing to-day's demonstration.

It was estimated there were more than a million spectators.

POINTERS ON HOW TO STARCH FROCKS

An Expert Tells Us How to Make Starch and How to Give That Stylish, Bouffant Effect to Both Sheer and Colored Fabrics.

IF we are to wear bouffant skirts we are probably in for a period of starchiness. Organdie, one of the fashionable summer fabrics, is most certainly a fabric that bears out this supposition. Yet many housekeepers, maids of all work and even laundresses have forgotten all they ever knew about the gentle art of starching.

It is of the utmost importance to mend anything that needs starch before it is laundered. If the torn or worn place is starched and ironed it is torn and worn just so much the more, and a stiff, worn place is very difficult to mend.

This is the way to make plain boiled starch:

Allow two tablespoonfuls of starch to a gallon of water. Wet the starch with cold water until it is of the consistency of cream. Then pour over it the water, which is bubbling. Stir constantly until smooth and boil for five minutes. Add an inch of candle to a gallon or a tablespoonful of lard to give a very smooth starch.

This is the foundation for all starching, excepting that done with uncooked starch.

If a very stiff starch is desired a tablespoonful of gum arabic water to a quart of starch gives good results.

To prepare gum arabic water pour two cupfuls of boiling water over a quarter of a pound of gum arabic. When the gum is dissolved, strain the solution into a bottle, cork and keep on hand for use in the laundry.

Organdie, which is very thin and sheer, does not need heavy starching, and it is perhaps better to do all the stiffening with gum arabic.

Add two tablespoonfuls of the prepared gum arabic water to a quart of lukewarm water and dip the organdie, after it has been dried, into this. Roll the garments into a tight roll and allow to get partly dry. Have ready an atomizer containing lukewarm water and with this atomize the outside of the roll, which will be drier than the inside. Iron the starched organdie on the wrong side as far as possible.

The starching of colored things is indeed an art, for starch must be carefully used if it is not to show on a colored fabric.

Some laundresses wash colored garments in starchy water, using one part of boiled starch to four parts of water. This, they think, saves color.

Be that as it may, most persons use starch only after the colored clothes are rinsed. And in starching colored things put enough starch for only two or three garments into a bowl.

For blue things, of course, bluing is used. Never dip bluing bags into the starch, but make the starch of water that has been blued with the bluing.

For black garments black starch is sold that is quite satisfactory. White starch is almost sure to give unsatisfactory results on black material.

A little clear coffee can be added to starch for tan or cream materials, and this is better than pure white starch in many colored things.

Liver Dumplings.

Grind one pound of beef liver, a small piece of suet and onion. Soak two slices of bread. Add to liver and onion the bread, one teaspoonful of salt, dash of pepper, one egg well beaten. Mix all together well. Add about two tablespoonfuls of flour to make stiff enough to drop. Drop by spoonfuls into boiling beef stock and cook about twenty minutes. This recipe for liver dumplings we consider quite a treat from the regular roast or fried meats.

No Distinctions at Plattsburg

(By United Press)

Plattsburg, N. Y.—Major General Leonard Wood, commanding the Department of the East, wants it made clear that the training camp which opened here to-day is for every American citizen who wishes to be of aid to his country in case of war.

He called reporters to his headquarters to set at rest rumors that there was or would be any social distinction whatever shown in recruiting men for the camp.

"Preparedness," said Major General Wood, "has caught on. So far more than 2,000 business men and others have signed for the Plattsburg camp this year. Among these there are a great number of college students. Princeton is leading with the largest enrollment of the colleges. We expect to have between 20,000 and 25,000 men here this year.

"The summer instruction camp idea is favored by many persons who cannot join us. A woman wrote me recently offering to pay the expenses of eight young men at Plattsburg.

"I have received many letters asking for an opportunity to help in this way. As two weeks is not long enough to acquaint a man with the necessary training for service, I wish to urge employers to extend vacations of their employees who are at the camp to a month. This seems the least time in which to instruct properly a man in the duties and requirements of a soldier.

"The Governors of Virginia and South Carolina appointed committees in the cities and towns of their States to organize groups for the camp, and their representations is large.

MISS WILSON RECEIVES AT GARDEN PARTY

(By United Press)

Great Neck, L. I.—Miss Margaret Woodrow Wilson, daughter of the President will help receive the 5,000 women guests at the garden party to be given at the du Pont mansion here to-day by the Congressional Union in honor of delegates attending the biennial conference of the General Federation of Women's Clubs in New York.

Mrs. O. H. P. Belmont, chairman of the reception committee, will be assisted by this group of prominent club women and suffragists:

Mrs. Phoebe Hearst, of Pleasanton, Cal.; Mrs. Charles S. Whitman, wife of the governor of New York; Mrs. William Kent, of Washington, D. C.; Mrs. Mary R. Beard, Mrs. John Winters Brannan, Mrs. William Grant Brown, Mrs. Harriott Stanton Blatch, Mrs. Charlotte Perkins Gilman, Mrs. J. Borden Harriman, Mrs. Theodore Havemeyer, Mrs. Frederick C. Howe, Mrs. William Todd Helmuth, Mrs. Florence Kelley, Mrs. William Prendergast, Mrs. Preston Satterwhite, Mrs. Leonard Thomas and Miss Helen Todd.

At a large open air theatre, leading actors of New York will present a parody on Shakespeare. A sail on the sound will be one of the unique features of the party.

They taste better and nourish more

LEGAL NOTICES

To ALL PERSONS INTERESTED:

Please Take Notice that the undersigned intends to file with the commissioner of the Land Office at the office of the Secretary of State on the 15th day of June, 1916, an application for a grant of the abandoned Canal Lands described as follows:

Beginning at a point in the easterly blue line of the old Oswego canal, said point being about 220 feet northerly along the blue line from its intersection with the north bounds of Seneca street, and North 47 degrees, 42 minutes, 20 seconds East 38.67 feet from the arris of the middle hollow quoin on the east side of old Lock No. 9; thence along the easterly blue line South 10 degrees, 57 minutes, 30 seconds West 147.0 feet, South 13 degrees, 15 minutes, 20 seconds West 43.88 feet to a point; thence North 77 degrees, 48 minutes West 53.45 feet to a point; thence South 16 degrees, 25 minute West 175.48 feet to a point; thence North 58 degrees, 02 minutes West 20.75 feet to a point; thence North 16 degree, 25 minutes East 275.34 feet to a point; thence North 79 degrees, 02 minutes, 30 seconds West 64.20 feet to a point in the westerly blue line of the old Oswego Canal; thence along the westerly blue line North 24 degrees, 39 minutes, 10 seconds, East 25.70 feet North 2 degrees, 51 minutes, 10 seconds East 82.46 feet to a point; thence South 69 degrees, 06 minutes, 30 seconds East 136.95 feet to the place of beginning, containing 0.5284 acres of land more or less.

The said land is to be used for commercial purposes.

Dated, May 19, 1916.

TORNADO SWEEPS SOUTHERN ILLINOIS

Bloomington, Ill.—Twenty-six persons were injured when the Wabash night mail train, No. 17, bound from Chicago to St. Louis, was blown from the tracks by a tornado early to-day near Saunemin, Ill.

The train was traveling forty miles an hour when it was wrecked. Most of the coaches were of steel, and this fact is believed to have prevented a heavy loss of life.

Don't overlook your porch furniture

Get out the rockers and the settee and see if they don't need freshening up a bit. It won't cost much and a change in color might be agreeable.

DEVOE THE GUARANTEED GLOSS CARRIAGE PAINT

offers you an easy way of getting a high gloss that will hold its lustre under weather exposure.

We recommend Devoe Gloss Carriage Paint for porch and lawn furniture—yes, and for baby carriages, too. It will not crack or chip. It gives a hard durable finish which does not mar easily. Then, you know, it can be washed with soap and water.

Stop in and get a card showing the many pleasing colors. Ask us for information about this and other Devoe products. Remember, we guarantee satisfaction.

THE MERCHANTS OF FULTON ARE [illegible] IN HAVING [illegible] PAPER AND THEY WILL ALL DERIVE THE SAME BENEFITS FROM ADVERTISEMENTS THAT DO NOT INJURE THE APPEARANCE OF THEIR HOME PAPER.

THE CO[illegible]

Has our community a Commercial Club? How often does it meet? Once a year or *every day?* What is our club doing to increase its membership? Has it *buried* the last of the knockers? How many factories has it secured in the last ten years? The most progressive towns have a Commercial Club meeting *every* day in the year. New members are added every day. The membership takes in farmers, as well as business men. There is something *doing* all the time. The great energy is expended on boosting the *home* market. Everybody works at this, and the result is the Commercial Club puts the town on the *map* as a *live* community. This is all true of the best towns. Is *our* town in this class? Are *we* content to be anything less than the best? Let's get into that class, and work each day to stay there.

WATCH FULTON GROW!

THIS COMMUNITY TRADE FEATURE WILL BE CONTINUED EACH WEEK BUT IN FUTURE THERE WILL BE NO DISPLAY ADVERTISEMENTS INSERTED ON THE FIRST PAGE OF THE PAPER.

PEACOCK MEN'S CLUB ELECTS

George L. Pratt, of this city, one of the most prominent trail-hitters of the Peacock campaign, was elected president of the Peacock Business Men's Club at the initial meeting of that organization yesterday at the First Methodist church. About 300 men attended the meeting, the first of its kind ever held in this city, which was unique in many respects, and remarkable for the enthusiasm and interest displayed by those present.

Mr. Pratt was selected as temporary chairman of the meeting and in a short address he explained the purposes of the organization. After the audience had sung several hymns and many men had volunteered testimony regarding the benefits they have derived from reconseeration, J. Harry Howe was elected permanent chairman, and Irving Galusha as secretary pro-tem.

H. L. Paddock then took the floor and explained briefly the purposes of the club. He took up the work of the Billy Sunday Club of Syracuse, which has been able to effect many improvements in moral conditions in that city, and said that the Fulton club would also be in a position to take up one of the most important questions of the day in this city—a Y. M. C. A. or young men's club. Mr. Paddock dwelt on the necessity for some club for young men here and said immediate steps should be taken to combat the work of the saloon and pool-room.

In conclusion, he requested the men to give the selection of their officers their fullest consideration as the scope of the club would depend largely upon the men who headed it.

Rev. C. S. Robertson, James Beckwith, W. L. Lovejoy, J. C. Woodward and Dr. R. B. Hubbard also made short addresses along the same lines.

The election of officers then took place, and in addition to Mr. Pratt, the officers of the club were chosen as follows: O. T. Day and A. M. Druse, vice presidents; Dr. R. B. Hubbard, recording secretary; Fred Chubb, corresponding secretary; Frank Morin, treasurer; A. N. Hudson, registrar; Dr. Knapp, religious coach.

F. E. Goodjon and G. B. Farley escorted Mr. Pratt to the chair, and the president-elect made a short speech in which he thanked the men for the honor conferred upon him, and said he could think of no office under the sun which he would rather have. He was optimistic regarding the future of the club, and expressed a desire that all might work in unison for the common cause and thereby accomplish something of value.

He denounced the saloons and pool-rooms and foreeasted a dry New York state within a very few years, urging every man present to work with Prohibition in mind.

The club will hold another meeting at the First Presbyterian Church next Sunday afternoon at three o'clock.

Vets Visit Resting Places of Comrades

In automobiles generously furnished by several public spirited citizens, veterans of the Grand Army of the Republic and members of the Sons of Veterans, made a tour of the various burial grounds within a 15 mile radius of this city yesterday afternoon and decorated the graves of their departed comrades and friends.

James Outerkirk, Charles Hammond, Charles Brooks, Wilson and Scott, Mayor Victor C. Lewis and several other automobile owners offered the use of their cars for the occasion, and the start was made from this city shortly after the noon hour.

The flying squadron made its first halt at White's cemetery, near Bowens Corners, where several of the graves of veterans were decorated, and memorial services were held. The veterans then repaired to the Methodist church at Bowens' Corners, where they listened to a short address and offered prayer.

From Bowens' Corners the "vets" were driven to Niggerville, and memorial services were held in the burial grounds there, where many of the boys who wore the blue are laid at rest. The cemetery at Granby Centre was the next to be visited, and from thence the cavalcade went to Lewis' Corners, the final stop.

The return to this city was made early in the evening, and after supper the veterans marched to the First Methodist Church, where the Rev. J. W. Barrett preached an eloquent sermon on a subject appropriate to the occasion.

STOLEN MARE FOUND ON THE REYNOLDS FARM

A bay mare, stolen from a barn in Phoenix, Saturday night, was found grazing quietly before the home of Charles Reynolds, of the West River road, this city yesterday. The horse wore no shoes, but carried a bridle and showed signs of having been ridden during the night. The owner of the horse came to this city to-day and recovered his property.

CHARITY DEPARTMENT WILL BENEFIT IN FULL

Julius Prowda, proprietor of the Happy Hour theatre, announces that both performances on Thursday, June 8, will be for the benefit of the poor of this city who are dependant upon the Charities department. The entire receipts will be donated to Commissioner James R. Somers for carrying on the work of his department, which has been handicapped for the past month by lack of funds.

Mr. Prowda has secured several expensive feature films for the benefit, and is attempting to engage the latest Chaplin feature for the occasion. A male quartette will sing some of the latest song hits during the show, and a special orchestra will furnish the music.

DETECTIVES UNABLE TO LOCATE SAFE OPENERS

The efforts of two detectives who were detailed upon the Morin robbery case here thus far failed to reveal any clue to the identity of the thieves. Many conflicting rumors are in circulation regarding the robbery, the amount taken, and so forth, and one rumor has it that the cracksmen opened the safe door by working the combination.

As no clue of any kind could be discovered in the Morin office, there is slight chance of apprehending the thieves.

CROSSED WIRES CAUSED SLIGHT FIRE LAST NIGHT

Crossed wires in a chandelier in the home of Mrs. Showers, West 3rd street, necessitated a call for the fire department at 9:30 o'clock last night. Although the house was filled with smoke when the firemen arrived, due to burning insulation, there was very little blaze and the chemicals quickly extinguished it. The damage was trifling.

B. P. O. E. GO TO PEEKSKILL

Fulton's representatives at the State Convention of Elks will leave this city for Peekskill tonight, via the New York Central. Three members of the Fulton lodge are members of the state organization and as such are entitled to a vote in the convention. They are John W. Stevenson, State Executive Committee; Louis Cornell, State vice president for Fulton-Lodge, and Frank M. Cornell, state historian. In addition to these, six regularly elected delegates will represent Fulton at the Convention, as follows: Edward P. Cole, O. F. Bogardus, Linn Richardson, John Painter, Sr., George Fuller and William Harper.

The rumor that a boom for the candidacy of John W. Stevenson as national exalted ruler in 1917 would be launched at the Peekskill convention was denied this morning by one of the officers of the Fulton lodge, who said Mr. Stevenson had done nothing toward furthering his candidacy, and had not even announced himself in the field.

WEATHER FORECAST.

Probably cloudy to-night and Tuesday cooler. To-night moderately west to north west winds.

THE FULTON EVENING TIMES

Published Daily, except Sunday, at the Grange Building, East First Street, Fulton, New York.

Entered as second-class matter at the Post Office at Fulton, New York, under Act of March 3, 1879.

SELECTED EDITORIALS

Columbia (S. C.) Record:

When you have a feeling that "something is going to happen" get rid of it as soon as you can. Go take a walk. If you cannot do that, wash your face in cold water, the colder the better; get a good book or call on some of your friends; get up and shake yourself some way and start over again.

There are people who worry every idle hour they have, thinking of the misfortunes which may never come.

There is trouble frequently enough in actual experience. Why make yourself miserable till you have reason?

Trouble in the future seems greater through perspective, for imagination is a wonderful magnifying glass. When the circumstances confront us the reality is usually insignificant.

Try for confidence in yourself. Meet and overcome all obstacles. If you do not believe in yourself, no one else will. Encourage this line of thought, or, better yet, go ahead on the assumption that everything is going to turn out finely, and see how difficulties will fade away like mist in the sunlight.

Do not forget that you are God's child, and nothing is too good for an heir of the kingdom. You cannot fail no matter what happens.

* * *

New York Tribune:

"We do not need it; it was just a way of being happy." Thus did a moujik give his approval to the prohibition of vodka in typical Slav fashion. The soul of the race shines through his words. And they make possible and likely the continuance of the prohibition after the war, which the Czar's will alone could never accomplish. For, indolent, barely articulate, hard to rouse, Russian public opinion is irresistible once it makes up its mind. Nowhere else, and at no other time in any other country, has autocracy lived so little by strength of arms, so much by mere apathetic, fatalistic sufferance, as in the Russia which turned to a new phase in its history with the beginning of the war.

Nevertheless there as elsewhere the problem of permanent prohibition is a complicated one. The sporadic appearance of illicit distilleries, numerous cases of wood alcoholism, not always fatal, are merely incidents of the first stage of the measure, and of no great significance. The fact that the rich can continue to buy imported champagnes and wines, liqueurs and liquors while the poor man must go without his vodka has not failed to find satiric and discontented commentators. Petrograd, it is said, bathes in champagne since the opening of this era of war contracts—and, furthermore, there are the interests of the French Ally's enormous wine industry to be considered. Russia is one of its best markets.

Again, Russia produces wines of her own, in Bessarabia, the Caucasus and the Crimea. It is chiefly an industry of small landed proprietors, for whom the prohibition of viniculture would spell utter ruin. Here is found the main difficulty of the problem, to be met only, if at all, by government purchase of these interests. Russian experts have declared that prohibition cannot be pronounced a success until after twenty-five years have elapsed. The policy advocated at present is one of a continuance of the wine industry under gradually increasing restrictions, with perhaps a corresponding gradual increase of duties on the importations, to be arranged in consultation with the foreign interests involved. The rapidly increasing purchasing power in other directions of the Russian people, protected against its vodka bills, will no doubt serve as a potent argument in these negotiations.

There remains, then, beer—comparatively speaking a small financial interest, easily bought out. Not more than two hundred millions of rubles are invested in Russian breweries. But there are in the country two theories on the subject of the beverage. One is that the encouragement of the use of light beers will aid in weaning the nation more readily from its stronger drink; the other is that beer intoxication is the most insidious of all, and the hardest to extirpate once it has been acquired. Here, too, a system of progressive taxes is likely to be introduced as the safest means to an end. But there are rabid prohibitionists in Russia as well as temperance advocates and believers in a middle course, and it appears that even there the "liquor interests" are seriously to be counted with. *Tout comme chez nous.*

Certain it is that Russian observers expect a reaction after the war from the readiness with which prohibition was accepted at its beginning. It is here that the crisis will arise, because it will be no longer, then, a matter of the imperial ukase but of the attitude of the Zemstvos and other local governing bodies, and of the mass of the nation which they represent. Prohibition by a stroke of the pen has been an interesting experiment from the first—it had an inspiring quality when millions upon millions of men accepted and welcomed it with patriotic devotion. But the proof of it is yet to come. It is then that the experiment will be watched by all civilization, which, by the way, is the only part of humanity that habitually gets drunk because it is "just a way of being happy."

* * *

Chicago Tribune:

In its consideration of an inheritance tax The Tribune has shown that our vast private fortunes have produced a useless aristocracy. It has shown that in this country as in no other men may inherit enormous fortunes without also inheriting responsibility. Men who build up fortunes by developing great social discoveries contribute to the welfare of society. Their heirs do not. They are useless, parasitical.

More than that, these men without social responsibility are not only useless but dangerous to the community. Situated as they are, with every means of comfort and pleasure at their disposal, the great social needs of a growing and changing society do not reach them. They are insulated from public thoughts, because only the most revolutionary public ideas can alter their manner of living.

These men are never exposed to the realities of living. They are sheltered from youth against any contact with national existence. Of course, they do not understand it.

America has considered itself the land in which people might experiment with governing themselves. Our history has been one of trial and rejection. What advance we have made has been by this method. It is exactly this which the useless rich cannot understand: Because their needs are cared for they see no necessity of change.

The United States, by permitting undue accumulation of wealth in hands that did not earn it, has been raising not merely a powerful group of useless citizens but a group of stupid obstructionists. They are so situated that, however, urgently a social need may impress itself upon the rest of the community, they do not feel it.

The intelligent conservative is the most valuable of citizens. The man who hesitates before inaugurating a change is prudent. He insists upon thinking before acting. But the heirs to great wealth as a class do not think deeply, rationally, because they have no experience upon which to base thoughts. By encouraging them the people of the United States are hindering a progress which makes life in the United States worth while. An inheritance tax will help to make easier progress within and by providing new revenue to expend upon defense will help to guard us from without.

Opinions

IRISH MARTYRDOMS NOT IN VAIN

Home Rule is to be put in operation immediately in Ireland. Such is the word from London.

Ireland gets this measure of justice because Pearse and the men who fought with him and died with him had the resolve and the courage to fight and to die.

Let no man say that they failed, that they threw away their lives. They did not fail. They did not throw away their lives.

They succeeded almost in the hour of their deaths in compelling at least a poor measure of just treatment for Ireland; and it will yet be written in the chronicles of times to come that they won Ireland's final independence and everlasting freedom.—N. Y. American.

50,000,000 LESS FRUIT TREES

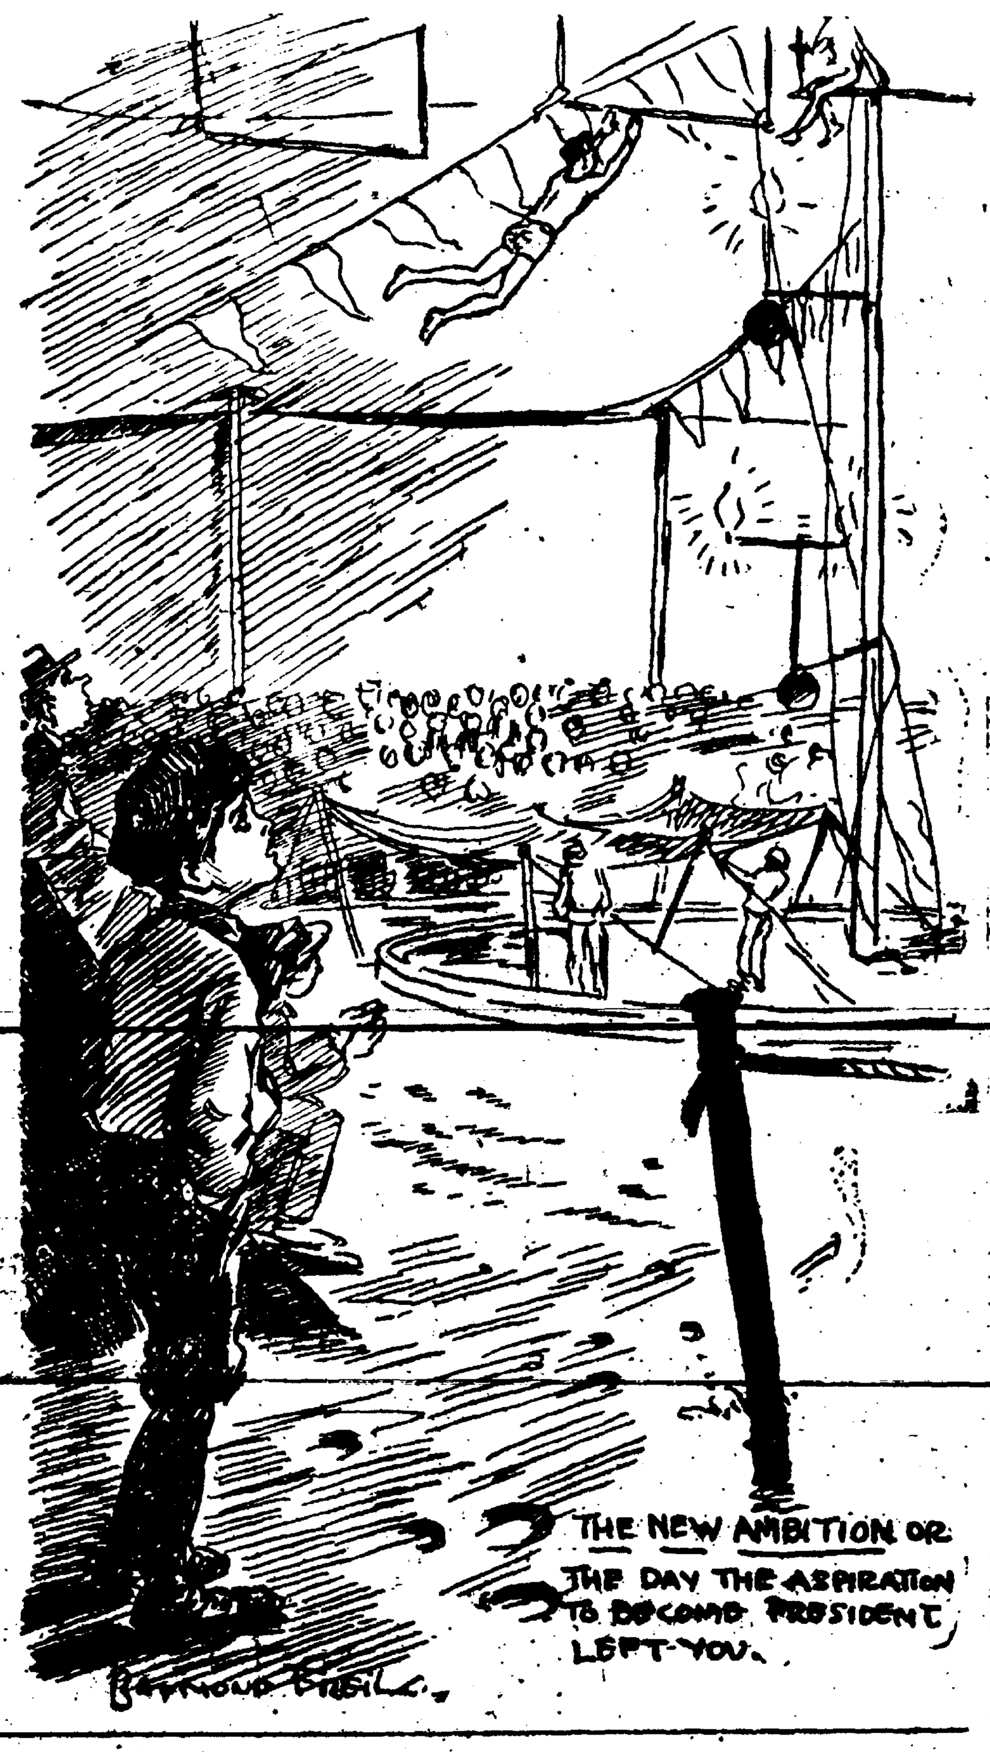
A professor of the Massachusetts Agricultural College observes that this is the time to plant apple trees, and then he tells a little something about it. He says that there is no danger of over production and that there is season for orcharding to become more profitable each year. One prominent reason is that there are 50,000,000 less bearing trees in the country than 10 years ago. We can believe it, considering the decayed and dying orchards behind many farm houses in the country wherever one may go. At the same time there has been an increase of 30 per cent. in the population of the country—and while orchards are dying population keeps on increasing.

A thing that the professor doesn't mention is that the price of fruit trees is cheaper this year than they have been, thus fruit trees distinguish them almost every thing else that one may buy. They are cheaper because the export business in friut trees has been cut off. Europe isn't planting trees this year. It is plowing them up with cannon, and cutting them down with machine guns.

For that matter, it isn't necessary to buy apple and some other varieties of fruit trees. A man can go out in the pasture, dig up some small wild apple trees, plant them in rows, and the following spring graft them, which any man can do with an agricultural leaflet on grafting in one hand and a jack knife in the other.

With apples retailing at about the price of oranges, it looks from the street as though some people in Oneida county might profitably plant and take care of a few apple trees.—Utica Observer.

Days You'll Never Forget



ELECTRICITY AND PROSPERITY

Both of these subjects are current topics. Both get short circuited occasionally and both can be run into the ground. The resemblance might be carried on, "ad lib," but we've other uses for the space and will just remark in passing that this week is being celebrated throughout the country as, "Electrical Prosperity Week." Manufacturers, jobbers and retailers of electrical instruments and utensils are calling attention of the public to the fact that electric luxury of a decade ago is an absolute necessity now, so quickly have we adapted ourselves to the many opportunities for labor saving, for increased efficiency and for convenience in electrical apparatus.

In addition, the men in the electrical field want to call attention to another thing also, and that is that they are doing no small part to contribute to the financial stability of the nation, the State and the city, wherever that may be.

Fifty years ago there wasn't a commercial telephone in existence, and not a dollar's wealth was represented in the telephone industry. To-day there are 14,400,000 telephones and more than $2,000,000,000 is invested in this industry.

A little less than forty years ago the carbon lamp had a useful life of eight minutes. To-day it lasts indefinitely. Forty years ago one tram car company in one city, used 8,000 horses. To-day the horse is liberated and more than $4,000,000,000 invested in electric railroads. Telegraphs also claim their portion of capital and movable power units theirs, too.

But there is another side to the question of electricity and prosperity beside that of dollars and cents actually invested in utensils and materials. Consider the time conserved to the world by electrical labor-saving devices. A man lives upon this world only once, and if three-fourths of his time is spent in getting from the place he started to the object he wants to attain, the enjoyment in the fourth of his period will not greatly recompense him for the struggle.

Without the electric telephone the modern business skyscraper would be an impossibility. Thousands of people could not assemble under one roof to thirty and forty stories above the earth without the electric elevator to handle their distribution. They could not handle the volume of business anyway if they had electric elevators if they had not electric telephones. Electric interurbans distribute populaces quickly from city to country; electric street cars carry hem without waste of time over city streets, and whether in office or home, the electric light makes it possible to prolong the efficiency of daylight and gives absolute control over nature, to bid night come when desired.

The wonders of yesterday have become so commonplace with the present generation that we are likely to think more of the interruption of our necessity than our predecessors in civilization thought of the revelation of a miracle. Electricity and prosperity has given man control over time, and without time all efforts are fruitless.—Richmond (Va.) Dispatch.

TRAPPED BY HIS BLIND RAGE.

For Stupid Obstinacy a Himalayan Bear Takes the Prize.

"Most wild animals are stupid as well as greedy, but for sheer brainless obstinacy in the face of opposition," writes Prince Sarath Ghosh in his book, "The Wonders of the Jungle," "there is no animal like the Himalayan bear. If he finds a thing in his way he will always push it aside, if he can, even though it would be easier to go round the obstacle.

"The wily natives of India have observed that trait in his character and from it have contrived a trap to catch him. They select a tree with a suitable horizontal bough. At a point on the bough about ten or twelve feet from the fork they fasten a bait likely to attract the bear—honey, for example, or goat's flesh. Then from another bough above that one they suspend a heavy block of stone. The rope is so attached to the upper bough that the stone hangs between the bait and the fork of the tree.

"The bear scents the bait from a distance, comes to the tree, sees the food on the bough and climbs up the trunk of the tree. Reaching the bough, he walks along it to get at the bait. But suddenly he notices the obstacle in the way and pushes it aside with his paw. The stone swings out of the way for a second, then it swings back and hits the bear on the paw. With a growl of irritation the bear pushes it aside more violently. The stone swings away again; then it returns with greater force and hits the bear on the chest.

"With a snarl of rage the bear gives the stone a tremendous thrust and sends it up into the air in a wide curve. Then down comes the stone in a similar curve and hits the bear a thumping whack on the ribs.

"Most animals would desist after that third blow; not so the bear. He is now in a perfectly mad rage, and a bear is a good boxer. He hits out with his paws right and left and sends the stone hurtling forward in a still wider curve. Then after a few seconds the stone comes back and hits the bear a terrific 'uppercut' on the jaw.

"The bear is roused to white hot fury. He thinks an enemy is hiding behind the stone—as an enemy might do in the jungle—and he is determined to reach that enemy.

"But, alas, the bear never went to school and learned the law of gravity! Every blow he hits the stone is returned tenfold. And as the stone has no brains to be knocked out it is the bear that gets knocked out at last. He will never, never give in until he is knocked out—of the tree.

"Then the wily natives hiding below rush in with a net and throw it quickly over him.

"And that is how many menageries and zoos get their Himalayan bear."

Why Not a Garden Pool?

As to the garden pool—why not have one? It may be ever so simply done, and often the more simple it is the more charming. Or it may be very elaborate and artificial, like those in the tiny toy gardens of those masters of artifice, the Japanese. No other garden feature offers greater possibilities for diversity of form or for originality than the pool. I know a city garden with high walls about it, rather a cramped garden because of the nearness of other dwellings. But under a small tree in that garden is a bit of a basin with water that is always fresh, set there in the sod to invite the birds for a daily bath. And where birds are there is the spirit of the woodland and mountains, no matter how high skyscrapers tower roundabout.—Bertha H. Smith in Countryside Magazine.

Thoroughly Disinfected.

In the days when the Manchu dynasty was tottering two students cut off some of their fingers as a protest to the government's delay in granting a parliament. Such forms of protest are to the Chinese what writing a letter to the paper is to the Englishman. When these students were taken to the Union Medical college the doctors remonstrated with them for misusing their bodies and running the danger of infection as well.

"Oh, you needn't fear on that point," said these students. "We boiled the knife first."—World Outlook.

Monster Coins.

It is understood that the largest gold coin in circulation is the gold "loef" of Anam, the French colony in eastern Asia. It is a flat round piece worth £55 English money. The next size to this unwieldy coin is the Japanese "obang," which weighs more than two and a half ounces and is about equal to ten English sovereigns.—London Opinion.

The Seven Seas.

"The seven seas" is a poetic name for the oceans of the earth. The "waters embraced" in the term include, therefore, all the great waters of the earth. Specifically the seven seas are divided as the north and south Atlantic, north and south Pacific, Arctic, Antarctic and Indian oceans.

Man.

What a piece of work is man! How noble in reason! How infinite in faculty! In form and moving how express and admirable! In action how like an angel! In apprehension how like a god! The beauty of the world! The paragon of animals!—Hamlet.

HOW UNCLE SAM HELPS NATION'S BUSINESS MEN

Pratt Points to Large Orders Obtained Through American Agents.

"I hope that the present prosperity which we are experiencing in the United States will not blind you to the importance of foreign trade," said Dr. Edward Ewing Pratt, chief of the bureau of foreign and domestic commerce, in an address before the Business Men's league of St. Louis Friday May 26. "We in the United States must not get the idea that foreign trade will come to us without our seeking it, nor must we get the idea that we can afford to devote ourselves exclusively to the increasing amount of domestic business and forget entirely foreign trade."

Dr. Pratt's address was concerned principally with the importance of foreign trade and with the assistance his bureau is in a position to render to any American who is selling or wants to sell goods in foreign countries. To prove the practical nature of the service rendered to exporters by the bureau numerous examples of actual results were cited, ranging from a $1,500 order for road machinery to orders that run into millions of dollars, including textile machinery for the Chinese government, flour for Turkey and hydroplanes for Spain. These orders came to the American exporters as a direct result of the activities of the bureau and its representatives in foreign countries.

"The bureau of foreign and domestic commerce," said the speaker, "should be judged by its deeds. If we are not accomplishing definite, practical business results it is time the bureau were discontinued. If, on the other hand, we are accomplishing definite, concrete business results it is time the work were enlarged and that even greater efforts were made by the government to promote our trade in foreign countries."

NEW YORK IS GREATEST PORT.

New York now leads all other ports of the world in commerce. A table just published in the "Statistical Abstract of the United States, 1915," compiled in the bureau of foreign and domestic commerce, department of commerce, credits New York with an aggregate foreign trade of $2,125,000,000, which exceeds by $200,000,000 the commerce of London, now second in rank.

The following table, condensed from a more extended one appearing in the statistical abstract, shows the imports and exports of the leading ports of the world in the latest available year:

	Imports.	Exports.
	(Millions of dollars.)	
New York	881.0	1,193.6
London	1,232.1	696.7
Hamburg	1,084.5	817.7
Antwerp	623.2	588.2
Liverpool	810.0	833.6
Marseilles	389.6	365.7
Bremen	370.6	211.4
Calcutta	229.3	317.0
Bombay	202.8	225.4
Buenos Aires	200.8	140.4
New Orleans	79.7	208.4
Montreal	141.2	119.3
Boston	152.7	107.5
Galveston	10.1	230.4

The new statistical abstract contains 749 pages of statistics concerning America's industries, agriculture, labor, transportation, commerce, finances, army and navy, etc., and foreign commerce and finances. All figures are the very latest available.

PETROLEUM AS ENGINE FUEL.

Figures just made public by the United States geological survey disclose a marked increase in the use of petroleum as a locomotive fuel by the railroads of the United States in 1915. The data at hand show that the quantity of oil fuel so consumed last year was 36,648,466 barrels, an increase of 5,555,200 barrels, or 18 per cent, over the similar consumption in 1914. This increase is ascribed to the relatively low prices prevailing for fuel grades of oil during the past year and a half as a result of the increased production of low grade crude in the gulf coast states and in Mexico and of the augmented output of suitable residuals from refineries operating in ever increasing number in Oklahoma and Kansas.

The total distance covered by oil burning locomotives in 1915 was 124,255,525 miles, and the average distance covered per barrel of oil fuel consumed was 3.39 miles. Oil fuel is now used to some extent on forty railroads in the United States, having tracks in twenty-one states.

ADDITIONS TO EMBARGO LIST.

An embargo has been placed on mackerel, fresh, smoked, salted, preserved and canned, and on platinum and platinum waste by Norway, says a consular report.

JAMES J. HILL.

Noted Railroad Builder Who First Saw Chances In the Great Northwest.

HOW THE UNITED STATES TRAINS ARMY AVIATORS

One Aeroplane In Mexico Worth as Much as 1,000 Men.

As soon as the Villa raiders crossed the border, raiding an American town and taking the lives of American citizens, the Aero Club of America started to mobilize civilian aviators and put them through a special course of training on high powered military aeroplanes.

It is estimated that every aeroplane is worth a thousand soldiers in such a campaign as the Americans have undertaken in Mexico, the aviator being the only soldier who does not face death in crossing the border.

Prompt response was obtained from the call for volunteers to form a reserve of aviators to be given special training and kept available for orders from the war department.

Ten licensed aviators, sportsmen and professionals are taking special courses at different aviation schools on high powered aeroplanes capable of quick climbing, such as are absolutely necessary for effective work at the Mexican border. Other militia officers of different states and students are being mobilized, some of them being already under training.

The organization of the aviation detachment of the First battalion signal corps, New York national guard, was made possible through $12,000 contributed through the national aeroplane fund of the Aero club. It was organized in October, and, in spite of bad weather, training was carried on throughout the winter, more than 300 flights having been made by members of the detachment. An effort is being made to raise funds for the purchase of two high powered military biplanes for the detachment.

A score of civilians having various qualifications who wish to learn to fly and place themselves at the disposal of the war department are to be sent to aviation schools as soon as adequate arrangements can be made to train them.

POSTCARD HISTORY OF WAR.

Six Laconic Messages Tell of Soldier's Activities.

The War Gazette of the Fourth German army publishes six laconic postal cards of a Bavarian soldier by the name of Matthias Niedermaier, which form an odd and somewhat humorous war chronicle. The brave Bavarian left his home two days after the declaration of war and has been fighting on different fronts ever since. The six cards, which are the only news his relatives have received from him since he went to war, contain the following messages:

"Belgium, Aug. 15, 1914.—I am well, but it is rather hot around here."

"Argonne Forest, France, Nov. 19, 1914.—Am still well; it is awfully wet in our trenches."

"At the front in Galicia, March 21, 1915.—I am all right, but my uniform is full of bugs."

"At the front near Riga, September, 1915.—Don't worry about me. I am well. The Russians have only shot off one of my ears."

"Nish, Dec. 25, 1915.—I am getting along nicely. The Servians are finished."

"Constantinople, Feb. 22, 1916.—Have arrived in the Turkish capital. We now go to Mesopotamia and Armenia."

FLIES ARE MOVIE TICKETS.

One Hundred Dead Ones Admit Arkansas Boys to Theater.

The boys of Bentonville, Ark., don't need money to see the movies there Friday nights. The admission fee is 100 dead flies or 10 cents cash.

A local movie magnate has posted a sign reading "Admission, 100 Dead Flies," and it is making a hit. Every Friday night 100 dead ones admit you to this theater. And then you can win five extra tickets for bringing in the largest number. Indications are that flies will soon be an unknown quantity in Bentonville.

HILL WAS MASTER RAILROAD MAN

First to See Possibilities In the Great Northwest.

HE MASTERED ALL SUBJECTS

Entered Railroad Business In 1875 and Soon Became One of the Most Notable Financiers In All the Country—His First Work Was In a Steamship Office.

James Jerome Hill, the great builder of railroads, is sometimes likened to a lion in finance, but it is more descriptive to speak of him as a Scotch-Irishman. Of that strong and contentious race of Scots who settled in north Ireland and have ever since been a people distinct both from the men of Scotland and from those of Ireland, he came to this country at an early age. He has displayed throughout his life the shrewdness, the will power, the brain power and the fighting power that were his only birthright, and they carried him all the way from a Canadian country cottage to a sort of kingship in the railroad world, where with thousands of men under his orders, none over him, and millions of others dependent more or less upon his ably run lines and the traffic that they carry he spent the latter part of his life. For several years before his recent death, however, he intrusted his business cares to his sons.

One of the striking things about Hill has been courage. He showed that when as a young lad he left his country home with $10, borrowed, to go to the States and make his fortune. It was the kind of courage that not only dares to risk, but dares to form great hopes.

A domineering intellect that insisted on grasping and mastering any subject that came before it was another of Hill's lifelong traits. He employed the intellect to study the northwest like a book and learn it by heart. He also studied railroading and learned that business in the same way. Then he put the two knowledges together and by means of the combination created in twenty years a railroad system that built up a whole section of the country and surprised the great eastern capitalists, who had meanwhile been sitting down and planning theoretical development.

His Romantic Marriage.

Hill came into the world with a strong dash of sentiment in him and never quite lost it. His marriage was a romantic one, and when he quit the St. Paul home that he had lived in for many years and raised a family in he had the house torn down, for he said he would not sell his associations to anybody.

Hill was born at Guelph, Ontario, in 1838 on a little country place. He went to a local academy for awhile. One day, it is said, a stranger stopped at the Hills' house for dinner. Young Hill carried the stranger's horse a pail of water. In return by way of an inexpensive reward the stranger gave the boy a newspaper, in which there happened to be an account of the great demand for laboring men out in Minnesota. It was upon this information that Hill acted when he borrowed $10 of a neighboring farmer. The money took him as far as Syracuse. From there he worked his way west until he reached St. Paul. He stayed in St. Paul ever since.

From 1856 to 1865 Hill put in eight or nine hard years of work in a steamboat office. Even that was a rise. He had begun as a wharf laborer. But in 1865 he rose further, setting up in business as the agent of the Northwestern Packet company. In 1870 he formed a line of his own, the Red River Transportation company, which ran a vessel on the Red River of the North, opening up new territory and bringing back cargoes of furs. At the same time he engaged in Mississippi shipping and carried coal into St. Paul, where for many years he owned the leading coal yards. With all these other ventures taking up his early business years, Hill was nearly forty years old before he went into the railroad business—an odd fact in view of his lifelong distaste for railroad men of over thirty-five.

Hill's sentimentality has been called almost poetic. It came near the poetic when in those early years he spoke once of the great northwest. It was once when he had just seen the country along the Red river. The tracks of the rarely used wagon trail were covered, he noticed, with much taller grass than the plains about. It was very likely owing to the passage of beasts along the trail. But Hill saw in the phenomenon a prophecy. "It is God's promise of a fruitful empire," he said.

The woman whom Hill married he is said to have met when she was a dining room girl in a St. Paul hotel, back in the early days. She was of the Irish race and a Roman Catholic, and so the two were far apart in such matters. It made no difference. They were married, and Mrs. Hill rose in life with her husband. Neither changed religion.

Hill's entry into railroads came around 1875. At that time he acquired a bankrupt fifty mile line of newly built track running from St. Paul to St. Cloud. He thought that he could make the line profitable. He backed his opinion with characteristic courage. It was a long time before he could obtain the necessary financial support.

Bowser's Dead Horse

By M. QUAD

MRS. BOWSER had never heard of the term "dead horse" except as applied to a dead horse in the street—a poor old nag who had given his life to humanity and had come to the end of his days and let go of life.

On the contrary, Mr. Bowser had often heard the term used and had seen it many times in print. He knew that unclaimed baggage kept in the express company's offices over six months was called "dead horse" and sold by auction as such. Mr. Bowser had often dreamed of attending these "dead horse" sales and of buying an old trunk covered with an inch of dust and tied around with a piece of bed cord and sending it home to be opened. His successful bid for the trunk was only 25 cents, and when he came to open it he found a million dollars' worth of United States bonds looking him in the face. Whenever Mr. Bowser had dreamed this dream he awoke with a shout of exultation, and for a week thereafter he closely scanned the advertising columns for a "dead horse" sale.

The other evening Mr. Bowser discovered the advertisement he had been looking for so long, and he almost jumped out of his chair as he read it. Mr. Bowser determined to attend that sale. He wasn't going to say a word about it to Mrs. Bowser until that trunk came home. She would be sarcastic and sneer over his finding any bargains at such a sale. He would produce before her face and eyes such a bargain as she had never heard of and thus take her down a few pegs.

Mr. Bowser got to that sale so early that he was the first one there. The things to be auctioned off were piled high, but yet he had scarcely stepped within the door when his eye caught sight of that old trunk which had caused him so many dreams. Yes, it was tied up with a piece of bed cord, and it looked mean enough to belong to any miser in the country.

Mr. Bowser stood with his eyes on that trunk while 100 other articles were sold. Then he demanded that the miser's trunk be put up for a bid, as he had no more time to spare. The old trunk was therefore yanked out amid cheers and laughter. It didn't look to contain anything of more value than 25 cents,

A TREMENDOUS KICK.

but the crowd saw that Mr. Bowser had a peculiar interest in that trunk, and they determined to make him pay for it. The bidding started at 10 cents and reached $15. That sum was Mr. Bowser's bid. The money was paid, a wagon called, and the trunk was sent to Mr. Bowser's house. He reached home an hour later, and his first words as he entered the house were:

"Was an old trunk delivered here awhile ago?"

"Yes, an old contraption called a trunk came up, and you will find it in the basement hall. Did you buy it at some auction?"

"I did," replied Mr. Bowser, "and I think it will prove the greatest bargain of my life. I'll show you a thing or two after dinner. I have had my mind made up what the contents of that old trunk are for more than a year, and you can prepare for a great surprise."

When dinner was finished the old trunk was brought up into the sitting room, and the crisis came. Mr. Bowser was trembling with excitement. The rope was cut, the trunk was locked, but the cook was called upon for a hatchet and the hasp broken.

The lid was carefully raised and was finally lifted to its full height. There were a number of parcels wrapped in newspapers. There was an old cinnamon colored dress skirt, there was a woman's nightdress, the worse for wear; there was an old pair of shoes, with an old pair of stockings to match; there was an old sunbonnet and an old waist. There was also a bunch of dried catnip and a half pint bottle of goose oil.

"So that is your bargain, eh?" laughed Mrs. Bowser.

"By Jehosephat!" whispered Mr. Bowser in an awed voice. Then he began to strike the air with his fists and to jump up and down and to try to give utterance to his true feelings. Thus for a minute, and then he gave that old trunk such a tremendous kick that half of the packages flew to the ceiling and the splinters flew after them. Then a window was raised and everything was thrown out of it into the back yard, and Mr. Bowser turned to the smiling woman at his elbow and grimly said:

"Woman, this is another of your inhuman tricks, and I will live a thousand years to get even with you!"

And Mr. Bowser went out into the evening and sat down on the front steps and chewed the rag and went out of the "dead horse" business forever and ever.

ONLY A KISS

HE.

If I should steal a little kiss,
  Oh, would she weep, I wonder?
I tremble at the thought of bliss
If I should steal a little kiss.
Such pouting lips would never miss
  The dainty bit of plunder.
If I should steal a little kiss,
  Oh, would she weep, I wonder?

SHE.

He longs to steal a kiss of mine—
  He may if he'll return it;
If I can read the tender sign,
He longs to steal a kiss of mine.
"In love and war"—you know the line—
  Why cannot he discern it?
He longs to steal a kiss of mine—
  He may if he'll return it.

The Mighty Fallen

HE had returned to his village home from a trip to Washington, and that same evening he appeared at the drug store to entertain an admiring audience with his adventures.

"Saw our congressman, I suppose?" queried the blacksmith.

"Of course, and took dinner with him."

"You did, eh? By George, but that shows we are no one-horse folks here! See the president?"

"I did by special appointment."

"Shake hands with him?"

"I did."

"Seemed to be glad to see you?"

"He did."

"Did you call him Woody?"

"Why, no!"

"You didn't dare call him Woody."

"Certainly not."

"Well, that's all I wanted to know, sur. You own the gristmill, woolen factory, three stores and the tavern and have been to the legislature and give us to understand that you were a heap of a feller, but you hain't. You went down to Washington and talked to the president and dasn't call him Woody, and I don't foller you further. Come on, boys; let's go to Church's grocery and see that feller who fit seven rounds of a prizefight last week."

M. QUAD.

MUNICIPAL BATHS MUST BE PROVIDED

Bathrooms Should Be Properly Constructed.

SIZE OF SWIMMING POOLS.

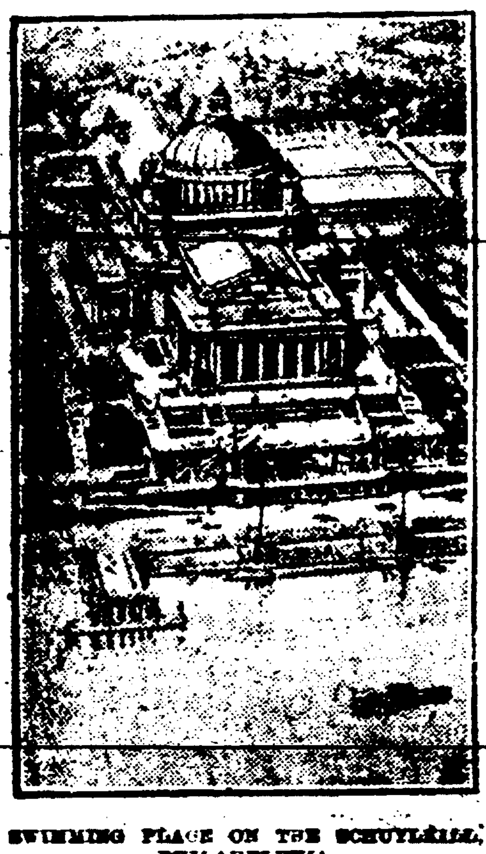
The City of New York Has Many Free Public Interior Baths and Free Floating Baths—All Are Run at a Very Low Cost—Other Municipalities Also Maintain These Sanitary Institutions.

By FRANK KOESTER, city planner and consulting engineer, New York, author of "Modern City Planning and Maintenance," etc

While many municipalities have provided public baths, they seldom have been provided in sufficient number with proper equipment.

Such baths should be on a large scale and be what may be termed aquatic gymnasiums. There should be a large swimming pool some 100 feet or more in length and forty to fifty feet wide, varying from three to fifteen feet in depth at different parts, with springboards for diving and artificial waves.

Steam rooms, sweating rooms and shower baths should be provided, with both hot and cold water. The showers should be arranged to jet either from above, from the wall at the side or



SWIMMING PLACE ON THE SCHUYLKILL, PHILADELPHIA.

from the floor upward. Such showers are operated by the user, who regulates the force, volume and temperature of the water.

The gymnasium should include the various forms of gymnastic apparatus, and it is desirable also to have a running track, which may be constructed as a gallery around the building wall.

In construction the bath should be throughout of tile and of such other materials as will betray the presence of dirt in order that the most scrupulous cleanliness may be observed.

A heating plant must be provided for keeping the water heated to the proper temperature and also for keeping the rooms at a uniform temperature. Arrangements should be such that the pool may be drained and refilled in a short time. Such baths should be in charge of a skilled swimming-master for the instruction of those who wish to learn to swim. Attendants should be at hand to massage those who desire such service.

It is advisable to supply the baths with as many features as possible in order that they may be utilized to the fullest extent. The price of admission should be low, just sufficient to cover the cost of operation, provided it is not free, while fees for special service, as for swimming lessons and massage, should be turned into the general fund.

Separate municipal baths should be provided for women, but if this is not feasible certain days of the week should be set apart for their exclusive use.

The city of New York maintains and operates twelve free public interior baths and eleven free floating baths. For the use of these institutions there is no charge whatever, the only requisite being respectable and orderly conduct on the part of the patrons, compliance with the rules and that the bathers furnish their own towels and soap. This has been the policy almost from the opening of the first public bath, although at the opening of one of the municipal baths the city did undertake to furnish towels and soap at a nominal charge to the bathers. But this was found impracticable.

Floating baths are all built about on the same plan, as follows: They are ninety-five feet long and sixty feet wide and are floated on eight pontoons, placed four on each side of the bath. In the center there is a large well divided into two parts, one, ninety-three feet long and thirty-four feet wide, for adults and one, seventy feet long and eight feet wide, for children. The depth of the water in the large well is four and a half feet and in the small one two and a half feet. There are sixty-eight dressing rooms opening upon a small gangway around the edge of the well. The floating baths, like the interior baths, are free, but the former are used only during the summer.

SCIENCE—INDUSTRY.

Potash In Western Utah.

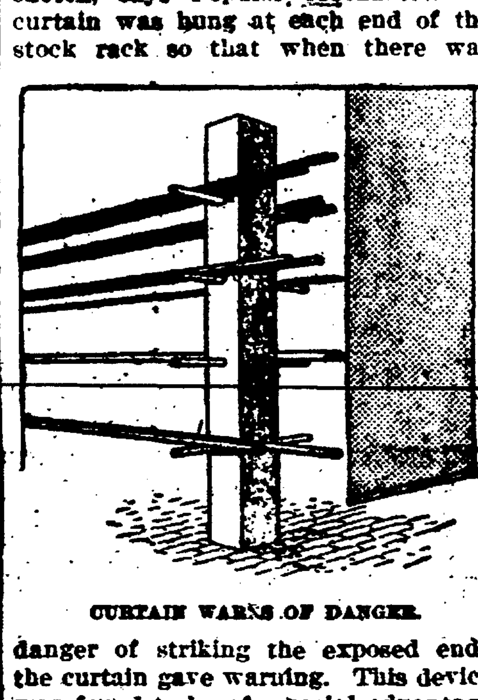
Potash in surprisingly large proportions is present in the brines and muds of the Salduro marsh, a [illegible] in the Salt Lake desert, about [illegible] miles west of the southwest [illegible] Great Salt lake. From the [illegible] the salt body which [illegible] the United States geological survey collected samples at depths of [illegible] twelve feet, in which the dissolved salts were found to contain from 2 to about 3½ per cent of potash, and 2½ per cent was found in the soluble salts at a depth of about four feet. Of the dissolved salts contained in the brines occupying the spaces between the salt crystals in the crust overlying these muds 3 to 4 per cent was found to be potash. While no extensive exploratory work has been done by the survey to show the area of the deposit, it is believed that the amount of potash present in the region, if it can be extracted with commercial success, is sufficient to provide a valuable source of supply to the country.

Tempering Cold Chisels.

Draw the chisel down to the thickness you want it. Then take an eight inch flat file and bring the point of your chisel to a rather blunt but even edge. Then give it a dark cherry red heat, and be sure your heat is even. Then hold your chisel straight up and draw down and dip it slowly into cold water three-eighths or one-half inch. When that much of the chisel is cool take it out and watch your temper. Be sure it runs even. After it starts to run first comes the pigeon blue; when that disappears you will see a very pale straw color. When the straw color has very nearly disappeared dip it quickly in water to stop the temper from running. Do not hold in water too long. Dip it again, keeping it out of water long enough so that the point gets dry each time you dip it until cool.—Blacksmith and Wheelwright.

Guard For Blacksmith's Rack.

Danger from contact with exposed ends of iron bars in blacksmith shops is overcome by the device shown in the sketch, says Popular Mechanics. A curtain was hung at each end of the stock rack so that when there was



CURTAIN WARNS OF DANGER.

danger of striking the exposed ends the curtain gave warning. This device was found to be of especial advantage where the stock rack is placed in a dimly lighted portion of the shop. The curtain may be drawn aside or arranged to lift to the ceiling with a cord when stock is being removed.

Tool For Dynamite Caps.

A tool which undoubtedly will prove a great convenience to settlers and others who use dynamite has been invented, but not patented, by Carl D. Livingston of the College of Agriculture of the University of Wisconsin. It is a combination fuse cutter, cap crimper and fuse slitter all in one. The new tool, which is shaped like a pair of pruning shears, has an adjustable blade, which can be sharpened easily when desired. Firm, smooth and tight connections between fuse and cap are obtained by means of a special crimping device, which is placed directly under the axis. A special slitting device on the end of the cutting blade is a feature of the tool which makes it different from any hitherto introduced.

Making String Solder.

String solder of a size convenient for electrical work or other soldering, where only a small quantity is desired, may be made by adapting a ladle for the purpose, says Popular Mechanics. Drill a small hole through the ladle near its upper edge. Melt the solder and pour it through the small hole, permitting it to fall on a slab of marble, slate or stone. The ladle must be moved in zigzag lines in order to prevent the string from crossing and to make it possible to roll up the solder into rings of a convenient size.

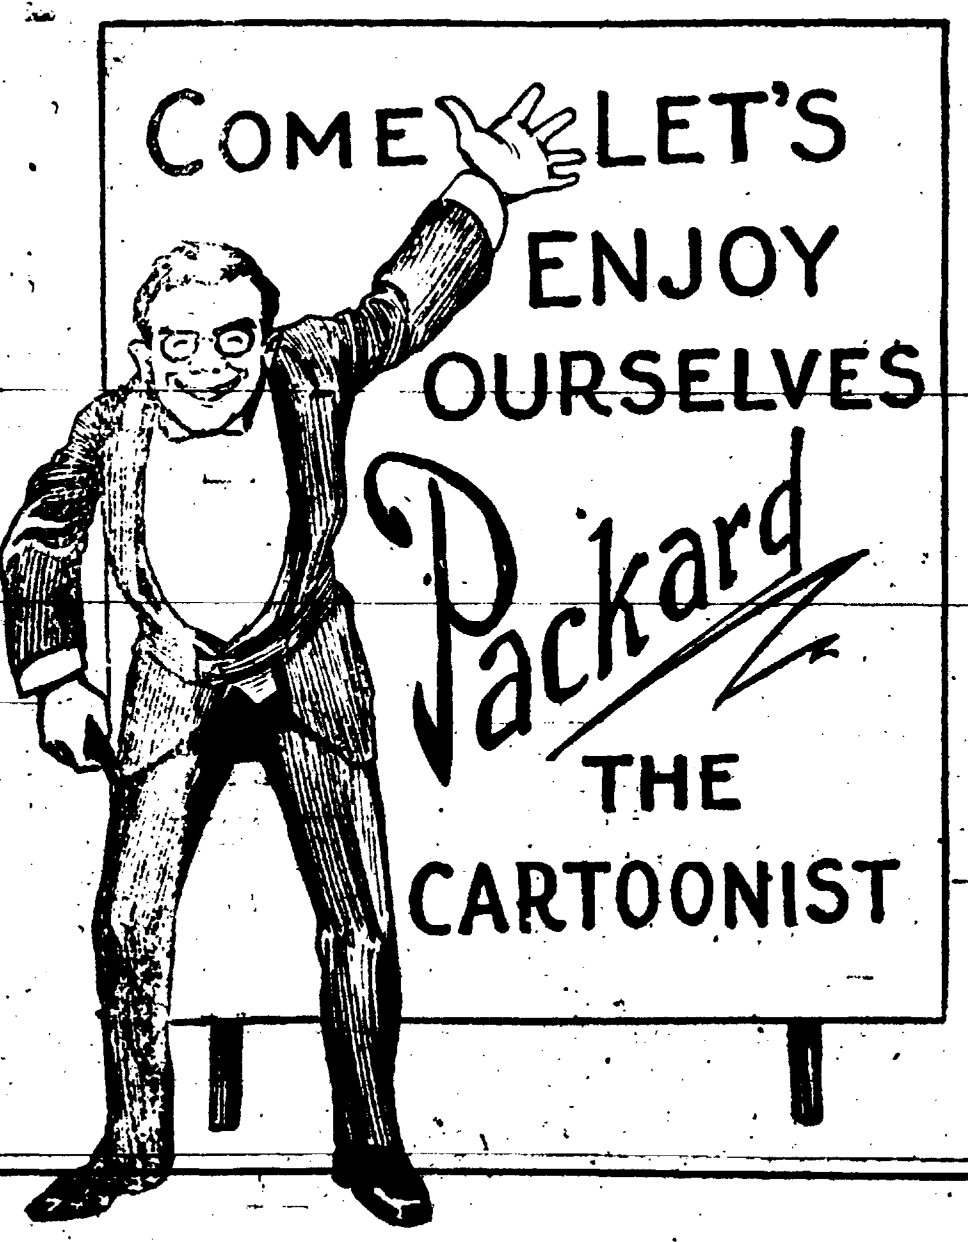
Eating Meat.

Mankind at large uses in the neighborhood of 47,000,000,000 pounds of meat a year.

Traditions of Mother Shipton.

Of all British prophets Mother Shipton is beyond doubt the most celebrated. She was, in fact, all that a prophet and witch should be, in strange contrast to the serious and scientific Nostradamus. The day she was born the sky became dark and gloomy and, according to her biographer, "belcht out nothing for an hour but flames, thundering after a most hideous manner." Her personal appearance, described by her admiring biographer in 1662, is scarcely flattering: "Her physiognomy was so misshapen that it is altogether impossible to express fully in words or for the most ingenious to line her in colors, though many persons of eminent qualifications in that line have often attempted it, but without success."

ALTON PACKARD.



ALTON PACKARD is a wondrous fun maker. He is one of the best cartoonists in the land. He is a musician of high order: also he is a capital story teller. You can travel many leagues and into many far countries and find none better. When he works before you you may be too busy laughing to notice it, but you will remember afterward how amazingly versatile his work is. When we say Packard is a twin six, 120 horse power, smooth running, sure performing entertainer we haven't half said it all. Twelve years and more Packard has coaxed tears of laughter down the cheeks of countless thousands of people. He made his name great first as a cartoonist on some of the great daily papers. Now he talks to his audiences in person, getting more fun out of it himself and bringing them much more enjoyment. He is the best "grouch getter" in the country. His slogan is "[illegible] fun we'l [illegible]." No more need be said except—fifth day of Chautauqua week.

NOBLES AS AIR MEN

Kaiser Selects "Superior Type" Only to Pilot Zeppelins.

COURSE OF TRAINING SEVERE.

Commission In Air Service of Germany Is Considered More Honorable Than Even Crack Regiment—Seldom Fail to Pass Hard Test Because of Interest Taken.

Geneva, Switzerland.—When the English took a Zeppelin crew recently the two officers included among the prisoners were referred to in London dispatches as Germans "of quite a superior type."

They ought to have been if social and educational "superiority" was meant.

The kaiser has chosen his Zeppelin commanders as far as possible from the eldest sons of the noblest families in Germany.

That the pair on the airship which fell in the Thames estuary were of this class is not necessarily indicated by the names they gave—Captain-Lieutenant Breithaupt and Ober-Lieutenant Kuhne. It is surmised here, however, that they did not give their real names.

Selections are usually made of men between the ages of eighteen and twenty-one, and from the fact that Breithaupt is described as thirty-three years old it is guessed that he has been in the German aerial service for a long time, his earlier experience probably antedating the war and reaching back to the time when the Zeppelin was in only its experimental stage.

This is thought to accord with the story that he was decorated with the insignia of the iron cross and the pour le merite, implying that he has had a brilliant career and much experience as an airship commander.

Kuhne, his subordinate, is supposed to be a younger and less thoroughly tried man.

A commission in the air service is considered in Germany more honorable than even one in the crack regiments.

Training for the service begins on one of the huge rafts, each surmounted by a Zeppelin shed, on the German side of Lake Constance.

The course begins with a detailed mechanical course. Meteorological and navigation studies follow.

After three or four months of this a party of five candidates is allowed to make a flight under an experienced pilot, who explains the use of rudder, propellers, elevators and the best methods of rising and descending.

Several such trips take place, and then the most promising cadet is given command for a trial voyage under strict orders not to venture out of sight of his home shed.

Little by little these trips are extended to Berlin, Leipzig, Brussels and finally Helgoland.

By this time the student is supposed to have gained a full knowledge of handling a Zeppelin, working its engines and of the principles of aerostatics, wireless telegraphy, gunnery and the theory of flight.

In the meantime instruction in bomb dropping has not been forgotten.

The young pilot is trained always to have the wind astern, with his airship's bow pointing at his target.

Formulas have been worked out minutely, allowing both for the Zeppelin's speed and the strength of the wind.

Altitude also figures importantly in the calculations.

Practice is obtained by bomb dropping upon miniature dummy warships on Lake Constance.

At length the student is allowed to make a trial flight or two across the fighting lines and, if he acquits himself creditably, is considered ready to take part in a real raid as second in command.

A little later, if he acquits himself creditably, he is given a Zeppelin of his own.

Examinations during the period of instruction are monthly and of great severity.

In the final examination a percentage of 70 must be reached. If he fails he is dropped from the service.

So carefully are selections originally made, however; so stringent is the subsequent weeding out process and so anxious is the average young German to succeed as an airship skipper that there are said to be few failures.

FLED FROM CROQUET BALL.

It Was Not a Bomb, but There Was a Bit of Blasting Fuse on It.

Milwaukee, Wis.—While the band at Grand Meadows, east of here, was practicing in the town hall some one opened the outer door suddenly and threw a lighted "bomb" among the members. The musicians ended their piece with a wail of thirty different notes and, joining the small audience, knocked over furniture and stampeded to a place of safety.

Puck Crane grabbed the bomb and tried madly to stamp out the fuse, but in vain. He dropped it and joined his fleeing mates.

A minute passed. Two, three, five, ten, had elapsed before one member volunteered to return cautiously to the hall to investigate. Breathless, he approached the dark object on the floor. It was a croquet ball to which had been fastened a piece of blasting fuse.

"PLEASE DON'T ROB ME!" HIS PLEA TO BURGLARS

Jeweler Tries New Method to Keep Stock Intact—Has Appeal Published.

Paterson, N. J.—If there is any sporting blood in the veins of the industrious burglars who have made professional visits to Leon Friedmann's jewelry store here at regular intervals it is hardly possible that they can ignore their victim's final appeal.

Double locks, bars, burglar alarms and watchmen having proved equally futile, Friedmann decided to make a personal entreaty to the entire profession of burglars after a visit which cost him $2,000. He wrote this communication and caused it to appear in both the afternoon papers here, on the theory that an up to date burglar must read one of the two:

NOTICE TO BURGLARS.

Gentlemen—Members of your profession have called upon us with great profit to themselves of late. We feel that we have done our share toward your support; therefore we would deem it a great favor if you would take your trade elsewhere in future, at least until we can recover from the many losses we have suffered in the past, all of which, unfortunately, are our own. Respectfully yours,

LEON FRIEDMANN.

THE STORY OF A GLOBE TROTTER

A Maiden Strangely Met and Then Lost In Siberia.

I am a globe trotter.

One day when I was tramping in Switzerland I met a young fellow who asked if I could direct him to Interlaken. I replied that I was going there and if he would join me I would show him the way. He did so, and we walked on together. His features were so cameo-like that had they not expressed a good deal of character I should have considered him effeminate. He said he was a student, but when I asked him at what university he studied he evaded the question, pretending not to have heard it. The distance to Interlaken was five miles, and before we reached the place he had without any effort on his part gained a singular influence over me. I am a believer in transference of soul power, and I have since attributed the young man's effect upon me to deep emotions that were at the time absorbing his whole existence. On reaching Interlaken we went to different hotels. I did not see him again during my stay there.

When the czar visited Paris several years ago, on the day of his entry I strolled out to see the imperial cavalcade. Turning from Rue Rivoli into the Place de la Concorde a figure came hurrying toward me, and as it passed I recognized the young man I had met in Switzerland. I shall never forget the expression on his face. I could not read what that expression reflected from the soul within, but the meeting happened near the spot where the guillotine had been set up during the reign of terror.

Some months later I was attending an evening party at Geneva, where I was introduced to a young girl, Mlle. Zabriskie, whose face the moment I saw it made me start. It was the counterpart of that of the young man I had met near Interlaken and afterward in Paris.

"Monsieur, why do you look at me so?" she asked.

"Mademoiselle," I replied, "I have met a young man who is your very image."

"Oh, dear! When shall I cease having to explain this matter? I have a twin brother. Doubtless it is he you have met. People are always confusing us."

"Was he at Interlaken a year ago?"

"Let me see. Yes; I think he was. I am sure he was."

"And at Paris during the visit of the czar?"

Her expression changed. She seemed to be trying to master some emotion.

"Did you meet him there?" she asked in a whisper.

"I did."

She gave me a look as much as to say, "Let us change the subject."

I respected her wishes, but my curiosity struggled with my politeness, for I burned to ask more about this mysterious brother.

When I went home that night my brain was in a whirl. Few people have thus come under a sudden dominating influence as I did, and words are inadequate to express or explain it to those who have not. I only know that I was on the verge of being madly in love. I met Mlle. Zabriskie several times during my stay in Geneva, passing rapidly from one stage of enthrallment to another. One afternoon I went to her house—she was boarding, but I did not learn under whose chaperonage—to keep an appointment with her to saunter on the banks of the blue Rhone. To my astonishment, I was told that she had left Geneva. She had left no word where she was going or any message for me. I called at the house where I had first met her, and they told me that their acquaintance with her had been short, and they could not, or would not, tell me how they had made it. It seemed to me that I must find her or life would be unbearable; but, having secured no clew, I did not know where to look for her. I visited different cities, going often to theaters and gardens, but never in two years met either her or her brother.

During that memorable Sunday when the workmen marched to the Winter palace and to slaughter I was in St. Petersburg. For weeks after I saw persons almost daily marched to prison, and one morning while standing at my window a band of men and women passed that I was told was starting for Siberia. Among them I saw again the woman who had enthralled me. There was the same expression on the face I had so often seen there, and I now recognized it as voluntary martyrdom. What became of my faculties for the next few minutes I know not, but when I came to myself the throng of exiles had disappeared.

I learned from a revolutionist that Zabriskie was an assumed name under which the young devotee had gone to Paris to try to assassinate the czar. There was no twin brother. The offense for which she had been exiled was inciting the laborers to action—indeed, inspiring them behind their barricades.

And now, after drawing on my bankers in America for the half of my fortune, I have secured permission to go to Siberia to examine into the condition of the prisons there with the pretended view to counteract the effect in the western world of unfavorable statements of others. All I ask is that I shall find the officials as ready to accept bribes as they are reported to be. If so I shall bring back my love to life and liberty.

SNAPSHOTS AT NOTABLE PERSONS

Sir John G. Maxwell, British Commander In Ireland.

Photo by American Press Association.

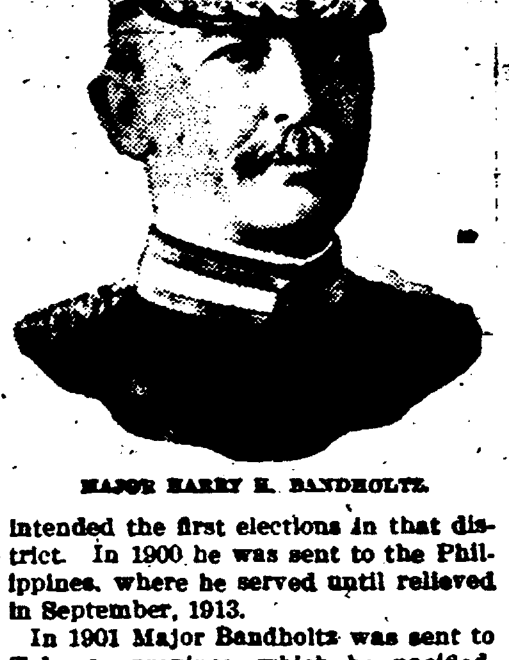
Lieutenant General Sir John G. Maxwell, who was sent to Ireland to quell the revolt in that country, was until recently commander of the British forces in Egypt. Most of General Maxwell's military experience was gained in the land of the khedive, where he was one of the principal lieutenants in the operations connected with the reconquest of the Sudan.

Although General Maxwell has done his fair share of fighting in the Sudan and South Africa, it is said of him that he excels as a shrewd and strong administrator rather than as a military strategist. Probably it was because of his ability as a manager that he was chosen to manage the affairs in Ireland. He is described as a man of firm will and indomitable enterprise, one who is not to be trifled with and who endeavors to perform whatever task is assigned to him.

General Maxwell's wife is an American, Miss Louise Selina Bonynge, daughter of Charles W. Bonynge, one of the California forty-niners. She is a half sister of Lady Deerhurst. Since her marriage Lady Maxwell has been with her husband in all his campaigns, not only in Egypt and South Africa, but throughout his two years' campaign in the Sudan during the outbreak about nine years ago.

To Command Plattsburg Camp.

Major Harry H. Bandholtz, U. S. A., who is to command the business men's military camp at Plattsburg, N. Y., has had a long and active career as a soldier. During the Spanish war he served as acting regimental adjutant, Seventh infantry, at El Caney and the subsequent fighting around San Juan hill. Later he commanded the district of Sagua La Grande, Cuba, and super-



MAJOR HARRY H. BANDHOLTZ.

intended the first elections in that district. In 1900 he was sent to the Philippines, where he served until relieved in September, 1913.

In 1901 Major Bandholtz was sent to Tabayas province, which he pacified, and the next year was elected by the people governor of the province. He is the only regular army officer ever thus elected. Tabayas is the largest Christian province in the islands. In 1903 he was appointed colonel and assistant chief of the Philippine constabulary by the then Governor Taft and was placed in command of the southern district of Luzon. In three months he ended the insurrection under General Simeon Ola that had been in progress over a year and finished the campaign by going with a single native guide into the camp of Colonel Loamo and bringing in the latter and his men.

In 1907 Major Bandholtz was appointed brigadier general and chief of the Philippine constabulary, which position he held until ordered to the United States. The Philippine commission in 1910 by unanimous resolution requested his promotion to the rank of brigadier general in the regular army. Three years later he recaptured the stolen plans of all the defenses of Manila bay, and the governor general again recommended the same promotion. Major Bandholtz is a native of Michigan and was graduated from West Point in 1890.

STARTLED BY KISS

Long Distance Courtship Rounds Up With a Mishap.

WRONG FELLOW IS HUGGED.

Victim Utters Incoherent Words of Inquiry When Prospective Husband Comes Along, and After Apologies He Hurries Her Off to Minister.

Parsons, Kan.—Marcella Howland kissed the wrong man. And inasmuch as Marcella at the time of her osculatory performance was engaged to be married and the man she kissed was not her prospective husband, she found herself in an embarrassing situation when the real groom hove to and made anxious inquiry as to her affection for another man. If it had been in the good old days of rapiers and swords perhaps there would have been a duel, with much blood, but there was none of that, and only a few people at the Katy station were aware of the near tragedy.

The story of the kissing and Marcella and the man she kissed and the man she should have kissed adds another chapter to the volumes that have been written about long distance love making. This episode might have been labeled "Courtship by Mail, or Wooing by Correspondence." The story is thus duly attested and sworn to by at least one of the parties concerned:

Marcella lives near Joplin and is a helper in a grocery store. A year ago she found the name of James Vandyke in a case of eggs, the said James not being a barber, as his name might indicate, but a raiser of chickens and corn near Anadarko, Okla. Marcella wrote to James, and James replied. Then followed a correspondence with each succeeding letter ripened into love. A month ago it was decided to meet in Parsons and have a minister here perform the ceremony, an elopement being considered the proper thing to do.

James arrived and spent a restless afternoon waiting for his bride, who was to come from Joplin on the evening train.

Came 7:45 o'clock, and with it the train from Joplin and Marcella. James was a bit confused in time and was not at the station. Marcella, wearing a pink carnation by prearrangement, went to the waiting room and sat down to await the arrival of her husband to be.

Now enter the other side of the triangle, whose name for the present is unknown, as he absolutely refused to divulge his identity. His name will be John Doe for this occasion. John entered the station and gazed over the crowds. Marcella saw him, and after giving him time to discover her tripped across the room and stood enraptured before the astonished man.

"Well, here I am, James," she said demurely, waiting for her fiance to take her in his arms, etc., etc.

John gasped, but made no move toward her.

"Why, you bashful thing," the girl exclaimed, and with that bounded over to the man, threw her arms about him and planted a kiss upon his lips.

John extricated himself as best he could—or would, and was mumbling some incoherent words of inquiry when in came a breathless Vandyke, who had come up just in time to behold the performance, and, convinced that some one was making away with his bride to be, rushed up to thwart him.

As he approached misgiving spread over Marcella's face. She had a faint suspicion that she had kissed the wrong man, and this suspicion grew with each step of the excited Vandyke. He stood before her. She looked at Doe and then at Vandyke. Yes, the last man was certainly the one she had come to meet. How could she have mistaken the other fellow for him, although their resemblance was quite marked?

Then apologies, explanations, assurances by Doe to Vandyke that he was an innocent party and had no intention to "cop" Marcella, and then Marcella kissed the right man, right there in the station, with a score of people watching her.

The couple decided to take the 8:22 train back to Joplin and be married there. They hurried to a telephone, made an appointment with a minister there and left.

GETS BACK HIS SIGHT.

Blinded by a Fall, a Man Is Recovering After Eight Years.

Philadelphia.—Unable to see for eight years, Edward Claycomb, a painter, of Altoona, Pa., is recovering his sight by degrees.

In 1908 he fell from a house he was painting, and in addition to his other injuries he detached the retinas of both eyes. He became blind. Specialists of a dozen cities were consulted, and they all told him his case was hopeless.

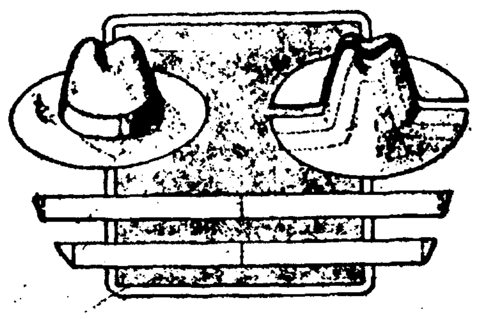
For the last several weeks his sight has been returning, and now he can see and read large letters and distinguish between colors. Physicians are puzzled. Claycomb is hopeful that his sight will become normal.

Sells Hidden Money With Potatoes.

Manton, Cal.—W. A. Cleland placed $320 in $20 gold pieces in a potato bin for safe keeping. Forgetting about the money, he sold some potatoes. Later a search for the coin proved unsuccessful. Cleland now thinks banks are a safer proposition than potato bins.

HELPFUL HINTS FOR HOUSEWIVES

Lamp Wicks Cheaply Made From Old Felt Hats.



Lamp wicks may be made cheaply at home from an old soft felt hat, writes a correspondent of Popular Mechanics. The hat should first be brushed clean and the brim flattened by ironing it. The greatest number of wicks may be obtained if the hat is cut into halves with a pair of scissors and then cut into strips of the required size, as shown in the sketch. Soak the strips in vinegar for two hours, dry them out of doors if convenient and they are ready for use.

Casserole of Chicken and Rice.

Line a slightly greased mold with steamed rice. Fill the center with two cupfuls of cold, finely chopped chicken that has been warmed, drained from its liquor and highly seasoned with salt, pepper, cayenne, celery salt, onion juice and one-half teaspoonful of finely chopped parsley. Add one-fourth cupful of cracker crumbs and an egg slightly beaten and moisten the mixture with hot chicken stock or hot water. Cover the meat with rice and tie buttered paper firmly over the mold. Steam the meat for forty-five minutes. To serve it, turn it on to a platter and surround it with tomato, white or creole sauce or chicken gravy. Veal or mutton may be used for this dish in place of chicken.

Jellied Salmon Salad.

Take one pint of canned salmon, drain and remove skin and bones, mince fine, add tablespoonful of lemon juice, dash of pepper, teaspoonful of minced parsley and salt to taste. Mix together and bind with any desired salad dressing and one tablespoonful powdered gelatin dissolved in one-fourth cupful of water. Fill small molds and set on ice to chill. Turn out on crisp lettuce leaves. Garnish with olives and serve with mayonnaise.

Dumplings With Meat.

To each cupful of flour add two teaspoonfuls of baking powder, a pinch of salt and just enough water to make a mixture very hard to stir with a spoon. Butter steamer and place over a kettle of boiling water. Drop tablespoonfuls of the mixture on a plate and steam twenty minutes without taking off the cover. Take out and put into meat gravy and let stand a minute or two. To be eaten immediately. These are never heavy.

Stuffed Potatoes.

Choose medium sized potatoes, one for each person; wash clean and bake. Take from oven and with a sharp knife cut off one end. Remove inside with a spoon, being careful not to break the baked shell. Mash with a potato masher, add salt, butter and pepper to taste. Cream with a potato whip till smooth. Refill the potato shells but do not put the top on, set on end in a pan, return to the oven and bake till browned.

Potatoes and Eggs.

Pare one-half dozen large sized potatoes and slice them fine. Put one tablespoonful of lard in a frying pan and put the potatoes in. Brown nicely and add one-half tablespoonful of salt. When done, beat four eggs hard and add one and one-half cupfuls of rich milk and one-half teaspoonful of salt and a very little pepper. Pour this mixture over the potatoes and put in the oven to bake until nicely brown.

Raisin Pie.

Take one pound of raisins (washed and seeded), turn over them one quart of boiling water and boil until tender. Keep adding water so there will be a quart when done. Grate the rind of one lemon into a cupful of sugar, three tablespoonfuls of flour and one egg. Mix well together, turn the raisins over the mixture, stirring all the while. This makes three pies. Bake in double crusts as other pies.

Raisin Muffins.

Sift together two cupfuls of flour, two level teaspoonfuls of baking powder, one-half teaspoonful of salt and two tablespoonfuls of sugar; add two tablespoonfuls of soft butter, one well beaten egg, one cupful of sweet milk and one cupful of seeded raisins. Pour into buttered muffin rings or gem pans and bake in a hot oven for twenty-five minutes.

Chocolate Cups.

Make a plain custard, using one quart of milk, three eggs, six tablespoonfuls of sugar and a pinch of salt. Flavor with a square of chocolate scraped and melted and bake in custard cups. Chill thoroughly and just before serving scoop a spoonful from the center, replacing with whipped cream.

Mint Sauce.

Nothing is more delicious to serve with lamb or mutton than mint sauce. This is made of two tablespoonfuls of very finely chopped young mint, one tablespoonful of pounded and sifted loaf sugar and six tablespoonfuls of vinegar. This mixture should be stirred until the sugar is dissolved.

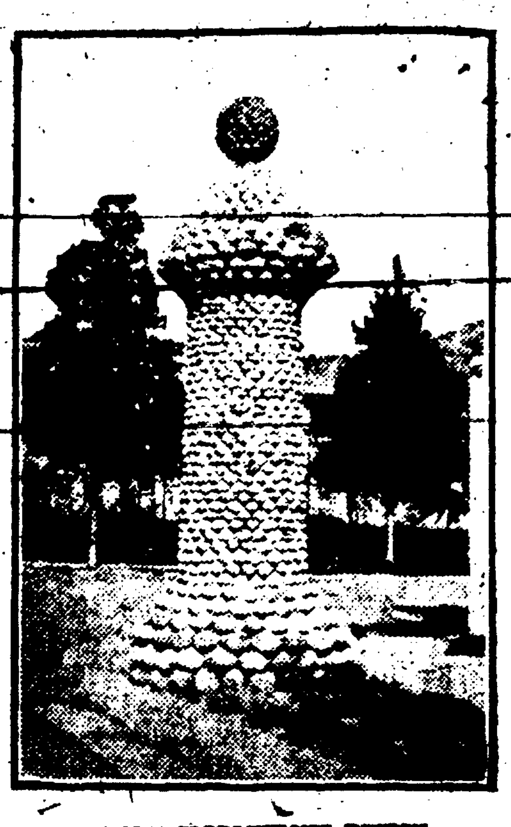
ORNATE STREET ENTRANCE DESIGNS

These Are Especially Adapted For Suburban Districts.

VARIETY IN SIZE AND STYLE

The Designs Vary From Simple Square Stone Columns or Concrete Pillars, Set on One or Both Sides of the Street, to Regular Two Story Buildings.

It is the common experience of those engaged in home decoration and civic adornment to discover that the beautiful home and the beautiful city do not lie far apart. They perceive that the individual building of private ownership and the municipal structure are not separate architectural entities, but that each is a part of the other in a truly vital sense. They understand that anything which adds to the appearance of either enhances the beauty of both, and they know that the really beautiful city is an artistic whole to the glory of which every building therein contributes its share. Moreover, it is a frequent occurrence for some feature of home architecture that lends itself to more general treatment than



UNIQUE COBBLESTONE DESIGN.

is possible in a private dwelling to be seized upon by municipal architects and developed into a distinctively public structure.

An interesting example of this tendency is seen in the ornamental street entrance designs that have found favor in recent years in various parts of the country, especially in the cities of Southern California. One of the attractive features of country estates and extensive private urban grounds always has been their entrances—gateways of steel and stone of more or less elaborate design which open upon pleasant driveways, stately rows of trees or alluring vistas of flowers, shrubs and fountains. Similar gates have also added to the attractiveness of cemeteries, parks and other semi-public grounds and have lent charm to residence courts, squares and places whose streets are open to public travel although the title thereto remains vested in the owners of the abutting property. And from the use of entrance gates on these streets, where individual and collective ownerships meet, it is but a short step to the adoption of similar structures for public thoroughfares that have been dedicated to general use. Moreover, in thus evolving out of a feature of home decoration an important factor in municipal adornment the street entrance has gained in size and elaborateness and has developed along those lines that best adapt it to the purpose it is called upon to serve.

Public street entrance designs permit of considerable variety in size and style. They vary from simple square stone columns or concrete pillars set on one or both sides of the street to regular two story buildings, whose size and elaborateness are limited only by the width of the street, the amount of available funds and the architect's sense of appropriateness. The simplest designs consist of two pairs of columns, one smaller than the other, the former being set just outside the sidewalks and the latter in the parking between the sidewalks and the street. On top of these are placed ornamental stone designs, electric lights or flower urns, and sometimes connecting steel arches span the streets or both the streets and the sidewalks.

On the same theory as that an individual building is sometimes said to have a character and to create an atmosphere peculiar to itself, so tracts, dominated architecturally by ornamental street entrance designs, which were derived originally from one of the artistic features of the house beautiful, may be said to possess individuality and to contribute their own peculiar qualities to the atmosphere of a beautiful city.

Efficient Methods of Control.

Organic and efficient methods of control, of which city planning in the broadest sense of that term has become a fundamental factor, are now far more imperatively necessary for the city than ever before.

THIS COUNTY HAS THE BEST HIGHWAYS

Division Engineer Acheson has just issued his report in the condition of roads of six counties in Central New York. He has the following to say regarding Oswego county highways:

Central Square-Constantia: Now under construction. Can proceed on finished road abou* two miles to detour signs and turn left and follow signs. Road closed.

Pulaski-Salmon River: Under construction. Road open for three miles, from Pulaski East, then turn left at detour signs going through Pineville turning back to the State road, distance of two miles.

West town line of Williamson to Williamson under construction and closed to traffic. De tour signs posted.

Phoenix-Mexico road—Completed except one and one-fourth miles on South end, which is under construction and closed. Detours posted.

AT THE QUIRK TODAY.

Barbara Frietchie is celebrating her eighteenth birthday in Frederick, Md. and the town is strong in the grip of Northern soldiers. To avoid a group of boys, pursuing her in a kissing game, Barbara darts out of her house and climbs a small tree. Union soldiers, who are foraging for food, stop under the tree to divide their spoils. Barbara's fears are aroused and she cries for help. Her shouts bring, among others, Captain Trumbull, of the Union command. Against her wishes he assists her down, and others in the party invite him to the Frietchie home. Grandma Barbara is especially delighted with the young gallant, as she sympathizes with the North. She boasts that she once danced with Thomas Jefferson, and he gave her a flag as a memento. Grandma Barabara directs young Barbara to fetch the flag. Barbara, in tears, and in a rage, explains that she tore the flag, as she hates everything Yankee.

Arthur Frietchie, Barbara's brother, has stolen through the Union lines, and attempts to enter his home that night as Captain Trumbull comes out. Union soldiers are in pursuit of Arthur and Trumbull aids him to elude them. Barbara is softened toward Trumbull when she hears of this. Judge Frietchie afterward finds Barbara and Trumbull together and attempts to kill the young captain, but Barbara saves him. Trumbull is ordered away. Next day he receives a note from Barbara, saying she will meet him at a minister's house in an adjoining town, and marry him as he proposed. The couple meet at the preacher's house but hostilities suddenly break out and the Confederates take the town. Barbara again saves the life of Trumbull by her quick wit and true aim with a pistol. Trumbull is separated from his command, and hides in a thicket. Arthur observes the officer in hiding and fires. He is horrified to find he has shot Trumbull, the man who saved his life. That night Arthur carries the wounded officer to his home.

Confederate soldiers attempt to enter the Frietchie home but Barbara prevents them through a clever ruse. They are forbidden to make a search until next day. At sunrise Barbara hurries to where Trumbull lies. She finds him dead. Grandma Barbara, in a frenzy, takes the flag, which Barbara had placed on Trumbull's breast, and waves it defiantly at the soldiers outside. An order to fire upon her is given, when "Stonewall" Jackson appears with a detachment of soldiers and utters the memorable words: "Who touches a hair of yon gray head, dies like a dog—march on!" he said." A single shot is fired, and Barbara Frietchie, who has been standing beside her grandmother, falls, fatally wounded. Jack Negly, an unsuccessful suitor for Barbara's hand, who fires the shot, starts to slink away, but is caught. Barbara dies at the side of Trumbull, and the stained flag is spread over them by the aged Barbara.

UTILITY COMPANIES GET HEARINGS IN THIS CITY

Mayor Victor C. Lewis today received a notification from the State Tax Commission to the effect that June 20 has been designated for the hearing of complaints on equalization made on assessments of public utility corporations operating in this city.

The companies operating here under franchises are the Empire United Railways, Fulton Fuel and Light Co., Fulton Light Heat and Power Co., New York Central R. R. Co., Ontario and Western R. R. Co., Oswego and Syracuse R. R. Co., New York Telephone Co., Oswego County Independent Telephone Co., Postal Telegraph and Cable Co., and Western Union Telegraph Co.

Most of these companies protested against the first assessments made on their properties in this city, but in the opinion of the repreentative of one of the largest companies operating here, few will protest against the figures now decided upon.

AGRICULTURAL SOCIETY GETS STATE ALLOWANCE

State Commissioner of Agriculture Charles S. Wilson, has announced the appropriations made by the department to defray the expense incurred by several fair associations of the state in presenting agricultural exhibits.

The Oswego County Agricultural Society receives $3,322.19 allowance, and other fair associations who are included in the appropriation are the Jefferson County Fair, Oneida County Fair, Tompkins County Fair, Cayuga County Fair, and Corltand County Fair.

BOARD OF WORKS WILL MEET TONIGHT

The Board of Public Works will hold its regular weekly session tonight at City Hall. The Board will hear the reports of Frank Rumsey, superintendent, on the Fremont street sewer construction, and several other important matters will be brought up for consideration.

PETERS' WORKERS GO TO WORK

Compromise Effected in Wage Dispute---New Agreement Means Higher Pay---Some Dissenters Still Out

As a result of a lengthy conference Saturday afternoon between a committee representing the strikers at the Peter Cailler Kohler Chocolate Company, and E. R. Walbridge, of the New York office of the company, most of the employes of the plant will return to work to-day.

The company made few concessions and the strikers secured little advance over the present rates of pay, but an uneasiness on the part of several of the strikers who had families to support made immediate action necessary and the committee contented itself with obtaining assurances that the company would put a sliding scale of wages into effect as soon as possible, whereby each employe would receive a piece work rate.

The strikers originally demanded an increase of 20 per cent. in their wages, but when I. Achilli of the company told them this was out of the question they modified their demands to a 10 per cent increase. The final settlement made will average an increase of 5 per cent. in some departments, while other workers will receive less than that.

The committee succeeded in obtaining a material increase for the learners, whose former wage averaged about $4 weekly, until they had become familiar with their tasks. These girls will now receive about $6 a week to start, and will be put on a piece work rate as soon as their production justifies it.

While most of the strikers returned to work today there are a few who are not satisfied with the terms agreed upon, and they announced this morning that the company must offer greater inducements if it wishes them to return to work. Among these are several men who hold important positions at the plant and it is likely that their grievances will be adjusted today.

"THE JOURNAL MAN" TO BECOME "HERALD MAN"

Irving Galusha, for the past several years correspondent of the Syracuse Journal in this city, has tendered his resignation to the Journal company to take effect about June 18, when he will take a position as correspondent for the Syracuse Herald in this city. Mr. Galusha was connected with the Herald in a similar capacity several years ago. His successor on the Journal has not been announced.

George Washburn, present correspondent for the Herald has resigned his post, and is considering offers from two Buffalo newspapers.

SONS OF ITALY GET MANY NEW MEMBERS

The Sons of Italy, of this city and Oswego held a meeting in Tucker's hall yesterday afternoon, where a large class of candidates was initiated into the order. Frank Zaia, one of the organizers of the Fulton lodge, presided and several members of the organization made short addresses.

After the meeting, the organization marched in a body to the Fair grounds, headed by Phillips band of Oswego. There refreshments were served and speeches were made by visiting members of the order. The meeting closed early last evening.

RED MEN HONORED THEIR FELLOW TRIBESMAN

Utoka Tribe, Red Men, of this city, marched in a body last night to the home of Orlando Sant, a member of the order who died last week, where they held services.

Mr. Sant was a member of Utoka Tribe for several years. His funeral will be held from his late home on West Second street today at 2:00 o'clock. Rev. J. W. Barrett, of the Methodist Church will officiate.

MORE MEMBERS WANTED BY BIBLE CLASS

The Business Girls' Bible Class will meet at the Library to-night at 7:30 o'clock, and all the members of the class as well as any who wish to join are cordially invited to attend.

BAPTIST ASSOCIATION MEETS IN HANNIBAL

An elaborate program has been prepared for the annual session of the Oswego County Baptist Association, which will be held at the Baptist Church at Hannibal on Tuesday and Wednesday. The eighty-fourth anniversary of the association and the one-hundredth anniversary of the organization of the Baptist Church Society of Hannibal take place this week and the latter event will be observed in connection with the meeting.

The convention will open at 2 o'clock on Tuesday afternoon and there will be two sessions.

At the opening session Rev. H. C. Poland of Fayetteville will speak on "The Community's Challenge to Its Sunday Schools." A song service will be led by Rev. Dr. Savage, followed by a business session of the Women's Baptist Home. The session will close with a centennial banquet attended by all members of the congregation.

At 7:15 o'clock Tuesday evening an address will be delivered by Miss Ella McLaurin, field secretary of the Womans Foreign Missionary Society. A meeting of the Oswego County Young Peoples Association will be held and the evening meeting will close with an address on "Ideals for Baptist Young People" by Rev. Dr. William M. Lawrence.

The speakers and their subjects for Wednesday's sessions are: Rev. F. N. Darling, "Modern Methods of Evangelism;" Dr. J. F. Vichert, "The Common Task;" Rev. N. E. Miller, "The Law of Progress;" Rev. F. H. Divins, "American Baptist Publication Society." Rev. Jacob Hann is pastor of the Hannibal church.

MIDSHIPMEN MAKE CRAB CRUISE TO-DAY

(By United Press)

Annapolis, Md.—To-day began the practice cruise for midshipmen along the Atlantic coast, a "crab cruise," as the Academy vernacular has it.

The squadron left Annapolis this morning and is scheduled to arrive at Culebra on June 12. It will leave Culebra on June 17 and arrive at Guantanamo on June 21.

It will stay at Guantanamo until July 6, and the next stop will be Provincetown, Mass., which, it is expected will be reached on July 13, and which will become the squadron base.

The vessels of the squadron will then separate to rendezvous on August 7, and leave Provincetown one later. August 18 to 21, will be spent at Hampton Roads and August 21 to 27 at the Southern drill grounds.

The squadron will arrive off the Patuvent River, in the Chesapeake Bay, on August 29 and at Annapolis on August 30. The midshipmen will then go on leave for a month.

The ships of the squadron will stop at points after reaching Provincetown as follows: The Missouri, Portland; the Rocport, Boston; the Wisconsin, Portland; the Boston, Gloucester; the Ohio, Boston; the Rockport, Salem.

Fulton Keynotes

Mr. and Mrs. Elmer Gardner, of Hannibal, were recent visitors at Mrs. Fred Boigoel's home.

* * *

Mrs. Florence Baker, of Minetto, spent Tuesday with Mrs. A. E. Burlingham.

* * *

Mr. D. A. Northrop spent Friday in Oswego.

* * *

Mrs. George Cole and children have gone to Toronto, Canada, to make their future home. Mr. Cole is engaged in business there.

* * *

Mr. Charles Dodge, of Palermo, visited friends here, Monday.

* * *

Mrs. D. B. Northrop spent Friday with friends in Oswego.

* * *

Mr. Alex Pelo spent Sunday at Palermo.

* * *

Mrs. Laura Stewart, who has been spending several weeks here, has returned to her home at Palermo.

* * *

Mrs. Clarence Edlow visited her mother, Mrs. Louis Pelo at Hinmansville last week.

HOW APPENDICITIS CAN BE PREVENTED

Fulton people should know that a [illegible] mixed in Adler-i-ka, often relieves or prevent appendicitis. This simple mixture removes such surprising foul matter that ONE SPOONFUL relieves almost ANY CASE constipation, sour stomach or gas. A short treatment helps chronic stomach trouble. Adler-i-ka has easiest and most thorough action of anything we ever sold. W. H. Gayer & Son, druggists adv

JORDANITES OWE US APOLOGIES

Yesterday's Game Was Anything But Pleasant for Spectators---Red Men Held Up Well Under the Strain

In announcing a good game for yesterday afternoon with the Jordan "semi-pro" (?) baseball team, the management of the Fulton Red Men laid themselves open to presocution under the advertising laws of the state. It must be admitted that the Fultonians tried hard to fulfill their part of the contract, but the visitors were so woefully weak in every department except the battery that the game became a burlesque on the national pastime about the seventh inning.

If there are any public spirited men in Jordan, they could earn the underlying gratitude of their town ball team by "sending in" enough coin of the realm to buy nine uniforms. As the Jordan team stumbled into the arena yesterday, their appearance reminded one forcibly of a crazy quilt. True, there were two men who had uniforms on that might have been termed similar, but this was probably a mistake.

The Jordan battery was well worthy of the name, and for seven innings Egal, the diminutive hurler, and Keegan, his snappy battery mate, held the Fulton advance in check. Only two hits went out of the infield in the first six innings, and most of the 500 spectators were beginning to think that the Jordanites would pull a surprise when the crash came.

And it was some crash. In the fatal seventh, Egal's arm knocked off, and his team mates gave the most finished exhibition of lurid support ever witnessed in this city.

The Jordan infielders made every conceivable error known to the game, and the outfielders invented some new methods of booting. In spite of the fact that the Fultonians netted only three hits from Egal throughout the seventh inning nightmare, nine runs crossed the pan, and thirteen batters faced the game little twirler. Anything hit to the outfield was good for at least two bases, for the Jordan gardeners were fit candidates for the Old Soldiers' Home.

A feeble attempt on the part of the visitors to even the score in the eighth was nipped in the bud by a double play, after two runs had scored. The crowd remained until the finish, but there wasn't much else to do yesterday.

Egal had stuff, and with good support it is likely that the Jordan twirler would have given the fans a run for their money. He fanned twelve men, and there were two or three Fultonians who bgan to get used to striking out toward the end of the contest.

Painter fanned eight, but John afterward said he didn't want any credit for doing it.

The score:

Sumner's Ready Reply.

Charles Sumner when in London gave a ready reply. At a dinner given in his honor he spoke of "the ashes" of some dead hero. "Ashes! What American English!" rudely broke in an Englishman. "Dust you mean, Mr. Sumner. We don't burn our dead in this country." "Yes," instantly replied Mr. Sumner, with a courteous smile; "your poet Gray tells us that 'even in our ashes live their wonted fires.'" The American was not criticised again that evening.—Argonaut.

NOISIEST SPOT IN THE WORLD

Chicago Today Claims That Distinction---Doubled in Population This Week---Tickets Come High.

(By United Press)

Chicago—Chicago started to-day to make good on the prediction that for the next week it will be the noisiest spot in the world—unless it be Verdun. Certainly it will be the spot where more words are spilled than anywhere else.

All of which is by way of preface to the fact that the convention crowds began arriving to-day. They came chaperoned by bands, megaphoned assistants, singers and just plain noise makers.

By Wednesday, Chicago will be swollen with people to nearly twice its normal size.

There are 985 delegates to the Republican national convention, to arrive, 985 alternates to the same; nearly 1,000 delegates and alternates to the Progressive National Convention, 20,000 women workers for the ballot, mostly out of town boosters; to say nothing of just plain spectators to the various affairs.

Already the lobbies of Chicago's loop hotels seem as choked with humanity as they did at the height of the Republican convention sessions four year ago.

All the hotels, incidentally, began today removing every bit of furniture from their lobbies.

No flower pots, vases, or chairs will clutter up space where enthusiasts may gossip, nor be near at hand for weapons in case arguments wax too hot.

One well known hotel, which sports a fountain in the middle of one of its dining rooms, began today to inclose this spot of water. It is a precaution which proved successful four years ago and saved a lot of rescues of persons and things which in previous convention times seemed to have a natural habit of gravitating thereto.

The Coliseum and the Auditorium, where the Republican and Progressive hosts will hold solemn conclave, were ready for the crowds today.

Tickets for the Republican convention were at the biggest premium they ever have been for such a gathering.

There were plenty of offrs of $350 for a single ticket admitting holder to the expected four daily sessions and tickets scare at that.

It was estimated that the attempt to gain admittance will be made in vain by about ten thousand people. Oonly 12,400 seats for the public have been provided in the Coliseum.

Fakirs thronged Michigan avenue and reaped a rich harvest in the sale of badges, banners, pictures and souvenirs.

Most of the big delegations were expected to-day.

New York's 90, with alternates, co-workers, hangers-on and admirers, arrived on a special train this morning.

Deputy chief of Police Schuettler has sworn in several hundred extra policemen and almost an equal number of plain clothesmen borrow from other cities, went on duty to-day to keep a wary eye on the undesirables.

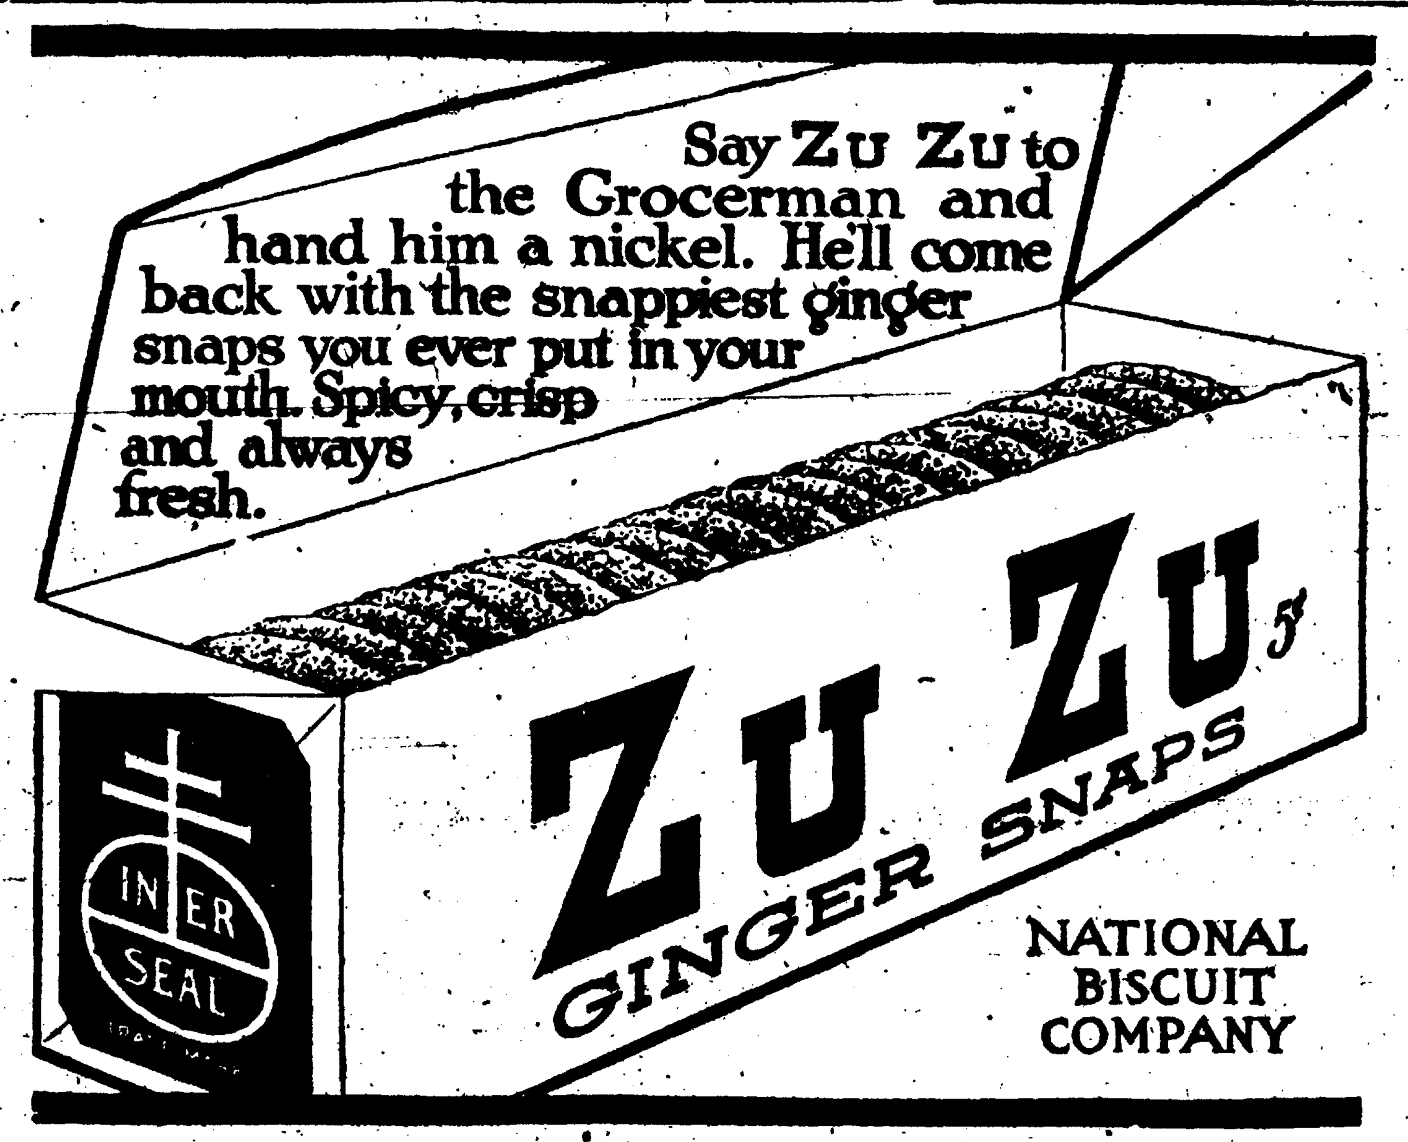
The only formal routine observed to-day was the meeting of the Republican National Committee, cleaning up contests and transacting the thousand and one details incident to stage managering the big pow-wow.

IOWA HAS WARM FIGHT AT POLLS TO-DAY

(By United Press)

Des Moines, Ia.—Iowa voters are at the polls to-day at the state wide primary for state, congresional and judicial nominations. A heavy vote is being cast, particularly among Republicans because of the three cornered fight for the gubernatorial nomination.

The Democrats want E. T. Meredith for governor and the socialists J. W. Bannett. There is a merry war on in the Republican camp. Attorney General Geórfe Cosson and State Senator Joseph H. Allen, are dry candidates, with Lieut. Governor W. L. Harding rather damp. Carl F. Kuehnle, of Denison, once a partner of Former Governor Leslie M. Shaw is the fourth candidate.



WOMAN'S PARTY CONVENTION

(By United Press)

Chicago—The Woman's Party, meeting in its first convention, struck its initial snag to-day when it tried to crowd 2,500 delegates representing a dozen million women into the Blackstone theatre, which has a seating capacity of only 1,800.

Before noon, following a half day of unexpected registration, no one doubted that the three day convention which is held to impress the progressives and republicans with the women voter' power would call for numerous overflow meetings.

Women voters from the eleven "free" states were given the first prominence to-day and will continue to hold first place in the convention tomorrow and the day following.

"Free" women had access to the main floor of the theatre. Other women crowded into the balconies and attended the over flow meetings.

Miss Alice Paul, National chairman, opened the meeting at 2 this afternoon but did not remain long as presiding officer.

The rules of the Woman's Party say, that the permanent chairman must be selected from one of the eleven states in which women are allowed to vote. Up to the time of balloting no one had any idea who the first temporary chairman of the Woman's Party would be.

The principal business of the afternoon was the naming of committees and reports from the eleven equal suffrage states delegates.

A reception has been planned for this evening. Speakers at the convention will be

Miss Maud Younger, of San Francisco; Mrs. Ida Finney Mackrille, of Sacramento; Mrs. William Kent, of Kentfield, wife of Representative Kent; Mrs. Sara Bard Field, of San Francisco, and Mrs. Elizabeth Gerberding, of Berkeley; Anne Martin, of Reno, Nev.; Mrs. Wallace Williams, of North Yakima, Washington; Miss Alice Louis Reynolds, of Provo, Utah; Mrs. Francis Haire, of Helena, Montana; Mrs. William H. Sawtelle, of Arizona; Mrs. Lillian H. Kerr, of Colorado Springs; Mrs. Dora Phelps Buell, of Denver, Colo., and Dr. Caroline Spencer, of Colorado Springs.

"VOTES FOR WOMEN" IN IOWA TO-DAY

(By United Press)

Des Moines—"Votes for women" is dividing attention at the polls in Iowa today with the hot fight among [illegible] for the gubernatorial [illegible] and in many localities [illegible] the call on popular [illegible].

Although it is a primary election, the last legislature for the second time passing the suffrage amendment, force a vote on suffrage today, and if the women win, they will have a chance to cast their ballots for the presidential nominee next November, as well as for state and county offices.

To-day's battle is the climax of a long fight for equal right. In 1882 the suffrage amendment passed the legislature but failed in the next session.

Speaking campaigns, automobile tours and all the demonstrations known to the professional politician have been used. Some of the men and women on the stump the last few days of the campaign are Mrs. Carrie Chapman Catt, of New York; Dr. Anna Howard Shaw, Miss Alice Stone Blackwell, Miss Laura Clay, Agnes L. Riddle, of Colorado; Mrs. Ella S. Stewart, Mrs. O. W. Havemeyer, Mrs. Harriott Stanton Blatch, Miss Josephine Casey, Miss Anna Martin, Mrs. Andreas Ueland, Dora Sandoe Bachman, Mrs. T. T. Cotnam, Mrs. Millie Trumbull.

Among the men assisting in the campaign—and the suffrage leaders have a men's bureau—are Henry J. Allen, of Kansas; Owen R. Lovejoy, of New York; W. Y. Morgan, lieutenant governor of Kansas; Earl Akers, state treasurer of Kansas; Samuel Strause, of New York; J. Stitt Wilson, of California; A. L. Weatherly, of Nebraska and Omar Garwood, of Colorado.

Suffrage leaders are confident today that the wires will flash a victory for them to-night. Western suffrage states particularly have backed Iowa campaign with cash and speakers.

NIGHT COURT FOR N. Y. WAGE EARNERS

(By United Press)

New York—A night court where wage-earners can secure the prompt settlement of suits involving small sums will be opened in this city tonight.

It will be held hereafter four times each week, on Mondays, Tuesdays, Wednesdays and Thursdays, from 8 to 11 p. m. Branches will be established in the various boroughs as needed.

This aid for persons who can least afford to suffer from the law's delays was finally secured without the passage of a bill from Albany which would make it mandatory.

Mayor Mitchel recognized that the authority to set up such a court was already vested in the Board of Justices.

Directly the Judges took definite action to provide the court for all the boroughs the Mayor vetoed the Albany bill.

There are enough Justices to divide the work in such a manner as shall prevent the extra duties from weighing too heavily on them.

The new night court may greatly increase respect for the law by emphasizing its readiness to serve the poor man for whom its lengthier processes are prohibitive.

ST. LOUISANS PRESENT PLAY IN FOREST OF ARDEN

(By United Press)

St. Louis—The Forest of Arden has been transplanted here and to-night St. Louis will begin its Shakespeare tercentenary celebration with the production of "As You Like It" in [illegible] Park. [illegible] directed by Ro[illegible] the Shakespearian actor. The [illegible] will be given in a [illegible] in the park, which seats ten thousand persons. The evening's festivities will begin with a community prologue, representing the May Day revels of Shakespeare's time on the outskirts of an English hamlet.

BRITISH CLAIM VICTORY AT SEA

Admiralty Says Warspite and Her Sister Dreadnaughts Turned Tide of Battle.

The British Admiralty, with the receipt of more complete reports of the Jutland battle, feels justified in estimating the losses of the German high seas fleet at two battle ships, presumably the Westfalen and the Pommern, two of the latest dreadnought battle cruisers; two of the new light cruisers, the Wiesbaden and the Elbing; the light cruiser Frauenlob and a light cruiser of the Rostock type, in addition to nine destroyers and one submarine, a total of eighteen vessels of all classes.

If the developments of the next few days bear out this estimate the preponderance of cost of the engagement will not lie on the British organization but, contrary to the most sanguine expectations, will rest heavily on the Germans. It has been definitely established that all the British losses have been reported, while the Admiralty has positive evidence that the official statements issued in Berlin have seriously understated the casualties in the German fleet.

Not relatively, but absolutely, the British losses were the lighter of the two.

Bit by bit, the story of the battle that makes Trafalgar almost insignificant, is being pieced together. The government will not issue a detailed narrative of the action until Admiral Jellicoe compiles his full report, but from semi-official and other authentic sources a picture of the soul-stirring hours of Wednesday evening and Thursday morning off the Danish coast can be obtained.

The big outstanding feature is the fact that this was no engagement of mosquito fleets or of the navy's skirmish line. It was a battle of the giants of the sea—of 12, 13.5 and 15 inch guns; of dreadnought and dreadnought battle cruiser and battle cruiser.

Open Fire at Fifteen Mile Range.

Vice Admiral Sir David Beatty, aboard his battle scarred flagship the Lion and having in his immediate support the Queen Mary, the Princess Royal, the Tiger, the Indefatigable, the Invincible and some fast battle ships and additional battle cruisers as yet unnamed, with a large flotilla of smaller craft, came in touch with the German high seas fleet at half-past three o'clock on Wednesday afternoon. The large guns opened the engagement at a range of fifteen miles. The range rapidly was reduced to ten miles, to seven and finally to five miles.

By half-past four o'clock the sea was a seething inferno. At close range the opposing ships were pouring broadside after broadside into another. The first damage was suffered by the Germans, [illegible] She [illegible] to the bottom.

It was in the close range fighting the British units suffered most. Thinly protected by armor, the battle cruisers, which were bearing the brunt of the battle, were particularly susceptible to damage by the tons of projectiles that were falling about them. The Queen Mary, the Invincible and the Indefatigable were sunk in the first hour of the action, just after the heavier German ships of the Kaiser class joined in the fire and [illegible] Vice Admiral Scheer an enormous superiority in both guns and power.

Manœuvring for Position.

At this stage of the battle Admiral Jellicoe, with the main British fleet, had not appeared, but he was rapidly approaching, and Vice Admiral Beatty, while opposing great odds, hung on like a bulldog in the hope of detaining the Germans in full strength until Admiral Jellicoe arrived.

In this phase there was a remarkable jockeying for position, a manoeuvre which the great strength of the German commander won for him. Position and visibility were great factors in the combat and these favored the Germans. The British Vice Admiral endeavored to manoeuvre the Germans to the outside position, away from the coast and the low lying mists that hung off shore, but his strength was not sufficient for this. Instead, the Germans kept just inside the border of the fog and thus, half hidden, kept the British silhouetted against the setting sun.

With conditions in his favor, just before dusk the German commander steamed in, determined to administer a coup de grace, but at the critical moment Admiral Jellicoe, with the Warspite the Barham, the Valiant and the Malaya, all sister ships of the famous Queen Elizabeth and leading the remainder of the Grand Fleet, came up at a speed of twenty-five knots and opened with salvos.

Immediately the fortunes of the battle turned. For some time the Germans held their ground. Five of their big ships engaged the Warspite, but her great 15-inch guns, spouting fire, stopped this attack by sinking or at least seriously damaging three of her adversaries. The Valiant, in the meantime, had become the object of attack by a squadron of submarines and destroyers. The later she easily drove away with her formidable secondary armament and she rammed and sank a particularly venturesome submarine.

German Main Fleet Flees.

Finding the odds turned decisively against them, the main German fleet took advantage of the fall of night and disappeared to the southward. A large number of the smaller craft were left on the scene of the action, but by one o'clock on Thursday morning these too had steamed away and the British were left in possession. Admiral Jellicoe remained off the Danish coasst until noon, when he gave the signal to return to the base.

Twenty-four hours after the Grand Fleet had returned to port it had been recoaled and, with the exception of the Marlborough, was ready to put to sea.

The statement issued by the Admiralty last night completely cleared away the pessimism which prevailed as a result of the earlier reports of the battle. The public now considers the original announcement of losses needlessly conservative and especially underestimation of the German losses.

Despatches coming yesterday from the Continent say rumors are current in Hamburg that the battle cruiser Lutzow was sunk, as well as the battle ship Westfalen. The Lutzow is a sister ship of the Defflinger. The first British statements included a ship of the Defflinger class as among the German losses.

Children Cry FOR FLETCHER'S CASTORIA

YOUR BABY.

[illegible] a baby under two years [illegible] not be given a sea bath [illegible] of caution about sea bathing may not be amiss. The [illegible] with which well meaning parents treat young, tender children by forcibly dragging them into the surf, a practice that may be seen at any seashore resort in the summer, can have no justification.

The [illegible] and shock that a sen[illegible] child is thus subjected to [illegible] more than sufficient to [illegible] conceivable good results [illegible] the plunge.

[illegible] hand, a child who is [illegible] play on the warm sand [illegible] accustomed to [illegible] and naturally [illegible] to take delight [illegible] the [illegible] should [illegible] the wa[illegible] thoroughly d[illegible] immediately and not [illegible] about the beach in w[illegible].

Playing Cards In England.

Playing cards when first introduced into England [illegible] looked upon purely as a [illegible] pastime.

CHAUTAUQUA DAILY PROGRAM

Magnificent Lineup of Talent to Be Presented Here.

SIX GREAT FEATURE DAYS.

A Feast of Oratory, Music and Entertainment—A Royal Good Time For Old and Young—The Social Joy Week of the Year.

First Day.
MORNING.
Organization of Junior Chautauqua for children of fourteen years and under.
AFTERNOON.
Opening exercises.
Music, Lovat's Highland Band.
Address, Hon. Joe R. Hanley of Iowa.
EVENING.
Music, Lovat's Highland Band.
Entertainment, John B. Ratto.

Second Day.
MORNING.
Junior Chautauqua.
Lecture, Popular Series.
AFTERNOON.
Lecture, Hon. Judge Marcus A. Kavanagh of Chicago.
EVENING.
Drama, "Merchant of Venice," Ben Greet Players.

Third Day.
MORNING.
Junior Chautauqua.
Lecture, Popular Series.
AFTERNOON.
Concert, Elsie Baker, Contralto; Willem Durieux, Cellist; Frank Hauser, Pianist.
EVENING.
Music, Messrs. Durieux and Hauser.
Lecture, Dr. Russell H. Conwell of Philadelphia, "Acres of Diamonds."

Fourth Day.
MORNING.
Junior Chautauqua.
Lecture, Popular Series.
AFTERNOON.
Popular Band Concert, Cimera and his Band, Miss Lillian B. Heyward, Soprano.
EVENING.
Grand Concert, Cimera and his Band, Miss Lillian B. Heyward, Soprano.

Fifth Day.
MORNING.
Junior Chautauqua.
Lecture, Popular Series.
AFTERNOON.
Entertainment, Marigold Girls.
Lecture, Mrs. Sarah Tyson Rorer.
EVENING.
Entertainment, Marigold Girls.
Cartoons, music, stories, Alton Packard.

Sixth Day.
MORNING.
Junior Chautauqua.
Lecture, Popular Series.
AFTERNOON.
Grand Concert, Five Eminent Artists, Reed Miller, Frederick Wheeler, Marie Stoddard, Nevada Van der Veer, Blanche Barbott.
Children's Pageant, by the local CHILDREN.
EVENING.
Musical Prelude.
Lecture, Dr. Edward Amherst Ott.

Scared the Darky.

In one of the little mountain towns of the south a Chautauqua was held last summer for the first time. The fact was advertised for some distance around the town, but the older negroes especially did not understand what it was all about.

Across the front of the hotel of the village was flung a banner bearing the one word "Chautauqua."

Up to this hotel one day drove an old negro in a one horse wagon containing a few vegetables, which he hoped to sell the proprietor, as he had done on former occasions. But when he saw the banner with its ominous word he was seized with fright and would not go into the building or even get out of his wagon. When the proprietor appeared the old fellow inquired nervously, "What disease is you all quarantined for, boss?"—Youth's Companion.

A Booster's Letter.

———————, N. Y.

Mr. John R. Goff, Tupper Lake, N. Y.:

Dear Sir—I am enclosing $2 for a Chautauqua season ticket. I have attended most of them here, only missing Dr. Ott's lecture thus far, and this is the fifth day, but I want to hear it all over. Any one of the entertainments is worth the price of the season ticket. In the years I have lived in Tupper Lake I never heard anything to equal it. Don't be afraid to boost it to the limit. All of the 750 season tickets were sold over a week before the opening day here, but, of course, this is the second year of Chautauqua here.

Yours respectfully,

M———, B———.

—From the Tupper Lake Herald, July 30, 1915.

"Chautauqua is a winner. It causes tears and smiles, and it has a street fair beaten by many, many miles. It hands out heaps of fun. Its smell is like the rose instead of being an odor that makes one hold one's nose. It is full of pep and ginger, fine music, information, and it has no aftermath to cause humiliation. There is no rowdyism, confetti, freshness, noise, and it's good for old folks, middle aged, right on to girls and boys. Its influence is right, it has the proper ring, and it leads to better thoughts that very often cling. So here's to the Chautauqua. I hope it booms and grows, and I'm doffing my chapeau to the Redpath tented shows."—Pete O'Connor in the Port Plain (N. Y.) Standard.

OPENING EVENT OF CHAUTAUQUA WEEK

Hon. Geo. R. Hanley to Give Redhot Patriotic Address.

"THE MODERN CRUSADER."

A Thrilling Lecture on Present Day Issues by a Thinker and Orator of Distinction.

In sport phraseology Joe R. Hanley is a public speaker who always "packs a punch" in his lectures. No better phrase could be employed to typify not only the man and his message, but the way he delivers it—"gets it over." So imbued is he with the ideas which he wants to bring to his listeners that he throws himself into his work with utter abandon. Using crisp snappy sen-

HON. GEORGE R. HANLEY.

tences to carry his rapid fire points, he easily sweeps his audiences away and along with him. Mr. Hanley is blessed with a vivid sense of humor, driving many of his thoughts home with a witty phrase or an apt story. A successful lawyer, a worldwide traveler, he has made a searching study of modern conditions along national and social lines. He is thoroughly equipped to make an intensely practical and patriotic address the opening afternoon of Chautauqua. His three successful seasons on Chautauqua circuits in the west give ample assurance that this year's program will be opened with a masterly lecture.

MRS. RORER TO SPEAK ON HOME ADVANCEMENT

Famous Expert on Household Efficiency to Be Here Chautauqua Week.

The feminine element of the community and perhaps a considerable number of men will be interested to know that Mrs. Sarah Tyson Rorer, whose name is familiarly connected with cook books, will be seen and heard here in a lecture demonstration the fifth day of Chautauqua.

Mrs. Rorer's fame is known from coast to coast; abroad as well as at home her authority on matters pertaining to culinary art and home efficiency is recognized; in all America her name is a household word. This has been brought about not only by reason of her cook books, but because of her writings and lectures upon dietetics and home economics in general. For years she has been at the head of the Philadelphia School of Domestic Science. In the past twenty-five years she has been connected editorially in succession with Table Talk, Household News, Ladies' Home Journal and Good Housekeeping, being now on the editorial staff of the last named publication. She has written over sixteen books, one of which, "Diet," is used in practically all the great hospitals of the country.

Mrs. Rorer has a dynamic personality. Keen eyes, an agreeable, resonant voice, a quick thinking mind—all combine in making a forceful impression on her audiences. Behind her spoken words are a wisdom, a sympathy and a sincerity which are potent factors in forcing her ideas home.

Every woman who knows of her coming will no doubt want to hear Mrs. Rorer. Paramount with other questions before the feminine public today is the one of home efficiency and standardization of household methods. Never before have women been so vitally concerned in the working out of the various phases of this important subject. It is therefore much to the point that on the Chautauqua program there will be this practical discussion of the problems of home advancement. To make it doubly practical Mrs. Rorer will give a half hour demonstration immediately following her lecture.

Lovat's Highland Band.

The Victor Record Catalogue for February, 1916, has this to say regarding Lovat's Highland Band, which appears here the first day of Chautauqua:

"Admirers of the bag pipe will find a veritable feast provided in this double disk record made by Lovat's Band, the performers being excellent ones. This organization was much in evidence during Mr. Lauder's present American tour, and the parade of Lauder and the Highland Band attracted more attention than would a circus."

Dr. Edward Amherst Ott

DR. OTT is too well and favorably known to need any description here. The unanimous demand by the people of fifty Chautauqua towns last summer is responsible for his return this season. The last night of Chautauqua week he will deliver one of the great lectures of his famous series on the "Art of Living." Dr. Ott is just the man to close the big six day program. He will make it not only "Joy Night," but "Inspiration Night," for every one present. If you have heard him you know this. If you haven't, ask the man who has.

SECRET OF A MOTHER BIRD.

How Does the Chimney Swift Get Her Brood Up the Flue?

In the autumn chimney swift nests often made the chimney smoke, and they had to be fished out or knocked down by lowering a pine branch on a rope from the roof.

Once upon a time, of course, these swallows built in hollow trees. But a pair of them, flying over Plymouth in 1621, spied something which looked like a new kind of tree, and the breed was on its way to a new procedure.

Possibly the fact that chimneys are safer from squirrels, coons, owls and other possible enemies was a factor in determining the change. Then, too, it is undoubtedly easier to find chimneys today than hollow trees. I well remember, as a boy, hearing a noise in one of our chimneys and pulling out the stovepipe hole cap in my chamber. There, directly opposite the opening, perched on a protruding brick, a swift was building a nest of sticks!

I watched the whole process, fascinated by the sticky mucilage which the bird secreted in her salivary glands to fasten the sticks together, and after the mother was sitting gradually got her so tame—or, rather, sufficiently subdued her wildness—that she would remain occasionally on the nest when the cap was removed. My great desire was to see how she got the young birds up the chimney after they were large enough to leave the nest, but, alas, that feat was accomplished one day when I wasn't looking! I felt certain then that she must have carried them up in her bill, though I was laughed at for my belief.

Has any one observed a chimney swift getting her young up the flue? Curiously enough, I myself have never had another chance to watch.—Walter Prichard Eaton in Harper's Magazine.

HOME IN ITS TRUE SENSE.

Each Must Help to Make It, but One Alone Can Mar It.

To say of the home which marriage ought to create that it is "a man's kingdom, a child's paradise and a woman's world" is to blur its meaning.

The home is no one's kingdom, no one's paradise, no one's world. The only kingdom it resembles is the kingdom of heaven, because it is within you. Home is dependent for its reality—and its reality is as deep as anything we know—upon a condition of spirit.

This indeed is embodied or at least shadowed forth in this or that physical symbol—the sheltering roof, the fireplace, the common table—but it is dependent on no one of these.

For Omar the symbol was the loaf, the jug and the book; for Deirdre and Naisi it was the tent "as tidy as a beehive or a linnets' nest," or the open sky "among the snipe and plover."

Home means love and companionship and mutual dependence, the spirit of common service and of common loyalty. It may be achieved by a husband and wife or by a family or by two friends or even by a single person who has the home feeling toward the world without.

To say that it is the woman's hardest task to make the home is to miss its most exquisite meaning. No one of the group can make the home, though any one can mar it. It must be made by all for the uses of all.—Atlantic Monthly.

Real Academic Dignity.

Max Muller tells a story of one of Dr. Strachan Davidson's predecessors as master of Baliol. "Once when returning from a solitary walk Dr. Jenkins, whose regard for his own dignity was very great, slipped and fell. Two undergraduates, seeing the accident, ran to assist him and were just laying hands on him to lift him up when he descried a master of arts coming. 'Stop!' he cried. 'I see a master of arts coming down the street,' and he dismissed the undergraduates, with many thanks, and was helped on his legs by the M. A."—London Chronicle.

For Safety's Sake.

A captain of a small trading vessel having some contraband goods on board wanted to unload them at a small port.

"Joe," he said to the customs man, whom he knew well, "if I was to stick a pound note over each o' your eyes could ye see?"

"No," replied the man, "and if I had another over my mouth I couldn't speak either!"—London Tit-Bits.

Aroused Her Suspicion.

"I see," he said, "that coal has gone up again."

"Has it?" she replied.

"And they're raising rents," he continued.

"Well," she exclaimed, flaring up, "if you wish to have our engagement broken off say so. I always hate to have people beat about the bush in a case of this kind."—Pittsburgh Chronicle-Telegraph.

At the Museum.

"Is that the artist's name in big letters on that picture, pop?"

"No, my son. That is the name of the rich man who presented the picture to the museum. You will find the artist's name in very small letters down in the lower right hand corner."—St. Louis Post-Dispatch.

Somewhat Safer.

"I'm going to get a lot of money soon."

"Who told you that?"

"A fortune teller."

"I'd rather have that sort of information from a paying teller."—Pittsburgh Post.

GOODNESS AND LOVE.

Goodness and love reflect themselves in the human countenance. Goodness and love mold the form to their own image and cause the joy and beauty of love to shine forth from every part of the face.—Swedenborg.

United States Must Awake From Complacency if It Desires Peace

By Professor HAROLD C. GODDARD, Swarthmore College

NATIONS, like men, have open to them three fundamental methods of meeting a force that menaces them from without—resistance, the attempt to overwhelm that force by a greater force acting in the opposite direction; nonresistance, the attempt to frustrate that force by letting it exhaust itself through encountering no obstacles, and superresistance, THE ATTEMPT TO CONVERT THAT FORCE BY TURNING IT INTO THE OPPOSITE DIRECTION THROUGH THE ATTRACTION OF AN IMAGINATIVE SUBSTITUTE.

To awaken from complacency, indeed, is the first step the United States must take if it desires peace for itself and to help bring peace to the world. That step taken, it must cease squandering its inheritance and set about the task of mobilizing its disintegrated forces of superresistance—social, industrial, political, educational and religious. It must wipe out the stigma of dollar worship by fashioning a creative national purpose. It must focus on itself the admiration of the world by making an America where men are free in fact as well as in name.

The program for that work must be bold and imaginative. No half measures will suffice at this crisis of world history. And the working relation that the political part of that program should bear to the question of military preparedness is this:

NO INCREASE IN ARMAMENT THAT IS NOT COUPLED WITH SOME SOCIAL AMELIORATION, SOME ENHANCEMENT OF GENUINE DEMOCRACY, IS ENTITLED TO A MOMENT'S CONSIDERATION FROM THE AMERICAN PEOPLE.

MORPHY, THE CHESS WIZARD

Marvelous Skill of the Greatest Master of Modern Times.

Paul Charles Morphy, the famous American chess player, is classed as "perhaps the most remarkable chess player of modern times." He was born in New Orleans in 1837 and was notably precocious as a child. He showed this precocity particularly in games of chess, and before he was thirteen had defeated many well known amateurs. For several years he studied law at the College of South Carolina and played chess only occasionally. But in 1857, at the first American chess congress, held in New York, he easily defeated the best players that could be brought against him.

In 1858 Morphy went to England and there defeated Lowenthal, Boden and Bird and performed the most astonishing feats in simultaneous games without the board. When he was in Paris, the same year, he won five out of eight games with Harrwitz and gave many exhibitions of blindfold playing. It was these last that were responsible for the early breakdown of his health.

After his return to the United States in 1859 he defeated the visiting German expert, Anderssen, in seven out of eleven games. He was admitted to the bar and began to practice law in New Orleans. But the strain of his blindfold contests had been too great for his mind, and he was forced to give up chess altogether and then to abandon all mental occupation. He lived in retirement until his death in 1884. His activity thus covered a comparatively short space of time.

Morphy's skill is described as inexplicable. He never was a close student of chess. He played his games easily and quickly, with no preparation, and little hesitation. Yet his combinations were "remarkable for finesse, depth, elegance and soundness." He also possessed a phenomenal memory.—New York Times.

Her Mission.

"Hubby," announced Mrs. Stylover, "I'm going to town tomorrow to see the new styles."

"You forget," her husband reminded her, "that tomorrow is Sunday. The shops will be closed."

"Who said anything about shops?" she returned. "I'm going to church."—Pittsburgh Telegraph.

Boomerang.

Gasoline costs so much that John D Rockefeller can't afford to run his private $20,000 ice plant. He's gone back into the clutches of the ice trust.

CONSTRUCT HOUSE IN OHIO IN TWELVE HOURS

Two Hundred Workmen Complete Structure, Gift to a Bride, While Thousands Look On.

Toledo, O.—Seventy-two carpenters began to build a house from the ground up at 4:30 a. m. At 4 p. m. the same day it was completed in every detail and Mrs. Emma Plessner-McCann was serving tea in it to Mayor Milroy and others.

The house and lot were a wedding present from the Toledo Real Estate board and contractors. Mrs. McCann was Miss Emma Plessner until a few hours before the house was finished, when she became the bride of John J. McCann. She was assistant secretary of the real estate board for several years.

After the carpenter work had progressed a short time plumbers, gas fitters, painters, paper hangers, electricians and other workmen got busy and did their share of the building work within a given time. More than 200 workmen helped build the house. It is a five room house, with a bathroom, costing $4,000. Ordinarily it takes two or three months to finish such a house.

Thousands watched the construction work. Three hundred gallons of buttermilk and a carload of sandwiches were served.

In addition to the lot and house, built in less than twelve hours, considerable furniture was presented by friends.

A Good Habit to Cultivate.

The cultivation of love and forbearance for others is one of the safest habits to form, and this love should be cultivated without inquiring whether others deserve that love or not. It is always difficult for any human being to know surely whether another deserves our love, for we never know the heart, and we cannot see behind the scenes. Only God can truly judge. It is for us to love and to help and let God do the judging and the criticising. This attitude of caring and trying to aid by sympathy can be formed like any other habit, and once formed it takes the place of indifference and intolerance, opening up our whole lives to faith and light.—Christian Herald.

Very Melancholy.

Said an Irishman, "What a melancholy sight it would be if all the people in the world were blind!"

SO DEMURE.

in graceful folds. The high collar is held up by a black ribbon and rosette. The hat reminds us of the Coldstream guards.

JUST NERVES.

Don't Let Lowered Vitality Run You Down in the Spring.

If you should go to the doctor and tell him that you are given to being gloomy and blue at times; that you have apprehensions of dreadful things; that you are supersensitive; that you are constipated, given to headaches and vertigo or to other similar ailments the doctor would know that you were suffering from a case of "nerves." Naturally when you realize that these symptoms are signposts to "nerves" you can appreciate how impossible it is for a nervous woman to appear charming and beautiful. If these facts were only understood more universally by women they would be ashamed to admit they had "nerves," and they would do all they could to cure them.

No matter how talented a woman may be, how clever, how well read or how interesting, if she is a nervous wreck she will find that little by little her friends will see less and less of her until in time she will find it a rare thing to have a caller. Not because the friends mean to be unkind, but because human nature is so constituted that it longs for happiness and warmth, not for sorrow and gloom.

The fundamental cause of nervousness is lowered vitality. So the wise woman will do everything she can to keep her vitality up to its highest mark. If she feels that her vitality is ebbing away she will stop everything and concentrate on building up the system, the nerve force and supply.

Rhubarb Pie.

Three cupfuls of rhubarb, one cupful of sugar, two tablespoonfuls of flour, one tablespoonful of milk. Crust: One and one-half cupfuls of flour, two tablespoonfuls of lard or shortening, one-half teaspoonful of salt.

Sift the flour and salt into the bowl; add the shortening and rub in very lightly with the tips of the fingers until well mixed; add a few drops of cold water at a time until you can shape. Divide in two parts; roll out thin. Dust pie tin with flour, put in dough, cover with one tablespoonful of flour; then add the rhubarb, which has been washed, skinned and cut into one-half inch pieces; sprinkle with one tablespoonful of flour and brush edges with milk. Roll out the top crust, cover and press edges together. Make two or three cross cuts on top (for the steam to come out), brush top with milk and bake in a moderate oven thirty-five to forty minutes. Rhubarb pie is one of the most difficult to make, the rhubarb being so watery. Always be sure to put flour under and over the rhubarb before adding the sugar.

Strawberry Sunshine.

Take four cupfuls of white sugar and half a cupful of water. Boil these together for four minutes; then add four cupfuls of large strawberries and boil ten minutes longer. Pour out in shallow dishes and set in sun for two days; then put in jelly glasses and cover with paraffin. This is the most delicious way of preparing strawberries, as they retain their natural flavor.

Honey and Nut Sandwich.

Use white bread spread with honey into which some chopped nuts have been mixed

Easy & Practical Home Dress Making Lessons

Prepared Especially for This Newspaper by Pictorial Review

For the Kiddies' Romping Hours.

6689

Crinkled crepe rompers with bloomers cut in one with waist front, which is gathered at neck and shoulders and trimmed with smocking.

Crinkled crepe makes excellent rompers for children, because it looks well and washes splendidly. If another reason is required, it needs no ironing. This material is used for the rompers shown here, which have the bloomers cut in one with the waist front gathered at the neck and shoulders. The sleeves may be long or short, but the latter gathered near the lower edge and trimming with smocking are especially desirable for summer wear.

In medium size the rompers require 2 yards 36-inch crepe. It will be noted by studying the cutting guide, that the waist front and front and back of the bloomers are cut in one piece, and that this piece is laid on a lengthwise fold of the crepe. Opposite this section, near the selvage edge are laid the lap, belt and waistband, on a lengthwise thread of material.

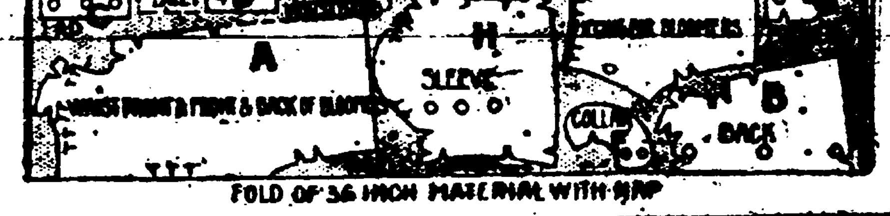
To the right of section A the sleeve is placed, being laid on a lengthwise thread of the crepe. Then to the right of the sleeves come the piecing for the bloomers and pocket, on the top row and collar and back, on the lower row.

Smocking makes the neatest and most attractive trimming for the rompers, a transfer pattern being provided for smocking, with pattern for the rompers. Many home dressmakers, however, fearful of their ability to do smocking nicely, substitute shirring, and the effect is really quite graceful.

The belt gives a trim effect to the rompers, particularly when they are worn by girls. Pockets add to their attractiveness from the wearer's viewpoint.

The cotton crepes of all kinds are ideal for children's play clothes. Sharing favor with the crinkled effects, are the rice and nosegay crepes. The last named are more appropriate for girls than for boys, but bloomers are becoming more and more neutral garments. They supply such a real need in the child's wardrobe that their usefulness cannot be limited.

CUTTING GUIDE 6689 — Patented April 30, 1907



Pictorial Review Rompers No. 6689. Sizes, 2, 3 and 4 years. Price, 15 cents.

READY FOR GARDEN PARTY

Gay Silks In the Shape of Coats Garnish White Frocks.

With the vogue for white gowns comes the contrast of gay coats, hats and parasols. The picture shows a dashing garment of many colored bro-

HER BROCADE.

cade set off with patch pockets and belt of silk cord and tassels. Worn with a white net skirt and picture hat, this is the ultra outfit for outdoor functions.

YOUR NEW BUNGALOW.

Hints About Furnishing the Small Summer Cottage.

There are many houses in excellent taste and more or less modern where the latest novelties in painted ware, furniture and the like are decidedly out of place, but just picture a dear little bungalow on squatty, colonial lines aching to be furnished with just these odd little painted bits of brightness.

If the hall seems a bit somber you may set on the table besides the white candle base lamp painted with birds and flowers and topped with a colored silk shade, a white rack of tin for letters. At first you might think it a toast rack, but you wouldn't want to put toast between flowers and birds in gaudy coloring. It's just the receptacle, however, for exciting things like letters.

Near a side door on a small table or from a hook on the wall place a bright green painted tin basket to hold the gardening tools. A garden hat of cretonne may hang from it. They will help in the decorative scheme.

In the sunniest window of the living or dining room you may have a white wicker flower stand. It is fitted with a tin trough which lifts out for refilling, watering of the plants, etc. An arch of white wicker extends over this box, and one can just imagine a small climbing rose finding its way along this trellis. A white bird cage is suspended in the middle directly above the plant box, where a silver throated canary may trill his loudest among the plants and flowers.

Right in the same living room or on the porch one may tuck this mending basket without any fear of its jarring on the artistic and critical eye. It is a nice, plump market basket of stout wicker, rather round as to shape. Two flaps of stiffened cretonne are edged with a cotton braid and maybe lifted up like the lids of a market basket. This will be found a dustproof hiding place for mending or light sewing when the outdoors beckons.

On Being Natural.

The world has established certain standards of etiquette for those who would be recognized as well bred and cultured. The earlier in life these standards are adopted the better for the woman. Fortunate, indeed, is she who has cultivated early in life a soft voice, poise, grace of carriage and the "pretty" way of doing things. She need have no fear that in a moment of excitement she will forget herself and be guilty of a faux pas.

Absolutely destructive of naturalness in manner is self consciousness. This affliction amounts at times almost to an obsession. It causes women to shout who wish to speak low; it leads often to an assumption of bravado, causing criticism that may be unjust, but is invited and unavoidable.

It is a gentle art, the art of being natural; one that is essential to every woman who wishes to be regarded as interesting, attractive and popular. No woman with an ounce of brains will allow herself to become the victim of affectation if she would get the most that is possible out of life.

Rich Strawberry Shortcake.

Two cupfuls of flour, quarter of a cupful of sugar, four teaspoonfuls of baking powder, half a teaspoonful of salt, one egg, a third of a cupful of butter, one tablespoonful of lard and a third of a cupful of milk. Mix carefully, roll in two cakes and bake in two pie tins. When browned split and butter generously, fill layers with fresh strawberries crushed in sugar, pile berries atop and over all pour a pint of sweet cream.

FOR THE CHILDREN

A Sleepy Time Story For the Littlest Folks in the House.

FORGETFULNESS OF A KING.

How He Caused His Daughter a Great Deal of Unhappiness—What a Fairy Accomplished—Boy Scout Who Won Honor For Well Doing.

Hello, said Uncle Ben to Polly Ann and Little Ned; I'm just in time to tell you a story. It is about

THE PRINCESS' WISH.

Once upon a time there lived a little princess. She was so beautiful that the king gave her anything she wished. One day she expressed a desire for a doll, a truly wonderful doll, that could talk and walk and sleep in a flower. This the king promised to get for her. He forgot all about it the next day, however, and was much surprised to hear his little daughter say to the queen: "Mamma, I am quite unhappy. Father has not yet given me the doll I asked for."

The king immediately sent out and got her a doll that could walk and talk and was so small that it could sit in a flower. But this was not what the princess wanted. She wanted a doll that really lived. In vain did the king advertise by heralds for such a doll.

Meanwhile the princess was sitting at the window gazing out at the stars. She did not care for the many beautiful toys lying around her. She had foolishly set her heart on that doll. A beautiful rosebush climbed up to her window and was literally covered with the sweet smelling flowers. While the princess was gazing at one of the buds she saw a little green worm creep toward the heart of it. Now, the princess detested any kind of a worm, but when she heard a timid, soft voice say, "Help me, ah, help me!" her heart was touched. Reaching forward, she brushed off the worm, which fell to the hard stone pavement below. Then a little flower spirit rose up from the flower and said to the princess: "For saving me from such a horrible death I will let you have one wish. Tell me what you want most." So the princess wished that she had a doll that could walk and talk and sleep in a flower.

The fairy looked grave. "There are only fairies that do all you want, and I know that I could not get you one. For the great service you have done me, however, I myself will be your fairy. But I cannot come off the rose vine, for I belong to one of the roses. You can sit here whenever you want to, and I will come and talk to you."

The princess was happy then, for she had all she wished. Forever after that, with the little fairy to guide her along the path of life, the princess lived happily.

Purpose of Boy Scout Movement.

"The work of this organization is toward the right kind of preparedness," said Governor Whitman to the scout masters of the Boy Scouts of America in a recent address in New York city. "I know that you are not primarily trying to make soldiers out

RALPH MAYER, BOY SCOUT.

of these boys, whom we have seen with so much interest today. I know that was not the original intention and is not. I know that the real purpose is to make men out of these boys, and the right kind of men—the kind of men who are going to make the right kind of citizens."

The boy scout standing at attention in the picture is Ralph Mayer of Pittsburgh. He is an honor scout.

Charade.

My first to a type of man brought fame.
My next is made by many cooks.
Of my whole perhaps you say the same,
Though the recipe's not in all cook-books.

Answer.—Hoe, cake—hoecake.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

The Cooky Jar.

PEANUT COOKIES.—One egg beaten till light, one-half cupful sugar, a cupful of chopped peanuts, two tablespoonfuls sweet milk, two teaspoonfuls baking powder, one-half teaspoonful salt and one and one-quarter cupfuls of flour. Drop on tins and bake a light brown.

Brown Sugar Cookies.—Cream a cupful of brown sugar and a large spoonful of shortening; add two well beaten eggs. Stir a teaspoonful of soda into a generous one-half cupful of sour cream and add. Add flour with a teaspoonful of cream of tartar and one-half teaspoonful of salt and flavor with nutmeg. Mix soft as can be handled and roll quite thick. Bake in a medium hot oven until a delicate brown.

Fig Bars.—Use any choice recipe for cookies, roll the dough thin and cut in long, narrow cakes, using a mustard box as cutter. After the baking pan is filled with shapes spread each not quite to the edge with cooked fig paste, brush the edge of each with cold water and set a second shape above it, pressing the two close together on the edge. Brush over with beaten white of egg, dredge with granulated sugar and bake about ten minutes. Lift from the tins with a spatula.

Fig Paste For Fig Bars.—Cook one-half pound of figs in boiling water to cover until the skins are tender and the water is mostly evaporated, add one-quarter cupful sugar and let cook a few minutes longer. Chop fine, let cool and use as above.

Brownies.—A cupful brown sugar, one-quarter cupful shortening, an egg, one-quarter cupful grated chocolate, a tablespoonful milk, one-half teaspoonful salt, one-half cupful chopped seeded raisins, one-half cupful flour, a teaspoonful baking powder. Rub sugar and shortening until light, add well beaten egg and chocolate, which has been melted over hot water; add the milk and mix all well together; add raisins and flour and baking powder; roll out on flourboard one-eighth of an inch thick, cut into strips or cut with biscuit cutter. Bake in hot oven ten to twelve minutes.

Sugar Cookies.—One egg, a cupful sugar, one-half cupful melted butter, one-half teaspoonful soda, one-half teaspoonful cream of tartar, about one-half wineglassful cream (or top of milk), just enough to dissolve cream of tartar and soda; flour enough to knead. Roll thin and sprinkle with sugar. Cream butter, sugar, eggs, cream and flour.

Anna Thompson

Rice With Cream Sauce and Cheese.

Throw half a cupful of rice into boiling water. After twenty minutes drain in a colander and flush with cold water. Pack in a deep dish and reheat in the oven. Make a cream sauce and add half a cupful of grated cheese. Pour over hot rice and serve.

JAPAN'S SENSE OF HUMOR.

It Seems to Be Too Subtle For Occidental Minds to Master.

Japan was the first foreign country where I saw moving pictures shown. In Yokohama one whole street is given up to moving pictures—Theater street. Great banners hang clear across it with the picturesque Japanese alphabet racing up and down them advertise the respective performances.

On the floor the audience sits, with their feet squarely turned under them, absorbed in the shifting shadows. The subtitles are in English, but so common is English coming to be in Japan that the meaning doesn't go over their heads. There is always some one to whisper the title's meaning.

American manufacturers have labored long and hard to find films that will amuse the Japanese, but their success has not been very marked. No white mind can fathom a Japanese's sense of humor. Our funniest films over there go flat. But in the midst of a death scene in some dramatic film they will suddenly begin to rock with merriment. There is a fortune in it for any one who will locate the Japanese bump of humor and manufacture plays that will hit it.

The Japanese are now manufacturing their own films, but they are not of much interest to white people, as nothing ever happens in them. There is no action. Half a reel may be given up to drinking a cup of tea. But this may be exceedingly funny to the Japanese, for there has been more going on than shows on the surface. By the way they lift their cups, by the way they swing their fan they are passing a message. Two Japanese can talk to each other with their fans, while the white man standing alongside understands nothing of what they are saying.—World Outlook.

A King's Ransom.

The expression "worth a king's ransom," though generally supposed to mean the ransom paid for a king, more probably refers to that paid to a king. In early times, when armies received practically no regular pay and the soldier's reward was the booty taken from the vanquished, each soldier had a right to the bodies as well as the goods of the prisoners he captured. The conqueror might slay his prisoner, sell him to slavery or set him at liberty on payment of a ransom. But, though it was the common practice in feudal times for the individual captor to receive the ransom for prisoners of low degree, those for princes or great nobles were always paid to the king, hence a king's ransom.

Chameleon Beaches.

The beaches of Snake Island, in the gulf of Mexico, change color twice daily with the tides. The sands are really of a golden color, and when the rising tide spreads the wide beach still remains gold, but when the tide ebbs they look quite purple, and this is accounted for by myriads of tiny purple snails crawling in the wake of the ebbing tide. It is to these snails that the island owes its name.

Origin of Music.

The origin of music is lost in antiquity. Among civilized people it probably originated among the Egyptian priests, who employed this art in their religious rites and ceremonies. From the Egyptians the art passed on to the Greeks and Romans and so on to modern nations.—New York American.

More Coming.

A DARK HORSE MAY BE ENTERED

Progressives Say Justice Hughes Must Declare His Position.

MANY DELEGATES IN CHICAGO

Of the 985 Delegates About 500 Are Now in the City of Chicago Awaiting the Opening of the Big Convention—Roosevelt Will Not Support Hughes.

Chicago, June 5.—Almost persuaded that Roosevelt cannot be put over as the Republican candidate for the presidency, his Progressive supporters are on a sharp shift in policy. They now propose to put a third ticket in the field, unless Charles E. Hughes will make a square-toed pre-convention statement on preparedness and the international situation.

Last night the Hughes prospects are little advanced. Those of Roosevelt are plainly dwindling. The new aggressiveness of the Roosevelt men has not yet had any noticeable effect.

Here are the important developments of the day.

1—Col. Roosevelt notified his followers over the telephone that he for one could not support Hughes unless Hughes would declare himself definitely. The colonel said that he had gulped one gold brick, meaning Taft, and he did not propose to pick another.

Want a Statement.

2—William Allen White, leader of Kansas: "We will take Hughes if he convinces us by a straight out statement that he is not another Wilson. We are satisfied with his record, but we want to know where he is on preparedness and foreign policy. If he don't tell us we won't nominate him."

3—E. A. Van Valkenbergh, editor of the Philadelphia North American, and a field marshal in the Progressive ranks, announced in as many words that unless Hughes comes across with an announcement acceptable to the Progressives a third ticket will be named, with Roosevelt at the head of it.

4—Augustus Gardner, who is fighting for Roosevelt inside the convention, announced his horror at the lack of Roosevelt organization. He said that unless Hughes comes to Chicago and takes charge all is lost.

Into an Ultimatum.

This distracted activity of the Roosevelt people was the chief feature of the day's entertainment. Today there will be an effort toward a formal conference with the Republican leaders, in which these scattered utterances will be compressed into an ultimatum. The colonel's folowers are pained but determined.

As for Root or any other reactionary, so pronounced are the Progressives in their opposition that one of them, Oscar Straus, will favor Progresive endorsement of Wilson if such a man is nominated.

The Hughes men will make a concerted effort to get together today. All day long the politicians in the train of the justice have been trying to check the disposition on the part of the amateurs to tie a can to Frank H. Hitchcock.

Hitchcock, it will be remembered, conveyed the impression that if Hughes is elected he, Hitchcock, will be head pie passer for the administration. This raised a row, naturally. But the Hughes men can afford to have no row just now. They want all factions united.

WILL MAKE OVERTURES

Progressives to Name Committee Calling on Republicans to Unite.

Chicago, June 5.—The first definite step toward a coalition of the Republicans and Progressives will be made today when a resolution will be adopted by the Progressive national committee looking toward a conference of representatives of the two parties.

The resolution will probably declare that the committee favors the appointment of a committee to call upon the Republican leaders for a conference as to ways and means for getting together.

There is a bare possibility that the resolution will not go so far, however, but merely express the sense of the committee that the January statement, approved at the meeting of the committee in Chicago, be confirmed.

In any event the meeting of the committee will be noteworthy in that it will produce the first public overtures by one party to the other for a union to defeat the present administration.

JUSTICE LOOMS BIG

Of the 500 Now in the Windy City 248 Were Said to be for Hughes.

Of the 985 delegates about 500 are now in the city. Of these 248 were counted for Hughes. If this is correct the justice will make by far the biggest showing on the first ballot, which now cannot come before Saturday. Whether by threat of a third ticket the supporters of the colonel can keep him from the nomination is something which everyone here in Chicago is now trying vainly to find out.

The telephone message from Roosevelt came late last night. It was given to a conference attended by Walter Brown of Ohio, George W. Perkins, Oscar Straus, Alexander Moore of Pittsburgh, Horace S. Wilkinson of Syracuse and other Progressive leaders.

It tied in with their ideas of what ought to be done. The statements of William A. White and E. A. Van Valkenbergh proved that Roosevelt as usual has a pretty good line on the sentiments of the men in his party.

AMERICAN TRADE HARD HIT

New British Ban on Imports Falls Hardest on United States.

London, June 5.—Order in council curtailing imports which will become effective June 8, strikes a severe blow at American exporters, as most of the articles on the list are imported chiefly from America, the only exceptions being beer from Denmark and matches from Sweden. The United States also suffers more than other countries, because as food cargoes come from America, very few exemptions are granted.

Cash registers are imported almost exclusively from the United States, and England lately has been a big market for all types of cash registers and adding machines. In the case of hops, of which the Pacific coast is a heavy shipper, considerable exemptions will be allowed. The reduction probably will be about 25 per cent. Other articles on the list, incuding sewing machines, wringers and manges, are imported in large quantities from the United States.

The latest restrictive order is tempered for American exporters by news that other restrictions on the importations of starch and dexterin, which is shipped in enormous quantities from America, has been removed as the result of protests by the Manchester cloth manufacturers.

VERDUN SCENE OF SEVERE ATTACKS.

Germans Make Desperate Attempts to Pierce French Lines.

London, June 5.—The region of Vaux and Damloup, northeast of Verdun, has been the scene of further attempts of the Germans to pierce the French lines. All the attacks were set at naught by the French fire, except a night attack between Damloup and Fort Vaux, where the Germans obtained a foothold in French trenches. From these, however, they were immediately driven out by a counter-attack.

The Canadian troops and the Germans have been battling fiercely on the Ypres salient. The German guns opened up several days ago, deluging the Canadian positions and the surrounding territory with shells. Then the German infantry advanced along an extended front of almost two miles, capturing the trenches. In a series of counterattacks in which bomb and bayonet played an important part the Canadians regained most of the lost ground and have reorganized their positions.

On the Russian front violent artillery duels are going on in the Bessarabian and Volhynian sectors. Several Russian infantry attacks against the Austrians were repulsed.

The Italians in the region of Arsiero are holding the Austrians from further advances in the desperate struggle that is going on in this region.

BATTLE SHOWS U. S. NEED

Rear Admiral Demands Provision for Dreadnoughts.

Philadelphia, June 5.—The United States should seriously regard the great naval battle in the North sea as an object lesson in its future preparedness policy, was the statement here of Rear Admiral F. C. Pendleton, retired.

The battle, he said, proved conclusively that battle cruisers cannot reckon with first-class battleships.

The necessity for congress to incorporate a provision for dreadnaughts in the naval bill authorizing the addition of five battle cruisers to the United States navy is self-apparent, he said.

WRECK DEAD PLACED AT 25

Many Bodies Still in Car of Train That Went Into Creek.

Waterloo, Ia., June 5.—The number of dead in the wreck of the Rock Island passenger train, which plunged through a bridge at Packard, Iowa, will reach 25, Chief Dunham, of the Waterloo fire department, who is directing the search for the bodies, said.

Up to noon six bodies had been recovered from the day coach, which is partly submerged in the waters of the creek. Rescuers reported that six or seven more bodies were visible in the car. Harry Farrell, of Louisville, who is missing, is believed to be among the dead.

According to railroad officials there were 50 passengers in the day coach. Of these only 25 have been accounted for. Several of the injured in the hospital at Greene, Iowa, were reported to be in a serious condition.

Marines in Santo Domingo.

Washington, June 5.—United States marines were landed at Puerto Plata, Santo Domingo, after the United States consulate there had been broken into and robbed. Consul Frank A. Henry, of New York, reported the robbery through American Minister Russell. There was some disturbance in the city. Minister Russell's dispatch to the state department said, but it had quited down.

Sweden Makes Military Loan.

Stockholm, June 5.—The Swedish government has decided to accept a vote of credit of 3,000,000 kroner to cover the immediate military needs.

ASKS FUNDS FOR MILITIA AVIATORS

Secretary of War Would Develop Aviation In National Guard.

BAKER SUBMITS ESTIMATES.

$1,000,000 to Begin the Equipment of Such Aero Units of the National Guard of the United States as the War Department May Authorize in the Future.

New York, June 5.—Federal plans for developing aviation in the national guards of forty interested states are contained in a letter sent by Secretary of War Baker to Alan R. Hawley, president of the Aero club of America, which was made public today.

The war department has asked congress for an appropriation of $76,000, Secretary Baker announces. This sum will be used for buying equipment for the militiamen and paying for the rent of a number of offices and for enlisted men at the United States Signal Corps aviation school.

Estimates Submit.

The letter continues:

"Estimates also have been submitted or $1,000,000 to begin the equipment of such aero units of the national guard of the United States as the war department may authorize in the future.

"After the appropriation becomes available should a state make application to the war department for the organization of an aero company as laid down in the tables of organization U. S. A., 1914, it would be favorably considered and probationary recognition granted for a period of one year from the date of inspection by an officer of the United States army provided the personnel of the units presented for inspection conforms with the standard of the regular army if at least four of the six officers of the organization are licensed air pilots and provided there is available for the use of the company a suitable flying field and at least one serviceable aeroplane."

Would Grant Funds.

If at the end of the probationary year the government finds the standard maintained, funds for standard equipment would be granted by the government on the following conditions:

Conformity to organizational standard of regular army.

Technical and physical ability of aviators.

Provisions for training personnel and care and maintenance of material.

Should the appropriation bill now before congress be passed, Secretardy Baker states that a circular will be issued explaining in detail these conditions.

MINERS REVERSE LEADERS

Ask Executive Board to Call Strike to Repudiate Scale.

Pittsburgh, June 5.—With only a few negative votes the special convention of coal miners of District No. 5, which had been in session more than a week in Union Labor Temple, has passed a resolution requesting the executive board of the United Mine Workers to declare a strike in the Pittsburgh tdistrict.

It is likely International President John P. White will be notified by telegraph of the action of the convention, owing to the exigencies of the convention.

A call issue previous to the present convention for a meeting of the executive board has already been made, and Pittsburgh may be designated as its place of meeting.

Delegates openly declared their lack of faith in the officers of District No. 5, though one resolution which emphasized this condition was ruled as unconstitutional by Chairman Frank J. Hays.

NEW STAMPS FOR ARGENTINA

Issue to Mark Centennial of Signing of Constitution.

Buenos Ayres, June 5.—The Argentine government will issue a new series of postage stamps in commemoration of the centennial of the signing of the constitution of the Argentine Republic. The stamps will be issued on July 9, the anniversary of the signing, and will be entirely different from any hitherto issued in Argentina.

The stamps from one-half centavo denomination to four centavos will bear a bust of Francisco Laprida, president of the first Argentine congress, held in Tucuman in 1816. The five centavo issue will bear a picture of the signing of the constitution, and the remainder of the issue will be engraved with a new bust of General Jose San Martin, the hero of the revolution which gave Argentina its independence.

Wilson Signs Army Bill.

Washington, June 5.—President Wilson signed the army reorganization bill, first of the important preparedness measures passed by congress in the present session. The president has been studying the bill carefully for more than a week. He used a pen belonging to Senator Smith, of South Carolina, who desired it for a souvenir.

TO BOOST THE NAVY

Col. R. M. Thompson Leaves for the Chicago Convention.

Washington, June 5.—Colonel Robert M. Thompson, as chairman of a special committee of the Navy league, has left for Chicago to make a plea before the committee on resolutions of the Republican convention for a naval preparedness plank in the platform. After the Chicago convention he will go to St. Louis.

The committee includes Henry Breckinridge, formerly assistant secretary of war. Colonel Thompson has arranged with Chairman Hilles of the Republican national committee for an opportunity to present to the committee on resolutions a naval preparedness plank.

MANHOLE LID AS JUNK

High Price of Metal Blamed for Thefts From City.

Alton, Ill., June 5.—Alton city officials are having unusual trouble trying to keep the lid on. In addition to the occasional tilting of the "Sunday lid," there has now arisen a new class of offenders who are lifting lids of sewer and other manholes and carting them away to be sold as junk.

One of the manhole lids weighs twenty pounds and in view of the high price of metal because of the war was sold at an attractive price.

Several cases of theft of manhole lids have been reported to City Engineer T. H. Landon, who is conning his brain to devise some way of forestalling the activities of the thieves.

TINKERS MEXICAN CURRENCY

Carranza Retires Much of Vera Cruz Issue From Circulation.

Mexico City, June 5.—A decree has been issued by General Venusitano Carranza retiring from circulation all the $100, $50 and $20 bills of the Vera Cruz issue. The bills cease to be legal tender in ordinary transactions after today.

Holders of the bills may deposit them with the government, receiving certificates payable in metallic currency according to lot drawings between the years of 1917 and 1921.

Notes for smaller amounts of the same issue will be removed from circulation June 30, when they are likewise exchangeable for deposit certificates. As all transactions in foreign exchange by private banking houses are prohibited, the money market has been greatly shaken.

Gets $3,500 for Mule's Kick.

Pottsville, Pa., June 5.—The supreme court, in an opinion received here, approved the award of $3,500 to Joeseph Klorwosky for injuries received by the kick of a mule. The Kaska William Supply company was the defendant, and while Klorkosky, a boy, was not employed by them, Judge Koch of this county ruled that it was the duty of the company to keep away from their mules. The boy was permanently injured, his teeth being knocked out and his jaw fractured.

Orphet Jury Still Two Short.

Waukegon, Ill., June 5.—The thirteenth panel was discharged here without filling the jury box that is to hear the case of William H. Orpet, the Wisconsin student charged with the murder of Marion Lambert. To date, 1,026 men have been examined and two places in the box remain to be filled.

EMPIRE DELEGATES ON WAY

Special Train of Fifteen Cars Required for the Party.

New York, June 5.—New York delegates and alternates to the Republican national convention left for Chicago aboard a special train of fifteen cars. Many others, including wives, sisters, cousins and aunts, went along. The number of women was unusually large. In all there were more than 200 passengers. Other delegates were picked up en route to Buffalo.

It has been agreed that on the way out there shall be no caucusing of the delegation with respect to its chairman or the stand to be taken on presidential candidates. Neither Gov. Whitman nor State Chairman Tanner is on board this train, and since the governor is the recognized leader of the Hughes advocates no action will be taken out of courtesy to him.

Everything seems to indicate that the governor will be chosen chairman of the delegation when the delegates meet formally tomorrow night. Up to the time of his leaving he also expected to make the nominating speech for Justice Hughes, while admitting that circumstances may alter that programme.

Will Fight For T. R.'s Nomination.

New York, June 5.—The declaration that the New York city delegates to the Progressive national convention would vote for the nomination of Colonel Theodore Roosevelt for president and for no one else was made today by John J. O'Connell, New York county chairman, just before he boarded a special train which will carry delegates, alternates and party enthusiasts to Chicago.

"We are prepared to fight to a finish against any one else being named," declared Mr. O'Connell. Other leaders in the delegation echoed the sentiments of the chairman.

Fairbanks For Second.

Sunday closing laws in Chicago, strictly enforced elsewhere, were not operative against politics. The crowd in the lobby of the Congress hotel, where the delegates stand with ears laid forward to catch the mandates of their bosses, overflowed to Michigan avenue and presidents and vice presidents were nominated all day long.

Of the latter the chief was Charles Warren Fairbanks of Indiana. Fairbanks came here with a big organization ostensibly for the first place nomination, but he will be contented with second place. And it is pretty certain that he will be the vice presidential nominee no matter who lands first.

Platform Makers in for Fight.

Chicago, Ill., June 4.—There were indications that a lively fight will be waged over at least three proposed planks of the Republican national platform. Woman suffrage, "Americanism" and preparedness are the question to be treated that threaten to make controversy in the resolutions committee and perhaps in the convention itself.

WEATHER EVERYWHERE.

BRYAN'S PART AT ST. LOUIS MEETING

Will He Play Great Role as He Has Done In the Past?

WON HIS FAME IN 1896.

With Only Fifteen Minutes Allotted Him He Swept Gathering Off Its Feet and Continued For Forty Minutes—One of the Most Thrilling of All Conventions.

What part will William Jennings Bryan play in the Democratic convention in St. Louis? This question presents one of the most interesting features of the gathering. He is an avowed pacifist; Wilson is in favor of preparedness. Will the peerless leader support the administration or not? These are questions that only actions can answer.

There is no doubt that Bryan has tremendous influence in the Democratic party. He is accredited with being responsible for Wilson's nomination at Baltimore. In this connection it is interesting to remember how Bryan obtained such influence in the party.

When the Democrats went to Chicago in 1896 the choice of a presidential candidate was a matter of secondary importance. The one big question before the party was free silver. In June the Republicans had declared for "sound money" and had chosen William McKinley as their leader. A big and powerful wing of the Democratic party was just as unalterably opposed to free silver. But the south and the west thought they had discovered in bimetallism a panacea for all ills, and they threw themselves into the fight with the fanaticism of religious crusaders. The convention took place in July.

The silverites were in absolute control. Led by Senator Stone of Missouri, they were more than twice as strong as the gold Democrats under the leadership of David B. Hill.

But in all the pages and pages of dispatches which poured into the newspaper offices before the convention assembled there was in the gossip about candidates no mention of the name of Bryan. He was unknown.

Hill himself had been up, not merely one night, but several. He was a fighter and had 300 other good fighters at his side. But the silver machine rolled over them all and left them flat. Hill's speech was answered first by Tillman, sporting a silver pitchfork and indulging in a harangue so fierce and uncontrolled that the galleries became disorderly and were threatened with expulsion.

Several other delegates followed Tillman, and then, with the time scheduled for discussion almost exhausted, Senator Jones called his last speaker. It is said that Jones had chosen Tillman, Altgeld and Bryan to speak for his amendment and that the first two had used up all but fifteen minutes of the allotted time. The remaining quarter of an hour really belonged to Jones. But he yielded it to Bryan.

Speech to Gallery Gods.

The speech that followed has been called "the greatest ever delivered to the gallery gods." He started with an allowance of fifteen minutes. He talked for forty minutes. Tillman and the other speakers except Hill had been interrupted by cries of "Time, time!" But the only breaks in the Bryan ovation came when roars of uncontrollable applause burst forth.

"We are clad in the armor of a righteous cause," declared the orator. And such was the power of his eloquence that they saw him in that armor instead of in the wrinkled coat and baggy trousers. "Old leaders have been cast aside, and new leaders have sprung up. The farmer is as much a business man as the stock gamblers on the board of trade. The miner is as much a business man as the few financial magnates who in a back room corner the money of the world.

"When we are asked why we say more about the money question than about the tariff we reply that if protection has slain its thousands the gold standard has slain its tens of thousands. They tell us the issuance of paper money is the function of banks and that the government ought to go out of the banking business. I say the issue of money is a function of the government and that the banks ought to go out of the governing business.

"The man who used to boast that he looks like Napoleon shudders today when he thinks that he was nominated on the anniversary of the battle of Waterloo. He can fancy that he hears in the distance the sound of the waves on the lonely shore of St. Helena.

"You tell us the cities are in favor of the gold standard. And I say burn down your cities and leave our farms and your cities will grow again. But destroy our farms and the grass will grow in the streets of every city in this country. [Great cheering.]

"My friends, we shall declare that this nation is able to legislate for its own people on every question without waiting for the aid or consent of any other nation on earth. [Cheers.] Upon that issue we expect to carry every single state in the Union. I shall not slander the fair state of Massachusetts nor the state of New York by saying that people of those states declare our helpless impotency as a nation to attend to our own business.

"If they dare to come out in the open and defend the gold standard as a good thing we shall fight them to the uttermost, having behind us the producing masses of this nation and the world. Having behind us the commercial interests and the laboring interests and the toiling masses, we shall answer their demands for a gold standard by saying to them, 'You shall not press down upon the brow of labor this crown of thorns. You shall not crucify mankind upon a cross of gold!'" [Tremendous cheering.]

KITCHENER AND STAFF DROWNED AT SEA

Cruiser Carrying the Great Commander Struck Mine—No One Aboard Saved

(By United Press.)

London—Lord Kitchener and his entire staff were drowned this morning when His Majesty's cruiser, the Hampshire was sent to the bottom of the sea off the Orkney Islands, near the cost of Scotland, and between 300 and 400 men in addition were lost.

The cruiser was bound for the continent, carrying Kitchener and his men to Russia for a conference with the Czar's military men.

While the British Admiralty is not in possession of definite news of the tragedy, it is believed generally in official circles that the Hampshire was struck by a mine or torpedo. The Admiralty admits that everybody aboard the cruiser was lost, learning also that two or three boats were seen by fishermen to leave the ship, but a rigid search for them fails to reveal their whereabouts.

Board Turns Down VanAmburgh's Plea

The Board of Public Works refused last night to permit Edward Van Amburg to install a curb gasoline tank before his place of business on West First street. In rejecting the Van Amburg application, the Board stated that a petition presented by thirteen property owners in that vicinity protesting against the tank, and the objections manifested when the Board made an investigation of the situation last week, made it impossible for them to pursue any other course in the matter.

Alderman Otto Malone, of the Second Ward, was present at last night's meeting to urge the Board to consider the Van Amburg application favorably, but when informed of the protesting petition, he admitted that favorable action in the face of such opposition would not be in accordance with a policy of fair dealing.

Among those who signed the petition against the tank were M. E. Reynolds, Dick Stewart, D. M. Sullivan, William O'Melia and several other business men and property owners in that section. The petition was not entered with the minutes of the meeting for some reason best known to those in charge and is now in the possession of President Wiltsie of the Board.

BOARD COULDN'T DECIDE UPON ROAD MATERIAL

A spirited debate, not previously advertised, featured the closing hours of a lengthy session of the Board of Public Works last night. William Slater, of Utica, representing the Standard Oil Company of New York, and John K. Hitchcock, of New York city, representing the Barrett Mfg. Company, of New York, were the speakers of the evening, and the discussion involved the comparative merits of asphaltic oil and Tarvia as dressings for city streets.

For the past number of years, the city has been using an asphaltic oil manufactured by the Standard Oil Company, known as Grade 6, for the treatment of macadam streets during the summer months. The oil treatment has always given satisfactory service, but Mr. Hitchcock undertook to convince the members of the Board that Tarvia B, one of the Barret products, was even more satisfactory, conditions being the same.

Mr. Slater quoted the Board delivered prices on asphaltic oils as follows, Grade 5, containing 50 per cent asphalt, .595 cents a gallon; Grade 6, containing 60 to 65 per cent. asphalt, .062 cents a gallon. The No. 6 grade was used here last year to the extent of 10,000 gallons. The company ships the oil in a tank-car which is equipped with coils for heating in cool weather.

Mr. Hitchcock offered Tarvia B at .055 cents a gallon, f. o. b. New York and said the freight would average about a cent a gallon. He contended that the Tarvia was less volatile than the oil, offered more resistance to heavy traffic because of its compactness, and was less susceptible to disintegration because of its water-shedding qualities.

Mr. Slater took up the defense of the oil treatment and produced statistics and statements by road superintendents in different sections of the state which tended to show that the oil treatment was the more satisfactory. He stated that three million gallons of oil had been used already this year in the treatment of roads, as compared to about one million gallons of tar products.

The members of the Board finally decided to make a personal investigation of some of the roads in this county which have been treated with Tarvia with a view to comparing the merits of the respective treatments. There was doubt in the minds of some of the members that the Tarvia treatment would prove satisfactory on a road that had already been treated with asphaltic oil, on account of the resistance offered by the oil to penetration of the Tarvia.

When Mr. Slater learned that the Board would take no definite action at last night's meeting, he withdrew the prices he had previously quoted telling the Board that constant change in production costs made that action necessary. The prices for asphaltic oils this year are well in advance of last year's figure, principally because of the war.

Frank Richardson, agent of the Ontario and Western R. R. Company appeared before the Board to urge the payment of long overdue freight bills, amounting to almost $400. Mr. Richardson is personally responsible for the payment of the bills, and he asked that the Board devise some means whereby he could get the money. The Board promised to take action at once.

Martin Dietrich, chief engineer of the city waterworks asked for an increase in pay for the night engineer and fireman at the works, stating that he is unable to keep a man at work at the present low salary of $50 a month. The Board raised the night engineer's pay to $60 monthly.

James Cole, and T. J. Wilson appeared before the Board, asking for permission to install gasoline tanks. Mr. Cole wishes to install a tank in front of his vulcanizing establishment at the corner of South First and Oneida streets. The Wilson and Scott company plan to install their tank on Cayuga street near the O. and W. station. The Board will make an inspection of both proposed locations this afternoon, before taking action.

John R. Sullivan was given permission to tap a water main for a sprinkler system in his store on West Broadway.

Alderman E. O. Baker appeared to complain against surface water in the vicinity of 6th and Fay streets. The Board ordered Frank Rumsey, superintendent to investigate the complaint.

Mr. Rumsey was also ordered to improve the condition of a sidewalk recently laid at 5th and Ontario streets. Alderman Van Valkenburgh appeared to complain against the walk.

James Twynam was given a permit to move a small frame house along North First street, from its present location near the Hunter tail race to state land 525 yards north. The house can be moved in about two hours, Twynam said.

Two water bonds of $1,000 each and $1,9?? interest which fell due June 1, were ordered paid by the city clerk.

BONDED DEBT IS REDUCED

Nearly $10,000 Lopped Off Since Jan. 1---Report Shows to Advantage System in Vogue.

A report of the city finances up to May 31, made public by City Chamberlain Adkins this morning, shows that the Lewis administration has succeeded in reducing the bonded indebtedness of the city exactly $9,100 since January 1, when the present administration took office. By the figures made public to-day, the bonded debt of the city is now $594,307.03, as against a debt of $603,407.03, on January 1.

The report also shows balances in various funds, a feature made possible by the installation of the requisition system in the variou city departments.

The report follows:

ASSETS.

Capital Assets—	
Fixed Properties	$1,157,099 13
Total Capital Assets	$1,157,099 13
Current Assets—	
Current Cash	81,527 99
Water rents receivable	1,158 21
Taxes receivable	49,513 95
Advances to be met by 1917 Budget	1,082 33

BIRTHS IN MAY IN EXCESS OF DEATH LIST

According to the vital statistics report sent to the State Department yesterday by City Clerk Allen, here were 28 births, 14 deaths and 9 marriages in this city during the month of May.

6,000 MICHIGAN KNIGHTS TEMPLAR TO MARCH

Detroit, Mich. — Nearly 6,000 Knights Templar, in black uniforms and white plumes, will march to the music of 20 bands through the streets of downtown Detroit tomorrow in the feature event of the 60th annual conclave of the Grand Commandery of Michigan.

The conclave got under way today when the first business session was held.

Commanderies from a score of Michigan cities will compete in exhibition drills on Belle Isle tomorrow.

WANTS SONS SENT TO INSTITUTION

Father Declines to Continue Responsible for Their Conduct---Department Will Investigate at Once.

Charles Pitcher, of West 4th street applied to-day to Commissioner of Charities James R. Somers for the committment of two of his children, Harry, aged 16, and Elvin, aged 14, to an institution for the feeble minded.

In asking to be relieved of the care of the boys, Pitcher stated that both had been attacked with typhoid fever some years ago, and that the younger son had been ill for six weeks with the disease. Since that time, he said, their minds seem to have become impaired, and they do not progress in school work, and frequently display symptoms of feeble-mindedness. One of the boys shows lack of retentive memory, while another shows signs of kleptomania. The father feels that neither is personally responsible for his actions, and as he is a hard working man he finds himself unable to give them the care their condition makes necessary. In order to avert any possibility of their becoming involved in serious trouble he asked that the Charities Commissioner commit both to some institution for atypical children, where proper instruction and care can be given them.

Mr. Somers will personally investigate the case, and if conditions justify it, some means of complying with the father's request will be decided upon.

CONVENTION TO DECIDE WHO GETS THE VOTES

(By United Press)

Chicago—What political party will officially be handed the support of 4,000,000 women's votes in the eleven "free" states at the November national election?

This question, the most important in the Woman's Party convention meeting here this week, was to be decided today by suffrage delegates when they assemble this afternoon at the Blackstone theatre.

The Woman's Party expects to place this vote where it will do the most good in helping to bring about national equal suffrage.

Political parties are to be given to understand that "Suffrage First" is the Woman's Party motto and that party platforms expecting to catch woman votes must be built accordingly.

A mass meeting will be held tonight at which prominent political leaders will speak.

To-morrow, 40,000 women will parade to impress the men politicians with the strength of suffrage.

The New York State banner to be carried in the parade was hand wrought by women artists in New York.

It was designed by Miss Anne Goldthwaite, artist, and among the women working on it were Miss Alice Morgan Wright, sculptor.

Mrs. Norman deR. Whitehouse will carry the banner at the head of the New York State contingent.

SPEED KINGS LINE UP FOR 300 MILE DERBY

(By United Press)

Maywood, Ill.—Entrants for the second annual Chicago Automobile Derby, to be held on the Speedway here June 10, were to hold their qualification tests here today, to-morrow and Thursday. There were more than thirty entrants and among them: Barney Oldfield, driving a Delage; Ralph de Palma, Mercedes; Dario Resta, Peugot; Tom Alley, Ogren; Billy Chandler, Crawford; Eddie O'Donnell, Duesenberg, and Lra Vail, Hudson Six.

There will be only twenty-seven entrants in the race which is for a distance of 300 miles, and each must make a speed of 90 miles an hour in the trials to qualify for the Derby. In case more than twenty-seven cars make the required speed, the cars recording the best marks will be entered.

Last Minute News

London—Emperor-elect and president of China, Yuan Shi Kai is dead, the end having come to-day at his home near Hong Kong.

* * *

Chicago—George W. Perkins in a statement issued this morning to the Progressives, delivers an ultimatum in which he says "it will be Theodore Roosevelt or no one as far as the Progressives are concerned; no second choice. Go to it."

* * *

New York—Theodore Roosevelt will support General Leonard Wood as the Republican nominee, if his name comes seriously before the convention, said the Colonel this morning.

* * *

Paris—German artillery is bombarding Fort Beaux, one of the Verdun strongholds, according to a statement issued by the War Office to-day.

* * *

London—Despatches from the Hague to London arriving since the big naval battle indicate a growing sentiment in Berlin circles in favor of the return of Rdmiral von Tirpitz to the position of Grand Admiral of the German navy.

JULIA SANDERSON BECOMES BRIDE OF LIEUT. BARNETTE

(By United Press)

New York—Julia Sanderson, musical comedy star, will be married to Lieut. Bradford Barnette, head of the New York branch of the United States hydrographic bureau here today.

Miss Sanderson's first husband was Tod Sloan, the jockey, from whom she was divorced four years ago.

The present romance is like the book of some of the musical comedies to which Miss Sanderson has lent her winsome personality. She met Lieutenant Barnette at a tea on board the United States battleships Rhode Island in Boston harbor six years ago.

"We just met by chance," smiled Miss Sanderson, "casually, you know, and though I have known him all that time, it doesn't seem long, and we really haven't had the opportunity to see very much of each other because he had been on foreign duty most of the time."

Mr. Barnette was graduated from Annapolis in 1904, having been appointed from New Jersey. While at the naval college he was prominent as an athlete, won several tennis championships and rowed on the varsity eight. He is a son of the late Rear Admiral W. G. Barnette.

902 STUDENTS IN ONE GRADUATING CLASS

Columbus, O.—The Right Rev. Charles D. Williams, bishop of Michigan, will deliver the commencement address at Ohio State university here to-day. Nine hundred and two students will be graduated.

ROGER WILLIAMS' KIN SCIENTIFIC FARMER AT 80

(By United Press)

Marion, O.—Sixtyone years ago today Eunice Concklin, a direct descendant of the historically famous Roger Williams of Rhode Island, and D'Estering Salisbury Covert, of Cincinnati, plighted their troth in the spacious drawing room of the picturesque Concklin home here.

The furniture and mural decorations of the room are the same as they were the day that Salisbury, now dead, claimed his bride, who is now in her eightieth year.

Despite her age she is a student of intensive and scientific farming.

She manages the largest agricultural lands in Marion county, left her by her father, who bought 2,000 acres from the Government for $1.50 an acre in 1821.

Mrs. Covert's mother, Sophia Sweetser Concklin, taught President Rutherford B. Hayes his letters in school at Delaware, Ohio. Mrs. Covert says that Hayes, when President elect, claimed Mrs. Concklin gave him his first start toward the Presidency of the United States.

Since receiving her large inheritance, Mrs. Covert has been her own business agent. With her farmer tenants, she plans the crops and is almost as active as when a girl.

She is busy every minute and claims she has never found time to grow old, that she is "always busy doing something."

WEATHER FORECAST.

Increasing east winds, reaching gale force to-night; rain to-night and Wednesday.

SELECTED EDITORIALS

Milwaukee Sentinel:

There are too many schoolbooks, they cost too much and they are changed too often. These three propositions are vigorously denied by the schoolbbook publishers, who quote government statistics to show that the average cost per child for school books each year is less than 79 cents.

Against the contention that there are too many schoolbooks the publishers admit this fact, but set up the fact that there are too many novels, newspapers, magazines and other periodicals, but they fail to point out that the public is not compelled to buy these, whereas there is no escape from the schoolbook tax. In reply to the charge that the books are changed too often they set up the claim that each generation demands new textbooks to meet the growing demands of the times. They overlook the fact that the fundamentals of educational textbooks are just the same in the present generation as they were two or three generations ago, granting, of course, such methods of imparting the information as experience and advanced methods of teaching have brought into demand.

It is easy to see that the schoolbook publishers are getting ready to make advances in the cost of text-books and it is a good time for the parents of the land to begin to fortify themselves against the efforts which will be made to still further tax them for the education of their children. Figures are not supposed to misrepresent facts, but more falsehoods have been spread through figures and statistics and especially government statistics, than any other means of conveying information. More millions of dollars have been mulcted from people through excessive profits on schoolbooks and the frequent changes which publishing houses have secured than any other expense imposed upon them, and it is high time to put a curb, if not a complete stop, to the schoolbook graft.

* * *

Pittsburgh Press:

How the European war will ultimately affect the Socialist movement which has been so great a power in European politics is one of the most interesting incidental questions raised by the struggle. It has been the theme of much discussion both in this country and Europe itself.

Among those who have no acceptance for either the aims or the working plans of Socialism there has, of course, been not a little disposition to argue that the failure of the Socialist leaders to defy conscription and be shot for their pains was a proof of their lack of sincerity. Although to an impartial jury this might look like drawing the point rather fine, the extreme conservatives of Europe nevertheless, stick to this exacting test, insisting that the Socialist should put humanity above country and peace above even humanity, refusing to fight no matter what the provocation.

A less harsh view is that a good Socialist may be a good Italian, or a good Briton, or a good German. The economic belief which is the essence of Socialism is not incompatible with most existing sentiments, including the sentiment of patriotism. And Herr Bebel, leader of the German Socialists, was none the less sincere a Socialist because he declared he would shoulder a gun for the fatherland. The British chancellor of the exchequer (Lloyd-George, now filling for a little while another post in the government) plainly displays Socialistic trends in the presence of great social and economic problems. The titanic efforts he is making to stir up a more enthusiastic support of the war policy of the government among English workingmen, who idolize him, do not impeach his good faith as a Socialist sympathizer.

Whatever the future of Socialism is, there is thus no binding reason for supposing that its fate is to depend on the fact that when [illegible] war in [illegible] their [illegible] it is true [illegible] and the outbreak of war r[illegible] -sider a breach in Socialism than in Christian solidarity.

The anti-Socialistic crtism of the Socialists for having proved themselves susceptible to patriotic sentiments even as other men might in the end works to Socialism's advantage rather than to its disadvantage. It is argued by Socialists themselves that it will help the movement with the mass of men and women in all countries who continue to cling to the old fashioned notion that there are few nobler virtues than patriotism, not of the buncombe sort which is seen occasionally in stump-speaking politicians, but of the genuine sort which leads a man to offer up his life for the sake of the common good.

In any endeavor to anticipate or forecast the popular attitude (we are, of course, speaking exclusively of Europe) toward Socialism when peace has been restored, all students of social and political tendencies are obliged to take account of another factor—namely, the surprising extent to which, under pressure of unprecedented military necessity, the belligerent governments are taking direct possession and control of great industries hitherto privately owned and operated and operating them as adjuncts of the public service. This is a most unexpected mode of extending the scope of present socialized production and administration. Yet, while it is a military expedient, it is a step in the direction in which organized Socialism has been trying to pull society, nevertheless. And that it is a step which the governments taking it will entirely retrace when peace comes would seem to be by no means certain.

* * *

Detroit Free Press:

The wife of a country minister recently stated that during her husband's seventeen years of service to the church and various congregations he had never received a salary over $700, while his first year's ministry was rewarded with $100.

The pitiful salaries received by the country clergy, not infrequently paid, as the minister's wife said, "in cabbage and potatoes," have often been the subject of comment. Such facts indicate that though the laborer may be worthy of his hire, he often has a hard time collecting it. The public, even church members, appear to feel that religion, being priceless, the minister's pay is immaterial. They heartily subscribe to the good old camp-meeting chorus,

> "Salvation's free to you and me,
> Bless God salvation's free,

but fail to recognize the messenger's needs. It is axiomatic that in a rural community—and not always there only, either—the minister and the doctor, who serve the soul and the body, wait longest for their dues, though their service to the community can hardly be reckoned in dollars. The impossibility of supplying the needs of a family and educating children, in addition to the demands upon a minister for charity and his own mental growth, is self-apparent. Much less can he provide for old age.

For this reason, and others quite as evident, the general movement among church societies to provide, in small measure at least, for the old age or disability of its clerical membership is most commendable. It is the live topic in the denominations today. It brought a large number of prominent clergymen to the Church Pension Congress held at San Francisco last July, at which it was estimated that the eight largest Protestant denominations will need to raise a pension fund amounting to at least $65,000,000 in order to pave with comfort the last mile of the old preacher's life journey. The adoption of a pension system would do much to attract more young men to the ministry, for no matter how strong the spiritual call a man feels, he cannot be blamed for hesitating to enter a profession which is so poorly paid, in general, that he cannot hope to provide for his own old age and that of those dependent upon him.

The soul of the inadequately paid preacher, no matter how strong his faith, must be strangely perplexed when he contrasts the stately cathedrals built in honor of the God he preaches with the deprivations he endures in order to spread the gospel message. Less magnificent churches and better rewards to the humble toilers in the field would seem more befitting the spirit of Christianity.

Opinions

Secretary of the Treasury McAdoo was the manipulator.

And the tune he played was the old, old time, "Vote for the Democratic ticket and enjoy the full dinner pail."

[illegible] McAdoo was in a jubi- [illegible] burn, and that the sky is the limit, so far as his credit is concerned.

This Utopian state of affairs Secretary McAdoo attributed not to war orders, but to the efficient legislation of the Democrats.

And nobody smiled.—Buffalo News.

How She Caught Them.

"How did you happen to get four times as many letters as I did?" said one washerwoman who had advertised for work by the day to another who had advertised for the same thing.

"Wound up my advertisement by saying I was on a diet," said the lucky one. "That 'on a diet' notice goes [illegible]

Railroads Should Be Permitted to Raise Rates to Meet New Conditions

By Professor ALBERT S. BOLLES, Haverford College

WITH the return of peace railway earnings will inevitably start downward and will thus continue unless the proper remedy be discovered and applied until all profits have been absorbed.

What, then, should be done? Clearly one of two things. Greater freedom should be granted to the railway companies to raise rates whenever new inroads are made by their employees and others, or their employees and all who furnish supplies should be restrained in their demands. IN OTHER WORDS, THERE SHOULD BE FAIR PLAY BY ALL WHO ARE ENGAGED IN THE COMMON ENTERPRISE OF TRANSPORTATION FACILITIES.

To restrict the corporate partner in this enterprise who has furnished all the capital and taken all the risk from saying a word about his profits, leaving the other partners or co-operators who have furnished labor and materials free to extract as much as they can or please from the common venture without any regard to the consequences of their conduct to the other partner, is not fair play. A plainer case of unfairness cannot be imagined.

Of the two alternatives perhaps the alternative is to be preferred to continue the public regulation of rates for transportation, and if the transportation companies cannot agree with their employees, the vendors of fuel, steel and other materials they are required to purchase, for the same authority that now fixes transportation rates to fix also the prices of labor, etc., commit to the interstate commerce commission both sides of the business.

TO CONTINUE THE DIVISION OF RESPONSIBILITY, LEAVING THE COMPANIES HELPLESS TO PROTECT THEMSELVES, IS TO CONTINUE THE PERIOD OF BUSINESS UNCERTAINTY AND GLOOM.

Bulbous Plants.

Many amateur gardeners when their bulbous plants are through blooming are in great haste to let the bulbs dry out and pull them up. This is a mistake. As soon as crocuses, hyacinths, tulips and narcissuses are through flowering remove blooms and begin a systematic preparation for next season's flowers. It must be known that just after a bulb has finished flowering is the time when it stores up nourishment for the next season, and if the flowers are not to degenerate in a few years the bulbs should be given attention. Give doses of liquid manure once a week for at least a month after the flowering is done and do not neglect to water the dry stocks. In this way one can materially help them to store up food. Rich soil is not necessary for very young plants, as they derive most of their sustenance from the air and moisture. The soil should, however, be kept light and porous.

How to Retick Feathers.

Get your new ticking ready for the beds, have it all sewed up, but have about ten inches open at one end. Now take your old tick from which you wish to change the feathers and rip it open about ten inches at the end. Then take your new ticking and sew it on to the old ticking, having the two openings together. Now you can shake the feathers from the old tick into the new without losing one of them. Before closing up your new tick turn your old tick inside out and pick all the down out of it and put into the new ticking. Now you can close up your new tick.

YOUR RAINY DAISY.

Dress as Well For Storms as You Would For the Opera.

The up to date business woman refuses to work in unbecoming garments, no matter what the weather may be. Rain or shine, she insists upon looking well dressed, knowing that her appearance is no small part of her success. The time has passed when the efficient worker was content to wear any sort of clothes. She dresses herself for the office just as immaculately as for a drawing room.

An essential to a neat, attractive appearance on a rainy day is some sort of waterproof coat. This need not be a hideous affair of rubber, drab in color, shapeless as to fit. Really smart waterproof coats are to be found in these enlightened times, one seen recently being in pewter gray waterproof tweed, designed to withstand the wickedest weather. It was lined with a lovely wedgwood blue shade of silk. The coat buttoned at the top with two large tweed covered buttons, or it could be worn open. It had two capacious pockets at the sides, and the garb was completed by a jaunty and sensible little hat in blue straw, with a gray ribbon and untarnishable steel buckle, and a pair of high waterproof boots.

The whole was a judicious mixture of the picturesque and the practical and proved that we can wear the most perfectly weather resisting garments and still look quite charming on a wet day. The idea that "any old clothes" will do for bad days is quite exploded nowadays.

Days You'll Never Forget

Manager McGraw Says Giants Are Sure Pennant Winners

Photo by American Press Association.

JOHNNY M'GRAW is the happiest manager in the National league right now. This is due to the fact that the Giants are the sensation of the parent baseball organization. McGraw got off badly and was beaten by all the eastern teams. In fact, many experts figured the Giants were sure cellar champions, but McGraw surprised 'em all. The Giants took all the western teams into camp in masterly fashion and are now the popular selection for pennant winners in the National league. McGraw says the team is the class of his league, and with an even break he figures the Giants will surely carry off the honors this season.

SOUTHPAWS BOSS AMERICAN LEAGUE

Side Wheel Twirlers Hold Upper Hand on Cleanup Hitters.

ARE NOW IN GREAT DEMAND

Left Handed Pitchers Being Held on to by Every Club to Mow Down Left Handed Batters — Right Handed Swatters Much Sought.

It may be true, as Chief Meyers once remarked to Fred Tenney, that all left handers are queer, only some are queerer than others. But in spite of their inherited handicap the side winders are coming into their own in baseball. They are becoming a mighty power, and in the American league especially they are about as valuable a pitching [illegible] a club can boast of.

When Manager Bill Donovan, in cutting down his club to the player limit the other day, kept Slim Love, the towering southpaw, in preference to two promising right handers he further emphasized the importance of the left hander.

That selection gave him three left handed pitchers in Love, Cullop and Mogridge. There are those who claim that three southpaws are too many for any club. In the National league and other circuits that may be true, but it dose not apply to the Johnson league, says a well known baseball writer.

"Take all the great hitters in the American league and almost without exception they are left handed batters. There are Cobb, Crawford, Eddie Collins, Baker, Fournier, Jackson and Pipp, just to mention a few who stand out as the most dangerous sluggers in the circuit. Now, it is my contention and my experience that it takes left handed pitching to stop left handed hitting.

"I claim that you can beat any club in the American league, with the exception of Washington, more consistently with left handers than with right handers. Washington is the only club that has no really dangerous left handers. What they call the dynamite in the batting order of most of the other clubs is composed of left handed hitters.

"Take Detroit as a starter, because it has the best hitting club in the league. Cobb, Crawford and Veach are the hitters, and they are all left handers. They either score or drive in more runs than the rest of the club put together. If you can stop Cobb, Crawford and Veach you have Detroit stopped dead in its tracks.

"The White Sox batting order is much the same. The real power is centered in Eddie Collins, Fournier and Jackson, hitting third, fourth and fifth and all swinging from the off side of the plate. Any time they are not hitting Chicago is not winning.

"The Cleveland club is depending right now on the hitting of Speaker and Smith. They have been driving in the runs. They are both good hitters and are apt to hit any kind of pitching, but they hit the right handed pitching better.

"The Yankees are in much the same boat as the others. Left handers are more effective against them. Baker and Pipp are the dangerous hitters. They are the only ones that really make the opposing pitchers nervous. And the result is that the Yanks have faced left handers in every series. The other managers are playing to their weakness. If they had faced right handers all this season they would probably be leading the league now.

"Shotton and Sisler are the bad men in the Browns, and Strunk and McInnis are trouble makers with the Athletics. Any time Strunk gets on the bases the Mackmen are apt to score, for he worries a pitcher.

"They will tell you that hitters like Cobb, Speaker and Baker will hit as well against one kind of pitching as another. I don't mean to say that you can make poor hitters of them by pitching left handers against them. But I do say that no left handed hitter likes a southpaw better than a right hander. They can't hit that curve going away from them as they can hit the one that breaks in for them. And that is the answer. If the great hitters in the league happened to be right handers the southpaws would not be of much value."

That this theory is now pretty generally recognized in the American league is indicated by the number of left handed pitchers. Boston has three and won a pennant last season. Chicago has three and was in the fight all the way. Detroit's best hurler, Coveleskie, is a southpaw. Cleveland carries three, and St. Louis has a trio of them. Clark Griffith has never found it necessary to burden himself with the fork handers, because he happens to have a pitcher in Walter Johnso who is so far above the rest that he makes all batting orders look alike. Yet he has Boehling and Harper in reserve.

BURNS' CASE IS PECULIAR.

Detroit's First Sacker, Benched For Poor Hitting, Makes Good Later.

The ability of George Burns, the Detroit Tigers' first baseman, to make good in the pinches has regained him his job at first, where Heilman was stationed for the first few weeks of the season.

According to report, Burns' case is very peculiar. First George was benched because he had a habit of striking out whenever a hit was needed. Then Burns got another chance, and out of twenty-four opportunities to drive in advance runners George came to time on seventeen occasions. A man who can do that cannot be kept out of the game, and the boy from Tioga has the first base job cinched for some time.

BELL-ANS
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

AN ECCENTRIC BOXER.

There is a lightweight in the middle west with a peculiar name and some equally peculiar ideas on training. The newcomer, who recently fought Ever Hammer at Kenosha, Wis., is known as the Bitter Root Kid. He does his road work with a sack full of rocks tied to each shoulder. He says this makes him tough and strong. He also does all his training after dark. The reason for this, he explains, is that, as he fights at night, it is necessary to become accustomed to the glare of the lights. He says that, as boxing is principally a question of judging distance and timing blows, it is better to train under the same conditions that obtain in the ring.

WAMBSGANSS REAL STAR.

Cleveland's Young Infielder Making Great Name For Himself This Season.

Bill Wambsganss, one of the Cleveland infielders, is playing great ball, despite that one of his eyes is completely closed because of an accident with which he met recently. It is his right eye which is affected, and yet he continues to hit and field like a star.

Fohl intended to leave the big fellow on the bench; but he reckoned without Wamby, who insisted on staying in the game. He explained that it might break up a winning combination to put him out of the game, and Fohl, taking the tip, allowed him to play, and he did his share to help the Indians win many games.

KILLIFER COMES BACK.

Phillies' Star Catcher Finds His Arm as Good as Ever.

Bill Killifer, the star catcher of the Phillies, whose throwing arm was believed to be dead, seems to have come back. He broke into the game recently, and the Phillies won several games as a result of his good work.

Photo by American Press Association.

BILL KILLIFER, PHILLIES' STAR CATCHER

The come back of Killifer means much for the Phillies. Eddie Burns has been overworked since the opening of the season, and it is only natural that his handling of Moran's pitchers did not measure up to the work of Killifer. That Alexander's original battery mate is back in harness is sure to make a big difference in the showing of the great pitcher.

LEONARD'S RING REQUISITES.

Possesses Coolness, Cleverness, Capacity, Courage and Crusher.

If Benny Leonard doesn't follow the highway that has been traveled by McGovern, Young Corbett, Nelson, Wolgast, Ritchie and Welsh in order there is a chance for him to be the greatest lightweight that ever lived.

This New York kid has every detail that fits into championship class. He looked faster and worked with even greater cleverness than Freddie Welsh, one of the game's master mechanics. He can hit with either paw, he can stand a hard, rushing pace, and there is no question about his gameness. He has the five big C's that are needed—coolness, cleverness, capacity, courage and crusher.

The lightweight who stops or eliminates Leonard will have no kick coming about a dull evening when the affair comes off.

Servian Customs.

When a Servian wants to say "Yes" he shakes his head, and when he means "No" he nods.

IN THE WORLD OF SPORT

Walter Johnson, Washington's Great Pitcher.

Photo by American Press Association.

Walter Johnson, the star pitcher of the Washington baseball club, is considered by all baseball fans to be one of the greatest pitchers the game has known. His work so far this season is up to the mark of previous years and a little better if anything. By his phenomenal pitching he has kept Clark Griffith's clan in the race for the pennant. Johnson's best year was in 1913, when he won thirty-seven games and lost seven. The following season he did not do so well, and in 1915 he was still below his best work. He is the swiftest of all pitchers and has thrown a ball 122 feet per second. Johnson is a native of Kansas and owns a fine ranch a few miles from Coffeyville.

The Light Harness Entente.

The understanding reached by the National Trotting association, the American Trotting association and the American Trotting Registrar association will be a source of gratification to those who have at heart the best interests of light harness racing. Not the least of the beneficient results will be a joint year book, in the publication of which the three bodies will each take active interest and which will be in effect a complete year's history of the American trotting turf, containing all racing and stud records.

The lack of some such authoritative and comprehensive manual as this has resulted in dire confusion in the past, and, save for extreme care in supervision of the sport, conditions would have been far worse. The absence of authentic data covering all tracks has afforded a wide and tempting portal for the entrance of the unscrupulous "ringers" and other offenders against turf laws and ethics.

Return of Bicycling.

Bicycling is again attaining prominence in the world of sport. Devotees of this splendid game have watched with enthusiasm the renewed activity the past spring. And that is as it should be. There is no more entertaining amusement than a trip through the country on a bicycle. It is fine exercise and invigorating. It requires skill and sometimes requires nerve to ride a bike. There are occasional hardships, too, but the returns in good health are well worth the inconveniences one must expect. A plentiful supply of money is not needed to enjoy bicycling. It is one of the cheapest, still one of the most enjoyable of sports. Its return to popularity is deserved.

The Soccer Championship.

For the second successive season that remarkable aggregation of soccer players, the Bethlehem Steel eleven, has won the championship of the United States Football association and the emblematic National Challenge cup. That soccer interest is increasing and that it waxes in some regions and upon some occasions into ardor is demonstrated by the fact that something like 9,000 persons massed in the field at Pawtucket, R. I., to watch the crucial game between the title holders and the Fall River Rovers.

Passing of Russell Ford.

Pitcher Russell Ford, who was recently given his unconditional release by the New York American league club, was one of the greatest sensations of baseball history in his first major year. For the Yankees, who finished second to the Athletics, he won twenty-six and lost but six games back in 1910. He shared the limelight with King Cole of the Cubs. These were the first two young pitchers who had won more than 80 per cent of their games in their first year in fast company.

Favors National Stadium.

The congressional committee on appropriations has reported favorably on the Hulbert stadium bill, which provides for the construction of a national playground to include a stadium, in which national and international games can be conducted, in East Potomac park, Washington.

Vegetable Growers Hold Divergent Views on Market Problem

Judging from the sentiments expressed at the meeting of twenty-five members of the Fulton Vegetable Growers' Association at Grange Hall last night, some new arrangements for the handling of Fulton lettuce in the New York markets may be made this year. As yet, no definite information has been received from the railroad and express companies regarding shipping facilities, and last night's session was principally for the purpose of informal discussion of representation in New York city.

In the past, four commission houses have been handling Fulton lettuce and last season, by agreement, all the members of the local association restricted their shipments to the four houses selected. Some of the members, however, report unsatisfactory treatment from certain houses, while others feel that two of the houses are not large enough to insure capable representation.

O. T. Day, one of the members, suggested at last night's meeting that two of the houses which handled Fulton shipments last year be retained again this season, but that the other two houses be dropped from the Fulton list, and two larger and more prominent commission houses substituted. He offered for the consideration of the members the following four houses, T. J. Roberts, Meaney and Saisselein, Covert Brothers, and Peter Macleese, the two last named to take the places of two other houses which received Fulton shipments last year. These four houses are close together in Washington Market, and Mr. Day argued that this policy of concentration of the shipments would work for better prices and handling.

Other members of the association disagreed with Mr. Day on several points, one man claiming that the Roberts company had never accorded him a fair price for his lettuce. A representative of Meaney and Saisselein was of the opinion that the concentration of shipments would serve to lower the prices instead of raising them as the buyers would be able to work one house against the other.

After some discussion it was moved that the selection of the four houses be postponed until the next meeting, in order that the absent members of the association might have a voice in the proceedings.

John Churchill suggested that the Fulton association ship to other markets this year in addition to New York city, and recommended that all the members keep in touch with the prices in Philadelphia and Boston markets. Several of the Fulton growers shipped to Philadelphia several times last season, and were always able to get satisfactory prices for their produce.

That the association should soon take under consideration the plan of engaging one man as a salesman or representative in New York, was another suggestion offered by Mr. Churchill. He said the money expended by commission merchants in sending buyers into this territory plus the money lost by the growers on account of low prices would pay any man handsomely, if a man could be selected who could efficiently and honestly represent the association. By Mr. Churchill's plan, the Fulton association salesman would sell the lettuce before shipment. This system is meeting with great success in other sections of the country, Mr. Churchill said, and if the local growers could unite in the selection of such an agent and accord him strong support, it would not be long before the commission men would be forced to co-operate.

Other members present deemed this plan impracticable, however, and no action was taken. The association will meet again Thursday evening, at which time communications from the railroad and express companies regarding shipping facilities are expected.

TOMORROW--Final Clearance of All High Grade

MRS. W. N. FERRIS
515 Elm St. Big Rapids, Mich.

CONSTANTIA PEOPLE ALLEGE CROOKEDNESS

After giving sixty one acre farm in Constantia Center, Oswego county, for a house in Syracuse, Mr. and Mrs. George H. Williams are dissatisfied, and have asked Justice Hubbs, in Syracuse, to cancel the trade. They received the house from John H. Bensley, through Louis L. Jennings, and both are named defendants.

The farm was worth $3,000 and only mortgaged for $275, the Williams claim. The house was to accommodate three families, but they say they found it held but one family. They charge that Bensley did not own the house, but acted as a dummy for Jennings, who represented himself as the agent although he was the real owner.

The fraud charges are denied by both the defendants who claim the house is worth $4,500. It was mortgaged for $1,500 making the equity equal to the value of the farm they say.

Gifts for June Brides

Utility and artistic design combine to make our Haviland China and Cut Glass pieces most acceptable to June brides. The reasonable prices place these useful and beautiful presents within easy reach of all.

Be sure to see them before deciding on a wedding present.

CENTRAL SQUARE WOMAN SEARCHES FOR HER SON

Syracuse.—Mrs. Vera G. Chateau, of Central Square, to-day began a state wide search for her son George Charles, of whom she was given custody in a Syracuse court yesterday. She claims her husband Charles E. Chateau kidnaped the boy two years ago and she cannot locate him.

The youngster was taken from the home of Mrs. Mary A. Covell, his mother's aunt, in a high power aoutomobile two years ago and his mother has not seen him since. She tried to get him by writ of habeas corpus but it was determined that the father has as much right to him as the moter. Then she brought the divorce suit and proving the case against her husband became entitled to the boy.

WEATHER FORECAST.

Probably rain tonight and Thursday; cooler Thursday.

Chamberlain's Cough Remedy.

Mrs. Maude Williamson, of Booneville, N. Y., writes: "More than once I have been thankful to know of Chamberlain's Cough Remedy. It has proved a very reliable cure for colds and coughs in our family. I have never had any hesitancy about giving it to the children because I know it is safe."

For Sale by all Dealers.

MISS ROBARGE MARRIED TODAY

The wedding of Miss Mary Louis Robarge, daughter of Mr. and Mrs. William Robarge, of this city, and LeRoy Holmes Wright, of Syracuse, was solemnized this morning at the Church of the Immaculate Conception. The wedding ceremony was preceeded by a nuptial mass, of which Rev. Father Lindsman was the celebrant.

During the ceremony, which was performed by Father Lindsman, Charles R. Wright sang Mascagni's "Ave Maria," accompanied by Bartholomew Wright at the organ.

Mrs. Asa Clothier, a sister of the bride and Dr. George L. Wright, of Syracuse, a brother of the groom, were the only attendants of the bridal couple. A large gathering of friends witnessed the wedding ceremony.

A wedding breakfast, at which several of the immediate friends of the couple were guests, was served following the ceremony at the home of the bride's parents.

Mr. and Mrs. Wright left on their honeymoon shortly after noon to-day. They will visit New York city and other points in the east, and on their return will make their home on Midland avenue, Syracuse. Mr. Wright is a civil engineer with the State Highways department in that city.

The Garland Stove Works is demonstrating the value of combination gas and coal stoves at the People's Hardware store. There's a good hot biscuit awaiting the women visitors. The exhibit lasts three days.—Adv.

CLOSE FIRTS WOMEN'S PARTY CONVENTION

(By United Press)

Chicago.—One thousand women from every corner of the United States ate luncheon today at the Auditorium hotel and listened to a dozen prominent equal suffrage speakers talk politics.

Today is the third and last day of the great convention of the Woman's Party.

The one thousand women sat at one hundred tables in the large ballroom in the Auditorium, satisfied that their first convention had impressed at least two political parties with the importance of 4,000,000 women voters in eleven "free" states.

Among the speakers at the luncheon were: Mrs. Dora Phelps Buell, Colorado, state factory inspector; Miss Anne Martin, Nevada, lobbyist; Miss Maude Younger, Mrs. William Kent, Mrs. Sarah Bard Field, California; Mrs. John A. Keating, Portland, Ore.; Mrs. William H. Sawtelle, Arizona; Mrs. Florence Axtell, Hellingham, Wash.; Mrs. C. S. Haire, Helena, Mont.

Many of the delegates to the convention planned to march in the Illinois Equal Suffrage parade to start at four o'clock this afternoon.

At a mass meeting tonight leaders of all three political parties are to speak.

AUTO CLUB RUN NEXT TUESDAY

The first run of the Fulton Automobile Club as announced by the committee in charge this morning, will take place next Tuesday, starting from the Plaza at four o'clock. The route decided upon will include a straight run to Hannibal, thence to Sterling, to Oswego and return by the East River road to Pathfinder Island, where a dinner will be served at 6:15 o'clock.

Automobile owners who are not already members of the club are cordially invited to participate in the run, but the committee asks that all who intend to make the trip shall notify Secretary Frank Morin by Monday morning, in order that the committee may make the dinner reservations.

A dollar dinner will be served, and the committee announces that the menu will be an exceptionally good one. The officers of the Pathfinder Club have completed arrangements for the opening of the club house Friday of this week, and an expert steward has been engaged for the season.

HANNIBAL THE MECCA OF BAPTISTS YESTERDAY

Several members of the First Baptist church of this city attended the Baptist County Association in Hannibal last night. The party left this city about 7 o'clock in the large Wilson-Scott auto-bus, and the return trip was made about 10:30.

CHAMBER WOULD HAVE AUTHORITY OVER FAKIRS

D. S. Hollenga, secretary of the Chamber of Commerce, asked the Common Council last night to issue to the Chamber a blanket license covering the control and license of all concessions operating in this city during the Old Home Week celebration early in July. Mr. Hollenga told the aldermen the city would be swamped with applications for concession privileges in a very short time, and that indiscriminate licensing would result in an invasion of fakirs, cheap gamblers, and operators of "strong joints" during Old Home week. He said he had already advised several fakirs not to come to this city during the celebration as they would not be permitted to operate.

He requested that the city transfer the selling of all licenses for concessions during Old Home Week to the Chamber of Commerce, the money derived from the license sale to be deposited in the city treasury. Under this plan, he said, each concessionaire would be subjected to a rigid investigation, and inducements would be offered to Fulton people to operate concessions in order that most of the money spent during the celebration would not leave the city. He wished the blanket license to cover the operation of carousels, swings, hoop-las, side-shows, in short, every form of amusement of any kind operating during the carnival.

Mr. Hillick was doubtful that such a license could be issued, and suggested that the Chamber be allowed to investigate each application for a concession before the city clerk should issue a license. In this manner, he said, the Chamber would exercise practically the same control provided for in a blanket license, and be relieved of the detail work involved. This arrangement was declared satisfactory by Mr. Hollenga, and under this plan, every person, who wishes to operate a concession in the city during the Old Home Week celebration must secure the approval of the Chamber of Commerce for his proposition before City Clerk Allen will issue a license.

You are especially invited to the

EMPIRE ROAD'S ADJUSTMENT

Syracuse.—Re-organization plans for the Empire United Railways will be laid before the readjustment committee of that line by Ford, Bacon and Davis, of New York city, within the next week or ten days.

This committee of which T. W. Meachem, of this city is chairman, represents the first and refunding mortgage, five per cent. gold bonds, stock and other junior securities.

These committees are the bondholders' protective committee of the Rochester, Syracuse and Eastern; the bondholdrs protective committee of the Syracuse, Lake Shore and Northern and the readjustment committee of the Rochester, Syracuse and Eastern.

It will remain for these committees to pass on the plan as submitted.

The members of the financial group from New York and Philadelphia who are interested in the scheme were here May 23rd and made an inspection trip over the road and held a conference with Clifford D. Beebe and William Nottingham. It is understood the new plan provides for the first mortgage bondholders selling out for cash, or to go into the re-organization as they prefer. Just what figure the plan would carry for the purchasse of the bonds is not known publicly yet.

Best School of All.

It cannot be but the author of the Greatest Show on Earth was right. The world likes to be humbugged, else why all this elaboration of educational systems and theories, educational forms and creeds; this multiplication of modern methods and didactic material? These are, indeed, but things that change and fluctuate and already are on the way to being superseded. Meanwhile the older and larger schoolroom of life never closes its doors, makes no bid for patronage, retains its old teachers, changes its methods not at all and continues to turn out the best pupils.—Laura Spencer Portor in Atlantic.

WOULD LESSEN THE DROWNINGS

More than 150 lives were lost by drowning accidentally and otherwise in the state's canals, and thus far during 1916 there have been 24 bodies taken from the waterways. In a few instances it was evident that death had ensued before the bodies entered the canals. In the hope of reducing the number of drownings Superintendent of Public Works Wotherspoon is making a study of ways and means for preventing such accidents.

While the saving of lives has never been officially regarded as a part of the duties upon bridge and lock tenders and other state employes working on the canals, Mr. Wotherspoon has become convinced of the need of naming to such positions only such men as are phyically fit to render such service and can be relied upon in times of emergency.

Life buoys, pike poles and coils of rope have been made a part of the equipment at each lock and bridge and at places along the canals where there are long stretches of vertical walls, wire cables have been placed near the water's edge with ladders at frequent intervals for the assistance of persons who fall into the water.

Canalizing of the upper part of the Hudson river and a greater part of the Mohawk river was expected to result in increased drownings but the statistics collected indicate most of the lives lost are in accidents in the old canals. The canalized channel of the Oswego river it is said is remarkably free from such fatalities.

Roads in France.

In France there are four classes of roads, respectively fifty, forty, thirty-three and twenty-five feet wide.

HAY PROSPECTS NEVER BETTER

Central New York's hay crop is to be of the A No. 1 variety, according to experts who have been going over the ground for the past two or three weeks. The corn and oat production depends upon the weather in the near-future, so they say. Prospects for both are very bright. Although it is rather late for planting many are putting in their fields and trusting to luck that the weather may yet bring about a good harvest.

Many fields are watersoaked from continued rains. The farmers say the rainfall must stop long enough for them to cultivate, after which only the best of weather with occasional showers will insure success.

The hay crop generally is very good, the farmers say. Now and then there are places where the grass is ground out but on the whole the crop is very good. Not all the oats have been sowed, it is said, and very little corn has been planted. The success of the corn and oat crop depends on occasional future rains and ideal weather conditions. Hay, it is believed will take care of itself from now on.

Some farmers are planning to put some fields in buckwheat the latter part of June. It is too late to sow oats, but many men are taking a chance because they have got to get the land seeded.

SIX MILLION ROSES IN PORTLAND FESTIVAL

Portland, Ore.—Portland to-day pays homage to Rose, Queen of Flowers. The tenth annual Rose Festival has begun.

More than 10,000 boys and girls from the public schools of Portland will present the pageant of the "Human Roses" to-day.

The festival center where more than 80,000 square feet is filled to overflowing with roses and other seasonable flowers is the greatest spectacle of the kind ever presented in the United States.

In the center of this vast display is a huge Rose Bowl, where more than 15,000 flowers are massed to form a floral and electrical fountain, the first of the kind ever built.

June is rose time in Portland and millions of flowers are in bloom in all parts of the city. The floral parade tomorrow will place on review more than 6,000,000 roses.

Fully 1,000 automobiles will be in the parade.

Artificial flowers are barred from festivals in Portland and the decorated automobiles and vehicles parade of 1916 will be the greatest procession of the queenly bloo, ever staged.

GADSKI TO SING IN BOWL DESPITE PROTEST

(By United Press)

New Haven, Conn.—Dutch Carter, who registered an objection to Mme. Gadski's appearing in "Die Walkuere" in the Yale Bowl to-day because of her husband's German activities, stirred up considerable of a rumpus several weeks ago, but Madame will sing to-day, just the same.

President Hadley said he would make no comment, but that the action of the university in asking Mme. Gadski to sing at the opera spoke for itself. Prof. Hiram Bingham said he thought Mr. Carter was mixing up Prussian militarism with German singing.

The following protest, which appeared in the Yale News is taken to indicate the sentiment of some of the undergraduates on the question:

To the Chairman of the News:

Sir—I understand that Hook McGlook has been engaged to supe in a German opera in the Bowl. I have it on accurate information that McGlook's wife is under indictment for stealing three pairs of coolie running pants from Yale in China, while serving as a laundress. As a Yale man and especially as an American I want to protest against Hook's engagement to supe in a Yale function.

Yale in China is of immense importance to the modern Chink, but the recent utterances of Klig, Fish and Leo, with their "I'm buyin' 'em" (a statement lacking in the fundamentals of English grammar and insultingly insinuating to the person addressed), together with the engagement of Hook makes me sore.

I don't suppose you will publish this because it is too direct, but I hope you will.

On Li Wun Lung.

The members of the Elizabethan Club published the following to-day:

To the Chairman of the News:

Sir—The engagement of Mme. Gadski to sing in the Bowl makes Walter F. Carter sore. It don't us.

Members of the Elizabethan Club.

The Business End of It.

"I would die for you," said the rich suitor. "How soon?" asked the practical girl.

CLEVELAND OPENS ART MUSEUM TO-DAY

Cleveland.—The Cleveland museum of art was opened to the public for the first time today.

The great white marble building, its lines accentuated by the deep green foliage of Wade Park, stands on the crest of a hill overlooking a lake. It required three years to build the structure, which cost $1,250,000.

At the main entrance are bronze statutes of John Huntington and Horace Kelley, who contributed largely to the museum fund.

The museum, of Greek architecture, has every modern equipment necessary, including a system of sprinklers to spray water on the sky lights to lessen the heat of summer's sun.

MARKET REPORT

New York Provision Market.

New York, June 6.

BUTTER—Creamery, extra, 30@30¼c&.

EGGS—Fresh gathered, extra, 23½@24c.

POTATOES—State and Western, bbl., $3.00@3.90.

Buffalo Provision Market.

Buffalo, June 6.

WINTER WHEAT—No. 2 red, $1.12.

CORN—No. 3 yellow, 76¾c; No. 4 yellow, 44¾c.

OATS—No. 3 white, 42c; No. 4 white, 41c.

FLOUR—Fancy blended patent, per bbl., $6.25@6.50; winter family patent, $6.00@6.25.

DRESSED POULTRY—Fowl, fancy, 21@22c; do., fair to good, 19@20c; old roosters, 16@17c.

BUTTER—Creamery, extra, prints, 32c; do., choice, 28@29c.

CHEESE — Daisies, per lb., 17½c; fancy flats, 16½@17c; do., fair to good, 15½@16c.

EGGS—White, hennery, 25@26c; do., mixed, 20½c.

POTATOES—No. 1 white, per bu., $1.30; fair to good, $1.10@1.25; sweets, per hamper, $1.00@1.25.

East Buffalo Livestock Market.

CATTLE—Prime steers, $10.25@10.90; butcher steers, $8.00@9.75; heifers, $7.50@9.00; cows, $4.50@8.00; choice veals, $11.00@11.75; fair to good, $10.25@11.75.

SHEEP AND LAMBS — Choice clipped lambs, $9.50@10.00; mixed sheep, $7.25@7.50.

HOGS—Light Yorkers, $9.10@9.50; heavies, $9.60@9.65.

Buffalo Hay Market.

Hay—Baled on track: No. 1 timothy, $23.00@24.00; do., No. 2, $20.00@21.00; do., No. 3, $18.00@19.00; fancy light mixed, $20.00@21.00; do., No. 1, $19.00; do., No. 2, $17.00; straw, oat and wheat, $8.50@9.00.

Cicely's Blunder

Story of a Girl and a Chauffeur.

By CLARISSA MACKIE

Mrs. Delmaine smiled across the hearth at her husband.

"I wish"— she began, and then stopped short at the glance of his twinkling eyes.

"Go on, Jean! Of course your wish has something to do with Cicely. What are you wishing for now, a titled foreigner to fall in love with our girl and carry her away to his feudal castle, where she will be miserable ever after?"

"Of course not, Daniel. I was wishing that if she must fall in love with some one it might be one of the Blair boys. They are delightful."

"She has never met them."

"I know it, but in visiting Aunt Agatha she is sure to see a great deal of the Blairs. They are next door neighbors and very intimate with Aunt Agatha."

"I thought they were abroad now."

"Mr. and Mrs. Blair and Betty are in Norway, but the boys are home. Peter is writing a book, and Bobby is cramming for his final examinations."

"Peter sounds the most eligible to me." Mr. Delmaine dropped his newspaper and grinned broadly. "Cicely doesn't want a husband who is too lazy to graduate with his class. Why, Bobby Blair couldn't earn his salt. I wouldn't have him in my office, not even if he was Cicely's husband! Don't worry about our girl, Jean, she shan't be hurried, and I trust her to pick out the right kind of man to marry, Blair or no Blair, money or no money!"

But Mrs. Delmaine shook her head.

"I know Cicely," she murmured pessimistically. "She will be perfectly sweet about it, but she will fall in love with Aunt Agatha's chauffeur!"

"Fiddlesticks! The man may be married. He may be as old as the hills. He may be anything but attractive! If you have such forebodings why let the child go at all?"

"Aunt Agatha wants her," was the conclusive argument.

So when Daniel Delmaine took his pretty daughter into his arms and bade her farewell he looked deep into her gray eyes.

"Dear," he said, "don't forget that you are a Delmaine and that we love you!"

And Cicely gave him back her straight, clear glance and smiled frankly. "Don't worry about me, Dads," she said.

As the train threaded the Long Island countryside Cicely wondered a little at the gravity of her father's face when he uttered that farewell warning. So far as she knew, she had never caused her parents an hour's anxiety unless it had been when she had been secretly helping the invalid wife of her music master and her mother had believed she had discovered a flirtation between the two.

Afterward, when the truth was out, Mrs. Delmaine had been only too eager to help little Herr Frickel and his sickly wife and send them to a more congenial climate.

Cicely suddenly remembered the little note her mother had tucked into her hand at parting.

"Read this on the train, dear," her mother had whispered.

Cicely took the note from her pocket and read with amused eyes that grew misty with tears:

"Dearest daughter," wrote Mrs. Delmaine, "don't, don't fall in love with Aunt Agatha's chauffeur. Some of them are very attractive, and you will break our hearts. Mother."

"The dear thing!" whispered Cicely as she tucked the note away. "As if a Delmaine could fall in love with a chauffeur!"

A handsome limousine car was drawn up at the platform of Rosewood, and the smart looking chauffeur came forward and touched a finger to his cap.

"For Oakwood, miss?" he asked.

"Yes." Cicely stepped into the car and handed the man her baggage checks.

"Thomas will bring the trunks later," said the man as he placed her dressing bag beside her and closed the door.

Cicely saw him walk down the platform, a fine, manly figure in the pale buff livery of Aunt Agatha's servants. He was young, with dark, clearly cut features and a firm, resolute mouth.

He handed the baggage checks to Thomas, who was a ruddy faced little Englishman, waiting beside a yellow trap.

Presently he returned and took his seat.

As they glided over the hard roads Cicely found herself watching that profile through the window instead of rejoicing in the charming panorama of rolling hills, dusky woods and sparkling blue sea.

Now they were within the gates of Oakwood, and Cicely was looking for the first glimpse of Aunt Agatha's alert little figure. Miss Agatha Delmaine was Cicely's great aunt and had spent so many years abroad that now she had returned Cicely found to her surprise that Aunt Agatha was almost a stranger and Oakwood an entirely new discovery.

"My dear child," murmured Aunt Agatha as she gathered Cicely into her arms, and over Cicely's shoulder she called sharply to the chauffeur, who was bringing Cicely's dressing bag: "Peter, how absurd of you! Give the bag to Arnold and come here."

To Cicely's surprise the chauffeur merely touched his becoming cap and stalked into the house with the bag to immediately return and run down the steps to his car. In a second he had cranked the machine and was gliding around the drive to the garage.

"This Peter person must be a privileged character," thought Cicely as she freshed her toilet for dinner, Thomas not having appeared with the trunks. She had noted a rather amused twinkle in Aunt Agatha's eyes even while she chided the chauffeur. "But auntie is not so lenient with the other servants. She was quite stern to Arnold when he was serving tea. Well, he is wonderfully good looking, and he looks more like a man than many of the indolent ninnies I have met in the last year. Mercy! What would father say?" she cried in dismay, and without another glance at her rosy face she hurried downstairs.

The morning after Cicely's arrival her aunt took her to drive. The two women, sitting inside the limousine, were separated from the chauffeur, so they had very little to say to him, Aunt Agatha simply giving him instructions now and then with reference to the route to take. Nevertheless these instructions were not given in the manner one would transmit them to a servant. It was "Don't you think the road to Hilton would furnish good wheeling?" or "I think we might as well turn here," or "Slower, please, Peter; I am not used to such rapid riding."

The next day Aunt Agatha said to Cicely:

"I have matters on hand that will prevent my taking you out today, and I shall have to send you alone. Peter will drive you, and since the limousine is too large for one I have instructed him to take the runabout. Peter will show you all the notable points in the vicinity, and you may talk with him freely. You will find him better educated than some society young men whose only accomplishment is dancing."

When the runabout was at the door Aunt Agatha went with Cicely out on to the porch and said to the chauffeur:

"Be careful in your driving, Peter. I wouldn't have anything happen to her for the world. Her father and mother, who adore her, have intrusted her to my care and expect me to send her back to them as I have received her."

"I'll be careful," was all the response the man made. Cicely got into the seat next the wheel, and Peter took the seat beside her. Then as they chug-chugged away Cicely turned and waved her hand to her aunt, on whose face was a very comical expression.

For awhile after starting Cicely said nothing to the chauffeur, and he, evidently knowing his place, made no remark. But, passing some institution comprising large buildings in spacious grounds, she asked him what it was. That gave him an opportunity, and he began to point out the different objects of interest along the road.

It was not long before the conversation became animated. Peter proved an excellent conversationalist, and Cicely returned delighted with her ride. After that she took a drive every pleasant day and usually with no other companion than the chauffeur.

Three weeks later Mr. Blair sorted the mail at the breakfast table and picked out a letter from Cicely.

"I wonder when she is coming home," said Mrs. Delmaine. "Aunt Agatha writes that Peter Blair—he's the writer, you know—has been paying marked attention to Cissy, and yet the child hasn't mentioned his name. She seems to have spent most of her time motoring around the country. I hope that Aunt Agatha has always accompanied her."

"Oh, nonsense, Jean! Stop worrying and let me read what Cissy says. You can depend on Cissy to—to— Heavens, Jean!"

He stared at her over the open sheet, and his face was very pale.

"Daniel! What is it?" she gasped.

He dropped his eyes and read mechanically:

Dear Father and Mother—I am engaged to the best man in the world. You will say so when you see him. He is Aunt Agatha's chauffeur now. Forgive me, dear ones, but I love him. CISSY.

Several hours later Mr. Delmaine still ministered to his hysterical wife when Aunt Agatha and Cicely were ushered in. Behind them stalked a tall young man looking amazingly contented.

"Mother," cried Cicely, flying to her parents, "I have brought him to see you!"

"Take your chauffeur away!" shuddered Mrs. Delmaine, and Aunt Agatha stared and then burst into a peal of merry laughter.

"Fudge, Jean Delmaine!" she chided, drawing the bewildered young man to the front. "It is true that Peter Blair acted as my chauffeur for a few weeks while my man took a vacation, but he is an excellent and careful driver and I am sure would make a good, kind husband for Cissy, here. Come, Peter Blair; come, Cicely, and receive your parents' blessing!"

And in the midst of all the laughter and tears and the happiness that followed Mrs. Delmaine shuddered.

"What is it, mother, dear?" asked Cicely quickly.

"I was thinking that—suppose he really had been a chauffeur. You might have fallen in love with him just the same!"

Cicely's lovely eyes met her father's and then passed on to her lover and rested there.

"There is nothing to worry about now, mother," she said at last, "but even if Peter had been a hodcarrier I couldn't help loving him for you know Peter is Peter, no matter what his disguise!"

And Aunt Agatha looked very wise indeed.

TWO BEN GREET PLAYERS.

ONCE again the Ben Greet Players are to be with us. It is an unknown thing for any organization to be returned on a Chautauqua program for the third consecutive season, yet because of the popular demand for their reappearance these well known players have been booked as the attraction on the second day of Chautauqua. The play given will be "The Merchant of Venice." The all star cast will include Miss Grace Halsey Mills, the leading woman of the Ben Greet Company for years, who will interpret the role of Portia. Miss Frances Carson, starring this season in the "Daddy Long-legs" Company, will play the part of Jessica. Mr. Eric Blind, who has appeared prominently with Ellen Terry, Sir Henry Irving, Miss Margaret Anglin, Miss Grace George and Granville Barker, will be seen as Shylock. This will be a notable presentation of this great drama of Shakespeare's and one altogether worthy of the tercentenary commemoration of the great dramatist's death.

LEGEND OF WILLIAM TELL.

The Story Was Old in Denmark Before the Swiss Borrowed It.

Do you know who shot the apple on the head of the little boy? Why, William Tell, of course! Everybody knows how Tell delivered Switzerland from the tyranny of Austria. At least everybody used to know. Unfortunately for pure romance, the historian and the investigator have been unduly active in the past quarter of a century, and the result has left us few heroes with enough clothing of romance to cover their skeletons.

We have read Schiller's beautiful and inspiring play, either in our college German course or in translation, and we cling to William Tell with all the ardor of youthful enthusiasm. And along comes the historian and tells us that it is all a myth, that the dates fixed by the Swiss chronicles on the subject do not coincide with the dates of the historic events that were supposed to be taking place in Austria at the same time and that earlier records of Switzerland make no mention of the archer's master shot.

The selfsame story is told in the Danish legends, two centuries before it crops out in the Swiss narrative, and further investigation shows that it was borrowed by the Danes, the original apple having been shot from the original child's head by a German bowman named Eigil, when King Nidung sought to test the man's skill and nerve. In that remote story it is related that Eigil concealed another arrow in his bosom with which to kill the king if he injured his child. John Fiske, the American historian, was largely responsible for robbing us of William Tell.—St. Louis Globe-Democrat.

JAPANESE STAGE CUSTOMS.

Actors and the Flower Path From the Green Room Entrance.

The profession of an actor in Japan is not considered a high one, says Mr. M. C. Marcus, the author of a work on the Japanese stage, and on the average they are not well paid. Still, there are exceptions. "When a play is staged it runs at least for twenty-three consecutive days. For such a term a first class man would earn about $1,200, and his annual income may be estimated at $7,500. But it must not be forgotten that out of this sum he must provide his own costumes, which are very expensive.

"The curtain does not rise, but is pulled sideways, and one can easily see the attendants who are intrusted with this work. The orchestra is hidden behind the scenery, while in a sort of proscenium box the reciter sits concealed behind a curtain of thin bamboo. There is no applause by clapping hands, as in our theaters, but the public stimulates the actors by exclamations in a way that may be compared to the encouraging and cheering of the dancers in Spain.

"From the greenroom a bridge leads to the platform. This bridge is called Flowerpath. The greenroom is closed by a drapery, which the actors of small parts must lift for themselves. When the performers have some importance and reputation they have an attendant for the purpose of lifting this drapery. But the first actors, as well of nogu (drama) as of kyogen (comedy), have the title taiya, which confers the right to two assistants to hold up the curtain of the greenroom for their entries and exits."

Sing a Song of Sixpence.

The London Globe's explanation of the rime "Sing a Song of Sixpence" is: "The four and twenty blackbirds represent the four and twenty hours. The bottom of the pie is the world. The top crust represents the sky. The opening of the pie is the dawn of the day, when the birds begin to sing, and surely such a sight is fit for a king. The king in his counting house counting out his money is the sun. The money the king is counting represents the golden sunshine. The queen, who sits in the parlor, is the moon. The honey she is eating is the moonlight. The industrious maid who is working in the garden before the sun has risen is the day dawn, and the clothes she hangs out are clouds. The bird that so tragically ends the song by nipping off her nose is the hour of sunset."

England's Coldest Days.

In his diary for March, 1658, John Evelyn records that the weather had been "the severest that any man alive had known in England. The crows' feet were frozen to their prey. Islands of ice inclosed both fish and fowl frozen, and some persons in their boats." For March 1667, he chronicles, "Great frosts, prodigious at the vernal equinox."—London Chronicle.

His Lucky Catch.

"H'lo, Jones: Hear you been fishing."

"Yep."

"When'd you go?"

"Four-thirty a. m. train out."

"Any luck?"

"Yep; great."

"What'd you catch?"

"Six-thirty p. m. train in."—Exchange.

No Change of Plan.

"And after they had married in haste I suppose they repented at leisure."

"No; they were perfectly consistent. They repented in haste also."—Richmond Times-Dispatch.

A Mistake.

"That baby takes after its father."

"Oh, you don't know anything about its father. He never would leave anything behind for even a baby to take."—Baltimore American.

INDECISION.

There is no more miserable being than one in whom nothing is habitual but indecision and for whom the time of rising and going to bed every day and the beginning of every bit of work are subjects of volitional deliberation. Full half the time of such a man goes to the deciding or regretting of matters that ought to be so ingrained in him as practically not to exist for his consciousness at all.

One Way to Smoke a Cigar.

"Here's a secret that it took me years to learn," said Uncle Joe Cannon, who, as nearly every one knows, is an inveterate smoker. "If you want to get the most out of a cigar light the 'wrong end.' Any man who smokes cigars to any great extent will tell you that he gets more real enjoyment out of the last inch of his cigar. Now, my plan is to light the last half first and get to the best part of the smoke as soon as you can. Of course you have to snip off the end that is supposed to go in your mouth before you can light the cigar, but if you try my plan you won't ever go back to the old fashioned way unless I'm badly mistaken."—Louisville Courier-Journal.

EGAN'S FIRST GOLF.

H. Chandler Egan had a somewhat unusual introduction to golf. He and his brother laid out a small three hole course in the pasture back of his father's house; then they invited their cousin over to show them how to play the game. Teeing up a ball on the first, he hit it straight down to the broomstick which served as a flagpole. The ball bounced along the uneven green and finally disappeared in the hole. Turning to his astonished gallery, he remarked, "There; that is the way you do it." Chandler Egan tried, but didn't quite succeed, and, although he won the amateur championship twice, he claims that he was never able to equal the wonderful drive his cousin made that day.

SAM CRAWFORD IS THROUGH.

Great Detroit Batter No Longer Fit For Regular Duty.

The opening stretch of this season has marked the passing of another grand old veteran of our national pastime. The horny hand of time, which gets them all in the long run, has finally grabbed off old Sam Crawford, the Wahoo barber.

Manager Hughey Jennings admits Crawford is through as a regular, though by no means through with the Detroit club.

"I am mighty sorry to have to admit that Crawford is through as a regular," said Jennings recently. "He has undoubtedly played his last season as a regular outfielder. He has been a grand player, and I hate to see him go to the bench, but he has slowed up.

Photo by American Press Association.

SAM CRAWFORD, DETROIT'S VETERAN OUTFIELDER.

"Sam is not old in years. He is only thirty-six, just in the prime of his life. But he is old as an athlete. He has served nearly as long a term in baseball as any active player in the game. I think only Lajoie, Wagner and Plank have played longer than he has. I intend to use him from now on as a pinch hitter.

"It seems to be the opinion that I benched Crawford on account of his hitting. I want to say that is wrong. It is true Sam has not been hitting as well as in former years. He has hit somewhere around .250. But for that matter I might just as well bench Cobb. He has not struck his stride yet either. If Sam had the speed he would never have to quit playing the outfield for me. His hitting suits me, but I expect to get advantage of it now through pinch hitting."

The passing of Crawford as a regular breaks up one of the greatest outfield combinations in baseball. But for all of his greatness and value to his club he was never a star of the first water, and only because of the presence of Ty Cobb on the same club. On any other club Crawford would have been the high light of his team and would probably have shared the limelight of baseball with Cobb instead of having to bask in the shadow of the great Georgian.

"If Sam had taken my advice," continued Jennings, "he would still be a regular. Two years ago I noticed that Sam was slowing up, and I wanted him to take up first base. We needed a man at that time, and I later got Burns. Sam had played first for us at times during our championship years.

"You would not notice that Sam was slow around first base. For that matter he is just as fast now as most first basemen. He can cover the ground and make the short jumps, but when it comes to getting over distance in the outfield the legs are no longer able to carry him."

New York's Large Motorboat Club.

The combined fleet of motorboat clubs of New York city is about 1,000 boats of various descriptions.

The Education of Marriage

By ELINOR MARSH

Jim Hawks was an ironworker. He was twenty-two years old and had a prospect of a long life ahead. He was a hard worker and very saving, his idea being to get a nest egg—for nature leads us all to build nests, and man can't do it as the birds do, by getting together a few straws and other such material. He must have money to pay for his domicile.

Young persons—very young persons—don't look upon matrimony with the misgivings of their elders. Jim's idea of a home was a comfortable house with a very nice wife in it, or at least a suit of rooms. He was to own the house and the wife and the furniture. The wife was to be there to minister to his wants and comforts.

Jennie Owens was the daughter of a widow. Jennie was twenty years old. She was a high school graduate and aimed partly to support herself and her mother, who had a little income, by stenography and typewriting. But Jim Hawks came along, talked very sweetly to her and in time induced her to marry him. Both wanted a home; both wanted to fulfill the destiny nature intended for them. This was all very well, but neither had been educated to matrimony.

Jim had his preconceived notions of what his wife should be to him, and she had her preconceived notions of what he should be to her. As soon as the honeymoon ended these preconceived notions began to clash. Jim's habit of saving money did not grow less with two to provide for. He kept control of the cash and pinched his wife for small expenditures. He had not been used to considering the requirements of any one except himself and needed practice to become used to considering those of another. He was not exactly what his wife expected to find him, and she thought that in certain respects she might make him over. She remained in their three rooms all day and when evening came needed a change of scene, to say nothing of recreation. Jim worked hard all day and when evening came desired to rest. Besides, going out required some expenditure, if only car fare. And when it was necessary to spend money he was used to spending it on himself. These things caused scraps, and the scraps gradually grew to be quarrels. Jennie usually had the right of the question, but did not know how to use it so as to impress her husband that he was in the wrong. While he was wrong in trying to dominate her, she acted uneducatedly.

One evening Jennie desired Jim to go with her to an evening party given by one of her friends. Jim wouldn't go. She said she would go alone and asked him to come to bring her home. He made no reply. She went, and since he did not come for her she remained at her friend's all night. She should have gone home early the next day, but instead spent the day and the night with her mother. On returning the next day she found her home deserted.

Here was a break between two persons who, if they could have been prepared for their parts, might have got over this early married period, have gradually become used to each other and settled down into a happy married life. What a contrast between this antagonism and the mutual dependence of ten or twenty years later!

Jennie made an effort for a reconciliation, but since she did not accompany it by a confession that she, and she only, was in the wrong Jim paid no attention to her pleadings. Then her mother advised her to let him alone. If he ever came to realize that he was giving up that which was pleasing and ennobling for his preconceived notions of what a wife should be to him he would very likely conquer his pride and return to her. If not she could do no more than she had done and the matter must adjust itself or remain unadjusted without any further action on her part.

For awhile Jim persuaded himself that he had acted the part of a strong man in asserting himself and in refusing to live with a woman who, as he expressed it, would "take the bit in her teeth and run away with everything." But he had been very happy for awhile in his home with his wife. His mother had taken his part in his disagreements with his wife, and he went to live with her. But he had reached an age when a man craves his own rooftree and hearthstone, and he was not satisfied. He met with an accident in his work, and, though his mother cared for him tenderly, he pined for his wife. Between her and him was a deathly silence. Jennie did not try to win him back to her. He was a man of strong will and must go his own way. Besides, no reunion could last unless he became satisfied that his wife had rights as well as himself.

One day Jennie heard a click at the gate and, looking out through a window, saw her husband coming. With beaming eyes and a smile she went to meet him.

"Jennie," he said, "I treated you brutally. Will you forgive me?"

"It was all my fault," she replied.

"You'll have to stand a lot if you come back to me. I've a bad temper."

"I'll try to correct my faults."

There were quarrels after that between them, but Jim made a rule that they must be made up the day they occurred. In time they came to regard differences on the same footing as other trials and the sooner mended the better.

CHICHESTER S PILLS

DIAMOND BRAND

Beware of Counterfeits. Refuse all Substitutes.

LADIES!
Ask your Druggist for CHI-CHES-TER S DIAMOND BRAND PILLS in RED and GOLD metallic boxes, sealed with Blue Ribbon. TAKE NO OTHER. Buy of your Druggist and ask for CHI-CHES-TER S DIAMOND BRAND PILLS, for twenty-five years regarded as Best, Safest, Always Reliable.
